Meanwhile, the supply of technicians will have to come from schools providing vocational training. India has decided upon a far-reaching development of the "multipurpose higher secondary school," which can provide not only candidates for university training, but some training in vocational areas as well. The vocational phase of the existing multipurpose high schools, however, needs to be more adequately developed. A technical cooperation project is now concerned with providing assistance in this respect. Twenty-six multipurpose higher secondary schools, covering all of the states of India, have been selected as demonstration schools. Curriculums have been worked out and accepted; an Ohio State University contract team has participated in some 92 workshops, seminars, and conferences—many of which were directed especially toward vocational education; plans have been drawn for four regional vocational teacher-training colleges; and a program for participant training in the United States, beginning in this fiscal year, has been adopted, involving key Indian personnel for the multipurpose higher secondary scheme.

FAR EAST

Vietnam: The development of Vietnam, especially its human and economic resources, is dependent in a large measure on the educational opportunities provided for its people. Since 1952, assistance has been given in providing adequate leadership and facilities for the training of teachers, professors, and administrators in academic, professional, and vocational fields. A total of 172 participants have been sent abroad for study in the fields of elementary and secondary education; teacher training (normal school, college, and university); leadership training; and technical vocational education. Approximately 34 inservice training workshops have been conducted with over 3,000 people in attendance. Between 1956 and 1958, 900 students completed beginning courses in the English language.

While there has been a severe shortage of trained and skilled personnel which accounts in part for a low and undiversified agricultural and industrial production the basic problem has been an acute shortage of schools and equipment. They are woefully inadequate at every level. It is estimated that there are from 750,000 to 1 million children of elementary school age not in school primarily because of a lack of facilities. As a means of attacking the problem, assistance has been given with the construction of badly needed buildings and classrooms. From 1952 to 1959, 2,156 elementary school classrooms and 192 secondary school classrooms have been constructed with U.S. assistance. Working drawings for 38 new science laboratories have been made and 16 of these facilities have been completed and equipped.

A new national normal school with a capacity of 1,000 students has been erected, and partially equipped, in Saigon, and another new normal school with a capacity for 50 students in a rural area. A new faculty of letters building with a capacity of 1,200 students has been erected and partially equipped. Plans have been made for the construction of (1) a new elementary demonstration school for the national normal school, (2) two new rural normal schools, and (3) a new faculty for pedagogy building with a secondary demonstration school. Facilities for the new Phu Tho Vocational School have been completed except for the installation of heavy-duty electric wiring in the school shops. The preparation of architectural plans and arranging for construction bids is well under way for the Hue Technical School and Nha Trang Apprentice School.

Without the necessary instructional materials teaching and learning are severely handicapped. To meet the urgent need for textbooks USOM assisted with the printing of approximately 1 million copies of such basic texts as arithmetic, physics, civics, history, etc., of which 80 percent have been already distributed to the schools.

Korea: Through higher education the economic development of a country may be greatly accelerated. In Korea, Seoul National University has been given assistance with 4 of its 12 colleges. Eighty-three of the 122 Seoul National University staff members who were sent to the United States for training have been returned to the university and are actively engaged in using improved teaching and research methods, development of curricula, and general administrative leadership.

Cambodia: The reduction of illiteracy through education is a major concern to many countries in the Far East, including Cambodia. To meet, in part, the pressing emergency of providing some training for new teachers, who are greatly in demand,

a series of summer schools has been offered. To date, approximately 6,000 teachers (fresh graduates from the sixth grade) have received their only training in these courses. As a means of providing more adequately prepared teachers, a national elementary teacher training center for approximately 500 students was built and equipped.

Thailand: The effort to improve education in Thailand has been an outstanding example of cooperation between United States and Thailand. Achievements to date include the training of 11,000 teachers in regional centers, 12 countrywide conferences with 1,800 educators participating and 60 workshops and seminars. Approximately 20,000 teachers received inservice training. A large number of these teachers had only a seventh grade education.

Regional projects: A regional approach to the technical assistance in education was introduced first in the Far East. Two projects are currently underway: (1) The southeast Asia regional English project and (2) the SEATO Graduate School of Engineering.

The regional English project aims to increase the numbers and standards of English-speaking persons in Laos, Thailand, and Vietnam. There are four phases in this project: (1) Analysis of the local language of each country, (2) preparation of teaching materials for teacher training, (3) establishing an improved training program, for teachers of English as a second language, and (4) training secondary schoolteachers in at least one major institution in each country.

Progress to date shows that No. 1 above has been completed and in step No. 2 the completed drafts of texts and manuals for teacher training in the three countries have been made and drafts started for the lower level of secondary schools in Thailand. Phase 3, the training of teachers to teach English as a second language, indicates the following accomplishments: (1) Curricula for teacher training programs completed; (2) 70 teachers of English trained in the regular course of instruction; (3) in-service training seminars held for 160 teachers in the rural areas; (4) instruction of 25 students in English at the Faculty of Letters in Saigon; and (5) four teachers have been sent to the University of Michigan for 2 years of advanced training.

The SEATO Graduate School of Engineering, with a teaching staff and student body supplied by SEATO member countries, is the first school of its type in southeast Asia. The aim of the project is to meet the rapidly developing need for well-qualified engineers, especially in the fields of water resources, highways, sanitation, and hydraulic and structural engineering. This is an international graduate school of engineering which has been planned, established, and is now in operation. Basic classroom laboratories and administrative facilities have been constructed or remodeled and the furnishing of equipment has been largely completed.

Mr. DOWDY. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. DOWDY. Mr. Chairman, as in former years, I am opposed to this foreign aid bill, and more so with the swollen amounts herein authorized.

I can neither justify nor rationalize giving away our resources, and putting this greater burden on American taxpayers, who are already suffering under an overwhelming tax burden. Furthermore, our national debt is so huge that only wastrels would think of making gifts of money that we do not have.

I fail to see how anyone could vote for these gifts to Communist alien dictators, and actual as well as potential enemies, when there are so many needs and needy people here in our own country. These huge sums of money would better serve us and our economy if kept here in America. I hope the majority will join me in bringing this fantastic scheme to an end.

Mr. McCORMACK. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I have voted for this legislation in past years. I am going to vote for it today—and with no apology to anyone. I voted for it because I consider it to be in the national interest of my country. A little over 20 years ago there was a man by the name of Hitler in this world. There were Members then who said that Hitler was a man of peace. I can remember 3 months before Pearl Harbor, on a bill to extend the selective service act for 1 year, that bill passed this House by only one vote—by a vote of 203 to 202. Those of us who voted for the bill were called warmongers. Where would our country have been after Pearl Harbor—where would our country be today if those of us who voted for the bill which was passed by only one vote, had not done so.

Mr. Chairman, it is one thing to discuss the policy and theory of a program and it is another thing to criticize certain actions or to talk about instances of corruption in a program. I do not believe that I am justified in "cutting off my nose to spite my face." A little over 20 years ago, we saw Hitler take over the Ruhr. He was allowed to get away with it, hoping that he would be satisfied and stop. But, he was not satisfied and he did not stop. Then he went into Sudetenland. He was allowed to get away with that—again in the hope that he would be satisfied. But, of course, he was not. He then went on and took over Austria. They let him get away with that, hoping that he would be satisfied, but he was not. He went in and took over Czechoslovakia, and they let him get away with that, hoping that he would be satisfied, but he was not. Then came the pact of Munich. Chamberlain went back to England with his umbrella, parading as an apostle of peace. Then came the ravage of Poland and World War II.

What does it mean? You have lived it. I have lived it. Have we forgotten it? It means that uncertainty and weakness and lack of firmness is the road to war. We find symptoms around the world today of the same kind. If anyone here thinks Khrushchev is a good boy because of his wooing conversations, they had better wake up quickly from their dream world.

We pick up the paper this morning and find where the Soviet Union spurns the United States plea on disarmament. You heard Khrushchev several weeks ago talk about the ability of the Soviet to destroy the world with their nuclear power. The intent of world communism has not changed, to revolutionize and dominate the world. The techniques only have changed. There is no change in what they intend to do. If anyone thinks there is a change, they are living in a dream world today.

Now, this legislation—I am talking about a program—certainly it stopped Greece from becoming communistic. It has stopped other nations from going communistic. Europe would have been communistic 12 years ago if we had not done what we did. We did it in our own national interest. It certainly would not be for the interest of the United States to have the world dominated by communism. Oh, my friends speak against this bill. Their motives are just as good as mine, but their judgment on the selective service bill was not as good as mine. I judge no man, but I have a judgment. This legislation is a part of our national defense. It is in the national interest of our country. Oh, they come down here and talk about some students. Then they create opposition against the whole program. What will happen if we do nothing? What would have happened 10 or 12 years ago if we had done nothing? Italy would have been communistic. France would have been communistic. Greece would have been communistic. It would have been a communistic-controlled world against America. So I am for this program in no apologetic way.

The CHAIRMAN. The time of the gentleman from Massachusetts [Mr. McCORMACK] has expired.

Mr. O'HARA of Illinois. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, before the confusion spreads, let me contribute a bit of light to the subject of a proposed educational program for tropical Africa, which was mentioned by my good friend from Louisiana [Mr. PASSMAN] and my other beloved friend, the gentleman from West Virginia [Mr. BAILEY].

The special program for Africa is included in the special assistance authorization, and our committee has been assured that $20 million will be allotted to this program. In my opinion, it will prove one of the wisest investments we have ever made. The Secretary of State says that in the foreseeable future Africa may have as many as 30 or 40 seats in the United Nations. The wealth of Africa is tremendous. Its future is a challenge to imagination. If we lose Africa, the understanding friendship of her new governments, the hearts and minds of her people, we have lost the world.

The special program for tropical Africa is patterned to the need immediately for trained civil servants by the new nations emerging almost overnight. As the new nations are coming into being, there is need for trained civil servants. It is a situation comparable to our own when war came to us and we had to have officers but could not wait 4 years for their graduation from West Point and Annapolis. We established 90-day officer-training camps.

From this program now under consideration of 90-day training courses for African civil servants will come men and women reasonably prepared to operate the governmental machinery in these emerging African nations. Is there anything foolish about that? Help, too, will

be given to existing colleges in tropical Africa and aid in the opening of new schools. Is there anything foolish about that?

I would not wish any confusion incident to a debate on the touchy subject of foreign aid to becloud the soundness of the special African program. We rejoice that lands long under colonialism are attaining the dignity of independence and the best help we can extend in doing our share in preparing them for the large responsibilities of self-government is in the field of education.

We have almost missed the boat in tropical Africa. We have been so absorbed in the Far East that we almost forgot there was a continent of Africa. Now we are trying to do something, something sound and constructive which will reach into hearts and minds and create lasting friendship, and I do not like to see any of my colleagues come into this well and give the impression that this is a case of spending the good money of the American taxpayers for foolish purposes.

Mr. Chairman, I yield back the remainder of my time.

Mr. FULTON. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, the question is not whether we should set a new policy for the United States but whether we should carry out the bipartisan foreign policy of the United States instituted by President Truman and carried on by President Eisenhower. This is not the time or place to decide this overall foreign policy; this is the place to decide method of implementing a settled policy that has been tested through the past years.

We must look at the larger picture of our U.S. security, not just at the relatively few failures there have been considering the total size of the program. I would like to quote to you the remarks that were made before our House Foreign Affairs Committee by Thomas Gates, our competent and able U.S. Secretary of Defense, when he appeared before the Foreign Affairs Committee on February 23, 1960.

My last point—

Mr. Gates said—

concerns the return we receive on our investment.

I know of no program which rewards us better. In terms of actual military strength, the results are impressive. In 1947 every nation had to go it alone for want of strong leadership which only the United States could give and therefore the entire free world was no stronger than the weakest link.

Today we and our allies are in a far better posture. The armies receiving military assistance have increased from 3½ to 5 million men—

Adding my own comment, that 5 million men added to our own competent U.S. forces of approximately 2½ million men gives us 7½ million men in the free world to defend us. Reading further—

allied navies have increased from 1,000 to 2,200 combat ships; allied air forces have increased from about 17,000 to over 25,000 aircraft, about half of which are jet. All allied forces are better trained, better equipped, and better able to perform their assigned missions in the framework of our total strategy. Their self-confidence is strong. Their determination to resist has become steadily firmer. They know that the United States stands with them and, accordingly, when the going gets tough—as it can be made tough by the Communists even in time of peace—they do not falter or fall back.

Of course, it may be said that the program this year is largely carryover of the military authorization, but it is part of our whole U.S. mutual assistance program. We must give various countries defense support so that they can maintain these armies and maintain this defense posture with us. We American people must remember we are now not fighting a hot war, and that the United States is relatively prosperous in an uncertain world.

Our American people cannot sit with bulging warehouses and unused and growing surpluses and expect the other people of the world to love us, like us, and help us defend ourselves. We as a nation have to be part of the world with its mutual problems of progress and defense, and one of our free-world responsibilities is the continuation of this program. We must assume our responsibilities to our friends and allies regardless of party.

Do not listen today to voices that might sound as if there is a large disagreement among the American people on the worth of this program and I direct that remark to the new Members. There is not. This program passes this House by almost a two-thirds majority practically every Congress. This present bill to continue the mutual security program will go through by a very large majority in this Congress.

Mr. GEORGE P. MILLER. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield to my friend, the gentleman from California.

Mr. GEORGE P. MILLER. The gentleman said they would not love us, or trade with us. Is there not the great danger that they may become covetous and there is danger actually from that standpoint?

Mr. FULTON. Yes; that is a very good philosophic and religious comment. There is no doubt we will be one of the most hated groups in the world if we do not accept our world responsibility for mutual security and progress.

Let me show you what would happen. Shall we pull our troops back of the 38th parallel in Korea, and let the whole country cave in by withdrawing the support for South Korean forces jointly holding the line with us? Shall we pull our support from Formosa and let Red China endanger and breach our U.S. Western defenses based on the island chain in the western Pacific? Shall we withdraw our support of Greece and Turkey and Pakistan, and let the Middle East fail and head for its destruction? Should we withdraw our support of Israel in her good progress, even under great difficulties, when she is unjustly barred from use of the Suez Canal? Shall the U.S. people barricade everyone in his own house and in his own city and try to defend against all comers? Or shall we in the United States be good citizens of the world and take just a little less than 1 percent of our gross national product in 1 year to help our neighbors and be a good Samaritan to help these fine people do the job necessary to be done for their security and progress?

As to spending certain amounts in responsible universities to train responsible and capable personnel, the answer is: We want and need people educated in this program. We do not want the program administered at the top by people who do not understand it. Of course not. We want competent people who have the know-how to do it.

When our people in the executive department choose and use Boston College as well as Johns Hopkins University, two excellent and responsible institutions for training purposes for top personnel to improve the management of this worldwide program, there can be no insinuation about the value we will receive from either of those high-standing institutions. We will receive full value and more.

Mr. FLOOD. Mr. Chairman, I move to strike out the requisite number of words.

Mr. Chairman, every year since this foreign aid bill authorization and appropriation have been before this House, I have voted for them. I shall vote for this bill and for the one that will come from my Committee on Appropriations.

In the days when even my friends on my own side of the aisle saw fit not to support all of this program, I introduced the amendment to give the President his full request for foreign aid. So, Mr. Chairman, as much as any Member in this Chamber I have a right to say now what I shall say.

I am advised that the great Committee on Rules of this House today refused by a 6 to 6 vote to report out the distressed areas bill. With many Members on both side of the aisle, with our Republican friends, they have joined with me for several years, my friends on the left and the right, to make that bill law. So this is not partisan. Republicans get just as hungry and just as jobless as Democrats in 50 States.

I have in my hand this bill, chapter by chapter.

Economic assistance for the nations of the world, so many hundred million dollars.

Point 4 for the nations of the world, so many hundred million dollars.

Technical aid for the nations of the world, so many hundred million dollars.

The distressed areas bill is nothing more and nothing less than a point 4 bill for the hungry and the jobless in the States of the United States of America. Yet the Committee on Rules says, "Six to six, no rule," and we will be forced to resort to the difficult Calendar Wednesday tactic to give this House an opportunity to vote on this measure, but we will overwhelmingly support this request of the President for foreign aid. And I will support it. Now, you bleeding hearts, who all day yesterday and today proclaimed to high heaven and to this membership, Mr. Chairman, and asked to help the distressed areas of the world, I come to you in these 5 minutes, and every one of you who votes for this bill—you are the ones to whom I speak—every one of you who votes for this bill

and does not appeal to the Committee on Rules to send the point 4 program for America here, I say, listen: We need one vote. We need one vote in the Committee on Rules. Six Democrats voted for that rule and no Republicans voted for it. Two Democrats did not vote for it. Four and two are six: six to six. Now, give me one vote. My friends, in 30 States we have 5 million unemployed, and if you do not know what a depressed area is, God forbid you ever find out. If you do not know, I hope you never will. So, on this day, Mr. Chairman, when you are going to help the underprivileged of the world and the distressed areas of the world, and when you and I vote for a point 4 program for the nations of the world, in God's name let us vote at least $200 million out of this $2 billion for a point 4 program for your brothers and sisters at home. I will vote for this.

The Clerk read as follows:

STATEMENT OF POLICY

SEC. 2. Section 2 of the Mutual Security Act of 1954, as amended, which is a statement of policy, is further amended by adding at the end thereof the following:

"(f) It is the sense of the Congress that inasmuch as—

"(1) the United States favors freedom of navigation in international waterways and economic cooperation between nations; and

"(2) the purposes of this Act are negated and the peace of the world is endangered when nations which receive assistance under this Act wage economic warfare against other nations assisted under this Act, including such procedures as boycotts, blockades, and the restriction of the use of international waterways;

assistance under this Act and the Agricultural Trade Development and Assistance Act of 1954, as amended, shall be administered to give effect to these principles, and, in all negotiations between the United States and any foreign state arising as a result of funds appropriated under this Act or arising under the Agricultural Trade Development and Assistance Act of 1954, as amended, these principles shall be applied, as the President may determine, and he shall report on measures taken by the administration to insure their application."

Mr. McCORMACK. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Chairman, the United States has consistently supported the principle of freedom of transit through the Suez Canal, which is an international waterway. I am happy to see that the Foreign Affairs Committee has recommended an amendment to section 2 of the Mutual Security Act which gives renewed emphasis to our position on this important matter. Certainly we do not intend that the United States should ever threaten to cut off mutual security aid because a country fails to support our position on a particular issue. This would not only bring charges of imperialism, but more important it would be alien to the whole spirit of mutual cooperation for peace and progress which underlies the aid program.

The continuing Egyptian action of preventing the passage of Israeli ships through the canal and of generally blockading Israel is contrary to the spirit of international law and endangers the peace in that tense area. We must use every proper avenue of persuasion to open the Suez Canal to the use of all nations. This amendment directs the President to give recognition to these principles in administering both the Mutual Security Act and Public Law 480 in whatever ways he determines best. I hope that Congress will adopt this amendment as an expression of our continued support for the principle of freedom of navigation in international waters and for economic cooperation among the nations of the free world.

The Clerk read as follows:

CHAPTER I—MILITARY ASSISTANCE

Military assistance

SEC. 101. Section 105(b)(4) of the Mutual Security Act of 1954, as amended, which relates to conditions applicable to military assistance, is amended by striking out "1960" and inserting "1961" and striking out "1959" and inserting "1960".

Mr. BENTLEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BENTLEY: On page 2, immediately above line 20, insert the following:

"ANNUAL AUTHORIZATION FOR MILITARY ASSISTANCE

"SEC. 101. Section 103(a) of the Mutual Security Act of 1954, as amended, which relates to authorizations of appropriations for military assistance, is amended by striking out 'There is hereby authorized to be appropriated to the President for the fiscal years 1961 and 1962' and inserting in lieu thereof the following: 'There is hereby authorized to be appropriated to the President for the fiscal year 1961'."

And reletter the following section accordingly.

Mr. BENTLEY. Mr. Chairman, last year when the House approved the mutual security legislation for 1959 the authorization for military assistance was retained on an annual basis. However, in conference with Members of the other body, the House conferees accepted a change in the language which in effect gave an open-end authorization for 3 years for military assistance. I would like to read to the members of the committee at this time the authorization language as it now stands in the legislation:

There is hereby authorized to be appropriated to the President for the fiscal years 1961 and 1962 such sums as may be necessary from time to time to carry out the purposes of this chapter, which sums shall remain available until expended.

In other words, Mr. Chairman, what we did in adopting the conference report last year was to give the Executive a blanket authorization for whatever sums might be appropriated for fiscal years 1961 and 1962. That is one of the main reasons why today we are dealing with an authorization bill of only $1,318,400,000 while in the reasonably near future we will be considering an appropriation request of over $4 billion subject, of course, to the action of the Committee on Appropriations.

My amendment, if adopted, would not reduce the program by a single dollar but would terminate this open-end authorization for military assistance at the end of fiscal year 1961, and would require the executive branch to come up before our committee next year and offer a new request for a new authorization for military assistance, instead of being able to carry on with no authorization required, as they are at the present time. As I have said, that is one of the reasons that the authorization bill is so much less than the contemplated appropriation request this year.

The same thing was done with respect to the Development Loan Fund, but I understand that the authorization for the Development Loan Fund will expire at the end of fiscal year 1961.

I do feel very strongly, Mr. Chairman, that this program, whether one supports it or opposes it, should be subject to continuous review and continuous scrutiny by the appropriate committees of the House to the extent that although we do have hearings on the military assistance portion of this program there is no need for us and no need for the administration to ask us to authorize a single penny for military assistance. That is because of the language adopted in the conference report last year. This open end authorization which the House, when the bill was initially passed last year, did not adopt, was adopted subsequently in conference. That open end authorization should be terminated and we should insist that starting next year, when we have the fiscal year 1962 bill before us, we should have the administration go back to the customary practice of requesting annual authorizations.

It is my understanding that one of the reasons that the conference report was accepted on that basis was the belief that the military assistance appropriation would this year be contained in the appropriation bill for the Department of Defense. Because of the action of the House Appropriations Committee that was not the case. So I say that if there was any justification last year for giving this open end authorization, such justification no longer exists, thanks to the action of the House Appropriations Committee.

I respectfully submit that this authorization should be terminated with fiscal 1961, and we should get back to the practice of annual authorizations for fiscal 1962. I think the Members of the House would agree with me that that is the way: to have an annual review both for authorization and appropriation purposes of a sum as large as $2 billion, which, of course, is the administration's appropriation request for military assistance in this current year.

Mr. MORGAN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, yesterday during my remarks on the bill I had something to say about this very amendment. I should like to read it again:

This new procedure did not originate in the Foreign Affairs Committee or in the House. The mutual security bill passed by the Senate last year abandoned the practice of annual authorizations for military assistance and provided a continuing authorization of appropriations for this purpose. In conference a compromise was reached which included a specific authorization for fiscal

1960 and such sums as may be necessary for 1961 and 1962. This compromise was accepted by the House and is now contained in the law.

Mr. BENTLEY. If the gentleman will yield, it removes the 1962 date.

Mr. MORGAN. That is correct.

I still have an open mind as to whether this action of last year is a good idea. One reason for doing as we did was that the Executive wanted to include the military assistance appropriation in the regular military appropriation bill. They said that waiting for an annual authorization would make this impossible.

Our Appropriations Committee has decided not to follow the Executive recommendation in this respect, and the military assistance appropriation is being handled as part of the mutual security appropriation. I personally favor the way in which the Appropriations Committee is proceeding, although I accepted last year's compromise in good faith and would prefer not to make any change in the authorization procedure during the present Congress.

The gentleman from Michigan next year will have left this great legislative body for greener pastures. He has been an outstanding member of the Committee on Foreign Affairs. I value his work on the committee. He has worked very hard on this bill and has been one of the outstanding leaders in helping to eliminate waste and inefficiency in the program.

The gentleman knows that due to his prodding next year we will consider undertaking a comprehensive review of the entire Mutual Security Act. We are here today dealing with the basic act of 1954. Due to the prodding of the gentleman from Michigan, which he followed up by an amendment offered in committee during the markup of the bill requiring that the entire act be rewritten. We are fully aware that few of us are well acquainted any more with all the provisions of the act. I can assure the gentleman that if I am back in Congress next year I will do whatever is appropriate in undertaking a revision of the 1954 act. I think it is time for it to be reexamined. I oppose the amendment simply on the ground that next year during the rewriting of the bill I am sure the authorization he seeks to eliminate today will be fully considered and taken care of. Therefore, I oppose the amendment.

Mr. JUDD. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I want to make sure it is understood that the fact that in these 2 fiscal years no ceiling on military assistance is established in the MSA authorization bill does not mean that the Committee on Foreign Affairs and the House of Representatives thereby lose control over this $2 billion program. No ceiling is legislated annually on appropriations for our own Armed Forces, and that is a $40-billion-a-year program. The Committee on Armed Services does not bring before the House every year an authorization bill saying that the Committee on Appropriations is authorized to appropriate for our Defense Department not to exceed X billions of dollars. Each year the Committee on Appropriations determines what it believes to be the proper amount and brings it to the House for action. The waiver on military assistance authorizations adopted last year on the initiative of the other body was to try out for 2 years the same mechanism that we have consistently followed without any difficulty in providing for our own armed services. If you look through the hearings, you will find that our Committee on Foreign Affairs had extensive discussions this year on the military assistance program. You will find the record of detailed testimony by Secretary of Defense Gates and his staff. It begins on page 69. There was a long session with Admiral Felt who is in command of all our forces in the Pacific, beginning on page 535; and one with General Norstadt and his associates dealing with all aspects of our military assistance programs and the armed forces of our allies in the NATO or European-Mediterranean theater. It begins on page 673. Our committee and the House of Representatives can at any time take action, either in this bill or in a separate bill, to modify the military assistance policies and programs or to put any limitation we wish on the amount of money that can be appropriated for that purpose. In no sense do we lose control of the military assistance program by having this waiver in the bill.

Mr. BENTLEY. Mr. Chairman, will the gentleman yield?

Mr. JUDD. I gladly yield to my colleague from Michigan.

Mr. BENTLEY. I believe the gentleman was one of the conferees last year. Was it not the thinking of the conferees that the reason, or at least one of the reasons for adopting this version initiated by the other body, was that the military assistance appropriation was going to be treated as part of the Defense Department appropriations?

Mr. JUDD. Yes; that was one reason. Another reason was the desire to make possible more long-range planning with regard to the foreign components of our national defense, as we do now for the domestic aspects of that defense.

Mr. BENTLEY. How possible is this long-range planning in the field of military assistance as long as the program is subject, and rightly so, to the annual scrutiny and review of the Committee on Appropriations?

Mr. JUDD. It is also subject to the annual scrutiny and review of the Committee on Foreign Affairs, the same as our own Armed Forces are subject to the annual scrutiny and review of the Committee on Armed Services and subject to the annual scrutiny and review of the subcommittee of the Committee on Appropriations, which deals with our Armed Forces.

The other body wanted to make this waiver of annual authorizations a permanent arrangement. In the conference we compromised on 2 years. That is enough to give us a fair trial. In 1962, automatically, this matter will come back to the House Committee on Foreign Affairs and to the House of Representatives when it considers this legislation, to decide whether to extend the waiver for a further period or allow reversion to the previous practice of annual authorizations.

It seems only reasonable and fair for the House to go along for the additional year with the compromise that was reached last year. Then of necessity we will have to act and will have had further experience on which to base our decision.

Mr. BENTLEY. Mr. Chairman, if the gentleman will yield further, if the present language is retained in the bill, no authorization will be required for the fiscal year 1962.

Mr. JUDD. No authorization will be required.

Mr. BENTLEY. In other words, no new authorization will be required until the year 1962. That is the calendar year.

Mr. JUDD. Yes, the calendar year 1962. This year's mutual security bill and next year's bill will not require authorizing action by this committee or the Congress. But this committee can take action to limit appropriations, if at any time it thinks there is something that requires such action. So, Mr. Chairman, I think the amendment should be defeated.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

The question is on the amendment offered by the gentleman from Michigan [Mr. BENTLEY].

The amendment was rejected.

Mr. MEYER. Mr. Chairman, I offer an amendment which is at the Clerk's desk.

The Clerk read as follows:

Amendment offered by Mr. MEYER: On page 2, insert between lines 20 and 21 the following:

"SEC. 101. Section 102 of the Mutual Security Act of 1954, as amended, which relates to military assistance, is amended by adding the following new paragraph: 'No part of any appropriation authorized by this Act shall be used to carry out any agreement for cooperation heretofore or hereafter entered into which is required to be submitted to the Joint Committee on Atomic Energy under section 123(d) of the Atomic Energy Act of 1954, as amended.'"

Renumber section 101 on page 2 as section 102.

Mr. MEYER. Mr. Chairman, the purpose of this amendment is to provide that funds authorized under the Mutual Security Act shall not be used to carry out any agreement for cooperation which is required to be submitted to the Joint Committee on Atomic Energy.

Basically, it is the same amendment as that offered by Congressman BENNETT last year to the Mutual Security Appropriation Act of 1959. The difference is that we have additional information, secured after a great deal of effort, which says that we are actually using some of the military funds under the Mutual Security Act for the implementation of these agreements. Last year we did not have this information, and I will try to bring the story up to date.

For instance, last year when I asked whether any Joint Atomic Energy Commission funds would be used for such a purpose, Chairman CANNON replied:

There is no direct appropriation in the bill for that purpose.

This is recorded in the CONGRESSIONAL RECORD for July 21, 1959.

I asked Chairman MORGAN of the Foreign Affairs Committee whether mutual security funds would be used for this purpose, when he discussed the Conference Committee Report. He said, "I do not think that is involved unless it is involved in military money for the NATO organization." This is recorded in the CONGRESSIONAL RECORD for July 22, 1959.

When Congressman BENNETT of Florida offered an amendment to the Mutual Security Appropriation Act to prevent the use of funds for this purpose, subcommittee Chairman PASSMAN said:

I can assure the gentleman there are no funds for the purpose against which he places a limitation.

This appears in the CONGRESSIONAL RECORD dated July 28, 1959.

All those gentlemen were reporting to the best of their knowledge. Therefore the House at that time did not know as much as we now know. Some of the funds actually are being and have been used for that purpose.

What is the reason why I object to such use of these funds? To begin with, my amendment would not stop the sharing of nuclear materials and nuclear know-how authorized under the Atomic Energy Act, but it would prevent the use of mutual security funds for such a purpose.

We also know that the spreading of nuclear knowledge and know-how does not necessarily add to mutual security, but may easily create a situation of mutual insecurity, because of the nature of the nuclear weapon system, if distributed to additional countries.

Furthermore, the major delivery of nuclear warheads will be by missiles and jet planes which can be increasingly maintained on our home bases rather than in the hands of our allies or friendly powers which at certain times may be friendly but at other times may not be so friendly. I say that it is risky to give this weapon assistance to other countries.

Furthermore, there is a growing uneasiness among our people as to the actual wisdom of our allowing nuclear-sharing agreements to be negotiated, especially without direct congressional debate and approval of the agreements. I say that the vote on the Bennett amendment to the Mutual Security Appropriation Act last year, when 61 stood against it, as compared with 137 for it, is proof in favor of my argument.

The CHAIRMAN. The time of the gentleman from Vermont [Mr. MEYER] has expired.

Mr. MEYER. Mr. Chairman, I ask unanimous consent to proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Vermont?

Mr. DORN of New York. Mr. Chairman, I object.

Mr. MEYER. I would ask the gentleman to consider withdrawing his objection. I seek no special favors, but I do want to explain the issue as thoroughly as I can.

Mr. DORN of New York. Mr. Chairman, I withdraw my objection.

The CHAIRMAN. Without objection the gentleman from Vermont is recognized for 5 additional minutes.

There was no objection.

Mr. MEYER. Mr. Chairman, earlier reports this year of administration plans to share the nuclear warheads themselves caused a good bit of confusion and a storm of protest. I direct your attention to the CONGRESSIONAL RECORD of February 17, when I spoke on the subject, and to February 9, when the gentleman from California [Mr. HOLIFIELD] spoke on a similar subject.

This amendment that I propose at this time would be concrete evidence that the sense of Congress is against extending the nuclear weapons club. This is a road to peace in the world, and will lead to a sense of security because nuclear weapons will be under the control of the United States. I do not believe that the spreading of this material to other countries will add in any way to our strength.

This amendment will present the Congress with a much-needed opportunity to openly debate the wisdom of and the extent of nuclear sharing to which the United States should be committed. This debate, to a partial extent, took place last year, but I believe that it is currently clearly in the public interest that we have more discussion of the subject.

It is possible to change my amendment, to modify it so that we would make it apply only against the actual transfer of the nuclear weapons warheads themselves. This would at least definitely prevent such a transfer which earlier was contemplated by the administration, and even suggested as possible without congressional authorization. However, the latest reports are that President Eisenhower, in a letter to Premier Khrushchev, said:

The United States has no present intention of sharing nuclear weapons with its allies.

I think an amendment of this type will reassure our own people and the rest of the world that we are going to try to prevent a nuclear war. I say in conclusion that this is not only a moral issue but it is also a practical issue, because there is no sense to having a nuclear war, because we cannot win it—no country can win it. The danger of spreading this weaponry to many countries is a risk we cannot afford to take.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Vermont [Mr. MEYER].

The question was taken; and on a division (demanded by Mr. MEYER) there were—ayes 11, noes 46.

So the amendment was rejected.

The Clerk read as follows:

CHAPTER II—ECONOMIC ASSISTANCE

Defense support

SEC. 201. Title I of chapter II of the Mutual Security Act of 1954, as amended, which relates to defense support, is amended as follows:

(a) In section 131(b), which relates to general authority, strike out "1960" and "$751,000,000" and substitute "1961" and "$675,000,000", respectively.

(b) In section 141, which relates to conditions of eligibility for assistance, strike out "No such assistance" in the second sentence and substitute "No defense support or military equipment and materials".

(c) In section 142(a), which relates to agreements, strike out "No assistance" in the introductory clause and substitute "No defense support or military equipment and materials".

Mr. ADAIR. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ADAIR: On page 3, line 8, strike out "$675,000,000" and insert in lieu thereof "$625,000,000."

Mr. ADAIR. Mr. Chairman, my amendment is one which is easy to understand. It would reduce the defense support funds by $50 million. Those Members of the House who feel that we are authorizing too much money in this bill can take a step in the direction of correcting that by supporting this amendment. It would reduce the defense support funds authorization from $675 million to $625 million.

By way of comparison, it is interesting to recall last year's figures on defense support. Last year the executive request was for $835 million. The authorization as it came out of conference was for $751 million. The appropriation was $695 million. So, between the executive request and the final appropriation there was a reduction from $835 million to $695 million.

This year the executive request was for $724 million and the authorization as proposed by the committee is for $675 million, a reduction by the committee of $49 million.

My amendment would reduce that by an additional $50 million and would still leave available for defense support purposes $625 million. It ought to be called to the attention of the House that this would constitute a modest reduction in view of the fact that we have a very large amount of money available for economic purposes through the Development Loan Fund.

As I pointed out yesterday, one of the arguments used in support of the Development Loan Fund was that it would make necessary a smaller amount of grant aid money for economic purposes. In spite of the fact that there has already been appropriated $1.4 billion for the Development Loan Fund with a request for a further appropriation of $700 million, this year, making a total of $2.1 billion. I am asking for only a very modest reduction in this defense support authorization.

Therefore, Mr. Chairman, I urge that the Committee adopt this amendment which I am sure will not harm the program but will, on the contrary, improve it. Closer scrutiny of expenditures would be required and this would make a better program for a smaller amount of money.

Mr. MORGAN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the committee has studied this section on defense support very carefully. I think we have cut the funds to a bare minimum. As the gentleman suggested, last year the authorization request was for $835 million. The

committee cut it to $750 million. Finally the appropriation was $695 million. Now, this figure in the bill is $49 million less than requested this year, $20 million less than appropriated last year.

This defense support money goes to 12 countries; most of them are right up against the Soviet-Sino border. These are countries that are facing the Communists every day. They have overextended their military forces. They have larger armed forces than their economies can maintain. This is strictly economic aid we give them to support their economies so that they can support armed forces of 3 million men. This is money that is actually needed to keep forces right on the Communist line. I think a cut of $50 million would do serious damage to 12 of our best friends, and I oppose the amendment.

Mr. FARBSTEIN. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I think we have got to understand what defense support is, first, before we can vote intelligently on this amendment. Aside from the question of numbers, aside from the question of the amount involved, defense support, although it is known and treated as economic aid, actually in effect is not economic aid, because the purpose of defense support is to buy uniforms for the soldiers, to house the soldiers of our allies, to feed the soldiers of our allies in order to make and present an effective fighting force against a common enemy.

Economic assistance, as it is generally known and referred to, is money that is appropriated for special assistance, money for particular projects in a country that we find is needy, like community water development, malaria eradication, medical research, improved education and vocational projects for technical assistance, where it must be given to countries so that they can be taught how to grow products, learn sanitation, operate machinery, and so forth, and various other forms of economic assistance. Defense support is an aid to the military. It is not economic assistance in the sense that we intend it or as is generally referred to, because what good is there giving a man a gun if he has not got a uniform, if he has not got an automobile in which he may be carried to the front, if he has not got some means whereby the fighting instruments can be effectively used?

Mr. ADAIR. Mr. Chairman, will the gentleman yield?

Mr. FARBSTEIN. I yield to the gentleman from Indiana.

Mr. ADAIR. I am sure the gentleman is not implying that defense support funds go for military hardware or military uniforms.

Mr. FARBSTEIN. Defense support does not go for military hardware, that is true, but defense support is used for the purpose of maintaining and sustaining the soldiers for which we contribute money for military assistance.

Mr. ADAIR. Mr. Chairman, if the gentleman will yield further, is it not true that the maintenance and support of the soldier falls within expenditures from military assistance funds and that the defense support funds are used for the economic support of the recipient countries?

Mr. FARBSTEIN. Well, the line is very narrow, I will admit. However, when we talk of aiding the military, it is true that it goes to the country, but that country has got to support those soldiers that it puts on the line for the protection of the free world, and unless assistance is given—if you want to call it economic assistance, call it that if you will—but nevertheless, without this additional money in the way of defense support these soldiers would have hardware and nothing else. And, as I said before, you cannot have a soldier without a uniform, without a truck to take him to the front and various other means for the soldier to become, as I said before, an effective fighting man.

Mr. ADAIR. Mr. Chairman, if the gentleman will yield further, as the report points out, there are two aspects of the defense support program. One is for specific economic purposes, and the other is for general financial support of the recipient nation. I am sure the gentleman is aware of that statement in the report and I think it ought to be made very clear to this Committee that defense support funds do not have so direct a military application.

Mr. JUDD. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, we need to remember that while defense support is indeed economic assistance, it is economic assistance for a military purpose. There is more of our own national defense in this particular item than in anything else in the bill because this is the economic assistance that enables 12 exceedingly important countries to maintain the armed forces we believe to be necessary for their and our defense.

Our military planners first sit down with these countries that are strategically located and have the will to defend themselves to the extent of their abilities. Together we determine what they need and ought to have in the way of air force or army or navy. Having agreed with them upon the desired level of forces, we estimate how much they themselves can provide for the support of such forces. We furnish the difference, which is defense support.

None of the 12 important countries receiving defense support can yet provide out of their own resources the funds or supplies necessary to maintain the size and kind of armed forces we want them to have, for our defense as well as theirs. These 12 countries now have, because of defense support, 3 million well-trained soldiers for defense of the free world.

If Members of the Committee will look at page 20 of the report, they will see what it costs to provide just the pay, allowance, subsistence and clothing of one American soldier. It is $3,859 per year. At the other end of the scale is shown the cost of the same items for a soldier on Formosa. It is $167 a year. It makes graphically clear how beneficial and essential defense support is for our national defense. It has already been cut as deeply as prudence will permit.

Mr. ADAIR. Mr. Chairman, will the gentleman yield?

Mr. JUDD. I yield to the gentleman.

Mr. ADAIR. If I may quote from the committee report at the bottom of page 22, in answering this question about the military users of this money, I will read the following:

> Support is extended in two ways: One is by projects in major areas of the economy such as agriculture, forestry, and fisheries; industry and mining; transportation, health, and sanitation; education; public administration; and community development, social welfare, and housing.

I find it difficult to discover a direct connection between that statement and the military aspect which is now being urged upon the Committee.

Mr. JUDD. Let us take the case of Turkey as an illustration. Turkey is a country whose location and whose superb armed forces make it vital to the whole Middle East. The Turks were disciplining themselves to the utmost to maintain their armed forces. Unrest began to develop among the common people of Turkey because they could not make any headway or see any hope for improving their living standards. Obviously you cannot maintain good morale in a soldier at the front, no matter how many weapons he has, if he knows that the standards of living of his people at home are going down instead of rising. Furthermore, loss of confidence in his government develops. So more defense support had to be provided. Some is for specific projects, such as my friend from Indiana has read, and some of the aid is for nonproject support of the economy. Otherwise the country simply could not maintain the armed forces that we, ourselves, want them to have in our own national defense.

Mr. PILCHER. Mr. Chairman, will the gentleman yield?

Mr. JUDD. I yield.

Mr. PILCHER. Is it not true that when we allocate so many dollars for defense support for X country, they can spend that money for almost anything they want to; they can build roads with that money?

Mr. JUDD. Projects must each be agreed upon individually, but nonproject assistance can go to support the country's budget; that is correct.

Mr. PILCHER. There is not much difference between defense support and economic aid. They can spend it any way they want to.

Mr. JUDD. Each project is negotiated bilaterally between the United States and the recipient country in terms of need, method and cost, so there is not such latitude here as the gentleman suggests.

Mr. Chairman, this item has already been cut $160 million below the request of last year. When we consider that by this type of assistance we are getting 3 million soldiers strategically located, and that our own greatest military shortage is in manpower for conventional forces, I believe that we will not want to take the risk involved in further reducing these funds.

Mr. KOWALSKI. Mr. Chairman, will the gentleman yield?

Mr. JUDD. I yield.

Mr. KOWALSKI. Would any of these funds be used to support the Korean police force which has been so tragically effective in repressing the people who are demonstrating for their freedom, for their right to vote in a free election?

Mr. JUDD. Some of these funds could be and probably are used to support the budget of the Republic of Korea; and some of that budget goes for support of its armed forces and police forces, just as some of it goes for education and for health and for highways and for agriculture. The recent events in Korea cannot be condoned. It is pretty hard to get full democracy in a country divided, still at war, and under constant threat. That is a painful fact. But an equally important fact is that without the 19 first-rate Korean divisions which defense support makes possible, with many of them guarding the demilitarized zone as they are today, we would have to send and support in Korea a good many more than the 2 American divisions we have there.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Indiana [Mr. ADAIR].

The amendment was rejected.

Mr. HARDY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HARDY: On page 3, immediately below line 5, insert the following:

"(a) In the first sentence of section 131(a), which relates to the authority of the President to furnish defense support, insert, immediately before the period at the end thereof the following proviso: ': *Provided*, That all documents, papers, communications, audits, reviews, findings, recommendations, reports, and other material which relate to operations or activities under this title are furnished to the General Accounting Office and to any committee of the Congress, or any duly authorized subcommittee thereof, charged with considering legislation, appropriations, or expenditures under this title, upon request of the General Accounting Office or such committee or subcommittee as the case may be'."

And reletter the following subsections accordingly.

Mr. HARDY. Mr. Chairman, the language of this amendment is similar to other language in the bill, but it is placed in a little different spot. My purpose is to make it unmistakably clear that the President has no authority to conduct any operations under this title unless full and complete information is given to the Congress.

Mr. MORGAN. If the gentleman will yield, I am not going to oppose this amendment. I recognize that it is of vital importance that the committees of the Congress should have access to detailed information about the operation of the mutual security program if they are to be able to discharge their function of legislative oversight.

There have been occasions in the past in which information has been kept from the Congress with the result that wasteful practices were allowed to persist. The most serious problem relating to the mutual security program today is the quality of its administration, and I am convinced that the best guarantee that the administration of the program will be improved is that Congress do a better job of riding herd on it.

At the same time I am aware that there is a question of executive privilege involved and that nothing we can do in the Congress can modify the Constitution.

I hope that the adoption of this amendment will provide the executive with an additional inducement to make available to the Congress the information which it desires. At the same time, I must concede that the President will have the final say in this matter until such time as the Supreme Court may be called upon to reach a decision as to the meaning of and limitations on executive privilege.

Mr. HARDY. I appreciate the committee's acceptance of this amendment.

The problem of securing necessary information has been difficult for committees of Congress on both sides of the Hill. One of the major difficulties has been the President's frequent introduction of this so-called doctrine of executive privilege to which the gentleman has just referred. I do not fully agree with what the gentleman has said on this subject. However, I believe that any discussion of executive privilege at this time would be completely academic because it is not applicable to the amendment I have offered.

The President derives his powers from two sources, the Constitution and the Congress. In this particular case, the powers which he exercises under the defense support provisions of the Mutual Security Act do not arise under the Constitution, but flow directly from congressional grant. This provision makes the exercise of this power—indeed the very existence of this power—conditional upon complete cooperation by the executive branch with the Congress in the provision of needed information.

Weaker measures were not sufficient to insure the Congress the information it requires for wise performance of its particular duties under the Constitution. The provision I have proposed goes to the very heart of the issue by providing expressly that during any time when refusal of requested information persists all authority to exercise the powers granted the President by the defense support portion of the act is suspended and becomes effective again only after the information requested is furnished.

Mr. MONAGAN. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. MONAGAN. Mr. Chairman, I am happy to support the amendment offered by the gentleman from Virginia [Mr. HARDY]. I have been privileged to serve with the gentleman as a member of the Subcommittee on Foreign Operations and I have had a chance to see the difficulties which executive agencies have placed in the way of the committee in its job of following the foreign aid program. In many cases these agencies have thrown up roadblocks which have prevented our committee from following out the task set for it by the Congress.

I believe in the objectives of the foreign aid program, but only by constantly reexamining this program can these objectives be attained and only by constant vigilance on the part of Congress can the administrators of the program be kept to the course charted out by the Congress itself.

I am happy that the members of the Foreign Affairs Committee have indicated that these amendments will be acceptable and I trust that they will be retained in the bill when it finally becomes law.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia.

The amendment was agreed to.

The Clerk read as follows:

DEVELOPMENT LOAN FUND

SEC. 202. (a) Section 202 of the Mutual Security Act of 1954, as amended, which relates to general powers of the Development Loan Fund, is amended by adding at the end thereof the following:

"(c) The Fund shall not allocate or commit funds aggregating in excess of $100,000 for use in any country under this title unless (1) an application for such funds has been received for use in such country which is supported by sufficient engineering, financial, or other data to indicate reasonably (A) the manner in which it is proposed to use such funds, (B) the economic and technical soundness of such use, and (C) the practicability of such use, or (2) the President determines it to be in the national interest to use such funds pursuant to multilateral plans."

(b) Section 205(a) of the Mutual Security Act of 1954, as amended, which relates to management, powers and authorities, is amended by striking out "Under Secretary of State for Economic Affairs" in the first sentence and substituting "Secretary of State".

Mr. KYL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. KYL: On page 3, lines 22 and 23, strike out the words "aggregating in excess of $100,000".

Mr. KYL. Mr. Chairman, the language which is in the bill is obviously intended to safeguard funds from misappropriation and misuse in the loan program.

Mr. Chairman, if it is wise to so govern expenditures of $100,000, and I believe it is, then I see equal wisdom in protecting expenditures of $99,000 or $9,000. Two projects at $50,000 equal one of $100,000. It is too easy to separate one project into parts.

Adoption of this amendment will make it much more clear that the Congress intends to inject better business management into this loan program, indicating a seriousness of purpose and intent. We will at least know the stated purpose of each project and will thereby have a logical basis for ultimate evaluation of that program.

Such business practices also should help generate some respect among nations which have reached the status of economic responsibility at the point where they seek to borrow rather than receive gifts.

Mr. GROSS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I do not believe there has been a foreign handout bill to come before the House in my memory that Adolf Hitler has not been conjured up as one of the reasons why it was necessary to continue ladling out money all over the world. That goes for the Draft Act too. Hitler is dead—the Draft Act was passed some years ago; the old dictators remain and some new ones have been added. We have fought two wars since that Draft Act was passed, but still we hear about Hitler and the Draft Act. When the appropriation bill comes up to provide the money for this giveaway program, I have no doubt that we will hear more about Hitler and the Draft Act.

Reference was made to the distressed-areas bill. I say to you—continue this program—continue the development loan program, all the rest of the soft loans, plus this giveaway program, and you will have more, I will say to the gentleman from Pennsylvania [Mr. FLOOD], if he is on the floor—you will have more and more distressed areas in the United States. There will be more New England fishermen on the beach. There will be more coal miners unemployed. There will be more steelworkers unemployed. Just continue to put up loans—soft loans—loans that if they are ever repaid, will be in Yugoslavian dinars and Indian rupees and so on and so forth; currencies that cannot be taken out of the foreign country, to build more textile plants and more steel mills and more power-generating plants overseas. Yes; you are going to have more distressed areas in this country. There will be more of you around, hat in hand, seeking funds from Congress for the unemployed in your districts. Surely you are not unaware of the fact that in the last session of the Congress, the House passed a bill to provide Federal subsidies for the building of fishing trawlers for the New England fishing industry. Why? Because of foreign imports. The countries that are providing the frozen fish fillets are the beneficiaries in almost every instance in some form or other of the foreign handout program. I repeat, continue to vote for this kind of legislation and you are going to have more unemployed, and more of you will be around begging for more funds for distressed areas. Incidentally, how about some of those countries to which we are making gifts and uncollectible loans and which are buying U.S. securities? As I understand it, they now own some $11 billion of our securities. How silly can we get—giving money to foreign countries and they, in turn, buying our securities?

Mr. HARDY. Mr. Chairman, I offer a substitute amendment which is at the Clerk's desk.

The Clerk read as follows:

Amendment offered by Mr. HARDY as a substitute for the amendment offered by Mr. KYL: On page 3, line 23, strike out "$100,000" and insert therefor "$50,000".

Mr. HARDY. Mr. Chairman, I have offered this amendment for this reason. As the chairman of the committee has indicated, the language which this bill contains is a modification of an amendment which I sent to the committee for its consideration. Now I suggested the figure of $100,000, with the idea that there are occasions when some planning funds are needed, which ought not to be completely eliminated. It may be the figure of $100,000 is excessive and I am perfectly agreeable to reducing it to $50,000, but in spite of that fact, I want to keep this thing just as tight as I can and keep it on a businesslike basis, but I still think there is a need for a limited amount of authority excepted from the restrictions of this subsection.

Mr. Chairman, actually there are going to be very, very few cases when an earmarking of as little as $50,000 which will ever be requested. I hope my substitute amendment will be agreed to.

The CHAIRMAN. The question is on the substitute offered by the gentleman from Virginia [Mr. HARDY].

The substitute amendment was agreed to.

The CHAIRMAN. The question recurs on the amendment offered by the gentleman from Iowa, as amended by the substitute offered by the gentleman from Virginia.

The amendment as amended was agreed to.

Mr. HARDY. Mr. Chairman, I offer an amendment which is at the Clerk's desk.

The Clerk read as follows:

Amendment offered by Mr. HARDY: On page 3, line 22, strike out "or commit" and insert in lieu thereof "reserve, earmark, commit, or otherwise set aside."

On page 3, line 24, strike out "(1)".

On page 4, line 4, strike out all that follows "use" the second time that word appears, down to the period in line 6 on page 4.

Mr. HARDY. Mr. Chairman, the problem with which this amendment seeks to deal was discussed in considerable detail when members of my Government Operations Subcommittee recently had the privilege of visiting with the Committee on Foreign Affairs. I want to express my deep appreciation to the gentleman from Pennsylvania, Doctor MORGAN, for inviting us. I think the kind of cooperation which has been developed between our two committees is likely to produce improved legislation, based not only on an analysis of the needs which the mutual security program seeks to fill, but taking into account also the quality of performance. It is our desire to be helpful and I believe that the kind of results now being achieved are those which the Legislative Reorganization Act had hoped for.

I like to think of our visit with the Foreign Affairs Committee as a joint discussion of the problems with which we are mutually concerned. At that time I agreed to suggest amendatory language designed to put an end to the abusive practice of "earmarking." I was disappointed to observe the extent to which the committee had altered the language which I later suggested.

The amendment which I am offering now is essentially the same as my original recommendations to the committee, which included at the beginning the words "allocate, reserve, earmark, commit, or otherwise set aside".

There was and is a very good reason for including all of these terms. The reason is simply that they have all on occasion been employed by the executive branch to circumvent technical requirements of the statute and to avoid restrictions which Congress had intended. The committee in its action eliminated several of these terms which I feel must be included in the legislation.

Another alteration of my amendment which this bill contains permits a broad waiving of the restrictions of this section virtually at Presidential discretion.

If the President delegates this authority, as he has delegated so many others under the Mutual Security Act, then the authority to waive the provisions may be in the hands of the same officials whose commitments and earmarking activities in the past have led to the need for this amendment.

Mr. CARNAHAN. Mr. Chairman, will the gentleman yield for the purpose of offering a substitute?

Mr. HARDY. I yield.

Mr. GROSS. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. GROSS. If the gentleman yields for that purpose he loses the floor; is that not correct?

The CHAIRMAN. The gentleman is correct.

Mr. HARDY. I yield for that purpose.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Missouri [Mr. CARNAHAN] as a substitute for the amendment offered by Mr. HARDY.

The Clerk read as follows:

Amendment offered by Mr. CARNAHAN as a substitute for the amendment offered by Mr. HARDY: On page 3, line 22, strike out "or commit" and insert in lieu thereof "reserve, earmark, commit, or otherwise set aside."

On page 4, line 5, strike out all that follows "President" and insert "personally determines with respect to each such allocation, reservation, earmarking, commitment, or set aside that it is in the national interest to use such funds pursuant to multilateral plans."

Mr. CARNAHAN. Mr. Chairman, this substitute which I am offering follows the amendment offered by the gentleman from Virginia in the first portion of his amendment. My amendment merely adds revised wording for the portion that he strikes out. In lieu of the language to be stricken out I add:

The President personally determines with respect to each such allocation, reservation, earmarking, commitment, or set-aside that it is in the national interest to use such funds pursuant to multilateral plans.

I further want to compliment the gentleman for the very careful and constant work that he and his committee have done in checking on the expenditure of security funds. The amendment adopted in committee was an attempt to arrive at something which would be satisfactory for your committee. I hope the gentleman will accept this substitute.

Mr. HARDY. Mr. Chairman, will the gentleman yield?

Mr. CARNAHAN. I yield.

Mr. HARDY. I appreciate the genuine cooperation of the gentleman and the

attention which his committee has given to this difficult problem. Frankly, I am not enthusiastic about the language which the gentleman has offered, but it is a big improvement over what was in the bill, and I am disposed to accept it.

I ask unanimous consent, Mr. Chairman, that it be considered instead of the language contained in my amendment.

Mr. JUDD. Mr. Chairman, I would like to make three observations about the Hardy-Carnahan amendment we are about to vote on. First, the prohibition on advance allocations, reservations, earmarks, commitments, or set-asides by the Fund definitely applies to any formal action by the Fund's Board of Directors which would either bind the Fund or constitute a basis for representing to the Congress that a given sum cannot be used for other purposes. It does not mean that the Fund's staff cannot, or should not as prudent bankers, informally discuss priorities of various proposals with prospective borrowers, or internally prepare work programs and give special attention to applications from key countries. It should be noted here that just last year the Congress directed in section 202(b) of the act that the Fund "in its operations shall recognize that development loan assistance will be most effective in those countries which show a responsiveness to the vital long-term economic, political, and social concerns of their people, demonstrate a clear willingness to take effective self-help measures—." Obviously assistance to projects and programs in such countries are to be given priority.

Secondly, the amendment clearly calls for such data on the various types of projects and programs which the Fund finances as is appropriate to a preliminary judgment on the particular project or program.

Thirdly, the amendment does not constitute a limitation on the types of projects and programs which the Fund may finance although the data that the Fund will require on these will vary, depending on the Fund's share in the total financing and the existence of reasonably reliable evaluations that may already have been made.

I think it is important that the record be clear on these points. The amendment's purpose is not to put the DLF in a straitjacket, but to make sure that commitments are not made for projects before they have been studied sufficiently to insure that loans made for them will in fact be in accordance with the purposes of the DLF and reasonably certain of accomplishing its declared objectives.

The CHAIRMAN. The question is on the substitute amendment offered by the gentleman from Missouri [Mr. CARNAHAN].

The substitute amendment was agreed to.

The CHAIRMAN. The question recurs on the amendment offered by the gentleman from Virginia as amended by the substitute.

The amendment as amended was agreed to.

Mr. FEIGHAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FEIGHAN: Page 3, immediately after line 16, insert the following:

"(d) Section 143, which relates to assistance to Yugoslavia, is amended to read as follows:

"'SEC. 143. ASSISTANCE TO YUGOSLAVIA.—No assistance shall be furnished under this Act to Yugoslavia after the date of enactment of the Mutual Security Act of 1960.'"

Mr. FEIGHAN. Mr. Chairman, my amendment will cut off U.S. aid to the Communist dictator Tito. Approval of my amendment will stop the use of U.S. funds to further the cause of the international Communist conspiracy which seeks to destroy the freedom which we in the United States enjoy and to bring all nations under the tyrannical heel of the Kremlin. The present policy of our State Department to assist the Communist regime of Yugoslavia is based on arguments, assertions, and claims which are devoid of any factual basis and totally disregard the basic elements of the foreign policy of the Communist dictator Tito and the Communist Party of Yugoslavia. In my remarks yesterday, which appear on pages 8379 to 8384 of the RECORD, I analyzed the actions and statements of Tito and the Communist leaders of Yugoslavia, which clearly prove that Tito and the leaders of the Communist Party of Yugoslavia are dedicated to the victory of world communism, and they blatantly announce to the world that they stand steadfastly with the leaders of the Kremlin in support of the ultimate victory of world communism.

The only argument advanced for giving any type of aid to Yugoslavia is the same argument that was used to cause Congress to make the first appropriation for assistance to Yugoslavia. That argument was that Tito had broken with the Kremlin and that he represented a new phenomenon called national communism which could be used to break up the power bloc of the Russian Communist empire. Now let me quote for you what Tito himself says in refutation of this specious argument about national communism. I quote:

I must say that there is no national communism. Yugoslav Communists are also internationalists. * * * The whole thing is that various countries which are building socialism have different conditions under which the new system is being built. That does not mean that the systems are different, but only that there are differences in the roads which lead to the same Socialist systems. As far as our international obligations as Communists are concerned, I must say the Communists of Yugoslavia have never failed to fulfill them.

Thus, Tito boasts of the fulfillment of his obligations to the international Communist conspiracy.

On another occasion Tito said:

I wish, comrades, that Poland and Yugoslavia—which are much criticized for practicing some national communism, which I consider nonsense—ought to show that they have no use for any national communism.

Some naive people believe that Tito is neutral. Tito in his own words refuted this idea.

In June 1956, Tito visited Stalingrad as a guest of the Russian leaders and here is what he said in a public address made in response to the welcoming statement:

Yugoslavia, in time of war, as in time of peace, marches shoulder to shoulder with the Soviet people toward the same goal—the goal of the victory of socialism.

Assistance to Yugoslavia is a classic example of abuse in the use of foreign economic assistance and a prime reason why the assistance program is falling into discredit. We should stop assistance to Communist dictators. We should stop assistance to all dictators who deprive their people of the basic human freedoms. When people are deprived of the basic human freedoms, their nation cannot qualify as a free nation. It is the policy of Congress to assist free nations.

The record of Tito and the Yugoslav Government in the United Nations is one of almost complete support of the Soviet Union.

We are spending billions of dollars of U.S. taxpayers money in an effort to preserve freedom throughout the free world and to defeat communism, which is utterly opposed to our way of life, and which seeks to impose its base tenets and tentacles upon the United States and every other free country of the world. I cannot understand any logic that provides that the means to defeat communism is to support and to provide communism with U.S. taxpayers' money.

I wish some member of the Foreign Affairs Committee or some Member of the House would give a sound reason or reasons why U.S. taxpayers' money should be used to support the cause of communism in Yugoslavia.

I urge adoption of my amendment.

Mr. ZABLOCKI. Mr. Chairman, it is with some reluctance that I rise in opposition to the amendment offered by the gentleman from Ohio [Mr. FEIGHAN].

First, it is quite well known that I am in opposition to totalitarian governments, and I certainly am not going to praise Tito or to defend him. I do want to make clear, however, that the money provided in this bill for Yugoslavia is not to promote Tito or communism. It is to assist the people of Yugoslavia. I wish to call the gentleman's attention to page 61 of the committee report. Section 143 states:

In furnishing assistance to Yugoslavia, the President shall continuously assure himself (1) that Yugoslavia continues to maintain its independence, (2) that Yugoslavia is not participating in any policy or program for the Communist conquest of the world, and (3) that the furnishing of such assistance is in the interest of the national security of the United States.

In my opinion, this language is stronger than the gentleman's amendment.

Now, we are desirous of keeping Yugoslavia from reentering the Cominform. It is our desire to keep Yugoslavia independent from the Kremlin.

The gentleman's amendment would discontinue all aid to Yugoslavia upon the enactment of this legislation and would very likely drive Yugoslavia into

the Soviet. All Soviet bloc credits to Yugoslavia were canceled in 1958, and no new Soviet credits are at present anticipated. I wish to point out that there is no military assistance to Yugoslavia in the legislation before us.

The program for Yugoslavia constitutes technical assistance and special assistance to be used entirely to procure demonstration equipment, including teaching aids and laboratory equipment. That is, to demonstrate our way of life to the people of Yugoslavia.

The technical cooperation program will include such things as industrial productivity centers, a training and research institute in connection with a model coal mine, a highway institute for the training of Yugoslav engineers and technicians, and public health improvement program. No DLF loans are currently contemplated.

It is very difficult for the United States to take any action which will improve the lot of or advance the liberation of the people in the European satellite countries.

The United States is not ready to go to war to liberate the satellites and it is not either to our or their interest to incite them to premature revolution. There are limits on the value of directing propaganda to them since they are already aware of the advantages of freedom and do not need to be reminded of them.

Assistance to Yugoslavia does contribute to the promotion of the independence of the satellite countries.

Each satellite is governed by Communist bureaucrats. These officials take orders from Moscow. It is in our interest if we can encourage these bureaucrats to think of themselves as having a national interest and a national identity rather than as being Russian stooges. If they occasionally regard themselves as Czechs, or Bulgarians, or Poles, and as having an obligation to their own countries rather than to the Soviet Union, it is worthwhile.

Tito serves as a constant reminder to the satellite countries that a nation may avoid becoming completely assimilated into the Soviet Union.

It must be conceded that Tito is a Communist, a dictator, and that he would very likely not be elected President by his own people in a free election.

It must be conceded also that he tries to remain on good terms with both the Soviet Union and the United States, and that he seeks assistance from both sides. If we discontinue the limited amount of assistance provided for in this bill to Yugoslavia, may cause Tito to seek all of his assistance from the Soviet Union. We close the door, bring down the Iron Curtain, and make it impossible for us to penetrate into that area. Therefore, in spite of these facts I submit, it is in the interest of the United States to continue to provide assistance to Yugoslavia. Under this bill authorization is planned only for a small amount of economic and technical assistance which is to the benefit of the people of Yugoslavia. No military aid is programed for Yugoslavia.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. GROSS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I think this is an excellent time and place to put in the RECORD some more information regarding Yugoslavia. The gentleman from Wisconsin says we are giving them only a little aid. Let us take a look at this unclassified list of what we are doing under the Development Loan Fund alone for Yugoslavia. Here is a $5 million so-called loan for 20 deisel locomotives, $5 million. Incidentally, as I said earlier today, those locomotives are being bought abroad, not manufactured in this country, using our workmen, our coal, our steel, and so on and so forth. There is fertilizer plant, $22.5 million. A thermal powerplant, $9 million, and a hydroelectric plant, $15 million. Does the gentleman still say we are giving them a little aid? All of that is in addition to the military assistance and other handouts to Yugoslavia.

Mr. ZABLOCKI. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Wisconsin.

Mr. ZABLOCKI. The gentleman does not maintain that the programs he has enumerated are provided for in the bill presently considered by this body. I did not say there was little aid given to Yugoslavia in the past. I stated that there is very little aid in this bill for Yugoslavia

Mr. GROSS. Let me add this: Most of these so-called loans, soft loans, are being made for 20 to 25 years, at 3½ percent interest and they are to be repaid almost altogether in the currency of that country. If ever paid, it will be in the currency of Yugoslavia. What American taxpayers, who have put up the dollars, will do with the dinars I do not know. Oh, yes; there is more than a little aid going to Yugoslavia.

Mr. ZABLOCKI. Mr. Chairman, if the gentleman will yield further, would he prefer that Yugoslavia obtain the assistance that country needs from the Soviet Union? Would he prefer that we discontinue giving aid to Yugoslavia?

Mr. GROSS. I say the gentleman will not stand on the floor of this House now or later and tell me that when the chips are down, Tito and his Yugoslavia will be on our side.

Mr. ZABLOCKI. Not so long ago Yugoslavia was not in accord with the policy of the Soviet Union.

Mr. GROSS. The gentleman is not going to stand here and say that he would depend upon Tito to fight with the United States if we ever have a war. I know he will not do that.

Mr. FEIGHAN. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Ohio.

Mr. FEIGHAN. I would like to bring to the attention of the Members and also my distinguished colleague from Wisconsin [Mr. ZABLOCKI] that a careful analysis of the foreign policy of the Communist government of Yugoslavia, which is included in my remarks of yesterday, clearly shows that Tito and the Communist government of Yugoslavia have failed to fulfill any of the three requirements for receiving U.S. aid which are required under section 143. When you talk about giving money or assistance to Yugoslavia to keep them from the camp of the Soviet Union, they are already in the camp of the Soviet Union; they are part and parcel. And, if there is any question of a showdown, it is patently clear that the Yugoslavs, according to the words of Tito, will go along with the Communist conspiracy headed by the Kremlin.

By giving aid to Tito, we are strengthening his tyrannical grip over the people of Yugoslavia. Aid to Tito does not contribute to the promotion of the independence of the satellite countries, instead it shows the Communist countries that they can still be Communists and still get assistance from the United States. Aid to a Communist regime appears to me to be a strange method of telling the enslaved people that the United States is against communism.

Mr. POFF. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Virginia.

Mr. POFF. May I inquire of the gentleman if he has any information relative to a gift of an atomic reactor to Yugoslavia.

Mr. GROSS. There is nothing shown to that effect in this material, and I have no such information; no.

Mr. POFF. I recently had occasion to read an article on that subject, and I wonder if the gentleman would yield further so that I might direct that question to the chairman of the committee.

Mr. GROSS. Of course I yield for that purpose.

Mr. ZABLOCKI. Mr. Chairman, will the gentleman yield?

Mr. GROSS. Yes, I yield.

Mr. ZABLOCKI. We have given some assistance toward an atomic reactor, but they already had a reactor. I wish to point out however, there is no money in this bill for that purpose.

Mr. POFF. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield.

Mr. POFF. It is my understanding that the reactor which they already have was donated to them by Soviet Russia; is that true?

Mr. ZABLOCKI. That is correct.

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield.

Mr. DERWINSKI. I am wondering if under this technical assistance program or any other program that we might provide Yugoslavia, it would be proper for us to ask that some assistance be given to provide religious freedom for the poor people in Yugoslavia, or would that be too much for us to ask of them?

The CHAIRMAN. The time of the gentleman from Iowa [Mr. GROSS] has expired.

The question is on the amendment offered by the gentleman from Ohio [Mr. FEIGHAN].

The question was taken; and on a division (demanded by Mr. FEIGHAN) there were—ayes 36, noes 62.

Mr. FEIGHAN. Mr. Chairman, I demand tellers.

Tellers were refused.

So the amendment was rejected.

The Clerk read as follows:

TECHNICAL COOPERATION

SEC. 203. Title III of chapter II of the Mutual Security Act of 1954, as amended, which relates to technical cooperation, is amended as follows:

(a) In section 304, which relates to authorization, strike out "$179,500,000" and "1960" and substitute "$172,000,000" and "1961", respectively.

(1) Amend section 306, which relates to multilateral technical cooperation and related programs, as follows:

(1) In subsection (a), which relates to contributions to the United Nations Expanded Program of Technical Assistance and related fund, strike out "$30,000,000" and "1960" and substitute "$33,000,000" and "1961", respectively.

(2) In subsection (b), which relates to contributions to the technical cooperation program of the Organization of American States, strike out "1960" and substitute "1961".

Mr. ROGERS of Florida. Mr. Chairman, I move to strike out the requisite number of words.

Mr. Chairman, funds in the amount of $931 million are recommended in this bill for two particular economic assistance programs: defense support, and special assistance. This $931 million will take the form of direct gifts and grants to those countries receiving this aid. During the last session, with the active support of the distinguished chairman and members of the Foreign Relations Committee, I submitted an amendment to the mutual security bill aimed at cutting down economic gift and grant assistance in these two categories. A similar amendment was proposed in the Senate by Senator MANSFIELD. This amendment, overwhelmingly adopted by the Congress and now section 503(c) of the Mutual Security Act, directed the President to conduct a continuing country-by-country study of those countries now receiving this type of aid and to present a plan whereby gifts and grants would be progressively reduced and terminated. The adoption of this amendment marked the first positive expression of congressional intent that gift and grant aid be cut down.

A report on the continuing study provided for in section 503(c) was recently submitted to the Congress by Under Secretary Dillon. This report contained some frank predictions as to what we could expect in the way of reductions and termination in gifts and grants. It is encouraging to me and I know to other Members of the House who want to see the overall program cut down to size, that termination of almost half of the 22 defense support and special assistance programs can be foreseen within the next 5 years.

This year, as the result of the detailed study provided for in section 503(c), we have seen a $115 million reduction in the amount requested for these two categories of economic assistance for fiscal year 1961 below the amount requested for the same program last year. I am pleased to note that the committee has reduced these requests by an additional $61.5 million. This reduction may seem slight when we think in terms of the costs of the overall program but at least it represents a start in the right direction.

I hope that those who administer the program will realize that the Congress has a continuing interest in seeing that 503(c) is administered each year with a determined effort to see that these programs are reduced and eventually eliminated.

I want to thank the chairman of the committee for his fine support in starting us toward getting some savings as a result of this amendment.

Mr. MORGAN. Mr. Chairman, will the gentleman yield?

Mr. ROGERS of Florida. I yield to the gentleman from Pennsylvania.

Mr. MORGAN. I think the Rogers-Mansfield amendment has served a useful purpose. I agree with the gentleman it has contributed to bringing about a reduction in the defense support funds. Heretofore the full report on the implementation of this amendment has been classified, but last week an unclassified report has been released. It has been a good amendment.

Mr. ROGERS of Florida. I appreciate the remarks of the chairman.

Mr. Chairman, in connection with the foreign aid program, two schools of thought exist. Under Secretary Dillon has publicly called for its extension for perhaps 50 years. On the other hand, John Hollister, a former administrator of the program, cites the fact that it was intended to be only a temporary plan and that we should begin thinking in terms of discontinuing it. Paul Hoffman, another former administrator of economic aid, had this to say:

I believe that the notion that you can win friends with economic aid will not hold water. In other words, I don't think you can win friends nor do I think economic aid is an instrument that can be used successfully in this so-called cold war.

This year, assuming that the President's request for funds is approved, the almost $6 billion in previously appropriated unspent sums will make a total of almost $10 billion that can be spent during the fiscal year beginning July 1, 1960. Despite these tremendous expenditures, the foreign aid program is still beset by many of the haphazard operations that have characterized it since the beginning. While progress is being made toward cutting down the program in some areas, waste and inefficiency remain large scale in others. Administering agencies have built themselves into gigantic self-sustaining bureaucracies now numbering 43,000 permanent personnel with an additional 10,000 trainees.

Last fall, a study mission composed of members of our own Foreign Relations Committee completed a 40,000-mile world tour to study the effect of the foreign aid program in areas which have been receiving our aid. The report of this study group is replete with further examples of lavish, unnecessary spending. It concluded by calling for an immediate review and reappraisal of the foreign aid program because it is not "reaching the people." It also cited the pressing need for greater supervision of its farflung activities. To these recommendations I can only add a sincere "amen."

Sooner or later, Mr. Chairman, we are going to have to face up to the fact that a program which is trying but failing to reach the people must be reevaluated in terms of basic objectives. If it is not reaching the people the fault certainly cannot be attributed to any lack of funds. Our own Comptroller General has stated that the weakness of the program is too much money rather than too little. We have too often been placed in the anomalous position of trying to win friends to the democratic way of life among those who have neither the understanding nor the present background to understand democracy.

We no longer limit ourselves to giving help to a country that will strengthen its government in resisting threats of oppressor nations or to some modest aid that might attain some modest improvement in that nation's economy. We undertake, instead, to reshape the whole country—its agriculture, its industry, its schools, even its customs and way of life.

In short, we no longer discipline ourselves by hard judgments on what we hope to accomplish or to whether there is a reasonable prospect of accomplishing it. This failure of discipline has given to the foreign aid program unattainable objectives, limitless cost, and accounts for practically all its trouble; the waste, the inefficiency, and the irritation of the recipients with their benefactors.

If one can see any encouraging trend in our present attitude toward foreign aid, it is the increasing emphasis on loans rather than grants. It seems to me that this is a good beginning toward returning to a sensible policy. With this encouraging start, perhaps we can begin thinking in terms of specific programs rather than a sweeping general program; perhaps we can devote our energies to helping nations carry out their own plans in their own way, if we decide their plans are worth helping at all.

But first, we are going to have to abandon the notion that the U.S. Treasury is a perpetual fount, spouting forth tax dollars to every nation under the sun just because these nations are underdeveloped or in serious financial straits or happen to want some U.S. dollars. The long range objectives of promoting friendship for the United States among the lesser developed nations of the world has too often not been attained. Because I do not think that we have received benefits commensurate with the nearly $80 billion we have poured into this program, I intend to oppose again this year any additional funds for this purpose especially with such large sums remaining unspent and I am hopeful that the Congress will again see fit to substantially reduce the amount requested for foreign aid.

Mr. GROSS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GROSS: On page 5, immediately after line 6, insert the following: "(c) Repeal section 308, which

relates to the International Development Advisory Board".

Mr. GALLAGHER. Mr. Chairman, I rise to urge the passage of this section without reduction of the amount requested in this section with regard to technical cooperation. This is an area which should be approached in light of our real national purpose. This is an area where we assist people, where we lend aid to the needy, where we stand ready to meet our obligations to the rest of mankind.

I have listened to the criticism of the opponents of this program on both sides of the aisle, who each year oppose the program. Some conscientiously oppose—others with a meat ax in their hand and lacking the slightest acquaintance with the real need or purpose of the Mutual Security Act try to ridicule it with isolated instances of inefficiency and waste.

Is it not the real intent of all of us to eliminate waste and inefficiency where they appear? But this can never be a reason to condemn the program in toto. It may be a convenient reason for opposition. But it is not a valid reason for opposing the entire program.

The authorization request for fiscal year 1961 is $172 million. The technical cooperation programs reach people more directly and more immediately than any other form of aid. Critics who argue that our aid does not reach down to people should support this program. This is an area where we should increase the program rather than decrease.

The principal fields of activity are agriculture, education, public administration and health.

This is not a commodity program. Eighty-one percent of the funds are for costs of technicians, training of local participants in the United States and other free countries, and for contracts with American universities and business firms who aid in research of difficult problems to bolster economic progress.

A major factor and an extremely important aspect of this year's program is an acceleration in the African countries. This is in addition to the special program for tropical Africa that will be financed through special assistance funds.

The amount programed for Africa in fiscal year 1961 is $24,300,000, an increase of $3,350,000 over the current year. This increase understates the funds for Africa since at the time the budget was prepared it was not apparent that the Belgian Congo, the Mali Federation, Madagascar, and other former colonies would secure their independence.

The $172 million recommended is several millions less than the field requests. The latter were screened intensively and overall the feasibility of recruiting U.S. technicians and otherwise implementing the program was considered before the executive branch made its final recommendations.

I urge the passage of the whole amount. Nations that we have helped in the past have indicated a readiness to join us in aiding the underdeveloped nations. Their participation should be encouraged. Our faith in the program is the best type of encouragement.

Let us act responsibly and maturely, with patience and understanding toward the old nations and the new; let us vote favorably in this program with no further cuts in these vital areas.

It is perhaps a great opportunity to demonstrate to all nations and all people that we are interested not only in containing communism but that we are interested in making life more worthwhile for those who, but for the United States, would be without hope.

Mr. MORGAN. Mr. Chairman, we accept the amendment.

Mr. GROSS. I thank the gentleman.

The CHAIRMAN. Without objection, the amendment is agreed to.

There was no objection.

The Clerk read as follows:

SPECIAL ASSISTANCE AND OTHER PROGRAMS

SEC. 204. Title IV of chapter II of the Mutual Security Act of 1954, as amended, which relates to special assistance and other programs, is amended as follows:

(a) In section 400(a), which relates to special assistance, strike out "1960" and "$247,500,000" and substitute "1961" and "$256,000,000", respectively, and add at the end thereof the following: "It is the sense of the Congress that so long as it is the policy of the United States not to sell or furnish armaments to any one nation in the Near East, no part of the funds appropriated pursuant to this section should be used for the purchase of armaments by any other nation in the Near East."

(b) In section 401, which relates to the United Nations Emergency Force, strike out "1960" in the second sentence and substitute "1961".

(c) In section 402, which relates to earmarking of funds, strike out "1960" in the first sentence and substitute "1961".

(d) In section 403, which relates to responsibilities in Germany, strike out "1960" and "$7,500,000" in the first sentence and substitute "1961" and "$6,750,000", respectively.

(e) Insert after section 403 the following new section 404:

"SEC. 404. INDUS BASIN DEVELOPMENT.—The Congress of the United States welcomes the progress made through the good offices of the International Bank for Reconstruction and Development toward the development of the Indus Basin through a program of cooperation among South Asian and other nations of the free world in order to promote economic growth and political stability in South Asia, and affirms the willingness of the United States, pursuant to authorities contained in this and other Acts, to participate in this significant undertaking. In the event that funds appropriated pursuant to this Act are made available to be used by or under the supervision of the International Bank for Reconstruction and Development in furtherance of the foregoing purposes, such funds may be used in accordance with requirements, standards, or procedures established by the Bank concerning completion of plans and cost estimates and determination of feasibility, rather than with requirements, standards, or procedures concerning such matters set forth in this or other Acts; and such funds may also be used without regard to the provisions of section 901(b) of the Merchant Marine Act of 1936, as amended (46 U.S.C. 1241), whenever the President determines that such provisions cannot be fully satisfied without seriously impeding or preventing accomplishment of such purposes.".

(f) Amend section 405, which relates to migrants, refugees, and escapees, as follows:

(1) In subsection (c), which relates to contributions to the program of the United Nations High Commissioner for Refugees, strike out "1960" and "$1,100,000" and substitute "1961" and "$1,500,000", respectively.

(2) In subsection (d), which relates to the continuation of activities undertaken for selected escapees, strike out "1960" and "$5,200,000" and substitute "1961" and "$3,500,000", respectively.

(g) In section 406, which relates to children's welfare, strike out "1960" and substitute "1961".

(h) In section 407, which relates to Palestine refugees in the Near East, strike out "1960" and "$25,000,000" in the first sentence and substitute "1961" and "$18,500,000", respectively; and strike out the proviso in the first sentence.

(i) In section 409(c), which relates to ocean freight charges, strike out "1960" and "$2,300,000" and substitute "1961" and "$2,000,000", respectively.

(j) Amend section 411, which relates to administrative and other expenses, as follows:

(1) In subsection (b), which relates to certain expenses of administering nonmilitary assistance, strike out "1960" and "$39,500,000" and substitute "1961" and "$40,000,000", respectively.

(2) In subsection (c), which relates to administrative and other expenses of the Department of State, strike out "to" after "appropriated" and substitute "for expenses of".

(k) Section 412, which relates to the President's special education and training fund, is repealed.

(l) In section 419(a), which relates to atoms for peace, strike out "1960" and "$6,500,000" and substitute "1961" and "$3,400,000" respectively.

(m) Add the following new section after section 420:

"SEC. 421. LOANS TO SMALL FARMERS.—It is the policy of the United States and the purpose of this section to strengthen the economies of underdeveloped nations, and in nations where the economy is essentially rural or based on small villages, to provide assistance designed to improve agricultural methods and techniques, to stimulate and encourage the development of local programs of self-help and mutual cooperation, particularly through loans of foreign currencies to associations of operators of small farms, formed for the purpose of joint action designed to increase or diversify agricultural productivity. The maximum unpaid balance of loans made to any association under this section may not exceed $25,000 at any one time; and the aggregate unpaid balance of all loans made under this section may not exceed $10,000,000 at any one time."

Mr. BENTLEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BENTLEY: On page 5, line 15, strike out all after "that" through the comma on line 16 and strike out "other" on line 18.

Mr. BENTLEY. Mr. Chairman, I want at this time to express my personal appreciation to the chairman of our committee for the very kind remarks he made about my work on the committee earlier in the day, and to say as I have said in the past, that it is with very deep regret I say goodby to him and to my other colleagues on the Committee on Foreign Affairs at the close of the 1960 year.

This amendment, Mr. Chairman, is merely for the purposes of strengthening a very desirable portion of this bill.

which was written in by the Committee on Foreign Affairs. It was the feeling of the committee that with respect to special assistance, which the committee understood was being used by certain countries in some cases for the purchase of armaments in the Near East, even though special assistance is basically economic assistance, that in view of the unsettled conditions in the Near East, and in view of the tensions that not only exist but can be aggravated by unrestricted sales or purchases of armaments in that area, it was felt, as I say, by the committee that special assistance should not be used by any country in the Near East for the purpose of purchasing armaments, but should be limited entirely to economic assistance as, of course, is the intent of the special assistance section. I did feel when this particular language on page 5 was adopted by the committee that some confusion might possibly arise owing to the fact that there are countries or one country at least in the Near East to whom, I believe, under no circumstances would we sell or furnish armaments at the present time. I, therefore, felt that language would be clarified and strengthened by the adoption of my amendment, which would make the language read as follows:

It is the sense of the Congress that no part of the funds appropriated pursuant to this section should be used for the purchase of armaments by any nation in the Near East.

Mr. MORGAN. Mr. Chairman, will the gentleman yield?

Mr. BENTLEY. I yield.

Mr. MORGAN. After a consultation with the author of the language of this section of the bill, the gentleman from California [Mr. SAUND], I think the amendment offered by the gentleman from Michigan improves the bill and there is no opposition to it.

Mr. BENTLEY. Mr. Chairman, I wonder if the author of the amendment, the gentleman from California [Mr. SAUND], with whose objectives in writing this language in the bill I thoroughly concur, has any comment he would care to make at this time.

Mr. SAUND. I have nothing to add to what my chairman has said.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan [Mr. BENTLEY].

The amendment was agreed to.

Mr. GEORGE P. MILLER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GEORGE P. MILLER: On page 7 of the bill, on line 8, strike out the period within the quote and insert in lieu thereof the following: ", provided that compensating allowances are made in the administration of other programs to the same area to which the requirements of said section 901(b) are applicable."

Mr. GEORGE P. MILLER. Mr. Chairman, this merely clarifies and makes certain that the intent of the committee is fully carried out with respect to the so-called fifty-fifty act. I have taken this up with the chairman and with Dr. JUDD, and they assure me there is no objection to the amendment.

Mr. MORGAN. That is agreeable. I think the Committee on Merchant Marine and Fisheries has taken this up with the State Department, and this language is acceptable to them.

Mr. GEORGE P. MILLER. Mr. Chairman, the principle involved in the proposed section 404 of the present bill troubles me greatly. First, let me mention the language specifically. It provides in part that the Cargo Preference Act or section 901(b) of the Merchant Marine Act of 1936 shall be waived in connection with the Indus Basin project. It goes on to mention in rather fancy language the circumstances under which it shall be waived, but I am left with one very strong conviction and that is the Department's desire to cater not to our own interests but to the interests of those abroad in waiving the Cargo Preference Act. This is at least the third time that I recall that a new program was going to prove to be a fiasco unless the Cargo Preference Act was waived. Everyone of those predictions was in error, and I have absolutely no reason to believe that that which is anticipated now will prove otherwise.

Just for a moment, let us talk about the necessity for granting this authority at this time for a program that is going to run for 10 years. The Department of State has said on two different occasions that it does "not foresee need to exercise this authority in the near future." Why, then, the request at this time? Surely, if the fate of this monumental project rests on the waiver of the Cargo Preference Act, there is hardly a member of this body who would not set aside that legislation should such an exigency develop. But we have no evidence of this so far. The Department itself doubts that it will ever come to pass.

Moreover, if the witness of the State Department before the Committee knew how his own Department was administering the Cargo Preference Act, it would have been crystal clear to him that the authority to waive cargo preference was absolutely unnecessary. Never has our shipping law been administered on the basis of each particular project within a broad aid program. It has always been administered overall to each geographic area. It would, therefore, have been entirely proper, should the situation have developed, for American ships not to carry any of the Indus River project cargoes, provided that other aid programs to that area were administered in such fashion as to give American ships 50 percent participation overall. This is so completely obvious that the Department, apparently seeking to save face, issued a release on April 19, 1960, in which it said, referring to the extent of American-flag participation in Indus River cargo, that—

Should this amount prove to be lower than that required under the cargo preference legislation, it was believed that compensating adjustments in other MSP-financed traffic patterns would obviate the need in the near future to request actual use of the waiver authority.

The facts are brutally simple. Had the State Department known what it was doing in this connection in the first place, it would have been blatantly evident that the waiver authority requested was absolutely unnecessary, particularly at this time.

Now, for a moment as to the principle involved, completely apart from the specific law that is asked to be waived. I have been a consistent supporter of the foreign-aid program, and I am impressed with the monumental burden undertaken by our taxpayers in supporting these various programs. In part, this tax burden was compensated for by the stimulation of the American economy and job creation in the production of goods and services for shipment abroad. But recently, the emphasis has shifted to stretching the aid dollar by increasing procurement abroad. This may make our dollar go further, but it certainly does not bring anything back into the American economy. Now, we are faced, in section 404 of the present bill, with an entirely new proposition. This runs to the effect that because our money in tremendous proportions is being commingled with the small amounts of moneys of other countries and the total sum is to be administered by the International Bank, long-standing American laws shall be set aside. On page 236 of part 2 of the hearings, we are advised by its advocates that it is essential that the International Bank "have the authority to allow the use of our funds in accordance with the requirements, standards, or procedures of the International Bank." To date, they have chosen to set aside our maritime laws for at least 10 years in the future. When next are our health and safety laws to be set aside, and what then will the excuse be? When is our farm legislation to be set aside? When will progressive labor and social security legislation be set aside? And what sort of pretext will be advanced for that?

Without equivocation, and I doubt if there is a Member of this body who will disagree with me, I do not think my constituents would appreciate giving away a substantial portion of the United States and, in addition thereto, setting aside American legislation as a necessary prerequisite. For us to yield our money is one thing; to yield our principles and law, quite another.

I, therefore, am heartily in favor of specifically providing in the present legislation the amendatory language suggested so as to assure that our basic legislation is not eroded.

Mr. TOLLEFSON. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, section 404 of this bill provides for participation by the United States in the Indus Basin development project—a billion-dollar undertaking in which the United States would be putting up some $515 million of a total of $645 million being contributed by six countries including the United States. In addition, the World Bank, which will be administering this project, is putting up $103 million, and the two countries in which the project would take place,

namely, India and Pakistan, will also be making some contribution in local currency.

Because the funds which will be appropriated for the Indus Basin under this bill will be administered by the World Bank the Department of State has anticipated the possibility of a problem in administering one of the provisions of the Merchant Marine Act of 1936, as amended, namely, the matter of cargo preference in connection with the shipment of materials deriving from our mutual security assistance programs. To cover this point the final clause of section 404 provides for waiver of the provisions of section 901(b) of the Merchant Marine Act, as amended, in connection with this project whenever the President determines that such provisions cannot be fully satisfied without seriously impeding or preventing the accomplishment of the purposes of the program.

This matter of waiver of our cargo preference statutes in connection with the Indus Basin Project is a matter of great concern to the entire steamship industry. The waiver provision goes so far beyond the requirements of the situation that one wonders whether there is not some purpose behind it other than that of which we and the Congress have been informed. The State Department, speaking for the administration, has advised that there is no immediate necessity for waiver but that authority for it has been requested in the event waiver should be found desirable in the future; and that in any event the shipping industry should not be concerned because any deficiencies resulting from this project can be compensated from within the regular mutual security program for the area. Under Secretary of State Dillon advised the ocean steamship industry to this effect in a letter to Ralph E. Casey, president of the American Merchant Marine Institute, dated April 11, 1960, from which the following is quoted:

> As we have explained to the Congress and to you and your associates, we do not foresee need to exercise this authority in the near future. If the present programs of assistance under the Mutual Security Act were to continue at approximately present levels over the period of time that will be required to complete the Indus Basin project, we could probably be reasonably confident that no necessity to waive the provisions of the cargo preference legislation would arise.

In this same letter Secretary Dillon advised the industry that "we anticipate ability to compensate within the regular mutual security program for the required proportion of the tonnage deriving from implementation from the Indus Basin project."

It is just this kind of logic which has caused our industry such concern. If section 901(b) of the Merchant Marine Act can be administered in the manner in which Secretary Dillon proposes—and we agree that it can—why, then, is a waiver needed? Would not the effect of such waiver authority be to relieve the Department from its obligation to compensate for these cargoes in the manner in which they say they are willing and plan to do? For this reason I urge that it be made clear in the language of the bill itself that this waiver authority, if granted, will not be used as a mechanism for avoiding the promised compensation from other mutual security programs.

It has been suggested that an appropriate means of accomplishing the above would be to append a clause at the end of the present waiver provision to the effect that in the event of exercise of this waiver any deficiencies in section 901(b) of the Merchant Marine Act of 1936, as amended, resulting from the exclusion of this program will be compensated for to the extent possible from other mutual security programs in the same area. Such an amendment is nothing more than putting into language of the waiver authority that which Secretary Dillon has advised the Congress and the industry he plans to do as a matter of administration.

We would have preferred, of course, that the waiver provision be removed entirely from the bill. However, it is appreciated that at this stage matters may have progressed to the point where such a request might be considered unreasonable by many of those concerned. In all fairness, therefore, we urge the above action as a second-best, but acceptable, solution.

Mr. GEORGE P. MILLER. Mr. Chairman, will the gentleman yield?

Mr. TOLLEFSON. I yield.

Mr. GEORGE P. MILLER. I do want to express my appreciation to the chairman and to Mr. JUDD, and to the members of the committee on your side for the understanding way in which they have received us and for the fact that they have agreed to accept this amendment, which pretty well clears up the situation.

Mr. JUDD. I think it should be said that the reason the committee went along with this waiver of the 50–50 proviso was the fact this is the first big multilateral arrangement that it has been possible to work out. It has taken the International Bank 8 years to get the India-Pakistan agreement, and we do not want to jeopardize so important a project. We favor such multilateral arrangements. We do not want to have the United States bear the whole burden of a project if we can get a group of countries, some of which are in better financial condition than the United States, to go along in multilateral financing. Australia, New Zealand, Canada, Germany, and the United Kingdom are contributing to this project. If we insist upon a certain condition regarding our contribution, Germany or Canada or New Zealand can do the same thing, and smooth administration of the whole thing would be stymied. As long as we can accomplish the merchant marine's objective of assuring that 50 percent of all shipping under this bill is in American bottoms, the end desired is achieved, and a possible foulup of this multilateral program is avoided.

Mr. TOLLEFSON. I thank the gentleman.

I want to join the gentleman from California [Mr. MILLER], in expressing appreciation for the cooperation of the committee. We favor the Indus Basin project. We do not want to do anything to hurt the project, but we want to protect our Cargo Preference Act.

Mr. GROSS. The gentleman from Minnesota mentioned New Zealand. Well, we are getting tons of dressed lamb and other materials from New Zealand and Iceland. At the same time, we support wool at approximately 100 percent of parity. That is some more of the folly of this entire international program.

Mr. TOLLEFSON. I thank the gentleman for his contribution.

Mr. PHILBIN. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. PHILBIN. Mr. Chairman, I want to compliment the able gentleman for introducing this amendment. Obviously, it is needed to protect the American merchant marine. I compliment the able chairman and the committee for accepting it.

Some fantastic arguments have been used in support of the proposed waiver of the cargo preference law. It is asserted, for example, that the World Bank opposes it. As a matter of fact, the United States is putting up most of the money for the Indus Basin project.

If cargo preference statutes are to be waived in this kind of a case, it will set a very dangerous precedent. It will also strike a body blow to our merchant marine and maritime policy.

The State Department does not claim that a waiver is necessary, but vaguely suggests that the waiver might be desirable in the future.

Under Secretary Dillon went beyond this view and stated definitely that the Department did not foresee the need of this authority in the near future.

Furthermore, the Secretary stated that the Department expected to be able to compensate within the regular mutual security program for the required proportion of the tonnage derived from implementation of the Indus Basin project.

It is clear, then, if this adjustment could be made by the Department, a waiver is not needed at this time.

Moreover, the obvious result of such waiver authority might well be construed to relieve the Department from its duty to compensate under its own program.

In view of these uncertainties and the threat to the merchant marine, I think that the language such as proposed by the gentleman should definitely be incorporated in this bill.

In fact, the best result from a legal, as well as an administrative, standpoint might be by striking out this unnecessary waiver authority.

If we do not follow that course, we should certainly adopt this amendment, which will specifically require the kind of compensating administration under the law which Congress has provided.

I cannot see any objection to this amendment because it would merely write into the bill the requirement to do what the State Department has advised us it plans to do anyway.

Let us not put further penalties on our merchant marine. I think it is the overwhelming wish of this Congress to support, sustain, and protect the merchant marine and we should not hesitate to do it.

Mr. Chairman, I hope that the amendment will be adopted.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California [Mr. GEORGE P. MILLER].

The amendment was agreed to.

Mr. MURPHY. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, by the end of 1960 the political map of Africa will be so changed that it will be difficult for anyone to differentiate between the dependent areas and the independent countries created since World War II. Between now and October there will be at least four more independent countries—Togo, Congo, Somali, and Nigeria. Negotiations now under way with France may result in independence during this year for the Federation of Mali—Senegal and Sudan—and the Malagasy Republic—Madagascar.

Africa, as we see it today, is a land where everything is happening at once—equality and racism, colonialism and nationalism, constitutional struggles, endless quest for economic and social advancement, civil strife, and the conflict between democracy and communism. The swift pace of political developments on the African scene is the pressing need for accelerating the sluggish rate of economic growth and improving living standards. Africa's economic and social structures are not developing at a pace comparable to its political evolution. It is essential that the pace of economic development match, or at least not fall further behind, the rate of political change now sweeping the African Continent.

Very few of the emerging countries are economically viable and their leaders very quickly recognize the importance of economic development and a higher standards of living as necessities to sustain their political independence. Countries are becoming politically independent without adequately trained leadership and technical skills and without the basic economic and social institutions and systems which provide the foundation for secure, confident African-led nations.

The forces of international communism are fully aware of the opportunities presented to exploit the nationalistic movement in Africa for their own political ends. They have been doing so at an increasing rate, covertly through their usual methods, and overtly through rather massive economic and technical assistance in chosen areas. The record indicates that through and by the stability and good sense of the African people themselves, communism has not gained a significant foothold on the continent. There is convincing evidence that the Africans who have but recently freed themselves of foreign control will not, except by force, permit themselves to come under a new domination alien to them in every sense of the word. There are many indications that the African peoples and leaders will be vigilant and uncompromising in rejection of all political subversion masquerading as friendship and assistance.

The United States has great ties with Africa of a more tangible kind. About one-tenth of our population has its origin in Africa. We have, therefore, a special interest in events in Africa, an interest, however, which is by no means confined to those of our population who had their origin on that continent and who have contributed so much to our culture and its expression. Our governmental and cultural relationships with Africa are of long standing. We can look forward to the future for a firm understanding and cordial relations between the peoples of the United States and Africa.

Africa is now receiving over $500 million annually from European countries for major development projects. Increasing amounts of technical and other forms of assistance are coming from a number of private organizations. A number of U.S. foundations are making important contributions in a number of fields. The United Nations, through its technical assistance program and its special fund, is stepping up its assistance to this continent. The Export-Import Bank has already made substantial loans to Africa and has indicated it expects to increase its activity. The International Bank for Reconstruction and Development—IBRD—now has in progress a number of country and project economic surveys which should lead to more loans to Africa, in addition to those already made.

The total economic aid in this year's program for Africa will be $115 million for special assistance, plus $24.3 million for technical cooperation. We are hopeful that this amount will be increased in the future when the results in economic development are visible. Both African and outside observers agree that for a long time to come the principal assistance required by the emerging states is, first, education and training, and, second, development assistance, which includes private investment and public financing.

The United States has but lately become involved in providing a share of the educational, technical, and development assistance so urgently needed in Africa. In the cultural exchange field there are now more than 1,700 African students in the United States. Next year our Government hopes to finance 500 educational exchanges, 400 of them to bring Africans to this country, 100 for American teachers, professors, and specialists to work on the African Continent.

These are good beginnings, but they are not good enough. As the most materially favored nation in the free world, we must accept a larger responsibility in meeting this challenge. We are called upon to play a new and a more positive role in responding to the needs of these countries and in sharing with them our human and material resources. The peoples of the African Continent are looking to the United States to see how it will respond to their needs and problems. Our answer to their needs shall not be found wanting.

Mr. WOLF. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WOLF: On page 9, immediately below line 7, insert the following:

"(m) Add the following new section at the end of such title IV:

"'SEC. 422. FOOD AND FIBER FOR ECONOMIC DEVELOPMENT THROUGH THE UNITED NATIONS.—(a) The President is authorized during the ten-year period which begins on the date of enactment of this section upon request by the Secretary General of the United Nations to furnish, without charge, to the United Nations or to any agency thereof, from stocks of the Commodity Credit Corporation, commodities which are surplus, as determined by the Secretary of Agriculture. In making such commodities available to the United Nations or any of its appropriate agencies, the United States shall enter into agreements with the United Nations or any of its appropriate agencies providing that—

"'(1) such commodities shall be used in underdeveloped areas to further (A) industrialization and basic capital improvements including (but not limited to) community development projects, harbors, roads, canals, bridges, schools, dams, and the like; (B) education and educational programs including (but not limited to) school lunch and school clothing programs; (C) national food and fiber reserves;

"'(2) the United States will pay the costs of transportation of such commodities to ports of debarkation;

"'(3) such commodities shall not replace in the countries of use the usual domestic production or imports of the same or similar commodities;

"'(4) such commodities shall be used solely for domestic consumption in the country to which exported, and shall not be reexported nor shall such commodities be used to replace commercial exports from the United States;

"'(5) the President through the United States mission to the United Nations shall be kept fully informed with respect to the activities made possible by, and uses made of, commodities furnished by the United States under such agreements, and with respect to whether or not the objectives of the United Nations are being carried out through the programs undertaken pursuant to this section.

"'(b) Agreements shall not be entered into under this section which will call for the furnishings in any calendar year of agricultural commodities representing an investment by the Commodity Credit Corporation in excess of $250,000,000.

"'(c) The President is authorized to cooperate with the Secretary General of the United Nations in bilateral and multilateral operations with other member nations of the United Nations that wish to further their own economic well-being and the objectives of the United Nations through the contribution or use of surplus foods and fibers.'"

Mr. JUDD. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. JUDD. Mr. Chairman, I make a point of order against the amendment.

Mr. Chairman, this amendment has great appeal and we understand and laud its objectives. Everyone wishes that it were possible to get more of our bountiful surpluses of food and fiber into the hands of people who need them, without disrupting world trade, and so on. But after a careful reading of the

amendment, it seems to me that it is outside the scope of this bill and outside the jurisdiction of the Committee on Foreign Affairs.

This amendment authorizes the President to furnish without charge commodities from stocks of the Commodity Credit Corporation, an agency which is certainly not under the jurisdiction of the Committee on Foreign Affairs—stocks which are surplus as determined by the Secretary of Agriculture. It places additional duties on the Secretary of Agriculture which it is not within the authority of this committee to establish.

The amendment raises the question also of just how this proposed relationship with the U.N. would work out. For instance, it says:

> The President through the U.S. mission to the U.N. shall be kept fully informed.

That would seem to be almost an order to the Secretary-General and the staff of the U.N. to make information available to our President. I doubt whether this Congress is in a position to pass legislation giving instructions of that sort to the U.N.

So, while everybody approves wholly of the objectives, I reluctantly feel I must make a point of order against the amendment.

The CHAIRMAN. Does the gentleman from Iowa desire to be heard on the point of order?

Mr. WOLF. I do, Mr. Chairman.

The CHAIRMAN. The Chair will hear the gentleman briefly.

Mr. WOLF. Mr. Chairman, I thank the gentleman from Minnesota for raising the point of order because I think it is important that this point of order should be raised.

The CHAIRMAN. The Chair recognized the gentleman to address himself to the point of order. The Chair will hear the gentleman on the question of germaneness.

Mr. CARNAHAN. Mr. Chairman, I would like to ask the gentleman from Minnesota if he would reserve his point of order. We would like to hear what the gentleman from Iowa has to say.

Mr. JUDD. That is all right; I will reserve the point of order.

The CHAIRMAN. The Chair has not ruled. Does the gentleman reserve his point of order?

Mr. JUDD. I reserve the point of order.

Mr. WOLF. Mr. Chairman, I ask unanimous consent to proceed for an additional 5 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. WOLF. Mr. Chairman, I would like to say before I begin that I am grateful for the cooperation and consideration that has been given to me by the chairman of the Committee on Foreign Affairs, and for the consideration and support that has been given me in working out the details of this amendment.

I do not wish to yield until I have completed my statement. I feel my position very strongly. But I would be happy to yield for any questions when finished.

Mr. Chairman, this is a food-for-peace amendment, which is in keeping with the purpose and objective of the Mutual Security Act to assist in stabilizing economies, to promote the use of the greatest asset of the United States, and to help eliminate famines and hunger in ways that will promote economic development.

This is permissive legislation; this is not mandatory legislation. We are making it possible for the United Nations to act.

I want to state that the President of the United States in his state of the Union message recommended and asked for a food-for-peace program. In fact, after much pressure, he has appointed Mr. Don Paarlberg as Food-for-Peace Coordinator.

There is no question that in many of the underdeveloped countries the rate of progress which our technical aid would make possible would be accelerated if the underfed peoples could be assured of adequate diets.

Lack of food and clothing undermines the health, welfare, and morale of people. When adequate supplies of food do not exist, it is impossible for people to divert their productive efforts for any purpose other than the obtaining of sufficient food and fiber. Hence, these community and education improvements cannot take place.

Now, what does this amendment do?

Section 422, Food and Fiber for Economic Development Through the United Nations, says that the President is authorized during a 10-year period upon request by the Secretary General of the United Nations to furnish without charge to the United Nations or to any agency thereof. We are not saying the President must do anything. We are saying if the U.N. requests food and fiber we will make it available.

It is also provided that such commodities shall be used in underdeveloped areas to further industrialization and basic capital improvements including canals, bridges, and schools, dams, and the like, education and educational programs including, but not limited to school lunch and school clothing programs, and the national food and fiber reserves.

I would like to accentuate this matter of the schools.

This is one of the areas we are principally interested in so far as underdeveloped countries are concerned. We must develop their school systems, and I want to congratulate the gentleman from Minnesota [Mr. JUDD] for his statement of yesterday in reference to schools and helping the education programs of these people. This will assist these children and adults attending school to get both food and clothing.

Such commodities shall be used solely for domestic consumption in the country to which exported, and shall not be reexported, nor shall such commodities be used to replace commercial exports from the United States; also such commodities shall not replace in the countries of use the usual domestic production or imports of the same or similar commodities.

To those who have stated that this will interfere with the balance of trade, let me say that it will not. We are asking the United Nations to help plan this program. We have a surplus and we want them to work with us in getting it to the needy without competition and without harm to world markets.

It also is stated here that the President through the United States mission to the United Nations shall be kept fully informed with respect to the activities made possible by, and uses made of, commodities furnished by the United States under such agreements, and with respect to whether or not the objectives of the United Nations are being carried out through the programs undertaken pursuant to this section.

If we are not satisfied we can withdraw the program. This is permissive legislation, it is not mandatory.

I was pleased with the comments of the gentleman from Minnesota when he said he was in favor of multilateral organizations and in favor of working with multilateral organizations just now. He made a fine speech on behalf of my proposition and I thank the gentleman.

On March 25, 1960, I received a letter from Martin Hill, Deputy Under Secretary for Economic and Social Affairs of the United Nations, after I made several trips up there at my own expense to talk to their leaders and the heads of various departments of the United Nations. I quote the following from this letter:

> We were glad to see that you have taken into account the constitutional and procedural considerations affecting the United Nations which we brought to your attention during your visit here last month. The revised text of the proposal should not, in our opinion, raise any difficulties on such grounds.

Why the U.N. rather than on a strict bilateral basis?

Today many of the underdeveloped nations of the world look to the United Nations as their protector, as their hope for peace and security. They look to the United Nations because they owe a large degree of their sovereignty and independence to the United Nations.

By proposing an expanded economic industrial development program for the United Nations which will have as one of its basic features part of our agricultural resources we will have done much to prove our hope that people all over the world may live in dignity and enjoy freedom from want. Furthermore, we will be showing the world that we hold the United Nations as a great instrument for peace and security in this world.

During the debate last year my colleague the gentleman from Utah [Mr. KING] made an excellent statement which I would like to read in part:

> Mr. KING of Utah. Mr. Chairman, I rise in support of the amendment. This is one of the very rare occasions in which the liberal and the conservative may join hands firmly and sincerely in the support of legislation which represents the best interests of each.
>
> The surplus-reduction program proposed in this amendment promises to alleviate one

of the most perplexing and distressing problems in the American economy, the problem of our vast and growing agricultural surpluses.

It also promises to alleviate the most pressing social problem on the globe. This problem is starvation.

The latter makes the liberal's duty on this legislation very clear. The liberal measures legislative values invariably, though not exclusively, by social and human need. His senses of justice and morality are shocked by the very existence of food and fiber surpluses in a world which leaves a majority of its population inadequately clothed and poorly fed. And his same senses are shocked in the extreme by the knowledge that these surpluses rot in storage bins while many nations find economic and social progress impossible simply because their energies are wholly consumed in the quest for the food and fiber they must have to survive.

My friend the gentleman from Utah [Mr. KING] goes on to say:

But I am equally certain the conservative, whose creed stresses fiscal solvency and whose political instincts seek the economic justification in every legislative measure, also sees the merit of the bill.

Our surpluses are now so vast that their storage is a heavy economic burden.

I would like to anticipate some of the questions that I expect will be asked.

What is the difference between this program and Public Law 480?

Public Law 480 is a good program as far as it goes, but it was only a beginning. I, frankly, feel that we must do more. Public Law 480 from its very inception was a dumping program. We could use high class language, but in the final analysis, it is a dumping program. This program does not give food and fiber for charity alone. This program creates a sense of responsibility. The recipient country must demonstrate its desire to improve its own economic well-being in order to get the commodities. Further, this program is not extended to any country unless that country exhibits a desire to create some economic development project.

Why the U.N.? Why not a strictly bilateral program?

I can answer this question in two parts: First, one of the main arguments used by those who have consistently opposed a food for peace program is that it would interfere with normal channels of trade. By working through the U.N. we take these competing nations and they sit down together and plan the procedure by which these commodities will be made available. This will obviously eliminate the friction and competition which would otherwise exist on a straight bilateral approach. This has been consistently demonstrated to be one of the real pitfalls in Public Law 480.

Secondly, I would like to point out, and perhaps the most important point brought out when I discussed this program with the gentlemen in the economic section of the U.N., they believe that by our leading, we can encourage other nations with surplus resources to begin to put food and other surplus resources together collectively through the U.N. to further increase the program. This is just another method by which we can shift the burden, at least in part, to other countries with surpluses. I am thinking of countries like Australia—with wheat and meat surpluses—Argentina, France, and other northern European countries, and Canada, just to name a few.

Will not this create competition for our own industries?

The aid to be provided under this bill is to foster educational projects and community development projects. We believe this will increase the standard of living in the recipient country thus creating a demand locally for any increased output. And again we still have the power to stop the program if this should become a problem.

Why should we pay transportation costs for these commodities? If the nations want them, why should they not pay transportation?

It is costing us much more to hold these commodities here in storage bins, and they are doing no one any good. It is simply a question of cost analysis. Over a 10-year period we can save $1,540 million in storage costs alone. Our transportation cost to the farthest point in the world would be only $400 million. Second, we are making these commodities available to countries who want to help themselves. We have the vessels available. The recipient countries do not have vessels available. Neither do they have the money to pay for vessels or transportation. Neither does the U.N. have the money to pay the transportation. The only way these commodities will ever leave our shores is in this manner.

If the U.N. handles this program, will not Russia get her hands into the program?

If the program should get out of hand, the President has the power to stop the program.

What about charity at home? Why do not we use these commodities for the needy at home?

I have been doing everything I can to get more of our surplus commodities used here. I have introduced a bill to accomplish this purpose and will pursue it with all my ability.

What is the administration doing about food for peace now?

I understand that just a few days ago the President appointed Don Paarlberg as Food for Peace Administrator. I am very anxious that this man who will make approximately $20,000 a year will have something to administer. My program would give him something to do.

Why were not hearings held on this amendment?

I would like to state that public hearings have been held on the floor of Congress at the time I introduced this amendment with 27 cosponsors. We had a general debate on this proposal.

At the U.N. it was discussed with the leadership there for literally days.

The proposal was discussed at the World Food and Agriculture Organization where I went specifically to discuss ways to implement this program.

Last year the amendment was offered during the debate on the mutual security program, just as it is being offered today, and at that time there was strong support and a clear understanding of what this amendment would do. Hardly a day passes without some prominent Government leader mentioning the desirability of such a program. The President himself every few days has something to say about the value of food for peace both at home and in his many travels abroad. I think adequate hearings have been held before the American people and before the Congress on the need of a food for peace program.

Mr. Chairman, the hungry of the world cry out to us in their need. They are aware, our enemies have seen to that, that we have these bulging warehouses full of food and our apparent reluctance to share fully our abundance. We must expand greatly and soon our program of food distribution. Christian charity and humanitarianism demand this of us. Let us demonstrate to the needy of the world our desire to raise them up by adopting this amendment.

Mr. BREEDING. Mr. Chairman, will the gentleman yield?

Mr. WOLF. I yield to the gentleman from Kansas.

Mr. BREEDING. Mr. Chairman, I want to compliment the gentleman from Iowa for the very fine statement that he has made.

Mr. WOLF. I thank the gentleman for his kind words but also for his many tireless hours of work in support of the whole food-for-peace program. I am proud to be associated with him in this venture.

Mr. JOHNSON of Colorado. Mr. Chairman, will the gentleman yield?

Mr. WOLF. I am glad to yield to the gentleman.

Mr. JOHNSON of Colorado. Mr. Chairman, I want to compliment the gentleman from Iowa on the amendment. I support the amendment. There is no form of capital that we can more easily make available. There is no form of capital that would be more welcome abroad. There is no form of foreign aid that we can give that we can be more sure will actually help the peoples of the world. There is no form in which aid can be given that would be better than the 10-year program against the year-to-year program under which we have been operating. I think this is an excellent amendment; I hope it will be approved by the committee.

Mr. WOLF. I thank my friend from Colorado for his very helpful statement.

Mr. BREEDING. Mr. Chairman, I have in the past joined several of my colleagues in introducing food-for-peace legislation. As the gentleman from Iowa [Mr. WOLF] has told you, this legislation would authorize the United States to make surplus agricultural commodities available to the United Nations for distribution to nations throughout the world.

To me, this legislation makes good sense. I want to put our surplus agricultural commodities to work. And I can think of no better way to do this than by putting them to work in behalf of a lasting world peace.

It is difficult for us in the United States, where overproduction by farmers is a constant problem, to realize that in many areas of the world people are constantly faced with a shortage of food. Many nations are hard pressed to meet the day to day food requirements of their people. They do not have large reserve stocks to pick up the slack in the event of droughts, floods or other natural disasters which curtail production.

There should be an internationally created food reserve upon which nations which suffer temporary shortages could call for help.

I am sure, Mr. Chairman, that other nations of the world would join the United States in making food and fiber available to this food reserve.

Communism thrives on the difficulties of other people. Communists are quick to exploit temporary food shortages and other natural disasters. Russia could be expected to oppose, in the United Nations, the creation of any international food reserve, for they know if food is available for nations to use, if and when disaster strikes, that one area for exploitation will be closed to them.

Passage of legislation such as we have proposed today will demonstrate once more to the world the dedication of the United States to the ideal of peace. Once more, we will say to the world, "When you are in trouble, share in our abundance."

Millions of people throughout the world look to the United States for leadership today. Whether we like it or not, we cannot escape our role as leaders in the free world. Enlightened self-interest demands that we do all we can to help other nations become economically strong. People who are convinced that their economic self-interest will best be served under a democratic form of government will have little, if any, sympathy for Communist propaganda.

Mr. Chairman, I hope that the House will give careful and sympathetic consideration to this legislation. By agreeing to make surplus commodities valued at $250 million available annually to the United Nations over a 10-year period, we will not only be taking a step that will greatly strengthen our foreign policy, but will also be acting to solve the surplus commodity problem for this country.

There can be no doubt that until the present large surpluses are worked off, we cannot really get down to the task of writing a farm program that will be fair to the farmers and will operate at a minimum cost to the taxpayers.

But bear in mind that this is not primarily surplus disposal legislation. First of all, it would be a deliberate attempt on our part to use our surpluses to the greatest advantage, to bring help and relief to people anywhere who are in trouble. It would reinforce our present efforts to help peoples and nations help themselves.

This is sound legislation, Mr. Chairman, and I am proud to be among those sponsoring it on the floor today.

The CHAIRMAN. The time of the gentleman from Iowa [Mr. WOLF] has expired.

Does the gentleman from Minnesota [Mr. JUDD] insist on his point of order?

Mr. JUDD. Yes, Mr. Chairman; I believe that this amendment is beyond the scope of this bill and I insist on the point of order.

The CHAIRMAN. The Chair will be glad to hear the gentleman from Iowa [Mr. WOLF] on the point of order.

Mr. WOLF. Mr. Chairman, I refer to volume 105, part 9, page 11298 of the CONGRESSIONAL RECORD, where the Chairman, Mr. MILLS, is quoted.

> The gentleman from Iowa [Mr. WOLF] offers an amendment to which the gentleman from New York [Mr. TABER] makes the point of order that is is not germane to the bill before the Committee.
>
> The Chair has had an opportunity to examine the amendment, also the Mutual Security Act of 1954, as amended, particularly title IV thereof, which has to do with special assistance and other programs, and calls attention to the fact that in title IV there is specific mention of surplus agricultural commodities pursuant to the Agricultural Trade, Development, and Assistance Act of 1954.
>
> The Chair feels that this amendment is germane to the bill now before the Committee, and, therefore, overrules the point of order made by the gentleman from New York.

The CHAIRMAN. Does the gentleman from Minnesota wish to say anything further on the point of order?

Mr. JUDD. Yes, Mr. Chairman, just one further word. I realize that this point of order was overruled last year, but it is my understanding that the amendment this year is not in the same form as it was last year.

Mr. WOLF. Mr. Chairman, may I be heard further on that point?

The CHAIRMAN. The Chair will hear the gentleman.

Mr. WOLF. Mr. Chairman, I would like to state that this is a tightened-up version of what we understood we offered last year. If the Chair would like to refer back to the original wording, he will find that it is very similar. We have shortened it up, we have taken out some of the long verbiage, but I am sure that the meaning and the intent are identical.

Mr. JUDD. Mr. Chairman, did not the amendment last year say something about "in order to further implement the foreign policy of the United States as outlined in the Mutual Security Act," or something of that sort?

I have the wording of the amendment now and it began:

> In keeping with the purpose and objective of the Mutual Security Act, to assist in stabilizing economies, to promote the use of the greatest asset of the United States, and to help eliminate famines and hunger in ways that will promote economic development—

And so forth. I thought that the difference made it subject to a point of order this year as contrasted with the decision made last year.

Mr. FULTON. Mr. Chairman, may I be heard on the point of order?

The CHAIRMAN. The Chair will hear the gentleman.

Mr. FULTON. Mr. Chairman, I believe it is germane because legally, if it is the same subject matter and the same framework of language, that carries the same obligation or the same authority, then the mere statement of intent by the individual submitting the amendment has no effect. So it is germane.

The CHAIRMAN (Mr. MILLS). The Chair is ready to rule.

The gentleman from Iowa [Mr. WOLF] offers an amendment to which the gentleman from Minnesota [Mr. JUDD] raises a point of order.

The Chair has had an opportunity to examine the context and purpose of the amendment offered by the gentleman from Iowa.

As the gentleman from Pennsylvania [Mr. FULTON] points out, it is the opinion of the Chair that the overall objective and purpose of the amendment is the overall objective and purpose of the amendment offered by the gentleman to the bill pending before the Committee last year. The gentleman from Iowa has referred to the language of the Chair at that time in concluding that the amendment then was germane to the legislation pending. The Chair feels that this language is germane to the bill that is pending before the Committee at this time and therefore overrules the point of order made by the gentleman from Minnesota.

Mr. MORGAN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I realize that the gentleman from Iowa has a great humane interest in this amendment and I commend him for it. But this amendment proposes to find further uses for farm surpluses. It deals with the same general area as does Public Law 480, but uses the UN to dispose of the surpluses. I think there are 11 bills now pending before the great Committee on Agriculture on this very issue.

I think the Committee on Agriculture has jurisdiction over this type of bill. I believe it should have consideration by that committee. This amendment completely bypasses the Committee on Agriculture.

Another thing, this is going to dump a lot of our surpluses all over the world. Many nations survive by food production and will have to meet this competition of free food. We have to use great care or we will do more harm than good. I have a great deal of interest in feeding hungry people, but I do not think this amendment will do the job. The United Nations has no machinery to start utilizing this great amount of surplus food that will be involved. I note that the gentleman puts restrictions in his amendment to make it depend on a request from the Secretary of the United Nations to the President of the United States before it becomes operative. I am afraid it will encourage the setting up of a lot of jobs for United Nations bureaucrats. I do not think this amendment will do the job as the gentleman wishes.

Mr. WOLF. Mr. Chairman, will the gentleman yield?

Mr. MORGAN. I yield to the gentleman from Iowa.

Mr. WOLF. With all due respect to my distinguished chairman, I should like to point out that I received a letter from the Deputy Under Secretary stating that they have no restrictions on

this amendment and there are no problems dealing with this amendment. I am sure, with all due respect to my distinguished chairman, that they know their business well enough to inform me if this is not correct.

Mr. MORGAN. I read the letter, which the gentleman furnished to me, that he had received from the United Nations, but I think that letter is from a minor official who did not speak officially in a manner that would be binding on the United Nations.

Mr. WOLF. With all due respect to the good doctor, at meetings that I attended at the United Nations the very top leaders were there, with the exception of Dag Hammarskjold himself, on several occasions. While this man wrote in his own behalf, he wrote as the Deputy Under Secretary for Economic Affairs. I think in his capacity he was entiled to know his position.

Mr. MORGAN. Yes; I realize it is the Deputy Under Secretary for Economic and Social Affairs, but I think such a modest expression of approval does not constitute complete United Nations approval of this type of program. I favor this type of program if it is handled right, but I do not think the mutual security bill is the place for it.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. MORGAN. I yield to the gentleman from Iowa.

Mr. GROSS. I quarrel with it from the administrative standpoint. The United Nations has made such a howling failure in every crisis it has faced that I would not want to trust it to administer a program of this kind.

Mr. MEYER. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I rise in support of this amendment because I think "food for peace" can be added successfully to the mutual security program, the foreign aid program, if anything can. When food is here in storage and costing us money it is not doing the United States any good.

I also would like to say in connection with the deliberations of the Committee on Foreign Affairs that last year I offerred a similar amendment. At the time the discussion went briefly to the effect that we had not had time to consider this measure thoroughly. Therefore, I withdrew the amendment. I would have thought that in the intervening year there could have been time to consider it more thoroughly. Last year there were no objections raised to the amendment other than on the technical grounds that the committee had not had time to consider and think about it. I should think that in the passage of a year we could have had that time. This most constructive proposal should be considered seriously now. We can do a lot of good with it. I cannot see any harm that would come from utilizing its good features. Therefore, I wish to support this amendment strongly.

Mr. DINGELL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DINGELL to the amendment offered by Mr. WOLF: After the period at the end add a new sentence as follows: "*Provided further*, That no food or fiber products shall be donated or shipped abroad under provisions of this section which are not available through domestic programs to assist needy persons within the United States, and unless the Secretary of Agriculture shall have so certified prior to such shipment or donation."

Mr. DINGELL. Mr. Chairman, as my colleagues in this body are well aware, for a number of years I have been very critical about the distribution of foodstuff surplus to our needs in this country under Public Law 480. The Secretary of Agriculture has shipped abroad, edible oils like butter, margarine and cottonseed oil. He has shipped fruits and vegetables and canned meats, hams, and hamburgers. He has shipped abroad fresh and frozen and dried vegetables—fruits, canned and frozen, juices of various kinds and any number of other substances which have been denied to our people at home. Each time I have made this complaint, very little has come of it except that there has come up to this Hill a denial from the Department of Agriculture.

Mr. Chairman, the function of this amendment is very simple. It is to assure that if there is another foreign give-away program established that at least we will remember the simple axiom that charity begins at home, and see to it that the fruits of the labor of our taxpayers and the surplus commodities of our farms are given away to our own people at home first, and then are given away as they should rightly and properly be given away abroad to our suffering fellow humans.

I point out again that on many occasions I have visited with high officers of the Department of Agriculture and I have engaged in lengthy correspondence with them, and urged them to make available the fruits and fiber and vegetables and produce of our soil and farms to our people at home first, and then to give them away under these foreign giveaway programs next.

Mr. Chairman, I come from a district which has a substantial number of needy people. There are other districts which have the same pocketbook problems that face the people of my district, full of people who have need of these things, and who exist on a less than adequate diet. The function of this amendment to the amendment is very simple. It is to guarantee that if this food is to be given away abroad that first claim shall rest with the people of the United States.

Mr. SMITH of Iowa. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I just want to speak for a few minutes to point out a couple of facts with respect to the distribution of food throughout the world. I have in my hand copy of a hearing held on January 28, 1960, in which the Secretary of Agriculture or his deputy agreed with the Secretary of State on the rate of distribution of these products and their sales to foreign countries. They said they did not think wheat could be sold in any greater quantity than it is at the present time even though ample authority and laws to promote such sales does exist. They agreed on this rate of distribution and sales. I point this out for this reason. It takes more than law—it takes a change of administration, if we are going to push this kind of program. I am for this increasing world consumption of food. But, I think the only way we can have a change of administration of world food distribution this year is by a program operated through the United Nations. I know we are not going to get it through this administration in Washington because the Secretary of Agriculture and the Secretary of State are in agreement that the rate we are pushing wheat now is the greatest that we should push it despite the fact that Russia is constantly gaining in their percentage of the world wheat market.

Mr. JUDD. Mr. Chairman, I rise in opposition to the amendment.

Nobody likes to oppose something that is designed to help feed needy people. But that is not as simple or easy to do as it may sound. Near the end of World War II we adopted what was called UNRRA. That was for relief and rehabilitation and also under the U.N. We appropriated $3¾ billion to provide food, clothing, and all sorts of aid for hungry and needy people around the world. At that time many of us raised this same question as to just how it was to be administered. If it was to be administered by the International Red Cross, as after World War I, in such a way that the aid would certainly get to the people who needed it, it was one thing; if it was to be given to and through existing governments, including Communist puppet regimes being established in Europe and Asia, then it could become a weapon to defeat the objectives we had in mind. The latter course was adopted, and UNRRA became such a scandal that there was a terrible revulsion against it.

Food can be the most powerful political weapon in the world. Many a man who will stand up and face a machine-gun himself, will waver if he finds that the only way he can get food for his children is by signing on the Communist dotted line. Our food helped entrench the Communist tyrannies in Eastern Europe. This proposal today could be loaded with the same dynamite—no one can be sure.

I commend the purposes of the gentleman from Iowa, but in proposing to turn so vast a program over to an organization, the United Nations, which has no administrative machinery for handling such a complicated operation, we could be turning over our food to help tyrants in the world hold down the people under them by giving food only to those who are willing to bow down before them. It could help defeat their own efforts to weaken and pull down from within their present oppressors.

This proposal must be given much more careful study and consideration before we adopt it. From the very standpoint of seeking to accomplish the praiseworthy thing that the gentleman from Iowa and all of us have in mind, we should vote this amendment down and let the matter come up before the

Committee on Agriculture, where it can be studied fully and in consultations with the responsible top officials of the United Nations. Then we can vote for something based not only on good will, hope, and prayer, but on plans and arrangements that are solid and give greater chance of succeeding.

The CHAIRMAN. The time of the gentleman from Minnesota [Mr. JUDD] has expired.

The question is on the amendment offered by the gentleman from Michigan [Mr. DINGELL] to the amendment offered by the gentleman from Iowa [Mr. WOLF].

The amendment to the amendment was rejected.

The CHAIRMAN. The question recurs on the amendment offered by the gentleman from Iowa [Mr. WOLF].

The question was taken, and on a division (demanded by Mr. WOLF) there were—ayes 46, noes 93.

Mr. WOLF. Mr. Chairman, I ask for tellers.

Tellers were refused.

So the amendment was rejected.

The Clerk read as follows:

CHAPTER III—CONTINGENCY FUND

SEC. 301. Section 451(b) of the Mutual Security Act of 1954, as amended, which relates to the President's special authority and contingency fund, is amended by striking out "1960" and "$155,000,000" in the first sentence and substituting "1961" and "$100,000,000", respectively.

CHAPTER IV—GENERAL AND ADMINISTRATIVE PROVISIONS

SEC. 401. Chapter IV of the Mutual Security Act of 1954, as amended, which relates to general and administrative provisions, is amended as follows:

(a) Section 504(d), which relates to small machine tools and other industrial equipment, is repealed.

(b) In section 505(a), which relates to loan assistance and sales, insert after the first sentence the following new sentence: "Commodities, equipment, and materials transferred to the United States as repayment may be used for assistance authorized by this Act, other than title II of chapter II, in accordance with the provisions of this Act applicable to the furnishing of such assistance.".

(c) In section 513, which relates to notice to legislative committees, insert before ", and copies" in the last sentence the following: "and under the last clause of the second sentence of section 404".

(d) Amend section 517, which relates to completion of plans and cost estimates, as follows:

(1) Insert "(a)" immediately after "SEC. 517. COMPLETION OF PLANS AND COST ESTIMATES.—".

(2) Add the following at the end of such section:

"(b) All nonmilitary flood control, reclamation and other water and related land resource programs or projects proposed for construction under title I, II, or III (except section 306) of chapter II, under section 400, or under section 451 of this Act, shall be examined by qualified engineers, financed under this Act, in accordance with the general procedures prescribed in circular A–47 of the Bureau of the Budget, dated December 31, 1952, for flood control, reclamation and other water and related land resource programs and projects proposed for construction within the continental limits of the United States of America. In all cases the benefits and costs shall be determined, and a copy of the determination shall be submitted to the Speaker of the House of Representatives and the Foreign Relations Committee and the Appropriations Committee of the Senate. No such program or project shall be undertaken on which the benefits do not exceed the costs and which does not otherwise meet the standards and criteria used in determining the feasibility of flood control, reclamation, and other water and related land resource programs and projects proposed for construction within the continental limits of the United States of America as per circular A–47 of the Bureau of the Budget, dated December 31, 1952."

(e) Amend section 527, which relates to employment of personnel, as follows:

(1) In subsection (b), which relates to employment of personnel in the United States, strike out "seventy" and "forty-five" in the first sentence and substitute "seventy-four" and "forty-nine", respectively.

(2) In subsection (c), which relates to employment of personnel outside the United States, strike out "Director" in the introductory clause and substitute "President"; and insert before the period at the end of paragraph (2) the following new proviso: ": *Provided further*, That Foreign Service Reserve Officers appointed or assigned pursuant to this paragraph shall receive inclass promotions in accordance with such regulations as the President may prescribe".

(3) In subsection (d), which relates to appointment of alien employees outside the United States, strike out ", at the request of the Director,".

(f) Section 531, which relates to security clearance, is amended to read as follows:

"SEC. 531. SECURITY CLEARANCE.—The standards and procedures set forth in Executive Order Numbered 10450, as amended or supplemented, shall apply to the employment under this Act by any agency administering nonmilitary assistance of any citizen or resident of the United States."

(g) In subsection (c) of section 533A, relating to the Inspector General and Comptroller, strike out paragraph (9) and renumber paragraphs (10) and (11) as paragraphs (9) and (10), respectively.

(h) In section 534(a), which relates to reports, strike out "six months" in the first sentence and substitute "fiscal year".

(i) In section 537(a), which relates to provisions on uses of funds, amend paragraph (3) to read as follows: "(3) contracting with individuals for personal services abroad: *Provided*, That such individuals shall not be regarded as employees of the United States for the purpose of any law administered by the Civil Service Commission;".

(j) In section 537(c), which relates to construction or acquisition of facilities abroad, strike out "$2,750,000" and substitute "$4,250,000".

(k) Add the following new section immediately after section 551:

"SEC. 552. ASSISTANCE TO CUBA.—No assistance shall be furnished under this Act to Cuba after the date of enactment of the Mutual Security Act of 1960 unless the President determines that such assistance is in the national and hemispheric interest of the United States."

PROGRAM FOR BALANCE OF WEEK AND FOR WEEK OF APRIL 25

Mr. HALLECK. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I take this time to ask the majority leader if at this time he can advise us of the program for the balance of this week and for next week.

Mr. McCORMACK. If this bill is disposed of today, there is no further business for the remainder of the week.

As to the program for next week:

Monday there will be a joint meeting of the two Houses of Congress to receive the distinguished and outstanding President of France, General De Gaulle.

While next Monday is District Day there is no business on the District Calendar.

Tuesday: At the present time Tuesday is undetermined. Of course, there are two primaries on Tuesday, Pennsylvania and Massachusetts. I see nothing for either Monday or Tuesday now.

Wednesday and Thursday: H.R. 10231, the Emergency Home Ownership Housing Act.

Thursday there will be another joint meeting to receive a distinguished visitor to our country, the King of Nepal.

Friday and Saturday are undetermined.

I make the usual reservation that any further program will be announced later, and that conference reports may be called up at any time.

Mr. DAVIS of Georgia. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DAVIS of Georgia: Page 11, line 15, strike the words "forty-five" and in line 16, strike out the words "and forty-nine, respectively."

Mr. DAVIS of Georgia. Mr. Chairman, I offer this amendment because of a conflict in jurisdiction of this committee and the House Post Office and Civil Service Committee, of which I am a member. The subparagraph on page 11, beginning with line 11 and ending with line 16, provides for adding eight positions. Four of these positions are above the classified positions of our Civil Service Act. Four of them are supergrades which come within the Classification Act. My amendment would eliminate these four supergrade positions which properly belong under the jurisdiction of the Post Office and Civil Service Committee.

Prior to 1949 the grades in the classified civil service ran from 1 to 15. In 1949 the House Post Office and Civil Service Committee reported a bill creating 400 supergrade positions; that is, positions in grades 16, 17, and 18.

These positions were created because the agencies called on Congress to provide some supergrade positions in which to place employees of the intelligence necessary to properly supervise the activities of the agencies.

Pursuant to that need, which the House Post Office and Civil Service Committee recognized and Congress recognized, there were created that year 400 of these supergrade positions, grades 16, 17, and 18.

In the time since the program was first begun, these supergrade positions have just mushroomed. The agencies have besieged our committee constantly to give them more supergrade positions. We did give supergrade positions to them, as they are justified, and the fact we have increased the number from 400 in 1949 to 2,075 this year indicates that we have recognized the need for them and that we grant them when they are justified.

I want to say that we cannot control this matter of holding down the number of these positions unless the other committees of the House leave it in our hands and let us hold hearings and let these agencies come before us and justify these positions. If they do that, we

give these positions to them. The fact that the number has been increased to 2,075 from 400 demonstrates that we have done just that.

In addition to that, the Congress has also created 275 positions under Public Law 313 of a scientific nature which also are above the old level of grade 15. These scientific and professional positions have a salary limit of $19,000 a year. The number is 275. Our committee also has jurisdiction over the creation of those positions.

I am offering this amendment because we cannot hold this thing down if other committees are going to reach out and grant these supergrade positions every time some agency asks for them. I realize, as you do, that the floor of the House is not the place to write legislation; but I am not a member of the Committee on Foreign Affairs and I knew nothing of this until the bill and committee report came out. So at the first opportunity I am calling it to the attention of the House and I am urging as strongly as I can that these supergrade positions ought to be deleted from this bill. Let the agency come before the Manpower Utilization Subcommittee of the Committee on Post Office and Civil Service and justify them.

Mr. MURRAY. Mr. Chairman, will the gentleman yield?

Mr. DAVIS of Georgia. I yield to the gentleman from Tennessee.

Mr. MURRAY. I wish to heartily endorse the statement of the gentleman from Georgia, who is a member of the Committee on Post Office and Civil Service of which I have the honor of being chairman. This matter of supergrades should rest entirely with the Post Office and Civil Service Committee. Our committee has never been consulted about this; is that correct?

Mr. DAVIS of Georgia. That is correct. I knew nothing about it until I read the bill and the amendment.

Mr. WALLHAUSER. Mr. Chairman, I support the amendment offered by the distinguished gentleman from Georgia [Mr. DAVIS]. The Post Office and Civil Service Committee will be unable to properly evaluate the need for the establishment of various positions unless every agency is required to present its case to that committee. Other committees should, in my opinion, recognize the great care that is shown by the Post Office and Civil Service Committee to hear every request made by the various agencies. One committee should have the jurisdiction in this important matter. I hope that the amendment will be agreed to.

Mr. ZABLOCKI. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I wish to point out that this section provides for four, not eight, additional supergrades and that the ICA and the Coordinator cannot draw from the Federal pool of supergrades. They are limited to the authority of the Mutual Security Act. Congress has been urging more effective control and coordination and better administration of the mutual security program. If we desire to be consistent, if we desire to see a more effective mutual security program, if we desire to have administration and coordination of the program, it is necessary that we authorize at least four additional supergrades. This section provides four additional supergrades. The Department has identified 16 positions that require supergrade employees. Two in the Inspector General and Comptroller's office; two in the Office of the Coordinator; five in the office of DLF; two in the Department of Defense, and six in ICA. They suggested that they could use 16 and agreed upon 8. The committee allowed four. I think that in the light of these facts, it is in the interest of proper operation of the program that the amendment suggested by the distinguished gentleman from Georgia does not prevail.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Iowa.

Mr. GROSS. Why does not this outfit come to the proper legislative committee of the House for these supergrades?

Mr. ZABLOCKI. Because, as I pointed out, they cannot draw from the Federal pool. The Post Office and Civil Service Committee, of which the gentleman from Georgia is a very valuable and distinguished member, does not deal with the personnel for ICA or for the Coordinator or for the Development Loan Fund. The ICA and Coordinator may use Foreign Service officers. But few are available. Most of them do not have the experience in aid programs or do not have the technical requirements needed. Therefore it is necessary that four additional supergrades are authorized.

Mr. DAVIS of Georgia. Mr. Chairman, will the gentleman yield?

Mr. ZABLOCKI. I yield to the distinguished gentleman from Georgia.

Mr. DAVIS of Georgia. I would like to say to the gentleman that the Committee on Post Office and Civil Service has jurisdiction over supergrades for all agencies, and if we establish a precedent of letting agencies come in in a bill like this and ask for supergrade positions and get them, our control over supergrade positions is gone and we cannot hope to hold that prerogative.

Mr. ZABLOCKI. Does the gentleman from Georgia maintain that his committee acted upon the 74 supergrade positions that have been authorized for the mutual security program in the past?

Mr. DAVIS of Georgia. No. I contend that we should act upon them and to bypass the committee in this way will destroy the control which that committee has over supergrade personnel.

Mr. ZABLOCKI. But we are not bypassing your committee.

Mr. DAVIS of Georgia. Oh, yes.

Mr. ZABLOCKI. I respectfully suggest to the gentleman that we are not.

Mr. DAVIS of Georgia. You referred in your debate here and you also referred in the committee report to supergrade positions, and the act which creates supergrade positions is an act which places that jurisdiction in the Committee on Post Office and Civil Service, and that is the committee which has jurisdiction over supergrade positions.

Mr. ZABLOCKI. That is not my understanding.

Mr. JUDD. Mr. Chairman, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Minnesota.

Mr. JUDD. It should be pointed out that if all four of these new positions were filled by outside persons being brought in, the total maximum cost would be $76,000. But very probably some or all of the positions would be filled by promotions within the Department, and therefore it could cost as little as $6,000.

Actually, when we are operating all over the world, a program costing several billion dollars, annually, and with the main criticism of it being its alleged inefficiency, bad supervision, waste, and so forth, it seems that this is almost the poorest place to try to economize. The more we want to eliminate whatever is not up to par, the more we ought to go along in an effort to get the best qualified employees to manage it.

Mr. GROSS. Mr. Chairman, I rise in support of the amendment of the gentleman from Georgia. This is not primarily a question of what it costs or does not cost. This is a question of whether all committees are going to write into bills that come to the floor of the House—appropriation bills and other bills—any numbers of supergrades. As the gentleman from Georgia has so well stated, if that can be done in this bill, there is no reason why it should not be done in every other bill that comes before the House.

Mr. TABER. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I am happy to yield.

Mr. TABER. I do not know whether the gentleman has noticed it or not, but there have been many bills coming into this Congress carrying an increase in the number of supergrades. A great many of them have gotten by without the question being raised. If you are going to take away the jurisdiction of the Committee on Post Office and Civil Service, I wonder if the gentleman does not think that is very bad legislative procedure?

Mr. GROSS. Why, of course; that is why I have taken this time. The amendment ought to be adopted and this agency ought to come to the proper legislative committee and justify the necessity for these supergrade employees.

Mr. REES of Kansas. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield.

Mr. REES of Kansas. What disturbs me about the proposal is this. If you are going to do it in this case, then we may have to continue to do it. We have had this trouble all along the line with bills from other committees providing for employees; legislation that is outside their jurisdiction.

I think the amendment ought to be approved.

Mr. GROSS. The gentleman is exactly right. The gentleman I am sure will agree with me that there is no way by which this sort of thing can be controlled unless one committee is made responsible for these supergrades.

Mr. REES of Kansas. That is the view we have always taken.

Mr. MURRAY. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I am glad to yield to the Chairman of the House Post Office and Civil Service Committee.

Mr. MURRAY. Is it not true that the Committee on Post Office and Civil Service has not been consulted about these additional supergrades?

Mr. GROSS. That is right.

Mr. MURRAY. That comes under our jurisdiction and certainly we should be consulted about it.

Mr. GROSS. I agree with the gentleman completely.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia [Mr. DAVIS].

The amendment was agreed to.

Mr. CASEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CASEY: On page 13 add a new section immediately after section 552 between lines 9 and 10 as follows:

"SEC. 553. QUALIFICATION FOR ASSISTANCE.—No assistance shall be furnished under this act to any country or nation after the date of enactment of the Mutual Security Act of 1960 unless such country or nation levies and collects from its individual citizens, business associations and corporations taxes in proportion to and on a commensurate basis with the taxes levied by the U.S. Government on its individual citizens, business associations and corporations."

Mr. CASEY. Mr. Chairman, we are operating on borrowed money here today. We are talking about giving it and lending it to someone else, but we owe almost $300 billion and I want to make sure that these countries that we do assist are doing all they can, at least equal to what we are doing, for themselves.

I pondered in writing this amendment how I could fix the yardstick. That is the only criticism. But we have some very good economists who are coming out in the papers every month telling us how much the cost of living has gone up, how much it is costing me more to maintain myself, my wife, and my children. They tell me each month that it has gone up one-tenth of 1 percent, or something like that. If they can figure that out that well, I think they can easily figure out whether or not a recipient country, under this act, is bearing its fair share with reference to taxing its own citizens.

I noticed on the ticker yesterday that the Development Loan Fund had just loaned to the India Finance Co. $10 million and the India Finance Co. in turn is going to loan that money to individuals, I presume in India. I do not know what rate of interest they are going to charge, but you know what rate of interest we are paying and you know the pressure there is now to put it up higher. I just want to see that we make sure that these countries are helping themselves.

I notice in the report that we have given aid to Japan in the way of technical assistance to help them step up their production and know-how. That is coming home to roost, too. I got a letter from a constituent the other day. He sent me these two hinges. He is in the hardware business. Look at them. One of them is 25 cents a pair and the other one 17 cents a pair. They are exactly alike. One is made in Japan and the other made in the United States. I know there is a difference in labor costs. There is also, I will bet you, a difference in tax costs. We can tax our citizens and keep giving know-how and assistance to other countries, but if you do you will not have any corporations left over here to tax, because they will move overseas to manufacture these products.

I see nothing wrong with my amendment. I think it is a reasonable request, and I trust that you will see fit to adopt it.

Mr. GALLAGHER. Mr. Chairman, I move to strike out the last word.

Mr. MORGAN. Mr. Chairman, will the gentleman yield?

Mr. GALLAGHER. I yield to the gentleman from Pennsylvania.

Mr. MORGAN. I just want to say that an amendment similar to this was offered last year. An amendment of this kind would destroy the program. Vote for this amendment and you vote against the program.

Mr. GALLAGHER. That is exactly right. It is impossible for these undeveloped nations to tax their people at a rate equal to ours at this stage of their development. It would require financial sophistication of a level which is impossible because of their underdeveloped stage of development. It would also require enforcing facilities equal to the Internal Revenue agency that we ourselves have. Furthermore, as to the $600 exemption that we have in our own laws, the per capita income of the people in most of these countries who need aid is far below the $600 level.

I therefore urge that because of the impossibility of enforcing it and the possibility of this amendment's being applied to the underdeveloped nations we oppose this amendment.

Mr. CASEY. Mr. Chairman, will the gentleman yield?

Mr. GALLAGHER. I yield to the gentleman from Texas.

Mr. CASEY. I do not see anything in that amendment with reference to a $600 exemption or any dollar sign at all. It says in proportion to and commensurate with. I daresay that they would determine it in the case of each individual recipient on the basis of their cost of living, the average income, and what would be commensurate and proportionate. I do not think it would destroy the program at all. It would just make sure they would pay their own way.

Mr. GALLAGHER. We certainly would like them to pay their own way. The point is, it would take many years for them to develop to the point we have, and by that time the need for the program might have disappeared.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. CASEY].

The question was taken; and on a division (demanded by Mr. CASEY), there were—ayes 36, noes 89.

So the amendment was rejected.

Mr. ROUSH. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ROUSH: On page 12, line 15, insert "(1)" immediately after "(h)", and on page 12, immediately below line 17, insert the following:

"(2) Add at the end of section 534 the following new subsection:

"'(c) The annual presentation to the Congress of assistance proposed to be furnished under titles II, III, and IV of chapter II of this Act shall not be classified as "Secret", or bear any other similar security classification. All information concerning assistance heretofore or hereafter furnished under such titles II, III, and IV shall be freely available to the public. Nothing in this subsection shall be construed to require that military information be made public.'"

Mr. ROUSH. Mr. Chairman, on the tables behind which sit members of the committee are seven volumes of presentation books containing information relating to the mutual security program. Each of these seven volumes bears the classification "secret."

The amendment which I am presenting at this time will take the secret label off those presentation books—except wherein the information deals with the military.

Why should such an amendment be adopted? It certainly is not proposed so as to weaken the program. If we are to have such a program as mutual security then I would insist that the program be as strong as we can make it. When that program does not have the benefit of public scrutiny and public criticism then I am convinced that it will not have that strength required. When that program does not have the benefit of publicity provided by our press, TV, and radio but rather finds itself hidden behind a veil of secrecy then the right to know is being seriously thwarted. When the detailed aspects of that program cannot be discussed, debated and deliberated here on the floor of this Congress as we sit in open session, then the democratic processes by which we through legislative action determine our country's course is being seriously thwarted.

Yet, Mr. Chairman, and colleagues, those volumes and the detailed information they contain are not open to the public's scrutiny, those volumes and the information they possess are not open to members of the press, TV, and radio in order that they in turn transmit knowledge and understanding to their vast audience of readers, viewers, and listeners. And, although I can go through these volumes and you can go through them and we can inform ourselves, this information which bears the classification "secret" cannot be discussed with our constituency, I cannot discuss it with members of my staff, I cannot have the benefit of research done by outside agencies such as the Library of Congress, because I cannot outline my request. I cannot stand here in the well of this House and debate and discuss these specific areas with my colleagues. The members of the committee cannot thoroughly inform us here on the floor. The committee cannot answer certain specific questions projected by the membership because of that "secret" label.

As I have listened to the debate I find that even the stanchest advocates of

this bill are critical of many things which are happening. I wonder if much of this is not the result of the fact that the information surrounding various phases of this program is not open to public scrutiny and discussion. We are a democracy. We are proud of the fact that the power of governing lies with our electorate. How can we, however, govern, how can we legislate if we are deprived of knowledge? James Madison once said:

A people who mean to be their own governors must arm themselves with the power which knowledge gives. A popular government without popular information or the means of acquiring it is but a prologue to a farce or tragedy, or, perhaps both.

Could it be then, if this is true, that our lack of power and strength in this mutual security program lies in the fact that those who govern—the people—lack the knowledge from which power is derived.

Although I recognize the need for classification of information in certain military matters, even there it is overdone and I am convinced that the national welfare could best be served by greater disclosure of information. And, although I am aware of the arguments favoring this veil of secrecy in the mutual security program, I am convinced that they are heavily outweighed by the right of the people to know and through that right to know, cause strength to be generated within the program.

Mr. ZABLOCKI. Mr. Chairman, will the gentleman yield?

Mr. ROUSH. I yield.

Mr. ZABLOCKI. If the gentleman's amendment prevails, the secret information books will be available to Communist agents, would they not?

Mr. ROUSH. Yes, they would.

Mr. ZABLOCKI. Does the gentleman agree that the Communists would be the greatest benefactors if we declassified that information?

Mr. ROUSH. If the gentleman will permit, I read in your report where there is a desperate attempt—or at least an attempt—to declassify information in order that we might have more information. I think if the declassification takes place the American people would benefit and this program would benefit. It would be a stronger program because of it.

The CHAIRMAN. The time of the gentleman from Indiana [Mr. ROUSH] has expired.

Mr. ZABLOCKI. Mr. Chairman, I want to point out that it would be the happiest moment for the Communists if we would adopt this amendment. As the gentleman admitted, the material is available to responsible people. Any Member of Congress has access to the information in the classified presentation books. If we declassify them, by his own admission, such an action would give to the Communist agents information on the platter. Would this be in our national interest? I want to assure the distinguished gentleman from Indiana that this committee and this House is pressuring the executive to declassify information to the greatest extent possible; I repeat it would be a mistake to vote for this amendment. I hope it will be defeated.

Mr. MORGAN. Mr. Chairman, will the gentleman yield?

Mr. ZABLOCKI. I yield.

Mr. MORGAN. Is it not a fact that every year the committee goes through these books and insists that the executive branch declassify everything possible that is not vital to the security of this country?

Mr. ZABLOCKI. That is a fact.

Mr. MORGAN. Would not the opinions of our Ambassadors and generals of the effectiveness of the armed forces of other countries and of the competence of foreign officials which are contained in these books cause us embarrassment in dealing with other governments?

Mr. ZABLOCKI. It would ruin our diplomatic relations with other countries.

The CHAIRMAN. The time of the gentleman has expired.

The question is on the amendment offered by the gentleman from Indiana [Mr. ROUSH].

The amendment was rejected.

Mr. KYL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. KYL: On page 11, after line 10, add the following paragraph and renumber accordingly:

"All nonmilitary flood control, reclamation and other water and related land resource program or project proposed for construction under titles I, II, or III (except section 306) of chapter II under section 400, or under section 451 of this act, shall be specifically authorized by the Congress when the aggregate cost is estimated at $1 million or more."

The CHAIRMAN. The gentleman from Iowa is recognized for 5 minutes.

Mr. KYL. Mr. Chairman, I shall not consume 5 minutes.

Mr. Chairman, I believe the intent of the amendment is clear to the membership. I am sure my colleagues understand the Mutual Assistance Act better than I.

This amendment concerns only bilateral arrangements and nonmilitary arrangements. The Congress in its wisdom has for a long time exercised much greater control than this over projects in the United States.

It is not difficult to envision what might happen if we were to establish a new agency in the United States to consider our domestic rivers and harbors problems and take this function away from the Congress.

This amendment is simply an attempt to make the improvements which the majority of the Members seem to have deemed prudent in the last 2 days of discussion.

Mr. MORGAN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I shall take only a minute. This amendment would do a great deal of damage to the program; it is not in the interest of the program.

If the gentleman from Iowa will read the committee report he will see that there are not many $1 million projects in the program any more. The number of projects of this type which would come under the provisions of the gentleman's amendment is small. There are only 31 projects of any kind which amount to over $1 million planned this year. If we as Members of Congress take this job of passing on individual projects in foreign countries we would be there until doomsday.

I think the amendment should be defeated.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa.

The amendment was rejected.

Mr. ROUSH. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ROUSH: On page 13, after line 2, insert the following:

"(k) Amend section 537 by adding at the end thereof the following:

"'(g) During the annual presentation to the Congress of requests for authorizations and appropriations under this Act for fiscal years ending after June 30, 1961, and within ninety days after the date of enactment of the Act making appropriations to carry out this Act in the fiscal year ending June 30, 1961, there shall be submitted to the Congress a detailed budget, on a country-by-country basis, showing with respect to military assistance, defense support, technical cooperation, and special assistance, the specific programs and projects to be carried out in each foreign country, the commodities, equipment, services, and materials to be furnished to such country, and the purposes in detail, for which funds requested, and funds otherwise available, will be obligated during the fiscal year for which the requests are made. Except where the President determines that the national interest requires that funds available for programs and projects detailed in any budget submitted pursuant to this subsection be transferred in accordance with section 501 of this Act to other programs and projects, funds appropriated, and funds otherwise available, for any fiscal year shall be available only for the programs and projects proposed, and commodities, equipment, services, and materials proposed to be furnished, as stated in the budget submitted for that fiscal year.'"

The CHAIRMAN. The gentleman from Indiana is recognized.

Mr. ROUSH. Mr. Chairman, the amendment which has just been read by the Clerk is the same amendment I proposed last year during a discussion of this bill. I might say in this connection that this particular amendment has a great deal of appeal to the people of the Fifth District of Indiana. In response to a questionnaire which I distributed throughout my district, over 92 percent of those responding favored such a program as stated in this amendment.

This amendment is not designed as a crippling amendment.

Its whole purpose and design is to give greater control over the mutual security program by this Congress. It is an amendment which both advocates and opponents to the foreign aid program can in good conscience support.

Very simply stated the amendment does just this:

First. Requires the submission of a firm, detailed budget by the administrators of the program.

Second. Makes adherence to that budget mandatory.

Third. Places the budget presentation and adherence on the same basis as our domestic budget.

When we think of the very strict requirements imposed upon the agencies and departments dealing with the domestic problems, I feel we are compelled to wonder at the latitude and freedom given to the ICA in administering the mutual security program and its funds.

We have sat here during these past couple of days and heard of poor programing, improper use of funds, poor administration, and lack of planning. The amendment would give this Congress a greater say in how these funds—which we appropriate—will be spent. It should lead to a more definite programing. It will lead to long-range planning.

The amendment supplements and strengthens the requirements placed in the act last year which requires the furnishing of greater detailed information by requiring the submission of a budget and adherence to that budget.

I might add, Mr. Chairman, that it is my desire that the program be terminated. I believe that is the feeling of a great majority in this Congress. Yet, unless we claim our right to control and direct the program through our legislative prerogative and control of funds it will be a self-perpetuating program which will continue to grow and grow. It is my hope that by reason of what we are doing the world will be free. That the people and nations of the world in using their present freedom might become economically self-efficient. This hope and this desire mean that I am opposed to any program of foreign aid which is everlasting and never-ending. I feel keenly that it is the responsibility of this Congress to make this program work to give it emphasis and efficiency by assuming the leadership in causing it to achieve its goal and then preventing it from becoming a permanent part of the world's economy—a never-ending drain on our economy.

The amendment before you will give us some say. It will rid us of a double set of standards in budget presentation—one for domestic agencies and a loose, lax, and indefinite standard for ICA.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. ROUSH. I yield to the gentleman from Iowa.

Mr. GROSS. Did not the gentleman hear that we do not have time to scrutinize this multi-million-dollar spending program?

Mr. ROUSH. Yes, I heard that, but I believe we do have time to look after the taxpayers' money.

Mr. FARBSTEIN. Mr. Chairman, will the gentleman yield?

Mr. ROUSH. I yield to the gentleman from New York.

Mr. FARBSTEIN. Does that include military aid?

Mr. ROUSH. Yes.

Mr. FARBSTEIN. Does the gentleman think it would be wise to let all of the countries throughout southeast Asia know how much money is given by this country to one country as against the other, Vietnam, Burma, Laos and the others?

Does the gentleman suppose also that in the Near East if one country were to know what the other country got, both for military aid and economic aid, that would make for friendship with this country?

Mr. ROUSH. This body rejected an amendment which would open up all of that information. This could be put under the classification of "secret," I imagine.

Mr. MORGAN. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Indiana.

Mr. Chairman, the gentleman from Indiana offered this amendment last year. The amendment, of course, would add nothing of importance to what is already in the bill.

In the Mutual Security Appropriation Act for 1960 two new sections—sections 111 (a) and (b), are incorporated. Both of those sections in the mutual security appropriation bill, and 537(f) in the Mutual Security Act, in my opinion, take care of the problem adequately, and I therefore ask that the amendment be defeated.

Mr. ROUSH. Mr. Chairman, will the gentleman yield?

Mr. MORGAN. I yield to the gentleman from Indiana.

Mr. ROUSH. Does the gentleman say this amendment is already in the bill? This amendment is not in the bill. There is nothing in the bill or act which requires strict adherence to a budget that has been presented, is that not correct?

Mr. MORGAN. As I said, there is in the mutual security appropriation bill, plus 537(f), sufficient authority in my opinion to accomplish what the gentleman wants to do.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Indiana [Mr. ROUSH].

The amendment was rejected.

Mr. MORGAN. Mr. Chairman, I ask unanimous consent that the balance of the bill be considered as read, and open to amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The balance of the bill follows:

CHAPTER V—TECHNICAL AMENDMENTS REFLECTING NEW LIMITS OF UNITED STATES

SEC. 501. The Mutual Security Act of 1954, as amended, is amended as follows:

(a) In section 205(c), strike out "continental" in the twelfth clause of the first sentence.

(b) In section 411(d), strike out "the continental limits of".

(c) In section 527(c), strike out "the continental limits of" in the introductory clause.

(d) In section 527(d), strike out "the continental limits of".

(e) In section 530(a), strike out "the continental limits of".

(f) In section 537(a), strike out "continental" in the last proviso of paragraph (5) and in paragraphs (13) and (17); and strike out "the continental limits of" in paragraph (10).

CHAPTER VI—AMENDMENTS TO OTHER LAWS

SEC. 601. Title II of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1721 and the following), which relates to famine relief and other assistance, is amended as follows:

(a) In section 202, strike out "The" at the beginning thereof and substitute the following: "In order to facilitate the utilization of surplus agricultural commodities in meeting the requirements of needy peoples, and in order to promote economic development in underdeveloped areas in addition to that which can be accomplished under title I of this Act, the".

(b) In section 203, insert before the period at the end of the third sentence the following: ", and charges for general average contributions arising out of the ocean transport of commodities transferred pursuant hereto may be paid from such funds".

SEC. 602. Section 501(b) of the Mutual Security Act of 1959 (73 Stat. 256), which relates to international cooperation in health, is repealed.

Mrs. CHURCH. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mrs. CHURCH: On page 14, after line 23, insert the following:

"CHAPTER VII—JOINT COMMITTEE ON MUTUAL SECURITY

"SEC. 701. (a) There is hereby established the Joint Committee on Mutual Security (hereafter in this section referred to as the "committee") to be composed of five Members of the Senate to be appointed by the President of the Senate, and five Members of the House of Representatives to be appointed by the Speaker of the House of Representatives. In each instance not more than three Members shall be members of the same political party.

"(b) The committee shall conduct a full and complete investigation and study of the policies and purposes of, and operations under, the Mutual Security Act of 1954, as amended. The committee shall report to the Senate and the House of Representatives the results of its investigation and study, together with its recommendations, before February 1, 1961. If the Senate, the House of Representatives, or both, are in recess or have adjourned, the report shall be made to the Secretary of the Senate or the Clerk of the House of Representatives, or both, as the case may be. Upon the submission of such report the committee shall cease to exist.

"(c) Vacancies in the membership of the committee shall not affect the power of the remaining members to execute the functions of the committee, and shall be filled in the same manner as in the case of the original selection. The committee shall select a chairman and a vice chairman from among its members. The vice chairman shall act in the place and stead of the chairman in the absence of the chairman. The vice chairman shall be chosen from the House other than that of the chairman by the Members from that House.

"(d) In carrying out its duties, the committee is authorized to sit and act at such times and places within or outside the United States, to take such testimony, to procure such printing and binding, and to make such expenditures as it deems advisable.

"(e) The committee is authorized to appoint and fix the compensation of such experts, consultants, technicians, and staff employees as it deems necessary and advisable. The committee is authorized to utilize the services, information, facilities, and personnel of the departments and establishments of the Government.

"(f) Expenses of the committee shall be paid out of the contingent fund of the House of Representatives, on vouchers signed by the chairman of the committee."

Mr. ZABLOCKI. Mr. Chairman, I reserve a point of order against the amendment.

Mrs. CHURCH. Mr. Chairman, I thank the gentleman for reserving the point of order.

If this amendment is not germane, Mr. Chairman, it is nonetheless certainly needed. The arguments and the statements made during the last 2 days must have convinced anyone in the House that there is probably more question about this program than about any other operation of our Government—more doubt about its effectiveness, more criticism of its operations, more question on the part of some, indeed, as to whether the program justifies itself; and certainly on the part even of those who support it, honest soul-searching as to what can be done, at least, to improve it.

Mr. Chairman, we have been promised in good faith—and I know the promise will be kept—by the chairman of the House Committee on Foreign Affairs that next year the committee will bring to this body a new bill, what we call a "clean bill." I am not sure that the House appreciates just how the bills have been prepared since 1954. It was in 1954, and not since then, that the House was presented with a new bill. Since that time, every year the administration has sent to the committee a draft form on which the committee, with deliberation—and I would say conscientiously—has worked its will. But here we have had, Mr. Chairman, in 1955, 1956, 1957, 1958, 1959, and 1960 what might be colloquially, even if inelegantly, called a "rehash" of the bill of 1954.

Next year this House and the other body are due to receive new legislation. I think, therefore, Mr. Chairman, that the moment is ripe for taking a new look at the policy, the pattern, and the operation of the mutual security program. I think that the Congress would welcome such a look. I think that the committee would welcome such a look, based on a new perspective, based on evidence, based on the viewpoint of those who may be less inclined to look back and produce only a continuation of what we have done year after year after year. Mr. Chairman, I am sure that the country would welcome such a look. And, I would say to those who criticize the program, an honest evaluation, report, and recommendations as suggested would help us bring to this body proper answers and proper actions—or at least proposals to terminate unjustified activities. It would certainly bring to those who support the program, if continuation be proven merited, arguments on which better to urge continuation. Above all, it would make us intelligent about what we are doing, and it might even lead the executive branch to take a fresh look, too, at our problems in this troubled world and at the way that those problems might be freshly approached.

Mr. Chairman, someone might say: Is not the Committee on Foreign Affairs of the House and the Committee on Foreign Relations of the Senate prepared to do just this?

First of all, sometimes a committee that has not in its entirety dealt so long and intimately with problems, actually profits from disassociation with previous trials and errors. The proposed committee will have not only perspective but fresh inspiration. It may find a new pattern on which to build our own safety and the peace of the world. But in addition, and very practically, Mr. Chairman, I realize that this present bill is not going to pass both bodies immediately, that the appropriation bill will be on our minds at least for a month or two and that we are going to adjourn as a body, hopefully we say, in July. The Committee on Foreign Affairs will not be meeting between that time and January. I therefore feel that the time has come when it is appropriate for the sake of new investigation to have a Joint Committee on Mutual Security, comparable to the Joint Committee on Atomic Energy, after which this proposal which I have outlined is patterned. I would certainly regret to have the committee raise a point of order against an amendment offered by one of its members in very good faith, but I would like to say that if the committee, perhaps because it does not realize the significance and helpfulness of the amendment which I have offered, does press that point of order, I shall certainly later introduce this amendment as a resolution and ask that it be sent to the Committee on Rules where I hope that it will receive prompt action.

Mr. ZABLOCKI. Mr. Chairman, I must reluctantly insist on the point of order.

I have the greatest admiration and respect for the legislative ability and skill of the gentlewoman from Illinois. Her amendment may have great merit, and I know that it is offered with the best of intentions. It provides, however, for the creation of a Joint Committee on Mutual Security and such a proposal, under the rules of this House, should receive appropriate consideration by the Committee on Rules. Our Committee on Foreign Affairs does not ever want knowingly to transgress the jurisdiction of any other committee of the House. Therefore, although I appreciate the spirit in which this amendment is offered, I trust my distinguished colleague, the gentlewoman from Illinois, will understand my position and my insistence upon the point of order.

The CHAIRMAN. Does the gentlewoman from Illinois desire to be heard on the point of order?

Mrs. CHURCH. Regretfully, Mr. Chairman, and with the additional statement that I think the decision to press the point of order results in a loss of valuable time for investigation of a policy and a program that needs investigation—regretfully, I repeat, I concede the point of order.

The CHAIRMAN (Mr. MILLS). The point of order is sustained.

Mr. GROSS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Gross: On page 14, line 15, strike the period, insert a colon, and add the following: "*Provided*, That not less than 25 percent of the funds expended during the next fiscal year under the Mutual Security Act of 1954, as amended, shall be used to purchase and make available to needy peoples surplus agricultural commodities produced in the United States."

Mr. GROSS. Mr. Chairman, this amendment simply provides that 25 percent of the funds to be expended during the next fiscal year under the Mutual Security Act of 1954, as amended, shall be used to purchase and make available to needy peoples surplus agricultural commodities produced in the United States.

I would point out to you that in the 5-year period 1946 to 1950 we exported $3,468 million worth of agricultural commodities. In that same period we imported $3,378 million worth of various commodities. In the decade following 1950 our exports dropped to about 20 percent. My amendment would put these exports back up and make available more food for the needy people in foreign countries.

I am interested in Iowa farmers, Midwest farmers, farmers all over the United States. I am afraid some people who are voting for this bill are not greatly interested in some of their industries and in some of their laboring people. Our American farmers are in trouble, and I am going to help them if I can. I am interested in seeing that American farmers get their fair share of the spoils that are going to be dispensed under this bill.

Mr. JENSEN. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Iowa.

Mr. JENSEN. I am very happy the gentleman has offered this amendment. Surely this amendment is proper and right, because it will not only help the people in the foreign countries who need food but it will also help the farmers of America, who are in a bad economic squeeze today. Certainly if there ever was an amendment offered to a bill that should be adopted it is the amendment offered by the gentleman from Iowa [Mr. GROSS]. I shall not take any more of his valuable time.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Louisiana.

Mr. PASSMAN. Will the gentleman's amendment apply to the prior authorization and also the bill before the committee? The total authorization now on which the Appropriations Committee will make an appropriation will be in excess of $4 billion. Will it apply to the entire amount or just the bill before the committee?

Mr. GROSS. My amendment provides for not less than 25 percent of the funds expended during the next fiscal year under the Mutual Security Act of 1954, as amended.

Mr. PASSMAN. Expenditures and not appropriations?

Mr. GROSS. Expenditures under the 1954 act, as amended.

Mr. WIER. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Minnesota.

Mr. WIER. Does the gentleman make any provision that this food, and certainly we have plenty of it, gets into the hands of the people and not the administrations of the governments?

Mr. GROSS. No; I make no provision for that in the bill. The language in the bill preceding my amendment is this:

> In order to facilitate the utilization of surplus agricultural commodities in meeting the requirements of needy peoples, and in order to promote economic development in underdeveloped areas in addition to that which can be accomplished—

And so forth.

Mr. WIER. I think our experience has been in the past that where we made contributions of surplus foodstuffs they went to the governments, and the governments sold them to the people, who had no money to buy them.

Mr. BAILEY. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from West Virginia.

Mr. BAILEY. Would the gentleman be kind enough to clarify his amendment so as to let me know if he is talking about the needy people abroad or the needy people at home?

Mr. GROSS. As far as my amendment is concerned, it could be used to take care of needy people at home as well as abroad.

Mr. BAILEY. I would say amen to that.

Mr. GROSS. I did not say anything about foreign governments.

Mr. BAILEY. I thank the gentleman.

Mr. GROSS. I would be glad to see some of the food paid for out of these foreign giveaway funds go to hungry people in West Virginia. That would suit me fine.

Mr. MORGAN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman this amendment would damage the bill.

From June 1946 through June 1949 the agricultural exports of the United States amounted to $49.1 billion. Of this amount those exports made under specific Government-financed programs amounted to $20.8 billion or 42 percent of the total. Of the $20.8 billion, $10.2 was exported under programs administered by ICA and its predecessor agencies; $7.2 billion of the $10 billion was financed by foreign aid programs. I think we have done very well with the surplus food in this country under the foreign aid programs.

Mr. JUDD. Mr. Chairman, will the gentleman yield?

Mr. MORGAN. I yield to the gentleman from Minnesota.

Mr. JUDD. In 1953 I offered an amendment, which was adopted, to require that up to $250 million of the aid provided under this bill should be in the form of surplus agricultural commodities. One year, I believe that ICA used up to $375 million.

Section 402 of the existing law requires not less than $175 million of the funds appropriated in this bill be used for agricultural surpluses. But, the fact is that we cannot now use more than that because production in most of the countries that needed food and fiber in the beginning is fairly well restored—they have recovered from the devastation of war. Many of the countries to which we are giving most of the help now are self-sufficient in food. What they need from us most is machinery and various kinds of equipment and materials to develop their economies. The testimony is that $175 million is about all that can be spent for or sent in the form of agricultural commodities, that is now being done and to adopt this amendment would just seriously cripple the program.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa [Mr. GROSS].

The question was taken; and on a division (demanded by Mr. GROSS), there were—ayes 60, noes 101.

So the amendment was rejected.

Mr. McCORMACK. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, there is no evidence that Communist aggression and intent, as well as worldwide domination ambitions, have changed to the slightest extent. This is evident as we view what is happening throughout the entire world.

We need strong allies and friends to constitute a collective defense system necessary for peace and for our own national interest.

Throughout the world we have strong allies and friends such as Turkey, Pakistan, Iran, and other countries. There are other countries who are following the policy of neutralism. While in our own national interests we must adjust ourselves in a proper way to those countries that are following the policy of neutralism, above all we should not forget our friends and our allies, and by our policies for them feel that they are subordinated in our mind to those countries that are following the policy of neutralism.

There are some people in pivotal and powerful positions in America, and I do not say that they are necessarily in the administration, who believe that nations should be encouraged to adopt the policy of neutralism. I cannot agree with such persons. Certainly, when a country that is our ally and our friend turns to neutralism, that change is not for our best interest.

We must not permit the impression to be created in the minds of those countries that are our friends and allies, and with whom we have agreements, that, first, we encourage neutralism, and second, that we will emphasize our aid and assistance to those countries that follow the pathway of neutralism, as against those countries who are our affirmative friends and allies.

We must avoid the impressions that neutral countries are wooed, and that friendly nations are to be taken for granted. As I read the press and draw my inferences, I have the impression that in the mind of some, if not all, of the leaders of nations that are our allies and friends, that such an impression exists and is growing. We should never permit policies to be established to convey a message to our friends and allies that they are taken for granted.

In those countries that are our friends and allies, they recognize that the Soviet Union is a Trojan horse. The Soviet Union is trying to weaken them in their friendships and alliances with us. They are offering all kinds of direct and indirect inducements and even threats. The nations that I have mentioned, and other nations such as Thailand, the Philippines, and others, have been loyal in their friendship to the United States. The friendship that we have with our allies should be cemented strongly and not weakened by glorifying neutralism as against friendship. Those administering this act in carrying out its provisions should recognize that real friendship between our country and other countries should be strengthened and not weakened.

Mr. Chairman, there appears to be a tendency in certain sections in this country that military alliances in Asia should be played down and that neutralist policies pursued by a number of Asian countries should be encouraged. Expression of views like this ignores the fact that the military expansionism of the Communist bloc faces hard and determined resistance—fully backed by the United States—both in its eastern and western borders, i.e. in Europe and Far East.

The soft underbelly of the Communist bloc on its southern border alone is the main area where such a determined and effective posture has been weak. It is therefore not without significance that recent Communist probings have increasingly centered on this area. Note Communist infiltration into Iraq and nearby areas, their increasing influence in Afghanistan, the unsuccessful military move into northern Laos, suppression of Tibetan rebellion and Chinese incursions into Indian borders and Ladakh area of Kashmir.

Apart from this danger, the currency of such views, encouraging neutralism, creates an adverse public opinion in the allied countries in Asia who have a feeling that they are being taken for granted. It also fosters a thought that it pays to turn neutral. This attitude naturally weakens the public support behind the policy of allied governments at the perimeter of the Communist bloc, who are, therefore, so to say under the gun of the Communist bloc. It is vitally important for the free world that such a mistaken impression is repelled by responsible leaders of opinion in this country.

Mr. WOLF. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Iowa is recognized.

Mr. WOLF. Mr. Chairman, I wish to ask the chairman of the committee if he would outline the effects of section 601 under chapter VI.

Mr. MORGAN. This takes care of surplus bread grains and other foodstuffs to be donated to underprivileged countries under title 2 of Public Law 480.

Donated surpluses will be used as part payment to workers employed on public works type projects such as soil conservation and reclamation, tree planting and reforestation, and the construction of earth dams, firebreaks, and so forth.

In some cases the donated surpluses will be sold by revenue short countries and the proceeds used for public programs, such as in the field of education.

An estimated $50 million in surpluses can be used in these programs.

The amendment will broaden the President's authority to donate surplus commodities so they can be given for economic development under other than emergency conditions.

Mr. WOLF. I thank the gentleman from Pennsylvania and yield back the balance of my time.

Mr. McDOWELL. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Delaware?

There was no objection.

Mr. McDOWELL. Mr. Chairman, I rise in strong support of the mutual security legislation, and I am opposed to this amendment, or any other amendments, which have as their purpose the weakening of this strong arm of our foreign policy which has proved to be successful in stopping the spread of communism throughout the world these past 15 years.

Mr. Chairman, I call to the attention of my distinguished colleagues the almost unanimous record of support of our foreign aid programs by the responsible officials of the U.S. Government throughout their inception from the President on through his Cabinet members, the Joint Chiefs of Staff, and every advisory commission which has been appointed from time to time to study this problem, and the unquestioned fact that no candidate for public office has ever been defeated because of his support of our foreign aid programs. This to me indicates that the American people agree with the decisions of their elected leaders that the foreign aid programs have been necessary and successful and that they wish them continued until such time as there may be assurance of peace and reasonable prosperity throughout the world.

We have heard time and again throughout this debate conscientious and experienced colleagues who have criticized the administration of the program in the past and in the present, and heard them express their fears of a continuation of waste and extravagance in the future. Many have prefaced their remarks by saying they are for mutual security and foreign aid and then they proceed at great lengths to say why they are opposed to the passage of the mutual security legislation now before us. Not one have I heard offer any alternative plan which would take the place of the mutual security program to check the spread of communism. They attack the economic grants of aid in the program as a giveaway and yet these critics are even more vociferous in their denunciation of the Development Loan Fund.

It is one thing to offer constructive criticism in the hope that such criticism can improve the administration of such a Government program, and I have joined my colleagues as a member of the Foreign Affairs Committee, and as a member of the Special Study Mission to Asia, Western Pacific, the Middle East, Southern Europe and North Africa in offering such constructive criticism. But too many of the bitter critics do so because they are now and have always been violently opposed to any foreign-aid program, and the record will show this to be true.

There is nothing wrong with the mutual security program that better administration cannot correct. The Foreign Affairs Committee, under the able leadership of its chairman, Dr. MORGAN, without partisan consideration, has written into this bill, H.R. 11510, amendments adopted by the committee which should be ample safeguards. However, the responsibility for the administration of economic assistance under the mutual security program is vested in the International Cooperation Administration. This executive agency must accept full responsibility for the recurring charges of maladministration. In spite of repeated evidence of such maladministration over the last several years, there is no indication of administrative corrections. Because of this situation, the mutual security program is carrying an unnecessary burden of criticism which has affected its acceptance by the American people.

I plead with my colleagues to put the blame where it belongs—squarely on the shoulders of the executive department. The many examples of waste and extravagance in the mutual security program which have been revealed to the Congress and the American public over the past 8 years have never been given one line of public recognition by the President or any of his executive administrators.

Whether we like it or not, world opinion is watching the Congress as it works its will on the passage of the mutual security bill. And again, whether we like it or not, the billions of people in the uncommitted nations throughout the world and where the mutual security program has been in operation, will be affected by the action of the Congress of the United States.

Our foreign aid programs are in direct competition with the Soviet Union foreign aid programs in most of these countries. Are we afraid to meet this competition? Can we in all good conscience fail now to meet our responsibility to ourselves and to these people?

Mr. HALPERN. Mr. Chairman, I want to add my commendations to the members of the Foreign Affairs Committee for the fine work they have done on H.R. 11510 and its accompanying House Report 1464. The bill is not all that I hoped it would be, but it does contain several significant, forward-looking provisions. These will strengthen the mutual security program and redound to the benefit of the entire free world.

These provisions reflect an awareness of the need for new techniques and programs for meeting challenges which we have come to realize play an integral part of the exceedingly complex economic problems of young, underdeveloped nations struggling to create a stable economic base.

I refer specifically to section 204(e) which endorses the Indus River Basin project. Rapid progress in the development of this great granary will prove of immense benefit to both India and Pakistan, and to the free world as well. It is fitting that Congress should, in this bill, acclaim the cooperative spirit which has carried the negotiations on this project to such a fruitful climax and that we should make known our determination to provide material assistance toward the implementation of the agreed goals.

Section 204(m) which provides for a program of loans to encourage the development of farm cooperatives, is another commendable addition. Agricultural land reform programs are often among the early measures adopted by underdeveloped nations in their drive toward modernization. Quite often the sudden increase in small, relatively inefficient farms results in a temeporary decline in food production.

In other nations the condition has long existed of agricultural areas broken up into miniscule parcels as a consequence of age-old inheritance practices or lack of capital funds.

In either case, a possible solution to the problem of creating more efficient agricultural units is the formation of farm cooperatives. To the extent that the application of section 204(m) will aid in this aspect of modernization, its inclusion in H.R. 11510 is highly welcome.

Section 601(a) is closely relevant to section 204(m). This provision for a broadening of the famine relief program of Public Law 480 can prove of enduring benefit to the underdeveloped nations. The use of agricultural surpluses to relieve temporary decreases in agricultural production, to fill gaps left when farm workers swing to industrial and urban occupations or into education, and to fight ravaging inflation when farm stocks fall and hunger causes food prices to soar, fills a vital role in the overall mutual security program. Its beneficial consequences can be many, and I hope that it will be used to the greatest extent possible without infringing upon legitimate agricultural export programs.

The committee is also to be highly commended for the increase in the special assistance program from $247 million to $256 million. This grant aid to 22 nations is utilized for many important functions from the maintenance of political and economic stability to the carrying out of special programs. Its recipients include such countries as Brazil, Israel, Haiti, and West Berlin, among others, all significant members of the free world.

The committee likewise should receive our plaudits for section 2 which declares it to be the sense of Congress that the United States favors freedom of navigation in the international waterways,

and economic cooperation between nations, and that the purposes of the mutual security program are negated and the peace of the world endangered when nations receiving economic assistance under the act, wage economic warfare against other nations receiving such assistance, including such procedures as boycotts, blockades, and the restriction of the use of international waterways.

This addition superbly reflects the general policy of Congress as defined in section 2(a) of the Mutual Security Act of 1954, as amended, that—

> Peace in the world increasingly depends on wider recognition, both in principle and practice, of the dignity and interdependence of men.

Efforts thus far to promote a conciliatory attitude in the UAR as regards its economic boycott of Israel and the closing of the Suez Canal have met with nothing but failure. Surely, if two countries ever possessed mutually interdependent interests, it is these two; yet, the UAR almost pathologically insists upon maintaining a state of belligerency and on defying international law and denying its own commitments.

The continuation of the Middle East crisis condemns the area to be in constant ferment and affords Russia an open invitation to intervene. A detente would not only enable the entire region to concentrate on domestic needs, but would greatly augment U.S. foreign policy by removing a sore which has been highly susceptible to Russian agitation.

I urge the Congress to support this provision overwhelmingly and thus strengthen the President's hand in its administration. Its adoption will constitute notice to the world of our determination to uphold the principles of justice and equity among nations.

There are other aspects in the committee report which should be mentioned. One is the discussion of the need for increasing the authority of our Ambassadors over the content, coordination and direction of our aid programs. This objective has been supported by numerous study groups and is a reflection of our growing awareness that U.S. Foreign policy can no longer be concerned solely with the external relations of States; the evolution of their domestic life has become a direct and legitimate concern.

Relationships between the United States and the underdeveloped nations today must rest on a shared interest in furthering a process of modernization which will enable transitional societies to develop their own versions of responsible government and to play a useful cooperative role in the international community. Mutual efforts will require our Ambassadors to become involved in activities directed toward the effectuation of this objective.

I hope that the policy outlined in the committee report will be applied as rapidly as possible in the implementation of U.S. foreign policy.

I also wish to commend the committee for its striking description of the pipeline problem and the need to maintain unexpended balances as an assurance of the continuity of our programs. Leadtime is a necessary factor in the administration of the program; the very core of the program depends upon continued adequacy of material shipments.

Continuity in the pipeline can be analogized to maintaining a balance in a checking account. Unless deposits sufficiently offset withdrawals, the balance will decline and the usefulness of the account will be destroyed. If we fail to keep the pipeline filled, or if we permit it to be broken, young, free nations will wither past any hope of revivification by emergency treatment.

These, in my opinion, are some of the outstanding provisions in the bill and in its accompanying report. I hope that the measure will be adopted in its present form or, perhaps, its authorizations increased where necessary to bring them into line with the recommendations of the President.

More than ever, we need continuity, adequacy, and flexibility in the mutual security program. The occasion calls for boldness and generosity.

I deeply regret that the authorization for the Development Loan Fund, both in amount and time, was not substantially increased so that needs might be met, particularly in those nations which are poised just at the economic "takeoff" point, and require significant overseas assistance if they are to breakthrough into modernity.

Mr. Chairman, these are the years that we can never call back. The consequences of opportunities that are missed now can plague us in the future as we find that insufficient effort on our part might well be responsible for the failure of our expectations to fully materialize.

Once these years have passed, we cannot correct what might have been done.

I commend the committee for the fine advances it has made in the mutual security program through the provisions of H.R. 11510. I only regret that greater provision was not made to set the program on an adequate, long-term basis. I sincerely hope that this will be remedied and that free peoples everywhere will be enabled to fulfill their aspirations for growth and development as member nations in the free world.

Mr. DENT. Mr. Chairman, no man in this House has a greater respect for or a fonder friendship than I have for my colleague and fellow Pennsylvanian, the Honorable THOMAS MORGAN, chairman of the Committee on Foreign Affairs.

However, all men are endowed with the mental capacity to form an opinion and express it.

So without reflection upon my friend, Dr. MORGAN, or any member of this committee I want to again call for the defeat of this misnamed, much-abused act of charity called the mutual security bill.

While we talk security, we preach, and sometimes I wonder if we also pray, for war and crisis after crisis. One wonders if all this hue and cry over war and threats of war, that is, the Berlin crisis, communistic aggression, and other pet slogans are not manufactured for the purpose of justifying the $4.5 billion we spend on defense for this country and our friends.

Certainly we all desire security at home and for our friends abroad, but we also have to admit that you cannot really buy either one of these much-desired goals. You can talk yourself into trouble a darn sight easier than shoot your way out of trouble.

I read this very morning the following editorial in the Financial Post from Toronto, Canada. It ought to show just what outsiders who are not Members of Congress, seeking election, nor are they Senators or statesmen running for President, think about our so-called peace offensive.

I quote the editorial dated April 16, 1960:

ARMS RACE REACHES INSANITY PEAK

Preparations for war by the two leading powers, the United States and Russia, have now reached a pitch of mania and horror that should alarm every responsible citizen.

Latest development in the United States (reported on p. 13) is a concerted effort to make germ warfare and nerve gases respectable and much more efficient.

For years the United States has been accumulating stocks of a lethal gas that can kill millions swiftly. Another specialty being developed involves mosquitoes, flies, and ticks infected with typhoid, cholera, and other terrible diseases.

This part of the military program has been kept hush-hush because the great public is supposed to have a moral or esthetic objection to this kind of defense.

But now the U.S. Army Chemical Corps, backed by top military brass and civilian experts, is out to make these ghastly weapons popular. They can kill far more people faster than nuclear bombs.

The cost of this kind of mass killing is only a few cents per corpse which is very much cheaper than the new bombs.

And so Congress is to be asked to speed up, and support with a greatly increased money vote, the making, testing, and storing of bacteriological and chemical killers. And some of the militarists seem eager, ferociously eager, not merely to test these monstrous discoveries but to commit the United States to using them first when, as they evidently expect, war comes.

Talk of disarmament is a shameful mockery when proposals of this kind are seriously made.

Indeed the bumbling leaders who have brought us to this desperate pass by their obsessive concentration on world war III mock and insult those who died in World War II.

The one possible basis for security, the necessary prerequisite to any cut in armaments, is a political settlement of disputed issues.

But it is obtainable now, as always, only by patient diplomacy, an art that's unfortunately out of fashion and even despised in the U.S. American foreign policy during the 7 years Mr. Eisenhower has specialized in repeated threats of force, not in the search of conciliation.

Next month's summit conference offers an opportunity for the diplomatic, peacemaking approach. If the chance isn't seized, if the U.S. Army Chemical Corps and other ambitious generals are to determine the course of American policy, the human outlook is frightening indeed.

The latest news from Korea shows that the guns and ammunition we supplied the Korean Government is working perfectly in the street riots against the government forces of Korea which we are supporting.

We can assume that much or our mutual aid cash was used for payment of guns and equipment being used in South Africa.

We also wonder and that is all we can do is wonder about the disturbances in South America, Central America, Cuba, Santo Domingo, and all over the Caribbean area and how much of the equipment, guns, and propaganda was and is being paid for out of the pockets of American taxpayers from so-called mutual aid funds.

Another situation seems to be getting out of hand in our mad race to beat our plowshares into swords and that is the proposal by the Eisenhower administration to give away to "friendly" nations our nuclear war equipment.

A few years ago this administration pushed through a bill allowing the President to give away nuclear secrets for peaceful purposes.

Since that time France has developed the A-bomb and China is on the threshhold of this accomplishment. What happens when we give away the war secrets and equipment? Suppose we give these materials to another friendly nation like Cuba was and a Castro decides to take over. Do we then get hit with our own shells or do we beg them to be nice and not fight "Poppa."

Personally, I must admit I cannot see any sense in giving mutual aid for economic purposes to so-called underdeveloped countries, to countries like Trujillo's Dominican Republic, to Cuba, and other Latin and Far East countries who spend as much or more than we give them to build up what they call military establishments.

Does anyone believe that any of these countries would be able to muster a fighting force in the new rocket-nuclear war planned for the future? They would not. In the meantime we go merrily along talking peace and handing out guns. If you watch the westerns on TV you find out that when a town was really a trouble spot a real tough marshal would make all the people "park their guns."

Why? Simply because the only way to keep them from shooting up the place was to take away their guns. Peace and powder do not mix any more than drinking and driving. You can get away with it until some unforeseen incident makes you have to act fast and—"wham"—it is all over but the shooting.

I have proposed before and say now that the only way I will ever vote for aid to underdeveloped countries will be with the rider attached that the nation getting aid cannot spend money for military purposes.

If people need food and economic security, how can they have both when they use the major part of their income for guns and powder? Peace cannot be achieved by doubletalk, and the United States is tied up by treaty and tradition to such an extent that in any future war we will have to defend our neighbors whether they have standing armies or not.

Now for the developed countries—France, Germany, Japan, and so forth—they have long ago passed the berserk mark set up as a basis for aid. They are far beyond their prewar economy level. This was our original goal in foreign aid. We seem to have lost sight of both the goal and the players and appear to be sitting in the bleachers while the game is going overtime with the opposition running up a score while our team is in the showers.

Let us cut out the nonsense and pure doubletalk. If we want to give military supplies, and so forth, to our friends, let us admit to this fact; but does anyone believe there is any difference in the British hiring the Hessians to fight the Revolutionary War and our plan to pay nations to fight our battles for us? We will survive so long as we are strong.

If I thought this act before us would prevent wars, I would vote for it time and time again, and so would all Americans.

However, unless we reevaluate the whole situation of trade, aid, loans, gold reserves, domestic requirements for our people, and move forward in a coordinated effort to better our way of life, and then give a helping hand to our friends, I cannot at this time support this so-called aid bill.

Mr. SCHWENGEL. Mr. Chairman, as I listen to this annual debate on our mutual security program, the thought comes to my mind of the reaction of millions upon millions of people to President Eisenhower's visits in the Near East and South Asia and in Latin America. I believe this reaction—one of warmth, enthusiasm, and obvious friendliness—proves how wrong are some of the allegations heard about our foreign aid program.

Take, for example, the charges that our aid has made enemies instead of friends. This charge just doesn't hold up. If it were true, we should have made an awful lot of enemies by now, because we have been in this aid business for a long time and have spent billions of dollars at it. But if the charge were true, then why did so many people crowd the streets of so many nations to welcome our President with such an outpouring of affection? We have only to look at what happened during the President's visits to Pakistan and India. The crowds were by far the greatest ever to greet a foreign guest and pressed in upon the official cars so that they could hardly move. This reaction, in my opinion, is not unrelated to the fact that we have shown through our aid programs that we are concerned with what happens to the people of South Asia—with their welfare and their aspirations for progress. It is not unrelated to the knowledge on their part that we have provided enormous quantities of food, to help ward off famines, to relieve victims of disaster, to add to stocks available and help to keep the prices at reasonable levels.

Our aid in both Pakistan and India has reached down to the villagers, in Pakistan, through the village aid program, in India through our help with the community development program. Here we have helped stimulate local self-help projects, such as access roads, drainage ditches, pure water supplies, schools, and other enterprises of direct and immediate benefit. We have worked with these Governments, as with other governments, to make it possible for the average citizen to improve his own condition and that of his family and of his home.

Another familiar charge against the aid program is that the benefits go only to the rich and the common man does not get anything, does not know anything about the aid program, or, if he does know, he resents it. People do know about programs and they know how they have benefited them. For example, who gets more benefit from a cooperative health program—the rich who can already afford a doctor, or the poor who learn how to prevent disease? Who gets more out of educational programs—the rich who already send their children to school, or the poor who are helped to build schools, to get teachers, to learn to read and write? Who gets more out of agricultural programs, or out of community development and out of self-help housing?

I have in my hand the latest issue of a newspaper called Economic World. On the front page is a picture of President Eisenhower examining a self-help housing project in Chile. This project is the result of advice and assistance given through the aid program and 23,000 houses have been or will soon be built in 26 towns in Chile through similar self-help activities. What can be a better defense against communism than a home of one's own—particularly a home that a man has built for his family with his own hands and help of his neighbors?

I cannot believe that the warm, the overwhelming reception given our President by the people of Chile was unrelated to their knowledge that over the years U.S. technical cooperation experts have worked side by side with Chilean Government officials and ordinary people to help them improve their nation—its agriculture, sanitation, education, and social institutions.

The people of Brazil were equally warm in their reception. Not even a terrible air tragedy could extinguish their happiness with our President. We have had years of cooperation with Brazil and, as a matter of fact, it was in this country that the earliest predecessor of the point 4 program was born. The most outstanding success is the Public Health Service in Brazil. It is called SESP—Cervico Especial de Saúde Pública. SESP started life much more North American than Brazilian—over 90 percent staffed and financed by the United States. Today it is a mature public health agency, larger in fact than the U.N. World Health Organization, and its more than 400 projects throughout Brazil are 97 percent financed and staffed by Brazilians. This is an example of the kind of institutional evolution which we encourage through point 4. It is the kind of institution which helps the Brazilian people directly and which many of them know about and appreciate our helping hand.

We have all heard opponents of this program say that our aid is not wanted—yet most nations ask for more.

We have heard these opponents—and even some self-styled friends say—that

U.S. personnel are inept and stupid, clumsy in their relations with sensitive citizens of other nations—and yet, our friends ask for more of our technicians and our help.

They ask for more because they like what they get; they know it is good for them. They ask for more cooperation because they think it is to their interest to work with us just as we think it is to our interest to work with them.

Let me refer to one other nation—Greece—where the cordiality of the reception given our President exceeded all we could even wish for. The thought of Greece should remind us that many countries literally would not exist at all had it not been for economic and military aid from us. Greece is one such country. Only 13 years ago Greece had been almost entirely taken over by Communist guerrillas. The Red-supported troops occupied 75 percent of the land area and held everything except a few of the larger cities. If there had been no aid from the United States, Greece would have gone down the drain.

But there was aid—both military and economic—and that country is today a valued ally in our NATO defenses and a strong partner for peace. The people of Greece appreciate our aid and in one area they even erected a statue in honor of a U.S. technician who helped them drain and desalt some marshes and then plant them to rice.

Now, of course, the purpose of aid is not to extract expressions of gratitude, but to help our partners to become better partners, stronger partners; to help them, when need be, to carry the economic load of defense, to help them to keep their economies from being crushed by this burden. Another purpose is to provide that vital margin of resources which can make the difference between success or failure of plans and programs for economic development. Our aid, in most instances, is only a fraction, and often a tiny fraction, of the total efforts at economic development. But it is an essential fraction. Without it the world situation would be entirely different. With it we are able to help create the opportunities for progress, opportunities to negotiate for peace.

Many more examples of the success of the aid program could be given, not only in the countries visited by the President, but in many others also. However, I think no more need be said to prove that the aid is appreciated, is known, and is needed.

I urge approval of this legislation.

Mr. Chairman, at this point I should like to place in the RECORD an article by Joseph Harrison, published in the Christian Science Monitor, April 1, 1960.

U.S. FOREIGN POLICY REAPS GAINS

(By Joseph G. Harrison)

The foreign policy of the United States, according to a great deal of available evidence, has entered the crucial decade of the sixties in a considerably stronger position than many of its critics would have thought possible a year or so ago.

Indeed, an impartial observer might well argue that America's position in the world, despite certain obvious weaknesses and failures, contradicts those who claim that this position has continued to deteriorate.

It can, in fact, be maintained that the very opposite of what these critics expected has happened, and that for several years American foreign policy has been increasingly successful along most lines and at most points.

This does not mean that many grave problems do not lie ahead. The unresolved crisis over Berlin, Washington's presently unhappy relationship with Cuba and Panama, the continuing threat to Formosa on the part of Communist China, these and certain other unsettled questions indicate how difficult remains the road ahead.

Yet a broad survey of world conditions, as they affect the United States and are affected by it, indicates that in many areas of the globe Washington's policies have both strengthened this country's international relationships and improved the picture held of this country.

TRACED TO 1958

Some students trace the beginning of this improvement, surprisingly enough, to the summer of 1958, when, in the face of civil strife in Lebanon, an extremely tense situation in Jordan, and the overthrow of the pro-Western Iraqi Government, Washington sent a powerful contingent of U.S. Marines into Lebanon. This helped end the strife, and allowed an opportunity for peaceful compromise between the warring factions.

But, equally important, the Marines were, to the happy surprise of nationalist elements in the Middle East, quietly withdrawn after a few months. Important segments of Asian-Africa opinion, which had earlier condemned the dispatch of the Marines, even though the Lebanese Government had requested it, were gratified at the speed with which this withdrawal was made.

This and other wise steps taken since eventually resulted in a lessening of Arab hostility toward the United States, despite the fact that Moslem resentment over America's role in the establishment of the State of Israel continues, and will continue for the foreseeable future, to raise many problems for Washington.

At present American relations with the Arab-speaking nations of the Middle East and North Africa seem, on the whole, to be moving toward a steadily better relationship. This is particularly true of Washington's relations with the United Arab Republic, the most influential of the Middle Eastern nations.

SYRIAN AID RESUMED

Within the past few months, the Syrian region of the United Arab Republic accepted American aid for the first time since the end of World War II. Similarly, American aid to the Egyptian region of the United Arab Republic is rising steadily and negotiations regarding such aid are being held in an increasingly friendly atmosphere. At the same time, the United Arab Republic has quietly but effectively begun withdrawing a considerable number of students which it had earlier sent to the Communist countries of Eastern Europe and rerouting them to American and British universities.

It is undeniable that the relationship between the United States and the revolutionary regime of Premier Karim Kassem in Iraq is far from satisfactory, with the United States being frequently lumped with other leading Western Powers as "imperialist." However, the United States has moved in such a way as to attract a minimum of unfavorable attention in Iraq, with the result that Baghdad has been finding fewer reasons for attacking this country. One proof of this is seen in the fact that Iraq has made no serious attempt to link the United States with the series of upheavals which last year kept that country in confusion and which resulted in a succession of sensational treason trials.

In fact, the Iraqi-American situation has improved so greatly of late that the Iraq Government recently asked the U.S. Embassy to help it fill 230 teaching posts at Baghdad University so that it might avoid hiring further Soviet personnel.

In general, it is not easy to see how the United States could within the present context of political realities appreciably improve its present foreign policy in regard to the Middle East. Washington has already demonstrated a heightened awareness of Arab sensibilities. It apparently seeks to do as little as possible to rub these sensibilities the wrong way, and it is endeavoring through a number of reportedly effective means to convince the Arabs that the United States not only has no designs against their independence but is sincerely interested in the preservation of peace and the advancement of well-being in the area. This is an effective beginning, given the bitter relationship which began with the partition of Palestine in 1947.

NORTH AFRICANS PLACATED

In still another Arabic-speaking area the United States has also managed to steer with considerable skill through excessively difficult diplomatic waters. This area is North Africa, where interest and emotion are largely focused on the effort of the Moslem underground in Algeria to win local self-determination.

Through the personal visit of President Eisenhower to the heads of state in both Morocco and Tunisia, through American willingness to negotiate over U.S. Air Force bases in the former, and through the offer of economic aid without strings, Washington has succeeded to a considerable extent in creating a not unfavorable image of the United States in those two countries.

Similarly, its shrewd voting during crucial tests in the United Nations on the Algerian issue, while not wholly satisfying either the French or their Moslem opponents, has enabled Washington to avoid offending either side too deeply.

But it is in south and southeast Asia that one of the most noticeable improvements in American foreign relations has taken place. While communism has been having its difficulties, due largely to Chinese Communist aggression along its Himalayan frontier and its actions in Tibet, the United States has, through a number of careful steps, managed to reduce Asian belief that the United States, if not exactly imperialistic itself, nonetheless was a fellow traveler of European imperialism. Through generous economic aid, but above all by the restraint which it has shown at a number of critical junctures during the past year and a half to 2 years, America has been able to remodel to a considerable extent the image of this country held by many influential Burmese, Ceylonese, Indians, Indonesians, and other Asians.

EISENHOWER GAINS NOTED

It goes without saying that the triumphal tour through this area taken late last fall by President Eisenhower only served to confirm and forward what was already a noticeable trend toward warmer relations with America on the part of the majority of non-Communist countries of south, southeast, and east Asia. Indeed, this tour seems to have had a favorable effect even in those Asian countries not included therein.

One has only to think back to the tense situation which existed 2 years ago between the United States and the Republic of Indonesia on the occasion of the Sumatran revolt, to recognize how great the improvement has been in this important corner of southeast Asia. At that time the United States was being openly accused of aiding the rebellion.

But by patient insistence upon its innocence, by carefully refraining from actions which might lend further color to these accusations, by the extension of post-revolt

aid, and above all by the skillful and friendly diplomacy exercised by American Ambassador Howard P. Jones, Washington has converted its relationship with Djakarta into one of friendship and a considerable degree of mutual trust.

An equally welcome improvement has been effected in American relations with Burma. Some 8 months ago, Burma began reaccepting American aid, which it had terminated in 1953 on the grounds that it had military implications. This renewal of close American-Burman relations is the result of patient effort on Washington's part plus the generally better picture which the United States has cut in southeast Asia during the past several years.

LATIN AMERICA IMPROVED

Taken as a whole the U.S. relations with Latin America also seem to be in a period of upswing. The Eisenhower visit during late February, American restraint over Cuba, the courage shown by Vice President RICHARD M. NIXON during his South American swing, the promise of greater economic aid, the establishment of the Inter-American Development Bank—each of these has helped repair Latin American complaints of neglect on Washington's part and improve the average Latin American's image of the United States.

On the other hand, it is obvious that in certain areas of Latin America, the United States faces difficult days. No statesman would dare forecast the direction in which American-Cuban relations may move. Similarly, Washington's relations with Panama give every evidence of being headed toward some sort of crisis over the latter's demand for greater rights in the Canal Zone.

These will obviously both test Washington's diplomatic skill and have a bearing upon the continued improvement in this country's relationship to the rest of Latin America. But if Washington's course so far is any yardstick, the United States is prepared to handle these situations in such a way as not to jeopardize its new gains with Cuba's and Panama's sister republics.

Although some doubts have been expressed as to its diplomatic wisdom, Washington's move in sending a protest to the Union of South Africa deploring the loss of life in racial riots there is seen as part of America's new vigor in foreign affairs. Whatever else its effect may be, the move is almost certain to enhance American prestige among the new nonwhite nations now coming forth in Africa.

ATMOSPHERE BETTERED

Of all of the changes for the better wrought during the past several years, however, the most noticeable, in many ways, is that affecting American-Soviet relations. It is true that this is not an easy situation to evaluate, as it is susceptible to change overnight, should the Kremlin so wish. It is also true that the continuing crisis over Berlin remains a dark and somber cloud upon the horizon.

Yet it is undeniable that the present atmosphere of conversation is an improvement over the situation which previously prevailed. In like manner, the exchange of visits between President Eisenhower and Premier Nikita S. Khrushchev cannot be dismissed as merely worthless window dressing. The continued edging toward some kind of agreement on the control of atomic tests and armaments is a helpful and hopeful sign, even if it would be dangerous naivete to pin too great hopes thereon at the present time.

While this somewhat easier situation between the United States and the Soviet Union is undoubtedly traceable in large part to Moscow's belief that it best serves Soviet purposes at the moment, it should not be overlooked that the greater flexibility in world affairs which Washington has shown during the past 18 months or so has contributed substantially to this improvement.

At present criticism of the White House and State Department emphasizes the three following points which pertain, in part at least, to foreign policy. One is that the United States is not exercising adequate world leadership. A second is that foreign aid is not what it should be. The third is that America's defense position has deteriorated in comparison with that of the Soviet Union during the past few years.

The charge that the United States is not exercising adequate world leadership is an interesting one from several points of view. It is undeniable that today, 15 years after the end of World War II, Washington does not have the commanding voice in world affairs which it had, say, 5 or 10 years ago.

There are those who ask, however, whether this decline (1) was not inevitable and (2) was not actually desirable. They point out, in fact, that the entire purpose of American foreign policy during the past decade and a half has been directed toward enabling other countries to stand upon their own feet, make their own decisions, and thereby lessen, rather than increase, their dependency upon the United States.

From this point of view, may not the decline in American leadership actually represent a victory for American foreign policy? It is obvious that this line of argument cannot be carried to the point of advocating the abrogation of all American leadership. Nor does it mean that America can afford to stop thinking in global terms. This would be as dangerous as it would be foolish. But one cannot dismiss out of hand the argument that the increasing independence which many nations, which once felt obliged to follow American policy willy-nilly, are now showing may well constitute one of the greatest triumphs of American foreign policy.

In regard to the adequacy of foreign aid, if there has been any shortcoming here, it is attributable to the country as a whole, rather than to any one man, agency, or political party. Observers in Washington generally agree that Eisenhower has fought more vigorously for foreign aid than for almost any other cause. In this he has been seconded by administration officials. If he has been frustrated in obtaining the level of aid desired, the fault lies as much with one political party as with the other.

Of the varying charges made against the present administration in Washington, whether sincerely or for political purposes, the one which has produced the widest repercussions is that of having neglected this country's defenses. Specifically, the charge is made that the United States has now fallen behind the Soviet Union in both conventional and space weaponry.

INFLUENCE SMALL

Such a charge belongs in a discussion of a nation's foreign policy only so far as it can be shown that the former affects the latter. So far, and this frequently comes as a surprise to Americans, there is little evidence that the influence of the United States has declined as a result of any change in this country's military strength vis-a-vis the Soviet Union. The general feeling in the rest of the world seems to be that, regardless of any alteration in the American-Soviet military balance, both nations possess such tremendous military might that such alterations no longer are significant. How sound this view is remains to be seen. But to date there is little or no evidence that the United States has been seriously handicapped or set back in the conduct of foreign affairs through an alleged neglect of its armaments.

No serious observer would or could attempt to deny that many grave problems lie ahead of the United States in the field of foreign affairs. Equally, none would deny that this country has behind it many missed or but half-seized opportunities. On the other hand, there is citable evidence that, during the past several years, American foreign policy has had a number of quiet, yet effective triumphs and that, contrary to the predictions of critics, the United States is markedly better off in its foreign relations than these critics had forecast.

Mr. FLYNN. Mr. Chairman, the House of Representatives has devoted a large share of its time to consideration of committee reports on the authorization bill to provide funds for foreign aid. It is otherwise known as the mutual security authorization bill, H.R. 11510.

Following World War II, the expenditure of American dollars to help our European allies rebuild their countries and to bolster them in their fight against communism was, in effect, helping the United States. There are certain areas in the world today where the expenditure of American dollars is essential to safeguard and protect otherwise defenseless people from Communist aggression of either a political or economic kind. I refer to the support of troops at the 38th parallel, to the defense of Chinese troops on Formosa, to the retarding of aggression in Vietnam, in Laos, and in other trouble spots in the Near East. I recognize also that our mutual security program has saved such nations as Greece, Turkey, Italy, West Germany, and possibly France from communism and certainly this has justified much of the foreign aid expenditures of American taxpayers since 1946.

During these past 16 years, however, great changes have taken place of a social, political, and economic nature throughout the world. Many of the nations we have aided have rebuilt their economy on a sounder basis than our own. Many of these nations enjoy a higher degree of prosperity than the taxpayers of this country enjoy. These countries should now bear their full share of the cost of aiding weaker nations and newer nations to protect themselves against the political and economic onslaught of Communist aggression.

The foreign aid program should be under review on a daily basis, not on an annual basis. The State Department and ICA—the International Cooperation Administration—have built vast bureaucratic organizations administering the foreign aid program. The program has become so complex, so diversified, and so inefficient as to require a complete renovation. Those administering the program no longer look for ways of making the program more economical for the American taxpayers, but rather seek ways of spending the foreign aid funds which they feel a docile Congress will provide, on a bipartisan basis, at the request of the President of the United States. Congress is denied much information as to the method and manner of spending foreign aid funds, as to what area it is spent in, and on what projects it is spent. Congress is expected to write a blank check for billions of dollars annually and is expected to permit agencies to plan the spending and to spend the same, even though Congress has no control over these agencies.

We witness, in the present bill, $80,000 being spent to send 20 students to school

for 5 months at Johns Hopkins University and Boston University. We see many millions of dollars being spent to build high schools and colleges in Ethiopia and in other African nations. We see millions being spent to economically develop Africa and we see many, many other millions being spent to lend both military and economic aid to other nations throughout the world—all this at the expense of the American taxpayer, under a program where their Representatives in Congress have no voice in the spending but have delegated absolute power to the State Department, to ICA, and others. We see the farmers of so-called underdeveloped nations receiving substantial benefits to the tune of many millions of American taxpayers' dollars from these foreign aid funds. We hear rumors of hospitals being built in foreign countries, of railroads being built in Italy and we hear tell of foreign aid funds being used at the rate of $1 million per mile to build a 300-foot-wide highway with underpasses, overpasses, and cloverleaf approaches—the Saigon-Bien Hoa Highway in Vietnam—and we understand that this uncompleted road will be continued with foreign aid funds anticipated in the bill presently before Congress and those to be presented in future years.

While all this takes place and while a majority of Democrats on a bipartisan approach to foreign policy support President Eisenhower in his request for passage of the bill to authorize funds for foreign aid and the items above set forth, plus many others, President Eisenhower has, nevertheless, asked Congress, and particularly the Republican Members thereof, to vote against almost every bill which provides any funds or program to aid or assist the American people. The farmers will witness this session of Congress attempt to deny further agricultural funds to carry on the soil bank program which is due to terminate at the end of 1960. The numerous areas throughout the country that are underdeveloped will find it impossible to secure the passage of the bill to aid the underdeveloped areas through a study and a joint plan of cooperation between the community and the Government to make economic taxpaying units out of areas that have long been uneconomic and underdeveloped.

FHA mortgage insurance which is due to terminate will have a difficult time securing approval in this session of Congress. The VA loan program will be permitted to die and the direct VA loan program has been virtually inoperative for the past 2 years. The 30-year mortgage guaranteed by FHA is virtually a thing of the past. High interest rates prevail for businessmen who seek loans to carry on legitimate business activities. If the Government does nothing to assist the people or our economy through a program that would compel lower interest rates, the whole industry suffers drastically for failure of the Government to act. Small businesses go bankrupt because of our own insecure economic position, and the Government does nothing to aid the small businessman.

We now see our Government actively engaged in a program to encourage and induce American industry to expand and develop in foreign countries. This takes jobs away from Americans and takes taxes away from the United States, as well as from the individual States and local units of government. The Government permits foreign imported products to enter this country in continually expanding amounts to sell in competition with American-made products. This brings down the wage scale of American working men and women and eventually results in a substantially lower standard of living for the American working people. The Government actually encourages this under the guise of helping redevelop the underdeveloped nations of Europe and is heard to say that this program is, in effect, a foreign-aid program.

The gentleman from Louisiana, Congressman PASSMAN, chairman of the subcommittee hearing the foreign aid bill, has documented the statement that our present foreign aid program is costing the American taxpayers in excess of $11 billion a year. When you add to this American business which is being encouraged to develop in Europe, you can see that the cost of foreign aid to the American people, both in out-of-pocket dollars and in lost revenue, wages and taxes is staggering. This country still has 5 million unemployed men and women. It has long suffered and continues to suffer from a major farm depression. Small business faces its most severe economic test of this generation and a large percentage of them are being forced to quit or go bankrupt. American industry and big business is feeling the economic pinch of trying to compete in wages and costs against the substandard wages and living costs of foreign countries.

In spite of all of this, we are asked to authorize more billions of American taxpayers dollars to aid foreign countries while every American aid program that is mentioned is sacrificed and denied on the theory that we cannot afford it and we cannot unbalance the budget.

I have always favored foreign aid and mutual security in the past. I, at this time, would vote for a reasonable expenditure for foreign aid and mutual security in those areas where such aid is essential to build an ally strong enough to enable them to resist Communist aggression of either a direct physical or economic kind. I am not permitted to vote for such a sane and sensible bill. I must make the choice of voting for a bill that continues to enable those administering the program to boondoggle American tax dollars on public works programs throughout the world and on foreign aid programs which have little if any relationship to the rebuilding of those nations as strong units to resist communism.

The rules of the House of Representatives do not permit me to vote in favor of needed funds but rather requires me to vote for the entire wasteful program or to vote against the entire wasteful program. Under those circumstances, the only hope that a Member of Congress has to remedy the situation is to voice his protest by voting against the entire wasteful program in the hope that the authorization bill will be defeated and that the ICA and State Department will be forced to submit to Congress, through our Foreign Affairs Committees, a program which will be reduced to provide only the necessities and to eliminate the grossly mismanaged and unnecessary expenditures that have been made in the past and that are provided for in the present foreign aid authorization bill. I, therefore, am forced to make the decision in the best interests of the American taxpayers, American citizens, and the country as a whole that I must vote against the foreign aid authorization bill. In doing so, I promise to fight to secure such funds as are needed to carry on a reasonable mutual security program. This, of course, will only be possible if enough votes are secured to defeat the pending measure.

I may summarize this by saying that I do not oppose mutual security but I do oppose the mismanagement and gross waste which has characterized the program, and I must point out that if we can afford billions to assist the economic recovery of foreign nations, we can afford a reasonable amount of money to assist the building industry, the farmers, to provide slum clearance and urban renewal, to fight unemployment, and to aid the business climate of the United States and to help big business, through protecting the American markets for products which they manufacture.

I, therefore, will vote "no" on the foreign aid authorization bill for 1960.

Mr. EDMONDSON. Mr. Chairman, one of the great tragedies of our time is the waste of American surplus food in a world in which one-half of the people go to bed hungry every night of the year.

That tragedy is compounded by the strange fact that we pay out more than a billion dollars a year for storage and related costs of handing this surplus food.

It is literally true that we could give away much greater portions of this food surplus, to the hungry people both inside our own country and abroad, and save money in the process.

In recent years we have made progress toward a more intelligent disposal of this great food surplus, which is one of the richest blessings our country enjoys. Millions of American children, and additional millions of people all over the world, have benefited through our surplus food disposal programs.

The amendment offered by the gentleman from Iowa is an attempt to take a further step toward intelligent and effective use of this great weapon for peace—America's food surplus.

Most of the objections made to the proposal are either technical or haggling in nature; there is no real heart in the opposition to this amendment, and no real reason for the opposition, either.

I hope the amendment will be adopted, and commend its author for the fight he has consistently waged to use America's surplus food in the cause of peace.

The CHAIRMAN. If there are no further amendments, under the rule the Committee rises.

Accordingly, the Committee rose; and the Speaker having resumed the chair, Mr. MILLS, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 11510) to amend further the Mutual Security Act of 1954, as amended, and for other purposes, pursuant to House Resolution 502, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The question is on the amendments.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time and was read the third time.

The SPEAKER. The question is on the passage of the bill.

Mrs. CHURCH. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentlewoman opposed to the bill?

Mrs. CHURCH. I am.

The SPEAKER. The gentlewoman qualifies. The Clerk will report the motion.

The Clerk read as follows:

Mrs. CHURCH moves to recommit the bill H.R. 11510 to the Committee on Foreign Affairs.

The previous question was ordered.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

Mr. GROSS. Mr. Speaker, I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken and there were—yeas 243, nays 131, not voting 57, as follows:

[Roll No. 54]

	Burleson	Diggs
	Coffin	Dowdy
Evins	Lipscomb	Rains
Fenton	McGovern	Roberts
Fisher	McIntire	Rogers, Tex.
Gavin	Mack	Rooney
Grant	Mason	St. George
Hays	Meader	Saund
Hébert	Mitchell	Sisk
Holland	Monagan	Taylor
Horan	Montoya	Teague, Tex.
Jackson	Morris, N. Mex.	Thompson, La.
Johnson, Colo.	Moulder	Withrow
Keogh	Norblad	Young
King, Utah	Oliver	
Lafore	Powell	

So the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Hébert for, with Mr. Brock against.
Mr. Keogh for, with Mr. Fisher against.
Mr. Rooney for, with Mr. Dent against.
Mr. Roberts for, with Mr. Barden against.
Mr. Auchincloss for, with Mr. Withrow against.
Mr. Fenton for, with Mr. Lipscomb against.
Mr. Bass of New Hampshire for, with Mr. Alger against.
Mr. Derounian for, with Mr. McIntire against.
Mr. Horan for, with Mr. Gavin against.
Mr. Mitchell for, with Mr. Moulder against.
Mr. Rains for, with Mr. Bonner against.
Mr. Sisk for, with Mr. Dowdy against.
Mr. Davis of Tennessee for, with Mr. Andersen of Minnesota against.
Mr. Evins for, with Mr. Mason against.
Mr. Montoya for, with Mr. Young against.
Mr. Morris of New Mexico for, with Mr. Burleson against.
Mr. McGovern for, with Mr. Grant against.
Mr. Holland for, with Mr. Rogers of Texas against.
Mr. Monagan for, with Mr. Thompson of Louisiana against.

Until further notice:

Mr. Oliver with Mr. Lafore.
Mr. Powell with Mr. Jackson.
Mr. Diggs with Mr. Norblad.
Mr. Saund with Mrs. St. George.
Mr. King of Utah with Mr. Taylor.

Mr. COOK, Mr. BAILEY, and Mr. BECKER changed their vote from "yea" to "nay."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. MORGAN. Mr. Speaker, I ask unanimous consent that all Members may extend their remarks in the RECORD on the mutual security bill.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

INCOME TAX TREATMENT OF NONREFUNDABLE CAPITAL CONTRIBUTIONS TO FEDERAL NATIONAL MORTGAGE ASSOCIATION

Mr. MILLS submitted a conference report and statement on the bill (H.R. 7947) relating to the income tax treatment of nonrefundable capital contributions to Federal National Mortgage Association.

INCOME TAX TREATMENT OF CERTAIN DEALERS' RESERVES

Mr. MILLS submitted a conference report and statement on the bill (H.R.

8684) to provide transitional provisions for the income tax treatment of dealer reserve income.

PROCEDURE FOR ASSESSING CERTAIN ADDITIONS TO TAX

Mr. MILLS submitted a conference report and statement on the bill (H.R. 9660) to amend section 6659(b) of the Internal Revenue Code of 1954 with respect to the procedure for assessing certain additions to tax.

DISPENSING WITH BUSINESS IN ORDER ON CALENDAR WEDNESDAY OF NEXT WEEK

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the business in order on Calendar Wednesday of next week be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

ADJOURNMENT OVER

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

WASHINGTON METROPOLITAN PROBLEMS

Mr. McMILLAN. Mr. Speaker, I ask unanimous consent that the Committee on Rules be discharged from further consideration of the concurrent resolution (S. Con. Res. 101) authorizing public hearings and recommendations on the bills S. 3193 and H.R. 11135, by the Joint Committee on Washington Metropolitan Problems.

The Clerk read the concurrent resolution as follows:

Resolved by the Senate (the House of Representatives concurring), That the Joint Committee on Washington Metropolitan Problems, created by House Concurrent Resolution 172, agreed to August 29, 1957, is hereby authorized to hold public hearings on the bills S. 3193 and H.R. 11135, and to furnish transcripts of such hearings, and make such recommendations as it sees fit, to the Committees on the District of Columbia of the Senate and House of Representatives, respectively.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

FEDERAL EXCISE TAX ON LONG-DISTANCE TELEPHONE CALLS

Mr. LANE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. LANE. Mr. Speaker, the Federal excise tax on long-distance telephone calls is a continuing, discriminatory and deceitful penalty imposed upon business enterprise and individual convenience.

When this tax was levied by Congress during World War II, it was understood that it was an emergency measure for the purpose of increasing revenues and conserving materials that were needed for the war effort. Everyone agreed that this tax was necessary as long as the war should last. By the same token, it was expected that this levy would be discontinued as soon as possible, once the war was over.

For 15 years, however, this temporary tax has continued, thereby restricting the development of a communications system that is essential to service the expanding needs of our people and our economy.

In the United States, the telephone is a business and social necessity. A second telephone is being used in the kitchens of many American homes for the handy use of the busy housewife. Outdoor telephone booths are becoming a familiar sight on city streets and country highways to serve the general public at any hour of the day or night.

As Members of Congress, we would be unable to service the needs of our constituents without the availability of an efficient telephone service. Fortunately, we are provided with an allowance for this purpose. But if we had to pay for these toll calls out of our own pockets, we would immediately feel the financial hurt of the excise tax and would repeal it forthwith. It mystifies me why this tax is still in effect when there is no justification for it.

The American Telephone & Telegraph Co. paid Federal, State, and local taxes on its operations during 1959, totaling $1,690,289,000. These taxes averaged $3.39 per telephone per month.

In addition, telephone users paid directly some $600 million in Federal excise taxes. This is double taxation with a vengeance, and not counting the triple taxation on a stockholder-user.

With the surplus of $4 billion that is anticipated by the U.S. Bureau of the Budget, it is clear that the wartime telephone excise tax is now a matter of habit and not necessity. Its repeal will mean that the Federal Government will still enjoy a substantial surplus of revenues over expenditures.

We must caution the States that the Congress does not intend to remove this tax so that State legislatures may reimpose it for their own purposes. Businessmen and individuals alike must have relief from the punitive excise tax on local and long-distance service.

I have introduced a bill to remove the Federal excise tax on all telephone service, effective July 1, 1960.

I believe that the lifting of this burden will be of direct benefit to every business enterprise and to most individuals.

MY FRIEND DICK NEUBERGER

Mr. PORTER. Mr. Speaker, I ask unanimous consent to extend my remarks in two instances in the body of the RECORD and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

Mr. PORTER. Mr. Speaker, my friend and coworker from Oregon, Senator Richard L. Neuberger, died March 9, 1960. It is not easy for me to realize that he is in fact gone from this earth. So many of our mutual projects continue to come to my attention. I miss his wise counsel and friendly cooperation.

Dick's great public services are fully discussed in the editorials and articles which follow these remarks. I am going to record here a few personal facts about my friendship with him.

Long before I met Dick I had heard about him. I was a student in Woodrow Wilson Junior High School in Eugene when he was a student under WAYNE MORSE, among other professors, at the University of Oregon. I knew of him as a fearless, brilliant editor of the Oregon Daily Emerald, the student newspaper.

Later when I came home from college in the east I would talk about Dick Neuberger's latest exploits with Bill Tugman. longtime editor of the Eugene Register-Guard and more recently editor-publisher of the Port Umpqua, Reedsport, Oreg., Courier.

"Dick ought to get married," Bill often told me. This was his solution, in part anyway, for Dick's many and in his opinion somewhat outrageous crusades. Later Dick met and married a schoolteacher by the name of Maurine Brown. Then two crusaders fought together for what they believed right.

Like millions of Americans, I read Dick's articles in many of the leading national magazines. We bought some of his books for our oldest boy, Don. He found them fascinating.

Late in 1951 my work with the American Bar Association's Survey of the Legal Profession, with headquarters in Boston, came to a close. Malcolm Bauer, a friend from the days when he was a reporter on the Eugene Register-Guard, was in Cambridge as a Nieman fellow. He told me that Dick Neuberger and Monroe Sweetland were the leading Democratic politicians in Oregon.

I wrote Dick a letter and received a very friendly response. When I returned to Oregon, Dick and Maurine surprised me by having Oregon's leading Democrats over to their home in Portland and all in my honor. Dick's conversation then, as always, showed his wealth of pertinent data, his keen analytical powers, and his deep concern for the people involved.

In 1952, during the Presidential campaign, my law partner in Eugene was forced, by angry Republican clients of his, to sever his connections with me because of an incident involving my public protest about the Vice Presidential Republican candidate and his private fund. This action made Dick Neuberger indignant. He offered his personal assistance as a member of the State legislature.

In 1953, as I was beginning to establish my law practice, Dick decided he would run for the U.S. Senate. It was a

gamble, despite the support of his many friends and admirers. The incumbent, Senator Guy Cordon, was no pushover.

That spring my wife, Priscilla, and I were driving back from Portland one day. The discussion turned to how I could help Dick. I had been planning to run for Congress ever since the eighth grade. That was the year the mortgage was foreclosed on my folk's home and the year I read Lincoln Steffens' autobiography.

Priscilla and I concluded that I could best help Dick by filing for the Fourth District seat, although this was 2 or 4 years ahead of my personal timetable.

Dick and I did a lot of campaigning together. I never stopped admiring his tremendous learning, his quick mind, and his real humility. It was a wonderful apprenticeship for me as a politician.

I lost by 15,000 votes in 1954 but came closer than any Democrat had done in previous contests. Dick won, after 2 days of anxious tallying, by around 2,000 votes, about one vote for every Oregon precinct. Great was the rejoicing. He was the first Democratic Senator from Oregon in 40 years.

When I ran again in 1956 Dick stumped my district and helped me in many ways. This time I won by 4,500 votes, the first Democratic Congressman from southwestern Oregon in 75 years. The help given to me by Dick, by WAYNE MORSE, and by many others made the difference.

No man ever gave more of himself to his friends than did Dick Neuberger. When I came to Washington, D.C., in December of 1956, Dick gave me and my staff working space in his office for 2 weeks prior to the swearing in of the new Congress. It was a typical unselfish gesture for him.

During the rest of the time I was to work with Dick in the Congress for Oregon and the Nation, I came to appreciate his friendship even more.

We kept in close touch by telephone. Sometimes I walked over to the Senate to talk with him or to have lunch. It was a collaboration I enjoyed, greatly valued and will always cherish in my memory.

Three days before Dick was stricken he called me from Portland. We talked for about 20 minutes. He told me he planned to remain in Oregon until after the Easter recess. With real concern, I told him, "Take care of yourself." He said he would and not to worry and added, as he always did, "Give our love to Priscilla and the children."

Four days after that conversation Dick was dead. He left us a rich heritage of a superb mind and a warm heart. He never thought of himself as a "big shot." He was always willing to grant, "I may be wrong." Service in public office to Dick was a privilege, a duty and a challenge.

The Lord gave me, and many others, a good friend in Dick Neuberger. The example of his life, so well attested in the following articles, serves as a standard and an inspiration to all of us who seek to carry on his enlightened devotion to our great Nation and its system of self-government.

Mr. Speaker, if I have been overly personal in these remarks about my friend Dick Neuberger, it is because his death was a very personal loss to me. Some people come to Washington to grow, others to swell, according to a well-known adage. Dick grew. His friends were many. I thank God that I was one of them.

[From the New York Times, Mar. 10, 1960]

RICHARD L. NEUBERGER

When the tall young man from Oregon took his seat for the first time in the U.S. Senate on January 3, 1955, he was far better known throughout the country as a writer and crusading conservationist than as a political personality. When untimely death took him yesterday at the age of 47 his extraordinary qualities of mind and heart and spirit had achieved for him in those 5 short years a secure eminence of stature as a Senator.

It is difficult to write of Richard L. Neuberger in the past tense. His enthusiasm and sincerity, his undeviating conscience and his high sense of public service combined to make him not only one of the most respected Members of the Senate but also one of the most useful and most vital. His powerful pen and his persuasive voice gave life and point to many issues—notably improvement of the legislative process and preservation of this country's dwindling natural and scenic resources—that brought him into conflict with interests that a lesser politician would have been afraid to offend.

One of his current projects dearest to Senator Neuberger's heart was enactment of legislation to establish as a national seashore preserve, a magnificent stretch of Pacific beachland in his native State, known as the Oregon Dunes. No more fitting tribute could be paid him by the Congress and the people of the United States than to adopt the Neuberger bill that would set aside forever this area in memory of a fine legislator and great outdoorsman who was determined that future generations should share in the great natural heritage of this country that he knew so well and loved.

[From the New York Herald Tribune, Mar. 10, 1960]

SENATOR NEUBERGER'S UNTIMELY DEATH

The death of Richard Neuberger is particularly poignant. A man in his vigorous and youthful prime, the junior Senator from Oregon had recently recovered from an operation for cancer. The malignancy had been arrested, and he was preparing to run for reelection in the fall. Moreover, he had been for many years a tireless advocate of greater Federal spending on medical research both on the floor of the Senate and in the press.

Senator Neuberger was a man steeped in the tradition of Western liberalism, a tradition which can boast many famous names in American political history. But his style was entirely his own—freewheeling, outspoken, dedicated, sometimes even brash, although the brashness gave way to a reflective maturity in the last few years. And the fact that he was Oregon's first Democrat elected to the Senate in 40 years speaks loudly for his personal magnetism and for the reality of his representation. His is a most regretted loss to the Northwest and to American public life in general.

[From the Washington Post, Mar. 10, 1960]

RICHARD L. NEUBERGER

The Senate has lost an extraordinarily useful, constructive, and independent-minded Member in the death of Richard L. Neuberger, of Oregon. There is extra pathos to Senator Neuberger's death in that he had apparently withstood a long siege with cancer little more than a year ago and had sought renomination in the Democratic primary, only to fall victim of a cerebral hemorrhage.

Always a liberal by conviction, Dick Neuberger was a provocative and controversial figure when in 1954 he became the first Democratic Senator elected from Oregon in 40 years. He had been a prolific author on political science subjects as well as about his beloved Northwest, and he had constituted a team with his attractive wife, Maurine, in the Oregon Legislature. If he wore his principles on his sleeve and tended a bit toward prudishness when he came to Washington, he soon rejected the doctrinaire approach. He was as ready to oppose what he regarded as the preconceived notions of his liberal friends as to strike at entrenched reaction.

The result was that he was regarded with respect and affection even by those he opposed, and his analytical quality sometimes provided a catalyst in the Senate. Particularly after his cancer operation he developed a rare humanitarian gentleness, manifested in his personal relationships as well as in his interest in health legislation. One of his great regrets was the feud prosecuted by his Oregon colleague, Senator MORSE. Withal he was a man of much courage, not hesitating to criticize ethical standards in Congress and to stand up virtually alone when he thought he was right.

Dick Neuberger contributed significantly to the popularizing of conservation and enlightened resources development, to intelligent discussion of political structure and to such specific measures as the bill to save disappearing shorelines and the billboard ban on interstate highways. He served his State and country with integrity and devotion which were appreciated in Oregon as well as in Washington. His wife, who shared his views and worked closely with him, would make an admirable successor in the Senate.

[From the St. Louis (Mo.) Post-Dispatch]

SENATOR NEUBERGER

The untimely death of Senator Richard L. Neuberger, of Oregon, deprives not only his State but the Nation of a valuable public servant. At 41 the journalist and student of politics made political history himself by becoming Oregon's first Democratic Senator in years; and it was his election that switched the Senate majority from Republican to Democratic after 2 brief years of the Eisenhower administration. He quickly proved himself a stalwart liberal though not a doctrinaire Democrat; he consistently supported the administration on foreign policy issues, fiscal, and monetary policy. Then, a little over a year ago, cancer struck him down. He recovered sufficiently to return to Washington for a time, devoting himself appropriately to the fight for funds for medical research. Yet now at 47 a cerebral hemorrhage has ended a promising career. The best measure of his quality is that after winning election in 1954 by the narrowest of margins he was entering this year's campaign with virtually no opposition to his reelection. The Nation will miss him.

[From the Chicago Sun-Times, Mar. 11, 1960]

DEATH'S SECOND CALL

The face of death was no stranger to Senator Richard L. Neuberger. He had gazed into it in 1958, when he was informed he had cancer and that the cancer had spread.

"In those first hours," the Senator reported later in Harper's magazine, "I never thought of my seat in the Senate, of my bank account, or of the destiny of the free world. I worried over my cat, Muffet. Who would take care of him? What would happen to my wife when I was gone. And how would it feel to die?"

He never knew; he never emerged from the coma that followed a cerebral hemorrhage that struck him on Tuesday afternoon. But he had meanwhile learned something else: how to conquer fear, how to fight back against grim odds, how to accept the sudden, devastating proof of mortality and go on from there. Not even death could take that away from Dick Neuberger.

[From the Chicago Daily News, Mar. 11, 1960]

SENATOR NEUBERGER

Sometimes one might think it was a rule of the universe that the average man may accomplish only so much in a lifetime. Most of us struggle along to our 3 score and 10 without more than a small fraction of the achievements of U.S. Senator Richard Lewis Neuberger, Oregon Democrat, at his untimely death this week at 47.

As a member of the Oregon Legislature at 29, a prolific writer, lecturer, historian, world traveler, dedicated proponent of conservation, his flame burned brightly while it lasted.

His service in the U.S. Senate, beginning in 1954, was complicated by the rancorous attacks of his senior colleague, WAYNE L. MORSE. In this, as in other matters, he conducted himself with dignity and competence. He will be remembered as a superior man.

[From the Northern Virginia Sun, Mar. 10, 1960]

A SYMBOL OF YOUNG COURAGE, INTELLECT: SENATOR RICHARD NEUBERGER

The sudden, tragic death of Oregon's young Senator, Richard Neuberger, will be mourned far beyond the borders of his native State. For the things that Dick Neuberger fought for hold a special value and a higher meaning for mankind everywhere: human rights and the betterment of the lot of his fellow men.

A successful writer, Democrat Neuberger was attracted to politics by his admiration for the late George W. Norris, Nebraska's Republican liberal Senator. Together with his wife, Maurine, he served in the Oregon Legislature as the lone Democrat in a Republican State senate. He was the first Oregon Democrat to be elected to the U.S. Senate since 1914. But Dick Neuberger was a Democrat in the broader sense and so well did he serve his State that he was facing no serious opposition in his forthcoming reelection.

It was only a few months ago that he was assured he had conquered the cancer for which he had been operated on in 1958. His personal struggle against this dread disease won him respect and admiration throughout the Nation and he used his own experience and his position as Senator to campaign successfully for vastly increased medical research.

Following his cancer operation, he wrote: "A brush with cancer tends to place many things in true perspective * * * old antagonisms fade away. I can no longer transform political disagreements into any feelings of personal malice. When one is grateful to be alive, it is difficult to dislike a fellow human being."

For many Americans, Senator Neuberger symbolized young courage and intellect and a dedication to his convictions that were in the highest traditions of political democracy. He was also a vigorous advocate for conserving the Nation's natural resources and Senator MIKE MANSFIELD's announcement of a bill to name the proposed Oregon Dunes National Park for Senator Neuberger would seem a fitting tribute to the memory of a courageous heart who, in the words of Mr. MANSFIELD, was "a star whose light remains."

[From the Northwest Ruralite, April 1960]

NEUBERGER

By the time you read this, the shock, the memorials and the outcry over the passing of Oregon's Senator Richard L. Neuberger will be, in considerable measure, things of the past.

But the sense of loss will remain for some time, partly because Mr. Neuberger, like F. D. Roosevelt, had a gift for making himself known to thousands on a deeply personal basis.

In the next few weeks, the loss will be felt in a number of practical, everyday ways. He was the principal Senate champion of the regional power corporation bill, the destiny of which he was carefully guiding through the Congress. From his key position on important Senate committees, he was uniquely fitted to find the difficult answers to issues between power and fisheries, between upriver and downriver interests.

The patient statesmanship required to save the public interest in matters of resource development is an exercise taxing of the greatest energies. Many will remember how Senator Neuberger took the time out to barnstorm his State in a series of debates over a proposed partnership sellout of the John Day Dam, and how he won.

The skills and abilities to do these things are rare.

[From the Philadelphia Bulletin, Mar. 11, 1960]

THE MAN WHO GREW

It is a tragic loss to the country that a man like Senator Richard Neuberger, of Oregon, should have been fatally stricken when he was only 47 years old, and when he had apparently won a long and hard battle against cancer.

Neuberger was a man who grew with every day's experience in public life. A dozen years ago he was an editorial writer with a crusader's zeal. To him then everything seemed either black or white. But his experiences in politics, and particularly after he went to Washington, led him to see that on most issues there were only varying shades of gray. His views were greatly tempered through his contacts with men of different opinions and he was quick to take advantage of their knowledge.

Those who knew him well found him a better companion and far more interesting than when he was so violently partisan on many public issues. His untimely death has taken from the Senate a man with unusual promise.

[From the Washington Teamster, Mar. 11, 1960]

DICK NEUBERGER'S FINAL REMARKS—AN OPPORTUNITY TO SERVE

"Why not utilize the enthusiasm and talents of American youth to help sell democracy abroad? Representative HENRY REUSS, of Wisconsin, has introduced legislation to help accomplish this purpose. He proposes a nongovernmental study of the advisability and practicability of establishing a point 4 Youth Corps through which young men and women might serve around the world in U.S. technical cooperation programs. I have introduced identical legislation in the Senate.

"Such a program could well be a powerful force for increased world understanding. It would add manpower to carry out economic programs in underdeveloped nations, personally acquaint citizens in other lands of American ideals and aspirations, and provide American young people with an opportunity to serve their country in a stimulating fashion. One of the questions to be considered in the suggested study is whether service in the corps should be considered as satisfying military service obligations. In the current cold war, we need persons with the ability to set up a rural school in the jungle as well as those with knowledge of how to operate a machinegun. How could we better explain the United States and its desire for world peace than through sending to aid needy nations our most valuable commodity—our youth."

The above paragraphs are excerpted from what will probably be the last edition of "Washington Calling," volume 6, No. 9, a column to the Oregon constituents of the late Senator Richard L. Neuberger. He passed away early Wednesday morning at age 47.

Not only will your editor of the Washington Teamster miss Dick Neuberger as a friend in the writing trade, but the State of Oregon, and indeed, the Nation will be the worse off for his untimely demise.

He was on his sixth year in the Senate and gearing for reelection. His love of Oregon and the whole Pacific Northwest is reflected in his abundant writings and his progressive voting record in Congress.

We certainly don't advocate that Congress can stand more journalists in its hallowed Halls, but we do believe that Neuberger was a credit to his first profession and a real champion in every sense of the word for his home State. He loved its people, cities, towns, and hamlets; its whistling winds on the hillsides; its ever-changing climate, beauty and native warmth.

And as an Oregonian he was a good neighbor to Washington. Best of all, he was a true friend of the workingman and his family.

[From the Washington Daily News, Mar. 10, 1960]

MAN WHO DIDN'T COME BACK

(By Ed Koterba)

It was as he had left it 6 weeks before. It was a private office desk laden with impedimentia that told much of his character—the tiny statue of Thomas Jefferson, the 4–H emblem fused into a glass paperweight, the little felt donkey, the loaded desk calendar wtih speaking dates into April, and the books he had read or left unread.

This man of 47 years had no reason to believe he wouldn't return from Portland to his senatorial office soon, despite the words in the eulogy by Oregon's other Senator that "Dick Neuberger knew death was not long away * * *."

The heavy leather desk chair of Richard L. Neuberger was symbolically turned toward his typewriter, a machine rarely found in the private office of a U.S. Senator.

He was a prodigious writer. After his cancer operation, his staff knew he must rest. They rolled in a long black leather couch and set it in his room behind the desk.

And now Mary Jane Cox, his receptionist, was saying: "He never used it. * * * Instead of resting, he'd be at the typewriter."

Under the glass top the Senator had slipped a solitary entry, a billfold-size picture of an attractive woman, with her name typed in capital letters in the bottom margin, Maurine.

Along the wall there were the customary celebrities with penned personal notes, but the prominent spots went to his family. There was a picture of two of his nieces and one of the family cat, Muffet, a Manx.

Even for those who simply passed by room 115 there was a strong display of his personality, his philosophy. He had fought to save the vast resources of the Northwest's great outdoors, and there on the outside door hung a framed color photograph of Mount Hood with long-stemmed pink rhododendrons in the sloping foreground.

The book on the center of his desk remained as he had closed it—"America's Wonderland—The National Parks." It was one of the last books he had reviewed for the New York Times.

Strangely enough, what Senator Neuberger would not have been able to do in life he was able to accomplish in death. He had stayed—at least, temporarily—the harangue and anger of a Chamber torn against itself.

For 3½ hours the men and a lady of the Senate laid aside the bickering on civil rights to praise, as one, the works of the colleague who had now gone on to other things. And then they adjourned.

The sudden passing of Senator Neuberger also brought to an end the personal and painful assault against him by the colleague of his own State.

Now Senator WAYNE MORSE droned on in eulogy for 25 minutes. Before closing, however, Senator MORSE observed that when Dick Neuberger left Washington for a rest in Portland the young Senator must have felt he would never return—that he was going to die soon.

But even in death Senator Neuberger disagreed with the senior Senator from Oregon.

For on the Senator's date calendar stands this entry: "Talk on cancer, luncheon, Friday, April 1, Philadelphia."

[From the Trainman News, Mar. 14, 1960]

HE WILL BE MISSED

Senator Richard L. Neuberger's untimely death at the age of 47 represents a deep loss for the entire Nation. He was a battler for justice for all who make up our citizenry.

A dedicated proponent of liberalism, he also could be depended upon to do his utmost to bolster the welfare and advancement of the little fellow.

The Oregon Democrat many times was found on the firing line for organized labor. He delivered his abilities to other causes which to him represented a sense of fairness.

Senator Neuberger will be missed on the national scene.

[From the Watertown (N.Y.) Daily Times, Mar. 10, 1960]

RICHARD L. NEUBERGER

The able newspaperman who became Oregon's junior Senator, Richard L. Neuberger, died unexpectedly early today at his home in Portland, Oreg. Having won sensationally in 1954 as a Democrat from a Republican State, Senator Neuberger had filed only last week his intentions of seeking reelection. He suffered a cerebral hemorrhage following several weeks of illness when he had been beset by a series of virus infections.

At the age of 47, Senator Neuberger has been a most wholesome influence during the last 6 years of his life as a U.S. Senator and also in the 20 or so years before in which he was a prominent writer for newspapers and magazines. His interests primarily were in the conservation of natural and human resources. As a resident of the Far West, he believed sincerely in the public protection of the forests, the waters and the growing foods, whether they were on land or the fish of the seas. His writings on these subjects, as well as his advocacy of these conservation matters in the U.S. Senate, will be of great value as the years go on in the development of a sound conservation policy.

As a believer in the public's ownership of the resources, he was particularly effective in publicizing the hydroelectric power developments of the Northwest. He was a strong advocate of the public development of atomic energy. He genuinely considered that the American citizen had the primary right to enjoy the huge power resources of the Nation.

The fact that he was a writer made him particularly articulate. Thus, he conveyed in terms that people could understand effectively the story of this Nation's resources. Unfortunately for him, he was not old enough in the 1930's to be a part of the huge governmental resource programs of that day. Many had been undertaken and even completed before he was old enough to work in their behalf. Yet, he was able to appreciate, after the development, their importance to the American people, and, thus, write ably about them in proposing programs which are yet to come. The things that he has been writing and saying since World War II will come to pass as the years go on and they will take place because of what he did and how he wrote before his death.

[From IUE News, Mar. 14, 1960]

NEUBERGER MOURNED BY IUE

When Senator Richard L. Neuberger, Democrat of Oregon, died last week of a cerebral hemorrhage the labor movement "lost an invaluable friend, counselor, and brother," IUE President James B. Carey wrote Mrs. Neuberger.

(As a long-time member of the American Newspaper Guild, AFL–CIO, Neuberger was a fellow unionist.)

The widow of the man mourned by the Nation's workers, whose welfare he served with unique idealism and selfless devotion, is expected to pick up where her crusading husband left off.

However, she will not be able to fill out her husband's term. Although recommended by the State Democratic organization, Mrs. Neuberger will not be appointed by Oregon's Republican Governor. Governor Hatfield has said he will not appoint anyone who is an active candidate for the full term.

Mrs. Neuberger, who bulit up a distinquished record during three terms as a State representative, will be a candidate for the Democratic nomination.

Carey wrote the Senator's widow: "More than words can convey, I feel a deep personal loss in Dick Neuberger's death; and the Democratic labor movement, I know, must also feel a sense of personal bereavement.

"Dick's passing is a tragic loss for the U.S. Senate and for the American people, particularly the Nation's working men and women whose welfare he served with unique idealism and selfless devotion.

"Dick surely was one of the most sensitive and articulate liberals of our time, but most important this liberalism was animated not only by logic, reason, and vision, but also by a pervading compassion and humanitarianism. He was his brother's keeper and he loved his fellow man, as his writings so frequently revealed. He felt a debt not alone to his country and to the world he lived in, but also to the generations to come—the children, the men and women who will inherit the world we build. * * *

"We of the labor movement have lost an invaluable friend, counselor, and brother. The Nation has lost a superb leader endowed with the rarest qualities of heart, insight, and devotion to justice, human dignity, and the brotherhood of man.

"Dick Neuberger made our world a finer and more promising place to live in; his departure from our ranks should inspire us to more vigorous advocacy of the causes of fraternity and economic democracy to which he devoted his fertile mind and great heart."

[From the Enginemen's Press, Mar. 18, 1960]

OREGON'S LIBERAL NEUBERGER DIES

PORTLAND, OREG.—Senator Richard L. Neuberger, long a supporter of liberal legislation and an ardent backer of equal rights for the laboring man, died of a cerebral hemorrhage at his home on March 9, 1960.

Neuberger made political history in 1954 when he became the first Oregon Democrat to be elected to the U.S. Senate since 1914 and the feat sparked a Democratic upsurge in the State.

Neuberger has backed every liberal piece of legislation to come before the Senate since his election in 1954. In this respect his voting record has differed little from that of his senatorial partner from the State of Oregon, WAYNE L. MORSE. Both were extremely liberal and only in the field of foreign policy did MORSE and Neuberger differ. Vice President, National Legislative Representative A. M. Lampley, upon hearing of Senator Neuberger's death said, "He was one of the finest men in the U.S. Senate. You could always depend upon this man being on the liberal side of every issue. At no time in his senatorial career was he found wanting when legislation designed for the workingman was before that body. His leadership will be sorely missed by those of us who learned to respect him as a man dedicated to the service of his fellow men." Neuberger served as a member of the Oregon State Senate from 1949 until 1954 when he was elected to the U.S. Senate. Before that time he worked as a newspaperman and his articles and books have been widely published.

Senator and Mrs. Richard Neuberger had often been described as a political team. He, himself, referred to her as "the better half of his senatorial team." She is a proven votegetter and probably this accounts for the fact that many influential Democrats are anxious to have her appointed to serve out the unexpired term of her husband. She has indicated that she would do so. Under Oregon law, the Governor must appoint a Democrat to serve in the interim until the coming November elections.

[From the International Woodworker, Mar. 23, 1960]

RICHARD L. NEUBERGER

Oregon's late Senator Richard L. Neuberger was a man of many talents and skills. He was determined and forthright in his beliefs. His untimely death is a loss not only to the people of Oregon, but to the Nation and to his many friends abroad.

He was grossly criticized by some Republican political hacks for articles that he had published in the leading magazines of this country. Yet the fact that he was well known and highly regarded as a writer lent a great deal of support to the validity of the positions he took on many matters before the Senate.

It is safe to say that on some issues before the Senate he probably wrote more informed articles about the legislation to be considered than many of his less-informed colleagues ever read about the subjects.

No one could ever have accused Senator Neuberger of simply having an "intellectual veneer," for his writings proved his depth of understanding and profound knowledge and sympathy for his fellow man.

Neuberger knew Oregon better than many of us know the palm of our hand. Knowing Oregon, he knew its great needs in the areas of conservation and development of its natural resources.

He had the vision to transmit the needs of today into the planning for tomorrow.

There could be no more appropriate tribute to this man than to rename the John Day Dam now being constructed on the Columbia River as a lasting memorial to Senator Richard L. Neuberger who during his lifetime believed in and worked toward the full development of the Columbia River basin for the benefit of all the people.

[From the Cleveland Plain Dealer]

SENATOR NEUBERGER'S DEATH CUT OFF PROMISING CAREER

The untimely death of Senator Richard L. Neuberger of Oregon came at a period of his career when he was at the brink of emerging as a potent Senate force.

He had spent 5 years in Congress and at first may have been looked upon by some as a bit too vocal for a newcomer.

But the Senator was gaining in his own perspective, learning from experience. He even had broken with his old mentor, Senator WAYNE MORSE—an event which alone improved his stature. Moreover, he was in fact highly knowledgeable, particularly on conservation. His views on that subject were highly regarded.

Had he lived to be reelected this year—he was an odds-on favorite—he might have become one of the true stalwarts of the Senate. He had the intellect and despite serious illnesses, a tremendous vitality.

His change in thinking was illustrated last year when he wrote this:

"A brush with cancer tends to place many things in true perspective. Old antagonisms fade away. I no longer can transform political disagreement into any feelings of personal malice. When one is grateful to be alive, it is difficult to dislike a fellow human being."

There, in a paragraph, is a cue for many of us—and especially for the Senator's lawmaking comrades, whether they be flaming liberals or otherwise.

[From the International Woodworker, Mar. 23, 1960—Reprinted from the Toronto, Ontario, Canada, Globe and Mail]

SENATOR NEUBERGER KNEW, CARED ABOUT CANADA

Senator Richard L. Neuberger, who died in Portland, Oreg., was a true friend of Canada.

It was his belief that ties between this country and the United States were so close and unquestioned, both in war and in peace, that nothing should be done to strain them. He took the trouble to visit Canada—not once, but many times—in determined attempts to understand our people, our problems and our complaints against the United States.

He praised the Canadian family allowance program as a great social experiment for the United States to study and copy; and at one time advocated formation of a police force modeled after the Royal Canadian Mounted Police to protect the voting rights and lives of Negroes in the Southern States.

He was one of the first to offer a resolution in the U.S. Senate to create a joint Senate-House of Representatives committee to study Canada-United States relations.

Not all Mr. Neuberger's suggestions were acceptable to Canadians. His bill calling for joint action by the two countries to pave the Alaska Highway was coolly received in Ottawa; and Canadians were incensed by his suggestions that the two countries join together to form one great North American community.

But Mr. Neuberger did care something about Canada, and he did know something about Canada—which is more than could be said for many or most of his colleagues in Washington.

[From the Intermountain Jewish News, Mar. 18, 1960]

ADL, AMC MOURN SENATOR NEUBERGER

The Anti-Defamation League has lost a good friend and B'nai B'rith member and the Nation a great statesman. So said Sheldon Steinhauser, ADL regional director, who voiced the shock and regret of ADL leaders at the sudden passing of Senator Richard L. Neuberger at 47.

Funeral services were held Sunday at Temple Beth Israel in Portland. One thousand five hundred attended.

Senator Neuberger's last appearance in Denver, November 15, 1959, was to speak at the American Medical Center Eleanor Roosevelt Cancer Institute and at ADL's "Torch of Liberty" award dinner. He was accompanied by his wife, Maurine, a candidate for his Senate seat.

IGNORED INJURY

Unknown to all but a handful of ADL leaders, the Senator's very presence in Denver was an example of his courage and refusal to permit his health to interfere with his championing of causes which were important to him, said Steinhauser. The Senator had suffered a painful injury only a week before the meeting but insisted upon fulfilling the commitment although encased in a heavy brace to protect several fractured ribs.

Steinhauser recalled the Senator's obvious sincerity in urging the 400 ADL leaders to maintain a steady fight on behalf of the rights of mankind. "The history of the protection of civil rights," Senator Neuberger emphasized, "is one of erosion of resistance through the continuing abrasive action of organized and articulate groups such as the Anti-Defamation League."

LAUDED LEGISLATURE

The Senator praised the Colorado General Assembly as the first legislature to enact a fair housing act.

The use of political anti-Semitism against Senator Neuberger backfired in the 1954 election.

Steinhauser called Senator Neuberger "one of the most dedicated, sincere, and competent champions of civil rights and other liberal and humanitarian causes. His loss leaves a void in public life which will not be easily filled."

AMC REGRETS

The Eleanor Roosevelt Institute for Cancer Research of the American Medical Center lost an avid supporter with the tragic death of Senator Neuberger.

A sponsor of the institution and himself a sufferer of cancer, Senator Neuberger participated in ground-breaking exercises November 16, 1959, for the $2 million institute building.

Leaning heavily on his experience with cancer, he stressed the need for funds to carry out cancer research at an institution such as American Medical Center.

Senator Neuberger was a member of the development committee of the institution headed by Representative JAMES ROOSEVELT.

[From the Birmingham (Ala.) News, Mar. 10, 1960]

RICHARD NEUBERGER

Senator Richard Neuberger was a liberal Democrat, a man avidly interested in government benefiting the people. His position was excessively progressive, often, in our opinion.

But Neuberger had two sterling traits: He possessed unusual personal courage, as witness his determined fight against cancer. Secondly, he believed in people paying attention to politics since politics is the device of the people's government.

He wrote well. His interests were broad. He added something of value to the Senate and to American public life. His death from cerebral hemorrhage properly is cause for sincere mourning.

[From the Aubuquerque (N. Mex.) Journal, Mar. 11, 1960]

SENATOR NEUBERGER

After Senator Richard L. Neuberger, Oregon Democrat, had successfully undergone a cancer operation he so beautifully and touchingly said: "A brush with cancer tends to place many things in true perspective * * * old antagonisms fade away. I no longer can transform political disagreements into any feeling of personal malice. When one is grateful to be alive, it is difficult to dislike a fellow human being."

Neuberger was once an extremely controversial figure in politics. He mellowed with his service in the Senate. Oregon editors also mellowed. Many fought him heatedly in his 1954 campaign. In recent months they had praised him.

At one time Neuberger and WAYNE MORSE, companion Democratic Senator from Oregon, were close friends. It is to Neuberger's credit that he parted with the vindictive MORSE. MORSE once had even threatened to campaign against Neuberger who had announced for reelection and almost without opposition.

Now death suddenly takes Mr. Neuberger, not from cancer but a cerebral hemorrhage. And in the very prime of life. He was 47.

Neuberger was a writer of national fame. He was a spirited liberal but injected logic and fairness into all his political actions and thinking.

He was a champion of Government ownership, particularly natural resources covering water and power projects.

Senator Neuberger's death removes from the scene a distinguished Senator and citizen.

[From the Tarpon Springs (Fla.) Leader]

TRAGIC LOSS OF BRILLIANT LEADER

The death of Senator Richard Neuberger, of Oregon, from a cerebral hemorrhage at the age of 47 is doubly sad because of the Senator's gallant fight, and apparent victory, against cancer.

Since the closing date to file for Senator in Oregon ends tomorrow, Mr. Neuberger's death throws that State into an even greater confusion. So popular was the junior Senator that even the Republicans were entering only token opposition to his candidacy.

But the greater loss is the Nation's. Senator Neuberger had that precious combination of unswerving liberalism and level-headed moderation which kept him from trying to remake all our social and political institutions in a day. There are all too few such statesmen in Washington. The people of every State have lost a wise and good friend.

[From the Locomotive Engineer, Mar. 25, 1960]

LOSS OF A FRIEND

First in the Oregon Legislature and later in the U.S. Senate, Richard L. Neuberger was a warm friend of rail labor.

The Senator was a writer and newspaperman before entering politics in 1940. He served as the New York Times correspondent in the Pacific Northwest.

He wrote many fine travel articles for popular magazines and many of them were good boosts for rail travel.

His death from a cerebral hemorrhage came as an extra shock because of his seeming victory over cancer two years ago.

At 47 he was far too young to die. Although he leaves a splendid record of service, he had much more to contribute.

[From the Eugene (Oreg.) Register-Guard, Mar. 11, 1960]

NEUBERGER'S DEATH CALLED GRIEVOUS LOSS TO OREGON

GARDINER, OREG.

TO THE EDITORS: This is the first time I ever have written a letter to the editor. I hope it may be the last.

In my many years in Oregon, this State has suffered no greater loss than in the death of U.S. Senator Richard Neuberger—at the peak of his public service.

Dick and I differed politically, but we worked together on many occasions and earned each other's respect.

The first of these occasions was the great fight to reduce the compulsory student athletic fees in the bitter depression year 1933; the fee had been $5 per term; Dick and his group asked for a cut to $2.50.

The athletic gang (which had conspired to make Dick editor of the Emerald with the mistaken notion they could control him) balked at any fee cut. A bill was introduced in the 1933 legislature.

Dick, Gene Allen, and Steve Kahn came to my house one evening and asked if I would appear with them the following morning at a public hearing on their bill in Salem; they promised to pick me up at 6:30 a.m. with a car.

The ride to Salem in that old open "Jalopy" was almost as rugged as a trip to the North Pole, but in spite of icy roads we made it in time.

The chairman of the committee, a longtime friend of mine, gave us a courteous hearing, and when it was over—toward noon—we felt we had accomplished a blow for justice. Imagine my surprise when, on my way down the stairs in the old statehouse, I encountered the late Harry Crain, of the Salem Capital Journal.

Harry wanted to know why I was in Salem and when I told him he laughed heartily.

"Bill, you've been suckered, you and those 'kids.' That committee signed a 'do not pass' last night and the House buried the measure this morning while you were in there arguing to the committee."

I dashed back to the committee room and seldom have I blasted any man as I did my friend, the committee chairman (his apologies were very feeble).

On the way home to Eugene, Dick and the boys planned an initiative to repeal the compulsory student fee entirely—and that was done, when we took the case to the voters.

This and other student fights undoubtedly led to the efforts to drive Dick out of the University of Oregon Law School a year later and to the vicious slanders which were propagated 20 years later in the campaign of 1954. It was my privilege to contradict those slanders, knowing the whole story, chapter and verse.

During the last year Senator Neuberger and I worked together for the great Oregon Coast (Dunes) Seashore project—a farsighted program of restoration and conservation which I can only hope will not be impaired by his death.

WILLIAM M. TUGMAN.

[From the Eugene (Oreg.) Register-Guard, Mar. 9, 1960]

DICK NEUBERGER EARNED HIS WAY

Dick Neuberger earned his way to greatness. Oregon's junior Senator, whose life was ended abruptly Wednesday morning at the peak of his public career, was not born to it, did not have it thrust upon him. He earned it, every step of the way, by hard work, devotion to duty, loyalty to friends and an abiding belief in certain principles. This was recognized, even by those who considered themselves his political enemies. Their expressions of regret, which rolled in Wednesday morning, were sincere.

It was not always so with Dick Neuberger. In his legislative career he had enemies aplenty. In the 1954 senatorial campaign he came through with a narrow victory only after putting up with an avalanche of personal abuse. Few men have gone to the Senate with more handicaps. Those who opposed him in the election vowed to oppose him in office, too. That the situation was so different less than 6 years later was a credit to Dick. He turned the other cheek time and time again, demonstrating that he wanted to be a good Senator. By the time of his death even his earlier opponents believed him.

He was a native son, born here, educated here. He lived in Oregon. Washington, D.C., and its heady atmosphere was to him never more than a temporary duty station. Oregon was home. It is significant that in his illness he chose to return to Portland rather than to undergo medical treatment in the capital. He died in Oregon, too, which must have been the place he wanted to die. Anybody who ever sat on a bluff at Ecola State Park with Dick Neuberger and who had watched him enjoy Oregon, with a zestful, positive enjoyment, can understand his affection for his native State.

He always worked hard. At the university, where he was the fiery, unorthodox, controversial editor of the Oregon Daily Emerald, he outworked everybody around him. His personal correspondence was always tremendous. He wrote—letters, magazine articles, speeches, news stories, essays, anything. He would stop writing only when he stopped breathing.

Even with his heavy Senate load, he continued to pour out a volume of writing that would have staggered many a full-time author. His doctors told him to slow down, and he promised he would. He tried, too. But slowing down was the hardest work of all. His friends, those who had known him in more relaxed days, talked among themselves about his overwork, about his ashen color, about his obvious loss of weight. But he continued working, achieving fame and respect.

Through it all he remained a nice guy, always thoughtful, always interested. Childless himself, he maintained a deep interest in students—university students, high school students. He gave up more profitable patronage privileges in exchange for the right to appoint pages in the Senate.

It was neither irreverence nor disrespect that caused his friends Tuesday night and early Wednesday to begin the grim and seemingly callous speculation about his successor. The work of Government must go on. And it was an unfortunate accident of fate that had the Oregon senatorial contest thrown wide open only hours before the legal deadline. This frantic jockeying for position, this swapping of estimates of strength, is something Dick would have understood. There is just nothing else that can be done as the clock ticks toward 5 p.m. Friday.

It will be Oregon's good fortune if we can do as well in finding a successor. Let us hope he is as devoted to duty, as energetic, and as fine a man.

[From the Coos Bay (Oreg.) World, Mar. 9, 1960]

TOO MUCH TO DO IN ONE LIFETIME

Dick Neuberger couldn't turn it off.

Always a man of driving energy and possessor of a bottomless well of ideas, he apparently was unable to adjust his pace to his physical condition after his development of cancer and the long, enervating treatments he underwent in the successful battle against it.

There was simply too much to be done in this world for Oregon's foremost author of ideas and exponent of discussion to be still.

His inability to reduce his pace, to leave off the constant telephoning and writing, discussing and worrying, must in the final analysis have caused his death.

Under the best circumstances, his friends understood, his life expectancy had been cut by the radiation treatments which eradicated the malignancies. But this still meant years of fruitful service to his people—at a normal man's pace. Dick Neuberger was not a normal man when it came to work. And so the expectancy of years was erased.

Neuberger was unusual on the Washington scene. He never found it necessary to become a Washingtonian. If he had represented Oregon in the Senate for 50 years, instead of 5, he would still have been chafing to return to the green hills and sandy shores of his home country. He still would have been irritated at his enforced stay in the Potomac swamp.

I will always recall a luncheon with Dick Neuberger in the summer of 1957—it was the day which the Senate passed the Hells Canyon Federal Dam bill—during which he expressed his personal frustrations at being in Washington.

"I don't think I will run for reelection," he said.

"I feel as if I were in jail, here. I can't write any more. I haven't time to get away with a typewriter and think and write," said America's most successful freelance writer.

"I haven't been able to go camping or hiking. I haven't been able to sit by a mountain stream or walk along a beach and listen to the surf.

"I don't like it here that well," he said.

But then under my doubtful questioning, he admitted that the elaborate courtesies shown a Senator and the rarefied atmosphere of the most exclusive club in America, were enticements difficult to resist, and that if he resisted them, he would be a rarity indeed.

Yet he might not have run for reelection if it hadn't been for another factor, more powerful than the natural attractions of Senate prerequisites.

That factor would have been pride.

There has never been any doubt in anybody's mind, including Dick Neuberger's, that his first election was achieved on the coattails of WAYNE MORSE. Everyone's first election is generally achieved on someone's coattails, but this was especially true in the case of Neuberger, the first liberal Democrat elected in a statewide race for many, many years, and doing it with the vigorous backing of Oregon's newest Democrat, Senator MORSE.

As a result, Neuberger was sometimes downgraded as a creature of MORSE. Even after the idea became ridiculous, there was the constant intimation that Neuberger could not have made it on his own.

He wanted to make it on his own.

There's no doubt in anybody's mind that he would have done so. Up to the moment of his death he was virtually unopposed by a serious candidate, Democrat or Republican. His support split party lines in every direction. This was the result of his exemplary record in the Senate—a record of achievement for his Nation as well as for his State and party.

After life leaves, what is left?

That impression which remains after we are no longer able to answer earthly questioning is the sum total of our life, the remaining assets after the debits have been subtracted.

In the case of Dick Neuberger, the sum of life is great. He leaves behind a river of ideas and a reservoir of principle. These will inspire others.

When the unimportant factors are forgotten, his vigorous advocacy of democracy, education, charity, and tolerance will remain.

[From the Salem (Oreg.) Capital Journal, Mar. 9, 1960]

DEATH OF A SENATOR

Dick Neuberger, as a young man, always "knew where he was going," his detractors said.

But he didn't. Most of these detractors, almost all of whom became friends as the years passed, now agree that Dick didn't really know until the past year or so.

He grew rapidly in the Senate. And he matured as his health waned.

Those who said the change was phony were either talking through political purpose or through their hat.

For example, Neuberger called a Republican friend for advice on the recent hassle over the Oregon sand dunes proposal. It was this friend's advice that led to the compromise which probably will result in establishment of a national park on the coast. Yet it had become a perfect political issue, with all of the plus aspects on Neuberger's side. There's no doubt Neuberger wanted the park more than he wanted the political points.

Two months ago we gave a bit of gratuitous editorial advice. We pointed out that the Senator worked too hard on too many things (the Senate, politics, writing, speaking, etc.). We said that he should concentrate on being a Senator in the purest sense and let his body recuperate from the series of minor and major illnesses. We wondered if he could slow down and guessed that he had a bad case of Potomac fever—that he couldn't stop running.

But he did stop. Soon thereafter he settled down at home for a rest. But it was too late.

The job takes a lot out of a man, even a man who like Neuberger is apparently immune to fatigue.

Neuberger, as a writer, appreciated the dramatic. And the end of his career came dramatically, almost on the eve of the deadline for filing for his office. As a political historian he had a keen feeling for reputation beyond the present. One of his dreams of recent times was to have a place in history among the selfless, nonpartisan greats of the Senate. He didn't live long enough, in all probability, to achieve this. But he never had been more popular, and that popularity had nothing to do with party affiliations.

[From the Ashland (Oreg.) Tidings, Mar. 11, 1960]

SENATOR RICHARD NEUBERGER

Senator Richard Neuberger, of Oregon, is dead at the age of 47, struck down by a stroke after apparently successfully fighting off cancer.

Even though Senator Neuberger died in the prime of life, he had achieved fame in two separate careers. Long before he became a member of the U.S. Senate he was nationally known as a writer. His command of the printed word was unusually good.

As a Senator he worked long and hard to achieve the goals in which he believed. During later years even his Republican opponents agree that he had matured and become a strong voice for his beloved State of Oregon.

There is little doubt but that he would have been returned to the Senate again this year with the backing of the majority of the voters of the State. His loss will be a blow to the people of Oregon and an unusually hard blow to the Democratic Party which will find his shoes hard to fill.

[From the Medford (Oreg.) Mail Tribune, Mar. 9, 1960]

RICHARD L. NEUBERGER

Dick Neuberger's death this morning at the age of 47—what should have been the prime of his useful life—robs the State of one of its outstanding public servants.

Since his high school and university days, Dick Neuberger has been a controversial character, hated by some, devotedly admired by others. But very few people felt "neutral" about him.

From the days when, as editor of the daily Emerald at the University of Oregon, he battled student leaders, administrative figures and faculty members, raising blood pressures and temperatures as he went, Dick has relished a fight.

Even in the last few years of his life, when he had mellowed considerably, he didn't back away from a battle which he felt important.

But particularly following his cancer operation, his sense of values underwent a considerable change, and partisanship no longer was a deciding factor in his thinking.

During his 5 years in the Senate (which started out with the "squirrels on the White House lawn" controversy, and which brought him both notoriety and ridicule), he became less strident, less combative, less convinced of his own omnipotence.

And, following his successful fight to save the great pine forests of the Klamath Indian Reservation from destruction, he was acknowledged throughout the State for a statesmanlike approach to matters of concern to Oregon.

He went to the Senate as a champion of conservation, and he remained one. He sought increased appropriations for the Forest Service, the national parks, and the other Federal agencies charged with the responsibility for the conservation and protection of the Nation's outdoor resources. He fought for the multiple use concept, and, within it, for single-use of resources which justify such treatment.

No public official of today is more responsible for what success this Nation has had in this field.

But his interests ranged wider than this. He was also a champion of education, of health research, and of a better chance for a happy life and a higher standard of living for the people of this Nation, no matter what their station in life.

And now, just as his growing maturity was bringing him to what could have been his most useful and most influential years, he is felled by a stroke—brought on, in no small measure, by the steady, constant grind of work which sapped his strength and vigor.

Richard Lewis Neuberger, 47, will go down in the State's history as one of the great public servants of this generation.

Nor will his stature be diminished by the fact that he had his enemies. Rather it will be enhanced.

For a man often is judged more accurately by the enemies he makes than by his friends. And, particularly in the last year or so, Dick Neuberger's enemies did him great credit—credit which will be accorded him for years to come.

[From the Oregon Journal, Portland, Oreg., Mar. 10, 1960]

SENATOR NEUBERGER'S DEATH TRAGIC LOSS

The untimely death of Senator Richard L. Neuberger is doubly saddening because it came after it seemed he had won a victory over cancer, which had once before taken him into "the valley of the shadow."

Cancer was not the direct cause of death, though one might assume that it contributed to a loss of resistance which, coupled with his habit of mercilessly driving himself, made him prey to other ills.

The sadness which comes now has no partisan lines, for Dick Neuberger had countless friends at National, State, and local levels whose political beliefs were different from his own.

So full and varied was his life that his activities cannot be summarized and appraised in the space permitted here.

Never one to hide his light under a bushel, Neuberger early found himself in the spotlight, often in the middle of controversy, on which he seemed to thrive. He had a penchant for presenting new and novel ideas and he would fight for them against seemingly impossible odds. He was a master of words, and for his opponents he put plenty of sting in them.

But nobody can speak of Neuberger now without reference to his mellowing. The Senator himself traced this primarily to his earlier brush with death from cancer, and he often said: "I no longer can transform political disagreement into any feelings of personal malice. When one is grateful to be alive, it is difficult to dislike a fellow human being."

It was our observation that the maturing process began before his cancer illness. Neuberger turned away from extreme partisanship to accomplish things which could not have been done on a partisan basis. One of the most notable examples was his leadership in helping to win administration-sponsored legislation to protect Klamath Indians Reservation timber involved in termination. This was in line with his consistent effort in behalf of conservation of natural resources and coordinated basin development.

He fought unreservedly for many phases of administration foreign policy, even while under attack from constituents at home for so doing. While he believed that the Federal Government should actively do many things to better the lot of the people, functions which others believed should be left to private enterprise and the States, Neuberger developed a sense of fiscal responsibility. This was reflected in his espousal of unpopular increases in the Federal gasoline tax and postal rates.

In his recent effort to win a national seashore recreation area on the Oregon coast, he went to extreme lengths to get the cooperation of the State administration when it first seemed hostile to the proposal.

In his role as a freelance writer, Neuberger did more than any other citizen to publicize Oregon nationally. His writings were eagerly accepted in the top publications, and they reflected his profound love for this State. This reached a climax in Oregon's centennial year when Neuberger's articles reached a wider audience than could possibly otherwise have been won.

Neuberger's experience with cancer heightened an already held interest in the public health field. He wrote and worked tirelessly in behalf of a step-up in cancer research, using his own illness to dramatize the need. It may be that in looking back over his life this is the thing in which he would have taken most pride.

Dick Neuberger will be remembered for his flashing mind, his restless energy, his widespread interest, his remarkable talent for research, analysis, and communication. But influencing everything he did was his love and sympathy for and his understanding of his fellows, their hopes and problems.

He could be militantly independent and tough minded in a fight for a principle. But he didn't want to hurt anyone personally, not even his severest critic. He wanted instead to encourage and help people, the underprivileged, the ill, the aspiring. No matter how great the demands upon his time and energy, no matter how complex the issues he tried to resolve, he always found time to think of his friends throughout his State and Nation, especially those in trouble. To them he was foremost a true friend with a great heart.

This newspaper had its differences with Neuberger in the past. It did not support him in 1954, and he and we exchanged some harsh words. But in the last few years this had been changed into a mutual respect. We consider that Neuberger has been an outstanding American and citizen of Oregon. We profoundly regret his loss to the Nation and the State. Our deepest sympathy goes to his wife, Maurine, and other members of his family.

[From the East Oregonian, Pendleton, Oreg., Mar. 10, 1960]

RICHARD L. NEUBERGER

It isn't going to be easy to write this. It never is easy to write of a friend who has been taken by death. This is so very difficult because my friendship with Dick Neuberger goes back to the days when we were kids

learning to be newspapermen. It was a friendship that came, over the years, to mean more to me than I can express to you.

Dick Neuberger's death is a tragedy for so many people, not alone his friends. There was so much ahead for him to do, tasks that no one else in Oregon could do as well.

Before he went to the U.S. Senate he was established as a writer whose stories on any subject were sought by all the best magazines and by such great newspapers as the New York Times and the St. Louis Post-Dispatch.

In less than 6 years in the U.S. Senate he became a statesman who was admired and respected by men on both sides of the aisle for his intellect, his capacity to serve the people of his State and his fairness and tolerance.

Because of the respect Members of both parties had for him, he was getting more and more done for Oregon. He worked as effectively with many Republicans as he did with Democrats in the Senate. Members of the Republican Party in Oregon knew that he would unfailingly place the interests of all citizens of Oregon ahead of any other consideration. They knew that they need not hesitate about going to him with their problems.

A few days ago he told me he intended to serve (if Oregonians desired that he should) one more term in the Senate. He wanted to do that because there was a lot of unfinished business in the Senate he wanted to have a hand in. He had become so effective in the Senate in his first term that he most certainly would have accomplished much in the second.

Another term and then he was coming home to Oregon to spend the rest of his years writing and enjoying life with close friends.

Dick Neuberger had an almost unbelievable capacity for work. He fulfilled his duties as Senator as well as any man Oregon has sent to Washington. But he also found time to write for magazines and newspapers, to carry on personal correspondence that would have kept most men busy had they nothing else to do, to make a great number of speeches, and to read every week more than most of us get to in a month.

His personal correspondence was of amazing magnitude. Children of his friends always were in his thoughts. He wrote to them and sent them gifts. So many letters to parents on important matters contained special messages for their children.

He loved young people. When he went to the Senate he was offered patronage rights. What was his first choice? To appoint a Senate page. He established a research internship on his staff for outstanding graduates of Oregon colleges in political science and journalism. He gave a large portion of his earnings from magazines to Oregon colleges as scholarship funds. The book he wrote for children about the Lewis and Clark Expedition was a best seller.

His devotion to the preservation of natural resources was deep rooted. He paid the wonders and beauties of nature more than lip service, as all who read his magazine articles knew. There was no subject he enjoyed more writing about. He enjoyed even more a day at the beach or at a lake or on a mountain trail. One of the most enjoyable days I've had was spent with the Neubergers on the beach at Ecola Park, a day of such beauty that we spoke of it many times thereafter.

Dick could have done so much for this State and its citizens in the years ahead. But there is nothing to be gained now in speculating upon that. Let us speak instead of the high place he has in the history of this State because of all he accomplished in 47 years, as a writer, State legislator, and U.S. Senator, and in countless other ways. Those who knew him intimately saw early a man of great stature, a stature that others recognized later. When he was elected to the U.S. Senate, I said to some who had doubts, "Dick Neuberger will be a fine Senator. Just give him time. He has all the qualities that a man needs to be a great Senator." That he measured up was so well recognized throughout Oregon that it was conceded by almost all the politicians that he would be reelected by the biggest margin ever given a candidate for the Senate from this State.

I could write much, much more about Dick Neuberger. But much of it would be personal and this is not the place for that. I shall close by saying that no man will pass this way whom I shall think better of.

[From the Eugene (Oreg.) Register-Guard, Mar. 11, 1960]

NEUBERGER'S RISE IN SENATE RAPID, IMPRESSIVE, DESERVED

(By A. Robert Smith)

WASHINGTON.—Richard L. Neuberger came to the Senate as a critic in the highest literary sense and in the most partisan political sense. He departed as a creative and skilled legislator whose wholly unpartisan accomplishments seem destined to memorialize him for decades to come.

In his relatively brief 5-year career as U.S. Senator, Neuberger rose visibly in the estimate of impartial observers here, and even in the view of many who disagreed with much of the liberal program he advocated.

The change in Neuberger, one of the most evident witnessed in the Senate in years, came about in midway through his term when, coincidentally, he deliberately broke his political alliance with WAYNE MORSE.

Neuberger decided, he said in 1957, that Oregon could no longer afford to have two gadfly Senators. He did not begrudge Senator MORSE this role nor challenge his senior colleague's preeminence in that sphere. It served a useful purpose; but as for himself, he explained, he would thereafter concentrate on "getting things done" legislatively for Oregon.

In the 3 years or less left to him, Neuberger amassed an impressive legislative record. The achievement to which he devoted the most time and effort was saving the Klamath pine forests from the threat of clear-cutting and destruction as a source of sustained-yield timber, a watershed, and a wildlife sanctuary. The threat had arisen from a Republican-sponsored act ending Federal supervision over the Klamath Indian Tribe and Reservation. After developing a working liaison with Interior Secretary Fred A. Seaton, he got through his bill to put the $90 million forest under sustained-yield protection and to create a Federal wildlife refuge for the Pacific flyway.

"MR. CONSERVATION"

This accomplishment, his first major one, epitomized the endeavor which Neuberger exerted in behalf of conservation of resources. What he had determined early in life to crusade for in magazine articles and books, Neuberger the Senator learned to implement on the Federal statute books. Some thought he was extreme in his advocacy of conservation causes, while others thought of him as "Mr. Conservation" in Congress.

He next won enactment of a bill authorizing Fort Clatsop National Memorial to mark the end of the Lewis and Clark Expedition, of which he loved to write. He gladly shared honors for getting it passed with the Congressman in whose district it lay, Representative WALTER NORBLAD, a Republican—although everyone close at hand recognized that it was Neuberger whose skill got it enacted.

MOST DECISIVE

One of his first and most frustrating crusades in the Senate was against allowing commercial signboards to clutter the new interstate highway network Congress was planning to finance. But his speeches and articles against obscuring the Nation's scenery ran into heavy lobbying from the billboard lobby and drew only halfhearted support from the administration. The outcome was a weak compromise to give States incentive payments if they ban billboards. It didn't please him, but he felt it was all that could be salvaged.

As a junior Senator, Neuberger was assigned to the Post Office and Civil Service Committee, where he made his most decisive national contributions. Last year he put through the Senate a bill agreeable to the administration for providing health insurance and medical programs for Government workers, recognized as a model for similar programs in private industry.

VOTED WITH GOP

When the administration plugged for higher postal rates to cut the postal deficit and increase postal workers' wages, Neuberger gradually became convinced that more Government services had to become more nearly self-financing to avoid greater Federal fiscal deficits. While his party generally opposed Federal increase, Neuberger voted with the Republicans to provide a single-vote margin for the bill in committee. It was ultimately enacted.

Thereafter, Neuberger spoke more of the need for fiscal responsibility than for Federal spending programs, although he still advocated many of the latter in the field of public works, health, education, and welfare programs. For this new emphasis on pay-as-you-go, it was widely supposed that this liberal Democrat had suddenly become a conservative. Republicans who once denounced him now began to pay him compliments.

SUCCESSFUL FIGHT

Neuberger did not, however, renounce those liberal programs he had previously espoused. But he did insist that it was a liberal's responsibility to face the cost of new programs—not simply because it was virtuous to balance the Federal budget but because, he pointed out, the bulk of taxation and cost of interest on the national debt falls upon the low and middle income brackets, not just the rich and the corporate interests whom liberals often condemn.

After he fought back successfully from his cancer bout, Neuberger spoke and wrote more about the demands for more cancer research funds at the National Institutes of Health. But his massive program in this field was too costly for the administration to accept. Nevertheless, Congress steadily increased cancer research funds, for which he deserved at least an assist on the final scoreboard.

UNTHINKABLE OPPOSITION

Last year he launched his last major effort when he introduced a bill authorizing an Oregon Dunes National Seashore. He confidently supposed he could pilot it through Congress in short order. To Neuberger, the man of ideas and conservation vision, it was unthinkable that Oregonians could oppose a new national park with its great local and tourist benefits. But vocal opposition did arise, and in recent months Neuberger joined forces with Gov. Mark Hatfield to compromise their differences in behalf of the proposal. It was the one major achievement he hoped to chalk up in this year's session—but illness took him home to Portland this winter before he could get the bill underway.

RAPID LEARNER

Neuberger won the stature and esteem with which he departed Washington by the hardest route. For when he came here in 1955, he caused much headshaking when he charged President Eisenhower with lawbreaking for reports that White House lawn

squirrels were being trapped and shipped to West Virginia because they dug up the presidential golf green.

But Neuberger learned the ropes rapidly, if with some awkwardness. He even wrote an article about the mistakes he had made as a freshman. In another article he said the best advice he had ever received was to keep in mind that the other fellow might be right. He frequently prefaced comments with, "I may be mistaken, but I think * * *" and he displayed a tolerance in debate that was uncommon in a chamber where headstrong and willful men sometimes create the image of absolute certainty.

A PUBLIC MAN

Throughout his career, Neuberger was truly a public man. He yearned to communicate his ideas to the public, to persuade and to lead, to explain and to justify. He had faith that the citizens of Oregon, when given full and candid accounting of public business, would respond intelligently even at possible cost to themselves.

So in the final analysis, Neuberger's accomplishments came not only out of his conversion to the spirit of bipartisan accommodation within the Senate which marked his later years. It came also from his faith in the people's sustaining role in the democratic process.

[From the Salem (Oreg.) Capital Press, Mar. 11, 1960]

PASSING IN REVIEW

(By Dewey Rand)

It is difficult for me to realize Dick Neuberger will no longer stride Oregon's political stage to represent his State in the U.S. Senate. Even his series of recent illnesses were no preparation for his tragic death this week at the age of 47.

It doesn't seem like two and a half decades since I first met Dick back in the gloomy and disturbing days of the depression, but it was. And it was then, in the thirties, that the bright young man became interested in politics as a cure for a serious national illness. This political interest led to one of his two extraordinarily successful careers. The other was, of course, as a writer.

Dick Neuberger's political history spans the period that has changed the State's political arrangement. Prior to the great depression the State was controlled by the Republicans and now Oregon is a two-party State. Dick, through his political activities and successes, had as much to do with this transformation as any other person. And all but the most partisan members of the Republican Party agree this change has been beneficial.

There is no need for me to review Dick's record, which is being so thoroughly covered by the press, or to join in the deserved eulogies he is receiving nationwide and that he deserves. I would like, rather, to mention a few personal observation and impressions of this man and of this period. They will shed little new light but they might be of interest.

One is the recently-acquired custom of Republican editors of saying that Dick Neuberger "has matured." I believe this is misleading, although not deliberately so. Of course all people mature as time goes on and experiences have their effect. But I believe these observers were mislead by Dick's change in method rather than any basic change of philosophy. He did learn the practical methods of political accomplishment but in my periodic talks with him I did not find the change in his ideas his former critics claimed. These editors were, I believe, engaged in wishful thinking about someone they were stuck with, for Dick's reelection was conceded by nearly everyone.

One of my most distressing experiences was the result of the disagreement between Dick and WAYNE MORSE. I had admired these two men for many years and considered them both my personal friends, as I did until the last day. But there was nothing I could do about this clash of personalities as much as I wished to and it was all the more tragic to me because I thought it all unnecessary. They were never so very far apart on the larger issues they were called upon, as Senators, to judge.

I visited with Dick shortly before he made his last trip to Washington, just before illness brought him home for the last time. He had decided then to run for reelection although he did not announce until last week. We talked of the coming campaign and I assured him I would do what I could to help. It was a small thing but he was pleased. And now I am pleased that I told him then that I believed he was an excellent U.S. Senator and had made clear my support was unreserved.

What more is there to say without being repetitious or emotional? There is, I think, one fact that has not been given much attention. That is, Dick's political career is not only a high compliment to him but also to the political arrangements in which it could happen. In a conservative State and as a member of a minority party—in the beginning—a young man reached the U.S. Senate and was a credit to that body, and over the sometimes bitter opposition of many who now praise him.

And when I appreciate more fully that he has left the stage I will miss, more than I do today, his brightness and imagination, his skillful political activities in behalf of issues in which we both believed. But most of all I'll miss his steady friendship as will hundreds of others.

[From the Salem (Oreg.) Capital Press, Mar. 11, 1960]

RICHARD L. NEUBERGER

The sudden and tragic death of U.S. Senator Richard L. Neuberger leaves a void in the State of Oregon that will not soon be filled, if it ever is.

He was a great humanitarian who, through his congressional influence, contributed immeasurably to a better life for people all over the world. He was a loyal native son of Oregon who never missed an opportunity to bring credit and improvement to his State. But more than all that, he was a particularly gifted writer who, in addition to doing good works, could persuade others to do them. His great talent in making complicated public issues clear to the public will be sorely missed.

It is ironical that this useful man, who struggled so hard for better health for others and had done so long before his own health began to deteriorate, should be struck down just when he was becoming most effective in this field.

The Senator, a fierce partisan through most of his life, had mellowed and just begun to specialize in the field of health, in which field he saw no partisanship. He said, after his scare with cancer, that he never again could be so partisan after seeing the most wealthy Republican wrapped in a sheet, as he was, undergoing an examination that would determine whether his life would go on or whether it would end.

In the course of events there will have to be a successor to his seat in the Senate and, because the Democratic Party has become a vigorous one in Oregon, there are a number who could fill it. But none could fill the same role that Senator Neuberger filled.

As this is written, a number of possibilities present themselves. One is that Maurine Neuberger, herself a person of great stature and ability, be appointed by Governor Hatfield to fill out the remaining months of her husband's term. As the Senator's No. 1 advisor, she is in a particularly good position to carry out matters as he would have done. It would seem almost cruel for her to have to face a decision on this at this time, and maybe the appointment should be held up for a time for this reason, to give her a chance to consider it with perspective.

It is certain that others will have to consider the race. In spite of the genuine grief felt by Oregonians of both parties, the deadline for filing at 5 p.m. Friday, March 11, is inexorably coming upon us and cannot be ignored.

It can only be hoped that both political parties will be able to come up with candidates who would be able to serve the people of Oregon as conscientiously and as ably as Senator Richard L. Neuberger has done.

[From the Oregonian, appearing in the Lebanon Express, Mar. 10, 1960]

FULFILLMENT

On that day in November 1954, when the late count of ballots showed that Richard L. Neuberger had defeated the veteran incumbent, U.S. Senator Guy Cordon, the Oregonian's editorial comment began:

"Someone—perhaps it was Woodrow Wilson—once observed that when a man goes to Washington, D.C., he either grows or swells."

The man who wrote those words, the late Philip H. Parris, then editor of the editorial page of the Oregonian, also said of the Senator-elect: "We know he has the intelligence to grow into a truly great Senator." Mr. Parris did not live to check the record of Senator Neuberger's performance. And now, near the end of his first term, Senator Neuberger is gone—the victim of a cruel fate which gave him victory over cancer only to end his life by cerebral hemorrhage.

It must now be recorded for posterity that Senator Neuberger, in Washington, D.C., and in the hearts of his many personal friends, his loyal political supporters and his opponents in past political battles, did not swell. He grew. His stature as a Senator and as a man became greater in each year of his service. He was well on the way to becoming a statesman.

Dick Neuberger, a prodigous worker and enthusiast for each cause he embraced, was a product of the great depression and this was reflected in his prolific writings and in his politics. In his earlier days he was, to some extent, a prisoner of his own campaign techniques. He was an admirer of George W. Norris and Franklin Delano Roosevelt, a New Dealer and liberal, an inheritor of the Gifford Pinchot-Teddy Roosevelt traditions in conservation of natural resources, the defender of the unfortunate and aged, the successful spokesman for a minority party in his State.

As an author, his touch was professionally sure in touching the springs of hope, ambition, and idealism in the breasts of his readers. He became perhaps the greatest publicist for the Pacific Northwest and Alaska in modern times.

Five years in the United States Senate taught him, he frankly said, that all is not black nor white, that the civil rights viewpoints of a southerner are entitled to respectful opposition, that personal vendettas are a waste of energy and degrading, that a Republican President is entitled to support of Democrats on vital security and world issues. He mellowed and became a better Senator long before the devastating diagnosis of cancer gave him even more humility.

Dick Neuberger's capacity for growth was fully demonstrated before his untimely death. It was matched only by his capacity for hard work and his dedication to those principles of government he believed to be valid. He was not handcuffed by tradition. His active mind sought always to find new and better ways of accomplishing the shining goal of a more fruitful life for all. It is tragic that he was not allotted his full time in which to grow.

[From the Lebanon (Oreg.) Express, Mar. 10, 1960]

DEATH CUTS SHORT A BRILLIANT POLITICAL CAREER

Oregonians and thousands of others the Nation over are mourning the passing of Senator Richard Neuberger, whose untimely death at the age of 47 cut short a meteoric rise to the statesmanship level of politics.

Although he recovered from a bout with cancer but a short time ago, illness which followed plus months and years of strenuous effort in serving his party, his State, and his country proved too great a burden for the man who in recent months has done more to win the respect and admiration of former political foes than any man we can remember. Neuberger was a fighter to the end; a champion of everything he believed to be right and best for the people he served. History will mark him as one of Oregon's outstanding Congressmen and without question the loss of his services will be keenly felt in many areas.

Following Neuberger's election in 1954, which shattered a 40-year record of Republican representation from Oregon in Congress, he became a controversial and sometimes extremely partisan figure. Maturity gained in his congressional career, a broader attitude, and deepening respect for those of other political beliefs won for him in his last years the friendship of many who were formerly bitter opponents.

We like to recall what he wrote for the press following his successful operation for cancer: "A brush with cancer tends to place many things in true perspective * * * old antagonisms fade away. I no longer can transform political disagreements into any feelings of personal malice. When one is grateful to be alive, it is difficult to dislike a fellow human being."

We will remember him not only as our Senator whom we always admired and respected, though often disagreeing with him in these columns, but as a personal friend who with his charming wife was often a guest in our home.

To her we extend our heartfelt sympathy, knowing she will find comfort in the knowledge that he gave his life in service to his country. What more can be asked of any man?

[From the Milwaukie (Oreg.) Review, Mar. 10, 1960]

RICHARD LEWIS NEUBERGER

Dick belongs now to the great legends of Oregon.

Oregon-born, a product of Portland's schools and the University of Oregon, Dick Neuberger loved his Oregon and the Northwest above everything. His effective voice, the best-selling products of his prolific pen, his tireless political liberalism, all served the people of his native Oregon as did no other man of our time.

His breakthrough in the Senate election of 1954 turned the Oregon tide after 50 years of entrenched Republicanism. He had piloted this development as author and legislator through the dynamic years, with Maurine, as a State legislator.

To Maurine, to his mother and father, to his sister Jane Goodsell and her children who were their uncle's favorites, is left a heritage unmatched among the great Oregonians of our century.

[From the Albany (Oreg.) Greater Oregon and the Benton County Herald, Mar. 18, 1960]

A GREAT PUBLIC SERVANT

All Oregon was stunned last week by the sudden death of Richard Lewis Neuberger of a cerebral hemorrhage. Nor were we alone; in other States and in the Nation's Capital, many mourned with us.

Dynamic is a descriptive term that fits Dick Neuberger, a political liberal who was the first Democrat to be elected to the U.S. Senate from Oregon in 40 years. His effective speaking no less than his brilliant writing served the people of his native Oregon as had no other. His years of service in the State legislature, where he and Maurine formed the able team that also worked for Oregon in Congress, likewise should not be forgotten.

To Maurine, to his mother and father, and to his sister and her children who were their uncle's favorites, we offer heartfelt sympathy. Dick, as he liked to be called, will be remembered as one of the great Oregonians of our century.

The untimely death of Senator Neuberger, who was only 47, has been a shock to us all. But, now that the final tribute has been paid, our thoughts must not linger with the past but must turn to the future. Dick would have wanted no delay on his account in proceeding with the work in which he was so vitally interested.

For the great service Senator Neuberger has rendered to Oregon, we can show our appreciation in no more fitting way than to elect his wife, Maurine, to the seat which he held. We are positive that Dick would have wanted this, just as we are confident that he would have been reelected to office.

Maurine Neuberger has worked closely with her husband in the Senate and is by far the best qualified candidate to carry on with his work. Should the Governor fail to appoint Mrs. Neuberger, we feel she should be elected by an overwhelming majority in the coming election.

[From the Eugene (Oreg.) Register-Guard, Mar. 10, 1960]

FIVE YEARS OF SOLID ACHIEVEMENT

All through Wednesday the teletype machines brought in their pounds and pounds of paper telling of the death of Senator Richard L. Neuberger. Much of the wordage expressed sorrow at the loss of a man who was a personal friend to thousands. That was a natural first reaction. One of the world's really nice people was dead. But we cannot forget that Oregon and the Nation also lost a Senator of great ability and achievement. Perhaps other Senators have accomplished as much in 5 years. Many have done much less.

The Neuberger file in any Oregon newspaper office is a thick one. Leafing through it, the researcher finds a commendable record of things done and a portfolio just as commendable, of plans. Here are a few of the accomplishments:

The forests and marshes of the Klamath Indian Reservation will be forever under sustained yield management, thanks to Mr. Neuberger's hard work.

Oregon has its first historic shrine, the National Park Service's Fort Clatsop near Astoria, thanks to the efforts of a man who was the country's greatest living fan of Lewis and Clark.

The country has standards to protect roadside beauty and scenery along the 42,000-mile interstate highway system, thanks to a man who liked grass and trees.

The Yaquina Bay project, a $19 million job, was authorized, thanks to a man who recognized the need for industrial development, commerce, and trade.

The Federal gasoline tax was raised and postal rates went us, thanks to a man who felt that highway users and letterwriters ought to pay their fair share for the benefits they receive.

Public employees can take part in a voluntary health insurance and medical program, thanks to a man whose concern for human health was a passion. This was the passion, stimulated perhaps by his own bout with cancer, that moved him to urge greater Federal aid for medical research.

His work was not done. Still close to his heart was the establishment of a seashore recreation area on the coast and legislation for a Columbia River regional development corporation which would work to make basin improvements self-financing.

He was a visionary, true enough. The country needs visionaries. Most of the established programs, public and private, were once visionary. They became realities because visionaries refused to think of them as unattainable. Senator Neuberger, however, was not an irresponsible visionary. He sought to blend social welfare with fiscal responsibility. He was a "pay as you go" man.

Had he lived to serve another term, he might have achieved his greatest goal, one that would assure him a place in the list of truly great Senators. He might have made more progress in his program for medical research, especially into cancer. He, as no other Senator, could have spoken on the floor of the Senate in behalf of millions who are suffering, or who will suffer, from this condition. Public health, even more than conservation, had become his great interest. Suggestions are already being advanced about suitable ways to memorialize his name. It should be done—in one or the other of these fields.

EDITORIAL WRITERS PAY TRIBUTE TO NEUBERGER

Oregon newspapers today paid editorial tribute to Senator Richard L. Neuberger who died Wednesday.

The Portland Oregonian, for whom Neuberger once worked as a youthful sports writer, referred to an editorial written by the late Philip H. Parrish, after Neuberger's 1954 election.

It began "someone—perhaps it was Woodrow Wilson—once observed that when a man goes to Washington, D.C., he either grows or swells."

The newspaper's editorial today said "it must now be recorded for posterity that Senator Neuberger, in Washington, D.C., and in the hearts of his many personal friends, his loyal political supporters and his opponents in past political battles, did not swell. He grew. His stature as a Senator and as a man became greater in each year of his service. He was well on his way to becoming a statesman."

Former Gov. Charles Sprague said in the Oregon Statesman that Neuberger "was a genuine liberal on matters of human welfare. He was moved by suffering and distress, and thought this great and rich Nation should not hesitate to move to their relief." He said, "for Richard Neuberger the epitaph should be: Distinguished journalist, conscientious legislator, ardent conservationist, able statesman."

The Bend Bulletin said "Neuberger and his wife, Maurine—a charming lady who stood stanchly at her husband's side—made one of the Nation's most prominent political teams. It is broken up now and Oregon and the Nation are the losers."

The Eugene Register-Guard said "Dick Neuberger earned his way to greatness. Oregon's junior Senator whose life ended abruptly at the peak of his public career was not born to it, did not have it thrust upon him. He earned it every step of the way by hard work, devotion to duty, loyalty to friends, and an abiding belief in certain principles. This was recognized even by those who considered themselves his political enemies."

The Medford Mail Tribune said, "And now just as his growing maturity was bringing him to what could have been his most useful and most influential years he is felled by a stroke brought in no small measure by the steady constant grind of work which sapped his strength and vigor. Richard Lewis Neuberger will go down in the State's

history as one of the great public servants of this generation."

The Coos Bay World called Neuberger a "man of driving energy and possessor of a bottomless well of ideas.

"There was simply too much to be done in this world for Oregon's foremost author of ideas and exponent of discussions to be still.

"In the case of Dick Neuberger, the sum of life is great. He leaves behind a river of ideas and a reservoir of principles. These will inspire others. When the unimportant factors are forgotten, his vigorous advocacy of democracy, education, charity, and tolerance will remain."

Oregon Journal: "Dick Neuberger will be remembered for his flashing mind, his restless energy, his widespread interest, his remarkable talent for research, analysis, and communication. But influencing everything he did was his love and sympathy for and his understanding of his fellows, their hopes and problems. He could be militantly independent and tough minded in a fight for a principle. But he didn't want to hurt anyone personally, not even his severest critic. * * * We consider that Neuberger has been an outstanding American and citizen of Oregon."

[From the Bend (Oreg.) Bulletin, Mar. 9, 1960]

RICHARD L. NEUBERGER, 1912–60

Richard L. Neuberger, junior U.S. Senator from Oregon, died early today in a Portland hospital following a cerebral hemorrhage suffered yesterday.

Ironically, he died of the same ailment which took his longtime political hero, Franklin D. Roosevelt.

It is difficult to write of Neuberger and his career in an objective fashion. Neuberger was not a particularly objective man in the first place. In the second, he was a close personal friend of the editor of this newspaper and was on good terms with many members of its staff.

Dick Neuberger first was elected to the U.S. Senate, by a very close margin of victory, 6 years ago. He was then one of the Nation's more controversial political figures.

His career in the Senate got off to a rather shaky start. But he matured quickly, and at the time of his death was noted as an effective Member of the Senate. He was a fine Senator for Oregon.

Neuberger was an extreme partisan earlier in his political career. His maturity, plus the fact that his bout with cancer 2 years ago brought him expressions of hope and good will from all walks of American political life, had dimmed his partisanship.

Future historians of the Senate probably will not recognize Neuberger as a "great" in that body. Such honors never are accorded those who serve only one term.

But Oregon historians will recognize him, we are sure, as one of the most articulate men ever to serve in high office in or from this State.

"The king is dead, long live the (new) king," is a saying used often to indicate the fleeting attention given to a politician who dies in office. No sooner is the death announced than the infighting begins to determine his successor.

The balance of Neuberger's term will be filled by a man appointed by Gov. Mark Hatfield, although there may be considerable juggling over the political faith of the appointee.

But, Neuberger's death occurred only a little more than 48 hours before the final deadline for filing for nominations for the May primary. And it creates the biggest shuffle ever known in Oregon politics.

Neuberger was assured of the nomination. He faced no serious opposition. Now that picture is completely changed, and serious Democrats—probably led by ex-Gov. Robert D. Holmes and Congresswoman EDITH GREEN—can be expected to do some serious maneuvering and real soul-searching in the next 48 hours.

Republicans, too, had been hardput to find a serious candidate. One mentioned was ex-Gov. Elmo Smith, Albany newspaper publisher. If others were interested in the race, word of it had not reached the high country.

Neuberger and his wife, Maurine—a charming lady who stood stanchly at her husband's side—made one of the Nation's more prominent political teams.

It is broken up now, and Oregon and the Nation are the losers.

[From the Wallowa County Chieftain, Mar. 24, 1960]

RICHARD NEUBERGER—A FRIEND

The death of Senator Richard Neuberger takes from the national and international political and literary field an illustrious man intensely devoted to the task of making the lives of people everywhere richer and more secure. His heart was warm toward those who needed help, and he was always generous with his time and his talents where there was an opportunity to give some worthy person or cause a helping hand.

With all his many interests and the very heavy demands upon him he managed to keep in personal touch with thousands of friends, finding time somehow to write countless notes and letters of explanation, greetings, and words of praise. He never forgot a friend.

He hated injustice; and for the weak and oppressed, in their efforts to secure justice, he was always an ardent champion.

What was politically wise and expedient meant nothing to him. His decisions were reached by a careful study of all available information tempered with a feeling that no one should be unnecessarily hurt and that there is some good in all men. Even in his bitterest political foes he found many warm, personal friendships and never hesitated to say kind and complimentary things about his adversaries when they made noble stands.

Like all mortal men he had his faults and his weaknesses, but they were never due to cruelty, vindictiveness, or a lack of courage. To always be right is more than any of us can achieve.

Stone monuments are often erected to honor the memory of great men but they serve no real purpose. The real monument honoring any true Christian is in the hearts of those who were inspired by his example.

The memory of Richard Neuberger will be a warm and cherished one in the hearts of many, many people.

[From the Oregon Labor Press, Mar. 18, 1960]

DICK NEUBERGER'S COURAGE WILL BE LONG REMEMBERED

(By James T. Marr)

Through most of my years in the labor movement I can remember Dick Neuberger. Back in the early 1930's, when he was still a student at the University of Oregon, Dick was working for progressive legislation that would benefit people.

Dick was the people's friend. He was always opposed to special-interest legislation that would not benefit the ordinary person. He was a great humanitarian.

I well remember, from those early years, that Dick joined with the Oregon State Federation of Labor and the Oregon State Grange in their battle to defeat the general sales tax.

Two of Dick's earliest and closest friendships in the labor movement were with Ben Osborne and Kelley Loe. They fought together, side by side, in many a battle for the people's benefit in the Oregon political arena.

Ben Osborne was an iron worker and a dedicated trade unionist who provided great leadership as executive secretary of the Oregon State Federation of Labor through the depression years until his death in 1938. Kelley Loe, a printer by trade, was one of Oregon's most revered trade-union leaders. He served as legislative assistant to Ben Osborne and his successors until his death in 1957. Ben and Kelley were close friends and coworkers with Dick Neuberger during his early years as a student and young freelance writer—long before his first campaign for public office.

It was during the 1941 session of the State legislature that I began to follow Dick's career with close interest. Though it was his first session in the legislature, Dick served with distinction and his qualities of leadership and courage were immediately apparent.

During that 1941 session, many bills harmful to the interests of the people were introduced. Dick fought them with courage, brilliance and tremendous energy. It was during that legislative session that the people of Oregon began to learn that Dick was their champion.

After serving in the Armed Forces in World War II, Dick returned to public service when he was elected to the State senate in 1948. He served with great distinction as a State senator in the 1949, 1951, and 1953 sessions of the legislature.

His voice was heard supporting many causes that were not popular in that day. With his tremendous fund of knowledge and energy, and his passion for research, Dick got the facts and presented them in a most effective way.

The facts usually fell on deaf ears in those years, but much of the progressive legislation that has been enacted in Oregon has resulted from Dick Neuberger's early support and constant advocacy.

Late in 1953, when a liberal candidate was being sought for the U.S. Senate, Dick was asked to make the race. I feel proud of the small part I had in persuading him to become a candidate.

And I can remember, as if it were yesterday, when Dick called my home early on that historic November morning in 1954 before all the votes were counted. He believed at that moment that he had failed to win election. But before the day was over the picture changed: the "lunchbox vote" was counted and Dick became a U.S. Senator.

He served with all his might. He gave everything he had, including his life, to serve mankind.

Dick will be missed not only by members of labor unions but by all citizens of Oregon and the Nation.

When history is written the name of Dick Neuberger will fill many pages. Because of his faith in people, because of his great work to develop and protect the natural resources of the Pacific Northwest, because of his unfailing humanitarianism, the memory of Dick Neuberger will never die.

[From the Roseburg (Oreg.) News Review, Mar. 10, 1960]

SENATOR NEUBERGER

(By Charles V. Stanton)

The sudden death of Senator Richard L. (Dick) Neuberger is a great shock.

A controversial figure in State and National politics, Neuberger was high among the Nation's characters on the political stage. Fate blotted out a future that held for him great political promise.

It seems somewhat odd that the Senator, a recent cancer sufferer, should die from what apparently was an unrecognized physical con-

dition. Overjoyed that he had been found free from malignancy, after surgery, Neuberger recently had suffered from several ailments which, in themselves, seemed minor.

A hard worker, worried by his physical condition, driving himself to serve in the office to which he had been named, he became victim to virus infections and a nervous disorder. He had taken a brief vacation in an effort to regain his health, had filed for reelection and, apparently, was preparing for a vigorous campaign, when he suddenly was stricken by cerebral hemorrhage.

PUBLIC STIRRED

Neuberger brought a unique freshness to politics. Coupling his political philosophies with a masterful ability for press agentry, he stirred public interest in political affairs, in party organization, and in competition. He made many valuable contributions to politics, not the least of which was his influence on the affairs of his party and more widespread appreciation of political activities by the whole public.

The political philosophies he advocated were under attack on many occasions in this column. I was often critical of the Senator's brand of politics and of some of his methods.

On the other hand, I held him in high esteem because of his dedication and sincerity of purpose.

Neuberger had an uncanny ability to seize upon the weaknesses and frailties of men and politics in general and to "needle" his contemporaries. In that respect he unquestionably helped to clean up various practices and to produce a better brand of politics.

In this column I have opposed from time to time what I felt were "schemes" carrying political motivation. In such cases I have unquestionably been harsh in my criticism. But I have also felt that many of the Senator's acts and proposals were good, and have so stated in the column and in personal correspondence.

RESOURCES SAVED

A monument, I believe, will be his work in connection with saving for the public benefit the timber of the Klamath Indian Reservation.

The Klamath Indians are to be freed from their status as wards of the Government. But involved in the legislation abolishing the former status is the disposition of assets belonging to Indians on the reservation. Included in those assets is a tremendous block of extremely valuable timber.

Efforts were made by some interests to get that timber into private hands. In such case it would probably have been removed much too rapidly, and with inadequate financial returns to the Indians.

Neuberger advanced a proposal to put the timber under Federal control and on a sustained yield program.

He withdrew his own legislation, however, when an administration bill was presented, because he felt the issue was one in which there should be no partisanship.

By his action he promoted accord and secured the adoption of a plan whereby the timber on the reservation will remain as a perpetual supply, while, at the same time, the Indians are assured of equitable payment for reservation resources.

Thus the beautiful pine timber in the Klamath Reservation will forever be a monument to the Oregon Senator to whom conservation was almost a second religion.

[From the Portland (Oreg.) Reporter, Mar. 10, 1960]

MEMORIAL FOR A SENATOR

Senator Richard L. Neuberger, in a formal announcement of his candidacy for a second term in the Senate issued little more than a week before his tragic death Wednesday, listed what he considered some of his major legislative achievements in his 6 years in Washington. Among them are sponsorship of measures setting standards for protection of roadside beauty along the Interstate Highway System, establishing the Fort Clatsop historic shrine under the National Park Service and authorizing $90 million to save the pine forests and wildlife marshes of the Klamath Basin and Indian reservation.

He mentioned also two legislative projects he regarded as "hopefully close to success." These are creation of the Oregon seacoast national park in Lane, Douglas, and Coos Counties and legislation setting up a Columbia River regional development corporation which would channel revenues from existing projects to needed undertakings in water power, navigation, irrigation, and flood control.

It will be noted that these legislative projects mirror Senator Neuberger's deep concern for preservation of the natural beauties and resources of his beloved Pacific Northwest. This same concern was the central theme of the writings which gained him national recognition before he began his legislative career.

These legislative accomplishments constitute a fitting memorial to Senator Neuberger. Oregonians enjoying the beauties of our forests and coastline now and in years to come will have reason to be grateful for his devotion to the public interest and to this rugged land from which he drew his inspiration. We are the richer for the efforts of this dedicated public servant who did not hesitate to give his life to further that devotion.

[From the Florence (Oreg.) News, Mar. 10, 1960]

SENATOR NEUBERGER

Senator Richard L. Neuberger who passed away in Portland yesterday was a controversial figure in this area.

Although we have not approved of some of his proposed legislation, especially the creation of a national park south of Florence, nor of his methods in furthering his projects, we have appreciated his attitude in one respect: the voters always knew where he stood on vital issues.

In this respect Senator Neuberger was forthright. He did not waver. It would be gratifying if more of our public officials displayed this courage.

[From the Eugene (Oreg.) Register-Guard, Mar. 14, 1960]

NEUBERGER AS OREGON EDITORS SAW HIM

FROM THE MEDFORD MAIL TRIBUNE

"He went to the Senate as a champion of conservation, and he remained one. He sought increased appropriations for the Forest Service, the national parks, and the other Federal agencies charged with the responsibility for the conservation and protection of the Nation's outdoor resources. He fought for the multiple-use concept, and, within it, for single use of resources which justify such treatment.

"No public official of today is more responsible for what success this Nation has had in this field.

"But his interests ranged wider than this. He was also a champion of education, of health research, and of a better chance for a happy life and a higher standard of living for the people of this Nation, no matter what their station in life."

FROM CHARLES A. STANTON'S COLUMN IN THE ROSEBURG NEWS-REVIEW

"A 'monument,' I believe, will be his work in connection with saving for the public benefit the timber of the Klamath Indian Reservation.

"The Klamath Indians are to be freed from their status as wards of the Government. But involved in the legislation abolishing the former status is the disposition of assets belonging to Indians on the reservation. Included in those assets is a tremendous block of extremely valuable timber.

"Efforts were made by some interests to get the timber into private hands. In such case it would probably have been removed much too rapidly, and with inadequate financial returns to the Indians.

"Neuberger advanced a proposal to put the timber under Federal control and on a sustained yield program.

"He withdrew his own legislation, however, when an administration bill was presented, because he felt the issue was one in which there should be no partisanship.

"By his action he promoted accord and secured the adoption of a plan whereby the timber on the reservation will remain as a perpetual supply, while, at the same time, the Indians are assured of equitable payment for reservation resources.

"Thus the beautiful pine timber in the Klamath Reservation will be a monument to the Oregon Senator to whom conservation was almost a second religion."

FROM THE COOS BAY WORLD

"There has never been any doubt in anybody's mind, including Dick Neuberger's, that his first election was achieved on the coattails of WAYNE MORSE. Everyone's first election is generally achieved on someone's coattails, but this was especially true in the case of Neuberger, the first liberal Democrat elected in a statewide race for many, many years, and doing it with the vigorous backing of Oregon's newest Democrat, Senator MORSE.

"As a result, Neuberger was sometimes downgraded as a creature of MORSE. Even after the idea became ridiculous, there was the constant intimation that Neuberger could not have made it on his own.

"He wanted to make it on his own.

"There's no doubt in anybody's mind that he would have done so. Up to the moment of his death he was virtually unopposed by a serious candidate—Democrat or Republican. His support split party lines in every direction. This was the result of his exemplary record in the Senate—a record of achievement for his Nation as well as for his State and party."

FROM FRANK JENKIN'S COLUMN IN THE KLAMATH FALLS HERALD AND NEWS

"This leaves the way clear for him (Governor Hatfield) to appoint Mrs. Neuberger to fill out her husband's unexpired term, which has less than a year to run.

"The fact that they have worked as a team makes her a logical choice for the interim appointment. Mrs. Neuberger is thoroughly familiar with all the duties of the office. With all the personnel. With all of the current problems. She has been a partner in the job. She can carry on from where her husband left off. It would take anyone else the remainder of the unexpired term to learn the ropes and get the job in hand.

"That makes her a natural choice for the interim appointment. It would, of course, give her a considerable advantage in the campaign for election to a new term. But it would also give Oregon voters a good opportunity to study her and her opponent during the upcoming campaign.

"Besides, I find myself coming around to the belief that it might be a good idea to get more women into politics. The men haven't done too good a job. If they had done a better job, we might have fewer problems to face in these days."

FROM CHARLES A. SPRAGUE'S COLUMN IN THE OREGON STATESMAN, OF SALEM

"It is not easy for me to write of Richard Neuberger. We had become good friends,

and my respect had grown into warm admiration for the man himself and for the work he was endeavoring to do in representing the people of the State in the Senate.

"I think I have never known a man whose mind was so fertile. He was constantly coming up with fresh ideas, particularly in those areas of his interest: government, politics, conservation, human welfare, education, and lately health. His mind was seminal, originating proposals in what seemed to him the public interest. Moreover he was amazingly productive. How he turned out the volume of writings, of letters, of speeches that he did was beyond my comprehension. In the midst of his work in Washington, he found time to keep in touch by letter or card or phone call with his constituents. Nor was his circle limited to a few close friends. It was wide for he took every good citizen into his confidence.

"As for Neuberger's personal character I have known few men in public life who were as frank and honest as he was. He practiced no deceit himself, could not tolerate it in others. His mind and heart were always open, to be read freely by all.

"One cannot close a tribute to Dick Neuberger without including the other member of the partnership, his wife Maurine; for theirs was a partnership, with hopes and ambitions, effort and attainment and discouragement fully shared. It was a beautiful relationship; and now that the partnership is broken by death the sympathy of a great multitude goes out to her.

"For Richard Neuberger the epitaph should be: Distinguished journalist, conscientious legislator, ardent conservationist, able statesman."

FROM THE CORVALLIS GAZETTE-TIMES

"While maintaining his 'liberal' outlook he nevertheless recognized a fiscal responsibility that is lacking in most people with similar leanings. In his campaign announcement for a second term he said he had always emphasized the broad humanitarian needs of the American people, but that he had insisted that programs of social welfare be paid for in our own time by current revenues rather than being financed in the form of deficits. 'This may not be popular' he said, 'but I know it is right.' "

FROM THE SALEM CAPITAL JOURNAL

"Neuberger, as a writer, appreciated the dramatic. And the end of his career came dramatically, almost on the eve of the deadline for filing for his office. As a political historian he had a keen feeling for reputation beyond the present. One of his dreams of recent times was to have a place in history among the selfless, nonpartisan greats of the Senate. He didn't live long enough, in all probability, to achieve this. But he never had been more popular, and that popularity had nothing to do with party affiliations."

FROM THE ASTORIA-BUDGET

"The loss to Oregon in Senator Neuberger's death can only be measured in what he might have achieved had he been spared for continued service.

"The spontaneous and sincere expressions of shock and sadness by leaders of both political parties in State and Nation are evidence of the high respect he had attained in the opinions of his fellow citizens."

FROM AN EDITORIAL BY J. W. FORRESTER IN THE PENDLETON EAST OREGONIAN

"His personal correspondence was of amazing magnitude. Children of his friends always were in his thoughts. He wrote to them and sent them gifts. So many letters contained special messages for their children.

"He loved young people. When he went to the Senate he was offered patronage rights. What was his first choice? To appoint a Senate page. He established a research internship on his staff for outstanding graduates of Oregon colleges in political science and journalism. He gave a large portion of his earnings from magazines to Oregon colleges as scholarship funds. The book he wrote for children about the Lewis and Clark expedition was a best seller.

"His devotion to the preservation of natural resources was deep rooted. He paid the wonders and beauties of nature more than lipservice, as all who read his magazine articles knew. There was no subject he enjoyed more writing about. He enjoyed even more a day at the beach or at a lake or on a mountain trail. One of the most enjoyable days I've had was spent with the Neubergers on the beach at Ecola Park, a day of such beauty that we spoke of it many times thereafter."

FROM THE BEND BULLETIN

"Neuberger was an extreme partisan earlier in his political career. His maturity, plus the fact that his bout with cancer 2 years ago brought him expressions of hope and good will from all walks of American political life, had dimmed his partisanship.

"Future historians of the Senate probably will not recognize Neuberger as a 'great' in that body. Such honors never are accorded those who serve only one term.

"But Oregon historians will recognize him we are sure, as one of the most articulate men ever to serve in high office in or from this State."

TIME TO FARM EFFECTIVELY

Mr. PORTER. Mr. Speaker, I have introduced the Family Farm Income Act of 1960. In so doing I am supporting the legislation proposed by many of my colleagues who have expressed dissatisfaction with the administration's farm policy, including my colleague from eastern Oregon AL ULLMAN. Many variations of farm policy renovations have been introduced this Congress. From them I am hopeful that the hard-working Committee on Agriculture will report a bill which will solve the ever-mounting too long continued crisis in American agriculture.

Around us we watch as surplus commodities stockpile. We are told that in time of drought our surplus would be used up. It makes as much sense to pronounce solemnly that in the event of extreme heat the Potomac would dry up.

Our agriculture know-how is the best in the world. Our farmers produce more and more on less land. The administration's soil bank program has in no way alleviated the problem of overabundance. It is time for a change. It has been time for a change for a long, long time.

The Family Farm Income Act of 1960 is designed to raise family farm income while simultaneously reducing the cost to taxpayers.

Representative POAGE, the knowledgeable vice chairman of the Committee on Agriculture, calls this legislation a farmers' bill of rights. He says it answers the President's call to draft effective farm legislation. He has explored the bill completely with other farm experts and has already offered corrections which improve it.

It is not difficult to point out the trouble spots in agriculture today. One only has to look at the revealing drop in net farm income in 7 years. It has dropped from $15.3 billion in 1952 to $10.3 billion in 1959. The per capita farm income has failed to even remain at half that of the city resident. The parity ratio, the relationship of farm prices to other prices, has dropped from 100 percent in 1952 to 77 percent in 1960.

As my colleague, Representative GEORGE MCGOVERN, of South Dakota, noted in February, farm prices are down 16 percent from the 1952 figure while costs are up 11 percent. The squeeze is not new to the family farmer.

There are other trouble spots which have been recounted often in this House. Farm indebtedness is up $6.8 billion this year over 1952; interest charges have climbed. Representative MCGOVERN notes they are up 80 percent since 1952.

Statistics show that the farm population declined 3.5 million in 8 years. While this occurred the number of farm units dropped.

The legislation I have introduced has been designed to restore family farming to its rightful position.

It restores the farmers' bargaining power through self-imposed commodity regulations on production and marketing.

By balancing production with demand our national economic health would be strengthened. I believe that farmers can develop their own program to establish nationwide marketing quotas which will insure production to meet demand. I believe that it is possible to cut our reserve surpluses by 10 percent each year in an orderly program of distribution.

The bill I have introduced provides for the use of direct compensatory payments up to a maximum of $5,000 to any one producer to assure him a fair return for his marketing quota. This relief will be used only if needed. My farmer friends suggest that properly established marketing quotas will eliminate need for such compensatory payments.

Under this proposed bill each farm operator would have to place at least 10 percent of his tillable acres in a soil-building base. He could add to 30 percent more for which he would be compensated in payments of surplus Government-held feed grains rather than through cash payments as now established under the soil bank program. I think the two-pronged effect of such a system is obvious.

Under title II a new type of food distribution program is proposed. The Secretary of Health, Education, and Welfare is directed to increase the amount of high protein foods such as dairy, poultry, and meat products distributed to the needy, to institutions, and through the school lunch program. To carry out the program, the Secretary is directed to purchase any of the products which are not in the stocks of the Commodity Credit Corporation. Under the language of the bill:

Whenever any donee eligible to receive commodities desires to do so, such commodities may be purchased on the local market in accordance with the regulations promulgated by the Secretary of Health, Education, and Welfare, thereby relieving the Government of the necessity of storing and transporting such commodities. The sum of $500 million per annum for each year is hereby authorized to be appropriated to carry out this section.

As proposed the estimated cost of the program would be limited to no more than 5 percent of the annual market value of each of the commodities participating in the program. It is estimated that the program would cost about one-tenth the sum now being spent—or $0.5 billion yearly as compared to today's $5.3 billion.

In discussing this legislation with my colleagues I am aware that amendments will be necessary. I understand, for example, that the dairy industry has a working marketing program and does not feel it is wise or necessary to change it. Changes in wheat marketing are needed. I know that revised bills include such provisions.

My purpose in joining with my colleagues is to lend support in an area which does affect every other area of our economy. A healthy and strong farm economy is not an impossibility.

Surplus food, stored in warehouses at high cost to the taxpayer, benefits no one.

Poor acreage confined to a soil bank program does not meet the need to take out of operation highly productive land. This sort of operation does little more than rob the taxpayer as well as cripple the farmer.

The taxpayer and the farmer demand a new, effective farm program. Piling up surpluses is no answer. The Family Farm Income Act of 1960 offers the best route out of a distressing situation.

GENERAL LEAVE TO EXTEND REMARKS ON FOOD FOR PEACE PLAN

Mr. WOLF. Mr. Speaker, I ask unanimous consent that all Members desiring to do so may have permission to extend their remarks following my remarks on the food for peace amendment which was offered by me today.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

UPWARD ADJUSTMENT OF RESIDUAL OIL IMPORT LEVELS IS DEPLORABLE AND INEXCUSABLE

Mr. VAN ZANDT. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. VAN ZANDT. Mr. Speaker, it was with profound regret that I learned the Department of Interior was again bowing to the will of import companies. There is no justification whatsoever for this about-face which defies a Cabinet committee's security standards and strikes another cruel and unnecessary blow at labor and management in the domestic fuel and railroad industry.

The import levels were created to prevent foreign oil from enervating the American coal industry's emergency potential. For more than a decade incoming shipments of residual oil have closed mines, relegated mineworkers to the ranks of the unemployed, shoved railroad cars into an inactive state of deterioration, and taken away the jobs of maintenance and operating personnel. The effect on our whole business community has been primarily responsible for the serious labor surplus prevailing in coal communities and railroad centers.

I say to you frankly that, while I was gratified at the White House order initiating the mandatory control program on April 1, 1959, I was not at all satisfied with the import levels decided upon. Using 1957 figures to establish the criterion reflected a generosity toward importing companies that was unbecoming from the standpoint of the domestic economy. In 1957 the importers had shipped a total of 173 million barrels of residual oil into fuel markets of this country. It was a record year. Those imports amounted in energy value to more than 41 million tons of coal.

Having seen the gradual erosion of what has taken place in Pennsylvania's mining communities as a consequence of the rising tide of residual oil from foreign refineries, I favored a cutback that would reopen employment opportunities in my State and in the other regions where foreign oil had literally wrecked opportunity for miners, railroaders, and other workers whose livelihood is reliant upon a vigorous domestic coal industry. The White House, after careful consideration of the problem, came to the conclusion that it should adopt the quota limitations recommended by the Cabinet Committee charged with the responsibility of deciding at what point oil imports become a threat to the national security. The 1957 figures were set as the safe level.

Those of us seriously concerned with the impact of oil imports accepted the decision with reluctance. We were at least pleased that the White House had finally taken this official recognition of the importance of the coal industry and its relationship to the mobilization base. So we sat by and waited for the results. We felt that the limitation on the volume of residual oil imports thus established might at least provide an indication to the coal industry of just how far importers are allowed to go. The coal industry could make its plans accordingly. Railroads could use this information in projecting their operations to conform with general economic expectations of the coming years.

Now the status has been summarily upended. The Department of the Interior not long ago gave what I considered assurance that it would not cater to the arrogant demands of importers who willfully and flagrantly disregarded quota limits in the early part of this year on the assumption that they would be bailed out of an embarrassing market situation when their allocations had been exhausted. The upward revision has indeed paid off for the importers. They have now been cleared for delivery of another 12 million barrels of residual oil over the established limit.

This concession to major shippers is deplorable and inexcusable. I charge that the Department of Interior is inviting public distrust unless it hereinafter returns the quota limitations to the originally published levels and pledges that there will be no further concessions to oil importers under any circumstances. It is a solemn duty to the many families who depend upon coal production for a livelihood and to the millions more whose very security is interlocked with the ability of the coal industry to maintain the capacity that would be required in an emergency.

PHASING OUT OF THE NAVAL WEAPONS PLANT AT WASHINGTON, D.C.

The SPEAKER. Under the previous order of the House the gentleman from Maryland [Mr. LANKFORD] is recognized for 45 minutes.

Mr. LANKFORD. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. LANKFORD. Mr. Speaker, it is with deep regret that I find it necessary to address the House on a situation existing today affecting not only many hundreds of valuable, skilled craftsmen of the Federal Government, but indeed, to a degree, our entire national defense effort. I am referring to the deliberate phaseout of the Naval Weapons Plant located here in Washington, D.C.

During the course of my remarks, it is my intention to point out in detail certain policy decisions made by the present administration which I believe adversely affect our defense effort. In addition, I intend to review the inconsistencies in statements made to me as a Member of Congress, to several congressional committees, and to the public at large, concerning the mission of the Naval Weapons Plant.

In order that all may know exactly the nature of the installation under discussion, a brief description of this fine facility is in order. The Naval Weapons Plant is located in southeast Washington, on the north bank of the Anacostia River. It has a total acreage of 316 acres. Its total value in the plant account is currently listed at $104,616,800, which is further subdivided as follows:

Land	$1,922,500
Buildings	48,818,500
Equipment	53,875,800

The estimated value of the plant's present materiel inventory is $142,018,907.

A review of the total employment figures of the weapons plant beginning on June 30, 1956, to date will substantiate my deliberate phaseout charge:

Date:	*Personnel on board*
June 30, 1956	8,046
June 30, 1957	7,255
June 30, 1958	6,197
June 30, 1959	5,830
Feb. 15, 1960	5,740
Oct. 1, 1960 (approximate)	4,200

In order to explain why I feel it necessary to address this body this afternoon,

I would like to review briefly my relationships with the Navy Department through the Bureau of Ordnance in connection with two Government installations, the Naval Propellant Plant at Indian Head, Md., and the Naval Weapons Plant here in Washington. Beginning in 1955 I was confronted with a continuing series of layoffs at both installations, which were quite obviously tragedies to the individuals concerned and also created economic havoc in the local communities affected. With the rapid change in weapons development, with emphasis shifted to missiles, many of these reductions in force were unavoidable. However, many serious questions have been raised as to contract decisions, whereby Government installations were being bypassed in order to place work with private industry.

Until the past year and a half, I have always found the Bureau of Ordnance, now known as the Bureau of Weapons, to be cooperative, and believe that the Bureau recognized that I was genuinely interested in assisting the Department of the Navy in this conversion from obsolete conventional weapons to those demanded for the missile age. Unfortunately, I have at times been furnished incorrect information or denied information that would have assisted me in the discharge of my duties. There have been other instances when I became convinced that certain individuals in the administration were, to a large degree, unaware of the capabilities of their own installations.

An abiding conviction that I have acquired during the years that I have been privileged to represent the Fifth District of Maryland here in Congress is that to the majority of Americans their Congressman is the Federal Government. When a decision is made that affects an individual and the community in which he resides, little thought is given to the distinction between the executive and legislative branches of the Government. It is their Congressman who enacts the laws and appropriates their taxes for the management of the Federal Government. When a decision is made that virtually destroys a man's ability to earn a livelihood for his family, an explanation is demanded, and rightfully so; and his Congressman is the one looked to for this explanation. Today we find the Naval Weapons Plant very clearly and definitely being phased out by the Department of the Navy. My attempts, and attempts by several of our committees, to obtain the explanation demanded by the people, have been unsuccessful. Questions that I am raising today must be answered to the satisfaction of all of us; and until such answers are forthcoming, I believe it is the duty of this body to direct the executive branch of the Government to postpone further reduction actions.

Frankly, I am disturbed, as I know many of you are, over the increasing tendency throughout the entire executive branch to pat us on the head stating, "We'll tend the store. You just provide stock. If we get in trouble, we'll let you know." No Member of this body was elected for the purpose of rubber-stamping administration requests. I do not intend to echo a bureau's policy statement concerning the necessity for reduction or for allowing Government facilities to be idle until I am convinced that such action is clearly in the best interests of our entire country.

Whenever one attempts to defend Government installations, invariably a discussion of private enterprise versus governmental industry ensues. It is about time, I believe, that we stop trying to make a distinction between two important segments of our economy in this fashion. What we should be debating and considering is how to achieve the maximum utilization of all industrial facilities, be they Government or private. To allow any facility that is capable of supplying the needs of our defense and space effort in this deadly struggle with Soviet Russia to lie idle is unthinkable. But yet we are doing just that with the Naval Weapons Plant.

I, for one, will not apologize for defending as fine an installation as the weapons plant. In fact, I am proud to act today as the spokesman for the hundreds of dedicated employees of the plant. This installation has proved itself time and time again since its founding on October 2, 1799. Its many skilled craftsmen and engineers are known throughout the entire industrial establishment for having the capability of doing the best possible job in the shortest possible time.

Some have acquired the impression that we are dealing with an obsolete facility that is dying on its feet, with a very minor contribution being made today to our defense effort.

Incidentally, I might add that the same objections of obsolescence and lack of know-how were applied to the Naval Propellant Plant, located at Indian Head, Md. Fortunately, the distinguished chairman of the Armed Services Committee, Mr. VINSON, granted my request for an investigation of the bypassing of the Naval Propellant Plant in 1958. With pride, I must state that when the Special Subcommittee on Investigations began its investigation of the plant, the employment level at the propellant plant was 1,379. As of March 1, 1960, the level has reached 1,937. The propellant plant is now producing a key item for the Polaris missile, this notwithstanding the statement that the plant did not have the know-how or the technical capability to compete in today's propellant business. I am pleased to say that such was not and is not the case, and that this fine installation is contributing significantly to the defense effort on the Nation's No. 1 weapon, Polaris.

Now, in chronological order, let us examine what has transpired at the Naval Weapons Plant, formerly known as the Naval Gun Factory, since mid-1956.

On September 26, 1956, the Superintendent of the Naval Weapons Plant, Rear Adm. David M. Tyree, in announcing the layoff of 160 employees, stated:

> The factory expects to reach its low ebb in both production and employment in this, the 1957 fiscal year.

Officials at the factory went on to say that they expected this to be the last major personnel shakedown that has seen the agency shrink from a Korean war high of 11,500 employees to 7,776. This reduction was understandable and I believe unavoidable.

But from this period on, the unwillingness or inability to make decisions that would assist the plant in its conversion efforts has led the plant, despite numerous warnings, to its present-day situation. I was informed in 1957 that by the start of the 1958 fiscal year employment at the gun factory would begin a small, gradual rise and would stabilize itself above the present civilian strength. The factory was then assigned the huge task of building the launching equipment for guided missiles to be installed on ships. I will discuss these contracts which were performed in such creditable fashion later on in my remarks.

Notwithstanding these most reassuring words, at least reassuring to the employees of the gun factory and to me, less than 1 year later, on August 14, 1957, I was advised that the Naval Gun Factory planned a reduction in force by June 30, 1958, of 255 additional employees.

In his statement to me of August 14, 1957, the Assistant Secretary of the Navy for Materiel indicated that no further reductions would be required during fiscal year 1958. Nevertheless, 4 months later in January of 1958, the superintendent of the gun factory announced a further reduction in force of 500 employees. It is entirely possible that with cooperation with representatives of the various employees associations, and with better administration, the impact of this reduction in force could have been lessened considerably. It was shortly after this regrettable reduction in force took place that an article appeared in the Log, which is the official publication of the Naval Weapons Plant. I would like to quote from the article appearing in the March 25, 1958, edition, as follows:

> AT LEAST A YEAR OF WORK IN SIGHT FOR ON-BOARD EMPLOYEES
>
> A number of rather sensational stories appearing in the local press recently resulted in a spate of rumors here. The local newspapers were quite pessimistic in tone regarding the role of the gun factory in the new Navy. It was even hinted that the Naval Gun Factory might be forced to shut down.
>
> Actually, say gun factory officials, we are getting more work now than we have for some time. Although we have passed through some lean periods during the last 2 or 3 years, culminating in the recent reduction in force of about 500 workers, we now have enough work in sight to maintain our present work force of about 6,280 employees.
>
> Concern for the gun factory's future role was felt because we have long been known as one of the principal makers of guns for the fleet. Since guns are no longer being produced in quantity, some have thought that our usefulness is now nearly ended.
>
> Meeting with employee group representatives on March 7, Capt. Thomas S. King, manufacturing officer, said that the workload in prospect for the next several months is the best since he arrived at the gun factory. Captain King came here in November of 1955.
>
> To sum up, the gun factory still is fulfilling its old role as an important armorer of the fleet. Expectations are that it will continue to do so.

In the April 11, 1958, edition an interesting article appeared describing a large floturning job under a contract to produce 10,000 canisters for the Sidewinder missile.

It has been reported that the weapons plant is unable to produce the weapons demanded by today's modern Navy. At this point I think it well to refresh the recollection of all on the fine performance in the Formosa Straits several years ago, when a large number of Chinese Mig's were shot down by Free China's jets armed with the Sidewinder missile.

On July 23, 1958, when further r.i.f.'s were announced, they were deemed necessary as a part of a modernization program consistent with an assigned new role to the naval gun factory. This new role and optimistic statements about the future were set forth in glowing terms in the July 3 edition of the Log. Excerpts are as follows:

NAVY ASSIGNS GUN FACTORY NEW ROLE FOR MISSILE AGE—WILL KEEP PLANT OPEN FOR DESIGN, PROTOTYPE WORK AND TESTING

The Naval Gun Factory, now in its 159th year, is about to take on a new look. The Navy has decided not to scrap it along with its guns, but to give it a new mission.

The gun factory will become primarily a plant for research, design and the prototype manufacture of the new missile age weapons, Capt. Charles E. Briner, NGF superintendent, announced recently.

The Navy's decision to maintain the gun factory as an important facility for the design, prototype manufacture and testing of new type weapons should allay some fears of gun factory workers who have been working under a cloud of uncertainty as to their future careers. Probably less than 5 percent of the total work force now on board will be affected by the change.

But once that changeover is effected, once the gun factory has settled down to its clearly defined place in the Navy, there should be a considerable uplift in employee spirit. For although most workers have not lost faith in the gun factory, morale should improve with the new mission. Once again the gun factory is going to be a good and a most interesting place to work.

In August 1958, in a letter to the board of trade, Assistant Secretary of the Navy Richard A. Jackson estimated that the transition in the Naval Gun Factory would take 5 years and would result in large savings and high employment here. He also wrote that although the changeover would require adjustments in personnel, the program would be executed with a minimum personnel dislocation. It was at this time that Rear Adm. T. A. Ahroon, Acting Chief of the Bureau of Ordnance, told the Washington Board of Trade that "none of the facilities at the Naval Gun Factory are in excess to the needs of the Navy." This was now in the latter part of 1958. On September 24, 1958, a statement was made by the superintendent of the gun factory, in connection with a still further reduction in force, and I quote:

I realize there have beer some pretty wild rumors. Right now let's get one thing absolutely straight. The gun factory is not, and I repeat, the gun factory is not planning new major reductions in force involving a large number of employees. The modernization of the gun factory is proceeding, and I know the Bureau of Ordnance is proud of the excellent work being done here and that the Bureau will continue to utilize the facilities of the gun factory to the maximum extent possible. I expect that, with normal attrition, only a very small percentage of our civilian employees will be affected by the changes that will be required of the gun factory.

I had every reason to believe that the superintendent of the gun factory made this statement in absolute good faith, as did the factory's employees. Unfortunately, those above him did not share his views.

On December 12, 1958, we find an editorial appearing in the Log, stating the following:

WORKLOAD SITUATION VERY GOOD

There appears to be some confusion as to what has been happening at the Naval Gun Factory in regard to our workload over the last few months. Let's try to square this away right now. Today the Naval Gun Factory can be said to be in a period of saturated workload. What I mean by this is that our current workload has caught up with our shop capacity and if we don't watch out, it will bog us all down.

In business, production outfits run through lean years and fat years. We have, in the last few years, been caught in the post-Korean war aftermath of lean years for work when we still had too many direct and indirect workers to handle the jobs being assigned us by the Bureau of Ordnance and our other customers. This year, after completing our reduction-in-force actions of last spring, we have slowly managed to shift over to a year of prosperous workload.

Our major problem now is not that of getting more work, but how to get the already heavy commitments into the shops and the finished products out on schedule. This has happened mostly because of major programs started in the last 6 months. In the guided missile launcher programs some design problems have been difficult and the schedules are now really tight. Our job is to produce quality ordnance for the fighting fleet. However, we also must meet ship conversion or building schedules. At present, all three of our current major missile launcher programs are "hot."

We now have the best and most optimistic work situation that the gun factory has had for several years; and, for a change, it is actually financially supported for well over a year.

And on January 7, 1959, the following New Year greetings from the superintendent of the factory:

NEW YEAR GREETINGS FROM THE SUPERINTENDENT

The new year, 1959, holds great promise for the Naval Gun Factory if we continue our efforts to stretch our dollars. The workload looks good, and I am sure that with concentrated teamwork the Naval Gun Factory will continue to occupy an important place in the ordnance development program of the Navy.

I extend to each of you my best wishes for much happiness and success in the coming year.

Capt. CHARLES E. BRINER,
U.S. Navy.

It was during the month of December 1958 that the Hébert Subcommittee on Special Investigations, at my request, investigated the conflicting statements concerning the outlook of the gun factory. During testimony I attempted to determine whether the Government's plants today are given a chance to support private industry to the extent of protecting the taxpayers' investment in idle equipment. Assistant Secretary of the Army for Logistics Higgins answered as follows:

I see your point. Yes, I would say generally, no, this is not the policy. If we could buy this in competition on the outside, we would do it.

I then asked:

Despite the fact that it would mean a plant sitting idle?

The answer from Mr. Higgins was:

That is right. Yes, sir.

Further on, in testimony before the Hébert subcommittee, significant questions were asked of Assistant Secretary of the Navy Bantz and Admiral Stroop. During the course of this testimony an internal survey was mentioned for the first time. A very interesting history will follow as to what the attitude of the Department of the Navy has been on its own survey and how my attempts to obtain pertinent facts contained in the survey, as a member of the Armed Services Committee, were rebuffed by the Department of the Navy.

During the course of the hearings, Assistant Secretary of the Navy Bantz agreed, in response to my questioning, that our facilities could be utilized to a greater extent than they are and assured me that the Department is more conscious of the value of producing component parts of the Navy's weapon systems in facilities such as the Naval Gun Factory. These were reassuring words to the committee, but unfortunately actions during the next 12 months made a mockery of these words.

A most informative discussion took place during the hearings between Mr. Bates, a member of the subcommittee, and Mr. Bantz and Admiral Stroop, concerning the computation of overhead costs. Admiral Stroop readily admitted that "if you want to play with overhead, you can get any kind of a price you want."

The reason why the overhead discussion is so important is that the true cost of items manufactured at the plant is not being fairly computed. Admiral Stroop referred to the 23 tenant-type activities at the plant. Approximately $1.40 an hour is loaded into the Naval Weapons Plant's total costs price as a result of such tenant activities, which in no way contribute to the produced item.

A most interesting sidelight, which is germane to this discussion, is the number of personnel in one of the facilities of the weapons plant serving tenant activities. In the Supply Department, of 900 employees only 250 are involved in supply of the industrial facility.

The subcommittee stated that in its opinion this was a vital facility to our defense effort and relied upon the assurances given by the witnesses that the recommendations of the survey referred to previously would be given serious consideration and implemented wherever possible in order to create a more stabilized situation at the plant. Since it became readily apparent to me that the survey in question would have a great bearing on the future workload

of the plant, on December 2, 1958, during a conversation with Admiral Stroop after his testimony before the committee, I requested that I be furnished a copy of the survey.

It became necessary for me on December 12, 1958, to make a formal request of the Secretary of the Navy, which was denied. For the first time the term "internal administrative document" was employed. I protested this designation directly to the Secretary of the Navy and, after a delay of 5 weeks, I received a reply to my protest signed by Assistant Secretary Bantz, which once again denied my request. I felt most strongly that if I, as an individual Member of Congress, did not have a right to this survey, then most assuredly the House Armed Services Committee, of which I am a member, did. Here was a clear case of government in darkness. It is my belief that all the people have a right to know how their Government is being run and that we, as the elected representatives of the people, have a duty to ascertain the facts upon which intelligent decisions can be made and to inform our people of these facts and decisions.

It is for this reason that I made repeated demands for the survey in order that I could form my own opinion as to the plant's prospects for the future.

It became necessary for me to refer this denial to the House Committee on Government Operations, the Subcommittee on Government Information, under the chairmanship of our distinguished colleague, Congressman JOHN E. Moss. The committee, on April 20, 21 and 23, held extensive hearings on this arbitrary denial and completely vindicated my position that I, as a Member of Congress, was entitled to the survey in question.

It must be emphasized again at this point that the survey board I refer to was convened by the Chief of the Bureau of Ordnance on March 21, 1958, with Capt. B. L. Lubelsky, U.S. Navy, as chairman. To use Admiral Stroop's words, Captain Lubelsky is "an outstanding industrial engineer with considerable experience, both in the Bureau and our activities."

Quite properly, there were doubts raised as to certain of the recommendations and, more importantly, considerable confusion did exist as to why many of the sound recommendations contained in the survey were not implemented.

I have emphasized the Lubelsky report and the reliance placed upon it by the committee for a reason. At the conclusion of my remarks, I will submit a reorientation proposal for the plant prepared by highly trained and capable engineers. The proposal, to a large extent, is an outgrowth of the original Lubelsky report, which, incidentally, cost the taxpayers $12,135 to prepare, yet Congress has been denied access to it.

During the course of the Moss subcommittee's hearings, Mr. Bantz, in an attempt to discredit certain public statements that were made, said this concerning the future outlook of the Naval Gun Factory—and this was approximately 1 year ago:

> I would like to say this to you. We have talked about this Naval Gun Factory here in Washington for a little over a year and a half. There has been a lot of publicity given it. Since my tenure of office down here, there has never been, to my knowledge, and I would have known, any plan to close the Naval Gun Factory; there is no such plan now.

Further in the testimony, the possibility of a name change was raised with Secretary Gates, and the Secretary indicated his approval of such a step. His comments certainly led all of us to believe that the plant would remain as an active producer of naval weapons.

Subsequently, on May 18, 1959, the Navy announced the name of the Naval Gun Factory would be changed to the U.S. Naval Weapons Plant, effective July 1, 1959.

Prior to this announcement, and shortly after the conclusion of hearings held by the Hébert subcommittee, the long-range outlook for the Naval Weapons Plant brightened considerably. On February 25, 1959, the Chief of the Bureau of Ordnance, in a letter to the superintendent of the plant, advised the plant of the implementation of a program to be known as Project Fire Control. I quote from this letter:

> 1. In order to provide a needed "in house" capability in the fire control area, the Bureau of Ordnance is planning to assign manufacturing of guided missile fire control to the Naval Gun Factory. This step, being one of major proportions, will require the highest and most effective type of management by the Naval Gun Factory and the Bureau of Ordnance, and the complete support of higher levels within the Navy Department.

Understandably, after this letter was made public to the employees of the plant, morale rose considerably, and it seemed at long last that the plant could look forward to a reasonable future in remaining a full partner in our defense effort. Late in October 1959 rumors began to appear concerning the possible loss of the aforementioned fire control contract. I immediately dispatched a telegram to the Secretary of the Navy and was joined in this by the Governor of the State of Maryland. This apparent breach of faith on the part of the Navy caused considerable consternation and very directly has led to the present-day situation.

In my telegram, I asked for a complete report on the status of the previously awarded contract. My telegram, in the absence of Secretary of the Navy Franke, was acknowledged by Under Secretary Fred A. Bantz, and I quote from his telegram of October 28:

> In the absence of Secretary Franke and in reply to your telegram of October 27, 1959, I would like to assure you that at the present time the Navy has no plans to transfer any work which has been planned for the Naval Weapons Plant, Washington.
>
> Sincerely,
>
> FRED A. BANTE.

The rumor subsequently proved to be true, inasmuch as the approximately $10 million contract was pulled from the weapons plant. Originally an outright cancellation was not made, however, as the Bureau of Ordnance informed the plant that budget troubles threatened to delay the contract for another 6 months. Capt. Charles Briner, plant superintendent, was quoted as being "a little upset" by the events. "We are ready and prepared to do the job," he said, "and all we need is the money." But Briner said the Bureau had promised him again that week, this was in October, that the plant would get the contract eventually and that there were no plans to transfer it to a private concern as had been reported. "If and when the plant gets the contract," Briner said, "several hundred new employees would be added to assemble electronic parts and to work in the electronic field."

It was at this stage of the proceeding, before the weapons plant had been informed officially that it would not receive the contract as promised, that I was advised by letter of November 10, 1959, by Admiral McCain, Chief of Legislative Affairs, that the Navy had established a new ad hoc committee of four civilian industrialists to study a number of activities administered by the Navy. Among the activities to be resurveyed was the Naval Weapons Plant, Washington, D.C. I was assured that I would be advised of developments after the committee completed its examination and submitted recommendations.

The ad hoc committee referred to in this letter has long ago completed its findings and has submitted its recommendations to the Secretary of the Navy, the Under Secretary of the Navy, and the Chief of the Bureau of Weapons. To date I have received no information whatsoever officially from the Department of the Navy concerning the recommendations of the committee. On January 15, 1960, I discussed this matter by telephone with Assistant Secretary of the Navy for Materiel Milne, and was informed that the report by the four industrialists had not yet been completed. There is no doubt that the report in question has now been completed and is under active consideration by the responsible officials in the Department of the Navy as of this very moment.

I find it difficult to understand the necessity for an additional committee such as this one. The Navy saw fit to a degree to ignore the carefully prepared Lubelsky survey, which took 6 weeks to prepare, as opposed to the few hours spent by the civilian industrialists at the weapons plant.

On December 2, 1959, I was advised by Admiral McCain that the program known as the electronics fire control program planned for the Naval Weapons Plant for spare fire control systems for the Terrier and Tartar guided missiles, would be withdrawn from the plant. I was informed that the cancellation of this program would have no immediate effect on the level of employment at the Naval Weapons Plant, and was assured that every effort was being made to find additional future workload for the Naval

Weapons Plant to take the place of the guided missiles fire control program.

On December 10, 1959, a lengthy meeting was held with Secretary of the Navy Franke and Under Secretary Bantz concerning the cancellation of this fire control contract. I was assured that there was no basis for rumors that the contract cancellation was caused by transfer of the work to private industry, and that every possible effort would be made to find additional work for the plant.

These words were fine, indeed, but I most regretfully must report today, that in my opinion, not one single specific thing has been done. In fact, as I will develop in a few moments, every effort has been made in recent weeks to prevent the Naval Weapons Plant from procuring additional work on its own.

On January 8, 1960, the Metropolitan Washington Board of Trade brought the entire matter to the attention of the Senate Subcommittee on Preparedness Investigation of the Committee on Armed Services.

Under unanimous consent I insert the entire letter at this point in the RECORD:

THE METROPOLITAN WASHINGTON
BOARD OF TRADE,
Washington, D.C., January 8, 1960.

The Honorable LYNDON B. JOHNSON,
Chairman, Subcommittee on Preparedness Investigating, Committee on Armed Services, U.S. Senate, Washington, D.C.

MY DEAR SENATOR JOHNSON: We understand that the chairman of the Armed Services Committee has referred to your subcommittee Senator BUTLER'S letter to him of December 8, 1959, requesting an investigation of the Navy's policies surrounding the cancellation of programs in the shore establishments of the Navy. Senator BUTLER is, of course, immediately concerned with the naval weapons plant here in Washington.

Understandably, the Metropolitan Washington Board of Trade is also deply concerned about the future of this installation which has been for more than 150 years extremely important to the economy of the National Capital. This establishment was an important employer in the area even before the National Government was transferred to Washington in 1800.

Our research department has carefully reviewed this matter and estimates that, in addition to the approximately $36 million payroll of the more than 6,000 military and civilian personnel, the weapons plant supports 8,250 gainfully employed people in the Washington metropolitan area with a total 1958 payroll of $33 million. The total economic impact, therefore, on this community of the naval weapons plant is approximately 14,500 jobs having $69 million annual payroll income. This is 1.6 percent of all employment in the metropolitan area of Washington. These jobs support approximately 10,000 households and a population of some 25,000. We estimate that total retail sales attributable to the weapons center and supporting employment is about $45 million a year. These statistics make it clear why this organization is deeply concerned about the trend which seems to be in progress.

The current cycle of work reduction in this plant began in the spring of 1958. On May 29, 1958, the then president of the board of trade communicated with the Honorable Thomas S. Gates, the then Secretary of the Navy, transmitted to him information about the importance of the plant in this community and sought his assurance that the present level of employment would be held.

Subsequently on July 2, 1958, a committee from this organization discussed the problem with the then Under Secretary of the Navy William B. Franke at the Pentagon. We inquired of Mr. Franke if the employment level would be held and understood him to assure us that it would not go below something over 5,000.

At this conference we advised the Under Secretary that we would not support or request continuation of the present level of employment if it would be demonstrated that it was inefficient or uneconomical to continue operation of the weapons plant. We requested him to advise us if such a determination had been made and if so, if the Navy Department would then be willing to declare all or part of the plant surplus so that we might seek to interest a private employer who could use the facilities. The Navy Department on July 29, 1958, advised us that at the present time, none of the facilities at the Naval Gun Factory are excess to the needs of the Navy."

Some months ago we began to hear rumors that an effort was being made to transfer the fire control systems program which had been assigned to the naval weapons plant to another facility. On inquiry to responsible officials of the Navy Department we were advised that there were no such plans.

Understandably, therefore, we were considerably surprised to learn early in December 1959, that the guided missile fire control systems program had been canceled.

It seems to us utterly inconceivable that responsible officials of the Navy Department can change their minds at frequent intervals about the workload at the weapons plant. This is a very valuable facility. The property is carried on the books of the District of Columbia tax assessor at $44,581,-897 and of course such a figure does not fully reflect current values. The plant has been in operation more than 150 years. Many competent people have been trained there and are now employed there. As indicated above, this plant has a very significant economic impact on the National Capital area. It would seem to be highly essential that the Navy Department formulate a sound policy toward this plant, make its plans known to the responsibile elements of the community and then proceed to follow same.

We sincerely trust that the Preparedness Investigating Subcommittee will carefully review this matter promptly. We will welcome the opportunity of furnishing additional information and appearing at any hearings which may be held.

Very truly yours,

E. K. MORRIS,
President.

Mr. Speaker, on February 9, 1960, a meeting was held by the board of trade and representatives of the plant to discuss the future of the plant. Secretary Milne gave his assurances that a decision would be immediately forthcoming and that the board of trade would be advised what, if any, facilities were available for the use of private industry. I have been advised by Mr. Gunther, of the board of trade, that over 105 civilian industries have expressed interest in the plant and its highly skilled personnel. Obviously, if the present rifs are allowed to continue and these individuals, by necessity, must leave the Washington area to find new employment, then the attraction that certain of the plant's facilities may have for private industry will be considerably lessened, if not completely nullified.

While I am still convinced that there is absolutely no justification for the Navy Department to allow this facility to wither on the vine, I nevertheless feel that the most important issue to be resolved here is what steps must be taken and taken now to restore this defense plant to the industrial establishment of the United States, for it is inconceivable to me that we can afford to squander the type of facilities that are here, and more important that we can afford to lose for 1 day the highly skilled crafts and highly trained engineers available to our defense effort.

During this period, as a result of unusual publicity given to the plight of the plant, the general public seems to have been given the impression that we are discussing an obsolete facility that is of little or no use to the Defense Establishment. Letters of commendation recently received by the plant should correct this erroneous impression.

Under unanimous consent I include at this point in the RECORD a letter dated February 8, 1960, from the Chief or Naval Operations to the Superintendent of the Naval Weapons Plant—subject: Superior performance of the Naval Weapons Plant:

DEPARTMENT OF THE NAVY, OFFICE
OF THE CHIEF OF NAVAL OPERATIONS,
Washington, D.C., February 8, 1960.

From: Chief of Naval Operations.
To: Superintendent, U.S. Naval Weapons Plant.
Via: Commandant, Potomac River Naval Command.
Subject: Superior performance of Naval Weapons Plant.

1. The Naval Weapons Plant recently participated in a quick reaction capability program which required modifications to certain shipboard fire control systems and the installation of several units of classified experimental electronic countermeasures equipments. This task involved considerable engineering effort and required completion in a minimum time.

2. Engineers assigned by the Naval Weapons Plant accomplished this project expeditiously and with the highest quality of engineering and workmanship. The close liaison and coordination with the Naval Research Laboratory scientists resulted in very quick fabrication and test of the components of the system. It is now evident that without the close support and coordination of the Naval Weapons Plant the project would have been delayed by at least 6 months.

3. The Chief of Naval Operations commends the superintendent, U.S. Naval Weapons Plant and the personnel under his command for the expeditious and excellent performance in this important electronic countermeasures project.

WALLACE M. BEAKLEY,
Deputy Chief of Naval Operations, (Fleet Operations and Readiness).

On February 17, the Navy Department announced the large-scale reduction in force, one of which is currently taking place.

The Navy Department in its statement of February 17 in its fact sheet on the Naval Weapons Plant makes the following statement:

There is no additional work which can be assigned to offset the decline in work in process which necessitates these reductions in force.

This statement, which may have been true when issued, is definitely no longer true. The facts in the case are that the Naval Weapons Plant today is actually turning down work that could be assigned to the plant.

One specific example, which has been recently brought to my attention, involved what was, it is true, a small contract—total price, $6,500. It was solicited by personnel of the plant from the Maryland Shipbuilding & Drydock Co. It was a contract involving 10 castings. The material in question was delivered to the plant for processing and had to be picked back up by the Maryland Shipbuilding & Drydock Co. when the plant stated that they could not honor the scheduled delivery deadline suggested by one of its own officials because of lack of personnel. It was necessary for the Shipbuilding & Drydock people to pick up the castings and return them to the Baltimore area.

Another recent case which has been brought to my attention involved the attempted placing of an approximately $1 million order by the Marine Corps by its equipment board located in Quantico, for the manufacture of handling and loading equipment. I have been advised that this contract, an eventual joint contract for both the Marine Corps and the Army, would have ultimately led to an additional $10 million contract for the Army. Immediately after this contract was directly placed, high officials in the Bureau of Weapons issued instructions that there would be no more direct solicitation of workload for the weapons plant if the contract in question was in excess of a certain amount, which has fluctuated from $25,000 to $50,000. I do not contest the right of the Chief of the Bureau to exercise control over work being placed in the plant; but I do question the reason behind the interrogation of weapons plant officials as to whether or not they directly solicited the work in question. It is my understanding that a portion of the contract has now been placed with the plant, and I am certainly hopeful that the full potential of this contract can be realized. Very recently, the Bureau placed with the weapons plant an order for 200 Tartar missile booster sustainers. This was not an act of charity on the part of the Bureaus, but was a necessary production requirement that had to be fulfilled on time. There is only one other facility to my knowledge that is in the production of this most important item.

I have been further advised that as a result of adverse publicity and uncertainty demonstrated by the Bureau, many skilled employees of the plant have voluntarily left in recent weeks, making it impossible for the plant to schedule certain items that they otherwise would have been able to schedule. Frankly, inasmuch as this uncertainty has hung over the heads of the employees of this fine installation since 1956, I, for one, cannot blame them for seeking other employment which will offer them a degree of security that apparently the Navy cannot or will not provide them.

I am sure that in some cases on certain of these points there are honest, legitimate answers that can be offered as reasons for the condition that exists; but I submit that it makes absolutely no sense to the employees of the plant to be told that we are in a phaseout operation and that there is no work that can be scheduled that will restore a degree of stability to the plant, when every single employee at the plant knows that work is being turned down daily.

While I do not have the exact figures concerning work orders placed by the National Aeronautics and Space Administration, I am advised of an internal memorandum whereby there will be no acceptance of work orders from this agency by liaison personnel. This, notwithstanding the fact that a considerable number of small orders have been placed with the plant during the past year by the National Aeronautics and Space Administration and that NASA itself has expressed complete satisfaction with both the price and the quality of the job done by the plant.

During the recent conference, held by representatives of the plant and the board of trade with Secretary Milne, he expressed considerable surprise to learn that recruiters are still touring the country looking for engineers and technicians to staff the plant.

So here we have a situation where apparently the Navy is officially encouraging recruiting of certain engineering skills for what the Navy has termed a facility that is to be reduced considerably and, in my opinion, is to be deliberately phased out completely as an industrial entity.

As recently as March 3, 1960, Admiral Stroop in testimony before the Senate Appropriations Subcommittee assured the committee that there was enough work to keep the plant open through calendar 1961, but that there was not enough to keep the work force even at the predicted October level unless new orders are forthcoming, and none are in sight. This statement appears to be inconsistent with the aforementioned turndown of work orders.

What has brought about this situation? Most assuredly a partial answer to that question stems from the official policy of the present administration; and, therefore, if we accept this policy, then we need not be surprised as to the condition that faces not only the naval weapons plant but many Government installations throughout the United States.

I would like to quote from the Bureau of the Budget Bulletin No. 60–2, dated September 21, 1959:

> The Federal Government will not start or carry on any industrial activity to provide a service or product for its own use if such product or service can be secured from private enterprise through ordinary business channels.

The bulletin further states:

> Continuation of Government operation on the ground that procurement through commercial sources would involve higher costs may be justified only if the costs are analyzed on a comparable basis and the differences are found to be substantially and disproportionately large.

The bulletin continues:

> The admissibility of large and disproportionately higher costs as a possible compelling reason for continued Government operation does not alter the general policy which establishes a presumption in favor of Government procurement from commercial sources and does not prohibit procurement from more costly commercial sources.

What this policy states is that there should be no commercial-industrial activity in the Federal Government. All such existing activities are illegitimate and must and will be stamped out without regard to cost, human factors or technical skills that would be forever lost to the defense effort.

As a practical matter, if private business cannot make enough profit from Government work, then it is fine for the Government to go ahead and perform it. Now I have another specific example in connection with the weapons plant, which, although a small one, illustrates perfectly what I have just said.

Last week, during an inspection of the weapons plant and its facilities, a prototype of a Polaris test missile was delivered to the plant. During a recent test run off the east coast in the New England area, this test vehicle was damaged. Attempts to find private industry in the area to make the necessary repairs proved to be of no avail. Thought was given to shipping the vehicle back to Lockheed on the west coast and at this point someone thought of the Naval Weapons Plant. As I have stated, during the inspection the vehicle arrived at the plant for repair.

In recent days, a statement was issued by the Under Secretary of the Navy concerning the reason for the weapons plant's dilemma. In effect, he said that the Navy is in the business of ships, planes, and missiles. The naval weapons plant is a job-order gun plant and there is no longer a need for guns. I think you can well imagine the effect a statement of this sort has upon the employees of the weapons plant who are engaged in the manufacture of numerous missiles and their component parts. I would now like to add at this point in the RECORD a listing of those projects from the January 1960 financial statement prepared by the U.S. Naval Weapons Plant, Washington, D.C., which I assume is made available routinely to the Secretary of the Navy and his staff. This list reveals direct application to the manufacture of ships, planes, and missiles:

Under the title of "Major Program Description," I will read only a sufficient number to indicate the great variety of programs that the weapons plant is now participating in or has participated in in recent times:

Talos molds.
Rangefinders.
Radar antenna mounts.
Computers.
Rocket Launcher Mark 108.
The Mine Mark 57, the 56, so necessary in ASW warfare capabilities today.
Polaris flat pad launcher.
Truck handling and lifting equipment for the Marine Corps.
Mobile optical tracking unit for Patrick Air Force Base.
Grind ceramic cylinders for RCA.
Tiros satellite fabrication for NASA work, associated with missile tracking.
Shipping containers for liquid explosives.

Mark 7 Missile Launcher; Mark 12 Missile Launcher; Depth Bomb Mark 101; Gun Director Mark 68 dual thrust rocket motors, which includes the Tartar rocket motor assembly; various telescopes produced by one of the most outstanding optical shops in the country, either private or government; Sidewinder; various mine components; and propellant grain immobilizers.

How effective has the plant been in the manufacture of the items just mentioned? Let me read more letters of commendation and other official statements. Once these letters and bland assurances are considered, I think all will realize why each employee of the weapons plant has a right to know the reason for this incredible mismanagement of an installation that each man knows to be one of the finest of its type in our Nation's industrial establishment.

I wish to point out that this is not to be dismissed as a local situation, and I realize fully that many of you have experienced similar reductions in force in government installations in your home districts; but I must emphasize again that the Naval Weapons Plant is situated in Washington, D.C., and, hence, truly belongs to the entire Nation in every respect. Admittedly, approximately 40 percent of the employees of the plant are residents of the Fifth District of Maryland, primarily living in Prince Georges County. During the 4 to 5 years that I have been intimately associated with the problems of the Navy in connection with the administration and operation of the Naval Weapons Plant, I have come to know many of these individuals well and can assure you that I have taken the time to inspect the facility time and time again, and can state unqualifiedly that here we have men possessed with some of the finest skills anywhere in the world's labor market. These are men in some cases with 20, 30, 40 and even 50 years of dedicated service to our defense effort, who are now being told that their plant is obsolete and can no longer fulfill a useful function at the very time when they are working on crash project after crash project for programs necessary in arming the fleet or in providing materiel for our space test vehicles.

The following statements will clearly show that these fine workers have met every challenge. They should expect in return capable administration of the facility on the part of the Department of Defense. If this is not supplied, then Congress has a duty—yes a duty—to act.

On November 26, 1958, the Chief of the Bureau of Ordnance wrote the following letter of commendation to the superintendent, signed by Rear Adm. W. F. Raborn, Director of Special Projects, which I insert at this point in the RECORD:

DEPARTMENT OF THE NAVY,
BUREAU OF ORDNANCE,
Washington, D.C., November 26, 1958.

From: Chief, Bureau of Ordnance.
To: Superintendent, Naval Gun Factory, Washington, D.C.
Subject: FBM program (NGF project order No. 710); construction of flat pad launcher; commendation for.

1. In October of this year, an urgent need developed in the FBM program for a flat pad type missile launcher at the Navy complex, Atlantic Missile Range, Cocoa Beach, Fla. Required delivery date for the launcher was December 1, 1958.

2. The initial contact by this Office with representatives of the gun factory was October 22; shop work started on October 24 and the launcher was shipped on November 18 with an estimated on-site arrival date of November 20.

3. It is requested that you extend my sincere appreciation to everyone who participated in the expeditious handling of this element of the Navy's top priority program.

W. F. RABORN,
Director, Special Projects.

FIRST ENDORSEMENT

DECEMBER 16, 1958.

From: OOO.
To: NGF personnel.

1. I want to express my personal appreciation to all gun factory personnel whose efforts contributed to the success of this project. The completion of this vital project ahead of schedule demonstrates the capabilities of the gun factory. It shows teamwork from the engineering department, the supply department, shops C–6 and R–1 of the manufacturing department, and shop 11 of the Public Works Department.

2. I am certain that continued performance at this level will insure the future of the gun factory.

CHAS. E. BRINER.

Early in 1959, the gun factory very justly had every reason to be proud of the national recognition it had received for its expert technical competence in the welding research field, which is a major factor in the critical period of technological change and missiles development. Mr. Julian Kobler, a highly regarded engineer of the plant whose recommendations for the future of the weapons plant will appear at the close of my remarks, had this to say:

Coupled with engineering department progress in ultrahigh strength steels and related development projects, it is apparent that the Naval Gun Factory is the leading Bureau of Ordnance activity concerned with structural fabrication.

On January 23, 1959, a very interesting statement appeared in the Log. The statement was made by a representative of Radio Corp. of America. Previous to this statement, RCA asked the gun factory whether they had facilities to do grinding work on a very hard ceramic cylinder, and if they did would they be interested in doing some work for them. The answer, of course, was "Yes" to both questions. The fact that the job was done satisfactorily can best be expressed by the RCA representative who stated:

The Naval Gun Factory in 3 months has done with a 10-inch cylinder the grinding job which took RCA over a year to do with a 6-inch cylinder.

On February 27, 1959, Admiral Ahroon, in an address made to a group composed of Naval Gun Factory top management personnel, stated that there are good reasons for keeping the gun factory in operation. He said:

The Lubelsky report recommended your continuing * * *. The fact remains that the decision was made long ago to keep the gun factory a going concern in the Naval Establishment.

The lead article appearing in the Log on February 27, 1959, went on to say that the reentry of the gun factory into major fire control projects—subsequently revoked—"will place our engineers in dynamic new fields and lead to substantial shopwork. If we can succeed in redeveloping these capabilities, we will be truly versatile." The admiral also said that he could see then where "we would be in a position to branch out in the new supermissiles field and space operations."

Admiral Ahroon further stated in his article that not only did he expect the gun factory to regain its old competence in fire control, but he expected us to save the Navy money.

On March 4, 1960, a letter of commendation from the Office of the Chief of Naval Operations was read by the superintendent of the weapons plant. The letter complimented the plant for the fast, excellent work done on an important project called Project Piggyback. One of the most praising sentences in the letter is as follows:

It is now evident that without the close support and coordination of the Naval Weapons Plant, the project would have been delayed by at least 6 months.

Here again is another of many examples which emphasized the quick reaction capabilities of the plant.

On July 31, 1959, the industrial control officer of the Naval Weapons Plant issued a report which appeared in the Log on the workload for the plant for the next 18 months. I quote from this article:

The reaction of all hands to the heavy demands for overtime which has been needed to keep important programs on schedule has been gratifying and through your remarkable efforts we have been able to hold the line on deliveries and came through with outstanding success in our delivery of the first Mark 7 guided missile launcher last month.

Further quoting:

Therefore, my statement today: "The situation for the next 18 months looks excellent."

And now, as late as April 1, 1960, the Naval Weapons Plant was again praised in a letter of commendation from the Navy's Director of Special Projects, Rear Admiral Raborn. The praise was for the plant's expeditious handling of the Polaris handling device. In his letter, Admiral Raborn began by saying that during January 1960 an "urgent requirement developed within the launching and handling branch of the Office of Special Projects." He then gave the date on which the plant was contacted and the date on which the Polaris handling device was needed. The weapons plant proved its quick reaction capability by delivering the Polaris handling device on time and where it was needed. In concluding his letter, Admiral Raborn asked that his sincere appreciation be extended to "everyone who participated in the expeditious handling of this material required for the Navy's top priority program."

As many of you know, there is at the present time under consideration by the House Appropriations Committee a rider to the Department of Defense Appropriations Act. This rider was proposed by the metal trades department executive council in session at Miami Beach,

Fla., on February 5, 1960, and the subcommittee has been urged to give consideration to the inclusion of the rider on the appropriations bill for fiscal 1961. The effect of the rider, with which many of you are familiar, would be to force defense agencies to allocate enough workload moneys to existing activities to maintain the personnel "on board" in each Government-owned and operated defense facility at its January 1, 1960, manpower figure. I feel it appropriate for me to serve notice that what has been happening at the Naval Weapons Plant in Washington, D.C., has been happening throughout all defense installations and there will be, I trust, in the days ahead, an opportunity for each of you to consider this matter most carefully and to register your protest to the policy of the present administration—the all-out farm-out-at-any-cost policy that was put into effect in 1955.

The effect of this rider on the weapons plant is, of course, obvious. I have been informed that the plant can maintain its present work force with manufacturing orders totaling approximately $40 million per year. This figure represents less than 1 percent of the amount spent each year by the Navy Department alone on aircraft, ships, guided missiles, electronics, and communications. It is impossible for me to ever be convinced that there are not sufficient component parts suitable for the Naval Weapons Plant to handle.

Once again, I wish to impress upon each Member of this body that my remarks are not to be construed as local in nature. What is happening here can happen and has been happening throughout the entire United States. It is, indeed, unfortunate that the District of Columbia does not have its own representation. If one of its representatives should happen to be a Republican, there is reason to believe that a little more consideration would be given to the Naval Weapons Plant than appears to be the case today. My reason for making this statement, as distasteful as it is to me personally, is an article appearing in the Courier Post, Camden, N.J., Tuesday, January 5, 1960, entitled "GOP Group To Supervise Military Base Closings." I am going to read one paragraph from this newspaper account, and under unanimous consent insert the entire article in the RECORD.

I quote:

Its purpose is to consult in advance with Republican Members of Congress regarding military and other Federal installations in their States and districts which are slated to be shutdown during this election year.

The entire article follows:

GOP GROUP TO SUPERVISE MILITARY BASE CLOSINGS

(By Robert S. Allen and Paul Scott)

WASHINGTON.—The White House is acquiring an unusual new adjunct—a so-called clearing committee.

Its purpose is to consult in advance with Republican Members of Congress regarding military and other Federal installations in their States and districts which are slated to be shut down during this election year.

Some 40 air and other military bases alone are due to be closed.

The special "clearing committee" that is to cope with this politically explosive problem consists of Vice President NIXON, Senator THRUSTON B. MORTON, of Kentucky, who is also GOP national chairman, one of President Eisenhower's White House assistants, and an official of the Defense Department and Budget Bureau.

This group will seek to avert shutdowns that might be embarrassing to Republican election prospects.

Authority for these 40 contemplated military closings is former Defense Secretary Neil McElroy. He disclosed them at a budget conference early in December before he quit. McElroy explained these installations would have to be axed because the $41 billion ceiling the President had fixed for the defense budget would require funds being shifted from conventional weapons and units to missiles and rockets.

Although this was a private Pentagon meeting, Republican congressional leaders got wind of this political bad news in a few days.

Subsequently, the Democrats also not only heard about it but got hold of the list of 40 bases that are to be closed. It was leaked to Senator PAUL DOUGLAS, Democratic, of Illinois, chairman of the Joint Economic Committee.

The former marine, whose left hand was severely disabled in the Pacific fighting, plans to make this secret list public at forthcoming hearings of his committee.

The disturbed GOP congressional leaders immediately rushed to NIXON and MORTON. They lost no time in taking up the matter at both the White House and the Pentagon. MORTON also was outspoken in what he thought should be done.

His solution was setting up a "clearing committee" in the national headquarters that would "review" all military and other closings.

"If we have a committee to do that," the Kentuckian argued, "we can keep a lot of our people from being politically hurt. If some of these shutdowns can just as well wait until after the elections, why not do that? Why the rush if it's going to hurt us politically?"

To drive home his contention, MORTON related the following personal experience:

"In the last Congress, I spent a lot of time and effort trying to persuade two Republican Members of the House, who come from labor districts, to support the administration's labor legislation. One of them flatly refused saying it would be political suicide. The other finally reluctantly agreed to go along with us.

"The very next day the Pentagon announced without the slightest previous warning that a big base would be shut down in the district of the House Member I had laboriously won over. But that isn't all. In that same announcement, the Pentagon also said that a new installation would be built in the other Member's district; the one who had turned me down because he feared it would be political suicide for him to vote with us.

"I had a tough time straightening that 'snafu' out, and I don't want any more of them. That's why we simply must have a 'clearing committee' to keep a checkrein on these things."

President Eisenhower, while agreeing in theory with MORTON, turned thumbs down on the proposed committee being part of Republican national headquarters.

Instead he agreed to the "clearing committee" being under the White House.

It is unthinkable to me that political considerations of this nature are influencing decisions as to when, where and how to effectuate cuts in defense establishments.

In bringing this order to a close, I would like to read a letter from one of my constituents who has written me concerning his own personal problems in connection with the deplorable conditions existing at the plant. Perhaps this may appear to be an appeal to emotions. For this I make no apology.

DEAR SIR: As one of your constituents, may I take a moment of your time to voice my fear and anxiety over the present workload situation at the U.S. Naval Weapons Plant.

Capt. Charles E. Briner today made the first layoff announcement affecting 119 employees by February 1960; this was bad news. But his statement that there would be other rifs (substantial ones) in the months to follow, Mr. LANKFORD, I don't know what to say at this point. It just makes me sick inside. I can't eat or sleep. I cannot even think straight. I come home in the evening from the Naval Weapons Plant to my wife and four lovely children. My dinner is on the table and the children are all happy because daddy is home. They are laughing and trying to tell me of the day's adventures; so what happens? Daddy is worried about his job and the future of his family. He snaps at the children and tells them to be quiet, he is not interested. (That's not like daddy.) So I hurt my four children; and if you have ever looked into the eyes of a child that you have hurt, you will know what an agonizing, unbelieving, hurt expression is there. They look at you as if to say, "Why, Daddy, why?" This question, "Why?" is what I do not understand; why is it that our U.S. Navy, one of the greatest powers in the world, with ships, guns, missiles, etc., can be kept up to the latest specifications, spare parts to be made and new weapons to be manufactured; why is a plant like the Naval Weapons Plant, that is capable of manufacturing anything from a nut and bolt to the present day missile and space machines, not given any contracts by the Navy? It is not because we do not have the machines; it is not because we do not have the knowledge and know-how; it is not because we don't have the facilities. Then why? Haven't we at the Naval Weapons Plant come through each and every time the Navy has given us a job to do? No matter how tough or complex the job was, the Naval Weapons Plant always came through. Our past performance record speaks for itself. Then why?

And that is exactly the question that I believe these employees, and indeed the taxpayers of the United States, are entitled to have answered. Why?

I have dwelt, I realize, at great length on the past and the present. I have raised questions which, I believe, demand an answer. But I do not intend to end my remarks with questions *critical* in nature.

Under unanimous consent I insert at this point in the RECORD a proposal for the reorientation of the Naval Weapons Plant. It was prepared under the supervision of one of the plant's most outstanding engineers. This proposal should be given every possible consideration and, for once, foolish pride and stubbornness should be abandoned in the interest of the common good of preserving an installation that has proven itself time and time again in the past. It is proving itself today, is turning down work needed by the Government, as well as private industry, and is there ready and willing to do a job. The charts referred to in the survey will be made available in my office for those interested in making a detailed study of the suggestions raised.

I submit that a complete clean sweep, a complete overhaul of the plant, both

internally and externally, is in order, and I realize in saying this that there are bound to be certain individuals and age-old customs that will suffer. This I fully recognize must be. Not only should there be a clean sweep and reorganization of the plant, but assurances should be given that the plant in trying to come out of its difficulties from an operational point of view will be given every possible bit of cooperation from the Defense Department and the Congress. It is my intention to keep up this fight until justice and fair play are obtained for the plant's employees and until this $250 million investment of the taxpayers is economically utilized.

The above-mentioned material follows:

PROPOSAL FOR THE REORIENTATION OF THE NAVAL WEAPONS PLANT

I. INTRODUCTION

Management at the Naval Weapons Plant is increasingly concerned that this activity may be phased out of existence. Historically, this industrial and engineering complex was a lead organization in providing for Bureau of Ordnance primary support to the fleet. In recent years, however, the plant has apparently declined in prestige and stature to the extent that its contributions have diminished in importance.

Changing trends in weapons technology, accelerating through the past decade, have in general emphasized a decreasing importance, of the position formerly held by "in-house" defense manufacturing establishments. As a result of these changes, it is imperative that the Bureau of Naval Weapons and the Naval Weapons Plant adopt a positive policy of action and establish definite spheres of operation in direct conformance with present and anticipated requirements of the Nation, the Navy Department, and the Bureau of Naval Weapons. This is the only approach which will permit a compelling justification for continued existence of the Naval Weapons Plant. To attain such an objective requires the concerted effort of all, the elimination of long-standing fetishes and slowly built-up empires, a hard and realistic look at what it is, a sincere desire to fill a need and a determination to reach the required objective.

The transition from what it has been to what it must be, is a major undertaking in which many realinements are necessary.

II. OBJECTIVES

To reiterate, defense establishments are no longer the prime sources for manufacture of weapons. Mounting costs of today's glamour weapons have skyrocketed defense spending to the point where overlapping functions must be obviated. This national problem accentuates the necessity for the Naval Weapons Plant to restrict its activities to those tasks which:

(a) Are not readily or willingly supplied by industry.

(b) Provide specialized in-house engineering and manufacturing capabilities in the areas of optics, fire control, light components and equipments, technical evaluation, environmental test, and field services.

In order to insure the proficient accomplishment of these tasks, the Naval Weapons Plant must respond as a flexible, integrated, well-balanced organization of skills and facilities capable of swift support to the fleet.

Thus, a searching review of manpower, facilities, and method of operation at the Naval Weapons Plant has been conducted.

In order that this activity continue as an essential organization providing vital support to the Bureau of Naval Weapons, a positive program of action must be initiated to accomplish the following objectives:

Improve management effectiveness.

Improve liaison between the Naval Weapons Plant and the Bureau of Naval Weapons.

Reduce costs.

Improve schedule performance.

Improve research and development and test and evaluation capabilities.

These objectives can only be achieved by a functional reorganization and consolidation of facilities as proposed herein.

III. PROPOSED FUNCTIONAL REORGANIZATION

The existing organizational structure of the Naval Weapons Plant must be drastically revised in order to accomplish the aforementioned objectives.

Proposed functional organization charts prepared for the Naval Weapons Plant, the research and engineering department and the manufacturing department are submitted herewith. Listed below are the basic recommendations relative to each chart.

Chart No. 1. Naval Weapons Plant organization—Recommendations:

Establish the position of executive director of the Naval Weapons Plant.

Establish the position of deputy director for the manufacturing department.

Redesignate the engineering department as the research and engineering department.

Establish the position of deputy director for the research and engineering department.

Establish an office of decentralized services in the administrative department.

Redesignate the inspection department as the quality control department with in-process inspection responsibility.

Disestablish the industrial control department.

Establish a customer relations staff.

Transfer the planning functions formerly under the industrial control department to the industrial management department.

Establish a separate activity under the supervision of an officer in charge responsible for Gage and ASRO to report directly to the Bureau of Naval Weapons.

Creation of the positions of executive director, deputy director for manufacturing, and deputy director for research and engineering clearly establishes definite lines of responsibility. Candidates for these positions should not be selected from within the Naval Weapons Plant. The deputy director for manufacturing should have an engineering or science education in addition to a manufacturing background.

Chart No. 2. Manufacturing department organization—recommendations:

Establish the position of deputy director for the manufacturing department.

Disestablish the production engineering division and transfer its responsibilities to a manufacturing engineering division and a production planning and control division.

Establish a manufacturing engineering division.

Establish a production planning and control division.

Disestablish the metal processing division, the light machining and assembly division and the heavy machining assembly division and transfer their functions to the manufacturing division.

Establish a manufacturing division.

It should be noted that the revised organizational structure provides for one production manager instead of three, and three master mechanics instead of six, thereby further strengthening the lines of managerial responsibility.

These recommendations also deemphasize the heavy machining and assembly operations which are so traditional at the Naval Weapons Plant, and recognize the fact that Northern Ordnance Inc. is the lead organization in the field of missile launchers and other heavy equipment.

Chart No. 3. Research and engineering department organization—recommendations:

Establish the position of deputy director for research and engineering.

Establish a technical advisory council composed of consultants on a retainer basis.

Disestablish the engineering administration division.

Disestablish the engineering research and evaluation division.

Disestablish the functional design division.

Establish the applied research division.

Establish the technical evaluation division.

Transfer the fabrication engineering functions to the manufacturing department.

IV. PROPOSED CONSOLIDATION OF FACILITIES

The recommendations contained herein for consolidation and relocation of facilities are designed to centralize the entire industrial effort west of Isaac Hull Avenue. This rearrangement will simplify operations, effect economies and provide a facility that meets the needs of the Bureau of Naval Weapons.

A chart denoting consolidation of facilities is submitted herewith. Recommendations relative to the consolidation are listed below.

Chart No. 4. Consolidation of facilities—recommendations:

Move all optical equipment from buildings 157 and 210 to building 159 and dispose of machine tools.

Move selected heavy machine tools from buildings 22, 33, 36, 76 to building 202.

Convert building 160 into an electric, electronic, and plastic facility.

Move all electric and electronic equipment from building 196 to building 160.

Move all plastic and rubber molding equipment from building 105 to building 160.

Establish a limited press facility in building 159.

Establish a limited forge and heat treat facility in building 294.

Convert building 158 to a transportation center for the public works department.

Convert building 137 into a storage area for use by the supply department.

Convert building 153 to a complete fabrication facility.

Move machining and welding equipment from building 175 to building 153.

Establish a limited plating facility in building 153.

Establish a sheet metal facility in building 153.

Move sheet metal equipment from buildings 113 and 119 to building 153.

Move fabrication equipment from buildings 73 and 104 to building 153.

Establish a light instrument assembly facility in the annex of building 157.

A number of these recommendations have already been formally submitted to the Bureau of Naval Weapons.

V. DISPOSITION AND UTILIZATION OF VACATED BUILDINGS

Recommendations: Raze buildings 21, 22, 33, 36, 37, 39, 41, 44, 46, 57, 67, 68, 70, 73, 76, 102, 103, 105, 108, 109, 111, 112, 154, 174, 177, 187, 211, 227, 288, 315, 316, 317, and 318.

Buildings 157, 175, and the upper floors of buildings 196 and 210 are available for conversion to administrative office space.

VI. UTILIZATION OF VACANT LAND CREATED AS A RESULT OF RAZING BUILDINGS

Recommendations: Establish parks and parking areas as indicated on chart No. 4.

The need for adequate parking is a growing one and is a situation that must be provided for regardless of the ultimate use of the Naval Weapons Plant buildings.

VII. PROPOSED LEVEL OF OPERATION

The proposed reorganization and consolidation of facilities functioning with a total manpower complement of 3,000 in all departments, excluding tenant and tenant related activities, will permit a proficient,

effective, quick reacting capability for the Naval Weapons Plant, thus resulting in increased operational efficiency; decreased operating costs; and improved schedule performance.

VIII. SUMMARY

A positive program to reorient the personnel and facilities of the Naval Weapons Plant to meet the requirements of the Bureau of Naval Weapons has been proposed.

The program recommends that—

The Naval Weapons Plant perform those tasks for the Bureau of Naval Weapons that are not readily or willingly supplied by industry.

The Naval Weapons Plant provide in-house engineering and manufacturing capabilities in the fields of: Optics, fire control, light components and equipment, technical evaluation, environmental test, and field service.

To enable the Naval Weapons Plant to perform these functions, it is proposed that—

The functional organization of the Naval Weapons Plant be significantly reoriented.

The facilities of the Naval Weapons Plant be consolidated.

It is further recommended that the Chief of the Bureau of Naval Weapons direct the Assistant Chief of the Bureau for Fleet Readiness and the Assistant Chief of the Bureau for R.D.T. & E. to provide adequate support for the Research and Engineering Department of the Naval Weapons Plant in the areas of systems, concepts, feasibility studies; laboratory programs; environmental test and evaluation; product and value engineering; documentation; standardization; monitoring technical publications; fleet liaison; and technical coordination for Bureau of Naval Weapons.

Mandatory implementation of all the proposals contained herein will achieve the mutual objectives of the Bureau of Naval Weapons and the Naval Weapons Plant; namely, improve management effectiveness; increase efficiency; significantly reduce costs; improve schedule performance; improve liaison between the Naval Weapons Plant and the Bureau of Naval Weapons; and improve research development, test, and evaluation capabilities.

Mr. STRATTON. Mr. Speaker, will the gentleman yield?

Mr. LANKFORD. I yield to the gentleman from New York.

Mr. STRATTON. I would like to commend the gentleman from Maryland for the fine statement he is making on this subject and particularly with reference to the statement he just made that this is a problem that applies not only to the local area of the District of Columbia but in many areas throughout the country.

In my district in upstate New York we have had exactly the same kind of situation; there has been a cutback in valuable naval facilities which is not only impairing, in my judgment, the capacity of the Navy to execute its mission but has also caused severe economic dislocation to the area.

This is the kind of thing which is happening in many other sections of the country, and I think the gentleman has revealed the details of a situation which should be of concern to all of us.

As a colleague of his on the Armed Services Committee, I have respected and admired the fine effort that he has made, and I would simply like to endorse the remarks he has made in this instance.

Mr. LANKFORD. I thank the gentleman for his kind remarks.

Mr. LANKFORD. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

"PIE IN THE SKY," OR A REAL PROGRAM OF HEALTH BENEFITS?

The SPEAKER pro tempore (Mr. KILDAY). Under previous order of the House, the gentleman from Michigan [Mr. MACHROWICZ] is recognized for 30 minutes.

Mr. MACHROWICZ. Mr. Speaker, on Wednesday, April 13, I addressed the House on the very urgent question of health benefits for the aged. I pointed out in those remarks that a new proposal called the Javits bill was being peddled which was designed to stop the tremendous demand for legislation along the lines of H.R. 4700, the Forand bill. That bill, I stressed, could best be described as "pie in the sky." I have been encouraged during the past week to find that there is growing awareness of the "pie-in-the sky" nature of this proposal.

The so-called health insurance for the aged bill was introduced a couple of weeks ago by some Republican Members in both Houses of Congress because they just could not wait any longer for their administration leaders to come through with any proposals at all to meet the crucial problem of high health costs for our aged population. The pressure was too great. The Forand bill was getting too great public support. And the constituents back home were waiting to see what their respective Congressmen were going to do. Consequently, a bill got written which was supposed to reflect the basic criteria which the administration was using to develop its own program.

As I pointed out last week, the benefits ascribed to this bill sound great. But a reading of the bill—rather than the Madison Avenue press release that accompanied it—demonstrates that none of these benefits are included in the bill. Then, it must be kept in mind, any benefits—no matter how small or inadequate—would be available to our people only if a whole series of hurdles were overcome.

The Congress itself—out of general revenues—would have to appropriate $480 million. This is quite a hurdle.

The States would have to appropriate, collectively, $640 million. This is quite a hurdle.

Before any benefits could be paid, the States would have to pass enabling legislation, set up complex administrative machinery, and negotiate contracts with a multitude of insurance companies. This is quite a series of hurdles.

Then, the beneficiary himself would have to make substantial contribution unless he is totally or almost totally without income, with rates as high as $26 per month per couple for undetermined benefits. This is quite a hurdle.

And if all these moneys can be raised—from the Federal Government, the State government, and the beneficiary himself—they are used to purchase private insurance. And from experience in the workmen's compensation field, a good part of all the moneys will be retained by the insurance companies. This is quite a hurdle.

To all of these hurdles, Mr. Speaker, it now appears there is still another. It is more than 2 weeks since the plan was first released. But as yet, neither the White House nor the Department of Health, Education, and Welfare have endorsed it. This is certainly quite a hurdle.

But frankly, Mr. Speaker, I cannot pretend to be disappointed in the fact that the administration has not endorsed this bill, even though their rejection of it, to date, is motivated by considerations quite different from my own.

I rise today, Mr. Speaker, to comment in some detail on one aspect of this "pie in the sky" proposal which has received much attention. Unlike the Forand bill, which would make health benefits available to all persons eligible for social security benefits, the "pie in the sky" bill would cover all persons over 65 years of age. Thus, it is argued, whereas the Forand bill would cover only approximately 12 million persons, the Republican bill would cover 16 million persons. Superficially, a 16-million-person program certainly sounds better than a 12-million-person program. I urge my colleagues, however, not to be satisfied with this superficial comparison.

This is the clearest case of political "one-upmanship" I have seen in a long time. It is as phony as any kind of social "one-upmanship" I have come across. Embarrassed by the failure of the administration to come through with a meaningful program for the great bulk of our older persons, these Republican Members now try to make their program look even better than the one we Democrats have beeen urging. A full examination of the issue will show, however, that this argument is not founded on the facts.

First of all, Mr. Speaker, I want to state most frankly and bluntly that if I had to choose between a proposal which would do a lot for almost all of our older people and a program that did practically nothing—except to offer "pie in the sky"—for all of our older people, I would choose the former.

Second, those of us who have been supporting the Forand bill or legislation along the lines of the Forand bill are precisely the ones who over the years have promoted and helped to enact improvements in our public assistance program so that those of our older citizens who did not have the opportunity to become part of the social security system would at least be provided with the minimum decencies of life, including medical care. And we are not satisfied with the present program. While the administration is urging cutbacks in public assistance, we are advocating greater Federal participation and a broader assistance program. The author of the Forand bill is also the principal sponsor of a bill which would mean substantial improvements in public assistance.

Third, Mr. Speaker, the Forand bill was specifically designed—and properly so—to broaden the OASDI benefits to include health insurance. It comes with ill grace for those who do not even want to go this far to criticize us for not going further.

Fourth, it simply is not true that there are 4 million oldler and neediest people who would be totally ignored if the Forand bill were enacted. This figure has been used because it represents the difference between the approximately 16 million persons who are over 65 years of age and the 12 million who are in the OASDI program. However, among these 4 million are to be found 500,000 persons in the Railroad Retirement Program, 500,000 veterans who are receiving compensation and pensions of some kind, and 1,600,000 who are receiving old age public assistance under our Federal-State programs. There are several hundred thousand additional persons who are to be found in Federal, State, and local government retirement systems. It is therefore clearly a gross overstatement to assert glibly that the Forand bill fails to do anything for the 4 million older persons with the lowest incomes.

All of the above notwithstanding, however, I want to make it just as clear as possible that I share with my Republican colleagues the concern for every senior citizen of this country, regardless of whether he is in the social security system or not. Some way will be found, I am sure, to provide adequate health benefits for older persons.

We must not for a minute, however, lose sight of the principal objective—the providing of health benefits for the great bulk of our older citizens—the 12 million who have already experienced the dignity and security that comes from receiving benefits as a matter of earned entitlement, under the social security system.

On another occasion, I will address the House on the reasons for the use of the social security system as the only proper mechanism for meeting the problems of health for the aged. I have taken the floor today to set the record straight on this one point; namely, that those of us who support the extension of social security benefits to include health insurance are no less interested than others in seeking proper remedies for those who unfortunately did not have the opportunity to become part of the social security system, and we will support any reasonable proposal to accomplish this end. But we see no logical reason why, in the meantime, the Forand bill or some other bill of that type, should not be adopted to give relief to the 12 million people over 65 years of age under the OASDI program.

NO CUTBACKS IN URBAN INTERSTATE HIGHWAYS

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Ohio [Mr. SCHERER] is recognized for 30 minutes.

Mr. SCHERER. Mr. Speaker, last year when it was discovered that the trust fund was exhausted and there were not sufficient funds available to keep the highway program at the construction levels provided by the 1956 act, many people both in and out of the Congress charged that the reason for the shortage resulted from excessively wide rights-of-way, overdesigning, frills, excessive engineering costs, and so forth.

Even if these things were true, and no doubt in a program of this magnitude we will find some instances in which they are true, the deficiency in the trust fund was not caused by these things. I have in the past discussed and enumerated the various reasons for the trust-fund deficiency. I will not do so here today.

These charges of overdesign, excessively wide rights-of-way, and so forth, had considerable impact and were far reaching. A study was commenced at the White House level last fall in order to determine what, if anything, should be done to cut the costs of this program, particularly since Congress had adjourned without providing sufficient funds to keep the highway program at the construction levels provided by the 1956 act. There were those who advocated that the geometric standards of this program be cut back, that the Interstate System, particularly in urban areas, be deemphasized.

Now there is no one who believes more than I that we must eliminate waste and cut costs wherever possible, but in doing so we must not make mistakes that will come back to haunt us a few years from now.

Remember we are building these roads so that, when they are completed about 1975, they will be able to handle 1975 traffic. Traffic, like our population, is now increasing at a rate far exceeding that predicted by the experts just 4 years ago. We need to build permanence into the new highways to protect this multi-billion-dollar investment from becoming obsolete at the very moment it is completed.

In the years past the most crucial failure in highway construction has been to underestimate traffic, the potential of the automobile, and the urgent need for sufficient highway capacity. We must realize that, if we cannot buy rights-of-way adequate for future widening, we do not have the correct location. As Charles Noble, Ohio's former highway director, said:

> We must not allow today's desires and pressures to blind us to tomorrow's needs.

In a recent issue of the Wall Street Journal, we find this quote which pretty well answers the question as to what constitutes real waste:

> Some of these plans may look too big for their britches in 1959, but they will fit just right in 1979. It does not make sense to build something new and then have to rebuild it in 10 years. That is real waste.

I became greatly concerned last October when I learned that there was serious consideration being given to deemphasize or cut back the Interstate System in the urban areas. There is no question but that the cost of building this Interstate System in and through the cities of this country is extremely costly. However, in passing the mammoth 1956 Highway Act, we decided to build roads where the need exists; where the traffic congestion was the greatest. All of the studies indicated that unless we got rid of the strangling bottlenecks in this country our economy would be irreparably impaired.

The evidence is conclusive that it is on the urban sections of the Interstate System where the traffic density is greatest; where the accident rate is highest; and where our economy is being most adversely affected.

It is obvious, therefore, that if we cut back on the urban sections of the Interstate System, we would be cutting the heart out of the highway program; we would be defeating the very purpose for which it was created.

The fact is, that if we are building roads to eliminate traffic, then we must determine the cost of these roads on the basis of the vehicle miles traveled thereon. This is the only true test for evaluating both need and cost. If we use this formula, then the urban sections of the Interstate System will be less costly than the rural sections.

The necessity of preserving the integrity of the urban sections of the Interstate System is even greater when we realize that in a few short years, about the time this system is completed, the need for adequate urban sections of the Interstate System will even be greater, because 75 percent of the people will be then living in urban areas.

Today, even with the high dollar cost of the urban sections of the Interstate System, the people in the cities are getting back in Federal road money a little less than they contribute to the trust fund.

During the 6 months that consideration was being given to cutting back or deemphasizing the Interstate System in urban areas, considerable uncertainty in the execution and future planning of the highway program has existed throughout the United States. This past week I have been tremendously pleased to learn that there will be no such cutback in the planning and construction of the urban sections of the Interstate System.

On April 12 I wrote the Secretary of Commerce, the Honorable Frederick H. Mueller, as follows:

> DEAR MR. SECRETARY: As you know I have been greatly concerned since I spoke to the American Association of State Highway Officials last October about the possibility of the administration recommending cutbacks or deemphasizing of the Interstate System in urban areas.
>
> I will not restate in this letter why I feel that the adoption of such a policy would be a serious mistake since I have discussed this matter on many occasions with Under Secretary Allen and Highway Administrator Tallamy. The fact that such a cutback and other proposed changes in highway construction standards have been under consideration has caused much uncertainty throughout the country with reference to future highway planning.
>
> In order to eliminate this uncertainty, I am wondering whether or not you are able to advise me if any conclusions have been reached with respect to this matter and, if so, the nature thereof.
>
> Sincerely yours,
>
> GORDON H. SCHERER.

On April 15, 1960, the Secretary replied to me as follows:

DEAR MR. SCHERER: Thank you for your letter of April 13, 1960, about the Interstate Highway System as it relates to urban areas.

Let me assure you at the outset of this letter that the administration has no intention whatever of abandoning any of the routes presently designated as general corridors of traffic—in urban or in rural areas. Consistent with this intention, we are continuing, as you realize, to make every effort, in cooperation with the States, to achieve a basic interconnected system at the earliest possible date.

We all appreciate, of course, that the Interstate System cannot, nor is it intended to, provide the solution to the rush hour traffic problems of our metropolitan areas. That rests in the coordination of many elements, such as the Federal-aid urban arterial highways and other major city and State thoroughfares, combined with both rail and rubber mass transportation and, to a considerable degree, with both air and water facilities. The Interstate System, however, will be a part of this overall approach to the problem and will facilitate the movement of interstate highway traffic within the many metropolian areas in which this system has been designated.

I know you are aware that current revenue estimates for the highway trust fund are about $11 billion less than the amount required to build this projected system on present costs. In our report to the Congress next January we will present revised cost estimates along with a suggested program designed to raise sufficient funds to pay for this program. You also know that the President has proposed an immediate one-half cent increase in the gas tax with extension of a 4½-cent rate through fiscal 1964. This tax would allow increased apportionments in the next several years, which are necessary if the program, including the urban routes of particular interest to you, is to get back on schedule.

I should like to say in conclusion that we are constantly seeking ways to achieve the basic objectives of the program with maximum economy.

Sincerely yours,

FREDERICK H. MUELLER,
Secretary of Commerce.

FOOD—PUBLIC PROTECTION

Mr. MICHEL. Mr. Speaker, I ask unanimous consent that the gentleman from New Jersey [Mr. GLENN] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. GLENN. Mr. Speaker, the public has the right to know the source of the foods it is consuming in packaged form. The law now requires that the package bear a label containing the name and place of business of the manufacturer, packer, or distributor. An increasing number of packaged foods, fresh, frozen, and canned, are being manufactured or packaged by one concern and distributed by another. Under such circumstances, it is only necessary to bear the name of the distributor, and hence the public is not given the safeguard of knowing who manufactured or packed the food.

I have today introduced a bill that would do two things: One, require that where a packaged food is manufactured or packed by one other than the distributor, the label must also state the name and place of business of the manufacturer or packer; and two, if the package contains a single fresh, frozen, or canned fruit or vegetable, it must recite the name of the State where grown.

There is hardly a State in the Union that is not identified with one or more fruits or vegetables, because of the uniformity of the good quality of its product. The public has a right to be assured it is getting the fruit or vegetable grown in any given State when it asks and pays for it. In the recent cranberry dilemma, no New Jersey-grown cranberries were condemned or taken off the market. If these cranberries had been labeled as having been grown in New Jersey, the public would have had assurance of safety, and the growers and distributors would have benefited by the identification of the product. Also, a practice has come about of fruit and vegetables of inferior quality being grown in one State and shipped into another State for packaging and distribution as the product of the second State, which State has a known uniformity of good quality of the specific fruit or vegetable. The public is intentionally deceived by this practice, even in some instances by false labeling as the product of the second State. The public will be protected from such practice by this bill and every State will be benefited by the identification of its product.

FEDERAL COAL MINE SAFETY ACT

Mr. MICHEL. Mr. Speaker, I ask unanimous consent that the gentleman from Pennsylvania [Mr. SAYLOR] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. SAYLOR. Mr. Speaker, 14 bills have been introduced in the House of Representatives which would amend the Federal Coal Mine Safety Act thereby providing protection for miners who work in mines employing 14 men or less.

In August 1959 the subcommittee of the House Committee on Education and Labor held extensive hearings which I believe showed conclusively that this legislation is necessary.

Since then many men have lost their lives in these small mines due to inadequate safety measures.

Mr. Speaker, how much blood of innocent men must be shed before Congress acts on this important and urgent legislation?

OASI BENEFITS TO PERSONS AGE 72

Mr. MICHEL. Mr. Speaker, I ask unanimous consent that the gentleman from Wisconsin [Mr. BYRNES] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. BYRNES of Wisconsin. Mr. Speaker, I have today introduced legislation amending the Social Security Act to provide OASI benefits to persons aged 72 and over who are not presently eligible for such benefits.

Under my proposal, these aged individuals would receive as a matter of statutory right the minimum OASI benefit which is presently $33 per month.

The cost of "blanketing-in" this group within the protection of the program would be defrayed under a formula reimbursing the OASI trust fund by the Treasury general fund. As I will develop at a later point in my remarks the impact of such reimbursement from the general fund will be more than offset in the next several years by savings in the cost of public assistance expenditures.

No dependents' or survivors' benefits would be payable under this new category, and stricter provisions would be applicable to suspension of benefits than applies under present law to regular beneficiaries.

It is estimated approximately 2 million persons would be included in the blanketed-in category. Approximately 1.5 million of these people would be women including 1 million widows.

Generally speaking the group to be benefited under this suggested change in the social security law are workers who attained retirement age before the social security program reached its present status of virtual universal coverage or are widows whose husbands died prior to this expansion of coverage. The effect of present law with respect to these people is that retirement age or death of the wage earner occurred too soon for benefit eligibility.

Mr. Speaker, these deserving Americans should be given the opportunity to participate in the OASI program as a matter of right and they should not be penalized by the failure to extend timely coverage to their former occupational groups. It is estimated that 1.25 million persons included in this category are presently forced to rely on old-age assistance on a need basis for their livelihood. These people are in their present plight because Congress acted too late to broaden coverage of the Social Security System. Congress should act now to correct the neglect of these worthy people by giving them a benefit based on right instead of making poverty and need the criteria of eligibility.

My proposal represents a significant step in the direction of achieving equity and justice for these aged citizens. The people who will benefit under my bill are those who felt the full brunt of the inflation of the forties and early fifties which destroyed the purchasing power of their savings. That they were victimized by inflation is demonstrated by the fact that 1.25 million of them are now receiving public assistance. Furthermore, this proposal is totally consistent with the philosophy of achieving universal coverage under the system.

Mr. Speaker, when it is considered that no present beneficiary under the social security program has paid anything approaching the full actuarial value of his potential benefits, it is only fair that the discrimination against those not covered under the program be

removed. In demonstration of this point it should be noted that contributions from the Treasury general fund to the OASI trust fund under my bill will be relatively higher with respect to the persons blanketed in than the contributions paid by and with respect to persons now on the benefit rolls and those coming on the rolls in the near future.

For example, the current reimbursements of the OASI trust fund for persons in this special blanketed-in category would be 12 percent of the value of the benefit, which is relatively 150 percent as much as was contributed by the employer and the employee for a person who paid the maximum into the fund and is now receiving the maximum benefit. The special-category payment into the trust fund would be 10 times as much relatively as was paid into the fund with respect to the average present recipient of a minimum benefit. Thus the payment of contributions into the trust fund for these deserving people will be relatively greater, and the payment of benefits will be relatively less because eligibility for benefits is deferred until age 72.

The effect upon the OASI trust fund from blanketing-in will be minimal because the level-premium value of the Federal reimbursements will be 0.15 percent of payroll contrasted with the level-premium value of the benefits of 0.20 percent of payroll.

The cost to the Treasury General Fund for the first 10 years of blanketing-in will average $100 million annually. This is expected to be totally offset by savings to the Federal Government with respect to present public assistance costs. In addition the long-range public assistance costs to the Federal and State Governments will be substantially lower than under present law.

Mr. Speaker, I have had an analysis made of the cost to the general fund of blanketing-in the present aged at 72 years and the savings that will result from the enactment of my bill. These figures are presented on an annual basis for the first 3 years and then cumulative data are presented covering a 10-year period. It is important to remember in evaluating the significance of these figures that the blanketing-in benefits will be available to the aged citizens affected as a matter of statutory right and not conditioned on proof of poverty and need as is the case with respect to public assistance. The analysis to which I have referred is set forth in the following table:

TABLE.—*Cost of blanketing-in compared with Federal-State savings on public assistance*

[In millions]

	Cost to general fund	Public assistance savings		
		Federal	State	Total
1 year	$600	$265	$185	$450
2 years	35	260	180	440
3 years	37	255	175	430
10 years (cumulative)	1,000	2,400	1,600	4,000

Mr. Speaker, the Congress has never hesitated in the past to make available to the then retired individuals benefit increases that have been enacted from time to time. Meritorious as these increases may have been, they have had no relationship to prior tax contributions. Some individuals have become eligible for benefits and have received benefit increases based on a combined total employer-employee contribution of as little as $6. Since the inception of the act, Congress has increased benefits on five different occasions.

At this time while the Committee on Ways and Means is considering benefit increases, it is only simple justice that these forgotten and neglected people who would be benefited under my bill should receive some measure of consideration. It is inconceivable to think of providing further benefits and increases in present benefits without considering the plight of the aged people who are presently denied any protection under the act.

In introducing this bill it is my intention to seek favorable consideration of the suggested change in connection with any social security legislation approved by the Committee on Ways and Means this year.

SECRETARY OF STATE CHRISTIAN A. HERTER

Mr. MICHEL. Mr. Speaker, I ask unanimous consent that the gentleman from Massachusetts [Mr. CURTIS] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. CURTIS of Massachusetts. Mr. Speaker, 1 year ago on this date one of our most distinguished former colleagues, who served in this Chamber from 1943 until 1953, then served his State of Massachusetts as its Governor from 1953 until 1957, was appointed Secretary of State by our great President.

The quiet dignity, unselfish devotion and dedication with which he has discharged the duties of his office have fully demonstrated the wisdom of the President's choice of Christian A. Herter as Secretary of State.

Faced with monumental problems of world crisis, fomented and complicated by ancient prejudices and hatreds, he has during this brief period earned the respect and admiration of all nations for his ability, honesty, and sense of fair play in dealing with the affairs of both nations and men.

The House will, I am sure, feel that it is both fitting and proper that it should express its heartiest congratulations to our Secretary of State on this occasion.

THE EXECUTIVE COMMITTEE OF THE MOHAWK ASSOCIATION OF SCIENTISTS AND ENGINEERS IN SCHENECTADY, N.Y., DISCUSSES THE PROPOSED BAN ON NUCLEAR WEAPONS TESTS

Mr. STRATTON. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. STRATTON. Mr. Speaker, in view of the importance of the current discussion regarding a proposed ban on nuclear weapons testing, especially the hearings now being held by the Joint Committee on Atomic Energy, I am pleased to bring to the attention of Members of the House a very carefully reasoned analysis of the problem, because of their special technical competence in this field. It is, I believe, a fair and reasoned analysis and worth careful study.

The letter follows:

MOHAWK ASSOCIATION OF SCIENTISTS AND ENGINEERS,
March 26, 1960.

President DWIGHT D. EISENHOWER,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: I am writing to you on behalf of the executive committee of the Mohawk Association of Scientists and Engineers, an organization of scientists and engineers in Schenectady and Troy, N.Y.

We have been deeply interested in the progress of the negotiations between the United States, Great Britain, and the Soviet Union for a treaty to ban the testing of nuclear weapons. In our opinion the successful conclusion of such a treaty with adequate inspection is of overriding urgency as an essential first step in seeking broader measures of arms control and in limiting the number of nations which obtain nuclear weapons. We gravely fear that as more and more nations acquire these weapons, the day draws nearer when some accident or act of irresponsibility will trigger a holocaust that will destroy us all.

We are impressed with the recent Russian proposal for a treaty banning all but small underground nuclear tests and for a temporary moratorium on the latter as a plan which the United States should accept in principle as a basis for further negotiation. This proposal leaves many important questions unanswered and may involve some risk of undetected violations of the moratorium on small tests. Nevertheless we feel these risks are preferable to the far graver risks of ultimate nuclear catastrophe if we have no treaty at all and nuclear weapons spread to many nations.

Our reasons for recommending favorable consideration of the Russian proposal are as follows:

1. If the United States agrees to the principle of a moratorium on small underground tests and achieves in return Russian acceptance of a permanent ban with inspection on those tests for which presently known inspection procedures are feasible, a very significant accomplishment will have been made. Of very great importance will be the penetration of the Iron Curtain by an international agency able to establish with high certainty that an agreement is observed. We believe that experience with the successful operation of an inspection system with the limited objective of policing nuclear tests will greatly facilitate the establishment of more far-reaching inspection arrangements needed to police other possible disarmament measures. Without such experience, agreement on other types of controlled disarmament seems unlikely.

2. Present capabilities of an inspection system seems adequate to prevent violations of a ban on large nuclear tests, and continued research promises to greatly improve our ability to inspect small tests. The Berkner Panel concluded that with known improvements in instrumentation and technique, the network of 180 stations originally

agreed upon at Geneva would be able to correctly identify roughly 90 percent of seismic events of 10 kilotons or more. It will undoubtedly take a year or two to get this inspection system into full operation once a treaty is ratified; vigorous research in seismology and instrumentation during a moratorium of similar duration will certainly permit reliable identification of events substantially below 10 kilotons by the end of that period. Indeed, at the present time use of additional stations, possibly including unmanned robot stations, could achieve this improvement. Muffling or decoupling nuclear explosions in caverns, while theoretically possible, does not appear to us to be a practical way to conceal significant nuclear testing. If nothing else, the tremendous mining operations involved would be difficult to hide.

3. We believe that there has been exaggeration from some quarters of the risks to the United States in possible undetected Russian testing of weapons below 20 kilotons, and also of the military advantages to us of renewed testing of weapons in this range. For the Russians to substantially alter the balance of military force by extensive development of small nuclear weapons would require many tests, and since there is a large probability that some tests of such a series would be detected, we doubt that the Russians would take this risk of discovery in view of the certain condemnation by world opinion which it would entail.

On the part of the United States, it seems probable that unrestricted testing of small weapons would lead to some improvement in their versatility and size but no change that would radically alter our military position vis-a-vis the Soviet Union. Indeed, since the Russians are reportedly far behind us in the field of small nuclear weapons, it seems quite possible that with unrestricted testing they could make greater relative progress and thereby worsen our position.

4. If the United States rejects a moratorium on small nuclear tests and carries out a program of such tests in accordance with the desire of our military planners, many other nations will be unwilling to refrain from starting tests of their own. The probability of a nuclear catastrophe will increase as more and more nations acquire nuclear weapons.

In view of these factors, we believe that the risks of no agreement are far greater than the risks inherent in a temporary uninspected moratorium on small weapons tests.

Many details remain to be settled before a satisfactory agreement can be concluded. For example, the Soviet Union has not yet accepted a sufficient number of on-site inspections to insure that suspicious seismic events above the magnitude of a 20 kiloton explosion will stand a good probability of identification, nor has it satisfied us on other questions such as the staffing of the control posts. However, we believe that if the United States accepts the principle of the limited ban plus the temporary moratorium, negotiation on these other points can proceed with substantial hope of success. We strongly urge the U.S. Government to adopt this position.

Very sincerely yours,

FRANK S. HAM,
President.

MEDICAL INSURANCE FOR OUR SENIOR CITIZENS SHOULD BE PROVIDED WITHOUT DELAY

Mr. WOLF. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. TELLER] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. TELLER. Mr. Speaker, I rise to urge the prompt enactment of the Congress of the Forand bill which provides a system of medical insurance for our senior citizens, geared to our social security program. My bill H.R. 5216 is identical with the Forand bill, which I have long advocated, and I was one of the first to sign the pending discharge petition, in which the Congress is being asked to discharge the Committee on Ways and Means from further consideration of the Forand bill, and to pass the bill without delay.

We are the only country in the world which lacks a system of medical insurance. Our isolation in this regard is wholly indefensible. The time has come when immediate action is necessary.

Those of us who have, for some years, been in favor of providing hospitalization and nursing home care for our senior citizens through our social security plan find some satisfaction in the fact that this problem is, at long last, beginning to receive the attention it deserves. I, for one, have been concerned, however, with the fact that the issue has too often been presented in the form of labels. It has been called a "hot political issue." It has been described as the "entering wedge for socialized medicine." We have been told that voluntary insurance can do the job, or that the doctors will take care of the situation by lowering their fees. But it has seldom been presented in terms of those facts of our time which require such legislation.

It is refreshing, therefore, to find that a hard-headed conservative publication such as Business Week has recently concluded:

> One thing about the issue is clear: Although plenty of politicians may see it as a vote-catching device, there is nothing synthetic or phony about the problem. Everyone who has seriously studied the situation has concluded that the provision of better health care for the aged is a serious—and growing—problem.
>
> The problem basically is that the aged are high-cost, high-risk, low-income customers. Their health needs can be met only by themselves when they are young or by other younger people who are still working. The only way to handle their health problem, therefore, is to spread the risks and costs widely. And that can best be done through the social security system to which employers and employees contribute regularly.
>
> We do not pretend to know all the answers to the problem of enlarging the social security system to include a health insurance program for the aged.
>
> Nevertheless no democratic government can refuse to grapple with a problem of such demonstrated urgency and importance.

Contrary to some impressions I have encountered, this important addition to our social security plan is not an idea conceived on the spur of the moment. I am proud of the fact that I introduced a bill, H.R. 5216, well over a year ago, on March 3, 1959, which provides this kind of protection. Like the Forand bill, my proposal would provide for the cost of 60 days of hospital care, including surgical services, together with nursing home services up to 120 days, if required. Hospital services would include medical care generally furnished as an essential part of hospital care for bed patients. Such items as bed and board, nursing, laboratory, ambulance, operating room, staff, and such other services as are customarily furnished either through hospital staff or persons with whom the hospital has arrangements would be included.

The proposal represents the combined wisdom of many experts in the field of health care and social security. It was presented during the hearings conducted by the Ways and Means Committee on the 1958 amendments to the Social Security Act and aroused so much interest that the report of the committee stated:

> Your committee is very much aware of the problems faced by the aged in paying for hospital services and nursing home services. * * * In the recent public hearings * * * There was considerable testimony to the effect that, under existing arrangements, insurance against the cost of needed hospital and nursing home services is out of reach of many older people.

Accordingly the committee asked the Secretary of Health, Education, and Welfare to conduct a study on the practicability and the costs of providing this kind of protection through various methods. This study was completed about a year ago and, although it contains no recommendations, it does contain much valuable information indicating the nature and extent of the problem. One important result, in my estimation, is the fact that the data assembled therein seems to have convinced the present administration that the problem cannot "be swept under the rug" but is one which requires some kind of answer. Their answer has not yet arrived although the press has reported a number of abortive attempts.

During the last session of the Congress, my proposal along with others were the subject of a full week of hearings before the Ways and Means Committee. Clearly, the time for study and deliberation has been ample, and the time for action has arrived.

We are, then, here concerned with a carefully worked out and carefully considered proposal using our time tested social security mechanism which, as I will try to show, recognizes that the essential problem grows out of the fact that "our senior citizens are high-cost, high-risk, low-income customers."

One of the most important features of this plan, in my estimation, is that it will enable most Americans during their working life to provide a paid-up health insurance protection which will take effect when their income is reduced by retirement.

Those who argue that voluntary insurance can do the job completely ignore the fact that the voluntary plans which attempt to provide the kind of

protection contained in my bill cost so much that they are prohibitive for most of our elderly people. The stark fact is that three out of five of the people 65 and over in our country today have less than $1,000 a year in money income from all sources. The average social security benefit today is just $73 per month. Subtract from this the $15 to $20 a month charges for reasonably adequate hospital and surgical insurance and it does not take much arithmetic to understand why only the most fortunate of our senior citizens can afford to buy such protection through voluntary means.

Rosy estimates which anticipate that 70 percent of our older people in 1970 will have some form of prepaid private health insurance necessarily avoid the elementary mathematics of this situation. A brief glance at some of the plans now being offered for older people suggests why this is so. For example, the plan now being offered by the American Association of Retired Persons costs a couple $144 a year if partial insurance for doctors' visits outside the hospital are included. Other plans for the 65 plus pay only $10 a day for hospital care which can be compared with typical hospital charges of $20 a day. Wisconsin's State Blue Shield plans providing this kind of protection costs $9 a month per person, or $216 a year for a couple. Cleveland's Blue Cross plan, which is considered an outstanding one because it makes no extra charge for age and provides relatively generous benefits—120 days of hospital care—costs $69.60 a year, or $140 for a family for care in a hospital ward.

The elementary mathematics which create the present problem of voluntary plans are not going to change. A small premium—which is the only kind of premium which most people living in retirement can afford—is going to continue to buy very limited protection. And this limited protection will be in effect at a time when they are more susceptible to infirmities and the infirmities themselves are often of longer duration.

Statistics developed in the National Health Survey illustrate these points. As to the frequency of occurrence of particular health conditions and utilization of services they show the rate of 1,630 bed disability days per 100 persons per year including hospital days for people 65 and over as against well under half of this figure—or 697 bed disability days for people under age 65. The same study showed that, as to days in short-stay hospitals the rate per 100 persons per year for people 65 and over was 178, whereas it was only 76 for persons under 65. The report of the Department, "Hospitalization Insurance for OASDI Beneficiaries," already noted, comments on this point:

> These figures corroborate the findings of earlier studies that the aged spend at least twice as many days per capita in general hospitals as the population as a whole, that acute conditions occur less frequently among the aged and chronic conditions more frequently than among younger persons.

Moreover, I believe the advantage of using the well-established social security plan as the mechanism for providing these services is one of the most important aspects of my bill. The money to finance the covered costs will be collected in the same way, and at the same time, as other social security taxes are paid, so no new administrative setup will be required for this phase of the program. The plan will be operated out of Social Security offices already established throughout the country to serve the entire population with regard to the other aspects of our social security plan. Care will be furnished on a national basis, thus overcoming the objection to some existing plans under which benefits accrue only within a particular State.

The fact that our social security plan is designed for practically all Americans who are dependent upon earnings, emphasizes another advantage which will be of growing importance. Increasingly, as the years pass, the beneficiary population of social security will be synonymous, for all practical purposes, with the total aged population. It is estimated that over three-fourths of the aged population will be eligible for benefits in 1970, and over 80 percent in 1980. This is, then, a plan from which all of us can benefit in the same way that we can now look forward to a social security benefit when the time comes for us to retire.

Moreover, the fact that the proposal applies to people now eligible for benefits not only means that they will be spared the haunting fear of a long and expensive illness which could wipe out savings or force upon them the ignominy of accepting public charity. For this haunting fear is also shared by their children who, with growing families of their own, are too often faced with the hard choice of whether they shall assist their ailing parents in the way they wish to do at the expense of their own children's further education.

Of one thing we can be reasonably sure—the cost of providing the kind of care envisioned in my bill is rising and will continue to rise. The medical care component of the Bureau of Labor Statistic's Consumer Price Index shows that the price of medical care began to climb in 1941 and has increased over the last decade nearly twice as much as the average for all goods and services. For example, in the 10-year period 1948 to 1958, food costs increased by 16 percent while medical care rose by a whopping 43 percent. In part this increase stands for the great improvements which have occurred in modern medicine which enable it to save lives. These are costs added by such modern miracles as the laboratory and radiographic procedures now available for diagnostic purposes; for such necessities as the oxygen tent, the blood bank, and the modern operating room. No one would argue, I am sure, that we should cut down on costs such as these.

But increasingly, I believe, we shall have to experiment with other means of caring for some of the ills of the aged—and that is the reason my bill contains the provision for care in skilled nursing homes as an adjunct to hospital care. It is gratifying to see that, in a few communities, nursing homes have been made an integral part of a hospital, thus facilitating the interchange of patients and coordinating the services provided by both personnel and equipment.

I believe that we must look forward to the development of thousands of well-equipped nursing homes of this type throughout the country. Nursing home care has grown phenomenally in our land within a short span of years. But too often the kind of care provided therein is severely limited because they are not adequately financed—again a direct result of lowered-income in declining years. By providing adequately for the cost of good nursing home care for those of our older citizens who require limited medical attention, we will be encouraging, as well, the healthy development of these important accessory medical care institutions.

Finally, let us examine the charge that my proposal represents "nose-under-the-tent socialism"—a charge, by the way, which appeared when the Social Security Act was first passed back in 1935, and has reappeared with practically every major improvement made in the plan since that time. First of all, let us be clear about the fact that, under the bill, payments are limited to the type now used in nonprofit voluntary plans like Blue Cross. Because the medical profession is generally opposed to the idea of being "on the Government payroll" their charges are not included. The claims that the medical profession would be "socialized" if such legislation is adopted are, therefore, misleading at best.

Mr. Speaker, this is not "socialized medicine." In a recent and very perceptive editorial, the Washington Post commented on this point:

> The one practical way to provide insurance against the health hazards of retirement years is to let people pay the premiums in the form of social security taxes while they are earning wages and are able to do so. This is precisely how they now provide retirement income for themselves under the social security program—and this kind of protection is made compulsory because the lack of it would have a disastrous social impact. Those who denounce this proposal as "socialistic" without proposing any workable alternative are foolishly doctrinaire.
>
> They might just about as sensibly oppose as socialistic the Nation's public schools, fire departments, and parks, because these represent communal efforts financed through taxation. One of the fundamental purposes for which the U.S. Government was established was to promote the general welfare.

The facts are before us. I am confident that this Congress will face up to them. This matter has been studied repeatedly, and the conclusion is always the same—something must be done. I urge the enactment of the Forand bill, or my bill H.R. 5216 which is identical to the Forand bill, this well-considered and necessary legislation on behalf of our older men and women and on behalf of all of us.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

Mr. HORAN, at the request of Mr. HALLECK, on account of illness.

Mr. JOHNSON of California, at the request of Mr. JACKSON, for period, April 20 to May 10, on account of official business.

Mr. ROONEY, at the request of Mr. CELLER, for balance of the week, on account of illness.

Mr. LIPSCOMB, at the request of Mr. HALLECK, for the remainder of this week, on account of illness in his family.

Mr. AUCHINCLOSS, at the request of Mr. CANFIELD, for today and balance of the week, on account of illness.

SPECIAL ORDER GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to Mr. BAILEY, for 10 minutes, on Monday, April 25.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

(At the request of Mr. MICHEL, and to include extraneous matter, the following:)

Mr. FINO.

Mr. CUNNINGHAM.

(At the request of Mr. WOLF, and to include extraneous matter, the following:)

Mr. ANFUSO.

Mr. McDOWELL.

ENROLLED BILL SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 8601. An act to enforce constitutional rights, and for other purposes.

ADJOURNMENT

Mr. WOLF. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 47 minutes p.m.), under its previous order, the House adjourned until Monday, April 25, 1960, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2080. A letter from the Administrator, Foreign Agricultural Service, U.S. Department of Agriculture, transmitting a report concerning agreements concluded during March 1960 under title I of the Agricultural Trade Development and Assistance Act of 1954 (Public Law 480, 83d Cong.), as amended, pursuant to Public Law 85–128; to the Committee on Agriculture.

2081. A letter from the Comptroller General of the United States, transmitting a report on the audit of General Services Administration contract DMP–131 with National Lead Co., New York, N.Y.; to the Committee on Government Operations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. TEAGUE of Texas: Committee on Veterans' Affairs. H.R. 113. A bill to prohibit the severance of a service-connected disability which has been in effect for 10 or more years, except when based on fraud; with amendment (Rept. No. 1529). Referred to the Committee of the Whole House on the State of the Union.

Mr. TEAGUE of Texas: Committee on Veterans' Affairs. H.R. 276. A bill to amend section 3011 of title 38, United States Code, to establish a new effective date for payment of additional compensation for dependents; with amendment (Rept. No. 1530). Referred to the Committee of the Whole House on the State of the Union.

Mr. TEAGUE of Texas: Committee on Veterans' Affairs. H.R. 641. A bill to amend Veterans Regulation No. 10 to provide that the widow of a peacetime veteran who married the veteran within 15 years after his last discharge or release from the service may be entitled to death compensation in case of the service-connected death of the veteran; with amendment (Rept. No. 1531). Referred to the Committee of the Whole House on the State of the Union.

Mr. TEAGUE of Texas: Committee on Veterans' Affairs. H.R. 7502. A bill to amend the basis for certifications with respect to basic pay for dependency and indemnity compensation award purposes; with amendment (Rept. No. 1532). Referred to the Committee of the Whole House on the State of the Union.

Mr. TEAGUE of Texas: Committee on Veterans' Affairs. H.R. 7965. A bill to amend section 612 of title 38, United States Code, to authorize outpatient treatment incident to authorized hospital care for certain veterans; with amendment (Rept. No. 1533). Referred to the Committee of the Whole House on the State of the Union.

Mr. TEAGUE of Texas: Committee on Veterans' Affairs. H.R. 9786. A bill to amend sections 511 and 512 of title 38, United States Code, to permit Indian war and Spanish-American War veterans to elect to receive pension at the rates applicable to veterans of World War I; without amendment (Rept. No. 1534). Referred to the Committee of the Whole House on the State of the Union.

Mr. TEAGUE of Texas: Committee on Veterans' Affairs. H.R. 10596. A bill to change the method of payment of Federal aid to State or territorial homes for the support of disabled soldiers, sailors, airmen, and marines of the United States; with amendment (Rept. No. 1535). Referred to the Committee of the Whole House on the State of the Union.

Mr. TEAGUE of Texas: Committee on Veterans' Affairs. H.R. 8098. A bill to specify certain creditable service for pension purposes; with amendment (Rept. No. 1536). Referred to the Committee on the Whole House on the State of the Union.

Mr. TEAGUE of Texas: Committee on Veterans' Affairs. H.R. 9785. A bill to provide for equitable adjustment of the insurance status of certain members of the Armed Forces; with amendment (Rept. No. 1537). Referred to the Committee of the Whole House on the State of the Union.

Mr. TEAGUE of Texas: Committee on Veterans' Affairs. H.R. 9788. A bill to amend section 3104 of title 38, United States Code, to prohibit the furnishing of benefits under laws administered by the Veterans' Administration to any child on account of the death of more than one parent in the same parental line; without amendment (Rept. No. 1538). Referred to the Committee of the Whole House on the State of the Union.

Mr. TEAGUE of Texas: Committee on Veterans' Affairs. H.R. 9792. A bill to amend section 4111 of title 38, United States Code, with respect to the salary of managers of Veterans' Administration hospitals, domiciliaries, and centers; with amendment (Rept. No. 1539). Referred to the Committee of the Whole House on the State of the Union.

Mr. TEAGUE of Texas: Committee on Veterans' Affairs. H.R. 10108. A bill to authorize reimbursement of certain Veterans' Administration beneficiaries and their attendants for ferry fares, and bridge, road, and tunnel tolls; without amendment (Rept. No. 1540). Referred to the Committee of the Whole House on the State of the Union.

Mr. TEAGUE of Texas: Committee on Veterans' Affairs. H.R. 10898. A bill to amend section 315 of title 38, United States Code, to provide additional compensation for seriously disabled veterans having four or more children; without amendment (Rept. No. 1541). Referred to the Committee of the Whole House on the State of the Union.

Mr. TEAGUE of Texas: Committee on Veterans' Affairs. H.R. 10703. A bill to grant a waiver of national service life insurance premiums to certain veterans who became totally disabled in line of duty between the date of application and the effective date of their insurance; without amendment (Rept. No. 1542). Referred to the Committee of the Whole House on the State of the Union.

Mr. TEAGUE of Texas: Committee on Veterans' Affairs. H.R. 11045. A bill to amend section 704 of title 38, United States Code, to permit the conversion or exchange of policies of national service life insurance to a new modified life plan; without amendment (Rept. No. 1543). Referred to the Committee of the Whole House on the State of the Union.

Mrs. PFOST: Committee on Interior and Insular Affairs. H.R. 8226. A bill to add certain lands to Castillo de San Marcos National Monument in the State of Florida; with amendment (Rept. No. 1544). Referred to the Committee of the Whole House on the State of the Union.

Mr. THORNBERRY: Committee on Rules. House Resolution 506. Resolution for consideration of H.R. 11318, a bill to provide that those persons entitled to retired pay or retainer pay under the Career Compensation Act of 1949 who were prohibited from computing their retired pay or retainer pay under the rates provided by the act of May 20, 1958, shall be entitled to have their retired pay or retainer pay recomputed on the rates of basic pay provided by the act of May 20, 1958; without amendment (Rept. No. 1545). Referred to the House Calendar.

Mr. FALLON: Committee on Public Works. H.R. 10495. A bill to authorize appropriations for the fiscal years 1962 and 1963 for the construction of certain highways in accordance with title 23 of the United States Code, and for other purposes; with amendment (Rept. No. 1546). Referred to the Committee of the Whole House on the State of the Union.

Mr. MILLS: Committee of conference. H.R. 7947. A bill relating to the income tax

treatment of nonrefundable capital contributions to Federal National Mortgage Association (Rept. No. 1547). Ordered to be printed.

Mr. MILLS: Committee of conference. H.R. 8684. A bill to amend the Internal Revenue Code of 1954 to provide for deferral of taxation of amounts withheld by a bank or finance company from a dealer in personal property to secure obligations of the dealer, until such time as such amounts are paid to or made available to the dealer (Rept. No. 1548). Ordered to be printed.

Mr. MILLS: Committee of conference. H.R. 9660. A bill to amend section 6659(b) of the Internal Revenue Code of 1954 with respect to the procedure for assessing certain additions to tax (Rept. No. 1549). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BYRNES of Wisconsin:

H.R. 11856. A bill to amend title II of the Social Security Act to provide minimum benefits under the old-age and survivors insurance program for certain individuals at age 72; to the Committee on Ways and Means.

By Mr. ANFUSO:

H.R. 11857. A bill to provide that section 352(a) of the Immigration and Nationality Act, relating to the loss of nationality by a naturalized national of the United States through residence in a foreign state, shall not apply with respect to certain veterans, and for other purposes; to the Committee on the Judiciary.

By Mr. GEORGE:

H.R. 11858. A bill to extend the veterans' home loan program to February 1, 1965; to provide for direct loans to veterans in areas where housing credit is otherwise not generally available, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. GLENN:

H.R. 11859. A bill to amend the Federal Food, Drug, and Cosmetic Act to require that packages of fruits and vegetables be labeled to show the State where such fruits and vegetables were grown; and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. HALPERN:

H.R. 11860. A bill to amend the Federal Water Pollution Control Act to expand research, extend State and interstate water pollution control program grants, and strengthen enforcement procedures, and for other purposes; to the Committee on Public Works.

By Mr. HAYS:

H.R. 11861. A bill to amend title II of the Social Security Act to provide a 30 percent increase in benefits thereunder, and for other purposes; to the Committee on Ways and Means.

By Mr. LANE:

H.R. 11862. A bill to amend the Internal Revenue Code of 1954 to terminate the tax on long-distance telephone service simultaneously with the termination (presently provided for) of the tax on local telephone service; to the Committee on Ways and Means.

By Mr. McFALL:

H.R. 11863. A bill to amend the Servicemen's Readjustment Act of 1944, as amended, so as to authorize the Administrator of Veterans' Affairs to furnish space and facilities, if available, to State veteran agencies; to the Committee on Veterans' Affairs.

By Mr. MOORHEAD:

H.R. 11864. A bill to amend title I of the Housing Act of 1949 to provide that small-business concerns displaced from an urban renewal area by an urban renewal project shall be eligible for loans to assist them in their relocation, under the same terms and conditions as those applicable to loans under section 7(b) of the Small Business Act; to the Committee on Banking and Currency.

By Mr. MORGAN:

H.R. 11865. A bill to provide additional lands at, and change the name of, the Fort Necessity National Battlefield Site, Pa., and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. MASON:

H.R. 11866. A bill to amend section 162 of the Internal Revenue Code of 1954 as to deductibility of lawful expenditures for legislative purposes; to the Committee on Ways and Means.

By Mr. OLIVER:

H.R. 11867. A bill to supplement the national policy against unfair methods of competition and unfair or deceptive acts or practices in commerce by requiring full disclosure of finance charges in connection with extensions of credit; to the Committee on Interstate and Foreign Commerce.

By Mr. OSTERTAG:

H.R. 11868. A bill to provide for adjusting conditions of competition between certain domestic industries and foreign industries with respect to the level of wages and the working conditions in the production of articles imported into the United States; to the Committee on Ways and Means.

By Mr. PORTER:

H.R. 11869. A bill to reduce the cost to the U.S. Treasury of farm price and income stabilization programs, to provide means by which producers may balance supply with demand at a fair price, to reduce the volume and costs of maintaining Commodity Credit Corporation stocks, to provide for distribution to needy people and public institutions of additional needed high protein foods, to preserve and improve the status of the family farm through greater bargaining power, and for other purposes; to the Committee on Agriculture.

By Mr. SMITH of Virginia (by request):

H.R. 11870. A bill to amend the Motor Vehicle Safety Responsibility Act of the District of Columbia, approved May 25, 1954, and for other purposes; to the Committee on the District of Columbia.

By Mr. JONES of Alabama:

H.R. 11871. A bill to amend the National Cultural Center Act, as amended, to enlarge the site within which the National Cultural Center may be built; to the Committee on Public Works.

By Mr. POWELL:

H.R. 11872. A bill to provide for the issuance of a special postage stamp to commemorate the 100th anniversary of the founding of Vassar College; to the Committee on Post Office and Civil Service.

By Mr. IRWIN:

H.R. 11873. A bill to provide for the construction of a shellfisheries research center at Milford, Conn.; to the Committee on Merchant Marine and Fisheries.

By Mr. ROBISON:

H.R. 11874. A bill to provide a deduction for income tax purposes, in the case of a disabled individual, for expenses for transportation to and from work; and to provide an additional exemption for income tax purposes for a taxpayer or spouse who is physically or mentally incapable of caring for himself; to the Committee on Ways and Means.

By Mr. STRATTON:

H.R. 11875. A bill to adjust the rates of basic compensation of certain officers and employees of the Federal Government, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. UDALL:

H.R. 11876. A bill to authorize the establishment of the Fort Bowie National Historic Site in the State of Arizona, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. HARRIS:

H.R. 11877. A bill to amend the Communications Act of 1934, with respect to control of the erection, establishment, or continued existence of antennas used for the purpose of receiving radio signals, and for other purposes; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CRAMER:

H.R. 11878: A bill for the relief of Horace Ambroise Didot; to the Committee on the Judiciary.

By Mr. DANIELS:

H.R. 11879. A bill for the relief of Pietro DiGregorio Bruno; to the Committee on the Judiciary.

By Mr. LANE:

H.R. 11880. A bill for the relief of Anna Catania Puglisi; to the Committee on the Judiciary.

By Mr. McFALL:

H.R. 11881. A bill for the relief of Rosario Saporito; to the Committee on the Judiciary.

By Mr. MOELLER:

H.R. 11882. A bill to clarify the ownership of certain church properties located in the Virgin Islands; to the Committee on Interior and Insular Affairs.

By Mr. MORRIS of New Mexico:

H.R. 11883. A bill for the relief of Arthur Bibo; to the Committee on the Judiciary.

By Mr. BROYHILL:

H. Res. 507. Resolution for the relief of Mrs. Estelle A. Waller; to the Committee on House Administration.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

430. By Mr. GROSS: Petition of 198 residents of Charles City, Iowa, and vicinity in support of H.R. 4488, a bill to raise the Federal minimum wage and to extend minimum wage coverage to include retail and service employees; to the Committee on Education and Labor.

431. By Mr. STRATTON: Petition of the common council for the city of Gloversville and the common council for the city of Johnstown protesting the recent decision of the U.S. Tariff Commission denying relief to the domestic glove industry from foreign imports; to the Committee on Ways and Means.

432. Also, petition of the board of supervisors of Fulton County, N.Y., protesting the decision of the U.S. Tariff Commission denying relief to the domestic glove industry from foreign imports; to the Committee on Ways and Means.

433. By the SPEAKER: Petition of Robert H. Smaltz, New York, N.Y., relative to a redress of grievance relating to and requesting the curbing of Moscow sympathizers, and to stop their propaganda outlets and freedom to poison our youth's minds, and to stop all attempts to curb our military preparedness program and our nuclear tests, which is a direct threat to the peace and security of our people; to the Committee on Foreign Affairs.

434. Also, petition of Clifford Crail, Cincinnati, Ohio, relative to a redress of grievance, and including a copy of the title page of his book entitled "Error of Destiny"; to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

Statements in Support of Mutual Security Program

EXTENSION OF REMARKS
OF

HON. HARRIS B. McDOWELL, JR.

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 21, 1960

Mr. McDOWELL. Mr. Speaker, because of the widespread criticism of this program during this annual debate, both in the Congress and in the public press, I believe that the American people have a right to hear both sides of the argument. And further because of my firm conviction that our foreign aid programs have been and continue to be successful in stopping the spread of communism throughout the world, I ask unanimous consent to have the article entitled "Committing the Uncommitted" by Richard Lowenthal, which recently appeared in the London Observer, a letter from the American Israel Public Affairs Committee and attached statement, which I received, and my own supplementary statement appearing in Union Calendar No. 594, as a part of the report of the special study mission to Asia, western Pacific, Middle East, southern Europe, and north Africa, to be printed in the CONGRESSIONAL RECORD to supplement the speech which I gave on the floor today:

COMMITTING THE UNCOMMITTED

(By Richard Lowenthal)

Watching President Eisenhower and Soviet Premier Nikita Khrushchev on their pre-summit travels, a newspaper reader might be forgiven for believing that, under this form of "competitive coexistence," the East-West struggle has been reduced to a combination of popularity contest and giveaway competition. The visitors speak their sermons and hand over their presents; the journalists count the crowds and the applause; the uncommitted countries pocket the cash—and stay as uncommitted as before.

It is an idyllic picture, but a misleading one. In fact, both sermons and presents have their place in a continuing struggle for power. The immediately obvious part of these worldwide hustings is concerned with winning the backing of "world opinion," and of votes in the United Nations Assembly, for some of the issues to be discussed at the summit, particularly in the field of disarmament. The more long-term, but probably more vital, part concerns the effect of different types of economic aid on the pattern of development of the receiving country.

Take the summit issue first. Any scheme for disarmament will be judged by its effect on the world balance of power. Khrushchev's plan for the eventual abolition of armed forces aims, above all, at creating obstacles to any increase of the North Atlantic Treaty Organization's conventional forces, which are still inferior to Soviet forces in Europe and hence in a poor position to withstand political blackmail.

During his journey through Asia, Khrushchev everywhere enlisted sympathy for his plan, never failing to point out that, apart from its service to peace, it would free billions of dollars for help to underdeveloped countries. He thus hopes to make it difficult for his summit opponents to reject his plan without isolating themselves in the United Nations. He himself cheerfully ignored the U.N. Assembly's recommendation of the Western disarmament plan in 1957, and even refused further negotiation in the framework favored by the U.N. at that time, but he knows that at least American and British domestic opinion is highly sensitive to world opinion as expressed in the U.N.

Today, the West can no longer obtain the two-thirds majority required for an Assembly recommendation (or for the election of a nonpermament member to the Security Council) without the support of the hard core of uncommitted nations not predictably on one side on most issues. Hence, any diplomatic approach that enlists the sympathy of this hard core is likely to limit the freedom of maneuver of the Western negotiators.

Apart from this immediate issue, the Soviet Premier, while carefully respecting the military nonalinement of his Asian hosts (he went out of his way to express his approval for it in every communique), has sought to aline them politically with the Soviet bloc where possible. Failing that, he has attempted to aline the Soviet bloc with their interests wherever they happened to have national conflicts with any Western or pro-Western country—as Indonesia over its claim to Dutch New Guinea, and Afghanistan over its claim to Pushtunistan at Pakistan's expense.

But the most serious and substantial effort to "commit the uncommitted" is being currently made by the Soviets in the economic field, and on a more long-term basis. In the last few months, Soviet pledges of development aid to non-Communist countries in Asia, Africa, and Latin America have been more concentrated and massive than at any time since the policy was first introduced in 1954. They are now increasingly accompanied by Soviet warnings against the alleged harmful effects of Western aid. What emerges from these warnings—voiced by both Khrushchev and Deputy Premier Anastas I. Mikoyan on their recent travels and in Soviet books on the problems published in the last few years—is that the Kremlin regards its own aid not merely as a means to court popularity but as likely to commit the uncommitted countries to a specific path of development.

Briefly, the Communists charge that the imperialists wish to prevent the independent industrial development of young nations, in order to keep them in their traditional role as exploited suppliers of foodstuffs and raw materials. This purpose, once assured by keeping them as colonies under political tutelage, is now allegedly pursued by limiting economic aid to such fields as agricultural improvement or at best local consumer goods industries. Only the Soviets, it is claimed, are willing to help the underdeveloped nations in building up their own heavy industry, power resources, etc.—that is, in ceasing to be economic colonies.

This Communist argument obscures the most vital problems now facing many underdeveloped countries by mixing it up with an issue of the dead past. The traditional colonial pattern of private capital investment did indeed concentrate on extractive industries and export crops as the most immediately profitable fields, and thus tended to preserve a lopsided colonial economy in a lopsided international division of labor.

This could be overcome only by some form of publicity planned investment, and that is why all the newly sovereign nations have introduced such planning and talk of a Socialist economy.

But postwar development aid has from the start been agreed upon with these newly sovereign governments and has been channeled through their planning boards, with the express purpose of overcoming the traditional lopsided character of underdeveloped economies. It is at this stage that the planners, in allocating indigenous and foreign investment, have been faced with the choice whether to aim at a balanced, all-around development, raising the low agricultural productivity and living standards of their people parallel with the building up of industry, or whether to rush ahead with a one-sided concentration of heavy industry at the price of long-term severe sacrifices by the people. The last is, of course, the Communist pattern, as practiced in Russia and China, and made possible by totalitarian dictatorship.

The planners in the underdeveloped nations are, of course, conscious of this choice; and those who care to preserve free institutions do not wish to give too high a priority to long-term investments in heavy industries. But if massive foreign capital aid is accepted for these specific prospects, it may also tie down a large share of indigenous resources—labor, raw materials, transport—to enterprises which will not bear consumable fruit for a long time. Such aid has invisible strings—committing a country to a pattern of economic development which, as the Soviets know, has its own political logic.

Moreover, as Soviet aid is always given in the form of long-term loans and often specific export crops are earmarked in advance for repayment, the commitment to the steep Soviet road of development may be reinforced in such cases by a long-term dependence on the Soviet market. This is remarkably similar to the old type of colonial dependency, or to the type which Nazi Germany established before World War II by its barter contracts in the Balkans.

All these dangers are involved in the present rush to bring aid to the underdeveloped nations. It is in the interest of both the receiving countries and of the West that the total amount of aid from all sources should be as large as possible; and the fact that the Soviets are now contributing substantially along with the traditional exporters of capital is in itself a cause for satisfaction rather than concern. But it is also in the interest of both the receiving and the Western nations that such aid should not be given on terms which tend to "commit the uncommitted"—to distort their road of development into the Soviet pattern, making it needlessly hard and painful, or to create a one-sided long-term dependency on Soviet markets.

That Khrushchev is setting out to achieve just that is suggested by his angry rejections of the idea of pooling a major part of all foreign aid in the hands of some impartial United Nations agency. Perhaps the Western Powers, just setting out to coordinate their own aid programs, should have another look at that idea.

AMERICAN ISRAEL PUBLIC
AFFAIRS COMMITTEE,
Washington, D.C., April 13, 1960.

HOUSE OFFICE BUILDING,
Washington, D.C.:

The House Committee on Foreign Affairs has recommended an amendment to the statement of policy of the Mutual Security Act, to express the opposition of Congress to economic warfare such as boycotts, blockades and the restriction of the use of international waterways. The committee has reported that the amendment is an out-

growth of navigation restrictions in the Suez Canal.

The proposed amendment is a timely and welcome reaffirmation of American policy. We hope you will support it when the MSA comes up in the House.

We believe that the intensification of the Suez Canal blockade during the last 12 months is a glaring example of the failure of the United Nations to enforce its charter and its decisions. It is a major factor in the aggravation of tensions in the Middle East.

The Danish freighter, the *Inge Toft*, was held up in Port Said for 8½ months and was finally forced to yield her cargo to the United Arab Republic on February 4. The UAR has just seized the cargo of a little Greek freighter, the *Astypalea*, which was carrying cement from Israel to Djibouti and which has been detained at Port Said since December 18. This drew public rebuke last Friday from Secretary General Dag Hammarskjold, who declared that such action "goes against" the principles of the United Nations.

We continue to support economic assistance to underdeveloped countries and we urge you to vote for the MSA authorizations for this purpose, including those for special assistance, technical cooperation, and our nation's contribution to the United Nations Relief and Works Agency.

We will be grateful for your sympathetic consideration of our views.

Sincerely,

I. L. KENEN.

P.S.—We enclose texts of the proposed amendment, the committee's comments and two relevant newspaper editorials.

EXCERPT FROM THE REPORT OF THE HOUSE COMMITTEE ON FOREIGN AFFAIRS ON H.R. 11510

STATEMENT OF POLICY

Section 2, amending section 2 of the Mutual Security Act: Statement of policy.

The Committee on Foreign Affairs has followed closely developments relating to the use of the Suez Canal and believes that the United States has not done as effective a job as it should have in urging the removal of the restrictions on the free movement of commerce through the canal. With this and other situations in various parts of the world in mind, the committee proposes an amendment to the Mutual Security Act, expressing the sense of the Congress that the United States favors freedom of navigation in international waterways and economic cooperation between nations, and that the purposes of the Mutual Security Act are negated and the peace of the world is endangered when nations which receive assistance under the act wage economic warfare against other nations receiving such assistance, including such procedures as boycotts, blockades, and the restriction of the use of international waterways. The amendment further states that it is the sense of the Congress that the Mutual Security Act and the Agricultural Trade Development and Assistance Act of 1954 shall be administered so as to give effect to these principles.

The amendment leaves to the President full responsibility for the determination of the application of the policy and of such action as is to be taken in these matters, but requires that the President report to the Congress on the implementation of this section.

TEXT OF THE AMENDMENT

(f) It is the sense of the Congress that inasmuch as—

(1) The United States favors freedom of navigation in international waterways and economic cooperation between nations; and

(2) The purposes of this Act are negated and the peace of the world is endangered when nations which receive assistance under this act wage economic warfare against other nations assisted under this Act, including such procedures as boycotts, blockades, and the restriction of the use of international waterways;

assistance under this Act and the Agricultural Trade Development and Assistance Act of 1954, as amended, shall be administered to give effect to these principles, and, in all negotiations between the United States and any foreign state arising as a result of funds appropriated under this Act or arising under the Agricultural Trade Development and Assistance Act of 1954, as amended, these principles shall be applied, as the President may determine, and he shall report on measures taken by the administration to insure their application.

SUPPLEMENTARY STATEMENT BY HON. HARRIS B. MCDOWELL, JR.

While signing the study mission's report, and while approving it in general, I wish to add this additional statement of my own.

On February 16, 1960, President Eisenhower in his message to the House of Representatives relative to the mutual security program, had this to say:

"A year ago in my message to the Congress on the mutual security program, I described it as both essential to our security and important to our prosperity. Pointing out that our expenditures for mutual security are fully as important to our national defense as expenditures for our own forces, I stated that the mutual security program is not only grounded in our deepest self-interest but springs from the idealism of the American people which is the true foundation of our greatness."

Because I am fully in agreement with the statement of the President, and because of my on-the-spot observations of the operation of the mutual security program in the 20 countries which I visited as a member of the study mission; I am convinced that the mutual security program in most of these countries is succeeding in its overall objectives.

The responsibility for the administration of economic assistance under the mutual security program is vested in the International Cooperation Administration. This executive agency must accept full responsibility for the recurring charges of maladministration. In spite of repeated evidence of such maladministration over the last several years, there is no indication of administrative corrections. Because of this situation, the mutual security program is carrying an unnecessary burden of criticism which has affected its acceptance by the American people.

Without the foreign aid programs of the United States since World War II, the map of the world would be vastly different today. Greece, Turkey, Iran, Israel, Laos, Vietnam, Korea, and Taiwan, as well as many of the nations of Western Europe, are free today because of the aid which we have given.

While fully cognizant of the validity of the situation emphasized in this report of both the ability and the willingness of the American taxpayers to continue to carry the heavy burden of the mutual security program, and further recognize that our own economic growth is moving forward at a faltering pace as compared to the last several decades, it is still true that we, as a Nation, enjoy a standard of living far above that which has been achieved under any other form of government in any other part of the world.

Would it not, therefore, be a tragic mistake if we placed emphasis only upon a strong military shield both within and without our borders? Military assistance has and continues to require one-half of all of the expenditures under mutual security. The fast growing economic strength of Communist Russia and Communist China, with or without any directly implied threat to the free world, would denote the changing pace and direction of the cold war in the 1960's.

While agreeing with the conclusions of the study mission report that military assistance must be continued to our allies, it is my observation that both the executive department and the Congress should give careful attention and study to the future balance of military assistance and economic aid in the underdeveloped countries.

Finally, I would emphasize that from my experience in visiting the countries of Asia and the Middle East as a member of the study mission, I am convinced that because of the success of the mutual security program, the Marshall plan, the Truman doctrine, and the Eisenhower doctrine, we have built a great wealth of friendship and understanding on a people-to-people basis in these areas of the world. The recent visit of President Eisenhower has demonstrated that dynamic friendship.

Creaks and Groans in the Machinery of National Security Planning

---

EXTENSION OF REMARKS
OF
HON. MIKE MANSFIELD
OF MONTANA

IN THE SENATE OF THE UNITED STATES

Thursday, April 21, 1960

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD a press release from the office of Senator HENRY M. JACKSON, of Washington, chairman of the Subcommittee on National Policy Machinery of the Government Operations Committee.

In the release, the junior Senator from Washington, whose work as chairman of the subcommittee has been outstanding, announces new public hearings in the subcommittee's nonpartisan attack on "creaks and groans in the machinery of national security planning."

The release indicates that seven men of science will appear before the subcommittee next week. They are referred to collectively by the distinguished Senator from Washington as "seven scientific wise men."

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana?

There being no objection, the release was ordered to be printed in the RECORD, as follows:

Senator HENRY M. JACKSON, chairman of the Senate Subcommittee on National Policy Machinery, today announced new public hearings in the subcommittee's nonpartisan attack on "creaks and groans in the machinery of national security planning." The hearings, starting Monday, April 25, will focus on gearing science and technology into foreign and defense policymaking.

"Science and technology," JACKSON said, "exercise a new and decisive influence on national power, prestige, and policy. The statesman, the soldier, and the scientist must work together as never before. The question is: What is the right way to organize our Government to get the right scientific and technical programs at the right time?"

The hearings will feature testimony from witnesses JACKSON characterized as "seven scientific wise men."

The schedule of the hearings is as follows:

Monday, April 25: Dr. James A. Perkins, vice president of the Carnegie Corp. and

member of the Gaither committee appointed by President Eisenhower in 1957 to survey national security problems.

Tuesday, April 26: Dr. James B. Fisk, president of Bell Telephone Laboratories and vice chairman of the President's Science Advisory Committee; Dr. William H. Pickering, director of the Jet Propulsion Laboratory, California Institute of Technology; and Dr. Ruben F. Mettler, executive vice president of Space Technology Laboratories.

Wednesday, April 27: Dr. Herbert York, director of Defense Research and Engineering, and formerly director of the Livermore Scientific Laboratory, University of California; and Dr. Edward M. Purcell, professor of physics at Harvard University, Nobel Prize winner, and member of the President's Scientific Advisory Committee.

Thursday, April 28: Dr. Eugene P. Wigner, professor of mathematical physics, Princeton University, and recipient of the Enrico Fermi and atoms for peace awards.

All hearings will start at 10:00 a.m., in the Government Operations Committee hearing room (3302 New Senate Office Building).

The Subcommittee on National Policy Machinery was established last year for the purpose of making the first full review of the national security process since the passage of the National Security Act of 1947. Further hearings will be scheduled throughout the session.

Serving with JACKSON on the subcommittee are Senators HUBERT H. HUMPHREY, Democrat, of Minnesota; EDMUND S. MUSKIE, Democrat, of Maine; KARL E. MUNDT, Republican of South Dakota; and JACOB K. JAVITS, Republican of New York.

Ten Years of Progress by the Education Foundation, Inc., of West Virginia Celebrated at Anniversary Meeting

EXTENSION OF REMARKS
OF
HON. JENNINGS RANDOLPH
OF WEST VIRGINIA
IN THE SENATE OF THE UNITED STATES
Thursday, April 21, 1960

Mr. RANDOLPH. Mr. President, it was my privilege to have participated with approximately 150 educators, including President Elvis Stahr of West Virginia University and the presidents of other State supported and independent colleges, leaders of business, industry and the professions and governmental officials, at the observance of the 10th anniversary of the founding of the Education Foundation, Inc., of West Virginia, on April 19, 1960, in Charleston, W. Va.

Also present for the luncheon which followed the morning meeting was Gov. Cecil H. Underwood of West Virginia, who spoke briefly. The secretary of the Claude Worthington Benedum Foundation, David D. Johnson of Bridgeport and Pittsburgh, Pa., attended.

Officers and directors of the Education Foundation, Inc., all West Virginians, are Phil Conley, president; Charles C. Wise, Jr., first vice president; Dr. William R. Laird, second vice president; Sam T. Mallison, treasurer; Judge Elizabeth V. Hallanan, secretary; Boyd B. Stutler, managing editor; and directors, Marshall Buckalew, Cecil B. Highland, Jr., Charles Hodel, Kyle McCormick, R. Virgil Rohrbaugh, Raymond Salvati, Rupert A. Sinsel, Delbert S. Stout, and Earl H. Wilson.

PHIL CONLEY CALLED "MR. WEST VIRGINIA"

The Education Foundation is a nonprofit, nonshare West Virginia corporation which received its charter on May 31, 1950. Phil Conley, often referred to as "Mr. West Virginia," has given significant leadership and dedicated labor to the work. He has been one of the State's leading historians and publishers for many years. I had the honor to have worked for him as a magazine writer 35 years ago when he was publisher of the West Virginia Review.

The foundation has made significant achievements in carrying out its purposes and objects, among which are the following:

To promote, assist, and encourage research and scholarship in literature, philosophy, and the history of West Virginia; to give financial aid to students, teachers, and other persons with interests and aptitudes in those fields of endeavor; to manufacture, bind, publish, and sell books and periodicals, and so forth.

In the past 10 years the Education Foundation, Inc., has owned and published 20 books on West Virginia subjects and by West Virginia authors. Among these is the textbook, "West Virginia Yesterday and Today," by Phil Conley and Boyd Stutler. This is the only official elementary history of West Virginia adopted by the State board of education. In the past few years, 41,000 copies have been published, most of which are in use in the schools. All of the money received from the sale of this book, as well as that received from other volumes, is used for the program of the foundation; no royalties are paid to authors.

At present five books are being written by West Virginia authors which will be owned by the foundation. Among these will be a definitive history of "West Virginia Oil and Gas Industry" by Dr. Eugene Thoenen. This will be a companion volume to the book recently published, "History of the West Virginia Coal Industry," by Mr. Conley.

COLLEGE SCHOLARSHIPS ARE PROVIDED

Also during the past 10 years the foundation has awarded scholarships and loans to college students in the amount of $9,181.

The Education Foundation has never asked for any contributions from the public or individuals and its officers say the foundation does not contemplate doing so. However, several members of the board and a few others have voluntarily made gifts of $27,760. The sale of books has been and continues to be the chief source of revenue for the program of the foundation. Total sales of books in the first 10 years of the organization's life amounted to $136,269.

Dr. William R. Laird gave to the foundation all of the income from the sale of his book, "The Philosophy of Medicine."

In the official report presented by the foundation's secretary, Judge Hallanan, plans for the future were discussed. It was pointed out that West Virginia, on the eve of its 100th anniversary as a State, is in a period of great economic and social upheaval. Perhaps never before have our citizens been so thoroughly alert to the problems facing them, the report noted, and continued:

To help solve these problems, we believe a careful and objective study of the past century is essential. Our State has a rich heritage in her history, but many of her citizens are not fully aware of it. The time is at hand for extensive research and creative writing about West Virginia and her great men and women. The Education Foundation has a unique opportunity to make worthwhile contributions in this field.

FUTURE PROGRAM IS NOTEWORTHY

Mr. President, I enthusiastically endorse the Education Foundation, Inc., of West Virginia in its five major recommendations, and I ask unanimous consent to have them printed in the RECORD.

There being no objection, the recommendations were ordered printed in the RECORD, as follows:

1. We hope graduate students in the 17 degree-granting institutions of higher learning in West Virginia will be encouraged to write theses and dissertations on West Virginia subjects when seeking advanced degrees.

2. The scholars serving on faculties in our institutions of higher learning are urged to write books on subjects pertaining to West Virginia and her people.

3. The newspapers of West Virginia, both daily and weekly, are invited to publish feature articles pertaining to their own communities, as well as those of statewide interest.

4. Teachers in high schools will be requested to assign subjects pertaining to the State for themes, orations, debates, and other curricular as well as extracurricular studies.

5. We recommend a West Virginia library. Many citizens of this State have books in their private libraries pertaining to West Virginia and her people. It is hoped that many more will set aside a corner in their libraries for books on these subjects. If they do, we know they will receive much information and pleasure from their West Virginia library.

Israel's 12th Anniversary of Independence

EXTENSION OF REMARKS
OF
HON. VICTOR L. ANFUSO
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, April 21, 1960

Mr. ANFUSO. Mr. Speaker, once again we celebrate the anniversary of the independence of the State of Israel. This year the anniversary occurs on May 2. Time marches on rapidly for only yesterday, it seems, we witnessed those great historical events connected with the restoration of Israel to statehood—and now we suddenly realize that 12 full years have elapsed since then.

The people of Israel, as well as the Jewish community in the United States, must surely experience a great sense of pride as they look back over these past 12 years and recount the notable achievements in building up Israel as an independent and democratic state. We in this country share in that pride be-

cause the American people have not only aided Israel from its very inception to attain its marvelous progress in every human endeavor, but we are particularly proud that Israel looks to our country for guidance, it is shaping its way of life and its concept of society in the image of America, and it has throughout the entire period of its existence become one of our best and most dependable allies.

The visit to the United States by Prime Minister David Ben-Gurion in March of this year further helped to cement strong bonds of friendship and understanding between this country and Israel. His talks with President Eisenhower, Secretary of State Herter, and other top leaders of our Government certainly served to clear up possible misunderstandings and miscalculations rearding the situation in the Middle East, and Israel's views in particular.

Today, there is no doubt in anyone's mind that Israel is here to stay and that she is truly an outpost of democracy and a bulwark for freedom in that part of the world. But more than that is clear now to all right-thinking people. It is now generally recognized that Israel is vitally interested in maintaining peace in the strategic area of the Middle East of which she is a part. She is interested in the economic development of the area for the benefit of all people. She is desirous of settling regional problems, including the Arab refugee problem, in a peaceful manner. Furthermore, Israel is not planning to embark on any expansionist adventures, as is falsely maintained in certain Arab quarters, because such adventures would only lead to war and chaos.

I am very pleased that the House of Representatives saw fit to include in this year's mutual security bill a statement of policy expressing the sense of Congress that the United States favors freedom of navigation in international waterways and economic cooperation between nations. I was glad to support that statement.

Specifically, we had in mind the unilateral and irresponsible action of Egyptian Dictator Nasser in barring Israeli shipping from transit through the Suez Canal. We also had in mind the boycott being waged against Israel by the Arab countries, which is hurting them as much as Israel not only in dollars and cents, but in moral and political prestige, in world condemnation, and by the fact that it keeps the area in a constant state of turmoil. Such acts are very frustrating to the efforts of the United States and the United Nations to help bring about a greater degree of political and economic stability in the area and a higher standard of living for all the people.

In the statement of policy mentioned above it is specifically emphasized that "the purposes of this act are negated and the peace of the world is endangered when nations which receive assistance under this act wage economic warfare against other nations assisted under this act, including such procedures as boycotts, blockades, and the restriction of the use of international waterways."

One can only express deep regret that at a crucial period in human events, when mankind is faced with a struggle for survival against a ruthless tyranny, so much energy and effort are wasted in the Middle East in spreading hatred and distrust among the nations which only serves to weaken the area and to render it ripe for a Communist invasion. Instead of cooperating to build up the area economically, develop its human and natural resources, raise its standard of living, improve the standards of health and education, the nations of the Middle East are busy with plots and counterplots, with boycotts and blockades, with spreading hatred of their neighbors, and with pursuing a costly arms race which can only spell their own doom and endanger the peace of the whole world.

Unfortunately, in their blindness, the Arab leaders refuse to recognize facts or to consider reasons. Nasser does not seem to understand that hatred begets hatred, and that boycotts will bring forth counterboycotts. If he did not know it before, he should certainly know it now. For the past 2 weeks the Seafarers International Union which is headed by one of the ablest union leaders in this country and my good friend, Paul Hall, is conducting a counterboycott against the Egyptian ship *Cleopatra*, now stranded in a New York pier. Actually, the dockworkers in New York refuse to unload the cargo from the Egyptian vessel because of Nasser's treatment of American ships and seamen.

It is axiomatic that the insatiable desires of a dictator know no limits. Nasser only proves the old axiom once more. Because he has been able until now to get away with some of his irresponsible exploits against Israel, he believes he can also impose restrictions against American vessels and American seamen who use the international waterways of the Suez Canal or stop at Egyptian ports. He sees nothing wrong in practicing boycotts and blockades against others, but he resents it when the same practices are applied against him. He is resorting to all sorts of dire threats against American shipping, but does not stop to think of the consequences to Egyptian shipping, to the economy of his nation and the effect on his people. He is running true to form—a dictator never thinks about the welfare of his country and its people.

What Nasser fails to realize is that American seamen are free men in a free country who are determined to protect their rights and interests. No rantings or threats by Nasser will deter them. Organized labor and American public opinion support their action. It is my belief that the Seafarers Union is performing a great service for the free world in teaching the Egyptian dictator a lesson in American democracy. I congratulate the leaders and the members of the Seafarers Union for upholding the standard of free labor in a free country.

In the light of these and other events in the Middle East, Israel seems to be the only levelheaded nation in the area. It knows what it wants and it is determined that the hostile acts of its Arab neighbors shall not deter it from its course. And that course is set in one direction—toward the attainment of a lasting peace in the Middle East. For this reason alone the people of Israel deserve our undiminished moral, political, and economic support.

On this occasion, the 12th anniversary of Israel's independence, I wish to extend my sincerest wishes to the leaders and the people of Israel. Together with these wishes go my prayers that they will soon realize their goals—lasting peace, economic independence, and a happy nation.

Unemployment Insurance for Nonprofit Organization Employees

EXTENSION OF REMARKS

OF

HON. PAUL A. FINO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 21, 1960

Mr. FINO. Mr. Speaker, today we have many programs which are designed to protect the population of the Nation against risks over which they have no control. These programs included social security, the public assistance program, and the unemployment insurance program. We are constantly striving to make the benefits amounts under these programs commensurate with the requirements of the recipients and to design new types of benefits which will meet changing needs. Yet, much as such improvements are needed, we should also be alive to the fact that great numbers of people are as yet denied even minimum protection under some programs. This is particularly true of the unemployment compensation program. After the terrible experiences of the early thirties it was realized that our citizens must be afforded protection against the miseries which follow unemployment. Hence, Congress designed the present unemployment law to give a measure of income security to those who are unable to obtain work through no fault of their own. It is a sobering thing to consider that when we suffer periods of economic structure such as the recent recession, unemployment insurance is the only thing standing between many families and the public dole. I was surprised and shocked to learn that approximately 1,300,000 persons are presently excluded from this vital protection by the operation of existing law. I refer to those persons who work for nonprofit organizations. I find it difficult to see why this large and valuable segment of our working population should be treated with less concern than other portions of the labor force. The character of the organization for which a man works has not the slightest effect on his ability to endure a period of unemployment for which the economy, and not the worker, is responsible. When income stops people are hungry. I cannot agree that eligibility should hinge upon the character of the organization by whom the worker is not being paid.

After all, nonprofit organizations hire people to do the same kind of work as is

done by profitmaking organizations. This fact has been recognized by Congress in making it possible for the employees of nonprofit organizations to obtain social security coverage. But, social security coverage provides only a portion of the protection to which such people ought to be entitled. We have constantly worked to improve the coverage of social security and have done so. But, unemployment compensation has not kept pace. I think we must take steps to close the gap. For many years, all the laws of this Nation have recognized nonprofit organizations as a special type, and have accorded them many privileges and immunities. This is because such organizations are devoted to the general good rather than the enrichment of any private individual. It seems to me that such organizations cannot continue to be "friends to man" and at the same time cheerfully contemplate more than a million workers without the slightest protection against the risk of unemployment.

I have therefore introduced a bill, H.R. 11594, which would eliminate the provisions of present law which exclude employees of nonprofit organizations from the insurance they need and deserve. I am happy that a similar proposal is contained in H.R. 7177 which was introduced by the Honorable WILBUR MILLS, chairman of the Ways and Means Committee, jointly with the late Honorable Richard Simpson. I know that it will receive serious consideration by the Committee on Ways and Means, and look forward to its adoption by the Congress as an important forward step in strengthening our unemployment insurance plan. I hope that this body will join with me so that my bill, or one embodying the same principles, can become law as soon as possible.

Senator Wiley Urges the Clarification of State-Federal Jurisdiction on Wiretapping

EXTENSION OF REMARKS
OF
HON. ALEXANDER WILEY
OF WISCONSIN
IN THE SENATE OF THE UNITED STATES
Thursday, April 21, 1960

Mr. WILEY. Mr. President, several months ago I urged congressional action to help safeguard the privacy of American citizens from unwarranted wiretapping and eavesdropping. The sanctity of the American home and the right of Americans for privacy at home, in business, and elsewhere, should be securely safeguarded. Over the years, however, a growing utilization of electronic devices for wiretapping and other forms of eavesdropping, by both individuals and Government agencies, has seriously endangered this traditional right.

Under present Federal law, the divulging and publication of information obtained from the interception of wire and radio communications is made a crime. Often, however, this law is disregarded, or there is often too little effort to enforce it. Despite the Federal prohibition of such evidence in the Federal courts, some States—contrary to the Federal statutes—specifically authorize wiretapping and admit it as evidence in the courts. Clearly, this evidences a real need for clarifying the lines of jurisdiction, as well as policy, in this field.

We recognize, of course, that the use of such practices by responsible law-enforcement agencies, such as the FBI and the intelligence branches of the armed services, may be necessary in the detection of crime, espionage, and sabotage. Also, there are certain crimes that cannot be detected and proven without wiretapping. In cases of serious crimes, society must be given adequate tools to protect itself. In such cases, however, it is important that we discern clearly between the criminal who abuses the practice and the law-enforcement officer who is charged with crime prevention.

Recently, the U.S. Court of Appeals in New York, commenting on the question of State-Federal jurisdiction on wiretapping, concluded that:

> A Federal court should not intervene in criminal prosecutions by a State for a violation of its criminal laws.

All this creates a curious situation. It is widely recognized that the use of wiretapping information violates an act of Congress, the Federal Communications Act, and evidence obtained by wiretapping is, therefore, not admissible in the Federal courts.

Yet, at the same time, the Federal courts, recognizing wiretapping as a violation of U.S. statutes, are reluctant to intervene in criminal prosecutions by a State, even in cases involving unauthorized wiretapping.

The present provisions of the Federal wiretapping law were enacted in 1934. The act of 1934 never envisaged the new electronic devices. The act of 1934 never envisaged the conditions the police and the courts are faced with today in the field of wiretapping.

The Congress, I believe, has a duty to clarify the lines of jurisdiction related to wiretapping. Last year, the Constitutional Rights Subcommittee of the Judiciary Committee held hearings on wiretapping. However, I believe that this study should be concluded and legislation be enacted to clarify: First, the legality or illegality of wiretapping practices; second, conditions under which wiretapping may be undertaken; and third, the State and Federal lines of jurdiction in this field.

A major purpose of this clarification, I believe, would be to effectively protect the rights of individual citizens without unduly interfering with effective law-enforcement practices.

I should like to insert in the CONGRESSIONAL RECORD at this point in my remarks an editorial that appeared in the Washington Post on Tuesday, April 19, 1960, and entitled, "Confusion Compounded."

There being no objection, the editorial was ordered to be printed in the RECORD.

CONFUSION COMPOUNDED

The U.S. Court of Appeals in New York has come up with a tentative answer to one phase of a tangled question: Whether a Federal court should enjoin State officials from divulging evidence obtained by wiretapping—a Federal crime—in a State criminal prosecution. It concluded that "a Federal court should not intervene in criminal prosecutions by a State for violation of its criminal laws." At the same time it indicated no doubt that the use of wiretap information violates an act of Congress—the Federal Communications Act.

This confusion stems basically from the vagueness of the language in the Federal Communications Act and the reluctance of Congress, despite the widespread use of wiretapping, to do anything to clarify the law. The Supreme Court of the United States has ruled that evidence obtained by wiretapping is inadmissible in any Federal court. But the State of New York has a statute which authorizes wiretapping under certain circumstances—if approved by a State supreme court justice—and permits the introduction in State courts of evidence obtained by wiretapping. Thus the State law places justices in the position of seeming to flout Federal law.

Considerable hullabaloo has emanated from district attorneys in New York State to the effect that Congress ought to amend the Federal Communications Act in order to permit State wiretapping. That would go far beyond the intent of the Keating bill, which would attempt to cut down on the abuses of wiretapping by authorizing it upon specific Federal court warrant for a narrow range of Federal crimes. It would be more becoming to the district attorneys if they would seek to have New York law brought more in consonance with Federal law.

Perhaps the U.S. Supreme Court will review this difficult case. If it does, it will have to weigh against its long tolerance of diversity of standards regarding the admissibility of evidence in State courts a concern for the respect due an act of Congress. The situation cries for legislative as well as judicial illumination focused specifically upon the point whether "no" means what it appears to mean or is to be construed as meaning "maybe."

Arbor Day—A Memorial to Julius Sterling Morton of Nebraska

EXTENSION OF REMARKS
OF
HON. GLENN CUNNINGHAM
OF NEBRASKA
IN THE HOUSE OF REPRESENTATIVES
Thursday, April 21, 1960

Mr. CUNNINGHAM. Mr. Speaker, tomorrow is the birthday of Julius Sterling Morton, a nationally famous Nebraskan.

J. Sterling Morton was one of a number of public-spirited citizens of the late 19th century who realized the importance of forestry and conservation and who were alarmed by the rapid deforestation of many sections of the United States.

Many notable people realized that the States might profitably plant trees every year at the proper time or supervise their planting; but it was Mr. Morton, then the Nebraska commissioner of agriculture, who was the first to propose the

setting apart of a day for that purpose. In 1872 he succeeded in inducing the State board of agriculture to adopt his resolution, which set April 10 as Arbor Day.

Great enthusiasm was aroused among Nebraska's citizens, and over a million trees were planted the first year. Three years later, in recognition of the important role he played in beautifying and reforesting an almost treeless Nebraska, Mr. Morton's birthday, April 22, was designated as "Arbor Day" in Nebraska.

At first the idea was slow in spreading, but after the program was so successful in Nebraska the movement began to catch on very rapidly. By 1890 over 26 of the States and Territories had adopted the observance as a legal holiday.

As a result of Arbor Day being created in Nebraska, the State was officially known as the Tree Planters State for 60 years.

Most of the trees in Nebraska stand as a living memorial to the contributions of Julius Sterling Morton, who served as this Nation's third Secretary of Agriculture from 1893 to 1897. He is especially credited today with tree-planting activities ranging from huge manmade national forests in the sandhills of our State to most farm shelter belts and tree-lined city and village streets.

Arbor Lodge is a State park in Nebraska City which stands as a constant reminder of the contributions that Morton made to the State and the Nation. Every year thousands of schoolchildren and tourists visit this beautiful park.

Over the years the nature of the Arbor Day celebration has changed slightly. At first the efforts to extend its celebration were made chiefly through agricultural associations and civic authorities, but in 1882, the plan of making it a school festival was inaugurated. It is this form of the celebration which is so popular throughout the United States and many other countries of the world. The scope and purpose of the program have been greatly broadened from the simple exercises and the planting of single trees. It has become the occasion for impressing on the minds of all schoolchildren the importance of forestry and the planting of thousands of seedlings to reforest what would otherwise be nothing but wasteland.

The people of Nebraska think so highly of J. Sterling Morton that he is one of only two Nebraskans honored by having their statues in the U.S. Capitol building. The statue of Morton is one floor below in the hall near the House restaurant.

Under leave to extend my remarks, I include an editorial from the Omaha Daily Journal-Stockman.

A BREATH OF COUNTRY AIR

That fresh country air that rural folks enjoy and city dudes dream about is all that you hear about it and more. Why? Well, for one thing, country air isn't always being polluted and loaded down with foreign matter as is city air. And, too, country air is always being cleaned and refreshed by nature.

Researchers tell us that trees, shrubs, and grass—all green vegetation—operate like a giant vacuum cleaner, taking in carbon dioxide and giving forth pure oxygen. At least a dozen good-sized trees, we understand are needed to clean up after a single automobile.

How many "air cleaners" will you plant in 1960 for future generations?

I would like to add that this material was prepared by a college student from Nebraska who is spending a few weeks in my office as part of a Colgate University government study program. Mr. Kenneth Ristau of Omaha is one of a dozen Colgate students who are spending 4 months in Washington, D.C., and learning firsthand how the Federal Government functions.

SENATE

MONDAY, APRIL 25, 1960

The Senate met at 12 o'clock meridian, and was called to order by the Vice President.

Rev. Carlton C. Allen, pastor, the Presbyterian Church, Bound Brook, N.J., offered the following prayer:

Almighty God, our Heavenly Father, we pause now in this session of the Senate of these United States of America, to transact the most important business of this day. As a nation under God, we pause to invoke Thy wisdom for our many questions, Thy purpose to direct our plans, Thy will to mold our conclusions, and Thy presence for all our deliberations.

We humbly thank Thee for our rich heritage of the past, and pray to be worthy of the trust that now is laid upon us.

Grant us, in this strategic place and in this critical era of the world's history, to make no small or selfish decisions, but to hold the truth of God and the welfare of man more dear than personal preference or partisan power.

Let Thy divine blessing rest upon each individual Member of this Assembly. Comfort the troubled, guard the tempted, guide the uncertain, and strengthen the courageous, that we may achieve an honorable peace and an honest prosperity for our own people and for all mankind. Amen.

THE JOURNAL

On request of Mr. MANSFIELD, and by unanimous consent, the reading of the Journal of the proceedings of Thursday, April 21, 1960, was dispensed with.

REPORT OF A COMMITTEE SUBMITTED DURING ADJOURNMENT

Under authority of the order of the Senate of April 20, 1960, Mr. FULBRIGHT, from the Committee on Foreign Relations, on April 22, 1960, reported favorably, with an amendment, the bill (S. 3058) to amend further the Mutual Security Act of 1954, as amended, and for other purposes, and submitted a report (No. 1286) thereon.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILLS AND JOINT RESOLUTION

Messages in writing from the President of the United States were communicated to the Senate by Mr. Ratchford, one of his secretaries, and he announced that the President had approved and signed the following acts and joint resolution:

On April 20, 1960:

S.J. Res. 178. Joint resolution relating to the payment of salaries of employees of the Senate.

On April 22, 1960:

S. 594. An act for the relief of Lionie Tarpinian; and

S. 1241. An act for the relief of Sirvart Kasabian.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The VICE PRESIDENT laid before the Senate messages from the President of the United States submitting sundry nominations, and withdrawing the nominations of Myrtle H. Davis, to be postmaster at Mexican Hat, Utah, Byron B. Borgman, to be postmaster at Conklin, Mich., Paul W. Haller, to be postmaster at Moorestown, N.J., and Ramon Alvarez, to be postmaster at Fajardo, P.R., which nominating messages were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

MESSAGE FROM THE HOUSE—ENROLLED BILL SIGNED

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the Speaker had affixed his signature to the enrolled bill (H.R. 8601) to enforce constitutional rights, and for other purposes, and it was signed by the Vice President.

CALL OF THE CALENDAR DISPENSED WITH

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the call of the calendar, under the rule, be dispensed with.

The VICE PRESIDENT. Without objection, it is so ordered.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. MANSFIELD. Mr. President, after the recess, there will be the usual morning hour; and I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

On request of Mr. MANSFIELD, and by unanimous consent, the Committee on Agriculture and Forestry was authorized to meet during the session of the Senate today.

On request of Mr. FULBRIGHT, and by unanimous consent, the Flood Control and Rivers and Harbors Subcommittee of the Committee on Public Works was authorized to meet during the session of the Senate today.

LEGISLATIVE PROGRAM

Mr. MANSFIELD. Mr. President, for the information of the Senate, let me state that the business today will be the consideration of the Treasury-Post Office appropriation bill. I wish to inform the membership that there will be a yea-and-nay vote at the conclusion of the debate on that measure.

Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The VICE PRESIDENT. Without objection, it is so ordered.

JOINT MEETING OF THE TWO HOUSES—ADDRESS BY HIS EXCELLENCY CHARLES DE GAULLE, PRESIDENT OF THE FRENCH REPUBLIC

Mr. MANSFIELD. Mr. President, in view of the fact that the Senate will meet in the Hall of the House of Representatives with the Members of the House, in a joint meeting, to hear General de Gaulle at 12:30 o'clock, I ask unanimous consent that the Senate stand in recess to attend this function, and resume its discussions subject to the call of the Chair.

There being no objection, at 12 o'clock and 14 minutes p.m., the Senate, preceded by its Secretary (Felton M. Johnston), the Sergeant at Arms (Joseph C. Duke), the Vice President, and the President pro tempore, proceeded to the Hall of the House of Representatives for the purpose of attending the joint meeting to hear the address to be delivered by His Excellency, Charles de Gaulle, President of the French Republic.

(For the address delivered by the President of the French Republic, see House proceedings of today.)

At 1 o'clock and 4 minutes p.m., the Senate reassembled, and was called to order by the President pro tempore.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. ROBERTSON, from the Committee on Banking and Currency, without amendment:

H.R. 10550. An act to extend the Export Control Act of 1949 for 2 additional years (Rept. No. 1287).

By Mr. JORDAN, from the Committee on Post Office and Civil Service, with an amendment:

S. 2575. A bill to provide a health benefits program for certain retired employees of the Government (Rept. No. 1288).

By Mr. CLARK, from the Committee on Post Office and Civil Service, with amendments:

H.R. 8241. An act to amend certain provisions of the Civil Service Retirement Act relating to the reemployment of former Members of Congress (Rept. No. 1289).

By Mr. CHAVEZ, from the Committee on Public Works, without amendment:

S.J. Res. 166. Joint resolution authorizing the Architect of the Capitol to permit certain temporary and permanent construction work, on the Capitol Grounds in connection with the erection of a building on privately owned property adjacent thereto (Rept. No. 1290); and

H.R. 10045. An act to amend the act entitled "An act to provide better facilities for the enforcement of the customs and immigration laws," to increase the amounts authorized to be expended (Rept. No. 1291).

By Mr. BIBLE, from the Committee on the District of Columbia, without amendment:

H.R. 11415. An act to provide for the designation of a portion of the District of Columbia as the "Plaza of the Americas" (Rept. No. 1292).

REPORT OF JOINT COMMITTEE ON REDUCTION OF NONESSENTIAL FEDERAL EXPENDITURES—FEDERAL STOCKPILE INVENTORIES

Mr. BYRD of Virginia. Mr. President, as chairman of the Joint Committee on Reduction of Nonessential Federal Expenditures, I submit a report on Federal stockpile inventories as of February 1960, and ask unanimous consent to have it printed in the RECORD, together with a statement by me.

There being no objection, the report and statement were ordered to be printed in the RECORD, as follows:

FEDERAL STOCKPILE INVENTORIES, FEBRUARY 1960

INTRODUCTION

This is the third in a series of monthly reports on Federal stockpile inventories under the Department of Agriculture, General Services Administration, and the Office of Civil and Defense Mobilization. It is for the month of February 1960.

The report is compiled from official data on quantities and cost value of commodities in these stockpiles submitted to the Joint Committee on Reduction of Nonessential Federal Expenditures by the agencies involved.

The three agencies reported that as of February 1, 1960, the cost value of materials in their stockpile inventories totaled $15,821,246,000 and as of February 29, 1960, they totaled $15,638,231,000, a net decrease of $183,015,000 reflecting acquisitions, disposals, adjustments, etc., during the month.

Different units of measure make it impossible to summarize the quantities of commodities and materials which are shown in tables 1, 2, and 3, but the cost value figures are summarized by agency and program as follows:

Summary of cost value of stockpile inventories

[In thousands]

Agency and program	Beginning of month, Feb. 1, 1960	End of month, Feb. 29, 1960	Net change, reflecting acquisitions, disposals, adjustments, etc.
Department of Agriculture:			
Price support program:			
Agricultural commodities	$7,176,549	$6,980,146	−$196,403
Exchange commodities—strategic and critical materials	118,398	79,544	−38,854
Total, price support program	7,294,947	7,059,690	−235,257
Defense Production Act program	3	3	
Total, Department of Agriculture	7,294,950	7,059,693	−235,257
General Services Administration: Strategic and critical materials:			
National stockpile	6,201,314	6,193,619	−7,695
Federal Facilities Corporation, tin inventory	9,519	9,519	
Defense Production Act program	1,447,866	1,449,587	+1,721
Supplemental stockpile	696,306	693,767	−2,539
Supplemental stockpile inventory in transit		60,196	+60,196
Total, General Services Administration	8,355,005	8,406,688	+51,683
Office of Civil and Defense Mobilization: Civil defense stockpile	171,291	171,850	+559
Grand total	15,821,246	15,638,231	−183,015

Detailed tables in this report show opening inventories at the beginning of the month in quantity and cost, transactions during the month, and the closing inventories at the end of the month. Each inventory is shown by commodity except the national stockpile, for which commodity detailed is classified.

Pertinent information and explanation are set forth in notes accompanying the respective tables. Statutory authority and program descriptions are shown in the appendix to the report.

The inventories covered by the report are tabulated in detail as follows:

Table 1: Agricultural price support program inventories under Commodity Credit Corporation, Department of Agriculture, February 1960: Including agricultural commodities, strategic and critical materials acquired by exchange or barter, and special acquisitions under the Defense Production Act.

Table 2: Strategic and critical materials inventories under General Services Administration, February 1960: Including materials in the national stockpile, Federal Facilities Corporation tin inventory, Defense Production Act purchase program, the supplemental stockpile of materials acquired by exchange or barter of agricultural commodities, etc., and inventory in transit from Commodity Credit Corporation to the supplemental stockpile.

Table 3: Civil defense stockpile inventory under the Office of Civil and Defense Mobilization, February 1960.

TABLE 1.—*Agricultural price support program inventories under Commodity Credit Corporation, Department of Agriculture, February 1960: Including agricultural commodities, strategic and critical materials acquired by exchange or barter, and special acquisitions under the Defense Production Act*

EXPLANATORY NOTES

The Department of Agriculture defines the content of the columns as follows:

Program and commodity: Lists each commodity in the form in which it exists when extended support, and in some instances in a form to which the supported commodity is processed or converted to increase marketability. The commodities are grouped under the appropriate statutory subclassifications as "Basic," "Designated nonbasic," "Other nonbasic," and "Exchange."

Unit of measure: The applicable unit used in the accounting records and reports of the Corporation.

Inventory, beginning of month: Quantity: In number of units. Cost value: All inventories are recorded in the accounts at cost. "Cost value" is comprised of the initial cost of the commodity plus storage, handling, transportation, and accessorial expenses paid or accrued up to the date of reporting. The initial cost of inventories acquired by delivery of collateral securing loans is the unpaid balance of the notes plus storage and other charges advanced, any equities due or paid to producers on warehouse-stored collateral (by Public Law 85-835, and beginning with 1959 crop production, the Corporation will not make equity payments to borrowers on unredeemed price-support loan collateral, title to which it acquires on or after maturity of the loans), and the net value of any quantity or quality differences determined upon delivery of farm-stored collateral. Amounts paid to lending agencies participating in the loan program for crop years prior to 1958 were recorded as a part of inventory cost.

Adjustments: Warehouse settlements, exchanges, and transfers (net): Warehouse settlements include the net differences in quantity and/or value represented by the net of overdeliveries, premiums, underdeliveries, and discounts arising from movement of commodities. Exchanges represent the net change in quantity and/or value for inventories exchanged or in process of exchange. On completed exchanges, the change in value represents differentials due to location, quality, and quantity Unprocessed commodities removed from inventory for conversion or processing (on a contractual or fee basis and excluding conditional sales) are included as a reduction of inventory. Processed commodities acquired as a result of this conversion or processing are included as an addition to inventory.

Acquisitions: As reflected in accounting records and reports; and includes commodities acquired by delivery of collateral securing loans, commodities purchased under terms of purchase agreements, commodities purchased directly from producers or processores as a part of the support operation but not under purchase agreements; and processed commodities acquired by purchases which offset conditional sales of unprocessed commodities from inventory. The cost value of acquisitions is described under the explanation of the cost value of inventory.

Carrying charges added to investment after acquisition: Total costs of storage, handling, transportation, and other accessorial expenses incurred during the month.

Disposals: As reflected in accounting records and reports. Inventory transactions generally are recorded on the basis of transfer of title. Disposition commitments are not reflected in the accounts. Cost value: Represents acquisition value plus applicable amount of carrying charges. The amount of cost allocated to commodities removed from inventory is determined with the view of retaining in the inventory accounts the cost of commodities remaining on hand. The cost allocated to commodities removed from price support inventory is generally computed on the basis of average unit cost of the commodity reflected in the inventory accounts for the applicable crop year and general storage location. In the case of commodities generally stored commingled (e.g., bulk grains and bulk oils) the crop year is determined on the first-in, first-out basis. In the case of commodities stored in identified lots, the crop year is determined by lot identification.

Inventory, end of month: Closing inventory after transactions for the month have been applied to the inventory at the beginning of the month.

TABLE 2.—*Strategic and critical materials inventories under General Services Administration, February 1960: Including materials in the national stockpile, Federal Facilities Corporation tin inventory, Defense Production Act purchase program, the supplemental stockpile of materials acquired by exchange or barter of agricultural commodities, etc., and inventory in transit from Commodity Credit Corporation to the supplemental stockpile*

EXPLANATORY NOTES

The General Services Administration defines the content of the columns as follows:
Program and commodity: Identifies the program and the minerals, metals, fibers, and oils acquired under the program.
Unit of measure: The standard weight or measure of minerals, metals, fibers, and oils determined to be the stockpile unit of measure.
Inventory, beginning of month: Opening inventory represents quantity and cost of material in storage at the beginning of the accounting period.
Adjustments: Represents increases (+) or decreases (−) of material in inventory other than increases from acquisitions or decreases from disposals. Decreases occur from theft, loss incurred while in transit to stockpile location, repacking from one type of container to another, beneficiation of a low-grade material to a higher grade, and the removal of material for sampling and testing purposes. Increases occur from return of material previously removed for sampling and testing purposes and from quantities received at storage locations in excess of quantities billed by the contractor. A new chemical analysis of the materials may cause an increase or decrease where the weights are based on chemical and moisture content. Increases or decreases are also made from findings of audits of inventory and accounting records.
Acquisitions: For the National Stockpile and Defense Production Act acquisitions include open market purchases at contract prices; intradepartmental transfers at market or appraised value at time of transfer, transportation to first permanent storage location; and, beneficiating and processing cost in upgrading materials. For the supplemental stockpile acquisitions include the market value or CCC's acquisition cost whichever is the lower at time of transfer from CCC.
Disposals: Cost of disposals are calculated at the average unit price of inventory at time of removal from inventory. For the national stockpile inventory disposals consist of sale of materials that by their nature would deteriorate if held in storage for lengths of time; and, sale of materials that have been determined to be obsolete or excess to the needs of Government. For the Defense Production Act inventory disposals consist of sale of materials that have been determined to be obsolete or excess to the needs of Government.
Inventory, end of month: Closing inventory represents quantity and cost of material in storage at the end of the accounting period.

TABLE 3.—*Civil defense stockpile inventory under the Office of Civil and Defense Mobilization, February 1960*

EXPLANATORY NOTES

The Office of Civil and Defense Mobilization defines the content of the columns as follows:

Program and commodity: Composite groups of many different items.

Unit of measure: Shown only for engineering supply units and hospital functional units; not feasible by other composite groups.

Inventory-quantity: Shown only for two items, namely, engineering supply units and civil defense emergency hospital functional units. It is not feasible to furnish quantity figures on the other commodity groups because they are composite groups of many different items. To report quantities, it would be necessary to list several hundred different items.

Inventory-cost value: The dollar value figures on commodities in the civil defense stockpile inventory reflect essentially the actual costs of the commodities. No transportation, delivery, or storage costs are included. However, these statements should be qualified by the fact that the total inventory includes Government excess property items valued at over $2 million (a little more than 1 percent of the total), which were acquired by Office of Civil and Defense Mobilization at little or no cost. These materials are received into the inventory on one of three value bases: Items similar or identical to items purchased in the open market for stockpile purposes are accepted at the average unit cost for similar items purchased; the remaining items are accepted at a current fair value, if such has been determined, or at the original acquisition cost to the Federal Government, if a current fair value has not been determined.

Adjustments: Represents inventory pricing adjustments resulting from recalculation of fixed average unit prices, transfers of commodities from one composite group to another, etc., during the month.

Acquisitions: Materials placed in inventory during the month, including return to inventory of items previously released from inventory for reworking, etc. Value stated in terms of actual costs of the commodities.

Disposals: Materials removed from inventory during the month, including items released from inventory for reworking, etc. Value stated in terms of average unit costs.

Inventory at end of month: Closing inventory after transactions for the month have been applied to the inventory at the beginning of the month.

[In thousands]

APPENDIX

U.S. Department of Agriculture—Commodity Credit Corporation

The Price Support Program

Price-support operations are carried out under the Corporation's charter powers (15 U.S.C. 714), in conformity with the Agricultural Act of 1949 (7 U.S.C. 1421), the Agricultural Act of 1954 (7 U.S.C. 1741), which includes the National Wool Act of 1954, the Agricultural Act of 1956 (7 U.S.C. 1442), the Agricultural Act of 1958 and with respect to certain types of tobacco, in conformity with the act of July 28, 1945, as amended (7 U.S.C. 1312). Under the Agricultural Act of 1949, price support is mandatory for the basic commodities—corn, cotton, wheat, rice, peanuts, and tobacco—and specific nonbasic commodities; namely, tung nuts, honey, milk, butterfat, and the products of milk and butterfat. Under the Agricultural Act of 1958, as producers of corn voted in favor of the new price-support program for corn authorized by that act, price support is mandatory for barley, oats, rye, and grain sorghums. Price support for wool and mohair is mandatory under the National Wool Act of 1954, through the marketing year ending March 31, 1962. Price support for other nonbasic agricultural commodities is discretionary except that whenever the price of either cottonseed or soybeans is supported, the price of the other must be supported at such level as the Secretary determines will cause them to compete on equal terms on the market. This program may also include operations to remove and dispose of or aid in the removal or disposition of surplus agricultural commodities for the purpose of stabilizing prices at levels not in excess of permissible price-support levels.

Price support is made available through loans, purchase agreements, purchases, and other operations, and, in the case of wool and mohair, through incentive payments based on marketings. The producer's commodities serve as collateral for price-support loans. With limited exceptions, price-support loans are nonrecourse and the Corporation looks only to the pledged or mortgaged collateral for satisfaction of the loan. Purchase agreements generally are available during the same period that loans are available. By signing a purchase agreement, a producer receives an option to sell to the Corporation any quantity of the commodity which he may elect within the maximum specified in the agreement.

The major effect on budgetary expenditures is represented by the disbursements for price-support loans. The largest part of the commodity acquisitions under the program result from the forfeiting of commodities pledged as loan collateral for which the expenditures occurred at the time of making the loan, rather than at the time of acquiring the commodities.

Dispositions of commodities acquired by the Corporation in its price-support operations are made in compliance with sections 202, 407, and 416 of the Agricultural Act of 1949, and other applicable legislation, particularly the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1691), title I of the Agricultural Act of 1954, title II of the Agricultural Act of 1956, the Agricultural Act of 1958, the act of August 19, 1958, in the case of cornmeal and wheat flour and the act of September 21, 1959, with regard to sales of livestock feed in emergency areas.

Defense Production Act Program

The programs authorized by and certified to the Secretary of Agriculture under the provisions of the Defense Production Act are administered and operated through the Commodity Credit Corporation.

All present and past programs involve the acquisition and disposition of agricultural commodities or products thereof. Commodities acquired are entered in and maintained through the inventory accounts of the Corporation. As the commodities are disposed of, the realized gains or losses are recorded by CCC as a receivable against the Secretary of Agriculture. Administrative expenses of the Corporation are recorded in this receivable; and interest is computed monthly on the total amount of CCC's investment at the same rate per annum as that paid by the Corporation on its borrowings from the Treasury.

The net total of realized gains and losses, CCC's administrative expenses, and CCC's interest expense represented a payable item under the revolving fund.

The recording of realized gains or losses represents a cash basis, inasmuch as the amounts recorded represent the net results of actual dispositions. Values of inventories on hand at reporting date are not included in these fund accounts and therefore allowances for losses are not included. Administrative and interest expenses are accounted for on an accrual basis. All values are at cost.

When a program is completed, the Secretary of Agriculture secures funds by issuing interest-bearing notes to the Treasury and reimburses CCC. Interest on the notes issued by the Secretary is accrued monthly, compounded semiannually, as an accrued liability of the revolving fund.

General Services Administration—Strategic and critical materials stockpiling and related programs

1. National Stockpile

The Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98–98h) provides for the establishment and maintenance of a national stockpile of strategic and critical materials. GSA is responsible for making purchases of strategic and critical materials and providing for their storage, security, and maintenance. These functions are performed in accordance with directives issued by the Director of the Office of Civil and Defense Mobilization. The act also provides for the transfer from other Government agencies of strategic and critical materials which are excess to the needs of such other agencies and are required to meet the stockpile objectives established by OSDM. In addition, GSA is responsible for disposing of those strategic and critical materials which OCDM determines to be no longer needed for stockpile purposes.

General policies for strategic and critical materials stockpiling are contained in DMO V–7, issued by the Director of the Office of Civil and Defense Mobilization and published in the Federal Register of December 19, 1959 (24 F.R. 10309). Portions of this order relate also to Defense Production Act inventories.

2. Tin Received From Federal Facilities Corporation

Public Law 608, 84th Congress (50 U.S.C. 98 note), provided, among other things, for the continuation of operation of the Government-owned tin smelter at Texas City, Tex., from June 30, 1956, until January 31, 1957. It provided also that all tin acquired by the Federal Facilities Corporation by reason of such extension should be transferred to GSA.

3. Defense Production Act

Under section 303 of the Defense Production Act of 1950 (50 U.S.C. App. 2093) and Executive Order 10480, as amended, GSA is authorized to make purchases of or commitments to purchase metals, minerals, and other materials, for Government use or resale, in order to expand productive capacity and supply, and also to store the materials acquired as a result of such purchases or commitments. Such functions are carried out in accordance with programs certified by the Director of the Office of Civil and Defense Mobilization.

4. Supplemental Stockpile

As a result of a delegation of authority from OCDM (32A C.F.R., ch. I, DMO V–4) GSA is responsible for the maintenance and storage of materials placed in the supplemental stockpile. Section 206 of the Agricultural Act of 1956 (7 U.S.C. 1856) provides that strategic and other materials acquired by the Commodity Credit Corporation as a result of barter or exchange of agricultural products, unless acquired for the national stockpile or for other purposes, shall be transferred to the supplemental stockpile established by section 104(b) of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1704(b)). In addition to the materials which have been or may be so acquired, the materials obtained under the programs established pursuant to the Domestic Tungsten, Asbestos, Fluorspar, and Columbium-Tantalum Production and Purchase Act of 1956 (50 U.S.C. App. 2191–2195), which terminated December 31, 1958, have been transferred to the supplemental stockpile, as authorized by the provisions of said Production and Purchase Act.

Office of Civil and Defense Mobilization—Civil defense stockpile program

This stockpiling program, under authorization of Public Law 920, 81st Congress, section 201(h), is designed to provide some of the most essential medical and engineering supplies for emergency use in event of enemy attack. Materials and equipment not normally available or not present in the quantities needed to cope with such conditions are stockpiled at strategic locations. The Office of Civil and Defense Mobilization's stockpile procured to date including medical supplies, emergency engineering equipment, and radiological instruments is stored and maintained in a nationwide warehouse system consisting of medical and general storage facilities.

EXPLANATORY NOTES RELATING TO THE REPORTING OF STRATEGIC AND CRITICAL MATERIALS ACQUIRED BY EXCHANGE OR BARTER OF AGRICULTURAL COMMODITIES

Surplus agricultural commodities in the Commodity Credit Corporation's price-support inventory may be exchanged or bartered for strategic and critical materials under the Agricultural Trade Development and Assistance Act of 1954 (Public Law 480) and other basic legislation including the CCC Charter Act, as amended, Agricultural Act of 1954, and the Agricultural Act of 1956.

Except for small amounts which may go to the national stockpile, the strategic and critical materials acquired by Commodity Credit Corporation under the barter program are transferred to the supplemental stockpile.

Direct appropriations reimburse Commodity Credit Corporation for materials so transferred from the price-support inventory.

The General Services Administration is charged with the custody and management of strategic and critical materials, and becomes the responsible reporting agency when title to these bartered materials is placed in the supplemental stockpile.

For purposes of this report, strategic and critical materials acquired by barter may appear in three inventories, reflecting the stages of the transfer of title.

1. The Department of Agriculture reports those to which the Commodity Credit Corporation still has title, prior to transfer to the supplemental stockpile.

2. The General Services Administration reports those which have been transferred from the Commodity Credit Corporation exchange inventory in two parts:

A. Materials for which title is "in transit" from Commodity Credit Corporation to the supplemental stockpile.

B. Materials for which title has passed to the supplemental stockpile.

STATEMENT BY SENATOR BYRD OF VIRGINIA

The cost value of materials in nine Federal stockpile inventories as reported by the Department of Agriculture, General Services Administration, and the Office of Civil and Defense Mobilization, on February 29, 1960, totaled $15,638,231,000. February activity in these stockpiles resulted in a net reduction of $183,015,000.

The net change in these stockpile inventories reflects acquisitions, disposals, and adjustments. The February activity and the end-of-the-month totals are summarized as follows:

[In thousands]

Inventories by agency and program	Cost value, February 1960	
	Net change during month	Total, end of month
Department of Agriculture: Price support program:		
1. Agricultural commodities	−$196,403	$6,980,146
2. Exchange, strategic and critical materials	−38,854	79,544
Total, price support program	−235,257	7,059,690
3. Defense Production Act program		3

[In thousands]

Inventories by agency and program	Cost value, February 1960	
	Net change during month	Total, end of month
General Services Administration:		
Strategic and critical materials:		
4. National stockpile	−$7,695	$6,193,619
5. Federal Facilities Corporation, tin inventory		9,519
6. Defense Production Act program	+1,721	1,449,587
7. Supplemental stockpile	−2,539	693,767
8. Supplemental stockpile inventory in transit	+60,196	60,196
Total, General Services Administration	+51,683	8,406,688
Office of Civil and Defense Mobilization:		
9. Civil defense stockpile	+559	171,850
Grand total	−183,015	15,638,231

These figures are from reports certified by the agencies involved as compiled by the Joint Committee on Reduction of Nonessential Federal Expenditures.

INCREASES AND DECREASES

Major net decreases in cost value during the month were reported as follows: $153 million in cotton; $39 million in wheat; and $8 million in the national stockpile.

These decreases were partially offset by major net increases including: $9 million in manganese and manganese ores; $6 million in aluminum and aluminum ores; and $5 million in grain sorghum.

AGRICULTURAL COMMODITIES

Of 23 agricultural commodities in Commodity Credit's $7.1 billion price support inventory on February 29, 1960, those leading in cost value include:

Wheat, with 1.1 billion bushels at a cost of $2.8 billion;

Corn, with 1.2 billion bushels at a cost of $2.2 billion; and

Cotton, with more than 5.8 million bales at a cost of $1 billion.

STRATEGIC AND CRITICAL MATERIALS

Strategic and critical materials are shown in six inventories totaling $8.5 billion, including the $6.2 billion national stockpile for which itemized detail is classified. Combined figures from the other five inventories show materials (in all grades and forms) leading in cost value as follows:

Aluminum, bauxite, etc., with 5.4 million tons at a cost of $442 million;

Tungsten, with 84 million pounds at a cost of $341 million; and

Manganese and manganese ores, with 4.3 million tons at a cost of $288 million.

CIVIL DEFENSE SUPPLIES AND EQUIPMENT

The civil defense stockpile is shown in seven composite groups totaling $172 million. Nearly 63 percent is in medical bulk stocks valued at $108 million.

EXECUTIVE REPORTS OF COMMITTEES

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. ROBERTSON, from the Committee on Banking and Currency:

Harold C. Patterson, of Virginia, to be a member of the Securities and Exchange Commission.

By Mr. SPARKMAN, from the Committee on Banking and Currency:

Bruce Savage, of Indiana, to be Public Housing Commissioner.

By Mr. JOHNSTON of South Carolina, from the Committee on Post Office and Civil Service:

One hundred and seven postmaster nominations.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. BIBLE:

S. 3406. A bill for the relief of Edward W. Scott III; to the Committee on the Judiciary.

By Mr. CASE of South Dakota (for himself and Mr. MUNDT):

S. 3407. A bill amending the authorization for the construction, operation, and maintenance of the Pine Ridge irrigation unit, White division, Missouri River Basin project; to the Committee on Interior and Insular Affairs.

By Mr. HILL:

S. 3408. A bill for the relief of Mrs. Maria Giovanna Hopkins; to the Committee on the Judiciary.

By Mr. DIRKSEN:

S. 3409. A bill to amend the National Cultural Center Act, as amended, to enlarge the site within which the National Cultural Center may be built; to the Committee on Public Works.

(See the remarks of Mr. DIRKSEN when he introduced the above bill, which appear under a separate heading.)

By Mr. GREEN (for himself, Mr. PASTORE, Mr. BUSH, and Mr. DODD):

S. 3410. A bill to repeal certain legislation relating to the purchase of silver, and for other purposes; to the Committee on Banking and Currency.

(See the remarks of Mr. GREEN when he introduced the above bill, which appear under a separate heading.)

By Mr. ERVIN (for himself, Mr. BYRD of Virginia, Mr. MCCLELLAN, and Mr. JOHNSTON of South Carolina):

S. 3411. A bill to make voluntary admissions and confessions admissible in criminal proceedings and prosecutions in the courts of the United States and the District of Columbia; to the Committee on the Judiciary.

By Mr. KERR (for himself and Mr. MONRONEY):

S. 3412. A bill to amend title 23 of the United States Code, relating to highways, with respect to certain projects constructed on the Federal-aid system by Federal agencies; to the Committee on Public Works.

By Mr. KEATING:

S. 3413. A bill for the relief of Daisy Aizer; and

S. 3414. A bill for the relief of Evangelina Callas; to the Committee on the Judiciary.

By Mr. BIBLE (by request):

S. 3415. A bill to exempt from taxation certain property of the American Association of University Women, Educational Foundation, Inc., in the District of Columbia;

S. 3416. A bill to provide for the restoration to the United States of amounts expended in the District of Columbia in carrying out the Temporary Unemployment Compensation Act of 1958;

S. 3417. A bill to amend the Policemen and Firemen's Retirement and Disability Act;

S. 3418. A bill to amend the Motor Vehicle Safety Responsibility Act of the District of Columbia with respect to the service of process on nonresidents; and

S. 3419. A bill to supplement the Motor Vehicle Safety Responsibility Act of the District of Columbia, to provide for the indemnification of persons sustaining injuries as a result of the operation of motor vehicles by uninsured motorists, by persons operating vehicle without permission of the owners thereof, by hit-and-run drivers, and for other purposes; to the Committee on the District of Columbia.

By Mr. JOHNSTON of South Carolina:

S. 3420. A bill to provide further for permissible writing and printing on third- and fourth-class matter, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. JOHNSTON of South Carolina (by request):

S. 3421. A bill to amend the Federal Employees' Group Life Insurance Act; to the Committee on Post Office and Civil Service.

By Mr. KEFAUVER:

S. 3422. A bill for the relief of Alexis N. Romanoff; and

S. 3423. A bill for the relief of Cathryn A. Glesener; to the Committee on the Judiciary.

By Mr. ALLOTT (for himself and Mr. CARROLL):

S. 3424. A bill to provide for the application and disposition of net revenues from the power development on the Grand Valley Federal reclamation project, Colorado; to the Committee on Interior and Insular Affairs.

By Mr. ELLENDER (by request):

S. 3425. A bill to authorize user charges for certain services performed by the Department of Agriculture and for other purposes; to the Committee on Agriculture and Forestry.

RESOLUTIONS

EFFECT OF RECENT MEETING OF AMERICAN AND CANADIAN PARLIAMENTARY GROUPS

Mr. AIKEN (for himself, Mr. DIRKSEN, Mr. MANSFIELD, Mr. CHURCH, and Mr. CASE of South Dakota) submitted a resolution (S. Res. 308) concerning the effect of the recent meeting of the American and Canadian parliamentary groups in Washington, D.C., which was considered and agreed to.

(See the above resolution printed in full when submitted by Mr. AIKEN, which appears under a separate heading.)

APPOINTMENT OF OFFICIAL REPORTERS OF DEBATES

Mr. HAYDEN submitted a resolution (S. Res. 309) appointing John D. Rhodes and Gregor Macpherson Official Reporters of the Senate, which was considered and agreed to.

(See the above resolution printed in full when submitted by Mr. HAYDEN, which appears under a separate heading.)

AMENDMENT OF NATIONAL CULTURAL CENTER ACT

Mr. DIRKSEN. Mr. President, in September 1958, Congress approved the National Cultural Center. Since that time, some difficulty has developed because the Center might require the relocation of a main highway and the acquisition of some additional land, by voluntary contributions. An amendatory act to that effect has been drafted; and I now introduce the bill, for appropriate reference, and ask that a memorandum of explanation be printed at this point in the body of the RECORD.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the memorandum will be printed in the RECORD.

The bill (S. 3409) to amend the National Cultural Center Act, as amended, to enlarge the site within which the National Cultural Center may be built, introduced by Mr. DIRKSEN, was received, read twice by its title, and referred to the Committee on Public Works.

The memorandum presented by Mr. DIRKSEN is as follows:

The National Cultural Center Act (approved in September 1958) specifies a narrow and somewhat awkwardly placed plot of land in the Nation's Capital on which the National Cultural Center is to be built.

Part of the land within this site description is already owned by the U.S. Government, and part of the land is held by private owners. In order to carry out the intent of the National Cultural Center Act—namely, that the Government provide the land on which the building would be built, and the building itself would be paid for by private contributions—the Board of Commissioners of the District of Columbia allocated $705,000 of Capper-Cramton Act appropriations for the purchase of the privately held land within the site described in the law.

The board of trustees and their architect-adviser tried to work out a design for facilities on this site but concluded that real justice could not be done in this way to the objectives of the National Cultural Center Act.

Accordingly, in conversations with Conrad L. Wirth, Director of the U.S. National Park Service, the idea arose for placing the National Cultural Center partly on land within the original site description and partly on U.S. Park Service land in order that a park and river setting could be achieved for the National Cultural Center.

Incidental to such a shift in the location of the building would be the relocation of Rock Creek-Potomac Parkway so that it is moved out of the way of the proposed building. This shift of the parkway necessitates the acquisition of certain small parcels of private land not already included within the original site description in the act.

At the time this site shift was considered in 1959, it was generally believed that the $705,000 of Capper-Cramton money would cover most of the cost of buying the privately held land, and that any small balance would be covered by funds collected from fund raising. On this basis then, the board of trustees approved an architectural concept which, in accordance with the law, was submitted, for approval, to the Commission of Fine Arts, with a full explanation of the change in plans. The Commission of Fine Arts enthusiastically endorsed the building plan, as did the National Capital Planning Commission and the District of Columbia Board of Commissioners.

PROBLEM

In the past year, active work has been proceeding in redeveloping the Foggy Bottom area of the Nation's Capital. This factor, as well as announcement of plans for a National Cultural Center in this area, have caused land values to nearly triple. Informal appraisals by the appraisers employed by the National Capital Planning Commission, indicate that the $705,000 of Capper-Cramton money is no longer adequate to complete the purchase of the privately held land.

The trustees are beginning to experience fund-raising difficulties because of inability to show that they have a clear title to the land on which the center is to be built, and no funds are available with which to buy the land. Part of the difficulty is that prospective donors do not want to give to a project which does not have a clear title to the land, and they had understood that the Government was providing the land.

In the second place, the National Cultural Center Act limits the life of the board of trustees to 5 years. In the event that the National Cultural Center project fails, all lands acquired for this purpose revert to the U.S. Government. Hence, prospective donors are either refusing to give in the face of this uncertain situation, or they are exercising their rights under the section of the law which provides that they may designate an alternative beneficiary for their donations in case the National Cultural Center project fails. As a consequence of these reservations, no funds are available with which to buy land.

The board of trustees is not even in a position to go to a bank and obtain a mortgage on the U.S.-owned land earmarked for the center, because of the 5-year death sentence in the act. In other words, no bank will give a mortgage on a piece of land which reverts to the U.S. Government in 1963.

In the face of these problems, the board of trustees authorized its officers on March 31, 1960, to explore with the appropriate Members and committees of Congress the possibility of:

1. Amending the National Cultural Center Act in order to enlarge the center site so that the structure can be built in accordance with the approved plan as shown in the National Capital Planning Commission file No. 1–8–618.

2. Obtaining from the Congress an appropriation of such funds as would be required to secure all of the private lands needed to build the center in accordance with the approved concept.

In seeking this appropriation, the board of trustees notes that the expenditure of the additional funds may be considered a prudent investment for the U.S. Government for the following reasons:

1. Purchase of the privately held land as soon as possible will halt the rising value thereof at 1960 prices.

2. Even should the National Cultural Center project fail by 1963, the land which will revert to the U.S. Government can be used for another governmental purpose, and the price of the land would have been held to the 1960 price.

3. Should the United States desire to sell the land for a nongovernmental purpose in 1963, the Government could profit from the general rise on land values in the Foggy Bottom area and make the sale at a higher price than the 1960 purchase price.

REPEAL OF CERTAIN LAWS RELATING TO PURCHASE OF SILVER

Mr. GREEN. Mr. President, on behalf of myself, my colleague, the junior Senator from Rhode Island [Mr. PASTORE], and the Senators from Connecticut [Mr. BUSH and Mr. DODD] I introduce, for appropriate reference, a bill to repeal the silver purchase laws.

In 1942, I introduced in the Senate the so-called Green silver bill which, because of the strenuous opposition of the so-called silver bloc, failed of passage. In 1943, however, I again introduced the bill and, after a long and hard fight, it was enacted into law. It has been said many times that this measure saved the silver and jewelry industries of New England.

The Silver Purchase Act was passed in 1934 and, it will be recalled that after the passage of this act, the price of American silver continually rose. In the opinion of most unprejudiced economists, the silver-buying policy of the Government has proved to be the most atrocious example of special-privilege furthered by law to be found in American history. This, together with the other silver laws which have been enacted by the Congress have fastened upon the United States Treasury the payment of huge subsidies to the American producers of silver and today the Government vaults at West Point are bulging with thousands of tons of silver for which the U.S. Government has paid more than the market price.

This bill which I am introducing today would end these unsound monetary practices. It would end the support prices to producers of silver and permit a free and open market for silver. It would repeal a requirement in law that the Treasury must value monetized silver at $1.29 an ounce although its only real value is the market price—currently 91⅜ cents an ounce.

It has been said that the silver paper dollar is the only money 100 percent backed by the metal it represents. This is meaningless. The value of the backing is what matters and this depends on the market price for silver. An unguaranteed value of 70 cents for a paper dollar is not 100 percent backing.

Although the silver purchase laws were originally passed under the guise of being necessary to our monetary system, this myth has long since been exploded. The production of silver in this country is largely a byproduct in the production of copper, lead, and zinc. No one can say today that the copper producers need a higher price for silver in order to operate profitably. In fact, when hearings were held in the last session of Congress on the state of the mining industry, the copper producers were conspicuous by their absence.

Recently, a president of a silver mining company pointed out that the policy expressed in the Silver Purchase Act of 1934 is not being fulfilled. There are very good reasons for this fact. In the first place, this policy would require the purchase of 1.6 billion ounces of silver from foreign sources. In the second place, there is not that much silver available at any price. Finally, the Secretary of the Treasury is to carry out this policy only when he deems it reasonable and most advantageous to the public interest. This silver would be paid for in gold and would result in a drain on our gold reserves of probably $2 million. It would disrupt the subsidiary coinage system of every nation in the world which uses silver. It is pertinent to point out that any increase in the price of silver brought about by governmental action would result in a profit going largely to foreign producers.

There has been a great deal of talk in the last year about consumption of silver far surpassing production. The figures which are given to support this assumption are tailored to suit the particular case. If the producers of silver believe their own contentions, they should join forces with those behind this bill and quickly repeal the silver purchase laws.

In this session of the Congress I trust that the Senate Committee on Banking and Currency, to which this bill should be referred, will hold hearings on the measure so that the views of all concerned—especially those of the administration—can be publicly heard, and so that after such hearings, the bill will be reported to the Senate for further action.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 3410) to repeal certain legislation relating to the purchase of silver, and for other purposes, introduced by Mr. GREEN (for himself, Mr. PASTORE, Mr. BUSH, and Mr. DODD), was received, read twice by its title, and referred to the Committee on Banking and Currency.

ADMISSIONS AND CONFESSIONS IN CRIMINAL PROCEEDINGS

Mr. ERVIN. Mr. President, until the decision of the Supreme Court of the United States in the Mallory case and its predecessor, the McNabb case, it was universally recognized, both in the Federal courts and in the State courts of the Nation, that the best evidence of guilt was the voluntary confession of the accused.

In the *Mallory* case, and its predecessor case, the McNabb case, however, the Supreme Court of the United States abolished this wise and salutary rule of evidence, so far as the Federal courts were concerned, by subverting a statute relating to the duty of an arresting officer into a rule of evidence in violation, I maintain, of the intent of Congress.

As a result of the decision, many persons of undoubted guilt have been set free. One of the most notorious of them was Andrew Mallory.

Some of us believe that enough has been done for those who murder and rape and rob, and that it is time to do something for those who do not wish to be murdered or raped or robbed.

For this reason, on behalf of the senior Senator from Virginia [Mr. BYRD], the senior Senator from Arkansas [Mr. MCCLELLAN], the senior Senator from South Carolina [Mr. JOHNSTON] and myself, I introduce a bill to make voluntary admissions and confessions admissible in criminal proceedings and prosecutions in the courts of the United States and the District of Columbia.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point, as a part of my remarks, an editorial on this subject which appeared in the Washington Evening Star of April 24, 1960.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Washington Evening Star, Apr. 24, 1960]

NEW MALLORY VICTIM

A Supreme Court decision 3 years ago resulted in the release in Washington of Andrew Mallory, a convicted and unquestionably guilty rapist. Now Mallory is behind bars again, having been indicted in Philadelphia on another rape charge.

The Supreme Court's decision was based on a technicality—that too much time (7½ hours) had elapsed between Mallory's arrest and his arraignment before a judge. It was not based on any assumption that he was not guilty, or on any finding that his confession had been extorted by third-degree methods. It was based on a technicality pure and simple.

The evil of this, as we said at the time, is that it ignored the right of the public to be protected against such characters as Andrew Mallory. This public right was subordinated to a technical point of law. And now, 3 years later, another woman has been subjected to the same ordeal. This time, however, if the evidence supports the indictment, Mallory may be taken out of circulation. For the so-called Mallory rule laid down by the Supreme Court will not be applicable to his trial in Philadelphia.

If so, there will be a long-overdue happy ending to the Mallory case. But the Mallory rule will still be in force in Washington, and the need for congressional modification of it will still exist. Perhaps this latest outrage will help to that end.

Mr. ERVIN. I send forward the bill in question and ask that it be printed in the RECORD at this point and that it be appropriately referred.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 3411) to make voluntary admissions and confessions admissible in criminal proceedings and prosecutions in the courts of the United States and the District of Columbia, introduced by Mr. ERVIN (for himself and other Senators), was received, read twice by its title, referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, Notwithstanding the provisions of rule 5 of the Rules of Criminal Procedure for the United States District Courts or any other rule or statute of like purport, a voluntary admission or a voluntary confession of an accused shall be admissible against him in any criminal proceeding or prosecution in the Courts of the United States or in the District of Columbia, and the finding of the trial court in respect to the voluntariness of the admission or confession shall be binding upon any reviewing court in the event it is supported by substantial evidence.

AMENDMENT OF MUTUAL SECURITY ACT OF 1954—AMENDMENTS

Mr. WILLIAMS of Delaware. Mr. President, I submit an amendment to the mutual security bill, S. 3058, which I ask to have printed and lie on the table.

The purpose of the amendment is to amend section 502(b) of the Mutual Security Act for the purpose of requiring an accounting of expenditures of counterpart funds on the part of Members of Congress.

The PRESIDENT pro tempore. The amendment will be received and printed, and will lie on the table.

Mr. AIKEN (for himself and Mr. WILLIAMS of Delaware) submitted amendments, intended to be proposed by them, jointly, to Senate bill 3058, supra, which were ordered to lie on the table and to be printed.

AMENDMENT OF SUGAR ACT OF 1948, AS AMENDED

Mr. CHURCH. Mr. President, I submit, with the request that it be printed, an amendment intended to be proposed by me to the bill—S. 3361—to amend and extend the Sugar Act of 1948, as amended.

The amendment I submit today is identical to the one I introduced to an earlier sugar act extension bill, S. 3210. On March 30, I made a statement of my reasons for so doing.

I ask unanimous consent that a portion of my remarks on March 30, 1960, be reprinted at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

An efficient domestic and mainland sugar industry must be maintained if a reasonable degree of national self-sufficiency is to be provided. Our sugar program assures the American consumers an adequate supply of sugar at reasonable prices, maintains and protects the welfare of the domestic sugar industry, and promotes the export trade of the United States.

This program cannot be permitted to come to an end, and it must not be tampered with indiscriminately.

But, Mr. President, I believe that a principle long incorporated in the act could well be extended. This is the principle that new and small producers ought to receive special consideration.

After World War II, returning veterans and others who then established themselves on homesteads and other farms without beet acreage allotments, have sought to participate in this program. The act directs the Secretary of Agriculture to give a preference to this type of grower; but, as a practical matter, the amounts available have been too small to be useful.

Yet sugar is a most attractive cash crop, and without it the new farmers are at a great disadvantage in their communities.

Sugar beets return what they take from the soil. They promote soil equilibrium, when grown in rotation with hay, grains, and legumes. A ton per acre of their extensive root systems is left in the soil, to rebuild it.

The byproducts of beet sugar—tops, molasses, and pulp—provide a rich and necessary source of supplement feed for livestock. Proper feed of these byproducts will produce 300 pounds of meat for each acre of beets.

If the new farmers could be helped, without doing violence to the traditional beet planting patterns, it would be a good thing for Idaho and other beet areas.

I think this can be done. That is the purpose of an amendment which I intend to offer to S. 3210, and which I send to the desk, with the request that it be printed.

At the present time, there is consumed in the United States, each year, about 150,000 tons more sugar than that consumed in the preceding year. This growth, which results from the increase in our population, and also from a growth in the per capita rate of sugar consumption, is now allocated between our domestic producers, on the one hand, and Cuba and other foreign producers, on the other, in the ratio of 55 to 45. Cuba's share of this growth is about 30 percent of the total; and the other foreign countries, except the Philippines, have about 15 percent of the total. The Philippines have a fixed annual quota, and that country does not share in additional allocations arising from the growth in our market.

My amendment would reassign to our domestic producers the Cuban quota of the annual growth increment.

Under the Sugar Act, the domestic beet sugar areas are allocated about 40 percent of new domestic quotas. Forty percent of the amount reassigned from Cuba would furnish increased acreage in significant proportions. Under the second part of my amendment, the Secretary of Agriculture would be required to give to new and small producers a preference as to any increased acreage resulting from this reassignment.

Thus, on a progressive basis, each year more acreage would be available to help these new and small growers. They have had a preference in the past; but, as I have pointed out, the added acreage has been too small to be of help to them.

I think it eminently fair that the part of the new acreage which, under my amendment, would be reassigned from Cuba, should be subject to this preference for new and small producers. This would take a sound and constructive step to meet the need of this particular group, without disturbing the balance of the Sugar Act's operation or violating its spirit.

The PRESIDENT pro tempore. The amendment will be received and printed, and appropriately referred.

The amendment was referred to the Committee on Finance.

NOTICE OF HEARINGS ON CERTAIN BILLS BY SUBCOMMITTEE ON HOUSING OF COMMITTEE ON BANKING AND CURRENCY

Mr. SPARKMAN. Mr. President, as chairman of the Subcommittee on Housing of the Committee on Banking and Currency, I announce that public hearings will begin on May 9, 1960, during which the subcommittee will consider S. 467, S. 914, S. 1342, S. 1680, S. 1955, S. 2911, S. 2912, S. 2950, S. 3042, S. 3148, S. 3226, S. 3276, S. 3278, S. 3282, S. 3291, S. 3292, S. 3379, and other bills which may be referred to the subcommittee between now and May 9. The hearings will be held in room 5302, New Senate Office Building. Persons wishing to appear before the subcommittee should communicate with Mr. James B. Cash, Jr., staff director, Subcommittee on Housing, room 5228, New Senate Office Building, Washington 25, D.C.—telephone number, Capitol 4-3121, extension 6348—on or before May 4, 1960.

NOTICE CONCERNING NOMINATION OF FRANCIS ADAMS CHERRY TO BE MEMBER OF SUBVERSIVE ACTIVITIES CONTROL BOARD

Mr. McCLELLAN. Mr. President, the following nomination has been referred to and is now pending before the Committee on the Judiciary:

Francis Adams Cherry, of Arkansas, to be member of Subversive Activities Control Board, for a term of 5 years, expiring March 4, 1965—reappointment.

On behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in this nomination to file with the committee, in writing, on or before Monday, May 2, 1960, any representations or objections they may wish to present concerning the above nomination, with a further statement whether it is their intention to appear at any hearing which may be scheduled.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. BARTLETT:

Statement by him relating to the bill (S. 3005) to amend the act of March 3, 1933 (47 Stat. 1426), relating to the length of time by which the Federal Maritime Board may suspend tariff schedules, and quoting letter written by the Administrator, General Services Administration, dated April 13, 1960, to the chairman of the Committee on Interstate and Foreign Commerce, of the Senate, relating to the aforementioned bill.

By Mr. CLARK:

Article entitled "College Loyalty Oaths," published in the April 1960 issue of Coronet magazine.

By Mr. RANDOLPH:

Speech delivered April 24, 1960, at dedication services for the new post home of Summers County Post No. 4500, Veterans of Foreign Wars of the United States, West Virginia Department, at Hinton, W. Va.

DEMOCRATIC PRESIDENTIAL CANDIDATES

Mr. MANSFIELD. Mr. President, last Thursday, three of our distinguished colleagues—three outstanding candidates for the Democratic nomination for the Presidency—addressed the American Society of Newspaper Editors.

The three statements which were delivered are very revealing. They tell much of the caliber of the men who made them. To Americans, generally, these statements should be a source of reassurance, for, if these men or their equals are elected, we can be sure that the Nation will be in the hands of strong, able, and intelligent men. To Democrats, in particular, these statements are indicators of the great wealth of the Presidential potential within our party. Senator KENNEDY, Senator SYMINGTON, and Senator HUMPHREY, as do our other candidates, possess a great depth of sincerity, as well as a capacity to analyze and the courage to face public issues as they arise. These are characteristics which are desperately needed in the next President; and we are fortunate that the Democratic Party has candidates in these three Senators and in others who possess these characteristics in such ample measure.

The statements to which I have referred suggest to me that we Democrats cannot be beaten by any Republican in the coming presidential election, but that we can beat ourselves. If we are rejected by the people of the United States, in November, it will be because we have, first, rejected our party responsibility to clarify and unite on the great issues of public policy and performance. It will be because we have rejected this responsibility in a synthetic struggle over such extraneous matters as religion, sectional origins, and television personality ratings. We shall have forgotten that in choosing a Democratic candidate, we are not choosing a minister, priest, or rabbi of a church, or a director of a historical society dedicated to keeping alive the memory of the War Between the States, or a matinee idol, but the potential President of all parts and all the people of this Nation.

Senator HUMPHREY and Senator KENNEDY have been drawn, inadvertently, into one of these extraneous matters—that of religion. It was not the doing of either man. Yet both of them have suffered from the arrows of misguided religious passion and slime-coated prejudice which have been let loose in the past few weeks.

I do not know of any two men in public life with a more accurate comprehension of the essentials of our free society that the Senator from Massachusetts and the Senator from Minnesota. I do not know of any two men with a greater dedication to the twin rocks of religious freedom and separation of church and state, upon which this free society so heavily rests. That is why I have deplored the injection by others of this spurious issue between them in Wisconsin and West Virginia. That is why I welcome the statements which they made last Thursday before the American Society of Newspaper Editors.

These statements set the record straight on the matter of religion, as between them; and I hope that, through the editors, they will thereby have set it straight for the rest of the Nation. I hope that, with these statements, they will have spoken for the last time on this matter. From now on, let the prejudiced explain their prejudices, if they will. The unprejudiced do not have to discuss their lack of them.

Mr. President, I ask unanimous consent that the three statements previously referred to, as they appeared in the New York Times on April 22, 1960, be printed at this point in my remarks.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

[From the New York Times, Apr. 22, 1960]

TEXTS OF SPEECHES BY KENNEDY, SYMINGTON, AND HUMPHREY AT EDITORS' CONVENTION—HUMPHREY JOINS WITH KENNEDY IN DEPLORING INJECTION OF RELIGIOUS ISSUE INTO POLITICS

SENATOR KENNEDY

I have decided, in view of current press reports, that it would be appropriate to speak with you today about what has widely been called "the religious issue" in American politics.

The phrase covers a multitude of meanings. There is no religious issue in the sense that any of the major candidates differ on the role of religion in our political life. Every presidential contender, I am certain, is dedicated to the separation of church and state, to the preservation of religious liberty, to an end to religious bigotry, and to the total independence of the officeholder from any form of ecclesiastical dictation.

Nor is there any real issue in the sense that any candidate is exploiting his religious affiliation. No one's candidacy, by itself, raises a religious issue. And I believe it is inaccurate to state that my "candidacy created the issue."

Nor am I appealing, as is too often claimed, to a so-called Catholic vote. Even if such a vote exists—which I doubt—I want to make one thing clear again: I want no votes solely on account of my religion. Any voter, Catholic or otherwise, who feels another candidate would be a superior President should support that candidate. I do not want any vote cast for me for such illogical and irrelevant reasons.

Neither do I want anyone to support my candidacy merely to prove that this Nation is not bigoted—and that a Catholic can be elected President. I have never suggested that those opposed to me are thereby anti-Catholic. There are ample legitimate grounds for supporting other candidates (though I will not, of course, detail them here).

Nor have I ever suggested that the Democratic Party is required to nominate me or face a Catholic revolt in November. I do not believe that to be true—I cannot believe our convention would act on such a premise—and I do believe that a majority of Americans of every faith will support the Democratic nominee, whoever he is.

What is the issue?

What, then, is the so-called religious issue in American politics today? It is not, it seems to me, my actual religious convictions—but a misunderstanding of what those convictions actually are.

I know the press did not create this religious issue. My religious affiliation is a fact—religious intolerance is a fact. And the proper role of the press is to report all facts that are a matter of public interest.

But the press has a responsibility, I think you will agree, which goes far beyond a reporting of the facts. It goes beyond lofty editorials deploring intolerance. For my religion is hardly, in this critical year of 1960, the dominant issue of our time.

The members of the press should report the facts as they find them. But they should beware, it seems to me, of either magnifying this issue or oversimplifying it.

I spoke in Wisconsin, for example, on farm legislation, foreign policy, defense, civil rights, and several dozen other issues. But I rarely found them reported in the press, except when they were occasionally sandwiched in between descriptions of my handshaking, my theme song, family, haircut, and, inevitably, my religion.

At almost every stop in Wisconsin I invited questions, and the questions came—on price supports, labor unions, disengagement, taxes, and inflation. But these sessions were rarely reported in the press except when one topic was discussed: religion.

One article, in a news magazine, for example, supposedly summing the primary up in advance, mentioned the word Catholic 20 times in 15 paragraphs, not mentioning even once dairy farms, disarmament, labor legislation, or any other issue. And on the Sunday before the primary, the Milwaukee Journal featured a map of the State, listing county by county the relative strength of three types of voters—Democrats, Republicans, and Catholics.

Problems are stressed

Now we are in West Virginia. As reported to today's Washington Post, the great bulk of West Virginians paid very little attention to my religion, until they read repeatedly in the Nation's press that this was the decisive issue in West Virginia. There are many serious problems in that State, problems big enough to dominate any campaign, but religion is not one of them.

I do not think that religion is the decisive issue in any State. I do not think it should be, and recognizing my own responsibilities in that regard, I am hopeful that you will recognize yours also.

For the past month and years I have answered almost daily inquiries from the press about the religious issue. I want to take this opportunity to turn the tables, and to raise some questions for your thoughtful consideration.

First, is the religious issue a legislative issue in this campaign?

There is only one legitimate question underlying all the rest: Would you, as President of the United States, be responsive in any way to ecclesiastical pressures or obligations of any kind that might in any fashion influence or interfere with your conduct of that office in the national interest? I have answered that question many times. My answer was, and is, "No."

Once that question is answered, there is no legitimate issue of my religion, but there are, I think, legitimate questions of public policy, of concern to religious groups which no one should feel bigoted about raising, and to which I do not object answering. But I do object to being the only candidate required to answer those questions.

Federal assistance to parochial schools, for example, is a very legitimate issue actually before the Congress. I am opposed to it. I believe it is clearly unconstitutional. I voted against it on the Senate floor this year, when offered by Senator MORSE. But interestingly enough, I was the only announced candidate in the Senate who did so. Nevertheless I have not yet charged my opponents with taking orders from Rome.

The envoy issue

An Ambassador to the Vatican could conceivably become a real issue again. I am opposed to it, and said so long ago. But even though it was last proposed by a Baptist President, I know of no other candidate who has been even asked about this matter.

The prospects of any President ever receiving for his signature a bill providing foreign-aid funds for birth control are very remote indeed. It is hardly the major issue some have suggested. Nevertheless I have made it clear that I would neither veto nor sign such a bill on any basis except what I considered to be the public interest, without regard to my private religious views. I have said the same about bills dealing with censorship, divorce, our relations with Spain, or any other subject.

These are legitimate inquiries about real questions which the next President may conceivably have to face. But these inquiries ought to be directed equally to all candidates.

Secondly, can we justify analyzing voters as well as candidates strictly in terms of their religion? I think the voters of Wisconsin objected to being categorized simply as either Catholics or Protestants in analyzing their political choices. I think they objected to being accosted by reporters outside of political meetings and asked one question only—their religion—not their occupation or education or philosophy or income—only their religion.

The flood of postprimary analyses on the so-called "Catholic vote" and "Protestant vote"—carefully shaped to conform with their author's preprimary predictions—would never be published in any competent statistical journal.

Only this week, I received a very careful analysis of the Wisconsin results. It conclusively shows two significant patterns of bloc voting: I ran strongest in those areas where the average temperature in January was 20 degrees or higher, and poorest in those areas where it was 14 degrees or lower—and that I ran well in the beech tree and basswood counties and not so well among the hemlock and pine.

It has been suggested, that to offset my apparent political handicaps I may have to pick a running-mate from Maine or, preferably, Alaska.

Kennedy doubts analyses

The facts of the matter are that this analysis stands up statistically much better than all the so-called analyses of the religious vote. And so do analyses of each county based on their distance from the Minnesota border, the length of their Democratic tradition and their inclusion in my campaign itinerary. I carried some areas with large proportions of voters who are Catholics—and I lost some. I carried some areas where Protestants predominate—and I lost some.

It is true that I ran well in cities—and large numbers of Catholics live in cities. But so do union members and older voters and veterans and chess fans and basswood lovers. To say my support in the cities is due only to the religion of the voters is incapable of proof.

Of those Catholics who voted for me, how many did so on grounds of my religion—how many because they felt my opponent was too radical—how many because they resented the attacks on my record—how many because they were union members—how many for some other reason? I do not know. And the facts are that no one knows.

The voters are more than Catholics, Protestants or Jews. They make up their minds for many diverse reasons, good and bad. To submit the candidates to a religious test is unfair—to apply it to the voters themselves is divisive, degrading and wholly unwarranted.

Third and finally: Is there any justification for applying special religious tests to one office only? The Presidency? Little or no attention was paid to my religion when I took the oath as Senator in 1953—as a Congressman in 1947—or as a naval officer in 1941. Members of my faith abound in public office at every level except the White House. What is there about the Presidency that justifies this constant emphasis upon a candidate's religion and that of his supporters?

The Presidency is not, after all, the British Crown, serving a dual capacity in both church and state. The President is not elected to be protector of the faith—or guardian of the public morals. His attendance at church on Sunday should be his business alone, not a showcase for the Nation.

On the other hand, we are in no danger of a one-man constitutional upheaval. The President, however intent he may on subverting our institutions, cannot ignore the Congress—or the voters—or the courts. And our highest court, incidentally, has a long history of Catholic justices, none of whom, as far as I know, was ever challenged on the fairness of his rulings on sensitive church-state issues.

Some may say we treat the Presidency differently because we have had only one previous Catholic candidate for President. But I am growing weary of that term. I am not the Catholic candidate for President. I do not speak for the Catholic Church on issues of public policy—and no one in that church speaks for me. My record on aid to education, aid to Tito, the Conant nomination and other issues has displeased some prominent Catholic clergymen and organizations; and it has been approved by others. The fact is that the Catholic Church is not a monolith—it is committed in this country to the principles of individual liberty—and it has no claim over my conduct as a public officer sworn to do the public interest.

So I hope we can see the beginning of the end of references to me as "the Catholic candidate" for President. Do not expect me to explain or defend every act or statement of every Pope or priest, in this country or some other, in this century or the last—and that includes the mayor of Dijon.

Two alternatives noted

I have tried to examine with you today the press' responsibility in meeting this religious issue. The question remains: What is my responsibility? I am a candidate. The issue is here. Two alternatives have been suggested:

1. The first suggestion is that I withdraw to avoid a "dangerous religious controversy"; and accept the vice-presidential nomination in order to placate the so-called Catholic vote.

I find that suggestion highly distasteful. It assumes the worst about a country which

prides itself on being more tolerant and better educated than it was in 1928. It assumes that Catholics are a pawn on the political chessboard, moved hither and yon, and somehow "bought off" by the party putting in the second spot a Catholic whom the party barred from the top for reasons of religion. And it forgets, finally, that such a performance would have an effect on our image abroad as well as our self-respect here at home.

Are we going to admit to the world that a Jew can be elected mayor of Dublin, a protestant can be chosen a Foreign Minister of France, a Moslem can serve in the Israeli Parliament—but a Catholic cannot be President of the United States? Are we to tell Chancellor Adenauer, for example, that we want him risking his all on our front lines; but that—if he were an American—we would never entrust him with our Presidency—nor would we accept our distinguished guest, General de Gaulle? Are we to admit to the world—worse still, are we to admit to ourselves—that one-third of our population is forever barred from the White House?

So I am not impressed by those pleas that I settle for the Vice Presidency in order to avert a religious spectacle. Surely those who believe it dangerous to elect a Catholic as President will not want him to serve as Vice President, a heartbeat away from the office.

2. The alternative is to proceed with the primaries, the convention and the election. If there is bigotry in the country—then so be it—there is bigotry. If that bigotry is too great to permit the fair consideration of a Catholic who has made clear his complete independence and his complete dedication to separation of church and state, then we ought to know it.

But I do not believe that this is the case. I believe the American people are more concerned with a man's views and abilities than with the church to which he belongs. I believe that the Founding Fathers meant it when they provided in article VI of the Constitution that there should be no religious test for public office—a provision that brought not one dissenting vote, only the comment of Roger Sherman that it was surely unnecessary—"the prevailing liberality being a sufficient security against such tests." And I believe that the American people mean to adhere to those principles today.

But regardless of the political outcome, this issue is here to be faced. It is my job to face it frankly and fully. And it is your job to face it fairly, in perspective and in proportion.

I am confident that the press and other media of this country will recognize their responsibilities in this area—to refute falsehood, to inform the ignorant, and to concentrate on the issues, the real issues, in this hour of the Nation's peril.

The Supreme Court has written that as public officials "we are neither Jew nor gentile, neither Catholic nor agnostic. We owe equal attachment to the Constitution and are equally bound by our obligations whether we derive our citizenship from the earliest or latest immigrants to these shores * * * [for] religion is outside the sphere of political government."

We must all—candidates, press, and voters alike—dedicate ourselves to these principles, for they are the key to a free society.

SENATOR SYMINGTON

I appreciate very much this opportunity to be with you.

Your profession renders a vital service to the American people—in that you provide a vehicle by which the experience and thinking of many, including yourselves, may be brought to the people promptly and accurately.

It is self-evident that well-informed public opinion is the basic strength of a democracy.

Every ounce of strength is now needed, because of the challenge which confronts us, both at home and abroad.

We have today an amazing productive technology. This calls for a high rate of economic growth, to prevent high unemployment of our plants and our manpower.

We have the duty to use this technology fully.

We are challenged by the growing needs of a growing people with rising aspirations.

We are challenged on the international front by an unprecedented competition—a contest for economic and ideological survival.

And in this contest there is no honor in honorable mention.

Above all, we must find new answers to a question which other democracies throughout history ignored at fatal cost.

How can a free system, without diminishing its freedom, become united and purposeful enough to surpass the evil unity and purpose of totalitarianism?

These challenges have too often been viewed in terms of the dangers confronting us.

They have not been viewed sufficiently in terms of the opportunities which are ours.

We have talked too much about what we cannot afford, instead of dedicating our full resources to what we can accomplish.

We suffer today from no lack of potential economic power; no essential dearth of moral aspirations, no insufficiency of spiritual reserves. Our economic and political systems are well-suited to our tasks.

A major reappraisal

What we need today is a major reappraisal of attitudes, and a realinement of efforts, to bring our unrivaled endowments into more effective focus.

I believe that our American society has the innate capacity to make this reappraisal and effort. I believe that we can do this with our heads held high in an atmosphere of freedom.

These are the motivations which have led me to seek the nomination for the Presidency. I feel free to discuss this with you here today, because the obligation which my candidacy imposes is neither partisan nor political in the narrow sense.

It is an obligation to the American people as a whole. They are entitled to know my general views, and specific policy proposals, for today and tomorrow, which bear on the towering problems confronting us at home and throughout the world.

Anyone who would take on this obligation must consider the question of primaries.

From the outset, I have been morally certain that entry into a few primaries in a few States is not the best way to fulfill this obligation to the American people at large.

These primaries, in their present form, establish contact with only random fractions of the electorate. They tend to become personality contests. They embitter men of fundamentally similar views, who later must work together to serve our national needs. They are ill-suited to the systematic discussion of great issues.

I maintain that there is a better way for those who aspire to national leadership to reveal their thoughts and program for America.

Those of you who may be familiar with my itinerary and activities over the past weeks have ample evidence of the importance I attach to seeing all the people I can, listening to their views, and giving them mine.

But the principal method I intend to follow is a series of interrelated speeches, which the media of popular communication can carry far beyond the range of my voice.

I believe that this representative gathering offers a fitting occasion for the first of these statements.

The base of strength

My central theme throughout will be this: What are the chief factors in the strength of America? How can we bring that strength to its full potential, so that we can live and prosper in a world at peace?

First of all, our economic system is capable of high and sustained economic growth.

I do not place this first because I consider that we are a materialistic people. I refer to it because economic growth is the base upon which so much of our other strength must be built.

We stand today in the presence of a new technology, a new automation, a second industrial revolution.

If we call forth our full productive power, we can, during the next 5 years, average annually $50 to $70 billion more in total output, as against what will happen if we allow substantial portions of our plant and manpower to lie idle.

By gearing our performance to our potentials, we can create a new age of abundance in America, service fully our domestic needs, support an adequate national security shield, and enlarge our efforts for peace around the world.

By this example, we can light the way for the rest of the world, and prove that we are equal to the economic and moral challenge of peaceful coexistence.

Therein lies our greatest hope for peace.

Second, this growing economic strength would enable us, without strain, to attend to the great priorities of our private and public national needs.

There are still too many economic and social liabilities in our house. They weigh us down.

The effects on people

These liabilities include recurrent large-scale unemployment; one-fourth of a nation living in poverty in a land of plenty; inflation, which hurts those most who need help most; millions of our senior citizens living on pittances; millions of our young people denied full educational opportunity; millions of farm families forced ever downward toward relative and absolute poverty; millions of families living in urban and rural slums; millions of families denied the medical care and future benefits which current science and medical research can provide.

Each of these liabilities furnishes opportunity—the opportunity to remove them. To do so would add immensely to our overall productive strength and our national security.

But I disagree with the argument that we should educate our children and remove poverty just to enrich our whole economy and to compete with the totalitarians.

We should educate our children better, and stamp out poverty, because these are among the noblest purposes any enlightened society can pursue.

A third way to build our strength is through the full extension of justice and equality of opportunity in our political, civil and economic affairs.

It may be a good argument that the removal of discrimination based upon race or creed or color will make us more appealing to the uncommitted peoples of the world, and thus strengthen everywhere the forces of freedom.

But I think it is a still better argument that we should stamp out discrimination because it violates our own Constitution, because it offends both our conscience and our faith; and because a strong democracy must be a decent democracy.

We can further build our strength by redefining our cooperative relationships with other free peoples. We should help them

with food, not only because we have farm surpluses, but because they are hungry.

We should assist in their technical and industrial development, not just because this will help them to resist communism from without and within, but because this will help them to live better lives.

The fruit of freedom

I would hope that they will base their respect for our strength upon their regard for our moral purposes, and their awareness of the human idea of our free institutions.

We should make it clear that the fruit of freedom is for every man's garden—and that no nation which offers less, offers enough.

And last, but by no means least, we must strengthen our position by finding a more workable way to live on the same planet with the totalitarians—without jeopardizing our freedom or tarnishing our honor.

Another world war could end in nothing which any rational man or woman would call victory.

An unchecked arms race can have no final consequence except final disaster for mankind. Therefore, I favor cultural exchanges, free contacts among peoples, and summit meetings of governments when the stage has been properly prepared.

I favor every effort toward mutual general disarmament. Nothing is more important to mankind than the outcome of our negotiations in that field.

But as we negotiate for peace through disarmament, we must know—and the world must recognize—that our overall strength is sufficient to support our strength of purpose.

What America cannot afford is to spend $40 to $50 billion a year to become a second-rate military power while the arms race is still in progress.

I will never, merely because every American yearns for peace as I do, mute the issue of our national security, or soften the true description of the long and hard road we must travel toward an enduring peace, merely in the hope of gaining a domestic political victory.

I want peace for our children; not just another "peace in our time."

This is a summary listing of the multiple-purpose strength we must build.

Why, despite our ample potentials, are we not building these elements in our strength today?

How can we build them, before it is too late?

That is the central issue.

Must agree on goal

Because our tasks are so many and yet so interdependent, we cannot move forward together until we define together and agree together where we want to go. Our lack of unity, of any true national purpose, is our Achilles heel.

To surmount this defect, we must discard the obsession of the present national administration that one element in our strength can only be advanced at the expense of others. Some say that, because of the high cost of our national security shield, we cannot afford greater educational and scientific efforts. Others say that we cannot afford an adequate security shield because it would weaken our whole economy.

And while some say that we must retard private living standards to expand our domestic public services, others say that we must short-change our essential public services to foster private economic progress.

By presenting a false choice between false alternatives, none adequate to our needs, we end up by faltering on all fronts instead of moving decisively on any.

In the face of the peril confronting us, we must marshal the wisdom to put first things first; and not, like Carthage, gild our roofs with gold while denying supplies to Hannibal.

But it is dangerous to embrace the notion that we are only a one- or two-purpose nation. This narrow and fragmentary approach divides instead of uniting the American people.

By attempting to create fundamental progress in one area at the expense of another, it turns the urban consumer against the farmer, the farmer against the worker, the small and medium-size businessman against big business, the Federal Government against State and local governments, and the people against them all. It tends to make our own people fearful of economic progress in other parts of the free world. It increasingly prejudices the rest of the free world against us.

More important still, this doctrine of partial strength through overall weakness underestimates dangerously the increasing power of the totalitarian thrust.

A few years ago, the Soviets could only build their military strength and industrial base by ruthlessly suppressing the living standards of their own people.

But this is no longer true today; and it will be even less true in future years. The Soviets have now reached the point where they can combine a rapid military and industrial advance with large improvements in the living standards of the Russian people.

And it will only be a little later on, measured in the lives of nations, when the Chinese will be able to do likewise.

What a calamity it would be if, as the Communists are achieving multiple lines of progress in terms of their values, we decide that we must continue to move backward on one front in order to move forward on another.

What a tragic mishandling this would be of the power and promise of America.

In economic terms, the full development of our strength can provide, over a 5-year period, $250 to $350 billion more in total national output than if we allow our economy to amble along in the indifferent economic performance of recent years. With this addition to our real wealth, we can expand greatly the business investment in plant and machines which are a prime source of economic progress.

We can not only reduce poverty and other forms of want, but we can also lift the living standards of all our people. And, at existing tax rates, this full rate of economic growth would add $70 to $100 billion during the 5-year period to our public revenues at all levels of Government.

With these increased revenues, we could greatly improve all those domestic and oversea efforts which are financed with public funds.

But we cannot achieve this by clamping down the brakes upon our economy and upon the resolute energies of our people.

I intend, in another talk, to detail my program on this front.

Heavy tasks imposed

The overall effort we must make imposes heavy tasks upon the national leadership. Fifty States, and 180 million citizens, have much to do in their separate and individual capacities. We should continue to pursue the diversified goals which mark our indidivual lives and private endeavors.

But, as individuals, we cannot solve the looming problems of war or peace, international cooperation, high economic growth, inflation, education, and science, civil rights, and liberties, and fundamental social security for our people.

In these critical times, we cannot achieve a long-range national purpose without a unified national effort.

The answer to Lincoln's question, for today, is that we must steer a course between the defaults of a government which does too little and the excesses of a government which does too much.

We must win consents rather than enforce decrees.

We must spark action under freedom which burns with a better light than action under dictatorship.

This calls for enterprise and invention, within the framework of an economic and political system we are determined to preserve.

We need to initiate new methods of cooperation among business, labor, and Government; and also among all levels of government.

We need to distinguish between those steps the Government must take itself, and those which it can stimulate others to take. I shall be more specific on this point in a later talk.

Above all, we need to use methods by which the high pursuit of reason will result in the willing consent of our people.

This consent, without compulsion, should include the average family, industry large and small, agriculture and labor, and men and women of thought and action in private life and in Government.

In that way, we would bring full meaning into our national life.

There is no conflict in a free society between strong leadership and voluntary unity.

Plenty for all to do

Washington was as firm as granite; but he held together the young Nation by winning the voluntary cooperation of as strong and gifted a group of men as ever surrounded a Chief of State.

Lincoln knew how to combine firmness in the right with malice toward none and charity for all.

The times in which we now live are too perilous to confuse leadership with showmanship; to substitute the purple word for the valiant deed; or to achieve the mere political victories which sharpened divisions may bring.

We need now that progress which only the vigorous consent of free men can provide. There is plenty for us all to do together—and soon.

We are not at the sunset of our national life.

America is still in the morning of her history.

Let us all stand together, firm in the knowledge that our Nation's needs will never exceed her capabilities.

The problems of today are not just burdensome responsibilities. They constitute a transcendent challenge. Their solution offers the hope and promise of the highest fulfillment of the American dream.

Let us use our confidence in the destiny of America to build the strength of America.

SENATOR HUMPHREY

I trust this distinguished audience will permit me the opportunity to make a statement on a most vital issue before I address myself to the important subject upon which I have been asked to speak.

I impose upon your time because I believe that our national interest requires me to make this declaration—clearly, decisively, and unequivocally.

As you know, I am a candidate for the Democratic nomination for the Presidency. If the American people find me worthy, I hope to be nominated and elected.

There is no higher elective post in the world—no greater honor—no heavier responsibility.

I say this because leadership of the American people today carries with it great rsponsibilities to all of mankind.

Yet, great as this challenge and this honor may be, there are circumstances under which I would not wish to be either candidate or President.

I would not want to pursue this campaign if it were to create deep and dangerous divisions among Americans on the issue of religion.

I would not want to be President if it meant that my own party might be torn apart on this extraneous issue.

I would not want to receive the vote of any American because my opponent worships in a particular church, whatever that church may be.

Nor would I want to receive the vote of any American simply because he is of the same faith as I.

It is alien to our American traditions for any man's qualifications for public office to be judged on the basis of his religious affiliation.

Recalls Smith nomination

Indeed, Gov. Al Smith was nominated by my party for President without reference to his faith, either as an asset or a handicap. He was nominated, as he deserved to be, on the basis of his record in public life.

One hundred and seventy years ago this country was founded on certain well-defined democratic principles.

One of these principles was that neither religious prejudice nor religious preference has any place in American politics.

My own record and deep convictions are clear evidence of my devotion to the basic principles of American democracy.

Indeed, my dedication to equal rights for all Americans, whatever their race, is frequently though erroneously cited as a reason why I cannot be nominated by my party.

I am just as fully dedicated to equal rights for Americans of all creeds and national origins.

I restate these obvious truths because the issue of religion has been raised. Some people have raised it, I assume to help my opponent and to hurt me; others to hurt him and help me.

Both these misuses of religion grievously offend Judaic-Christian and democratic principles.

The only tests that may properly be applied to any candidate are those relating to integrity, ability, experience, judgment, and dedication to democratic institutions and constitutional government.

No one should maintain, I believe, that any candidate be nominated simply because he would obtain the support of voters of his own faith—nor should he be denied the nomination because people of other faiths might vote against him. Both of these intrusions of denominational preference into politics threaten the very fabric which binds our nation together.

Asks issue be faced

The issue must be faced squarely, for the sake of our national well-being. My statement has been made in that spirit.

Now let me turn to West Virginia—and, in justice to that State, speak of the wide and distressing gap between what is real and what has been widely reported throughout the country.

The senior editor of a national news magazine wrote this week that "the same anti-Catholic prejudice that cost Alfred E. Smith the State in November 1928, was boiling up in West Virginia."

Actually, West Virginia had voted Republican in presidential elections ever since its origin as a State and only went Democratic when the great depression hit it in the early thirties. If West Virginians were prejudiced, it was for Republicans and against Democrats.

In the Democratic primary of 1928, Governor Smith, a declared opponent of prohibition, running in predominantly Protestant, bone-dry West Virginia, scored a comfortable victory in a vigorously contested election.

Chides the press

The Nation should know this through the Nation's press.

I suspect that there may be some Catholics in West Virginia who won't vote for me because I am a Protestant, and that there may be some Protestants who will not vote for my opponent because he is a Catholic.

But, in 1960 as in 1928, these few irresponsible votes will not decide the election.

I am confident from my many conversations with people in West Virginia, that in the May 10th primary, the vast majority will again vote for the candidate they consider best qualified to shoulder the responsibilities of the Presidency. They will not determine their political choice on the basis of where either of us attend church.

I have always thought that good news is every bit as newsworthy as bad. Let me bring you some good news about West Virginia.

Its public schools have moved with much more than deliberate speed toward desegregation in compliance with the Supreme Court's decision.

West Virginia University was the first State university in the South to open its doors to qualified Negro graduate students after an earlier Supreme Court decision.

Its State-supported colleges, and most of the private ones as well, have students of all races. So also, I might add, has West Virginia State College, for years one of the Nation's outstanding Negro colleges and now completely desegregated.

Cites contributions

I could go on. But I trust that I have made the point: West Virginia is contributing more than its share to solving this most urgent moral and social problem. Like the Nation, it has a long way to go—but it is well on the road and headed in the right direction.

In this struggle, the West Virginia press has played a constructive role. It did not retreat behind that cold wall of objectivity which helps deaden human compassion in our society. It avoided the sensationalism that too often fans the flames of bigotry. It spoke up calmly and courageously for the dignity of man.

Few newspapers in this country speak out as forthrightly on human equality as the Charleston Gazette, the State's largest daily.

Now pause a moment and ask yourself this question—have you seen any of this good news in the recent reports of some of our syndicated political writers?

Indeed, many thoughtful observers are disturbed—and deeply concerned—about the role the press has played in the explosive issue of politics and religion as it has entered the campaign in West Virginia and earlier in Wisconsin.

Let me cite two respected journalists out of many who have spoken out on this subject.

Quotes magazine report

Theodore H. White, in the April 13 issue of the Saturday Review, has this to say:

"Few, if any, out-of-State journalists could have left Milwaukee on the gray and overcast Wednesday morning following the Kennedy-Humphrey primary without concern over their own role in the dramatic last days of the contest.

"For, when they came to Wisconsin, it was a State of easy and decent tolerance; when they left, it was perplexed and divided. The divisions of origin and religion were, of course, always there. But how much we collectively did to exacerbate and amplify them is the heart of a question that may be of central importance to the presidential politics of 1960."

Chalmers Roberts of the Washington Post has written in much the same spirit this very week. Every member of the profession of journalism, indeed every person in public life, should give these observations sober, thoughtful consideration.

I know that, for you editors, choice is necessary and inevitable. You must choose what stories should be written, how they should be written, and whether they should be played up or down.

I would suggest, in all humility, that fanning the flames of racial or religious prejudice—however unwittingly—is highly dangerous in a society based on the dignity of man. I would suggest that religious labeling is as undesirable as racial labeling.

Let's talk program, and quit exploring prejudices.

One last brief note on politics. I have examined the West Virginia primary law. I note that it provides for write-in candidates.

I would suggest to Senator ROBERT BYRD, and to all other residents of West Virginia who have stated they support other candidates than Senator HUMPHREY or Senator KENNEDY, that they write in their choice on their ballots.

Now, ladies and gentlemen, I hope that all of us can get on with the discussion of the real and the important issues of the 1960 campaign. That is precisely what I intend to do from this moment.

There is no subject so crucial to the future of mankind as the one you have assigned me today—the wise and prudent handling of Soviet-American relations.

And of the many formidable problems of United States-Soviet relationships, none is of such magnitude as the arms race.

The arms race, draining both the free world and the Communist bloc of scores of billions of dollars—and, far more important, posing the threat of incalculable disaster to all mankind—is the dominant fact of life in 1960.

Competition from the Soviet Union and Communist bloc in the production of goods, propaganda offensives, economic aid programs, diplomatic offensives—all these threats from the Communist world are manageable, containable, well within our capability if we but use the vast resources at our command.

But the arms race, unchecked, is a devouring monster—heedless of ideology, heedless of race or creed or color. It is rapidly becoming unmanageable. It almost seems to take on a life and a will of its own. It can get to the point where military men—yes, even machines such as electronic computers—will be making the decisions of absolute life and death for civilization.

What a travesty. What a death for the flowering of man's creative intelligence to bear such bitter fruit.

Sees yearning for peace

There is a great, unspoken yearning for peace among all the peoples of the earth. One only has to open the subject of peace in any group, however large or small, to find that he has struck a deep chord of emotion and feeling.

I have had this experience on street corners in Moscow, in drawing rooms in Paris, and in the high school auditoriums of Minnesota, California, Wisconsin, and Florida.

This Nation is ready, this people is willing, to support an effort by our Government to make a breakthrough to genuine peace—to replace the arms race with a new concept of international relationships in which nations and people can live free from the threat of aggression and free from the fear of instant obliteration.

Fundamentally, people all over the world are no different from us in this surging desire for peace. Even among the leadership of the Communist bloc the desire for world domination may be tempered by the conviction that one mistake can plunge them into catastrophe. With vigorous, persistent leadership from the free world, even the men in the Kremlin may be prepared to swallow some bitter pills in order to find some way out of the monstrous arms competition.

The Soviet Union needs peace.

We have a better than 50–50 chance of making the last half of the 20th century

a half century of peace. And if we can keep peace for 50 years, there is at least some chance that the habit may take hold.

Would slow arms race

First, above all, the arms race must be slowed down. The only way we can ever expect to accomplish this is by focusing on the possibility that armaments can be controlled, reduced, and eventually eliminated.

But there are those who think any talk or planning or studies of disarmament is dangerous. These people worry lest we be lulled into a false sense of peace and security. Such a view is without substance if we keep clearly in mind our goal, and the essential steps to it.

An armed world is not the necessary and natural state of mankind. Yet we must also realize that any control and reduction of armaments requires an enormous effort.

Any review of the field of arms control illustrates there is a barrenness in our past.

1. We can count on one hand the number of qualified individuals who are competent negotiators in matters of arms control and in an understanding of Soviet and Communist psychology.

2. Government expenditures to conduct research in arms control systems are almost nonexistent except for research recently inaugurated on the detection and identification of nuclear weapons tests.

3. An analysis of our present arms control policy now being offered in the 10-nation talks in Geneva shows that we are being limited in our disarmament proposals by the inadequacy of our technical and scientific preparations. We have preached the concept of control and inspection. Now that we are again in serious negotiations we find that no firm plans exist on how various weapons and armed forces can be controlled and hence limited.

4. There is no centralized direction yet on the formulation of disarmament policy. There has been no strong leader who visualized that basically hostile powers might have sufficient mutual interest to provide the basis for agreement.

There was another spate of fine words the other day from the White House—the announcement of an upgrading of the Office of Disarmament within the Department of State. The objective is laudable. The worth will be determined by staffing and budget support.

But what kind of a budget is this Office to have? Is it to have only the $400,000 requested in the 1961 budget by the administration. If we are going to have simply another slogan, another facade to cover inertia and indifference, then I want no part of it.

Eight million dollars is needed for one project alone for 1 year; research about seismic detection.

Questions jurisdiction

And what jurisdiction is this Office of Disarmament to have?

I would hope that it will be given authority and resources along the lines of my national peace agency proposal in order to be able to coordinate the many and diverse projects in the arms control field which now fall under the jurisdiction of the Department of Defense, the Atomic Energy Commission, the Central Intelligence Agency, or the Department of State.

I am not a believer in reorganization for reorganization's sake.

I do not believe that the basic lack of Presidential leadership can be overcome by changing the lines on organization charts.

But I am convinced that effective leadership in disarmament policy requires the creation of a disarmament office or agency within the Federal Government, personally backed and given impetus by the President of the United States, well financed and with high priority. It should have one comprehensive assignment: find a way. Find a way out of this terrible arms race—one which safeguards the people of the United States from surprise attack and from nibbling aggression.

Find a way to transmute the energies of this great people into works of peace, works of life, rather than to spend them on the arms race which, at best, provides only limited security for a limited period.

Nothing short of a Manhattan project for peace is required—a program that provides the necessary scientific and technical personnel, the facilities, the money, and the priorities.

More support is urged

Some of our public officials are now beginning to see that a possibility for arms control exists. There is a new interest in disarmament. But neither the White House nor the Congress have provided the support necessary to do the job.

The Subcommittee on Disarmament has never, during its 5 years of work, been granted an appropriation that would permit it to employ more than a handful of dedicated people. Its budget, by comparison with the Labor-Management Investigating Committee, is almost laughable.

Four times last year I tried to obtain a modest sum for arms control studies for the Department of State—$400,000. Even a token amount to initiate technical studies was denied. I sent a personal letter to every Member of the Senate asking for support. Nine Democrats and two Republicans responded.

Nor did the Department of State fight for its own appropriation, since Department officers said this had a low priority and other requests for funds were more important.

Sees new opportunity

This year we have another opportunity. Again the State Department included in its budget the inadequate sum of $400,000. The State Department has this time admitted that the lack of studies has delayed U.S. preparation for arms control negotiations. Deputy Under Secretary, Mr. Raymond Hare, said:

"In reviewing our approach to disarmament, it was further found that the most serious deficiency in the U.S. approach has been the lack of adequate planning and studies in the field of disarmament.

"What is lacking is a sustained study effort concerning the effect of various possible arms control agreements on the United States, Allied, and Soviet capabilities together with future explorations of new possibilities of arms control which might enhance U.S. security."

But what a pitfully small effort even this administration request would provide. It is nothing but the flimsiest of stopgaps. If I did not believe that even a small crust of the loaf of arms control research is better than nothing I would simply denounce the undertaking as too little, and perhaps too late.

Bill for peace agency

In the meantime, I have introduced—early this February—legislation which would establish by law a national peace agency. It may eventually take one of a number of organizational structures. What is important is that it be given high enough priority, enough powers and funds to do the job. It can be the framework within which the Manhattan project for peace can be undertaken.

A national peace agency could become the strong right arm of the President and the Secretary of State—a constantly active agency churning up new ideas, evaluating, re-researching, probing in one direction—toward a more vital, meaningful, and creative American foreign policy.

The President of the United States should—must—with or without such an agency—take immediate steps to determine precisely what can be done and what cannot be done in terms of arms control, and in terms of the possible creation of new international security mechanisms.

The President must ask—and will, I am confident, receive—emergency authorization and funds from the Congress for a project which would put together from industry, the universities, and from private professional life, men and women capable of finding the scientific underpinning for a way out of the arms race.

Bids President act

The President must urge the Congress to provide for long-term programing in the works of peace—programs of economic development, of strengthening of the organizations of international cooperation, of the use of food and fiber, medical and health cooperation, international education, and exchanges.

We have mobilized brains and capital before on such a basis—and not just to fight wars, not just to create nuclear weapons.

There was a Marshall plan. There was the need, there was a plan made, decisions were taken, and the job was done. It was that simple.

If the task of putting Europe back on its feet was staggering, how much more challenging and complex is the task of pulling the world back from the brink of nuclear war. Yet, the suggestion that we must both plan to achieve this, and plan to adjust our economy in the event we succeed, is met with open opposition and ridicule.

I do not minimize the enormous difficulties that block the path to agreement on a new kind of world security system. But we must start somewhere. A beginning must be made. And it must be made with enough determination to keep the effort going through what may be years of exasperating, frustrating, agonizing, and dangerous negotiation.

We must have the kind of national leadership that says "Yes" to the future, that looks not for the obstacles, but for the opportunities—not for perfect solutions, but for possible and safeguarded agreements.

ADDRESSES BY PRESIDENT DE GAULLE, OF FRANCE, BEFORE THE BRITISH PARLIAMENT AND THE NATIONAL PRESS CLUB

Mr. CASE of South Dakota. Mr. President, today the Congress has witnessed a remarkable performance and has listened to a remarkable speech.

I ask unanimous consent to have printed in the RECORD, following these brief remarks, a newspaper report of the interview of President de Gaulle, of France, before the National Press Club; and also a news report, dated April 7, of President de Gaulle's speech before the British Parliament.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

DE GAULLE IS CHEERED FOR HIS A-BAN PLEA

LONDON, APRIL 7.—President Charles de Gaulle won the crowning ovation of his triumphant visit to Britain today with a call for an end to the nuclear arms race.

France, he said, desires above all that nuclear weapons be destroyed and the "vehicles of death" that carry them be placed under surveillance. And France believes that East and West can live in peace together.

De Gaulle's speech combined the stuff of history with oratory perhaps unmatched since Winston Churchill roused the free world to action 20 years ago. Churchill, 85, was there to honor his wartime ally.

De Gaulle, tall and vigorous in sober morning dress, stood before a silk-covered throne on the gray stone steps that fill one end of Westminster Hall. Scarlet-robed Beefeaters from the Tower of London flanked him as an honor guard. A fanfare of trumpeters in medieval dress introduced his speech.

Then, as both Houses of Parliament sat in rapt silence, De Gaulle delivered a 20-minute classical oration from memory—word perfect without a single deviation from advance copies.

His feat astounded seasoned politicians. Legislators afterward spoke with awe of his delivery, which filled the great hall, and of the beauty of his classical French. One called his memorization fantastic.

Joint sessions of Parliament are unusual, and rarely has a foreign dignitary addressed such a session.

By an oratorical tour de force, De Gaulle contrived to end just as the 900-year-old hall vibrated with the last stroke of noon from the great bell of Big Ben.

The audience sat a moment in silence. Then there was a roar of applause that lasted a full 4 minutes.

NOTES COMMON DESTINY

De Gaulle's theme was that Britain and France have a common destiny to work for peace. It brought him to this statement of French aims:

"France believes that this peace can be attained only if general fear of sudden annihilation is first removed.

"This involves the limitation and control of armaments by both camps.

"She (France) wishes above all that stocks of nuclear weapons be destroyed, that installations where they are made be used for other purposes, that rockets and aircraft capable of carrying them, as well as the fixed or floating bases from which these vehicles of death can be launched, be placed under surveillance.

"France would for her part be very happy to give up the tests and the capital expenditure she has undertaken in order to provide herself with the means possessed by others, as soon as these others cease to have them available."

He foresaw a lessening of enmity between the rival blocs of West and East. France, he said, hopes it will be achieved "in a peaceful atmosphere, through evolution conditioned on the one hand by the aspiration of human nature for liberty, and on the other by the pursuit of progress which demands efficiency."

De Gaulle also paid tribute to the perseverance of Prime Minister Harold Macmillan in working to bring the heads of state together in Paris.

After referring to his last visit to Britain 16 years ago, he agreed wryly that he and Churchill had had their differences.

"But see," he cried, "how time works to display what matters and wipe out what counts for little."

Churchill, hunched in his chair with Lady Churchill beside him, was near tears. When De Gaulle finished and after the applause ended, he slowly descended to the floor of the hall, bowed to Sir Winston, and strode slowly out into the spring sunshine. Churchill followed. No one moved until both had gone.

FEARS NOT EASED

Despite this outward show of mutual affection and respect, De Gaulle has declined to offer comfort to Britain on the Common Market issue.

Washington Post Correspondent Robert Baker reported that De Gaulle has been unimpressed by British fears, expressed in private talks with high government officials, that a disastrous economic split is threatening Europe.

British officials hope that the warmth of the public reception of the French President—which De Gaulle himself helped create—will have the effect of softening France's support for trade discrimination against those outside the Common Market.

Earlier in the day, De Gaulle reviewed 1,200 troops of the royal household with scarlet, blue and gold uniforms flashing in bright sunlight. No foreign head of state ever before had reviewed them or received their salute.

After lunch, De Gaulle again displayed the informal touch endearing him to Londoners throughout his state visit. He plunged into a cheering, milling crowd of children at a school for the children of French diplomats, shaking their hands and exchanging a few friendly words.

De Gaulle's popularity was underlined again tonight when an audience at Covent Garden Opera House cheered his appearance with Queen Elizabeth for a ballet performance in his honor.

Standing in the royal box, De Gaulle smiled delightedly and raised both hands in acknowledgment.

A crowd of 2,000 Britons outside let out a terrific cheer when he left the house with the royal party.

TRANSCRIPT OF DE GAULLE REMARKS AT PRESS CLUB

ED EDSTROM (president of the National Press Club). It was just a short time ago that a French newspaper editor was being taken to task by our speaker because of his editorial policies. The editor protested that after all, "Mine is the newspaper of the average Frenchman," whereupon President de Gaulle looked at him and said, "But I am not an average Frenchman."

And indeed he is not. Once again a great nation has sent to us a great leader. There is neither time nor need to recite his accomplishments here. We know that he has had a lifelong love affair and that the name of his lady love is France, and he has often risen to the rescue of his beloved damsel.

It is my great honor to present to you His Excellency, the President of France, the President of the community, Gen. Charles de Gaulle.

President DE GAULLE. Thank you, Mr. President, for the very kind words you have just spoken. I am very happy, ladies and gentlemen, to be with you this morning. It is 15 years since I last met with the representatives of the press here in Washington and I am very happy to see them again, both those whom I knew at that time and those who have succeeded them. But I shall not recall the ups and downs of the past; we are in the present and it is with it that we shall be concerned.

The great questions, the principal question on which everything hinges, the center of our preoccupations is the forthcoming international debate. I have come to Washington, with Monsieur Couve de Murville, the Minister of Foreign Affairs, first of all to greet the American people, and then to have talks with President Eisenhower and with the Government of the United States on the preparation of the summit conference.

ONE CRUCIAL POINT

In the affairs of men, there is always one crucial point, one great question, as you well know, with which everything else is connected. At the moment this crucial point, this great question is the relations between East and West; and for my part, I think that it is primarily with this question that this summit conference must grapple. If, in this respect, we are able to make some progress, well then, the atmosphere may change more or less, at least somewhat; and perhaps for the problems to which no practical solution can be offered at the present time, perhaps in a new atmosphere solutions to these problems will take shape—solutions which at the moment are impossible. That is the case, in particular, for disarmament, for the German problems and for aid to the underdeveloped countries.

In short, what is paramount is to begin the détente and if we attain it, then we can—perhaps and by starting right away—do something positive, something which would necessarily be limited, on one or two or three questions. Afterward we can hope the détente will do its work and later, after a little while, it will be possible to make further progress.

Such, ladies and gentlemen, is my philosophy. And now that I have outlined it, I am ready to answer the questions that you would like to put to me. I am ready to answer, insofar as I am able, the questions you would like to put to me regarding this conference and the matters connected with it.

Question: "Do you favor barring any discussion on Berlin at the summit conference and concentrating instead on the discussion of disarmament?"

Answer: "I do not think that it would be good, or even possible, to forbid the four participants in the summit conference to raise questions or even to ask for the discussion of problems that seem necessary to them. For my part, however, I believe as I indicated at the beginning, that specific and especially difficult questions—the matter of Berlin for example—are questions that it is not well to raise immediately in the summit conference, before having had time to discuss the principal question; that is to say, East-West relations. But naturally, at the summit conference, German questions in general, and the Berlin question in particular, will be discussed. I only want to say that, under present conditions, it does not seem possible to us to arrive at a solution either for all the German problems or for the Berlin problem in particular; that is, not for the moment. It is highly possible, in an atmosphere of détente and after the passage of time, that certain modus vivendi will appear which will be acceptable to both sides."

ON DISARMAMENT

"With regard to disarmament, which was also mentioned in the question, I believe, on the contrary that the summit conference will have to consider it as one of the principal questions, for people are speaking of a détente—and I am speaking of the détente—and that is impossible in the present armed state of the world. There cannot be a real détente until there has been a beginning of disarmament. That is why, from the angle of East-West relations, it certainly seems to me good and useful that the summit conference consider only what is practical at the present time from the point of view of disarmament. I have, moreover, already explained what I, for my part, deem possible at the present time. It seems to me that the effort to reach a détente should focus on nuclear weapons and, in this connection, that they should for the moment be limited to reciprocal control of rockets, strategic aircraft and ships capable of carrying nuclear bombs to all the corners of the world. Control of these vehicles and control of the bases from which they can be launched; this is a question on which I think it is still possible to do something practical."

Question: "Mr. President, does your statement at the outset mean that you do not expect results on disarmament in Germany at the summit and that East-West relations must be the primary target at the summit?"

Answer: "There is no doubt that it is the relations between East and West that must be considered first and foremost. I repeat that if we want these relations to improve, that the German problem—and especially the Berlin question—must not be raised bluntly and, still less, with threat. On the contrary, I think that it is possible and desirable that,

starting with the summit conference, a beginning of the control of nuclear armaments be envisaged by the means of the control of rockets, strategic aircraft, ships and bases; that is what I mean. To my mind, a beginning of disarmament goes with a détente, and I have indicated in what direction. On the contrary, a deadlocked discussion of the German problem at this time does not go with the détente."

TWO SUMMITS?

Question: "Mr. President, do you anticipate another summit conference besides the meeting this year in Paris, perhaps in Moscow when President Eisenhower will visit Russia?"

Answer: "If we do not wage war, we must certainly wage peace. In order to wage peace, we must negotiate. And in order to negotiate, we must meet together. I think that the first summit conference that is going to take place is from that point of view, a very good thing and a beginning; and I think that if, at this conference, we do not arrive right away—and that is infinitely probable—at complete solutions to all problems, we can nevertheless make a few beginnings that will justify a further meeting after a certain period of détente.

"But frankly, I do not think that this will occur at the time of President Eisenhower's trip to Moscow, for as I understand, this trip will take place in June. Our first summit conference will be in May and obviously we are not going to get together again after only a month has elapsed. If there is a future summit conference, it will be after much more time has intervened. This will be all to the good because that will give us more time, following the first conference, in which to reconsider the difficulties.

"But, while waiting until we are able to go on to a new meeting of the Four, if such a meeting is to take place, I remain convinced that bilateral contacts such as those that were established at the time of Mr. Khrushchev's first trip to Great Britain or during his trip to the United States, or his recent trip to France, or during Mr. Macmillan's visit to Russia, or President Eisenhower's forthcoming trip to Russia: all such contacts are good things in every way in the sense that they enable—I will not say for us to get to know each other (one seldom even knows oneself, still less does one always know others) but at least to meet together. And I consider that, in the general world situation, these contacts are very important."

Question: "I have two related questions, Mr. President. Do you believe Premier Khrushchev will precipitate a major crisis over Berlin at the summit if the Western leaders reject his demands, and most specifically, do you believe on the basis of your conversations with Mr. Khrushchev that he will sign a separate peace treaty with East Germany if the Western Allies refuse to accept his terms?"

NO PREDICTIONS

Answer: "I am not Mr. Khrushchev, and I cannot predict nor assume what will be the diplomatic tactics of the Chairman of the Council of Ministers of the Soviet Union. It seems to me that if the Soviet Union wanted to go on applying the threats that it had begun to make against the West with regard to Berlin, it would have done so. I note that it has not done so; as for the future, we shall see."

Question: "A fundamental question, Mr. President, Do you consider Khrushchev a man of good will or does it make no difference?"

Answer: "I have had the advantage of having personal contacts with Chairman Khrushchev recently, when he was in France. We have talked a great deal and at great length on all the subjects in which the world is concerned and even passionately interested at the present time.

"If you would like to know what I can say about the impression I drew from these contacts, I will tell you that Mr. Khrushchev seemed to me to be a strong personality. He is a man who has fought all his life for his ideas, and that has necessarily left a mark on him. Actually, I have the impression that at the level where he finds himself he realizes, and he has realized, that the problems of the world are perhaps less simple than one thinks when one considers them from a single point of view. Moreover, he is a man who is very knowledgeable on current problems, very well informed on people and things.

"In short, at the summit conference, I do not think the Soviet Union could be represented by a man who better expressed what Russia is today which, in my opinion—and this is my opinion—is no longer the Russia of yesterday, nor even the Russia of 10 years ago."

Question: "After this, Mr. President, I ask is a summit conference necessary?"

Answer: "The world has lived through many centuries without periodically holding summit conferences. However, it seeems to me that since the beginning of history at certain times, the states have felt a desire to gather their main representatives together in order to know each other better and to have discussions. The summit conference is nothing else than that. Once more in the history of man, it represents an attempt by those responsible to seek among themselves, if possible above and beyond the politics of the moment, an understanding between peoples. Personally, this is how I look upon this conference, and it is in this spirit that I am going to it."

Question: "Mr. President, this questioner says you have written in the past, that it is 'in the natural order of things, for Russia and France to be allies.' What is your present view?"

Answer: "As long as in Europe, in the center of Europe, there was a power that threatened to dominate Europe, quite naturally France and Russia drew together and, in grave moments, they were allies. They were allies in 1914 when the German Empire of Wilhelm II launched the attack and they were allies—unfortunately not right at the beginning—when the Second World War broke out. But they were allies by the force of circumstances after 1941 when Hitler's domination really seeemed to be about to spread all over Europe."

NO THREAT IN CENTER

"At the present time there is no threat in the center of Europe. Germany as it stands today threatens no one. France, in particular, does not feel the least bit threatened by the Germany of Adenauer, quite the contrary. And I do not think that Soviet Russia has any reason to feel really threatened by the Federal Germany of today. But what remains true is that there has never been, between the French people and the Russian people, at any time, any natural opposition, any litigation of a political nature.

"And perhaps that is one of the reasons why the presence of France and of the Soviet Union at the summit conference can be useful to the world as a whole; I do not wish in any way to exaggerate the immediate political bearing of sentiments of a general character."

Question: "Mr. President, how serious is the threat of communism in French politics?"

Answer: "I must say that personally I do not think that at the present time the Communists in France represent a threat that might influence French policy. There are Frenchmen who vote Communist. That is true. There are no more now than there were. In fact, there are even less. I see no reason why that should mean that the Communist Party has a part in the direction of French policy. French policy is exclusively French; I can answer for that."

FAVORITE POET

Question: "Mr. President, the curiosity of the press is all consuming. Who is your favorite French poet?"

Answer: "My favorite French poet is the one I am reading at the time that I am reading him. There are many whom I like and admire. I ask all of you for permission not to hurt the feelings of any of them—even those who have long been dead—by making choices."

Question: "Now, sir, could you give us more details on your plan for Soviet-Western cooperation for underdeveloped countries?"

Answer: "We are in a certain economic era, consequently in a certain social era. There can be no deeply rooted peace in our time without economic development. There are 2 billion men who are living in countries that are underdeveloped, very underdeveloped. In my opinion, fundamentally, and above and beyond all theories, all doctrines, and all systems of government, the great risk facing the world is to raise from poverty and start on the path toward economic development these 2 billion people who lack everything.

"There are several of us countries which, in reality, have sufficient means so that we lack nothing. There are differences between us civilized countries in Europe and in America. But in fact, we are among the wealthy, we have everything by comparison with other men who are more or less poverty-stricken. I think that it is essential for the countries of Europe and America, all the countries of Europe and America that are in a position to do so—Russia is one, America is one, France is one—to agree together at least on the beginnings of cooperation in this matter.

"We must not try to do too much or to think in too big terms. We must make a start. There must be certain areas, such as the development of the Nile Valley, or a campaign against tuberculosis in Asia—there must be areas in which it is possible for the powers that are well provided for to agree today and to pool a few resources in order to begin this development. I must confess that if they do this, it would certainly mean a great improvement in the atmosphere of the world and consequently in East-West relations."

Question: "Is the Common Market essential to the French economy?"

Answer: "I believe that the Common Market, which we are beginning to put into effect between six European states, is very important to the economic development of these six states, in particular for the development of France. This creation of the Common Market obviously raises certain problems for those who do not belong to it. And I may say that we certainly hope, we French in particular, that these problems be considered objectively as they come up.

"We know, moreover—that the United States—especially through the representation of Mr. Dillon—is taking part in the search for conditions under which the Common Market can thrive and grow without harming international trade with others and we are very happy about this. I believe that the future of the Common Market is assured. It corresponds to a reality, to an economic necessity and, to a certain extent, to a political reality and necessity.

"Moreover, without excluding anyone, it is ready to maintain with the other nations the best possible economic relations. There will be no tariff war; there will be no economic war. Of this, I am thoroughly convinced."

Mr. EDSTROM. Mr. President, the time is short, the questions are many.

Before we ask the final question we want to present to you the National Press Club

certification of appreciation, also the history of the National Press Club.

And, our final question is, sir:

"Will you accept the Washington Monument in an even swap or exchange for the Eiffel Tower?" [Laughter.]

President DE GAULLE. I think the American people wanted the Washington Monument to be in Washington, and as far as the Parisians, they are accustomed to see and look at the Eiffel Tower so it is better not to deprive them.

Mr. EDSTROM. Thank you very much.

President DE GAULLE. Thank you very much. Goodby.

ADDRESS BY UNDER SECRETARY DILLON BEFORE THE AFL–CIO CONFERENCE ON WORLD AFFAIRS

Mr. WILEY. Mr. President, as the Western nations prepare for the upcoming summit conference, it is important, I think, that every effort be made not only to create unanimity among the leaders of the Western Powers, but also to establish a broad foundation of public understanding for the proposals the West will be supporting at the conference. In a totalitarian nation, such as the Soviet Union, perhaps this is not so essential.

In our own country, however, we all well appreciate that, Congress—particularly, in considering mutual security or other programs relating to international relations—is responsive to the "voice of the people." Consequently, the public should be kept up to date, insofar as possible, on the thinking of our leadership, the challenges we face, and the overall design of our policies for protecting U.S. interests and promoting peace—which, of course, fundamentally affects us all.

Recently, Under Secretary Dillon, before the AFL–CIO conference, made a straight-shooting speech, crystallizing U.S. policy. Timely on the eve of the summit conference, the major foreign policy statement again expressed our willingness to first, stand against repeated attempts to coerce the West into further concessions; second, to seek a lasting solution to such outstanding problems as reduction of armaments, status of Berlin, German reunification, and other challenges; and third, reassert our willingness to go that "extra mile" if it will really serve the cause of peace.

I am well aware, of course, that today we have a crowd of "sidewalk superintendents"—in Congress as well as elsewhere—self-styled experts on just how foreign policy should be conducted.

It is the function of the executive department to spearhead that policy. Certainly, after the speech made today by the President of France, we should realize, as the President of France has realized, that in the big contest which lies ahead—as he expressed it—nothing will count more for France, and we can say it applies also to the rest of the world, than the wisdom, the resolution, and the friendship of the great people of the United States. He said it was for the expression of that friendship that he came to the United States.

Mr. de Gaulle is one of the great leaders of men in this age and generation. He has rendered a great service for his country, and as well, for this country.

Naturally, I respect the rights of all citizens—in political life or not—to express independent views.

Fortunately, there has been a substantial amount of bipartisanship on the fundamental goals of the conference.

As these suggestions are constructive, even though critical, analyses of our policies, they can, I believe, make a constructive contribution to better progress.

However, if these are merely "political sniping," then I think there is serious question as to their validity—not only in the proper exercise of citizenship rights, but in terms of presenting a unanimous front as we face the conference.

As I understand, Mr. Mikoyan, too, has expressed some displeasure at the realistic statement of policy by Under Secretary Dillon, outlining our objectives, as well as reaffirming our unwillingness to be pushed around by the Soviets.

Naturally, we are seeking maximum cooperation at the conference. I would hope, however, that the dissident views of Mr. Mikoyan would have no real effect on the Soviets coming to the meeting with a real desire to find a just and lasting solution to the involved problems.

Representing a fine crystallization of fundamental policy, as well as a clarification of objectives, I ask unanimous consent to have the speech by Under Secretary Dillon, as published in the New York Times, printed at this point in the RECORD.

The PRESIDING OFFICER (Mr. CASE of South Dakota in the chair). Is there objection?

There being no objection, the address was ordered to be printed in the RECORD, as follows:

[From the New York Times, Apr. 21, 1960]

ADDRESS BY UNDER SECRETARY DILLON AT AFL–CIO CONFERENCE ON WORLD AFFAIRS

The conference you have just concluded provides renewed evidence—if indeed any were needed—that American labor is conscious today, as never before, of the great efforts which our country must make in the never-ending search for peace.

American labor well knows that we can no longer think of our security as something apart, enshrined in a "Fortress America." American labor recognizes that we cannot continue indefinitely to enjoy our material well-being unless other peoples—particularly the underprivileged of the newly developing areas—also prosper. American labor is a truly influential force whose understanding and support of our international objectives are essential to their achievement.

I therefore welcome this timely opportunity to discuss three major aspects of our foreign policy:

First, our efforts to preserve the liberty and strength of the free world, and to resist the Sino-Soviet imperialistic drive.

Second, our efforts to keep the fierce and inescapable struggle to which we have been challenged by the Communist leaders from exploding into war.

Third, our long-range search for a world order capable of securing peace with justice and freedom.

SOVIET THREAT CONTINUES

Soviet power and determination to expand Communist influence throughout the world pose grave and continuing threats to peace. Despite constant talk of peaceful coexistence, there is no evidence that Communist expansionist ambitions have altered in the slightest. It is true that Soviet rulers now appear anxious to pursue their unchanging goals through nonmilitary tactics—through diplomacy, trade, economic aid, propaganda, and internal subversion. However, they remain confident that the totalitarian system shall prevail. Their present emphasis on nonmilitary measures does not mean that the struggle will be less intense nor the stakes less important. The primary issue today is nothing less than the survival of free men in a free civilization.

Meanwhile, the Sino-Soviet bloc maintains enormous military power, which reinforces its constant pressure upon the free world. The risk of armed conflict is always with us. We must mount a vigorous and continuing effort to contain that risk if peace is to be kept.

A first imperative is to maintain our military strength at a level which will insure that the Soviet leaders will never be tempted to unleash thermonuclear war against the United States or its allies. We have such strength today, and I can assure you that our present and projected defense programs will maintain and reinforce this essential strength.

NEED FOR PACTS STRESSED

Another imperative is to maintain and reinforce our collective system of defensive security pacts, involving nearly half a hundred nations and reaching the farthest corners of the globe. This collective strength is urgently required to deter the Communists from using local military force—as they did 10 years ago in Korea—to expand their empire. Its need is pointed up by the actions of the Chinese Communists in the Straits of Taiwan, their crime against Tibet and their recent military pressures on the borders of India.

So long as danger persists and there is no general and effective system of arms control, we and our allies must keep up our defenses. We must not be deluded by any superficial appearance of "détente" into relaxing these efforts.

But this is not enough. To keep the peace we must also try to establish rational communication with the Soviet Union. Despite undiminished Soviet ambitions, there is considerable evidence that the Soviets, like ourselves, are conscious of the dangers of the present situation and wish to reduce the risks of major war. We are seeking to verify this through negotiation.

Our immediate objective is to minimize the risk of war by miscalculation. Our ultimate objective is the removal of these dangers through settlement of outstanding issues and the creation of a stable world order. This, however, is a long-range goal which cannot be realized unless and until the Communist leaders abandon their imperialist ambitions.

OPEN-MINDED SEARCH

With these objectives in mind, we are engaged in the arms control conferences at Geneva and are preparing for the summit meeting next month in Paris. We are and shall be open-minded in our search for agreements which could alleviate the present dangerous confrontation—but without sacrificing those principles we deem to be right and just.

The central issue confronting the Soviet Union and the Western nations at the summit is the problem of Germany, including Berlin. No issue on earth today is more critical. It involves the immediate fate of two and a quarter million West Berliners and the ultimate destiny of about 70 million Germans. It bears directly upon the future stability of central Europe and the possibility of a lasting European peace. It represents a critical test of the integrity and dependability of the free world's collective security systems—because no nation could preserve

its faith in collective security if we permitted the courageous people of West Berlin to be sold into slavery.

It also represents a critical test of Soviet good faith in all areas of negotiation. For the goals of disarmament and the general improvement of East-West relations have no prospect of attainment if we find that the Soviet rulers or their East German puppets are prepared to use force or the threat of force in an attempt to isolate and subjugate West Berlin.

Finally, we must recognize that the issue of Germany and Berlin, if it cannot be resolved through negotiation, may involve the gravest of all issues: the issue of peace or war.

UNITY IS ULTIMATE GOAL

In the long run, the problem of Germany and Berlin can only be solved through German reunification. This the Soviets have so far rejected, fearing to put their rule in East Germany to the test of a free vote. But we cannot abandon our goal or abate our efforts toward its achievement, because we know that a divided Germany will remain a powder keg so long as the division persists.

Meanwhile, we are willing to consider interim arrangements to reduce tensions in Berlin and lessen present dangers. But we are determined to maintain our presence in Berlin and to preserve its ties with the Federal Republic. We will not accept any arrangement which might become a first step toward the abandonment of West Berlin or the extinguishing of freedom in that part of Germany which is a free, peaceful and democratic member of the world community.

It would be highly optimistic to pretend that prospects of an early agreement are bright. Mr. Khrushchev has had a great deal to say recently which bears upon Berlin and Germany, and his words leave the inescapable impression that the Soviet view of Berlin is far removed from the facts. Let us examine some of his comments:

He begins with the assertion that West Berlin lies "on the territory" of the so-called German Democratic Republic. This is not only false; it is contrary to the pledged word of the Soviet Government. While it is true enough that the Soviet-occupied portion of Germany surrounds Berlin, it is equally true that Berlin was given separate status under the occupation agreement, which the Soviets themselves formulated, together with the British and ourselves.

Moreover, the so-called German Democratic Republic is one of the outstanding myths in a vast Communist web of prodigious mythology. Its puppet rulers are totally under the control of Moscow. Despite tireless efforts to build a local Communist apparatus in East Germany, it is doubtful that these rulers could remain in power for a single day without the support of Soviet bayonets. The East German regime is not recognized as a government by any non-Communist nation. Both legally and as a matter of geographic fact, West Berlin is entirely independent of the so-called German Democratic Republic, and it will remain so.

Mr. Khrushchev continues to insist that Western forces leave West Berlin and that it be declared a free city. He ignores the fact that West Berlin is already a free city, the lone island of freedom within the boundaries of the sprawling Communist empire. When he speaks of making West Berlin a free city his meaning is only too clear; he desires West Berlin to be free from protection, free from security, free from its commercial and cultural ties with West Germany, and cut off from freedom itself.

Mr. Khrushchev has also complained that the situation in Berlin is abnormal. With this contention we can wholeheartedly agree. It is indeed abnormal when 1 million East Berliners are forcibly divided from more than 2 million fellow citizens in West Berlin, when they are constrained to live under a totalitarian regime unlawfully imposed by a foreign power, and when even family units are divided by an arbitrary boundary imposed in the name of a foreign ideology.

MANY VOTE WITH FEET

But the abnormal situation in Berlin is merely one facet of the greater abnormality created by the artificial separation of the East Zone from the remainder of Germany. The monstrous nature of this abnormality has been strikingly demonstrated by the fact that more than two and a third million East Germans and East Berliners have, during the last 10 years, exercised the only franchise available to them and have voted with their feet against Communist rule by fleeing to West Berlin and the Federal Republic.

The abnormality of which Mr. Khrushchev speaks can be cured only by permitting the whole German nation to decide its own way of life. The only practical way in which they can exercise this right is through free elections. Mr. Khrushchev and other Soviet spokesmen have often proclaimed their devotion to the principle of self-determination. This pretense is exposed as an empty gesture when they refuse to apply that principle to Berlin and Germany.

LEFT-OVERS LISTED

Mr. Khrushchev has also argued that we must move rapidly to liquidate the leftovers of the Second World War—among which he includes what he describes as the occupation of West Berlin by American, British, and French forces. We are even more anxious than Mr. Khrushchev to liquidate the leftovers of World War II. But Mr. Khrushchev must recognize that these leftovers are rather numerous:

Is the Soviet Union prepared to remove its forces from East Germany and the Eastern European countries on which they are imposed?

Is it willing to grant self-determination to the East Germans and to permit the peoples of the Soviet-dominated states in Eastern Europe to choose their own destiny?

Is it willing to abandon the fiction of a separate North Korea and to permit the entire Korean people to reunite under free elections supervised by the United Nations?

Is it at last willing to cease obstructing the operation of the United Nations Charter—to which the Soviet Union pledged itself in San Francisco—and whose application it has consistently frustrated by a series of vetoes in the Security Council?

The United States and its Western allies would be happy indeed to see these leftovers of World War II liquidated. But we are not prepared to begin this process by permitting the isolation and engulfment of West Berlin.

KHRUSHCHEV ON THIN ICE

We have repeatedly informed Mr. Khrushchev that we will not negotiate under duress. Yet in his recent statement about his intentions to sign a separate peace treaty with the so-called German Democratic Republic unless an East-West agreement is reached on Berlin he is skating on very thin ice.

We are approaching the summit with every intention of seeking a mutually acceptable solution of the German problem, including Berlin, of seeking just settlements of other international differences and of exploring ways to improve relations between the Western world and the Soviet bloc. Our positions are flexible, and we are willing to explore every reasonable avenue that may lead to agreement. But Mr. Khrushchev and his associates will be profoundly disillusioned if they assume that we will bow to threat or that we will accept their distorted picture of the German problem as a factual premise upon which to negotiate.

No organization has stood more firmly or been more helpful in the fight for the freedom of Berlin and all Germany than the AFL–CIO. It was in recognition of this fact that your president last December 7 received a high decoration from Chancellor Adenauer. As a government, we are proud to associate ourselves with Mr. Meany's statement on that occasion, and I quote. "Neither the freedom of West Berlin nor the freedom of the 50 million people of West Germany can be objects of international bargaining."

FREEDOM ALSO A GOAL

I have so far outlined those policies which we are pursuing in order to keep the peace. But this alone is not enough. We are energetically striving to advance the freedom and well-being of all the world's peoples. This is our program for victory—victory over want and misery in the period of intensified competition with communism that lies ahead.

Your executive council has well stated: "Hundreds of millions of people throughout the world live in abject poverty and are denied the essentials of political and spiritual freedom. Soviet imperialism continues to intensify and place increasing emphasis on attempts to exploit this poverty and injustice."

It is these underprivileged and newly developing peoples who are increasingly the target of Soviet policy. The Communist drive is far more than economic—it also involves political, psychological and cultural factors.

As free men, we have accepted the Communist challenge in the newly developing areas, confident that our society and principles represent the revolutionary dynamics of freedom that must ultimately prevail.

We must continue to carry the message of freedom and share its rewards with the less privileged peoples. Unless they can have hope for the future, their desperate poverty may incline them to Communist panaceas. We must continue to help them gain a stake in freedom. We must work with these peoples to build up their countries on the same basis of mutuality of interest that has guided the diverse groups in the United States in working together to build our great country.

The welfare of all the newly developing areas is a matter of deep concern to us. The position of our friends and neighbors in Latin America is of special importance, and I can assure you that we shall never take our southern neighbors for granted. We are sincerely interested in the advancement of the newly emerging peoples of Africa—and our concern is by no means limited to material progress. We are deeply sympathetic to the yearnings of the African peoples for dignity and equality.

It is our sincere hope that the United Nations Security Council resolution of April 1 which deplored current developments in South Africa and called upon the Secretary General to consult with the Government of South Africa, will prove to be effective.

I know that I do not have to appeal to you for support in our efforts to extend the blessings of freedom to all men everywhere. In the resolutions adopted by your convention at San Francisco last September, you called for "an expanded long-term and fully effective program of economic aid and technical assistance to the industrially less developed nations."

Your strong support of this program is most welcome. I know that you, like most Americans, look upon our mutual security program as a direct investment in our own future safety and well-being.

TASK FOR LABOR STATED

Private American groups—notably labor—are important in communicating the ideas and values of a free society. Great work has been done by the AFL–CIO both on its own and with the International Confederation of Free Trade Unions, in assisting free labor organizations in many parts of the world. This work has already made a vital contri-

bution to the development of peoples newly emerging into freedom and statehood.

Labor, as we know, has always been a major target of Communist subversion. With the increased emphasis which the Soviet Union has begun to place on economic penetration, the AFL–CIO and the free labor organizations abroad with which it is associated will be confronted with an even greater challenge in the years ahead. The new Communist competition is being directed very intensively at labor organizations in the developing countries.

The task of American labor in making its experience of economic advancement in a democratic framework understandable and usable to the newly developing countries is indeed a challenge which will increasingly require all the ingenuity and perseverance that it can muster.

Free labor is in an especially favored position to bring this message to the workers of the developing countries and to point up the illusory nature of the Communist appeal to achieve economic development at the cost of personal and national freedom. Free labor, I am confident, will continue to play a highly significant and constructive role in providing ideological leadership, technical guidance, and its rich experience in freedom in support of the legitimate aspirations of workers throughout the free world.

In our dealings with the peoples of the newly developing areas, we must always be aware that what we do here at home has a direct bearing on our success abroad. Our country projects its image to all peoples, for better or worse. They are impressed by what we do, rather than by what we say. If they see us dealing effectively with our own internal problems—economic, educational, racial, political—they will have the best answer to the Communist argument that only by imitating its own degrading, totalitarian methods can new nations achieve economic development and a high standard of living.

We can and must demonstrate through sustained economic growth that freedom works—that it, better than communism, can mobilize human energies and bring about equitable sharing of the fruits of labor. We can and must bury the Soviet myth that our system is decadent, while communism is the wave of the future.

We can do this—but only if we are deeply aware that our problems are world problems. We must realize that all we do or fail to do, here at home has a global impact and affects American interests throughout the world.

COEXISTENCE—SOVIET STYLE

We know what peaceful coexistence means to the Soviets. The Communist interpretation of peaceful coexistence is illustrated by their deeds as well as by their words. Even as they enunciate their doctrine, they proclaim in the same breath that the Communist system will ultimately absorb all other societies.

Meanwhile, they continue to direct a deluge of poisonous propaganda against neighboring states and to make pronouncements aimed at stirring up domestic controversies within those states. Their subversive agents and puppet political parties are active in nearly every country in the world. Their economic and trading relationships with other countries are designed not just to further legitimate trade interests, but as levers to increase their political influence and power.

This is peaceful coexistence—Soviet style—in action. We also know that to the Soviet Union peaceful coexistence even includes the use of military force whenever it suits their purposes, as in the brutal repression of freedom in Hungary.

Actually, the very phrase "coexistence" is both weird and presumptuous. Until the rise of such modern totalitarian systems as nazism and communism, the right of separate states and systems to exist was unquestioned. Coexistence has always been assumed to be a minimal condition of peaceful international relations.

COOPERATION STRESSED

But even this minimal concept of live and let live is totally inadequate in today's world. We must live and help live. What the world really needs is cooperation—a positive and vigorous cooperation through which all systems and societies can join hands in seeking solutions to pressing human problems.

The United States believes in the right of all peoples to choose their own beliefs and systems, with mutual tolerance and respect for one another. We are convinced, because of our own national experience, that diversity is as useful as it is inevitable—that human differences represent a vital fountainhead of human progress.

Let us therefore relegate to the scrapheap the concept of a transitory and uneasy coexistence, and seek instead to utilize the diverse attitudes and talents of all peoples to solve the age-old problems of poverty, disease, ignorance, oppression, and injustice. Let us cooperate affirmatively to develop the structure and tissue of a true world community.

ORDERLY COMMUNITY SOUGHT

Now, what is the goal toward which we are striving? What kind of world do we want to see eventually come into being?

We seek an orderly world community in which the danger of war is no more and where the rule of law allows man to safely devote his energies to the arts of peace.

In its preamble, the Western disarmament plan, which was proposed last month at Geneva, makes this clear. It sets as an ultimate goal a secure, free, and peaceful world disarmed under effective international control where disputes would be settled in accordance with the principles of the United Nations Charter.

To attain this objective the Western plan encompasses two parallel efforts: One to control and reduce armaments, the other to strengthen peacekeeping machinery.

The plan calls for progressive disarmament measures which must be mutually binding and adequately inspected.

As a practical beginning, we aim at arms control measures to reduce the risks of war by miscalculation and to end the unregulated diffusion of nuclear weapons. For many months negotiation about one such measure—a suspension of nuclear tests—has been underway. If it should be successfully concluded, a significant step toward limiting the further spread of nuclear capabilities will have been achieved.

But this is not enough. We further seek prompt agreement—and the sooner the better—on measures to reduce the risk of war by miscalculation, on safeguards against surprise attack, on measures to forestall weapons activity in outer space and on an inspected halt to the production of fissionable materials for weapons purposes. We recognize that such measures would not drastically curtail existing armed forces. But they would stop the arms buildup and would reduce the danger of global war.

FAR-REACHING STEPS SOUGHT

Once a lid has been placed on the presently accelerating arms race, we should push on to far-reaching measures of controlled disarmament. Armed forces should be reduced to levels required only for internal security and weapons of mass destruction should be eliminated. No nation or group of nations could then defy the organized will and purpose of the world community.

Parallel to the measures for safeguarded arms reduction, we aim for the development within the United Nations framework of a system of universally recognized international law, and of international machinery for the enforcement of such law and for the settlement of disputes arising under it. This would require an international force capable of deterring aggression. Certainly this Nation will not disarm across the board unless we are assured that an international body is in being to preserve the peace.

These, then, are the ways we seek to advance toward the ultimate goal of a more orderly world. The task will not be an easy one. A look at Chairman Khrushchev's disarmament plan, which constitutes the basis of the Soviet bloc position in the 10-nation disarmament conference, makes this clear. It is, in fact, not a plan at all, but a broad statement of objectives—Communist objectives. Arms control and reduction measures are covered in sweeping generalities.

No concrete provisions are made for verification and control arrangements. Nor is there any provision for policing the peace in a world devoid of arms.

QUICK SOLUTIONS RULED OUT

We Americans are impatient. We want quick, complete solutions. But no such solutions are available for today's international problems. Only a world assured of reasonable stability, order, and justice under law can serve the interests of our country and of all peoples.

Such a world cannot be built overnight. Yet unless we make progress toward it we may reach a point of no return. We shall strive toward its realization—through the U.N., through our disarmament negotiations, through other negotiations with the Soviet Union, through all the farflung efforts of our people at home and abroad in the fields of defense, of foreign trade and investment, of development assistance, of cultural relations, of personal contacts and diplomacy.

To succeed, we will need to do more in all these fields. It is only through our united efforts as a nation that we can hope to advance our best interests in the era of rugged competition that lies ahead.

UNITED STATES HAS NO ALTERNATIVE

We are now engaged in a deliberate effort as a nation to influence the forces of history on a worldwide scale. Ambitious though such a task may be, we have no alternative. For unless the rapidly changing world environment is shaped toward a new era of general freedom and prosperity and of universal order and law, neither the United States nor any other free nation can live safely—or perhaps even survive.

Our awareness of these truths drives home a sobering realization of what is required of each one of us. Our national achievement can be only the sum total of our accomplishments as individuals. The Government at Washington has no power or capacity independent of the people who make up this Nation.

This is no time for easy living, for lax standards or for personal pursuit of material benefits at the expense of the Nation's interest. I appeal to all Americans to demonstrate again that revolutionary zeal and ardor that won our independence, that saved our national unity, that drove Americans on to conquer the wilderness and create a great civilization. We are called upon today, almost literally to help create a new world.

This is a task to inspire all Americans and enlist their dedicated efforts, today and in the years to come.

UNREALISTIC LIMITATIONS ON EXTRA EARNINGS ALLOWABLE UNDER SOCIAL SECURITY

Mr. WILEY. Mr. President, as we know, the social security program, a free-system experiment in providing economic security, to a degree at least,

for the aged, disabled, surviving widows and children, and others, is helping to brighten the daily lives of more than 14 million beneficiaries throughout the country.

We recognize, of course, that, as a program developed under a free system, there are still differing views on the merits of this approach to fulfilling a social and economic obligation to our people.

Whatever its shortcomings, however, the program has been integrated into our system and now exists as one of the broadest pieces of welfare legislation in our history.

Over the years, the social security laws have been expanded, liberalized, or otherwise modified to help meet the needs of our citizens.

With an ever-expanding population, as well as increasing costs of living, there is a real need to make an extensive review of the system and its benefits.

Particularly, I believe, there is one glaring deficiency in the program—that is, the unrealistic limitation on extra earnings allowable to persons now receiving benefits.

Currently, those on a regular job are restricted to $100 a month income, or a total of $1,200 annually. We realize, of course, that there is difficulty for folks in the upper age brackets to find jobs. In those instances in which jobs are available, and the individuals are ready, willing, and able to work, however, I believe they ought not to be hamstrung, in their efforts to maintain economic independence and a better standard of living, by unrealistic limitations in our laws.

Earlier this session I introduced a bill, S. 2809, which would authorize an increase of extra earnings under social security from $100 a month to at least $150, or $1,800 annually, on a regular pay basis.

Frankly, I feel the proposal has real merit, and should be enacted by Congress.

I would hope, therefore, that our colleagues on the Finance Committee, before which this bill is pending—as well as the Ways and Means Committee in the House of Representatives—would find it possible to act on such legislation as quickly as possible, so that the bill could become law during this Congress.

I would, of course, be most happy to see the ceiling lifted further, if Congress saw its way to accomplish this merited goal.

Recently, the Janesville Daily Gazette of Janesville, Wis., published a thought-provoking editorial on this problem, entitled "Limit on Earnings," reflecting the need for change in this specific provision of our social security program. I request unanimous consent to have this editorial printed in the body of the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

LIMIT ON EARNINGS

Of the many defects in the social security retirement system, the chief one is in the inconsistent aims. Wage earners and others covered by it complain that the checkoff price is too high for prospective benefits, while retired persons complain just as loudly that the pensions it provides are too small for even subsistence living.

Social security calls itself insurance, and includes that word in its official title. But it has no policies with those who expect to collect from it, the rates of taxes it charges are changed from time to time (usually upward), and the benefits are often changed too. It has no reserves other than IOU's from the Federal Treasury.

That it is a social experiment rather than insurance is best shown by the limitations it places upon earnings of beneficiaries. No insurance company, having collected its premiums, cares a hoot how rich or how poor its policyholder may be, or what his income may be. It is no part of insurance to make inquiry into the needs of the individual policyholder before paying him.

This is very much a part of social security, however. If a retired beneficiary earns more than $100 in a month, or has an annual earned income of $2,080, he loses his social security payments. The provision is a hold-over from the depression of 30 years ago, and the objective was to force persons over 65 years of age into retirement. It was aimed at the then-existing unemployment situation rather than insurance for the retired.

Strangely enough, this limitation has been retained right up until now, and with unwholesome results. Many persons over 65 have had to make the unhappy choice of continuing to work or of retiring to a pension which would give them idleness at poverty levels. Worse still, the system has robbed the country of the labor of these older persons, some of them with special talents, and others who would be much in demand for the numberless jobs and chores which full-time wage earners find so burdensome when they must do them for themselves.

In fact, the supply of odd-job men and the partly retired who used to be available for many tasks has all but disappeared. Older women, who likewise would aid a housewife for a day or two, or a week, cannot be had anymore. If they work, they cannot get social security, and they are either unable or unwilling to work on a full-time basis.

What is the obvious way to relieve the pressure for higher payroll taxes and to increase the income of retire persons? The answer: Allow older persons to supplement their social security pensions. Earnings, if they are sufficient, would provide a modest additional Federal tax revenue. The change would increase the spendable income of older persons to the profit of business and industry; it would make retired persons happier and perhaps healthier; and best of all, would make available extra needed help to ease the burdens of the wage earners, and thus give him something now for the payroll tax he is paying.

PRESIDENT DE GAULLE'S SPEECH STRENGTHENS UNITED STATES-FRENCH RELATIONS

Mr. WILEY. Mr. President, the American people and the free world, I believe, can rejoice at the spirit of friendship, good will, dedication to free-world progress and opposition to Communist expansion which President de Gaulle of France today conveyed to the people of the United States.

Looking into the future, De Gaulle, realistically, I believe, recognizes the need for a strong coalition, closely integrated by interests and geography of the Western European nations, to counter the Eastern European bloc under Communist domination. At first, this is envisioned as the establishment of two zones for equilibrium on the European Continent. Ultimately, it would be hoped for a reconciliation between the interests of the two zones.

Only time and events, of course, can prove or disprove whether these desired objectives will become reality.

The speech, I believe, again reflected two of President de Gaulle's major objectives: First, great dedication to cooperation with the Western Allies in finding ways and means to establish a more peaceful climate in the world, and second, assuring to France a strong voice in the Western coalition.

During his tenure of service as President, De Gaulle has brought to his beloved homeland a new stability, unanimity of interests among the French people—himself a solid-rock foundation—and consistency of its domestic and national policies. As is the case with all lands, France, too, has extremely difficult problems to resolve.

In attempting to strengthen the Western coalition of nations, particularly in NATO, we recognize that the strongly independent policies of De Gaulle have sometimes been problematic.

However, we must recognize that such problems are far less serious than would be a vacillating, unstable, unpredictable role of France under a less strong government and able leader. Within this framework of understanding, I believe, President de Gaulle has made a significant contribution to better understanding by the American people of French thinking on Western policy.

Moreover, he has made a restatement of traditional United States-French friendship, dedication to liberty, history of cooperation, and readiness to stand shoulder to shoulder to face threats by the Communist bloc, as well as to work together to promote mutual progress and peace.

SENATOR RUSSELL'S LEADERSHIP

Mr. HILL. Mr. President, RICHARD B. RUSSELL, of Georgia, has long known the respect and admiration of his Senate colleagues. He has always stood tall as a knowledgeable and able Senator, and he is loved and admired as a friend and as a warm human being by all who have had the privilege to know and to work with him.

Throughout the recent prolonged debate over the so-called civil rights bill, no Senator served the southern cause more valiantly or more effectively than did the senior Senator from Georgia. He was our leader and our chieftain.

In spite of the depth of feelings stirred by the civil rights debate and in spite of Senator RUSSELL'S exposed position in the very forefront of the battle, he emerged from this battle without his stature having been diminished in the eyes of any man.

He did, in fact, earn for himself, and for the principles to which he gives such eloquent voice, still greater stature in the eyes of the Senate, the press, and the Nation.

This new luster to the name and to the reputation of DICK RUSSELL, so dearly won and so righly deserved, is well dem-

onstrated in stories appearing in the New York Times and the Washington Evening Star, two of our Nation's great metropolitan newspapers. Mr. President, I ask that these news stories be printed at this point in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Star, Mar. 8, 1960]

FILIBUSTER'S GRAY GHOST—RUSSELL IS SILENT GENERAL

(By Mary McGrory)

Every day about noon, Senator RUSSELL, Democrat, of Georgia, steps onto the Senate floor, tastes the weather in the aisles, speaks to a confederate or two and strolls out.

Entrance and exit are equally well regarded by his southern colleagues, one of whom is inevitably somewhere in a 4-hour oratorical effort during the visit of the supreme commander of the Dixie forces.

His people do not wish the Senator to lose any sleep making speeches no one will listen to. They want him to save himself for the strategic parliamentary questions that lie ahead.

Sharp-witted, sharp-tongued and suave, Senator RUSSELL is the brains of the southern movement, the gray ghost of the filibuster. Largely invisible, he is available at all times. He has a hideout in the Capitol, where he can be reached in moments of stress. Every morning, he calls one of the captains of his three teams, ELLENDER of Louisiana, HILL of Alabama, or STENNIS of Mississippi.

Senators ELLENDER and HILL have five men apiece; Senator STENNIS has only four—THURMOND, of South Carolina; SPARKMAN, of Alabama; TALMADGE, of Georgia; and LONG, of Louisiana.

"They are all distance people," says Senator RUSSELL of the small team. "All of them can go 6 or 8 hours."

Every one of the southern band is in what Senator RUSSELL calls mighty fine shape. They all have 24 hours on duty and 48 hours off. Unlike the northern Democrats and Republicans who are routed out of bed all through the night to make up the quorum of 51, they can sleep in their own beds.

Senator RUSSELL feels that a quorum call every 4 hours is about right. In the dead of night, a man can just about get to sleep before the bells wake him up.

"They have made it exceedingly disagreeable for us with this round-the-clock session" says the Senator, "so I have no compunction about making it tough for them."

In spite of this, the southerners so far have escaped the wrath of their groggy colleagues. They have spoken to the point. They have not made any personal attacks. They have limited themselves to needling New York's two liberal Republican Senators, KEATING and JAVITS, about Puerto Ricans who do not have the right to vote. This inflames no one especially; New York is considered a big, tough State able to take care of itself; and anti-Manhattanism is generally considered a worthy prejudice elsewhere in the country.

In addition, they draw freely on the good will of their colleagues. Senator STENNIS is forgiven much by liberals for the leading role he played in the censure of the late Senator McCarthy; Senator HILL is a hero in health and education circles; Senator ERVIN, the kindly jester of the South, causes the word "laughter" to be written in the CONGRESSIONAL RECORD more than any other man.

They fall heir to other benefactions. Senator KEATING'S suggestion for putting a sturdy Yankee on the floor in the midwatch, eliminating quorum calls, charms them. This would also spare the southerners, and Senator RUSSELL said he would be all for it. The less tired the Senate gets, the less likely it is to invoke cloture.

LIBERALS HELP

Aid and comfort also comes from liberal Democrats who would never vote with them, but who make long speeches on other subjects and thus give them an extra few hours of repose every day. Senator MAGNUSON, Democrat, of Washington, gave a talk on oceanography yesterday. Senator HUMPHREY, Democrat, of Minnesota, was to discuss disarmament today.

"That's one of the glories of the Senate," says Senator RUSSELL with a certain complacency. "There is nearly always something a man feels he has got to speak about."

This southern way of life could be ended abruptly by a cloture vote. But the southerners observed with a certain amusement that the one real flareup of the present siege came when Senator MORTON, Republican, of Kentucky, tore up the cloture petition of Senator MORSE, Democrat, of Oregon. This has given them reason to believe that there is a great pride of authorship involved and that when it comes to getting a cloture petition there will be as much of a fight for credit as there is a scuffle for beds in the Senate gymnasium these nights.

[From the Washington Star, Feb. 29, 1960]

HEADLINE PERSONALITY—RUSSELL LEADS SOUTH QUIETLY, EFFECTIVELY

As the sound and fury of the civil rights debate begin, southerners once again are turning to a quiet-spoken, courtly Georgian for leadership.

RICHARD BREVARD RUSSELL is an old hand at leading the South against the assaults of the North and West. He's been doing it since 1935, when he headed a successful filibuster against an antilynching law.

DICK RUSSELL'S leadership is not marked by thunder and invective. He doesn't resort to the flowery phrase or colloquialisms.

Instead, Georgia's senior Senator relies on more subtle—and effective—techniques. The advice he gave southerners preparing for the 1957 civil rights fight applies equally today.

"We've got a good case on the merits," he said then. "Let's keep the argument germane. Let's see if we can keep our speeches restrained and not inflammatory."

EMPHASIZES STATES' RIGHTS

DICK RUSSELL represents one of a long line of southern Senators—the gentleman lawyer in politics. He earnestly believes that the various civil rights bills against which he has fought have been designed to destroy the traditional social order of the Southern States.

The issue, as he sees it, is not Negro rights but the rights of the States to maintain their sovereignty.

"I'm as interested in the Negro people of my State as anyone in the Senate," he once said. "I was brought up with them. I love them. But I know what's going to happen if you apply force—there'll be violence."

Although Senator RUSSELL is retiring to the point of shyness, the tall, sharp-featured southerner has the ability to express cold, outraged indignation.

When President Eisenhower ordered Army troops to Little Rock's Central High School, the Georgian fired off a bitter telegram to the President. The soldiers, he said, were disregarding and overriding "the elementary rights of American citizens by applying tactics which must have been copied from the manual issued to the officers of Hitler's storm troopers."

And once he accused President Truman of planning an FBI "gestapo" to break down racial segregation in the South.

HEADED MAC ARTHUR HEARINGS

In his 27 years in the Senate, RICHARD RUSSELL has risen to a position of great influence. When he speaks, the Senate listens. When a job of tact and diplomacy is required, Senator RUSSELL is the man to whom his colleagues turn.

Thus it was that Senator RUSSELL was chosen to preside over the joint Senate committee which investigated the controversy surrounding Gen. Douglas MacArthur's dismissal in 1951. His judicious handling of the hearings brought praise from all factions.

And during World War II Senator RUSSELL was selected to head a five-man committee which made a 37,000-mile tour of the battlefronts to get a firsthand report on the progress of the war.

Senator RUSSELL was born November 2, 1897, in the small town of Winder, Ga., 40 miles northeast of Atlanta. He was brought up with his six brothers and six sisters in the way of the Old South—industry, honesty, gracious manners, and public service.

His father rose from a struggling country lawyer to become chief justice of Georgia.

The future Senator received his law degree from the University of Georgia in 1918. After a year of service in the naval reserve during World War I, he opened his own law office in Winder. Then in 1921 he made his entry into politics, winning election to the Georgia Assembly.

After 10 years in the legislature—4 years of which he served as speaker—DICK RUSSELL was elected Governor. At 33 he was the youngest chief executive in the State's history.

BACKED NEW DEAL

Governor RUSSELL hauled out the economy ax, first chopping off $3,750 a year from his own salary, and cutting State departments and bureaus from 102 to 17.

Then in 1932 at a time when his political future was uncertain—Georgia Governors do not succeed themselves—he was elected to the Senate.

He supported Franklin Roosevelt's New Deal, voting for social security, NRA, and TVA.

As his stature increased, Senator RUSSELL became the recognized leader of the Southern States. He received 263 votes for President at the Democratic National Convention in 1948, but he refused to join the Dixiecrats in their walkout over the civil rights plank in the platform. In 1952 he picked up 292 votes as the South's presidential choice.

Today Senator Russell, a bachelor, lives quietly in his Washington apartment, planning the strategy which he hopes will lead to success in the battle over the race question.

[From the New York Times, Mar. 2, 1960]

RUSSELL HARDENS SOUTHERN FILIBUSTER STAND ON VOTING RIGHTS

WASHINGTON, March 1.—A thin gray line is once again deployed against superior forces to resist what the Old South regards as an unwarranted assault on its way of life. The field general again is a man whose dignity, integrity and high principle are recognized even by his opponents. An eloquent spokesman for the southern cause, he is also a master of tactics and strategy and a much respected, even beloved, adversary.

RICHARD BREVARD RUSSELL, of Georgia, the leader of Senators now engaged in a filibuster against civil rights legislation, is perhaps better aware than the Confederate commander of a century ago, Robert E. Lee, that the South cannot stop the march of history.

Yet he fights on in saddened hope—not of preventing further Federal intervention in the social customs of his region but of limiting and delaying it as much as possible.

The 62-year-old Georgian commands a force weakened by age and defections. Eighteen Senators, at most, can be counted for unstinting duty. Their average age is 59.8 years. Two of the Confederacy's 11 States, Tennessee and Texas, are no longer

battling with the rest. At least two Senators from the others may break ranks when the showdown comes.

"Our ranks are split," Senator RUSSELL painfully concedes. "There is no longer any solid South in Congress."

Moreover the Democratic leader, Senator LYNDON B. JOHNSON, of Texas, has moved a step further toward the enemy camp, possibly with an eye on the White House.

A LOST CAUSE

Against such odds, the southerners' only real hope is to shape the legislation so that it will not be totally obnoxious to them.

For Senator RUSSELL, a crushing defeat could destroy the vestiges of power and prestige that he once held as a national figure and seriously impair his effectiveness as a regional force on the Washington scene.

The pity of it, according to many of those who are alined against him on the civil rights issue, is that the country should be deprived of Senator RUSSELL'S ability, courage and other qualifications of national leadership because of his devotion to a lost cause.

The post of Senate Democratic leader was his for the taking in 1953, but he preferred Senator JOHNSON for the job.

"I'm more concerned with my own thinking than with the Democratic Party nationally," he explained.

The remarks perhaps reflected the deep disappointment that he felt over his failure to win the Democratic presidential nomination in 1952. Mr. RUSSELL had seriously sought the nomination in what appeared even to his friends to have been an uncharacteristic flight into fantasy. No realistic politician believed that a southerner could win it.

All the time, Senator RUSSELL'S national prestige was at a high point, largely as a result of his masterful direction in 1951 of the explosive, 8-week Senate investigation of the removal by President Truman of General of the Army Douglas MacArthur from his Far East commands.

His standing in the Democratic Party had been enhanced by his consistent refusal over the years to participate in Dixiecrat or other vagrant movements. He received 294 convention votes for the presidential nomination.

A REGIONAL INFLUENCE

As chairman of the Senate Armed Services Committee, Mr. RUSSELL still exerts a profound, always nonpartisan influence on defense policy. Otherwise, however, his sphere of power in public affairs has become largely regional since 1952.

His sharp intellect and mastery of parliamentary intricacies show no signs of impairment. Nor does his oratory, a classic example of the table-thumping yet highly literate style of a waning Southern school.

The tendency toward overstatement and the vehemence of his speech are likely to give a misleading impression of the man. Away from the stump, Senator RUSSELL is a quiet, gracious, almost diffident person.

A bachelor, he maintains a small apartment in Washington and shares a rambling old frame house at Winder, Ga., his birthplace, with a widowed sister, Mrs. Jean Stacy.

Reading history—he calls himself "a Civil War buff"—and watching western movies on television are his chief methods of relaxation. He also maintains close ties with a large family of brothers, sisters, nieces and nephews and is frequently the host at reunions.

Senator RUSSELL comes from an old Georgia family long identified with the State's public life. He was the fourth of 15 children of Richard B. Russell, Sr., chief justice of Georgia, when he died in 1938, and the former Ina Dillard.

The younger RUSSELL entered politics soon after winning a law degree from the University of Georgia at Athens and served in the Georgia House of Representatives for 10 years. He was elected governor in 1931 at the age of 33. He has been a Member of the Senate since 1933.

THIRD MEETING OF CANADA-UNITED STATES INTERPARLIAMENTARY GROUP

Mr. AIKEN. Mr President, for myself, the Senator from Illinois [Mr. DIRKSEN], the Senator from Montana [Mr. MANSFIELD], the Senator from Idaho [Mr. CHURCH], and the Senator from South Dakota [Mr. CASE], I submit a resolution and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated for the information of the Senate.

The legislative clerk read as follows:

Resolved, That it is the sense of the Senate that the exchanges of views which took place last week between twenty-four members of the Canadian Parliament and twenty-four Members of the United States Congress:

First. Served to promote further the basic understandings which exist between the peoples of Canada and the United States;

Second. Served to strengthen the bonds of friendship between these peoples; and

Third. Served to emphasize once again the unity of purpose, the unity of thought, and the unity of spirit with which Canada and the United States seek to promote peace and freedom throughout the world.

Resolved further, That the Secretary of the Senate transmit this resolution to appropriate officers of the Canadian Parliament.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. AIKEN. Mr. President, this resolution is the result of a very successful meeting between Canadian parliamentarians and 24 Members of our own Congress during the last 3 days of last week. At these conferences which we had with the Canadians, all matters of possible controversy were explored and a better understanding reached in all cases. All matters of mutual concern were discussed, and plans were made to cope with problems which have not yet arisen but which may well affect our two countries should they arise.

The success of this conference was due primarily to the utmost of cooperation on the part of all those who did their best to make it such a success.

I wish to express my appreciation at this time to Mrs. KELLY, the chairman of the House group, who did yeoman service in making this conference the success I believe it was; to the members of her group from the House of Representatives; to the Senator from Montana [Mr. MANSFIELD], the Senator from Wisconsin [Mr. WILEY], the Senator from South Dakota [Mr. CASE], who is now the present occupant of the chair, the Senator from Idaho [Mr. CHURCH]; and to all the other members of the U.S. delegation, who performed their work faithfully and contributed very greatly to the better understanding between the legislators of our two great countries which has resulted.

Mr. President, I also wish to thank the 75 or more other Members of Congress, who, although they did not take part in the discussions, nevertheless made it a point to come around and get acquainted with the Canadian members, thus contributing to the good will which exists between our two legislative bodies.

The members of the Canadian House and Canadian Senate, under the leadership of Speaker Mark Drouin of the Canadian Senate and Speaker Rowland Michener of the House of Commons, were cooperative in the extreme.

Mr. President, I also wish to thank those persons connected with our own executive branch of government who helped us with arrangements and who did other things to make this meeting pleasant, as well as a profitable and constructive one.

I also wish to thank the members of the staffs of the House of Representatives and of the Senate, who worked on the arrangements which made the conferences held on Thursday and Friday such instructive occasions. Later the Canadians were accompanied by some of the House Members to the SAC base at Omaha and the Norad Base at Colorado Springs, and the work of the staff members contributed substantially to the success of the trip.

Finally, Mr. President, I ask unanimous consent to have printed at the conclusion of my remarks a joint press statement which was issued at the third meeting of the Canada-United States Interparliamentary Group.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

THIRD MEETING OF CANADA-UNITED STATES INTERPARLIAMENTARY GROUP—JOINT PRESS STATEMENT

The Canada-United States Interparliamentary Group, composed of 24 members of the Parliament of Canada and 24 Members of the Congress of the United States, today concluded 2 days of discussion on matters of common interest in the two countries.

The group continued its procedures of having informal, off-the-record discussions and refrained from making recommendations, leaving it to each national delegation to make such reports and recommendations to its respective authorizing institutions as it determines.

The group met in plenary sessions on Thursday morning and Friday afternoon and held two sets of committee meetings on Thursday afternoon and Friday morning. Committees discussed the following subject areas: (1) Defense cooperation and disarmament; (2) Boundary problems; and (3) Economic problems of common concern.

The committee on defense discussed certain aspects of defense policy, and the use of North American productive facilities for defense purposes, which have implications of mutual importance to the United States and Canada. The committee also discussed the prospects for disarmament and the need for planning that will facilitate an orderly transition from military production to production for peaceful purposes, including public works.

There was general agreement that while seeking with all vigor for an understanding with the Communist bloc based on mutual trust and confidence, the West must maintain adequate defenses until the Soviet camp accepts an inspection and control system of sufficient scope and efficiency to

justify the commencement of active measures of disarmament.

The committee considered the changing character of the threat to North America and the effect of this on the operations of the North American Air Defense Command (NORAD). It was recognized that in addition to the military problems which will have to be faced during the next few years, the adoption of new weapons systems and concepts of defense will cause local economic readjustments which in some areas may be severe.

The committee noted that during the last year there had been considerable progress in the program of defense production sharing between the United States and Canada. This was reflected in the fact that Canadian industry in 1959 received U.S. defense contracts valued at $96.3 million; it was noted, however, that Canadian defense equipment purchases in the United States in the same period amounted to $116.6 million. The Canadian members of the committee expressed the view that the progress achieved to date was in no small measure due to the consideration given to the problem by the Interparliamentary Group at its meeting in June 1959. There was general agreement that a continuing effort was needed in both countries to achieve and maintain an adequate balance in defense purchasing between Canada and the United States.

After deciding which subjects should be discussed, the boundary problems committee came to the following conclusions, which it approved for transmittal to the plenary session:

1. Passamaquoddy tidal power project: It is important to determine whether the Passamaquoddy project is economically feasible. Meanwhile, judgment should be reserved awaiting further studies by the International Joint Commission. The committee feels that this topic should be retained on its agenda.

2. Hudson-Champlain-Richelieu Waterway: Now that the St. Lawrence Seaway is in operation the two Governments should consider referring to the International Joint Commission the question of the economic feasibility of further development of this waterway, taking into account the possible increase in trade between Canada and the United States which might result.

3. Columbia River Basin development: The Canadians welcomed statement by U.S. delegates that no particular project of interest to the U.S. delegates should be allowed to stand in the way of a treaty on this subject based on the principle of optimum development of the Columbia River Basin with mutual sharing of the benefits. Once this principle has been adopted by the two Governments particular projects will fall into their appropriate order.

4. Chicago diversion: This subject was again thoroughly and vigorously discussed and no change of the positions of the respective delegates emerged. The Canadian delegation appreciates the waste disposal problem facing Chicago.

5. Pollution in the Great Lakes: Both delegations expressed concern about increasing pollution both from lake cities and shipping. It was agreed that it would be useful for the two Governments to study remedial measures.

6. Yukon-Alaska problems: Canadian delegates expressed concern that a proposed high dam at Rampart, Alaska, may prejudice maximum development for the benefit of both countries of the Yukon River power potential. Canadian delegates raised the questions of some form of free port facilities for Canada in the Alaska Panhandle and corridors across it. U.S. delegates suggested that additional information about these matters be furnished to them before the next meeting of the group and that they be placed on the agenda for the next meeting.

The economic problems committee approved the following summary for transmittal to the plenary session.

1. Common trade problems, especially with Western Europe:

The committee agreed that economic progress abroad and the changing pattern of trading relations in Europe were creating new opportunities and serious problems for Canada and the United States. It was recognized that the interests of our two countries diverged to some extent in the face of these developments, partly because of political considerations and partly because of the greater dependence of Canada on international trade and the narrower range of its exports.

The merits and demerits of solutions based on different methods of computing tariffs and of tax relief were briefly explored. No firm agreement was reached concerning the respective cases for the Inner Six and Outer Seven, but a consensus did appear on the need for the United States and Canada to cooperate closely and to work toward new arrangements with their European allies on a North Atlantic basis.

2. Bilateral problems:

(a) The Canadian oil problem: Attention was drawn to the difficulties being experienced in the Canadian oil industry (particularly in Alberta) due to lack of markets for increasing oil supplies. Canadian delegates described various possible solutions, notably that of increasing domestic consumption, recognizing that some of these have foreign policy implications. Reference was also made to recently issued Canadian regulations governing oil and gas exploration in the Yukon and Northwest Territories.

(b) Metals and minerals: The committee recognized the intimate and important relationship between United States and Canadian production and markets for such commodities as lead and zinc, aluminum, copper, nickel, and uranium.

A U.S. delegate described the depressed lead and zinc condition in his country and foresaw no significant change in conditions over the near future in respect of either production or importation.

The delegates then considered the uranium and aluminum situations. In view of recent developments, the discussion on uranium was mainly in terms of the prospects which might emerge in a few years time, which did not now appear very auspicious for producers. On the other hand, the outlook for aluminum was regarded as more promising.

A U.S. delegate drew general attention to the increasing significance of Latin American markets for both Canada and the United States, and to the implications of prospective competition from expanding Latin American production of commodities such as oil, gas, and iron ore.

(c) Wheat: There was considerable detailed discussion of the surplus wheat problem confronting both the United States and Canada. No new approach was advanced for the problem, and there was general agreement that current arrangements, unsatisfactory though they might be, were still the best available in the existing situation. Both delegations were anxious to insure continuing close bilateral consultations in order to avoid damage to established foreign commercial markets; Canadian delegates expressed their gratification at the way in which this consultation had developed.

At the first plenary session, U.S. Secretary of State Herter welcomed the Canadian delegates and wished the meetings success. In the plenary sessions recommendations by delegates from both countries laid stress on the necessity for the people of each country to learn more about the other. The suggestion was made that the educational systems in the United States and Canada might well take account of this need.

The Canadian delegation extended an invitation to the U.S. delegation to visit Canada sometime during the month of August 1960, and to visit industrial and mining areas.

On Saturday and Sunday, the group will fly to the U.S. Strategic Air Command headquarters at Omaha, Nebr., and to the Joint Canada-United States Air Defense Command at Colorado Springs, Colo., to receive briefings and make inspections at these installations, and will return to Ottawa and Washington Sunday evening.

These meetings of the Canada-United States Interparliamentary Group help to promote a unity of purpose, a unity of thought, and a unity of spirit, to the end that our western way of life and government is preserved for future generations.

Mr. AIKEN. Mr. President, I move the adoption of the resolution.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. AIKEN. I yield to the Senator from Montana.

Mr. MANSFIELD. Mr. President, has the resolution been agreed to?

The PRESIDING OFFICER. Not yet.

Mr. MANSFIELD. Mr. President, I wish to join with the distinguished Senator from Vermont in what he has said about the success of the Canada-United States Interparliamentary Group third meeting. I think great credit is due to the comprehension and the understanding shown by the Canadian parliamentarians under the leadership of Speaker Mark Drouin of the Canadian Senate, and Speaker Roland Michener of the Canadian House of Commons.

The knowledge, the understanding, and the grasp of affairs of common interest were, I think, excellent, if not remarkable, on the part of the Canadian delegation. They added a great deal to our understanding of them. I hope, in return, we added something to their understanding of us.

Mr. President, I recall the last meeting, the dinner marking the end of the conference. The thought crossed my mind that there are no other two countries in the world which are so closely and inextricably bound together as are Canada and the United States.

I believe that special credit, from the U.S. point of view, should go to Representative EDNA KELLY, who performed her job with skill and elan, and who participated actively in all the conferences.

So far as we in the Senate are concerned, we were especially fortunate to have as our chairman the outstanding senior Senator from Vermont [Mr. AIKEN], who has shown such an active interest in these affairs, and who has contributed, to my personal knowledge, of his time and money in an attempt to bring about a closer entente between our two countries. I think we are extremely fortunate to have a man like the Senator from Vermont, with his broad vision, common sense, and feet-on-the-ground attitude, directing the Senate portion of the American group in these most worthwhile proceedings.

In my opinion this was a very successful meeting between the Canadian and American parliamentarians. To Speaker Michener and to Speaker Drouin and their colleagues, I extend

congratulations on a job well done, a friendship well deserved and highly treasured, and a comradeship we are all privileged to enjoy. As Americans, we feel just like Canadians.

Mr. DIRKSEN. Mr. President, I think it should be recognized that an activity such as participation in the interparliamentary union between the two countries is entirely extracurricular, and therefore is voluntary on the part of those who are willing to accept these assignments. I have always been delighted that these assignments have been accepted with the utmost willingness, and I pay particular tribute to the distinguished senior Senator from Vermont, who has spent much time and who has devoted his energies and talents to making these meetings a success. I think that can be said also of every other member who represented the Senate. So I am delighted indeed that out of these conferences has come such a fruitful result.

Mr. AIKEN. Mr. President, I thank the Senator from Montana and the Senator from Illinois for their comments, but I wish to emphasize that this was a cooperative enterprise, and that everyone connected with it should share equally in whatever credit may be due for the success of the conferences. I wish to include the Senator from Idaho [Mr. CHURCH], whom I now see on his feet, and to whom I am glad to yield.

Mr. CHURCH. Mr. President, as one of those who participated in the recent interparliamentary conferences, I wish to associate myself with the remarks so ably made by the distinguished Senator from Montana and the distinguished minority leader, and to extend my personal thanks and congratulations to the Senator from Vermont for a job well done.

The PRESIDING OFFICER (Mr. CASE of South Dakota in the chair). The present occupant of the chair, in his personal and individual capacity as a Member of the Senate, and as an individual delegate, will also second what has been said by other Senators with regard to the success of the meetings with the Canadian parliamentarians.

Mr. AIKEN. Mr. President, I note at this time that, with one exception, every Senator present in the Chamber is from a State near the Canadian border.

I now yield to the Senator from Wisconsin [Mr. WILEY], who has worked valiantly for better cooperation with Canada over many years. He participated and gave freely of his time in the conferences just concluded last week.

Mr. WILEY. Mr. President, I believe in handing out bouquets while people are alive. I had expected to rise before the distinguished leaders on both sides and pay a compliment to the distinguished Senator from Vermont. I believe that what made the conference a success was his friendly way of getting things done. There was no dictatorial attitude. The Senator from Vermont radiated the kind of spirit of friendship which we think makes for a better understanding between our Canadian friends and ourselves.

I was very happy to attend several sessions. I agree fully with the fine things the Senator from Montana [Mr. MANSFIELD], the Senator from Illinois [Mr. DIRKSEN], and the Senator from Idaho [Mr. CHURCH] have said in relation to the leadership of the Senator from Vermont.

There is leadership of many kinds. His was the kind which contributed to the success of these meetings. One who takes the bit in his teeth, and undertakes to run the show usually makes the show blow up. The Senator from Vermont did not do that. He did a remarkably fine job, and I am very happy to join those who have paid him a tribute he deserves.

Mr. AIKEN. I thank the Senator from Wisconsin.

Mr. President, I hope the resolution will be approved.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution was agreed to.

DEMOCRATIC 86TH CONGRESS AND MAJORITY LEADER UP AGAINST THE GUN

Mr. PROXMIRE. Mr. President, in this morning's New York Times, the majority leader, the senior Senator from Texas [Mr. JOHNSON], is reported to have declared:

> If the Democrats fail to make a recognizable record in Congress, all the party's candidates may as well stay home because the Republicans will have an easy road to victory.

Speaking in Texas Saturday night to a convention of the Young Democratic Clubs of Texas, I had occasion to say the same thing with a little different emphasis. I pointed out that to date the record of the 86th Congress has yet to be made, although we are entering the home-stretch. We have accomplished far less than the times demand or than our party has promised. Only a scant 9 or 10 weeks remain to achieve an immense burden of legislation. Much of the failure or success of this Congress will hang on the performance of the majority leader. He will deserve credit if we achieve a substantial record, responsibility if we do not.

Mr. President, in order to emphasize the urgency of the need for prompt action by the Congress, I ask unanimous consent to have printed in the RECORD at this point a copy of an editorial from this morning's Washington Post, which concludes:

Extraordinary efforts will be necessary throughout the remaining weeks of the session if Congress is to avoid the risk of a "do little" label on the eve of a national election.

There being no objection the editorial was ordered to be reprinted in the RECORD, as follows:

HOMESTRETCH ON THE HILL

Now that the civil rights bill has been finally passed, Congress faces a mountain of work that ought to be disposed of before the scheduled adjournment early in July. Substantially more than half of the session has gone by, but only one piece of major legislation has gone to the White House. Much preliminary work has been done, of course. Still the fact remains that an enormous volume of legislation is pressing for action in the two and a half months that remain before the start of the big political conventions.

It is assumed that more than a month will be required to complete action on the appropriations bills. Even if all goes well, that will leave little more than a month for clearance of such vital measures as the foreign aid bill, the education bill, the interest rate bill, and the measure to provide new judges for the Federal courts. Other measures for which there is a strong demand are the bills to provide health insurance for the aged, relieve the wheat surplus, remove the loyalty-oath requirement for students, raise minimum wages, increase postal rates, modernize the rules of regulatory agencies, promote clean elections, and set up a Youth Conservation Corps. Enactment of the District home rule bill, national suffrage resolution, juvenile court bill, and C. & O. Canal bill must also be regarded as urgent.

Extraordinary efforts will be necessary throughout the remaining weeks of the session if Congress is to avoid the risk of a "do little" label on the eve of a national election.

WHAT'S WRONG WITH THE AMERICAN PRESS?

Mr. MANSFIELD. Mr. President, the Women's National Press Club made journalistic history last Thursday evening.

"What's Wrong With the Press?" was the discussion topic at, fittingly, the press women's annual dinner in honor of members of the American Society of Newspaper Editors.

Two women famed for their writing were the speakers—Mrs. Clare Boothe Luce, former Congresswoman from Connecticut and former Ambassador to Italy who writes for McCall's; and Miss Marya Mannes, staff writer for the Reporter, a contributor to other periodicals and the author of the 1958 book, "More in Anger." Miss Mannes subbed for Mrs. Eleanor Roosevelt, who canceled her engagement because of a recent ankle injury.

To assure the addresses of these two outstanding women a reading audience beyond the more than 800 at the dinner, I ask ananimous consent to have the texts printed in the body of the RECORD.

There being no objection, the addresses were ordered to be printed in the RECORD, as follows:

WHAT'S WRONG WITH THE AMERICAN PRESS?

(Address by Clare Boothe Luce)

I am happy and flattered to be a guest of honor on this always exciting and challenging occasion. But looking over this audience tonight I am less happy than you might think and more challenged than you could know. I stand here at this rostrum invited to throw rocks at you. You have asked me to tell you what's wrong with you—the American press. The subject not only is of great national significance but also has, one should say, infinite possibilities—and infinite perils to the rock thrower.

For the banquet speaker who criticizes the weaknesses and pretensions, or exposes the follies and sins of his listeners—even at their invitation—does not generally evoke an enthusiastic—no less a friendly—response. The delicate art of giving an audience hell is always one best left to the Billy Grahams and the Bishop Sheens.

But you are an audience of journalists. There is no audience anywhere who should be more bored—indeed, more revolted—by a speaker who tried to fawn on it, butter it

up, exaggerate its virtures, play down its faults, and who would more quickly see through any attempt to do so. I ask you only to remember that I am not a volunteer for this subject tonight. You asked for it.

For what is good journalism all about? On a working, finite level it is the effort to achieve illuminating candor in print and to strip away cant. It is the effort to do this not only in matters of state, diplomacy and politics but also in every smaller aspect of life that touches the public interest or engages proper public curiosity. It is the effort to explain everything from a summit conference to why the moon looks larger coming over the horizon than it does when it has fully risen in the heavens. It is the effort, too, to describe the lives of men and women, big and small, close at hand, or thousands of miles away, familiar in their behavior or unfamiliar in their idiosyncrasies. It is—to use the big word—the pursuit of and the effort to state the truth.

No audience knows better than an audience of journalists that the pursuit of the truth, and the articulation of it, is the most delicate, hazardous, exacting, and inexact of tasks. Consequently, no audience is more forgiving—I hope—to the speaker who fails or stumbles in his own pursuit of it. The only failure this audience could never excuse in any speaker would be the failure to try to tell the truth, as he sees it, about his subject.

In my perilous but earnest effort to do so here tonight, I must begin by saying that if there is much that is wrong with the American press, there is also much that is right with it.

I know then, that you will bear with me, much as it may go against your professional grain, if I ask you to accept some of the good with the bad—even though it may not make such good copy for your newspapers.

For the plain fact is that the U.S. daily press today is not inspiringly good; it is just far and away the best press in the world.

To begin with, its news gathering, news printing, news dissemination techniques, and capacities are without rivals on the globe.

The deserving American journalist himself enjoys a far more elevated status than his foreign counterpart anywhere. And this, not only because Americans passionately believe that a free press is vital to the preservation of our form of democracy, but because the average American journalist has, on the record, shown himself to be less venal, less corrupt, and more responsible than the average journalist of many foreign lands.

No capital under the sun has a press corps that is better equipped, and more eager to get the news, the news behind the news, and the news ahead of the news, the inside, outside, topside, bottomside news, than the Washington press corps.

I must add only half jokingly that if the Nation's dailies are overwhelmingly pro-Republican in their editorial policy, then the Washington press corps is a large corrective for this political imbalance. Not because Washington reporters are all Democrats. Rather because they place on the administration in power their white-hot spotlight of curiosity and exposure. So that no one—Republican or Democrat—can sit complacently in office in this Capital unobserved by the men and women of the press who provide the news and information that can make or break an elected or appointed office holder.

Certainly no press corps contains more journalists of competence and distinction, zeal and dedication. What minds regularly tap more "reliable sources" in government, politics, diplomacy? What breasts guard and unguard more "high level" confidences more jealously? What hearts struggle more conscientiously and painfully to determine to what extent truth telling, or shall we say "leaking," will serve or unserve the public interest? What typewriters send out more facts, figures, statistics, views, and opinions about great public questions and great public figures?

And in what other country of the world are there so many great newspapers? Who could seriously challenge the preeminence among the big city quality press of the New York Times? Where in the world is there a "provincial" newspaper (I use the term only in its technical sense) greater than, to take only one outstanding example, the Milwaukee Journal? Even the biggest and splashiest of the foreign English-language press, the London Daily Mirror, cannot touch in popular journalism the New York Daily News. (And since we are talking in superlatives—good and bad—is there a worse paper in England, Japan, France, or India than the New York Sunday Enquirer?)

While the range between the best and the worst is very wide, America's some 1,800 newspapers nevertheless average out a higher quality, variety, and volume of information than any other press in the world.

Certainly no other press has greater freedom, more freely granted by the people, to find the news and to print it as it finds it. The American press need not be caught in the subtle toils of subsidies by groups or interests. It does not have to fight Government newsprint allocations—that overt or covert censorship exercised in many so-called free countries. Except as the American press is guided by the profit motive, which is in turn guided by the public demand for its paper, it is an unguided press.

All this is what is right with the American press. And the result of this situation is that our people have more ways to be well informed about issues and events near and far than any people in the world. And they are, by and large, better informed.

But now let us come to the question of the evening: "What is wrong with the American press?" We cannot answer this question unless we will voluntarily abandon our relative measurements of it against the press of other countries. We must measure it, in absolute terms, against its own highest ideal of freedom, responsibility—and let us not forget, success.

It is easy to point to many instances in which the American press—especially its individual members—tend to abuse their freedom and shirk their responsibility.

For example, one could note that nowadays the banner of press freedom is more often raised in matters of printing crime, sex and scandal stories, than it is in matters of printing the truth about great national figures, policies, and issues. Or that too many members of the working press uncritically pass on—even if they do not personally swallow—too much high-level government and political cant, tripe, and public relations; or that there are too many journalists who seem willing to sell their birthright of candor and truth in order to become White House pets, party pets, corporation pets, Pentagon or State Department or trade union or Governor's mansion pets; who wistfully yearn after gray eminency, or blatantly strive for publicity for themselves, on lecture platforms or political rostrums.

While agreeing with most journalists that people are not as much interested in the issues as they should be, one could at the same time note that neither are many journalists. One could mention that such journalists seem to have forgotten that men, not names alone, make news, and that men are made by the clarity with which they state issues, and the resolution with which they face them. One could express the hope that more journalists would encourage rather than avoid controversy and argument, remembering that controversy and argument are not the enemies of democracy, but its friends. One could wish for fewer journalist prodigies of the well written factual story, and more gifted talents for drawing explanations from the facts, or that working pressmen would be more creative in reporting the news, or that they would reflect less in themselves of what in this decade they have so roundly condemned in American leadership: Apathy, cynicism, lukewarmness, and acceptance of the status quo about everything, from juvenile delinquency to nuclear destruction. One could pray, above all, for journalists who cared less about ideologies, and more about ideas.

But such criticisms and complaints—important as they may be—cover only one area of the American press. It is, alas, a relatively small area. A large, unmeasurable percentage of the total editorial space in American newspapers is concerned not with public affairs or matters of stately importance. It is devoted instead to entertainment, titillation, amusement, voyeurism, and tripe.

The average American newspaper reader wants news but he wants lots of things from his newspaper besides news: He wants the sports page, the comics, fashion, homemaking, advice to the lovelorn, do-it-yourself psychiatry, gossip columns, medical, cooking, and decorating features, TV, movie, and theater coverage, Hollywood personality stories, Broadway and society prattle, church columns, comics, bridge columns, crossword puzzles, big-money contest. Above all, he wants news that concerns not a bit the public weal but that people just find interesting reading.

I confess to enjoying much of this myself. And I do not mean to suggest that every newspaper must read like the London Times. But the plain fact is that we are witnessing in America what Prof. William Ernest Hocking and others have called the debasement of popular taste.

Is it necessary? An editor of my acquaintance was asked recently whether the new circulation rise of his increasingly wild-eyed newspaper was being achieved at the expense of good journalism. He replied, "But you don't understand; our first journalistic need is to survive." I submit that a survival achieved by horribly debasing the journalistic coin is short lived. The newspaper that engages in mindless, untalented sensationalism gets caught up in the headlong momentum it creates in its readers' appetites. It cannot continue satisfying the voracious appetites it is building. Such journalism may suddenly burn brightly with success; but it will surely burn briefly.

We have the familiar example of television closely at hand. The American press has rightly deplored the drivel, duplicity and demeaning programing that has marked much of television's commercial thrust. A critic, of course, need not necessarily always have clean hands. The press is right to flail what is wrong in television just as it is obliged to recognize the great service television has provided in areas where its public affairs, news, and good programs have succeeded in adding something new and enriching to American life.

But if the press criticizes what is wrong in television without recognizing the moral for itself, it will have missed a valuable and highly visible opportunity for self-improvement.

The double charge against the American press may thus be stated: its failure to inform the public better than it does is the evasion of its responsibility; its failure to educate and elevate the public taste rather than following that taste like a blind, wallowing dinosaur, is an abuse of its freedom.

In view of the river of information which flows daily from the typewriters of American correspondents at home and abroad, why are the American people not better informed? Whose fault is it? At first glance it would seem to be the fault of the publishers, and

especially editors. But the publisher or editor who does not give his readers plenty of what they want is going to lose circulation to a competitor who does. Or if he has a news monopoly in his city, and feels too free to shortchange them in these things, he is going to lose circulation as his reader slack is taken up by the radio, the TV, and the magazines.

Add that even the news the reader wants in most cities, especially the smaller cities throughout the United States, is primarily local news. He remains, even as you and I, more interested in the news of his neighbors, his community, and his city, than he is in the news out of Washington, Paris, or Rome.

Can we quarrel with this? We cannot. The Declaration of Independence itself set the pattern of the American way, and with it American reading habits. Life, liberty, and the pursuit of happiness were to be man's prime and legitimate goals.

Perhaps the history of our country would have been better—and happier—if "the pursuit of truth, information, and enlightenment" had been his third great goal. But that was not the way our Founding Fathers saw things. And that is not the way the American public sees them now.

The fact is that while man is a rational animal, all men and all women are not preeminently rational, logical, and thoughtful in their approach to life. They do not thirst, above all, for knowledge and information about the great domestic and international issues, even though these issues may profoundly affect not only their pocketbooks, but their very lives.

Today, as yesterday, people are primarily moved in their choice of reading by their daily emotions, their personal, immediate, existential prejudices, biases, ambitions, desires, and—as we know too well in the Freudian age—by many subconscious yearnings and desires, and irrational hates and fears.

Very well then: let us accept the fact.

Should the American press bow to it? Accept it? Cater to it? Foster it?

What else (the cynical and sophisticated will ask) is there to do?

The American press, no less than the TV and radio, is big business. It is now, as never before, a mass medium. As big business it faces daily vast problems of costliness and competition. As a mass medium it cannot handle these problems without seeking to satisfy the public's feelings, desires, and wants. It publishes in the noisiest and most distracted age in our history. It seems doomed to satisfy endlessly the tastes of the Nation—pluralistic, pragmatic, emotional, sensuous, and predominately irrational. By its big business, mass media nature it seems compelled to seek ever more and more to saturate the mass markets, to soak the common denominator reader-sponge with what it wants.

Certainly we must face this fact: If the American press, as a mass medium, has formed the minds of America, the mass has also formed the medium. There is action, reaction, and interaction going on ceaselessly between the newspaper-buying public and the editors. What is wrong with the American press is what is in part wrong with American society.

Is this then to exonerate the American press for its failures to give the American people more tasteful and more illuminating reading matter? Can the American press seek to be excused from responsibility for public lack of information as TV and radio often do, on the grounds that after all, "We have to give the people what they want or we will go out of business"?

No. Not without abdicating its own American birthright, it cannot. The responsibility is fixed on the American press. Falling directly and clearly on publisher and editor, this responsibility is inbuilt into the freedom of the press itself. The freedom guaranteed by the Constitution under the first amendment carries this responsibility with it.

"Freedom," as Clemenceau said, "is nothing in the world but the opportunity for self-discipline"; that is to say voluntarily to assume responsibility.

There are many valiant publishers, editors, and journalists in America who have made and are making courageous attempts to give readers a little more of what they should have, and a little less of what they want—or, as is more often true, what they only think they want, because they have no real knowledge of what is available to them. America owes these publishers and editors and journalists an incomparable debt of gratitude.

What is really wrong with the American press is that there are not enough such publishers and editors. There is hardly an editor in this room who could not—if he passionately would—give every day, every year, a little more honest, creative effort to his readers on the great issues which face us—the issues which, in the years to come, must spell peace or disaster for our democracy. A beginning would be to try courageously, which is to say consistently, to keep such news (however brief) on the front page, playing it in some proportion to its real importance. For a newspaper which relegates to the back pages news which is vital to the citizenry as a whole, in favor of sensational circulation building headlines about ephemeral stories of crime, lust, sex, and scandal, is actively participating in the debasement of public taste, and intelligence. Such a newspaper, more especially its editor, is not only breaking faith with the highest of democratic journalism, he is betraying his Nation. And, you may be surprised to hear me say, he may even be courting commercial failure.

For there is enough in American life in these exciting sixties to keep interested and absorbed many of the readers who have been written off as impossible to reach except through cheap sensationalism. The commercial challenge is not to achieve success by reaching backward into cliche-ridden ideas, stories, and situations. It is rather to recognize that uniquely now in this country there is natural and self-propelled drive toward a better life, more sustaining and relevant interests. There is, in sum, an infinity of new subjects that make exciting, inviting, and important exploration for the American press.

There can be no doubt that honorable and patriotic publishers and devoted and dedicated editors can increase little by little, in season and out, the public's appetite for better information. There can also be no doubt that they can also decrease, little by little, in the rest of their papers the type of stories which appeals to the worst in human nature by catering to the lowest common denominator taste in morals and ethics.

Teddy Roosevelt once said that a good journalist should be part St. Paul and part St. Vitus.

A good editor today must be part Santa Claus, part St. Valentine, part St. Thomas (the doubter), part St. Paul, and certainly he must be part St. Jude. St. Jude, as you know, is the patron saint of those who ask for the impossible.

It is not impossible to ask that the American press begin to reverse its present trend, which Dean Ed Barrett of the Columbia School of Journalism called giving the public too much froth because too few want substance. If this trend is not reversed (which it can be only by your determined effort) the American press will increasingly become the creature, rather than the creator of man's tastes. It will become a passive, yielding, and, curiously, an effeminate press. And 'twixt the ads for the newest gas range, and the firmest girdle, the cheapest vacuum cleaner, and the best buy in Easter bonnets; 'twixt the sports page, the fashion page, the teenage columns, the children's comics; 'twixt the goo, glop, and glamor handouts on Elvis Presley and Elizabeth Taylor, and above all 'twixt the headlines on the sexiest murders, and the type of political editorializing which sees the great presidential issues of the day as being between the case of the "boyish forelock" versus the "tricky ski-jump nose," the press will lose its masculine prerogative which is to educate, inform, engage the interest of and guide the minds of free men and women in a great democracy.

As I know that the American Society of Newspaper Editors holds hard to the belief in masculine superiority in the realm of the intellect, and could only view with horror the picture of the Fourth Estate as the "kept man" of the emotional masses, I, for one, am certain this will not happen.

Let us watch then, with hope, for the signs of a new, vigorous, masculine leadership in the American press. For if you fail, must not America also fail in its great and unique mission, which is also yours: To lead the world toward life, liberty, and the pursuit of enlightenment—so that it may achieve happiness? It is that goal which the American press must seize afresh—creatively, purposefully, energetically, and with a zeal that holds a double promise: The promise of success and the promise of enlightenment.

What's Wrong With Our Press?

(By Marya Mannes)

A second speaker has a tough time—especially when the first speaker is Mrs. Luce. And when I was honored—and awed—by this assignment, I confess I spent night hours grappling with alternatives. To give what Mrs. Roosevelt would have given was of course impossible. But should I, as a writer, make a sober appraisal of the errors of our national press and run the risk of echoing Mrs. Luce's charges? (For odd as it may seem, there are areas in which we concur.) Should I make expected use of the fact that Mrs. Luce is a very distinguished Republican and that I am a very distinct Democrat? Or should I do a switcheroo and please you by telling you what's right with the press—a splendid way of contracting my speech to 5 minutes?

Will John go back to Mary? Tune in after the next message from our sponsor. For here is your clue. I'm going to frame you—in the sense of comparing you with your greatest competitor, and trying to find out just how well you come out of the deal. And I'm going to start by giving you gentlemen of the press some words of comfort.

Newspapers have two great advantages over television. They can be used by men as barriers against their wives. It is still the only effective screen against the morning features of the loved one, and as such performs a unique human service. The second advantage is that you can't line a garbage pail with a television set. It's usually the other way around.

The third piece of solace I can give you is that no matter how low our low press can get the British low press is lower.

I think I can also make you happy by bringing to your attention a recent little survey by Mr. Roper called the public's reaction to television following the quiz investigations. In it, he asks everybody but me this question: Suppose you could continue to have only one of the following—radio, television, newspapers, or magazines? And do you know what—you came in second. Forty-two percent said if they could only have one they would keep television. Thirty-two percent said if they could only have one, they would keep newspapers. Isn't that wonderful? You should, I think, be much happier than the magazine people,

because only 4 percent said they needed them as against 19 percent for radio. So much for weeklies—the Clapps baby food of the Nation's news diet—specially processed for quick digestion.

And listen to this, gentlemen. Mr. Roper asked these same harried people: "If you got conflicting or different reports of the same news story from radio, television, the magazines, and the newspapers, which of the four versions would you be most inclined to believe?" Can you bear the suspense? You win. Just. Thirty-two percent believe newspapers as against 30 percent television. But then something really strange happens, which should give you pause. When Mr. Roper asked his guinea pigs which of these media they would be least inclined to believe, you—the newspapers—topped the list. In a big way, too. Twenty-four percent don't believe you as against 9 percent who don't believe television. And although I'm as leery of certain polls as you must be, I think this margin of credibility—in your disfavor—is too wide to be discounted.

And this leads me to the defense of certain practices in television which may astound those who have read my views on the medium—8 years of pretty unsparing criticism of TV malpractices which Mrs. Luce is now eloquently confirming. But I must say this: although network television still allots far too little time to the vital service of informing the public, it does a better job in that little time than the Nation's press as a whole, I am not speaking of the five or six splendid newspapers—and the one great newspaper—which serve the world as models of responsible public information. Nor am I speaking of certain little local papers in certain far-flung communities which—because they are the reflection of one fearless and honest editor—are a power for good. I am speaking of the local press which in hundreds of American communities is the only news available, aside from those parrotings of ticker tape that pass for radio news, and which default on their public.

Why do you think network TV does a better job of informing than these papers? Well, let's get the partisan bit over with. Television lives on advertising to an even greater extent than you do, and since advertising is big business, advertising is by nature Republican. Yet nowhere in network newscasts or network commentaries on current events have I encountered the intense partisanship—the often rabid bias—that colors the editorial pages and the news reporting of the majority of papers in this country. My distinguished colleague on the Reporter, Douglass Cater, in his book "The Fourth Branch of Government," confines himself to only one pungent footnote on this subject. "I have deliberately avoided," he writes, "getting into the predominantly one-party nature of newspaper ownership. It is a fact of life. Quite frankly," he goes on, "I have no new ideas or information to add on the subject." No new information is necessary. This particular fact of life is a shameful fact, that the newspapers whose duty it is to inform the American public give them only one side of the issues that affect them profoundly: the Republican side. This is shameful not only for Democrats—we have survived it before and we will survive it again—but for the maturity of our people. The same papers who loudly extol the virtues of free enterprise and a free press are consistently failing to print the facts on which a people can form a balanced and independent opinion. That balanced and independent opinion is our only real security as a nation.

Now, very often, television coverage of news is superficial and inadequate. Very often the picture takes precedence over the point. But by and large the news reports and commentaries on CBS and NBC and ABC make every effort to present viewers with more than one aspect of an issue, either by letting opposing spokesmen have their say, or by outlining the positions held by both major parties on the subject involved.

Television also provides a wide range of opinion by setting up four or five experts and letting them knock each other down. What have you in your local press of this nature? Are you discharging your duty to diversity by printing snippets of opinion from unqualified readers? Is this exploring an issue?

Television may not have a Lippmann or a Reston, but then, what papers in America can claim a Sevareid and Murrow and a Huntley and Brinkley, and, although he is invisible, an Edward Morgan?

Another thing. Among the leading commentators on television, you find no Pegler, no O'Donnell, no David Lawrence. Fortunately for the American public, television will not tolerate the kind of distortion of fact, the kind of psychotic partisan virulence and personal peeve, that many newspapers not only welcome but encourage. In its entertainment, television caters far too much to the lowest instincts of men, particularly the lust for violence, or, at the opposite end of the spectrum, the urge to escape from reality into sedation. But there is one appetite it does not feed and which the partisan newspapers of the Nation do: The appetite for hate, hate of whatever is different. I do not find on television the kind of editorials chronic in the New York tabloids as well as in, say, the Manchester Union, where the techniques of demagogery prevail: rouse the rabble by routing reason. With smear, innuendo, sideshow, attack the viscera and obscure the fact.

A newspaper has the right, the duty even, to assume an attitude, to take a position. But it has an equally sacred right to explain that position in the light of the opposing one, to document that position and to bolster that position not with emotion but with fact. In television a man like Murrow has often taken a position, but never without presenting, as completely and factually as possible, the alternate opinion.

Here, of course, is where background information helps the public to draw its conclusions. TV does a great deal of this in the form of documentaries, and you can, of course, say that they have the time and the money to do this and you haven't. Yet across this wide country, and with the exception of a handful of syndicated columns, I fail to find in any local paper any attempt, however minimal, to strengthen this muscle of digestion—without which news can neither nourish nor inform. It can only stuff. Between the opinions of the editor and the bare statements of the wire services there is nothing—nothing, that is, except a collection of snippets used as fillers between the ads and picked at random.

One of the greatest and most justified criticisms of television has been that in appealing to the largest audience possible, it neglects minority audiences and minority tastes. This is still largely true. But there is, perhaps, one program a day and many, of course, on Sunday, which an intelligent man or woman can enjoy and derive interest from. In my trips east or west or north or south I pick up the local paper to find this enjoyment and interest, in vain. Now, surely there's something wrong here. Many of these places I've visited, and I'm sure this is true of the whole country, have college communities where highly intelligent and talented people live, whether they are teachers or doctors or lawyers or muscians or scientists. What is there for them in the paper, usually the only paper, of their town? What features do you provide for these people? What stimulation? How many times have I heard them said: "If you want to see what a really bad paper is like, read our sheet." When you have a monopoly in a region, as most of you do, why is it necessary to aim at the lowest common denominator?

I also wonder just what you do for women. Your women's pages exist on the assumption that women are interested only in clothes, food, diet, and personal problems. This is an old and tired assumption—a form of segregation that has less and less bearing on the life we live. Surely we have reached the stage where food can interest men just as nuclear tests can interest women? Television has discovered this. But have you? Admittedly, television has its lady gossipers who call themselves journalists, but it has the sense to use them as performers in parlor games instead of as pundits. And so far as I know, there is on network television no vapidity equal to that of your most beloved syndicated babbler, Louella Parsons. Is this really the best the Nation's press can offer its women? This, and upside-down-pineapple fudge cake?

I don't think so. And I am quite sure most of you don't think so. But I believe that over a period of decades newspapers have become a habit rather than a function. You have held your franchise so long that change has become inadmissible. I do not know, in fact, of any medium that has changed as little in the last 20 years as the daily press. And this resistance to change is the end of growth—which, in turn, marks the end of usefulness. In 11 short years television was about to approach this condition. It had become a habit and the networks rested complacently on their giant franchise. And it was only when, through a series of scandals and exposures, it became apparent that television was putting the advertising dollar ahead of the public interest, that some change, some growth became not only advisable but imperative. The parallel is obvious.

What is more, I believe that this resistance to change in your field is the product of two factors: laziness and conservatism. And hold on now, gentleman, before the tomatoes fly, let me say that you are the most harried, beset and overworked men in the Nation, and I would not be in your shoes for anything. Think what you have to contend with. Your publishers, your deadlines, your unions, your advertisers, the state of the world. And, above all, the relentless daily chore of selecting items from that giant supermarket of processed news composed of wire services and Government handouts. What a terrible life you lead.

No, the laziness and the conservatism go much deeper, and they derive from the same source. By conservatism I mean something much broader than a Republican bias, though there is some connection. * * * This is the way things always have been, this is the way they'll be. Change means trouble, change means work. And here is where the laziness creeps in. It is easier to print wire services dispatches than have a reporter on the beat. It is easier to buy syndicated columns than find—and train—your own local talent. It is easier to let the ads dictate the format than develop a format that elevates news above dogfood. It is easier to write editorial copy that appeals to emotion rather than reason. And in handling straight news, it is easier to assume the pious mantle of objectivity than to edit. To quote Eric Sevareid: "Our rigid formulas of so-called objectivity, beginning with the wire agency bulletins and reports—the warp and woof of what the papers print * * *, our flat, one-dimensional handling of news, have given the lie the same prominence and impact that truth is given. They have elevated the influence of fools to that of wise men; the ignorant to the level of the learned; the evil to the level of the good." This featureless objectivity is nothing less than the editor's abdication of responsibility.

This abdication—together with that other extreme, the imposition of undocumented editorial bias on the news—may provide two

reasons for the decline of public confidence in their daily press.

This, to me, is a tragedy. I am a printed-word woman myself, and I still think the word was not only in the beginning but will be in the end. No picture on a screen can ever be an adequate substitute for the reporting of a trained observer and an honest writer. The word will prevail, if, but only if, you treat it with the respect it deserves. For if you degrade and cheapen the work too long, the people will turn to the picture for what they need to learn. They are beginning to turn now, in many places. For you are not alone, gentlemen. Others are bringing the news to them, and often bringing it better. Oh, they will buy your papers in the end. No picture can ever be an adequate substitute. The word will prevail, that is, if you, who are its guardians, treat it with the respect it deserves. For if you degrade and cheapen the word too long, the people will turn to the picture. They are beginning to turn to the picture now. Not in New York, maybe, not in Washington, D.C., or St. Louis or two or three other cities, but in hundreds of towns across the country. Oh, they will buy your papers—to hold up at breakfast or to line the trash can or light a fire. But not to learn. And you may wake up one day to find you have lost the greatest power entrusted to men: to inform a free people.

Goodnight.

YAKUTAT LAND CLAIMS

Mr. BARTLETT. Mr. President, Senate bill 3345 was introduced by me recently in this session to compensate the Yakutat local community of Alaska for takings of land areas of the Yakutat community occurring since February 6, 1953. These takings, in the form of oil and gas leases covering approximately 2 million acres, contrast with the traditional policy of compensation to Indians for the taking of original Indian title. I ask unanimous consent that a memorandum regarding S. 3345 be printed in the RECORD.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

SUPPORTING NOTES RE S. 3345

Note 1. The occasion and need for such a bill: Appropriate compensation to its Indians for any governmental taking of their original Indian title has been the traditional policy of United States (as is more fully developed in note 2 immediately following). In our own day and age this familiar policy has been reaffirmed and reimplemented by the Indian Claims Commission Act of August 13, 1946, and the Tlingit and Haida special jurisdictional act of June 19, 1935. Under the 1946 act many century-old takings and treaties have been reviewed, and a number of grossly inadequate or otherwise unconscionable settlements with stateside Indians have already been corrected by the entry of supplemental judgments for many millions of dollars. And under the 1935 act the Court of Claims has already held the United States liable for the taking of almost all of the Tlingit area of southeastern Alaska, and is now conducting further proceedings for determination of a dollars-and-cents judgment. (—— Ct. Cls. ——, 177 F. Supp. 452 (1959).)

While both acts expressly applied to Alaska, both were also limited to takings or related causes of action which had accrued prior to their respective dates of enactment in 1935 and 1946. In its Tlingit and Haida decision the Court of Claims held that it was a series of five proclamations, etc., in 1891, 1902, 1907, 1909, and 1925 (all well before its 1935 jurisdictional deadline) which had accomplished the taking of almost all the area of the other 12 Tlingit communities, and including even a part of that of the Yakutat community.

But it was not until on or after February 6, 1953, that the remainder of the Yakutat area (the Indian title to which had never been extinguished) was taken by a series of oil and gas leases covering approximately 2 million acres. These most recent takings were comparable in every respect to the earlier takings except that they occurred subsequent to two jurisdictional deadlines, and also included some land which lay outside the geographical limits of the jurisdictional provisions of the 1935 act. Under all the circumstances, and especially in the light of the respect which Congress has paid over the years to its traditional policy in this field, this mere happenchance of dates, etc., is surely no ground for discrimination.

The present bill is designed to place these Yakutat takings substantially on a parity with other similar takings. Because all basic facts are already available to the Government (see notes 4, 5, 6, 7, and 8), further reference either to the Court of Claims or the Indian Claims Commission would be a wholly unnecessary and burdensome formality.

Note 2. The traditional policy of the United States: In further explanation of the above referred to traditional policy of the United States House Report No. 1466, 79th Congress, in favorably reporting the bill which became the Indian Claims Commission Act of August 13, 1946 (60 Stat. 1052), pointed out that "about 95 percent of our public domain was purchased from the Indians by the Federal Government and it has been estimated that about $800 million was paid to the Indians in this process. * * * It is only the exceptional, rather than the normal case, that presents the situation of land taken by the United States without compensation fixed by formal agreement." For example, in 1803 we purchased from France for $15 million its sovereign rights over the Louisiana Territory, but the immediate title to the soil of its vast public domain which was homesteaded to later generations was acquired by a series of subsequent purchases of the Indian title from its Indian owners for more than 20 times that sum. (Cf. the treaties recorded at 7 Stat. 84, 89, 374, 536, 538, etc., as typical of a total of some 372 such treaties.)

To the same effect was President Truman's statement on the occasion of his signing the Indian Claims Commission Act:

"This bill makes perfectly clear what many men and women, here and abroad, have failed to recognize, that in our transactions with the Indian tribes we have at least, since the Northwest Ordinance of 1787, set for ourselves the standard of fair and honorable dealings, pledging respect for all Indian property rights. Instead of confiscating Indian lands, we have purchased from the tribes that once owned this continent more than 90 percent of our public domain, paying them approximately $800 million in the process. It would be a miracle if, in the course of these dealings—the largest real estate transaction in history—we had not made some mistakes and occasionally failed to live up to the precise terms of our treaties and agreements with some 200 tribes. But we stand ready to submit all such controversies to the judgment of impartial tribunals. We stand ready to correct any mistakes we have made."

Still further, to the same effect, was the opinion in the *Tee-hit-ton* case (348 U.S. 272). The Supreme Court felt bound to decide against the Indians on technical jurisdictional grounds, but in the very opening paragraph of its opinion it took pains to disclaim that the case was "connected with any aspect of the policy of Congress, continued throughout our history, to extinguish Indian title through negotiation rather than by force * * *." And again at pages 281–282, "Generous provision has been willingly made to allow tribes to recover for wrongs, as a matter of grace, not because of legal liability."

And yet again, in the concluding paragraph of the opinion at pages 290–291, the inference is plain that the duty that rests on this Nation with respect to Alaska is "to make congressional contributions for Indian lands" comparable to those which have been made for Indian lands in the States. And cf. *Worcester* v. *Georgia* (6 Pet. 515, 580), and re "the public domain," cf. *U.S.* v. *Seaton* (248 F. 2d 154, 155), *Petition of McCord* (151 F. Supp. 132, 135).

But the great era of purchase of Indian title was a century or more ago, and what may have been "the exceptional * * * case" stateside has unhappily proved to be "the normal case" in Alaska. In any event in Tlingit, southeastern Alaska, the United States just never got around to clearing in advance its full title to the Indian lands which, during the past 10 years, have been made the subject of innumerable timber sales and oil and gas leases. That omission has now been retroactively corrected with respect to most (approximately 20 million acres) of that area by the 1959 Court of Claims decision, and the present bill is designed to rectify it as to the remaining 2 million acres.

Note 3. The term "local community": The Yakutat native community is informally and unofficially organized under the leadership of its five chiefs, but the use of this term in this connection has already been amply recognized and established by Congress in sections 7 and 8 of the Tlingit and Haida special jurisdictional act of June 19, 1935, 49 Stat. 388. And the Court of Claims in paragraphs 24 and 25 of its findings of fact which are part of its recent decision of October 7, 1959, under that act has expressly recognized Yakutat as one of the 13 such Tlingit communities contemplated by that act.

Note 4. Other basic facts: The basic facts are already so well known that there is no occasion for burdening either the courts or the Indian Claims Commission with a jurisdictional act and long drawn-out litigation. See in particular the immediately following Notes 5, 6, 7, and 8. These leases all were on land the original Indian title to which had never been extinguished.

Note 5. Same; the Yakutat area east of 141°: The area of the Yakutat community lies both east and west of the 141st meridian. Section 1 of the act of June 19, 1935, limited the special jurisdiction of the Court of Claims to that portion of southeastern Alaska east of 141°. The Court of Claims at page 12 (177 F. Supp. 460) held unequivocably that the Indians owned by Indian title the entire area of which the court had jurisdiction.

Note 6. Same; the Yakutat area west of 141°: It is common knowledge that the Yakutat Tlingit area extended west of 141° nearly 150 miles further along the coast to the Copper River, and was held under the same conditions (Indian title, etc.) as the area to the east. (See for example the official Interior Department Goldschmidt-Haas 1946 report, pp. 71 ff., etc.)

Note 7. Same; amounts already received and retained by United States from these oil and gas leases: All the leases referred to in the bill are on standard Bureau of Land Management forms which provide for a rental of 25 cents an acre for the first lease year, no rental for the second and third such years, and 25 cents an acre for the fourth and each succeeding such year; and in the event of discovery and/or production then, in lieu of such rentals, for royalties ranging from an annual minimum of $1 per acre up to as much as 12½ percent of production. Unlike the Tongass Forest takings by mere general proclamations these takings by the actual granting of leases thus started a flow

of income to the United States which is still continuing, and which indeed may continue indefinitely and in even larger amounts in the event of commercial production of oil. Under 30 U.S.C. 191, as amended July 10, 1957, the United States has, since that date, remitted 90 percent of such receipts to the Territory or State of Alaska and retained only 10 percent. But prior to that amendment it retained 62½ percent. Exact details are not available in Washington, but, on the basis of the dates, acreage, and other facts announced in the Interior Department press releases of February 11, 1953, May 2, 1956, and January 8, 1959, it is estimated that the Government's total retentions out of the proceeds of the bases covered by this bill already amount to approximately $700,000 with the ever present possibility that even at the present low 10 percent rate these retentions may be substantially increased at any time. (In making this estimate the rentals on those leases within the Tongass National Forest area, which has been held to have been taken by the United States in 1909, have been excluded.)

Note 8. $500,000: Under all the circumstances the proposed compensation of $500,000 to close the whole matter once and for all represents a very reasonable figure. Especially so as the Government is continuing to derive income from these sources, and may well continue to do so indefinitely and in greatly enhanced amounts.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

TREASURY AND POST OFFICE DEPARTMENTS APPROPRIATIONS, 1961

Mr. MANSFIELD. Mr. President, has morning business been concluded?

The PRESIDING OFFICER. If there is no further morning business, morning business is concluded.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that Calendar No. 1316, H.R. 10569, be laid before the Senate and made the pending business.

The PRESIDING OFFICER. The clerk will state the bill by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H.R. 10569) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1961, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Appropriations with amendments.

Mr. MANSFIELD. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MANSFIELD. What will be the status of the bill now before the Senate when the hour of 2 o'clock arrives?

The PRESIDING OFFICER. The unfinished business, S. 2131, to amend the Motor Vehicles Safety Responsibility Act of the District of Columbia, will come before the Senate and have precedence over the pending business.

Mr. MANSFIELD. I ask unanimous consent that at that time the unfinished business be temporarily laid aside and the Senate continue the consideration of the Treasury-Post Office appropriation bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

MONTANA NEWSMAN WINS SIGMA DELTA CHI AWARD

Mr. MANSFIELD. Mr. President, I am much pleased to announce to the Senate that the annual Sigma Delta Chi award for distinguished service in the field of radio reporting during 1959 has been awarded to Donald H. Weston, news director of radio station KGVO in Missoula, Mont.

As each of us know, the Sigma Delta Chi is the largest professional journalism honorary in the Nation and makes annual awards for outstanding work in press, radio, television, magazine, and research. Don Weston is the first Montanan to win one of the SDX awards in any category.

I take this opportunity to extend my heartiest congratulations to Don who has done a wonderful job in news reporting for Montana, and especially for his coverage of the Madison Canyon earthquake in southwestern Montana last summer, for which he is being honored. He is a graduate of Montana State University's fine school of journalism, and did graduate work at Northwestern University and Columbia University.

Mr. President, I ask unanimous consent to have printed at the conclusion of my remarks a news story which appeared in the April 18, 1960, issue of the Great Falls Tribune, and a news release announcing Mr. Weston's award.

There being no objection, the news article and press release was ordered to be printed in the RECORD, as follows:

MISSOULA NEWSMAN IS CITED FOR COVERAGE

CHICAGO.—Donald H. Weston, news director of KGVO radio in Missoula, Sunday won the national Sigma Delta Chi award for distinguished service in the field of radio reporting during 1959.

Sigma Delta Chi is the largest national honorary for professional journalism and makes its awards annually for press, radio, television, magazine, and research achievements.

Weston is the first Montanan to win one of the SDX awards in any category.

The award was based on Weston's coverage of the Madison Canyon earthquake in Yellowstone Park last summer.

The award citation said:

"Mr. Weston's direct broadcasts from the scene of the Madison Canyon Yellowstone Park earthquake and the tape-recorded interviews with survivors and rescue workers demonstrated a high degree of journalistic skill. They were made under extremely difficult working conditions. Mr. Weston gave rapid, accurate, and colorful reports of the damage and rescue operations but did not attempt to make the story more sensational than the facts themselves required."

Weston, 32, is a graduate of the Montana State University school of journalism and received his masters degree at Northwestern University. He was a CBS news and public affairs fellow at Columbia University in 1958.

Weston's SDX award follows another citation from the Radio-Television News Directors Association for distinguished achievement in radio news reporting in 1958, which was based on his coverage of the Missoula County High School personnel controversy.

Among winners in other categories of the SDX competition were staff writers on Life magazine and the Saturday Evening Post, and the Atlanta, Ga., Constitution.

MISSOULA, MONT.—Don Weston, news director of KGVO, Missoula, has been named 1960 winner of the National Sigma Delta Chi Award for Distinguished Service in Journalism in radio reporting, one of the most coveted awards in the communications field.

Announcement was made in Chicago by Victor E. Bluedorn, national director of the journalistic awards, which have been presented annually since 1932, for outstanding work in newspaper, magazine, radio, television, and journalism research.

Presentation of the bronze medallions and accompanying plaques to this year's 15 winners will be made at the annual banquet ceremony at the National Press Club in Washington, D.C., May 18.

At 32, Weston is the youngest winner of the 1960 awards. He has been news director at KGVO since 1953.

The citation for the Sigma Delta Chi Award reads:

"Mr. Weston's direct broadcasts from the scene of the Madison Canyon-Yellowstone Park earthquake, and the tape-recorded interviews with survivors and rescue workers, demonstrated a high degree of journalistic skill. They were made under extremely difficult working conditions. Mr. Weston gave rapid, accurate, and colorful reports of the damage and rescue operations, but did not attempt to make the story more sensational than the facts themselves required."

It is the third major national news reporting award Weston has won in as many years. He was a winner of the Radio-Television News Directors Association (RTNDA) Award in 1958, and was recipient of a 1958–59 CBS news and public affairs fellowship at Columbia University.

Weston is a graduate of Montana State University and holds a master's degree from Northwestern University. He is married to the former Florence Dufresne, and the father of two children, 3 and 5.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROBERTSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

THE NEED TO REMOVE THE SOCIAL SECURITY EARNINGS LIMITATION

Mr. KEATING. Mr. President, the Rochester Democrat and Chronicle last week published an editorial on an incident which is of vital significance to me, and on which I wish to comment briefly.

Mr. Norman H. Davidson, of Rochester, a retired industrial engineer, formerly employed by the Rochester Gas & Electric Co., was recently appointed to the Monroe County Water Authority.

This is a fine and well-deserved appointment, and it was apparent to all that Mr. Davidson would prove to be a valuable addition to the Authority. Everything seemed to be in good order.

Then, much to the disappointment of those involved, it was found that if Mr. Davidson accepted the position, the nominal salary involved would force him to lose more in social security benefits than he would gain in salary. So Mr. Davidson resigned.

Underlying this incident is a regulation, under our present social security arrangement, to the effect that if one who has retired earns more than $100 a month, he must forego his social security check for that month. On an annual basis, he is docked one social security check for each $80 over $1,200 per annum, which is $100 a month.

Mr. Davidson is not an exception. In many other cases, communities have lost the services of skilled and knowledgeable experts because they cannot afford to work. This situation is ridiculous.

Mr. President, I have long supported the enactment of legislation which would remove this archaic and unrealistic limit on the amount which a person can earn while receiving social security benefits. I feel strongly that the self respect and pride of America's senior citizens is at stake. In addition, in cases such as that of Mr. Davidson, our Nation has, because of the earnings limitation, lost the services of valuable and important public servants. For many years, I have introduced in Congress a bill calling for the elimination of this earnings limitation. I sincerely hope that action along these lines will be taken when Congress this year passes its amendments to revise and improve our various social security programs.

I have been in touch with Mr. Davidson, and, of course, I sympathize with him and with the city of Rochester in this unfortunate situation. I hope this problem and many like it will be resolved by legislation which will eliminate the unneeded and unwanted limit on the amount of earnings which a person can receive while getting the social security benefits to which he is legally and rightfully entitled.

Mr. President, I ask unanimous consent that the editorial entitled "Why Penalize Man for Working?" published in the Rochester Democrat and Chronicle of April 17, be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Rochester Democrat and Chronicle, Apr. 17, 1960]

WHY PENALIZE MAN FOR WORKING?

There is something superbly ridiculous about an economic system which makes it impossible for a retired man to take a $2,500 job because he just cannot afford to. But that has happened to Norman H. Davidson of 135 Corwin Road, and thus the city and county are losing a valuable public servant.

Davidson, retired Rochester Gas & Electric Co. industrial engineer, joined the Monroe County Water Authority at the $2,500 figure. His experience was needed. But he discovered that by receiving the $2,500, he loses out in social security benefits. His pension plus social security amount to more than his pension plus the $2,500 salary. In fact he stands to lose $500 by holding the job, so he resigned.

The high priests of fund juggling, sociology and geriatrics in Washington should pay attention to this sort of zany development. If, at the very time in history when we need the brains of senior citizens, we have so rigged our economy as to make it a losing deal for them to help us out, we had better do something about it—fast.

GEN. CHARLES DE GAULLE: A WELCOME VISITOR

Mr. KEATING. Mr. President, two of America's leading columnists, Roscoe Drummond and Walter Lippmann, have in recent days paid tribute to Gen. Charles de Gaulle, who is a most welcome visitor in our midst, and to whom we listened with such great interest only a few minutes ago. Both these astute commentators conclude that General de Gaulle is one of the great men of our times and a tried and true leader of the forces of the free world.

All men of good will everywhere can surely be thankful for the resoluteness, faith, and perception of this statesman, who has brought France back from dark days to its present place of prominence in world affairs. Through his own personal magnetism and dogged perseverence, General de Gaulle has made his beloved France a keystone of our free world alliances and a valuable partner in all efforts to achieve a lasting peace.

It is particularly appropriate that this great French leader should visit the Western Hemisphere on the eve of the momentous summit conference. His coolness in the face of fire and his awareness of the methods and objectives of the men in the Kremlin will be great sources of strength to the West in these vital negotiations.

We are indeed proud and happy to welcome General de Gaulle to this country. We salute him for his accomplishments in war and in peace. We rejoice in having him as a loyal and important friend of the United States.

Mr. President, I ask unanimous consent to have the two fine articles to which I have referred, printed at this point in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[April 20, 1960]

WELCOME TO DE GAULLE—A VALUABLE, DEPENDABLE FRIEND

(By Roscoe Drummond)

On the eve of the summit, at a moment when the wisest counsels are needed in the western camp, Gen. Charles de Gaulle is a valued and cordially welcome visitor to Washington this week.

It is only fair to say to this rectilinear President of France that most Americans see him in a different light today than when he was first head of the French Government immediately after the war and later during his lonely, brooding years of enforced retirement.

What many Frenchmen feared and many Americans anticipated was that Gen. de Gaulle was biding his moment to impose an authoritarian regime on France.

Those who most feared—and those who most hoped—that this was Charles de Gaulle's ambition have had their fears proved groundless and their hopes unrealized.

The whole free world has come to esteem and value this Frenchman of towering talent and most of all to recognize:

That despite his military background President de Gaulle is a leader of great political sensitivity and suppleness.

That he is an ally, not an enemy, of French democracy.

That he is the first statesman in France who has had the courage and the vision to offer total independence to Algeria and other oversea territories.

That de Gaulle is neither intimidated by Khrushchev's threats, bemused by his soft words, nor unaware that forces inside the Soviet Union may be causing the Kremlin to want to negotiate seriously.

When the Big Four sit down in Paris next month, it is reassuring that General de Gaulle will be at the table. The way he waited to be invited to take power in France in May 1958 shows that he is fearless, cool, and perceptive. France was on the brink of rebellion. With security forces refusing to put down the revolt in Corsica, with the navy waiting under steam in the harbors of Algeria, with the members of the general staff resigning one after another in agreement with their colleagues in North Africa, and with the paratroops standing ready to board their planes for a landing in France to seize the government, still no blood was spilled, no machinegun was fired in the streets of Paris. The restraint that finally held back the young officers in Algeria was their realization that De Gaulle would not accept the supreme office of state from rebellious men.

In his first crisis De Gaulle was to prove himself a master politician. The pressure of the army in Algeria was catapulting him into power but simultaneously the army was defying the civil authority of France. What to do? To threaten his army supporters might well keep him out of office, to condone them might break France in two. He did neither. He dared to wait to be entrusted with the government at the hands of the French people and then, when his authority rested on a legal and moral basis, he ordered the military leaders to get out of politics in Algeria—and was obeyed.

General de Gaulle is no longer a suppliant ally. That is good. It is obvious that he is not a pliant ally. That is perfectly reasonable. He is rescuing the French Republic from political decay and is turning France into a source of strength to the whole free world.

Charles de Gaulle is a valuable and dependable friend. He is one of the great men of the century.

TODAY AND TOMORROW—SALUTE TO DE GAULLE

(By Walter Lippmann)

Having been one of his American admirers since June of 1940, when he raised his flag in Britain and summoned the French to go on with the war, I cannot pretend to write dispassionately about General de Gaulle. But now that he is coming back to Washington in triumph, I have been asking myself what is the secret of this famous man?

The secret is that he is more than a great man. He is a great man in the sense that he has taken a great part in historic events. But there were other great men in the war days. In adition to being a historic man, he is also, which is rarer than greatness, a genius. This is the special quality which he, and I think only he, shares with Churchill.

His genius consists in the capacity to see beneath the surface of events, to see through the obvious and conventional and stereotyped appearance of events to the significant realities, to the obscured facts and forces which will prevail. This gift, which is more than leadership as such, is second sight

into the nature of history. It brings with it the gift of prophesying what is going to happen because to the seeing eye it is already there.

The ability to see truly the significant reality carries with it the ability to convey what his vision brings him. Men like Churchill and De Gaulle do not sign ghost-written books and they do not read ghost-written speeches. For the vision is their own and they alone can communicate it.

Thus, in the bitter days of 1940 when France had fallen and Britain stood alone, it called for a great man, for a brave man, for a resolute and faithful man, to go into exile and from there to organize the French resistance. But it took genius to see how this noble but desperate venture would end, and to see that France, defeated, demoralized, and prostrate, remained one of the great powers, to see that in the end she would be—as is now the fact—among the principal shapers of the settlement with Germany.

Thinking of all that has happened in these 20 years, it occurred to me to see whether or not my memory was deceiving me. Was it true, as ever since I have believed, that in the darkest days of the most desperate of modern wars, General de Gaulle had communicated his vision of an enduring and an undefeated France?

I find that about 3 weeks after the fall of France, I had learned enough to be able to write that "in the misfortune of France it should be our fierce pride to be the last to forget the greatness of France. We must wish to be the first to remember * * * that France is indispensable, as indispensable to the maturity of Western civilization as Hellas was to its birth—and as imperishable."

I learned to say that only from General de Gaulle.

Mr. KEATING. Mr. President, in addition to these two outstanding articles, numerous editorials in the Nation's leading newspapers have saluted this distinguished visitor. One of the most perspicacious appeared in the Rochester Democrat & Chronicle on April 22. As this editorial points out, General de Gaulle has "brought order and direction, new prestige and pride to a nation concerning which they said it could not be done." This excellent editorial goes on to analyze many facets of the objectives and mission of this great leader in war and peace.

Because of the significance and clarity of the comments contained in the editorial, I ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Rochester Democrat & Chronicle of Apr. 22, 1960]

DE GAULLE

The man who made a liar out of historians and political pundits comes to Washington today for an 8-day state visit.

Frosty, remarkable old Charles de Gaulle brought order and direction, new prestige and pride to a nation concerning which they said it couldn't be done—to France.

What does he want in America? In England, they think he goes to Washington in search not of memories but of concessions. Some American speculation is in the same vein—he wants parity with England in access to the American arsenal of A-weapons. Our feeling is that the foreign editor of France's powerful newspaper, Le Monde, is a more shrewd judge.

He points out that concession seeking would be contrary to De Gaulle's concept of French grandeur; and that De Gaulle knows that he can get more from allies on all points by maintaining France's independence of them. Thus De Gaulle is resolved to ask nothing of his allies but, instead, quietly reassert his intention to follow the road he has traced to rebuild French prestige.

For all his stiff-necked conduct inside NATO, De Gaulle is a much more integrated partner of the West than he was, say, 14 years ago. Even so, he has never entirely foresworn his "third force" concept of having France—in the image of De Gaulle—act as honest broker between Soviet Russia and the West.

For himself, De Gaulle is reported to be bringing with him two new international proposals: A joint United States-Russian program of economic aid for underdeveloped nations and East-West control of arms shipments to these same emergent states. The United States is known in advance to take a dim view, understandably, of the first. The second engenders no great enthusiasm.

De Gaulle leaves behind him grave internal troubles. During his triumphal visit to London earlier this month hundreds of thousands of French farmers back home demonstrated, some violently, against De Gaulle's new agricultural policies. When Parliament reconvenes, April 26, De Gaulle will be in New York.

The mere fact that he can leave France at all in this time of stress is indicative of his power. Politically he may be losing support on both the right and the left, but a recent poll showed that 69 percent of the French people approved of his program.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had agreed to the concurrent resolution (S. Con. Res. 101) authorizing public hearings and recommendations on the bills S. 3193 and H.R. 11135, by the Joint Committee on Washington Metropolitan Problems.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H.R. 8042) to authorize the Secretary of Commerce to resell four C1–SAY–1 type vessels to the Government of the Republic of China for use in Chinese trade in Far East and Near East waters exclusively; asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. GARMATZ, Mrs. SULLIVAN, Mr. GEORGE P. MILLER, Mr. TOLLEFSON, and Mr. VAN PELT were appointed managers on the part of the House at the conference.

The message further announced that the House had passed a bill (H.R. 11510) to amend further the Mutual Security Act of 1954, as amended, and for other purposes, in which it requested the concurrence of the Senate.

ENROLLED JOINT RESOLUTION SIGNED

The message also announced that the Speaker had affixed his signature to the enrolled joint resolution (S.J. Res. 150) permitting the Secretary of the Interior to continue to deliver water to lands in the third division, Riverton Federal reclamation project, Wyoming, and it was signed by the President protempore.

HOUSE BILL PLACED ON CALENDAR

The bill (H.R. 11510) to amend further the Mutual Security Act of 1954, as amended, and for other purposes, was read twice by its title and placed on the calendar.

TREASURY AND POST OFFICE DEPARTMENTS APPROPRIATIONS, 1961

The Senate resumed the consideration of the bill (H.R. 10569) making appropriations for the Treasury and Post Office Departments, and the Tax Court of the United States for the fiscal year ending June 30, 1961, and for other purposes.

Mr. ROBERTSON. Mr. President, I ask unanimous consent to have printed at this point in the body of the RECORD, a 1-page general statement in regard to the items in the bill as reported to the Senate.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

GENERAL STATEMENT

The bill as recommended by the Senate committee contains a total of $4,877,014,000. This is an increase of $81,600,000 over the amount of $4,795,414,000 recommended by the House and a decrease of $20,839,000 under the budget estimates for 1961 of $4,897,853,000.

For the Treasury Department, the bill recommends appropriations of $837,849,000. This is an increase of $15 million over the amount of $822,849,000 recommended by the House and a decrease of $5,421,000 under the budget estimates for 1961 of $843,270,000.

For the Post Office Department, the bill recommends an appropriation of $4,037,600,000, which is an increase of $66,600,000 over the amount of $3,971 million recommended by the House and a decrease of $15,400,000 under the budget estimates for 1961 of $4,053 million.

For the Tax Court of the United States, the bill recommended an appropriation of $1,565,000. This is a decrease of $18,000 under the budget estimate of $1,583,000 for 1961 and the same as the amount recommended by the House.

Permanent indefinite appropriations are not carried in the bill. The 1961 estimates of the Treasury Department in this category are $9,625,421,245. This is an increase of $212,888,991 from the 1960 estimates of $9,412,532,254. Of this total $9,500 million is for interest on the public debt, an increase of $200 million from the 1960 estimate of $9,300 million.

Trust funds, also, are not carried in this bill. The 1961 estimate of the Treasury Department in this category is $15,114,441,230. This is an increase of $1,553,103,883 over the 1960 appropriation estimate of $13,561,337,347. Of the total trust fund estimate for 1961 by the Treasury Department, an amount of $11,721,423,651 is for the Federal old-age and survivors insurance trust fund. This is an increase of $1,543,529,606 over the 1960 appropriation estimate of $10,177,894,045.

Mr. ROBERTSON. Mr. President, I ask unanimous consent that the committee amendments be considered and agreed to en bloc, and that the bill as thus amended be regarded for the purpose of amendment as original text, provided that no point of order be considered to have been waived by reason of agreement to this proposed order.

The PRESIDENT pro tempore. Is there objection? Without objection, it is so ordered.

The committee amendments agreed to en bloc are as follows:

Under the heading "Title I—Treasury Department—Internal Revenue Service—Salaries and Expenses", on page 4, line 6, after the word "Commissioner", strike out the comma and "including not to exceed $8,000,000 for temporary employment"; and in line 8, after the amendment just above stated, strike out "$378,000,000" and insert "$393,000,000".

Under the heading "Title II—Post Office Department—Current Authorizations Out of Postal Fund Administration, Regional Operation, and Research", on page 11, line 10, after the word "increases", strike out "made as result of changes in plans"; and on page 12, line 8, strike out "$73,000,000" and insert "$73,600,000".

Under the subhead "Operations", on page 12, line 18, after the word "law", strike out "$3,100,000,000" and insert "$3,125,000,000".

Under the subhead "Transportation", on page 13, line 19, after the word "mail", strike out "$548,000,000" and insert "$549,400,000".

Under the subhead "Facilities", on page 14, line 5, after the word "Government", strike out "$161,200,000" and insert "$174,800,000".

Under the subhead "Modernization and Improvement of Buildings and Equipment", on page 14, line 13, after the word "increases", strike out "made as a result of changes in plans"; and in line 14, after the word "therefor", strike out "$88,800,000" and insert "$114,800,000".

Mr. ROBERTSON. Mr. President, I wish to present to my colleagues, and for the permanent RECORD, a brief summary of what is in the pending bill.

GENERAL SUMMARY

The Treasury and Post Office Departments have the responsibility of administering a total of nearly $30 billion of budgeted funds. Only the Defense Department appropriation is larger.

More than $24 billion of these expenditures, however, are fixed and cannot be reduced by Congress. These expenditures consist of certain permanent indefinite appropriations which are not carried in the bill. The 1961 estimates of the Treasury Department in this category are $9.6 billion. Of this total, $9.5 billion is for interest on the public debt, an increase of $200 million from the 1960 estimate.

Trust funds also are not carried in this bill. The 1961 estimate in this category is $15.1 billion, of which $11.7 billion is for the Federal old-age and survivors insurance trust fund. This is an increase of $1.5 billion over the 1960 estimate.

Details of the items comprising the Treasury Department's estimates for the general and special funds and the trust funds may be found in the tables included in the report accompanying the bill.

The bill which is recommended to the Senate provides a total appropriation of $4,877,014,000. This amount is an increase of $81.6 million over the House allowance, $75.7 million under the 1960 appropriation, and $20,839,000 under the estimates for 1961.

The increases over the House figure were approved by the committee on the basis of what it regarded as convincing testimony that to allow lesser amounts either would be false economy, because loss of essential services would outweigh the value of the attempted saving, or would merely amount to deferring action, because we would be called upon to meet obligations presented in supplementary appropriation bills before the year was over.

TREASURY DEPARTMENT

A large part of the increase—$66.6 million—was for the Post Office Department. The other major item was $15 million to enable the Internal Revenue Service to build up a more adequate work force to meet current needs.

By providing the full amount of the budget estimate, the effectiveness of the Service is increased by raising the caliber and productivity of its work force through the grade reallocation or Blue Ribbon program. Also by removing restrictive House language on temporary employees hired during peak seasons, your committee feels that it is assisting the Service in realizing its goal of obtaining maximum operating efficiency in processing by mechanical means the many million returns and related pieces of paper which they cannot now do effectively by manual methods. Lastly, the restoration of $15 million to the Internal Revenue Service will provide for approximately 2,046 additional man-years of employment over the 850 additional provided by the House. Testimony before the committee indicated that the restoration of the $15 million would result in the collection of additional revenue at least seven times the amount of the increase for enforcement purposes.

With respect to all the other Treasury appropriation items, the Department testified that it would do its best to work out necessary adjustments in the budget programs to bring them within the limits of the amounts approved in the House bill.

Thus, appropriations for the Treasury Department, as contained in title I of the bill before us, total $837,849,000. This is an increase of $15 million over the House; $5,421,000 under the estimates; and $228,024,000 under the appropriation for the current fiscal year, 1960.

POST OFFICE DEPARTMENT

Mr. President, the committee recommends for the Post Office Department, for 1961, appropriations totaling $4,037,600,000. This is an increase of $152.2 million over 1960; $66.6 million over the House allowance; and a decrease of $15.4 million under the estimate, which incidentally, is the largest ever submitted to the Congress for the Post Office Department.

Mr. President, the committee recommends $73,600,000 for the "Administration, regional operation, and research" appropriation. This is an increase of $600,000 over that approved by the House. The Post Office Department did not ask for additional employees in this appropriation and the additional funds requested were for the purpose of meeting certain mandatory increases.

The House reduction was broadly based on the belief that 90 positions could be eliminated from the Inspection Service, Internal Audit, or Field Service offices. They based their action on their understanding that the functions of these groups overlapped.

Each of us is fully aware of the importance of the work performed by the Inspection Service. The committee feels that it would be a serious error to force a reduction of a service as important to the operation of the Post Office as this. Their responsibilities are defined and fixed by law and we have been assured by the Postmaster General that there is no overlap of duties.

In both the appropriation "Administration, regional operation, and research" and that for "Modernization and improvement of buildings and equipment" the appropriation language included the phrase "including current increases in prior year contracts therefor." The House changed this to read: "including current increases made as a result of changes in plans in prior year contracts therefor." We have deleted the words "made as a result of changes in plans" in each of the appropriations. The provision as it stands after this deletion was carried in the 1960 appropriation for "Administration, regional operation, and research." This language proved most beneficial to the Department in that it permitted a continuance of research and development work on several specific contracts started in prior years out of available current year funds. In the absence of this language they would have been forced, in the absence of available prior year funds, to bring the work to a halt and execute a new contract with someone else to complete the project, or abandon the project.

Similar language will now be required in the "Modernization" appropriation, since 1961 will be the second year for this appropriation. We have therefore deleted the insertion made by the House that likewise would have nullified the intent of the language in this appropriation also.

The language inserted by the House was done after and without discussion in the hearings, and apparently without the full recognition of the impact of such a change on the research contracts which are contained in both the "Administration, regional operation, and research" appropriation, and that for "Modernization."

The House reduced the Department's estimate for the "Operations" appropriation, from which all operating expenses of post offices are paid, by $35.3 million. The reduction was made on the apparent premise that improvements in equipment and methods could effect a saving of that magnitude. This committee recommends a restoration of $25 million of this reduction, which is $10.3 million less than that requested by the Postmaster General. The committee has taken into consideration the many improvements in management and efficiency which have been brought about in recent years and reflected in the Department's estimates. We do not believe, however, that the mail volume of 66.4 billion pieces will be reached and the operating appropriation has been reduced accordingly. However, if the full mail volume estimated by the Department is reached, and it cannot meet its requirements by use of its trans-

fer authority, there is nothing to preclude its coming back for additional funds.

Under the present administrative rules of the Post Office Department, mailers may use the simplified address for mail for all rural routes or box holders in post offices where there is no city delivery service. The simplified address is that mail for rural patrons at all offices or box holders in noncity delivery offices may receive advertising circulars addressed simply to "Postal patron" with no other address required. For all mail addressed to city delivery offices other than rural delivery, all mail must be addressed to house number, street, and city. The term "occupant" may be used in place of the name of the addressee but all other elements of the address must be shown.

By administrative action the Department has the authority to issue regulations that would permit the use of the so-called simplified address for mail at all points including city delivery carrier offices. Under this arrangement it would merely be necessary to provide each postmaster with enough pieces of mail, without name or address, to distribute to each patron of the city. A regulation of this type was issued by Mr. Farley and because of the tremendous number of complaints received, the authority for such mail was discontinued. Postmaster General Summerfield also attempted to permit the use of this type of mail and for 18 months the regulation was in effect. The Post Office Department was swamped with complaints. The order was then rescinded. Members of both Houses of Congress, in the posting of their official mail, must now adhere to the same rules and regulations that apply to the general public; namely, mail going to any rural route may be with "simplified address" (no name or address); mail to city carrier post offices must bear at least the house number, street, and city.

The House inserted language in the appropriation for operations that the money appropriated "including expenses of delivery to postal patrons of mail matter under congressional frank, now authorized by law." This committee does not consider that this language changes the basic law in any manner and does not in itself require the Post Office Department to make any changes in its present rules and regulations with respect to the use of the so-called simplified address for any mail, including that for Members of Congress.

The House reduced the appropriation for the transportation of mail by $2.4 million. This committee recommends that $1.4 million be restored leaving a reduction under the Department's estimate of $1 million. This reduction is based on the same premises made for operations in that the economic outlook at this time does not indicate that the full volume of mail to be transported will actually materialize.

Starting in 1953, the Post Office Department experimented with the using of available space on commercial airlines for the transportation of ordinary first-class mail. This space would not have otherwise been used and the Civil Aeronautics Board established a rate of about 50 percent of the cost for transporting regular airmail. It was started as an experiment. The experiment was successful in expediting first-class mail on the original segments. Because of controversial opinions as to legality of the airlift, legislation was introduced to clarify the authority of the Postmaster General to fly first-class mail. After full hearings, the Senate Post Office and Civil Service Committee reported that in their opinion the Postmaster General had ample authority to transport mail other than airmail and air parcel post by air at rates set by the CAB. On March 25, 1960, the CAB issued an interim rate order authorizing the transportation of first-class mail on 62 additional segments on a space-available basis at 50 percent of the regular cost for transporting regular airmail.

Representatives of the Post Office Department testified that the continuation of airlift mail would not result in a decrease in revenue for railroads. As a matter of information, the budget submission provides for $344.2 million in 1960 for the railroads, and $348.7 million for payment to the railroads in 1961.

If the rates for transporting airlift mail are compared directly with the rates for transporting the same volume of mail by railroads, the rate charged by the railroads is less. However, the Post Office Department must consider all aspects and elements of costs. With the adjustments of all costs affecting both rail transportation and airlift mail, the Department claims that overall cost for transporting the preferential mail by air is no greater than that by railroad for the same volume of mail. The committee feels that this is a legislative matter and not one for determination by the Appropriations Committee.

In the appropriation structure of the Post Office Department there are two principal appropriations that include capital expenditure items. Under the facilities appropriation an estimate of $68,250,000 was included for the "regular capital program." In the postal modernization appropriation the Department included $80 million for capital items used exclusively for modernization and for accelerated research work.

The House, in an effort to put similar capital items in one appropriation, transferred $38.8 million from the regular capital program of the facilities appropriation for building and equipment improvement to the appropriation for modernization. This reduced the Department's estimate for all of facilities in the amount of $213.6 million to $174.8 million. At the same time this transfer increased the provision for modernization from $80 million to $118.8 million. The transfer of the $38.8 million for building and equipment improvement from facilities to modernization changed the context of the postal modernization appropriation and the House properly changed the title to the more fitting one of "modernization and improvement of buildings and equipment"; the title of "postal modernization" was then dropped. The House then recommended $161.2 million for facilities, a reduction of $13.6 million from the estimate.

This committee recommends the restoration of the entire $13.6 million and the allowance of the full request of $174.8 million. It is from this appropriation that the cost of space for which commitment is generally made more than a year in advance, and supplies and all regular equipment for the entire postal service must be paid. These are fundamental elements of cost for which we feel there should be no reduction in funds.

The Department's 1961 request for this program, which is based on the modernization program authorized by Public Law 85–426, was for $80 million. As explained under the facilities appropriation the House transferred $38.8 million in capital funds to this appropriation from facilities. This increased the estimate under this head to $118.8 million. The House allowed $88.8 million, a reduction of $30 million in this vital program. This committee recommends that $26 million of this reduction be restored, giving the Department $114.8 million which is $4 million less than their estimate. This vital program for modernizing postal plant must go forward.

The amount to be appropriated under this heading will be paid into the postal fund as revenue but it does not carry with it any additional obligational or expenditure authority for the Post Office Department. This appropriation is simply the means by which the Congress determines the portion of the Department's cost which should be borne by the general taxpayer and which is therefore to be excluded from consideration in fixing postal rates. This procedure was established by the Postal Policy Act of 1958—Public Law 85–426, title I.

Last year was the first year an appropriation was made under this provision and the Senate Appropriations Committee held extensive hearings on the subject. All interested parties were given full opportunity to present their views. After full consideration of all the testimony, the committee recommended an appropriation of $37,400,000 and set forth its views in its report as to why the appropriation should be limited to that amount. This action was approved by the Senate and subsequently by the House in the enactment of the 1960 appropriation act.

In submitting its estimates this year, the Post Office Department conformed exactly with the procedures adopted by the Congress last year in determining the amount of payment for public services. On this basis, the estimates for 1961 come to $49 million. The increase is attributable to some increase in mail volume and to increases in basic postage rates which serve to increase the rate concessions for which the Department should be reimbursed. The committee recommends approval of the $49 million as determined by the House.

Mr. President, in view of the interest that was manifested last year in the item for payment for public services, which reduces the total of the so-called debt or

deficit of the Post Office Department, I have an explanation of some testimony before the subcommittee questioning the method of computing the allowance for public services. I ask unanimous consent that the analysis of the testimony before our committee, and the answers given by the Post Office Department in explanation of how the allowance for public services was computed, may be inserted in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

ANALYSIS OF TESTIMONY ON PAYMENT FOR PUBLIC SERVICES—H.R. 10569, PAGE 10, LINES 8–14

TECHNICAL SUMMARY

1. During the hearings on the 1961 appropriations before the Senate Appropriations Subcommittee, certain statements or allegations concerning the Department's estimates for public services were introduced into the record which challenged the validity of the estimates. The more important of these appear on the attached sheets, together with the Post Office Department's reply to each.

2. Further information concerning the payment for public services introduced into the record by the Post Office Department appears as follows:

(a) Summary statement by the Postmaster General, pages 385–386.

(b) Justification, pages 318–319.

(c) Historical background statement, pages 319–322.

3. The new language appearing this year in the appropriation for public services does not represent substantive legislation. It was added by the House at the request of the Post Office Department in order to eliminate all uncertainty as to the specific items of public service which the appropriation is intended to cover. Last year the items covered by the appropriation were enumerated in the report of the Senate Appropriations Committee. The new language makes it unnecessary to rely on legislative history for interpreting the purpose of the appropriation. The language added is as follows: "for the loss resulting from the transmission of matter in the mails free of postage or at reduced rates, and for the additional cost of transporting mail by foreign air carriers."

4. Last year the Senate Appropriations Subcommittee held extensive hearings on the matter of payment for public services at which all witnesses, public and private, desiring to be heard were given an opportunity to testify (see last year's hearings on H.R. 5805, pp. 151 through 235). After considering this testimony, the Senate Appropriations Committee on May 21, 1959 (Rept. No. 305) reported out H.R. 5805 with an appropriation of $37,400,000 for public services. In this report (pp. 9–11), the committee outlined in full its reasons for arriving at this amount. The amount recommended was accepted by the Senate and the House and was appropriated in Public Law 86–39.

ALLEGATION

By using the "loss from revenue foregone" rather than "total loss" on mail transmitted free of postage or at reduced rates in computing payment for public services for this category of mail, business users will be required to pick up the loss on the mail of many of their nonprofit competitors in violation of the Postal Policy Act.

POST OFFICE DEPARTMENT REPLY

Reduced-rate and free mailings occur in the second-, third-, and fourth-classes of mail. None of the rates proposed for these classes of mail are above cost and in the case of second-class mail, the proposed rates will still remain well below cost. Therefore, regardless of what method is used in computing the public services reimbursement for reduced-rate mailings, it will not affect the amounts paid by the regular users of these mails and they will not be paying for any portion of the loss from reduced-rate mailings. Any concession between regular and reduced rates is fully reimbursed by the Treasury.

If, for example, third-class rates were to be set in a manner to achieve full cost coverage, business users would be paying only for the service which they receive. Full cost coverage on nonprofit mailings would be achieved by having the Treasury pay for any revenue concessions, rather than through charging the above cost postage on regular mailings.

ALLEGATION

In submitting its 1961 budget estimate, the Post Office Department has violated the law by omitting estimates for three items identified as public services in the Postal Policy Act of 1958.

POST OFFICE DEPARTMENT REPLY

Following the approval of the Postal Policy Act of May 27, 1958, the Post Office Department promptly submitted to the Senate Appropriations Committee estimates of public service losses for 1959 aggregating $171,259,000. These covered all of the items enumerated in the act except "loss" resulting from the operation of the star route system and third- and fourth-class post offices. This was omitted because the Department knew of no way and still knows of no way by which such "loss" if any, can be determined. It has been supported in this conclusion by the findings of the General Accounting Office.

The Senate Appropriations Committee on August 13, 1959, recommended that action on the proposed appropriation be deferred and that the item be resubmitted in the next Congress. The same estimates were accordingly resubmitted early in 1959 to the House for inclusion in the second supplemental appropriation bill but were again rejected, this time by the House Appropriations Committee on the grounds that there was no urgency requiring such an appropriation in a supplemental bill.

For fiscal 1960, the Post Office Department submitted estimates for public service losses aggregating $172 million computed on the same basis as for 1959. The House Appropriations Committee initially rejected the estimates in their entirety. The Senate Appropriations Committee, however, after hearing all interested parties desiring to be heard recommended an appropriation of $37,400,000. The committee outlined in detail its reasons for reducing the amounts estimated by the Department, item by item in its report of May 21, 1959 (S. Rept. No. 305) which included the following statement:

"The committee has carefully reviewed the question of a proper charge to the general fund of the Treasury for what the Postal Policy Act defines as 'public services' rendered by the Department. This is especially significant because the act (sec. 104(b)) places upon the Congress the responsibility for determining the measure of these services in the appropriation act, and then provides that postal rates and charges are to be adjusted from time to time so that postal revenues, including payment for these public services, will cover all postal expenditures.

"The estimate submitted by the Department, it was developed, represented one possible method of computation of reimbursable public services. Evidence from the Department and other sources clearly indicated that lesser amounts were intended also to be considered and were in fact more appropriate."

The committee's comments on the three specific items for which no appropriation was made were as follows:

"Loss on star routes and small post offices: The Department has stated that no loss could be computed for these items. The committee goes further and believes that losses cannot be attributed to these integral parts of the postal system and designated as public services any more than losses can be attributed to truck transportation or the accounting and other staff services which are essential to successful operation of the whole postal system. Therefore the committee recommends this item be disallowed.

"Loss on nonpostal services for other agencies: While the Department estimates it supplies $16,500,000 worth of services to other agencies (mostly free rental in post office buildings), it acknowledges that it receives in return some $40 million of free services from other Government agencies.

"The committee concludes that it would be unfair to recognize only one side of the transactions and recommends no net amount be allowed for this purpose.

"Loss on special services: This represents the net difference between fees and expenses for special services such as collect-on-delivery, insured mail, special delivery, and money orders. These special services should be self-supporting to the extent practicable and the committee expects the Postmaster General to take necessary steps to bring fees and expenses into reasonable balance. When this is done there will be no residual loss to be supported by the general taxpayer as a public service. The committee, therefore, recommends the item be disallowed."

In conference the Senate action on the appropriation was accepted and the amount of $37,400,000 was incorporated in the Department's appropriation for fiscal 1960.

In the Postal Policy Act, the Congress is clearly charged with the responsibility for determining the amount to be allowed for public services. In view of the foregoing congressional actions, the Department considered that the Congress had established the pattern under which appropriations for public services were to be made. It therefore made its estimates for fiscal 1961 in exact conformity with the concepts and procedures followed by the Congress in making the determination for fiscal 1960. To have done otherwise would have been to exceed the Department's responsibility in this matter.

The House passed the 1961 appropriation bill on this basis.

ALLEGATION

In 1957, a Citizens' Advisory Council to the Senate Post Office and Civil Service Committee reported that the total cost for public services of the Post Office Department amounted to approximately $400 million.

POST OFFICE DEPARTMENT REPLY

Under the authority of Senate Resolution 33, 84th Congress, a Citizens' Advisory Council was appointed by the chairman of the Senate Post Office and Civil Service Committee to examine postal operations, including rates, and make recommendations with respect thereto. In its report dated February 26, 1957, the council enumerated a list of so-called public welfare items totaling $392.4 million which exceeded the total postal deficit for fiscal 1955 of $362.7 million. This list included two items that had never even been considered by Congress as public welfare items. One was a hypothetical loss on parcel post business diverted from the postal service by the restrictions placed on size and weight of parcels moving between first-class post offices. The other was the loss on postal cards. These two items amounted to more than $100 million.

The Post Office Department in a detailed item-by-item reply to the council's report submitted to the Senate committee, estimated the public service element of the remaining items at $29.2 million at that time.

The Advisory Board of the Post Office Department, which is appointed by the President, disagreed strongly with the report of

the Citizens' Advisory Council and appropriately pointed out that, "the composition of the Citizens' Advisory Council, with four of its seven members affiliated with the publishing industry, makes its conclusions questionable."

ALLEGATION

In 1954, Price Waterhouse & Co. reported to the Senate Post Office and Civil Service Committee that the cost of public services amounted to approximately $300 million.

POST OFFICE DEPARTMENT REPLY

Price Waterhouse & Co. were retained by the Senate Post Office and Civil Service Committee to make certain studies in connection with Senate Resolution 49, 83d Congress, 1st session. Item 2 of this resolution directed the committee to consider the costs of services performed by the Post Office Department for other Government departments and of expenditures which can be justified only on a national welfare basis. Price Waterhouse & Co. in its report of November 18, 1953, estimated these costs at $274 million in fiscal year 1952, but pointed out that $107 million of this amount had since been eliminated from the postal deficit by legislative action.

In reporting on this finding by Price Waterhouse & Co., the Advisory Council appointed under Senate Resolution 49, made the following statement (p. 18, S. Rept. No. 1086, 83d Cong., 2d sess.):

"Section 2 of Senate Resolution 49 directed the committee to consider the costs of services performed by the Post Office Department for other Government departments, and of expenditures which can be justified only on a national welfare basis. Price Waterhouse estimates that these costs, all of them now charged to the Post Office Department, amounted to $274 million in fiscal year 1952. Of this amount $107 million, representing the cost of penalty and franked mail and the cost of the airline subsidy, is no longer chargeable to the Post Office Department because of legislation adopted in the 1st session of the 83d Congress. Of the remaining $167 million, $101 million represents the cost of services which are justified only on a national welfare basis. (See pt. II-A for details concerning the remaining items.)"

The Price Waterhouse & Co. study found that in 1952 the loss of revenues because of reduced rates to nonprofit and other organizations amounted to $13.7 million. This amount was included in the $274 million for public services developed by Price Waterhouse & Co. but is not included in the $101 million of national welfare items referred to by the Advisory Council.

Mr. ROBERTSON. Mr. President, I yield to the Senator from Pennsylvania [Mr. CLARK].

Mr. CLARK. Mr. President, I should like to compliment the distinguished junior Senator from Virginia for the report on the Treasury and Post Office appropriation bill which he has brought before the Senate.

As many of my colleagues know, I have long been particularly interested in that part of this appropriation which deals with increased personnel for the Internal Revenue Service. Last May, when the Senate was considering the 1960 appropriation bill, I called attention to the fact that there were 3,076, or 13 percent, fewer enforcement personnel in the Internal Revenue Service at the end of fiscal 1958 than there were at the end of the Truman administration, although the workload of the service had increased by more than 15 percent.

I proposed an amendment to the bill to appropriate sufficient funds to permit the hiring of 2,350 new revenue enforcement personnel in addition to the 726 for whom funds were provided in the budget. Adoption of the amendment would have brought the IRS enforcement employees up to the 1952 level again.

The amendment was defeated last year by a six-vote margin, after it was announced during the floor debate that high administration officials had stated that the Internal Revenue Service could not possibly absorb 3,000 additional enforcement employees. The distinguished minority leader added it would be impossible to recruit that many new persons, and that all we needed to do was to provide a pay increase to get better enforcement results.

I was happy to see that this year the administration had made a complete about face.

The Treasury Department this year asked for practically the same number of employees which I urged should be appropriated for last year, and at the hearings on this year's appropriation bill the distinguished junior Senator from Virginia [Mr. ROBERTSON], who is in charge of the bill, asked Commissioner Latham the following question. I read now from page 29 of the hearings:

I understand you feel that you can recruit, hire, and train the additional employees that you are asking under the full budget estimate.

Mr. LATHAM. We do.

The entire amount requested by the Internal Revenue Service was approved by the committee, thus restoring the $15 million cut made by the House. For this I desire again to commend the Senator from Virginia and the other members of the committee.

The effect of the restoration of the $15 million will be that 3,000 new IRS employees will be obtained, almost restoring the staff to approximately the level it had at the time when the Truman administration left office.

The need for additional personnel has been very clearly established by the Commissioner, who testified, as shown on pages 27 and 28 of the record, that between $25 billion and $26 billion of otherwise taxable income is not reported each year for tax purposes, with a resulting tax loss of several billion dollars. The dividend gap alone is over $1 billion. The interest gap is over $4 billion.

By reason of inadequate auditing facilities and personnel, only 3 percent of the 93½ million tax returns filed annually are being audited; only 1.7 percent of returns showing $5,000 income or less, only 53 percent of those returns showing $50,000 income or more, and only 86 percent of the corporate returns for corporations in the $50 million to $100 million asset bracket. The employment of these 3,000 persons will permit the number of returns audited to go up substantially.

Mr. President, I am quite confident the end result will be substantially increased revenues needed to carry into effect the programs appropriated for by the Congress.

I think as a result of the much to be commended right-about-face of the administration, with its present desire to do what last year it said it could not do, we will find the tax income for fiscal 1961 will swell substantially above the budget estimates. I have been advised that the budget estimates do not include any sum whatever as the result of the taking on of the additional personnel for which funds were requested. I think the facts are clear, and I believe we will get many hundreds of millions of dollars of additional tax revenue as a result of this wise change of position by the administration and of the strong support given the administration by the Senator from Virginia [Mr. ROBERTSON] and his committee.

Mr. President, I hope the restoration will be unanimously approved by the Senate. I am confident the conferees will stick to the Senate figure, in order to see to it that we come closer to paying for needed public services, to balancing the budget and to making a payment on the national debt than we could otherwise do.

I thank the Senator from Virginia for yielding.

Mr. ROBERTSON. Mr. President, I appreciate very much the highly commendatory remarks of my colleague from Pennsylvania.

For the benefit of our other colleagues in the Senate, I will say that our subcommittee was unanimous on the restoration of the $15 million item for the Internal Revenue Service, and the full committee was also unanimous. According to the testimony, we have been losing millions of dollars of revenue as a result of having insufficient personnel and equipment to collect money from those millions of persons who file tax returns which have to be processed.

As the Senator from Pennsylvania has pointed out, the minimum additional tax revenue which is anticipated to result from the employment of these additional tax collectors is $7 for every $1 expended.

As the Senator from Pennsylvania says, we hope the Senate will fully agree with our position. The amendment technically has been adopted, subject to further change. We hope also that the conferees will consider this is an investment in collecting more tax revenues.

The PRESIDING OFFICER (Mr. GORE in the chair). The bill is open to amendment.

Mr. WILLIAMS of Delaware. Mr. President, I send to the desk an amendment and ask that it be stated.

The PRESIDING OFFICER. The clerk will report the amendment.

The LEGISLATIVE CLERK. On page 12, line 19, after the "000,", change the "," to ":" and strike out all remaining language down to and including line 20.

Mr. WILLIAMS of Delaware. Mr. President, the purpose of the amendment is very simple. It would repeal that language in the bill which proposed to extend the Members of Congress franking privileges for bulk mail, or what is commonly referred to as junk mail. Unless this amendment is adopted it will mean that Members of Congress can flood their States with political propaganda at the taxpayers' expense by the simple expedient of making speeches in

the CONGRESSIONAL RECORD and then reprinting and distributing them to everybody in the State.

The committee states that it has no intention of changing the existing law as it relates to the franking privilege of Members of Congress; therefore this amendment is in order.

If the amendment is adopted, the existing law will be left the same as it is now. At the time the language was approved by the House of Representatives it had been offered and supported by the sponsors for a specific purpose; namely, to provide Members of Congress with the franking privilege on bulk mail, or the so-called junk mail.

When we raised the postage rate a few years ago, we changed the provision as it relates to private industry, and we provided that such mail may be sent only to specific addressees and not just tied together in a bulk package and sent to city post offices for distribution to each boxholder. We changed that language so far as private industry is concerned. We in Congress should now live by the same rules that we have laid down for private industry. If we do not adopt this amendment it will be possible to send out over our franks an almost unlimited quantity of all kinds of political propaganda at taxpayers' expense.

We need the franking privilege for Members of Congress in respect to answering their correspondence. Certainly we must have that privilege for that purpose. However, we should not rush in promiscuously and start circulating all the people in our individual States at the taxpayers' expense.

As I said before, the Committee on Appropriations has plainly stated in its report that it does not intend to change existing law and that the language in the bill is merely a repetition of existing law. If that be true, then we should strike out the language as unnecessary. It is not the customary practice for the Senate to restate existing law in an appropriation bill. The danger that I fear if we do not adopt the amendment, is that with this language in the bill, there will be nothing in conference. We will have the situation wherein this language will have one interpretation in the House of Representatives, and the Senate will have another interpretation. Under those circumstances it would be impossible for any Postmaster General or Solicitor to know what Congress actually meant.

I have been advised that even if we leave this language in the bill, the present Postmaster General and his Solicitor intend to interpret the language as providing no change in the franking privilege; however, their successors may make different interpretations. This would be possible because the House in approving the language did give it an entirely different interpretation than did the Senate committee.

The easiest way to clear up that situation is to strike the language from the bill. As everybody recognizes, by doing that we would leave in existence the present law. Therefore, I urge the Senate to strike out the language by approving this amendment. Let us make it clear that we are leaving the law as it was. Let us make it clear that the Senate does not intend that the franking privilege of Members of Congress be used on bulk mail.

Mr. HRUSKA. Mr. President, I should like to associate myself with the thoughts and reasoning of the Senator from Delaware [Mr. WILLIAMS] in connection with the merits of refraining from extending the franked mail privileges to areas where there is house-to-house delivery. So far as I have been able to discover, while an amendment to the existing statute was adopted in the other body, no provision was made for any additional funds to defray the cost of carrying the additional franked mail that would go to house-to-house delivery.

Would not that constitute another good and valid reason why this amendment should not be used as a vehicle to achieve that type of delivery?

Mr. WILLIAMS of Delaware. In my opinion, our frank should not be used to send out that type of mail. It is correct that no additional funds were allowed in the bill to take care of the extended franking privilege. We must recognize, however, that the funds cannot necessarily be separated once the Department gets them. The Department would have, under the House bill, $3,100 million with which to pay the expenses of the Post Office Department, including the cost of the mail-franking privilege.

If this language is stricken, there can be no possible misunderstanding but that it is the clear intention of the Senate that the existing law will not be changed in any way.

We are not changing the present franking privilege of Members of Congress for use in answering our official mail, but we are not expanding it to the point where it can be used for the sending of political propaganda to every boxholder in the State.

Mr. HRUSKA. I agree with that conclusion. I think the proposal is something desirable. The question is how to achieve the objective most desirably.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. LAUSCHE. Am I correct in my understanding that the House, in amending the language of the bill by inserting the words "including expenses of delivery of to postal patrons of mail matter under congressional frank as now authorized by law" definitely declared that the purpose of the language was to give the Members of Congress the right to send, under the franking privilege, mail without addressing it, but merely to dump it into the postal service in batches, to be delivered unaddressed to mailees?

Mr. WILLIAMS of Delaware. That is the very clear intention of the language as approved by the House. It was so stated at the time the amendment was offered.

The House adopted the amendment with the clear understanding that that interpretation would apply. My feeling is that the Senate cannot afford to accept the language exactly as the House passed it and salve our conscience by saying that we are putting a different interpretation on it.

If the question were ever raised in court how could it possibly interpret the intent of Congress, with the House of Representatives placing one interpretation on the language, and the Senate placing another interpretation on it? If we wish to keep the existing law, I believe we have no alternative except to strike the language inserted by the House.

Mr. LAUSCHE. Is it not true that under the interpretation of this language as given by the House committee, every Member of the House or the Senate would be able to dump into the postal service an unlimited batch of mail without its being addressed; and that when that was done the mail service in Cleveland, let us say, would have to deliver that mail from house to house?

Mr. WILLIAMS of Delaware. That is correct.

Mr. LAUSCHE. That means, does it not, that the citizens of Cleveland, if I so determined, would be subjected to the annoyance of receiving mail matter from me in the same form as they are now receiving untold quantities of junk mail?

Mr. WILLIAMS of Delaware. Would the Senator please restate his question?

Mr. LAUSCHE. The citizens of Cleveland would be subjected to the annoyance of receiving unaddressed mail from me, as a Senator, or from some other Member of Congress, in the same manner as they are now receiving huge quantities of junk mail?

Mr. WILLIAMS of Delaware. That is correct; and that certainly never was intended by the Committee on Appropriations, nor do I think it is intended by the Senate.. The franking privilege was granted Members of Congress for the purpose of sending bona fide mail. It is very important to have the franking privilege for that purpose, and I will defend it, but we should not extend the franking privilege to unnecessary mail.

Mr. LAUSCHE. Am I correct in understanding that we are being urged to accept language under a declaration made by the postal authorities at present in office that they will interpret the language differently than has been declared to be its meaning by the other House?

Mr. WILLIAMS of Delaware. That is true.

Mr. LAUSCHE. On the basis of the present official statement that the Department will interpret the language differently from the House interpretation, the Senate is asked to find solace and comfort and to adopt the amendment?

Mr. WILLIAMS of Delaware. Not exactly. The amendment would strike out the language which the Senate committee says is superfluous and therefore harmless. I am not satisfied with that reasoning. There may be a different Postmaster General and a different Solicitor who will interpret the language as it was interpreted by the House. There would be nothing we could do about it then. The adoption of my amendment would definitely settle the issue. You cannot ignore the fact that the language was designed to be included in the bill

with the definite intention of making it possible to provide door-to-door delivery of unaddressed franked mail.

Mr. LAUSCHE. I commend the Senator from Delaware for raising this issue. I myself do not subscribe to his views that, over all, the sending of franked mail serves a great purpose. I understand the benefits which result from communication; but altogether too frequently the franking privilege is used, not for the purpose of informing and edifying the minds of the citizenry, but for the purpose of edifying ourselves on the political level.

Mr. WILLIAMS of Delaware. I do not question the fact that there has been abuse of the franking privilege even as the law now stands. I do not condone that abuse; however, the least we can do at this time is to refuse to expand the chance for abuse.

Mr. MANSFIELD. Mr. President, will the Senator yield to permit me to propound a unanimous-consent request?

Mr. WILLIAMS of Delaware. I yield to the Senator from Montana for that purpose.

ORDER FOR ADJOURNMENT TO WEDNESDAY

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the Senate completes its business today, provided action on the pending bill is completed, the Senate adjourn until 12 o'clock noon on Wednesday.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

ANNOUNCEMENT OF MEETING OF DEMOCRATIC POLICY COMMITTEE ON WEDNESDAY MORNING

Mr. MANSFIELD. Mr. President, I announce that it is hoped to have a meeting of the Democratic policy committee on Wednesday morning, and that at that time it will be possible to clear the mutual security bill for consideration by the Senate. It is hoped that it will be possible to bring the bill before the Senate sometime the latter part of this week.

TREASURY AND POST OFFICE DEPARTMENTS APPROPRIATIONS, 1961

The Senate resumed the consideration of the bill (H.R. 10569) making appropriations for the Treasury and Post Office Departments, and the Tax Court of the United States for the fiscal year ending June 30, 1961, and for other purposes.

Mr. ALLOTT. Mr. President, will the Senator from Delaware yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. ALLOTT. I commend the Senator from Delaware for what he has said. I do not believe there is any member of the committee who is not wholeheartedly against the interpretation of the language which was made by the House. I joined with the Senator in his views earlier, and I join with him now. I am opposed to what the Senator believes this language might be interpreted to accomplish.

In the opinion of the Senator from Delaware, would the adoption of his amendment remove any of the present existing franking privileges?

Mr. WILLIAMS of Delaware. The adoption of my amendment would leave the existing law as it now is.

Mr. ALLOTT. I simply wanted to make certain that that is the clear intention.

Mr. WILLIAMS of Delaware. That is the clear intention. Certainly there cannot be any other interpretation, because if this amendment is adopted all reference to any change in the law will have been stricken from the bill.

Mr. CURTIS. Mr. President, I simply desire to support the amendment offered by the Senator from Delaware.

Mr. WILLIAMS of Delaware. Mr. President, I understand the Senator from Virginia is willing to accept the amendment. If so, I have no desire to continue the discussion.

Mr. ROBERTSON. Mr. President, the Senator from Virginia is willing to accept the amendment, but on a different theory from that which has been presented to the Senate. This is the language contained in the House report:

> The committee has inserted language in the bill, the purpose of which is to make clear, on its face, that funds in the bill are available as now authorized by the postal laws, for expenses of delivery to postal patrons of mail sent under the frank.

That is the present law, under which we frank our official mail. That was all the language did.

The Department says that that does not put any compulsion on them to deliver franked mail to unaddressed box holders in cities that have postal carriers. The Department did not request any change in the language of the bill, and in the committee's opinion no change in the bill was necessary, because all that the House report did was to express the pious hope that the Department would voluntarily change the rule. The change had been attempted when General Farley was Postmaster General, but he gave it up. The change was tried later, but was again given up. The Department was very much opposed to doing something that would result in great additional expense, without bringing in additional revenue, and also would provide special privileges which no one else enjoys. But as I have stated, did not request deletion of the language.

So the Senate committee included the following language in its report:

> With reference to new language included in the bill by the House relating to postal patrons of mail matter under congressional frank, the committee does not consider that the language is any extension of the franking privilege currently being administered by the Post Office Department.

But in view of the insistence of the distinguished Senator from Delaware, the chairman of the subcommittee is willing—because he agrees that the amendment does not do any more than the committee report does—to accept this amendment; but that will put this measure into conference, whereas it would not otherwise have to go.

Mr. WILLIAMS of Delaware. I appreciate that. But the Senator from Virginia did not read all of the House report.

In order that there will be no misunderstanding of what the House intended, I read from page 17 of the House committee report, the sentence which immediately follows that part read by the Senator from Virginia:

> It anticipates return to a method of addressing city delivery franked mail followed on previous occasions, as has long been the case with rural and star route mail.

The House statement in full is as follows:

> The committee has inserted language in the bill, the purpose of which is to make clear, on its face, that funds in the bill are available, as now authorized by the postal laws, for expenses of delivery to postal patrons of mail sent under the frank. It anticipates return to a method of addressing city-delivery franked mail followed on previous occasions, as has long been the case with rural and star-route mail. This would facilitate communication with constituencies in consonance with concepts inherent in the granting of the frank.
>
> Such a procedure would ensure complete service being available to every Member to reach every person and every family in his district in the distribution of Government publications and information on the questions and issues pending before the Congress. No patron would be denied the information which it was intended he should receive under the frank. Presently, it is virtually impossible, even after substantial effort and expense, to adequately cover the district.
>
> And, it also anticiaptes economy of operation, for the testimony of postal officials is conclusive that it costs the Treasury less when city-delivery mail is addressed in manner similar to that now obtaining for rural and star-route service.

Therefore, it is very clear, both from the House committee report and from the debate on the floor of the House, that at the time when the House passed the bill the House clearly intended that this language should be interpreted in such a way as to extend the frank-mailing privileges to cover bulk mail.

If we adopt my amendment and strike out the language on which the House would hang its interpretation, there could be no such interpretation.

Mr. LAUSCHE. Mr. President, will the Senator from Delaware yield?

The PRESIDING OFFICER (Mr. GORE in the chair). Does the Senator from Delaware yield to the Senator from Ohio?

Mr. WILLIAMS of Delaware. I yield.

Mr. LAUSCHE. If it is correct that the language now included means nothing, and that the law will remain exactly as it now stands, even with the added language, why did the House include the language in its version of the bill?

Mr. WILLIAMS of Delaware. It is very clear why the House included the language. Their report clearly states that it was their intention to expand the franking privilege.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Delaware.

The amendment was agreed to.

Mr. CURTIS. Mr. President, I have an amendment at the desk. I ask that the amendment be read, and that it may be considered at this time, notwithstanding that it constitutes legislation on an appropriation bill.

The PRESIDING OFFICER. Without objection, it is so ordered; and the amendment will be stated.

The LEGISLATIVE CLERK. On page 14, following line 22, it is proposed to insert:

There may be enclosed with, attached to, or endorsed upon third- and fourth-class mail, of parcels containing medicines, either in writing or otherwise, the instructions and directions for the use thereof.

Mr. CURTIS. Mr. President, I have no desire to delay the Senate. This amendment will make it possible to send medical prescriptions through the mails, notwithstanding that the directions are written by hand or in typewriting on the bottles or other containers, without having to pay first-class postage.

Some of the poor people who live far removed from drugstores are compelled, under a regulation, to pay $2 or $3 first-class postage on such parcels, whereas the parcel-post postage should be perhaps 15 cents.

I ask unanimous consent to have printed at this point in the RECORD a further explanation and some illustrations of what is involved in this situation.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR CURTIS

The purpose of this amendment is to stop the charging of first-class postage on medical prescriptions when they are sent through the mail.

One letter I received states:

"I had to mail a prescription to a neighboring town"—

and the town is named, and there being no drugstore there.

"The prescription came to $3.50, and the postage was $2.28, it being liquid in a bottle. Kind of burns when such charges are needed to get a package 10 miles down the road. I know you can't do anything.

"I have written to Senator CURTIS in the past, but guess that nothing can be done as yet; also to the Postmaster General."

Another druggist writes:

"Just a line to let you know what I ran into this morning in the way of postal regulations, which didn't seem right.

"It seemed like they are penalizing the druggist. The postal regulations say that a prescription which is mailed must go first class, not parcel post, because there is a message attached to the bottle. The weight was 5 pounds, 4 cents per ounce, and the parcel cost was $3.20."

HARDSHIP ON DRUGGISTS

A druggist I had known for many years sent me a copy of the letter he had written to the Department:

"The enforcement of a recent order by the Post Office Department that prescriptions bearing directions, either handwritten or typewritten, are required to pay first-class postage is providing a hardship to many customers in rural areas.

"We recently mailed such a parcel to a customer in a neighboring town. The postage was $1.80, almost as much as the charges for the prescription. It is impracticable to mail the label separately, as we are responsible for the proper labeling of all prescriptions, and especially where there are several prescriptions in one package, which would cause confusion. It seems unreasonable to charge four times the parcel-post rate simply because the labels are typewritten instead of being printed."

Then I would like to read two sentences out of another letter:

"The canceled stamps enclosed are for two very small containers in which two prescriptions were mailed from Auburn, Nebr., to Adams, Nebr. We have been getting mail from there for 10 years and never at this rate of postage."

It goes on to say:

"My husband is 67. We paid out $700 this past year for medicine and doctor's bills. Orinase, Miltown, and Equanil are among the prescriptions from his doctor, a Lincoln specialist."

The irony of it is, if patent medicines are sent out and the directions are printed, they charge the parcel-post rate. If the directions are typed or written, they are charging first-class rates.

It is an acute situation that is affecting the poor people of the country, the people who do not have two or three cars or chauffeurs to pick up their medicine, and the old people, living in the little villages, and people living in the country. I can see no agument against it, and it just seems to me the House would accept it.

Mr. CURTIS. Mr. President, I yield the floor.

Mr. ROBERTSON. Mr. President, reserving the right to object—although I shall not object, because our committee was in full sympathy and accord with the purposes of the amendment—let me say that our Appropriations Committee cannot waive the Senate rule by unanimous consent. The Senate itself must do so. The Senate rule prohibits us from writing legislation on an appropriation bill, unless the rule is suspended by a two-thirds vote of the Senate.

When this matter was before our committee, having expressed sympathy for the proposal, but treating it on the same basis as that on which we treated the proposals of those who wished us to write into the bill a provision to the effect that there should be no extension of the airlift for mail that did not carry airmail stamps, we said the proposal should go before the appropriate committee.

I read from the committee hearing:

Senator ROBERTSON. Then, as I understand it, the Department is not recommending any change?

Mr. WARBURTON. At this time, sir, we are not recommending any change. However, we will not oppose the proposition of the Senator—

That is to say, the Senator from Nebraska [Mr. CURTIS]—

if we are requested to report upon it.

Senator ROBERTSON. If there should be a change, the Department feels that to avoid discrimination it should cover the 12 items you have mentioned?

Mr. WARBURTON. Yes, sir.

Senator ROBERTSON. And in that event it should be handled by the committee that has general jurisdiction over legislation covering mail matters?

DEPARTMENT WOULD NOT OPPOSE LIBERALIZATION

Mr. WARBURTON. And if the proposition went to that committee, sir, and if we were asked to report, we would not oppose the proposition.

So, again, I say that I shall not object to the requested unanimous-consent agreement to waive the Senate rule, in order to make possible the adoption of this amendment; but I want the Senate to understand that even though I was in full sympathy and accord with this proposal, the committee could not adopt the amendment under the Senate rule.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Nebraska.

Mr. HRUSKA. Mr. President, I ask unanimous consent to have a further statement and explanation of the amendment printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR HRUSKA

First of all I should like to commend my colleague Senator CURTIS for advocating and proposing the amendment which will mean a great deal in clarifying a situation that has proved troublesome and unfair as well as expensive.

Under present law, matter of second- and third-class mail containing writing must be paid for at first-class rates.

If a prescription compounded at the direction of a physician has attached to it a label bearing typewritten or handwritten directions for the use of the medicine, it must go at the first-class rate of postage when mailed from one point to another.

It is my understanding that the Post Office Department is under a statutory prohibition to correct this situation by administrative rule or regulation.

By means of the amendment proposed, this statutory prohibition is removed and the medicine in such case can be sent at the lower class of mail rate.

This will be very beneficial in many, many cases. I urge the adoption and approval of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Nebraska [Mr. CURTIS].

The amendment was agreed to.

Mr. DIRKSEN. Mr. President, under unanimous consent we have achieved what normally would be done by a motion to suspend the rule; is that correct?

The PRESIDING OFFICER. That is correct.

Mr. HRUSKA. Mr. President, I also ask unanimous consent to have printed at this point in the RECORD a statement on the bill as a whole.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR HRUSKA

As ranking minority member on the Treasury and Post Office Subcommittee on Appropriations, I should like to express on my behalf and on behalf of my colleagues, deep appreciation to the chairman of our subcommittee, the Senator from Virginia, for the splendid fashion in which he has conducted the hearings, as well as the executive sessions and other activities relating to H.R. 10569.

The Senator from Virginia has had vast experience and has a comprehensive understanding of the subject material. He excels in extending fair and objective treatment to all who appear in regard to any point of the bill.

Even on occasions where his own convictions and conclusions are at variance with a witness or with any of his colleagues, he

is careful to see that the record contains a fair portrayal of the differing view.

As exhibited here on the floor, he is always careful of the exact compliance with rules of the Senate so that consideration of legislation will go forward in orderly fashion.

There are only a couple of points upon which I should like to comment.

First of all, the restoration therein by the Senate committee of $15 million for salaries and expenses of the Internal Revenue Service. A gross figure for this item is $28.8 million over the appropriation for the current year. The other body had reduced this increase by $15 million.

However, the testimony of the Secretary of Treasury, the Honorable Robert B. Anderson, as well as Commissioner Latham of the Internal Revenue Service was very persuasive that it would be good business to allow the full amount requested.

It is gratifying that the Senate committee approved that restoration. It is my earnest hope that the Senate will see fit to ratify this action on the part of the committee.

In his testimony, Commissioner Latham expressed a conviction that the affairs of the Internal Revenue Service can be more wisely administered if the goals of the Service are stated in terms which will permit the Service's needs over several years to be anticipated by both the executive and legislative branches. The 1961 request includes the first year portion of a systematic plan to strengthen tax law enforcement over the next several years.

It is my understanding that the principal need for additional funds as requested is to make possible a more thorough and extensive audit of tax returns and to secure delinquent returns, so as to maintain and strengthen the willingness of all taxpayers to comply with our voluntary assessment system.

Most citizens, while they grumble at paying taxes, do not fundamentally object to doing so if they are assured that their fellow taxpayers are bearing their proportionate share. The efforts of the IRS with the additional funds will be directed in large measure to seeing that all taxpayers will assume and discharge their obligations.

Part of the funds requested will go toward beginning installation of automatic data processing with electronic equipment. It is reported that this will permit the correcting of serious deficiencies in the existing system which could be overcome by manual methods only with the help of tremendous increases in manpower, with very heavy increases in payroll for same, for additional facilities, and other costs.

It is my earnest hope not only that the Senate will approve the bill as written in this regard, but also that in conference there will be a disposition of all members of that committee to concur in the restoration of this $15 million item. The chairman of our subcommittee well states the case when he calls attention to the fact that for every dollar of this increase there will result the collection of additional revenue at least seven times the amount thereof for enforcement purposes.

It was with reluctance that the Senator from Nebraska witnessed the reduction in the Post Office Department appropriation for operations in the amount of $10 million below the Department's estimates and request.

It was pointed out that the reduction in the estimates effected by the other body, if applied to the post office clerk account alone as seems indicated by its report, there would be left funds for only a four-tenths of 1 percent man-year increase to handle an anticipated mail volume increase of 4.2 percent. This cut in man years is totally unrealistic in light of savings already achieved.

The estimated 4.2 percent increase in volume would require 15,527 additional workers. While this figure would be reduced even more under the cut made by the other body, it will be reduced to approximately 13,527 additional employees under the amount approved by this committee.

The committee is just as anxious to avoid curtailment of mail service as the Department. The only justification for the reduced amount therefore is a difference of opinion as to the increase in mail volume.

Some comfort can be derived from the sense of the committee itself that if the amount actually provided will turn out in actual experience to be insufficient, the Department will not be prejudiced from requesting additional funds at a later date, providing the Department is unable to meet the additional workload through the 5 percent transfer authority provided by the appropriations.

The Senator from Nebraska is opposed to language in the bill found at page 12, lines 19 and 20, reading "Including expenses of delivery to postal patrons of mail matter under congressional frank, as now authorized by law:"

While it has been concluded by some that this additional language will not affect present law, and while there is some belief that the additional language "does not add anything," the fact is that language of the report of the other body as found on its page 17 seeks to place an entirely different meaning than is presently existent in the law. The damaging sentence is this. "It (the inserted language) anticipates return to a method of addressing city-delivery franked mail followed on previous occasions, as has long been the case with rural star route mail."

In my opinion this would be an undue improper and undesirable extension and abuse of the franking privilege. It would inflict upon the Department and its employees much additional work for which no provision of funds is made in the bill. It would inflict upon the city carriers a vast increase in the volume of mail which is commonly referred to as "junk mail."

While language in the Senate report indicates our considered belief as to the lack of meaning of the inserted language, it would certainly be within my thinking and favor that the inserted language be entirely stricken if the Senate is of a mind to do so.

One final item, Mr. President.

The modernization and improvement of buildings and equipment should go forward at a rate consistent with the maximum of availability of funds within overall budgetary considerations. The drag and waste based upon obsolete equipment and inadequate postal facilities is much too great even now. To suffer a substantial cut in the second year of a long overdue program is difficult to understand. The amount requested by the Department was the same as appropriated last year.

The reduction imposed by the other body would substantially disrupt a vital program which after years of neglect is beginning to update many outgrown mail-handling facilities. The restoration by the Senate should be upheld so as to prevent a curtailment of that program by the disappointing postponement of many major 1961 projects already announced.

Again I should like to commend and congratulate the chairman of our subcommittee for the efficient and constructive work which he has devoted to this legislation.

Mr. WILLIAMS of Delaware. Mr. President, on behalf of the Senator from New York [Mr. JAVITS], I ask unanimous consent to have printed in the RECORD a brief statement on the bill.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR JAVITS

The appropriation contained in this bill for the U.S. Savings Bond Division, which is included in the item for the Treasury's Bureau of the public debt, again points up the need for imaginative, aggressive, and forward looking action to increase public holdings of E- and H-bonds.

I and a number of my colleagues including Senator WILLIAMS of Delaware have for some time expressed our serious concern with the continued attrition of such holdings by the public, and the need for a major increase in the proportion of the national debt represented by these bonds. However, the requested 1961 appropriation for the savings bond division, which is charged with the sale and promotion of savings bonds, is exactly the same as that for 1960, except for two statutory increases required by law. I believe that the Treasury should undertake a patriotic campaign, not merely to stop the present continuing excess of redemptions over sales, but to increase substantially public sale of these securities.

The testimony on this appropriations item in the House indicated clearly the importance of these bonds—they help encourage savings, resist inflation, and build a sound base under the economy, and at a remarkably low sales cost to the Treasury. Nevertheless, the Acting National Director of the Savings Bond Division indicated to the Appropriations Committee that the goal is being set for fiscal 1961 is a sales increase of only $300 million—and this in light of a report which I have just received from the Treasury Department that in the 6 months since the increased interest rate went into effect, redemptions exceeded sales by $477 million. The reported increase in cash value of outstanding holdings during that period, which is reported to be $122 million, is a reflection of the accrued interest on bonds held by the public.

In this respect, another phase of the testimony before the House Appropriations Committee should be given particular attention by this body. That is the statement by the Director of the Savings Bond Division that "The Senate is the only remaining place in Government where we do not have the payroll savings plan in effect." I sincerely hope that the Senate will soon join the House in participating in this important program.

It seems clear that the continuing concern with respect to the President's recommendation on long-term bond interest rates should make us equally aware of the role of savings bonds on the debt management picture. I shall therefore continue to urge that the Treasury meet at least part of its need for long term funds through fuller utilization of the special role of savings bonds. The particular anti-inflationary character of these issues, their substantially lower costs, and the leeway that now exists with respect to these interest rates calls for a vast increase in their sales, rather than a mere holding operation.

Irrespective of congressional action on long-term marketable bond interest rates, I urge that there be a drive to sell to the public what we now call savings bonds, but what should be renamed "'peace bonds"—perhaps featuring a special $25 billion issue which would seek to attract millions of new investors in a significant shift of the national debt into these securities. The suggestions of my colleague, Senator WILLIAMS of Delaware, for an immediate rise in their interest rate to 4.25 percent is a most commendable plan to aid in the achievement of such a goal.

The latest Treasury statement to me on E- and H-bonds is attached.

The E- and H-bond picture

Mr. ROBERTSON. Mr. President, before I suggest the absence of a quorum, prior to the taking of a yea-and-nay vote on the question of final passage of the bill, as chairman of the subcommittee I wish to warmly commend the other members of the subcommittee, the committee clerk, and the staff of the full committee, which cooperated, for helping prepare a bill which was adopted in the full committee, and which apparently now has been ratified on the floor of the Senate, except with reference to two rather minor amendments, on which we could agree without any great difference of opinion.

Mr. President, I now ask for the third reading of the bill.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time.

Mr. ROBERTSON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. ROBERTSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill having been read the third time, the question is, Shall it pass?

Mr. ROBERTSON. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is, Shall the bill pass? On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from New Mexico [Mr. ANDERSON], the Senator from West Virginia [Mr. BYRD], the Senator from Illinois [Mr. DOUGLAS], the Senator from Mississippi [Mr. EASTLAND], the Senator from Indiana [Mr. HARTKE], the Senators from Oklahoma [Mr. KERR and Mr. MONRONEY], the Senator from Wyoming [Mr. MCGEE], the Senator from Michigan [Mr. MCNAMARA], the Senator from Florida [Mr. SMATHERS], the Senator from New Jersey [Mr. WILLIAMS], and the Senator from Maine [Mr. MUSKIE] are absent on official business.

I also announce that the Senator from Minnesota [Mr. HUMPHREY], the Senator from Texas [Mr. JOHNSON], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Oregon [Mr. MORSE], the Senator from Missouri [Mr. SYMINGTON], and the Senator from Wyoming [Mr. O'MAHONEY] are necessarily absent.

I further announce that, if present and voting, the Senator from New Mexico [Mr. ANDERSON], the Senator from West Virginia [Mr. BYRD], the Senator from Illinois [Mr. DOUGLAS], the Senator from Mississippi [Mr. EASTLAND], the Senator from Indiana [Mr. HARTKE], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Texas [Mr. JOHNSON], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Oklahoma [Mr. KERR], the Senator from Wyoming [Mr. MCGEE], the Senator from Michigan [Mr. MCNAMARA], the Senator from Oklahoma [Mr. MONRONEY], the Senator from Oregon [Mr. MORSE], the Senator from Maine [Mr. MUSKIE], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Florida [Mr. SMATHERS], the Senator from Missouri [Mr. SYMINGTON], and the Senator from New Jersey [Mr. WILLIAMS] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from Indiana [Mr. CAPEHART] and the Senator from New Hampshire [Mr. COTTON] are absent on official business.

The Senator from Arizona [Mr. GOLDWATER] is necessarily absent for the purpose of attending a funeral.

The Senator from Kentucky [Mr. MORTON] and the Senator from Pennsylvania [Mr. SCOTT] are necessarily absent.

The Senator from New York [Mr. JAVITS] is absent by leave of the Senate to attend as Chairman of the Economic Committee a meeting of the NATA Parliamentarians Conference at Strasbourg, France.

The Senator from Kansas [Mr. CARLSON] is detained on official business. If present and voting, the Senator from Indiana [Mr. CAPEHART], the Senator from Kansas [Mr. CARLSON], the Senator from New Hampshire [Mr. COTTON], the Senator from Arizona [Mr. GOLDWATER], the Senator from New York [Mr. JAVITS], the Senator from Kentucky [Mr. MORTON], and the Senator from Pennsylvania [Mr. SCOTT] would each vote "yea."

The result was announced—yeas 75, nays 0, as follows:

[No. 165]

So the bill (H.R. 10569) was passed.

Mr. ROBERTSON. Mr. President, I move that the Senate insist on its amendments, request a conference with the House of Representatives thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer (Mr. GORE in the chair) appointed Mr. ROBERTSON, Mr. MCCLELLAN, Mr. CHAVEZ, Mr. HAYDEN, Mr. MONRONEY, Mr. JOHNSTON of South Carolina, Mr. HRUSKA, Mr. BRIDGES, and Mr. KUCHEL conferees on the part of the Senate.

ADDRESS BY ROBERT HALLECK, JUNIOR DELEGATE, 1960 REPUBLICAN CONVENTION, DES MOINES, IOWA

Mr. HICKENLOOPER. Mr. President, on last Friday, April 22, 1960, at Des Moines, Iowa, we had a Republican presidential convention for the selection of delegates to the Republican National Convention. On the program of that convention was a speech by what we call, in the Republican Party there, a junior delegate. We have a system under which we invite young people from all over the State, under the voting age, to attend as junior delegates.

This speech, on behalf of the junior delegates, was delivered by Robert Halleck, who is a senior at the Dubuque Senior High School, Dubuque, Iowa.

Bob Halleck is a young man of very great balance. He is active in regard to the school newspaper. He is active in athletics. He is a young man who thinks for himself. In the speech, he attempts to analyze the reasons why he, as a young man, up until recently did not know with what political party he thought he should affiliate. He began to investigate the merits of the various political parties, and came to the conclusion, according to his own words, that he would become a Republican. This speech outlines his reasons therefore. I ask unanimous consent that the speech be printed in the RECORD at this point as a part of my remarks.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

ADDRESS BY ROBERT HALLECK AT THE 1960 REPUBLICAN CONVENTION, DES MOINES, IOWA, APRIL 22, 1960

Good afternoon. When I was asked by Mr. Failor to speak before this group, I frankly was not actually certain, why I was a Republican. Perhaps some catchy slogan or some outstanding personality arrested my interest, and allegiance. Now, after study, I know why I am, and all Americans should be Republicans.

This modern Republican stands for two things, in my opinion, they are capitalism and the individual. Now much can be made of that statement by both the Democrats and Mr. Khrushchev, and let them make it. For it would just be another in a series of wild misstatements of fact. I hasten to say that I do not believe that the Democratic Party condones Mr. Khrushchev, that would be foolish, I merely state as a fact that they both cringe from the word "capitalism," I do not.

Capitalism cannot thrive without active competition, and I, have been brought up to believe in free competition. Free competition by all peoples from all walks of life, both rich and poor, has, in my opinion been the foundation of the Republican Party and to you fellow Republicans of all ages. I maintain that capitalism, as defined by the Republican Party is the most efficient system yet found to govern the economy of this country.

To the inefficient, yes, let me repeat this slowly to the inefficient, active competition is always a threat and as a result these people are always trying to limit the scope of competition. This limitation is what I, as a young man, fear. People will try to limit the scope of competition so that we as young Americans will have so very little to strive for, so very little to succeed for, that we will become easy victims of the vicious communistic propaganda present in today's world.

Almost every great industrial era of progress has, in my opinion, come under the Republican administration, the past two terms of Dwight D. Eisenhower have produced more civil rights, more scientific development, and more economic progress for the individual American than the previous 30 years, yes, even longer than that.

We, the younger generation of Americans, were brought up on the sirup of Government spoon feeding—and I, as a member of the more youthful fringe element of that generation have, for the first time, been shown the light that America did not become great by Government support; but by the individual strength of our ancestors, as believed in by the Republican Party.

That individual—the one with strength and initiative—is the one that I think the Republican Party stands for and hopes to preserve. Only during wartime has the United States been a regimented country. Many things vie for our allegiance such as our Republican Party, the PTA, and our alma maters. Herein lies our salvation. America must not become a country where all allegiance is accorded to a powerful Central Government. This is a problem and we must solve it. The Republican Party must protect the American free enterprise way of life. The Republican Party does, in my opinion, offer this hope to the young people of our country and the only hope. There should only be enough centralized control to protect the public interest—the people's rights—and the health and the integrity of the free enterprise system. The Republican Party's faith in being able to get the job done without senseless pump priming is one more reason why I feel that this party is the one to lead America toward still greater success.

Under the administration of President Dwight D. Eisenhower and Vice President RICHARD NIXON progress has been made that cannot be denied by the most partisan of all.

Civil rights: Certainly no one—not one single American can say that any administration ever did more than the present one to make all Americans regardless of race, religion, or creed feel the great thrill of just being an American. Even so far in this election year of 1960 the administration and the Republican Party violently rejected the vicious opportunistic peoples who have tried to bring up religious bias—this is not republicanism and we will not tolerate it.

In the scientific field the Republican Party and the administration has done much to close the gap caused by the apathy of the Democratic Party during the years before the Eisenhower administration. American science is now in a position to take a back seat to no one. Communism has been contained on almost all fronts. The world is nearer to complete peace than ever before all because of the principles of the Republican Party.

Economic progress: Well in spite of the so-called 1940 dollar values or any other measure, we, as young people, can see our parents enjoying the greatest era of prosperity in the history of our country. We, as young Republicans, can be assured that we are living in a period of individual freedom, happiness, and great opportunity. We want that preserved.

In summing up the reasons why I, as a young man, believe in the Republican Party, let me briefly repeat some of my beliefs.

Capitalism, as defined by the Republicans, the individual rights of all to be successful, the right to be my own boss, if you will, the right to succeed on my own. Capitalism is not a dirty word if viewed like that and I like it. Freedom from fear of war. Civil rights that are more than a word—civil rights as the Republican Party defines them, is what I mean.

If you want to make friends and influence people, a well known public relations expert once said "You should never get into an argument, for you are sure to lose."

What I have said here today has not been said to be part of an argument, it merely is why I, as a young man, believe in the Republican Party.

I wish to thank State Republican central committee for the privilege of appearing before you. Thank you.

TRIBUTE TO MAJ. GEN. STROM THURMOND

Mr. RUSSELL. Mr. President, this morning at the Pentagon, in the Department of Defense, exercises were held commissioning our distinguished colleague, STROM THURMOND, of South Carolina, as a major general in the U.S. Army Reserve. I was very proud to preside over the Committee on Armed Services last week when this nomination was approved and sent to the Senate for confirmation.

Mr. President, there are a great many officers in the Reserve forces of the United States. I daresay there are very few who have a record which would match that of our distinguished colleague, and there are not many who have followed their work as Reserve officers with the same fidelity and devotion Major General THURMOND has displayed.

Mr. President, at the time our country was involved in World War II, our colleague was serving his native State as a circuit judge. We are all aware of the fact that the draft laws and various laws providing for the raising of men necessary to carry on the war were very careful to exempt civil servants, in order that the civil affairs might not suffer. Senator THURMOND was not subject to military service in any degree, but nevertheless he resigned his office as circuit judge and volunteered for

military service on the very day the Congress of the United States declared war against Germany.

Mr. President, in the service General THURMOND was attached to the 82d Airborne Division. On D-day, when our forces struck the beaches at Normandy, he was one of those who glided from the heavens to behind the enemy lines in the effort to cut off the German reinforcements and to enable the men who had landed on the beaches to make their position secure. There was no greater danger involved in any phase of the military activities on D-day than the danger to the men who fell from the heavens behind the German lines. He was wounded on D-day. As a result he is entitled to wear the Purple Heart. He served with distinction in numerous battles, in all the battles which were fought by the 1st Army, as it carved its way through France, Belgium, Holland, Luxembourg, Germany, and on into Czechoslovakia.

He was one of the few officers who was transferred from the European theater command to the Pacific theater; and when World War II was ended by the treaty that was signed on the deck of the battleship *Missouri*, General THURMOND was in the Philippines and in active service. I make this statement about a man who is inherently and instinctively a modest man, in order that all our colleagues may know that General THURMOND has maintained his interest in the military. He has met all the requirements of the Active Reserve, and he has shown that he could and would serve his country with courage and in a spirit of sacrifice in time of war, with the same dedication and patriotism that he displays on the floor of the Senate.

Mr. HICKENLOOPER. Mr. President, I did not know that the Senator from Georgia was about to make his remarks at this time. I feel very fortunate to have been in the Chamber when he did so.

I merely wish to say that I join him in the great pleasure and appreciation which I am sure all of us feel at this promotion of our distinguished colleague, Senator and General THURMOND. I know of no man who is more patriotically devoted to the best interests of his country and his fellow citizens than is the Senator from South Carolina. I have formed the highest admiration for him in my acquaintance with him in the Senate. His distinguished career is enviable when one compares it with those of all other great Americans who have lived to serve their country in capacities which have been open to them.

The committee of which the distinguished Senator from Georgia is chairman had a part in approving this promotion, and I commend the good judgment of the Army in recognizing our associate. I congratulate the Senator from South Carolina on his new office, and I know that he will continue to serve with patriotism and unselfish devotion.

Mr. YARBOROUGH. Mr. President, I am glad to hear the distinguished senior Senator from Georgia make the remarks he has made. It is my privilege to serve at this time in an Active Reserve unit of the Army ground forces with the distinguished Senator from South Carolina. He made a great combat record in time of war. He is a most diligent member of an Active Reserve unit, attending all the meetings and meeting all the requirements and demands. Last year he attended the General Staff School at the time the Senate was in recess, in the fall. He is among the most prompt members of that organization. He studies military publications and keeps abreast of the latest developments in weaponry. Because of his interest and diligent attention to duty he keeps as fully abreast of developments as do the Regular Army officers I have known in my lifetime. I commend him for having earned this well-merited promotion.

Mr. ROBERTSON. Mr. President, the junior Senator from Virginia wishes to associate himself with the views which have been expressed concerning the wonderful record, not only in the Senate, but in World War II, of the Senator from South Carolina, General THURMOND.

The junior Senator from Virginia is quite familiar with the turning point of World War II. In the 116th Infantry were two Virginia units which were virtually wiped out. If it had not been for those in the paratroop division, which surprised the Germans, the rest of them might have been wiped out as well. As I recall, in the 82d Division was a young man named George Tulidge, Jr., from Staunton who was killed in that landing. Recently a clinic was dedicated by his younger brother, a doctor, in his memory, in the Blue Ridge Mountains of Patrick County. I was scheduled to speak there. I told about the wonderful landing of the 82d Division, in which this young man was killed, and about the wonderful letter he wrote to his folks at home, saying that he knew he was going into a very dangerous situation. He told his younger brother of some of the pitfalls.

That was a wonderful occasion. It was the turning point of the war.

Mr. RUSSELL. Mr. President, I ask unanimous consent to have printed in the RECORD at this point as a part of my remarks a brief thumbnail sketch of General THURMOND'S military service.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

MAJ. GEN. STROM THURMOND, MOBILIZATION DESIGNATION AS ASSISTANT CHIEF, OFFICE OF THE CHIEF OF CIVIL AFFAIRS, DEPARTMENT OF THE ARMY

General THURMOND was an ROTC graduate of Clemson College in 1923, and upon becoming 21 years of age in December, was commissioned a second lieutenant of infantry in January 1924.

Although his position as circuit judge exempted him from service in World War II, General THURMOND volunteered for service the day war was declared against Germany.

He served as executive officer of the 713th Military Police Battalion from April to November 1942, assistant provost marshal from November to December 1942, assistant G–2 from December 1942 to October 1943, and assistant G–5 from October 1943 to January 1946.

General THURMOND was a member of the 1st U.S. Army and attached to the 82d Airborne Division for the invasion of Normandy. He served in all battles of the 1st Army, which fought through France, Belgium, Holland, Luxembourg, Czechoslovakia, and Germany. Upon the termination of the war in Europe, he was transferred to the Pacific theater and was in the Philippines when World War II ended. General THURMOND reverted to Reserve status on January 20, 1946, and was promoted to brigadier general on December 8, 1954.

Decorations and awards: Legion of Merit, Bronze Star Medal with "V" device, Commendation Ribbon with medal pendant, Purple Heart, American Campaign Medal, Asiatic-Pacific Campaign Medal, European-African-Middle Eastern Campaign Medal with bronze arrowhead and five service stars, World War II Victory Medal, Armed Forces Reserve Medal, Presidential Distinguished Unit Citation, Selective Service Medal, 3d Army Certificate of Achievement, OCAMG Certificate of Achievement, Cross of the Officer of the Order of the Crown (Belgium), Croix de Guerre (France).

Civic affiliations: Reserve Officers Association (past national president), Military Government Association (past national president), Association of the U.S. Army (advisory board of directors), American Military Institute, American Legion (civil defense committee), 40 & 8, Veterans of Foreign Wars, Disabled American Veterans, Military Order of the World Wars, AMVETS, the Airborne Association, American Bar Association, South Carolina Bar Association, Phi Alpha Delta Law Fraternity, Baptist Church, Masons, Scottish Rite, Shrine, Woodmen of the World, Knights of Pythias, Moose, Junior Order UAM (past State councilor), Lions, Blue Key, Sons of the American Revolution, Sons of Confederate Veterans, Farm Bureau, Grange, Soil Conservation Society of America, trustee of Bob Jones University, Greenville, S.C.

Civilian occupation: U.S. Senator from South Carolina; lawyer; farmer; admitted to the South Carolina bar in 1930, and subsequently admitted to practice in all Federal courts, including U.S. Supreme Court; served as teacher, school superintendent, city attorney, county attorney, State senator, circuit judge, Governor of South Carolina (chairman of southern Governors' conference), and was States rights Democratic candidate for President of the United States in 1948, carrying 4 States and receiving 39 electoral votes; elected to the U.S. Senate on November 2, 1954, as a write-in candidate for the term ending January 3, 1961; resigned as U.S. Senator April 4, 1956, to place the office in a primary, pursuant to a promise made to the people during the 1954 campaign; renominated and reelected to the Senate without opposition in 1956, resuming duties on November 7, 1956.

The PRESIDING OFFICER (Mr. GORE in the chair). The present occupant of the chair would like to associate himself with the commendatory remarks made with respect to the distinguished junior Senator from South Carolina.

Mr. FULBRIGHT. Mr. President, I should like to associate myself with the remarks made by the Senator from Georgia and other Senators regarding our esteemed and very fine Senator from South Carolina. We are all familiar with the outstanding record he has made in the military service. We know that he takes as intelligent and lively an interest in military affairs as does any other member of the military forces. I join my colleagues in congratulating him on the great honor which has been conferred upon him.

THE ACTIVITIES OF SPECIAL PRESSURE GROUPS AND U.S. FOREIGN POLICIES

Mr. FULBRIGHT. Mr. President, for some years I have become increasingly concerned at the development in the United States of special pressure groups for purposes of pushing U.S. foreign policies in special interest directions.

We must, of course, accept the concept that in a democracy such as ours shipping interests will pressure Congress and the Executive to adapt foreign policies so they may serve collaterally, at least, the shipping interests; citizens will organize to promote foreign aid, or to oppose foreign aid; exporters will seek foreign policies to develop new markets and importers will seek policies that may hurt domestic manufacturers; religious groups will seek to promote some policies and oppose others.

Our representative Government is designed to deal with these special interests, to balance them, and ultimately to develop policies which will skillfully blend conflicting interests in such a way that the total national interest will be served.

There are limits, however, beyond which special interests cannot go without undermining the conduct of our foreign policies.

Many years ago, Congress enacted the so-called Logan Act. It reads as follows:

> Any citizen of the United States, wherever he may be, who, without authority of the United States, directly or indirectly commences or carries on any correspondence or intercourse with any foreign government or any officer or agent thereof, with intent to influence the measures or conduct of any foreign government or of any officer or agent thereof, in relation to any disputes or controversies with the United States, or to defeat the measures of the United States, shall be fined not more than $5,000 or imprisoned not more than 3 years, or both. This section shall not abridge the right of a citizen to apply, himself or his agent, to any foreign government or the agents thereof for redress of any injury which he may have sustained from such government or any of its agents or subjects (title 18, sec. 953 U.S.C.A.).

The basic theory behind the Logan Act is that this Nation should speak with only one voice when it deals with other nations. No one save the President, or, with his approval, some specified individual, may presume to speak for the United States.

This basic rule is as good today as it was when enacted in the early days of the Republic.

But, Mr. President, there is a shadowland between the legitimate activity involved in the organization of special interest groups to influence foreign policy and the illegitimate activity proscribed by the Logan Act.

The questionable operation of individuals and groups in this area of foreign relations is illustrated by a recent dispatch in the New York Times. On April 15 the Times reported the activities of two maritime unions which picketed and thus prevented the unloading of the Egyptian passenger and cargo ship, the *Cleopatra*. The ostensible reason for this activity was that the unions by this demonstration protest the action of the United Arab Republic in boycotting ships that have traded with Israel or called at Israeli ports.

I hold no brief for UAR interference with international traffic passing through the Suez Canal. The point is, however, that the U.S. Government is proceeding through diplomatic channels to promote free passage through the canal. The Israeli Government, which complains that the UAR stops its ships, has available to it the procedures of the United Nations as well as other diplomatic devices for urging its views on the Government of the UAR. Yet, despite the official actions of the United States, we find private groups proceeding by coercive devices of their own to interfere with the official activities of our Government in the field of foreign policy.

These maritime unions do not seek an economic result related to wages or working conditions. Rather, they seek to force political action in an area of most delicate international negotiation.

I am not privy to any international secrets involving efforts to reopen the canal to Israeli shipping. But let us suppose that the work of U.N. Secretary General Hammarskjold, aided by the good offices of the United States and other governments, nearing a conclusion. Were this the case, I can imagine few interventions by private groups—such as these unions—which might be more clearly calculated to thwart the objectives of our Government's foreign policy; in this case, peace, and stability in the Middle East.

Subsequent to drafting these remarks, my attention has been called to the fact that the State Department has informed the picketing unions that their conduct is embarrassing this Nation in the conduct of its foreign policy.

My objection to this kind of activity is an objection of principle, not of specifics. I ask unanimous consent that the New York Times articles appear at this point in the CONGRESSIONAL RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the New York Times, Apr. 15, 1960]

ARAB SHIP TIED UP BY PICKETS SECOND DAY—OWNER ASKS INJUNCTION HERE TO HALT BOYCOTT PROTEST—DAMAGES SOUGHT

(By Werner Bamberger)

The Egyptian passenger and cargo ship *Cleopatra* remained idle yesterday for the second day as two maritime unions continued picketing her at her East River berth.

The demonstration protests the United Arab Republic's boycott of ships that have traded with Israel or called at Israeli ports.

Legal steps against the picketing were begun, meanwhile, by attorneys for the ship's owners, the Khedivial Mail Line of Alexandria.

Foley and Grainger, the law firm, filed a damage complaint in Federal court, asking for damages in excess of $10,000, based on losses up to the time of filing. The complaint named two unions, the Seafarers International Union and the International Longshoremen's Association.

An order to show cause why an injunction against the picketing should not be issued was signed late yesterday afternoon by Judge Edward Weinfeld. It is returnable before Judge Weinfeld at 11 a.m. today.

NO DISPUTE, COURT TOLD

The order was issued after the ship's attorneys sought an injunction against the SIU on the ground that there was no labor dispute involved.

In another development, the New York Shipping Association sent a protest to the ILA on behalf of the John W. McGrath Corp., stevedores at pier 16, East River, and a member of the shipping group.

Alexander P. Chopin, chairman of the employer association, told Capt. William V. Bradley, ILA president, in a telegram that the shipping group considered the ILA-sponsored picket line a "political purpose" picket line and not a bona fide one. Mr. Chopin said that the longshore union, therefore, was violating the no-strike clause in its contract with the NYSA.

Captain Bradley said he had not received the protest message. The union leader indicated, however, that longshoremen would respect the picket line as long as it was in existence. The *Cleopatra*, he added, was "a hot ship." He also expressed doubt that longshoremen would work the ship even if the picket line were lifted.

Spokesmen said earlier that the blacklisting of ships trading with Israel threatened job opportunities for American seamen.

ISRAELIS APPLAUD MOVE

TEL AVIV, ISRAEL, APRIL 14.—Israelis glowed over reports today that longshoremen had refused to unload the Egyptian ship *Cleopatra* in protest against the Suez Canal blockade and her blacklisting of U.S. ships that trade with Israel.

Foreign Ministry officials in Jerusalem said happily that the action indicated that other nations had come to realize that the blockade did not concern Israel alone.

Messages of congratulation were cabled to Paul Hall, president of the Seafarers International Union, by the General Federation of Labor and by dockers in Israeli ports.

The Israeli press welcomed the Americans' stand and predicted that Britain, Holland, West Germany, and Denmark would also boycott United Arab Republic shipping.

[From the New York Times, Apr. 22, 1960]

UNITED STATES WARNS PICKETS OF UAR SHIP HERE

(By E. W. Kenworthy)

WASHINGTON, April 21.—The State Department said today that the picketing of the Egyptian ship *Cleopatra* by seamen in New York was "embarrassing" the conduct of U.S. foreign relations.

The State Department expressed concern that if the picketing became "protracted" there would be widespread reprisal action against United States-flag vessels by labor unions in Arab countries.

The 8,193-gross-ton *Cleopatra*, owned by the Khedivial Mail Line of Alexandria, United Arab Republic, arrived at pier 16, East River, from Mediterranean ports April 13.

Immediately the Seafarers International Union put pickets at the ship. Members of the International Longshoremen's Association refused to unload her.

The seamen's union said it was acting in protest against the boycott by Arab countries of ships that had traded with Israel or called at Israeli parts.

The United Arab Republic has barred such ships from its ports and from transit through the Suez Canal.

Representatives of the ship's owners and the United Arab Republic protested that the picketing was for a "political" purpose and that no legitimate labor dispute was involved.

Paul Hall, president of the seamen's union, insisted that many United States seamen had lost jobs because of the Arab boycott.

RIGHTS ARE RECOGNIZED

In a statement today the State Department said it recognized the right of Americans to free speech and "the special status to labor union picketing in labor disputes."

The Department said it also understood the union's position that the Arab boycott was "discriminatory against American shipping and seamen."

"From the foreign policy standpoint, however, it should be made clear that the picketing is regarded abroad as a political demonstration related to the United Arab restrictions against Israel," the statement continued.

"The U.S. Government has repeatedly emphasized that it does not condone the Arab boycott, which is one of the many unfortunate outgrowths of the whole Palestine situation.

"However, with such complex questions involved, an effort by a private group to apply pressure publicly with a view to bringing about shifts in the policies of foreign governments is, of course, embarrassing to the conduct of our Government's foreign relations and may have unfortunate consequences."

Asked to specify what these consequences might be, a State Department spokesman observed that unions in the Middle East were contemplating widespread reprisal action against U.S.-flag vessels if the New York picketing continued.

"We would hope that the situation would not proceed to the point at which there would be strong counteraction against American shipping and American seamen in foreign ports," the spokesman said.

Dispatches from Lebanon yesterday said Syrian dockworkers had refused to unload two United States cargo vessels in Latakia or to load two Ameriacn tankers at Baniyas.

PICKETING CONTINUES AT PIER

Picketing of the *Cleopatra* by members of the Seafarers International Union and the International Longshoremen's Association continued yesterday.

The owners of the vessel have sought a preliminary injunction in Federal court to bar the picketing.

Meanwhile, Capt. Behaldim Mandour, master of the *Cleopatra*, has ordered a sundown curfew for his 103-man crew.

The order was called as a precaution as a result of an assault by an unidentified man on Mahmoud Ezz-el-din, a ship's steward, near the pier Tuesday night. The steward is in Bellevue Hospital for treatment of a lacerated left eye.

Mr. FULBRIGHT. Mr. President, since the war there have been organized in the United States a number of so-called ethnic groups. Many of these groups carry on activities which I am sure are of great interest and value to their members. Some of their activities, however, are designed to encourage the United States to involve itself in hostilities which originated long years ago in quarrels among these groups in foreign countries.

So long as these groups, like other special interest groups, follow the established procedure of presenting their cases either to the Congress or the Executive, there is little danger of serious and irremediable harm to our international relations. The justice of their causes may be tested before any overt action is taken. It should be clear to any citizen that if each individual or group, no matter how patriotically motivated, undertakes direct action in these affairs a disastrous chaos in foreign relations will result.

It is my position that the President is the constitutional vehicle through which the American people engage in the day-to-day conduct of their foreign policy. There are constitutional channels through which citizens can legitimately and effectively petition their Government and thus bring about changes in the conduct of foreign policy. Actions on the part of individuals or organizations which interfere directly or indirectly with the constitutional exercise of governmental authority or activity in the conduct of foreign policy, however, should be avoided as inimical to the total national interest. And finally, our constitutional system is designed to give free expression to the will of citizens of the United States. It must not be corrupted by calculated influence and pressure from any other source.

AMENDMENT OF MOTOR VEHICLE SAFETY RESPONSIBILITY ACT OF THE DISTRICT OF COLUMBIA

The Senate resumed the consideration of the bill (S. 2131) to amend the Motor Vehicle Safety Responsibility Act of the District of Columbia, approved May 25, 1954, as amended.

TRUST STATUS OF CERTAIN LANDS ON WIND RIVER INDIAN RESERVATION, WYO.

Mr. CHURCH. Mr. President, I ask unanimous consent that the Chair lay before the Senate the House amendments to Senate bill S. 1751, a bill to place in trust status certain lands on the Wind River Indian Reservation in Wyoming.

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 1751) to place in trust status certain lands on the Wind River Indian Reservation in Wyoming, which was, to strike out all after the enacting clause and insert:

That all the right, title, and interest of the United States in and to the following-described tracts of land on the Wind River Indian Reservation in Wyoming shall hereafter be held in trust by the United States for the benefit of the Shoshone and Arapahoe Tribes of said reservation:

Section 28, township 1 north, range 1 east, Wind River meridian:

(1) South half, southwest quarter, southwest quarter, northwest quarter, comprising 5.0 acres more or less.

Section 32, township 5 north, range 4 west, Wind River meridian:

(2) Beginning at a point 553.8 feet south of the corner of sections 29, 30, 31, and 32; said point being corner numbered 1; thence south 106.2 feet to corner numbered 2 which is identical with the southwest corner of northwest quarter northwest quarter northwest quarter, section 32; thence east 200 feet to corner numbered 3, thence north 106.2 feet to corner numbered 4; thence west 200 feet to corner numbered 1 and place of beginning, comprising 0.487 acres.

(3) Beginning at a point 118.2 feet south of the corner of sections 29, 30, 31, and 32; said point being corner numbered 1; thence south 435.6 feet to corner numbered 2; thence east 200 feet to corner numbered 3, thence north 435.6 feet to corner numbered 4; thence west 200 feet to point of beginning, or described as a 2-acre tract in the northwest quarter northwest quarter, section 32.

(4) West half southwest quarter northwest quarter northwest quarter, section 32, comprising 5.0 acres.

Mr. CHURCH. Mr. President, as I understand it, the amendments adopted by the House are entirely satisfactory to the sponsors of the legislation, the senior Senator from Wyoming [Mr. O'MAHONEY] and his colleague the junior Senator from Wyoming [Mr. McGEE].

I move, therefore, that the Senate concur in the House amendments to S. 1751.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Idaho.

The motion was agreed to.

ADDRESS BY BUDGET DIRECTOR MAURICE H. STANS AT NATIONAL WATERSHED CONGRESS

Mr. ALLOTT. Mr. President, the Director of the Budget, Mr. Maurice H. Stans, recently spoke to the National Watershed Congress. He delivered a message from the President stressing his belief in the importance of the watershed program. Mr. Stans discussed progress which has been made, the relationship of the Federal and local governments in the program, and the needs for proper use and development of our natural resources.

Mr. President, I ask unanimous consent that there be printed in the RECORD immediately following my remarks the text of the very thoughtful address made by Mr. Stans before the Watershed Congress on April 19, 1960; an article from the Washington Post of April 20; an editorial from the Washington Post on April 21; and a letter from Mr. Stans appearing in the April 23 Washington Post.

My distinguished colleagues may care to read this material and reflect a bit upon the subject of responsibilities—both of Government and of a free press.

There being no objection, the address, article, editorial, and letter were ordered to be printed in the RECORD, as follows:

THE BUDGET AND THE NATION'S NEEDS

(Address of Maurice H. Stans, Director of the Bureau of the Budget, before the Seventh National Watershed Congress, Statler Hilton Hotel, Washington, D.C., April 19, 1960)

My pleasure at being here tonight is multiplied. I appreciate your invitation and your hospitality, including this fine album featuring the new watershed stamp. I am grateful for the opportunity of discussing some of your interests and problems and some of mine.

And in addition I am honored by being the bearer of a special message to all of you from the President of the United States:

"MESSAGE FROM THE PRESIDENT

"It is a pleasure to send my greetings to those attending the Seventh National Watershed Congress.

"Six years ago, I signed the Watershed Protection and Flood Prevention Act to help protect and develop our Nation's water supplies and related resources of farmland, range, and timber. The results of this act clearly justify the effort which has gone into developing a sound conservation program for our people, both farm and urban. We must continue to work vigorously to advance this program.

"In this work, the cooperation and support of the member organizations of the National Watershed Congress are essential. I am delighted to send my thanks to its delegates gathered in Washington this week and to express my hope that their discussions will be productive.

"DWIGHT D. EISENHOWER."

We hear a great deal in these changing times about the new challenges that face America, in remote places on the earth and in outer space, and none of this is to be denied. But this meeting tonight of 26 dedicated organizations serves as a needed reminder that man is still earthbound, and that along with our great expectations and our visions we have the responsibility to conserve our natural resources and to plan wisely for their use. Our wealth is to be measured not merely by the number of families who enjoy air conditioning, or television, or automatic dishwashers, or the countless other gadgets to which we attach so much importance, but far more realistically in the farms, streams, forests, and parks, our waterways and watersheds. These we cannot do without.

And so I say that every American owes a great deal to all of you who have devoted your energies to the conservation of our natural resources. Certainly I can speak for myself, because as a sportsman and a hunter I have had good reason to appreciate the value of conservation practices. I have often reflected that the conservationist is the real builder of a nation, because he knows the unity between devotion to the land and devotion to his country.

In inviting me to address this Congress, you have—whether you intended it or not—focused attention on the Federal Government's role in supporting the efforts in which you are engaged. In fact, when your spokesman approached me, he told me that water supply is considered by the watershed congress to be the country's No. 1 problem.

Of course, the Federal Government has important responsibilities for the conservation of our natural resources. It is one of the oldest obligations that your Government has, and the Federal budget has spent nearly $15 billion for conservation and development of natural resources in the past 10 years, including almost $2 billion in the 1961 budget alone.

But all this cannot be predominantly the responsibility of the Federal Government. Conservation and development are the business of State and local governments, assisted by incentives and participation by the Federal Government. In his message to you this evening, the President of the United States spoke with deep conviction about the importance of the Watershed Act of 1954. And when he signed that bill into law 6 years ago, President Eisenhower said this:

"Another significant contribution of the watershed legislation is that it gives new force and emphasis to local leadership. Its programs are not Federal work projects; no new agencies will have to be created to carry them out. These programs will be planned only at the instance of local people. They will be planned with the cooperation and participation of local and State governments. They will be initiated only when local people have demonstrated their willingness and ability to share equitably in the cost and to assume responsibility for direction and maintenance of the work."

There are those who would have said—and probably did—that the State and local governments couldn't and wouldn't put up their share to make this new program successful. They would have argued—and probably did—that the Federal Government alone could handle the job. The answer is that this partnership has worked. Over 1,200 applications have been submitted under the program, for watersheds covering nearly 90 million acres of land. Legislatures in 40 States have enacted legislation to come in under the Watershed Act. State and local appropriations are increasing steadily. All this is plain evidence that we can make progress in meeting our problems without abdicating local initiative and local responsibility to a massive national government.

Next, without detracting in any way from my support of your objectives, I want to give you now some hard facts to look at.

I am sure that many of you would like to see the Federal Government do more for the conservation and development of natural resources. You undoubtedly feel strongly that this work should have a higher priority.

But here is the catch. When anyone comes to the Federal Government for dollars, he runs into competition. The biggest competition he finds is, of course, the needs of national defense. Next are a hundred other claimants each year for more money as we prepare the Federal budget. It is a contest among priorities, a gigantic job of trying to fit new opportunities and new undertakings into a budget which is already swamped with past commitments and obligations for the future.

In your view, natural resources programs deserve primary attention. And it's right that you should think so. But if I were addressing a meeting of medical scientists tonight, you would tell me that medical research should come first. If this were a conference of space experts, with only a million-pound engine thrust between you and the moon, you would feel that everything else should give way before that objective. If this were a meeting of educators, I have no doubt that better school facilities and aid for teachers' salaries would be your top priority. And if you represented the armed services, you might feel that more money for defense is greatly needed to help you to do the job better.

All these demands and countless others have to be matched up with the financial resources that are available to produce a total Federal program which the taxpayers are able and willing to support. And it is my experience that there are two things that are very hard to do in Government. One is to satisfy anybody that they are getting enough money. In fact, I have uncovered an economic law, which some now call Stans' law, which says that good budgeting is the uniform distribution of dissatisfaction. And the other thing that is so hard to do is to succeed in displacing outmoded and obsolete programs in order to make room for new priorities.

And that brings us down to cases. I want to point out some fiscal facts that make your objectives harder to attain as quickly as you might like.

In the Federal Government, between fiscal year 1950 and fiscal year 1960, total Federal taxes and receipts rose 115 percent; expenditures for natural resources went up 50 percent; but interest payments on the national debt increased by 60 percent. Expenditures for agricultural programs rose 85 percent; outlays for welfare and labor rose 130 percent; payments for national defense increased 250 percent.

The point I want to make is not that natural resources have been neglected, but that other areas of expenditure have been exerting much larger demands. This becomes clear when you realize the amazing progression of budget expenditures from $3 billion in 1930 to $9 billion in 1940, to $40 billion in 1950, and now to almost $80 billion in 1960.

CRITICS VERSUS THE FACTS

It's important to realize that when you look only at the Federal budget for 1 year at a time, only a part of the iceberg is visible. The dangerous part is underwater. I refer to the fact that the Federal Government's fiscal obligations are larger than most of us realize. The brutal truth is that we have put so much "on the cuff" that we have made our job grievously hard, and we have already laid heavy burdens on our economic future. Here are some of the facts:

Fact No. 1 is that the Federal Government is piling up c.o.d.'s for the future at an astounding pace. I'll mention only a few.

Merchant marine subsidies and ship replacement costs constitute a Federal obligation of $4.3 billion.

The Federal Government is committed to contribute $5.5 billion in the future for public housing.

Federal civil public works projects already started will require expenditures after 1961 of about $7 billion before they are completed.

It will cost over $30 billion to complete the interstate highway system.

These and a variety of other obligations, when added to huge unexpended balances in the defense program, total $98 billion of commitments for future spending.

In one sense, and standing alone, this has a brighter side, for many of these expenditures will add to the Nation's assets. We can absorb them as the economy grows. But that isn't all.

Fact No. 2 is this: Even if this session of the Congress doesn't add any new programs or increases to the budget, the level of Federal spending is going to go up. The reason is that there are built-in increases in existing programs which are now producing a continuing upcurve in expenditures. The catalog of built-in increases covers such programs as outer space, civil aviation, public works, merchant shipping, urban renewal, science education, medical research, public assistance, loans to underdeveloped countries, and veterans' pensions. The farm program may become even more costly as time goes on, unless we find a solution that helps the farmer and frees him from controls at the same time.

Now, for 1961 alone, these built-in increases come to over $2 billion. That's why this new budget is up over 1960. And for 1962 there are already built-in increases of more than a billion dollars more. Of course, there are few built-in decreases, since Government programs, once started, are apparently invulnerable to revision or elimination. A year ago, the President in his budget message nominated 18 programs as being overdue for revision in order to bring about future adjustments downward in expenditures. Only three received attention by the Congress, and those with the net result of increasing future expenditures by about $9 billion rather than decreasing them.

Fact No. 3 is that our present national debt of $290 billion is far from all we owe for the past. Here are some items it doesn't include: Our already accrued liability for military retirement is about $30 billion; our unfunded present accrual for retirement benefits for civilian Government employees is almost $28 billion; and on top of that, future pensions, compensation, and other benefits voted to veterans will cost about $300 billion.

Now, the $290 billion of current public debt, plus over $350 billion of future obligations for past services, plus $98 billion of c.o.d.'s, adds to the almost unbelievable total of nearly $750 billion.

That is the size of the Federal Government's mortgage on America's future, on ourselves, and on our children, beyond the regular annual costs of defense, welfare, and commerce. That's what a President and a Budget Director see standing in the way of major increases for your programs. That's why, after defense, there is so little latitude left.

Fact No. 4 is that the pressures for new spending programs are increasing in intensity. A table in the CONGRESSIONAL RECORD showed that in the last session of the Congress alone, 20 major spending bills in the Senate along with another 20 introduced in

the House, for new programs, altogether priced out to more than $326 billion over an average period of 5 years. While there is some duplication among them, if these and other bills were passed as their sponsors want them, they would add $50 billion to $60 billion a year to our present spending. And practically all of this is for programs other than water resources. Others would reduce taxes by $5 billion to $10 billion a year.

This is a bleak situation, isn't it?

LOOKING AHEAD

Well, what about future Federal budgets? What can you, and I, look forward to?

There are two ways of looking at the future, one pessimistic and one hopeful. And the important thing is that the American people can choose which one they want.

On the pessimistic side, I see a mortgage of almost $750 billion that will have to be paid. I see built-in increases pushing expenditures up, year after year. I see pressures mounting to have the Federal Government take over more and more of local government's problems, and to meet demands for more spending on many fronts. Unless we pick our way very carefully among these pressures, we can soon have $90 billion or $100 billion or $150 billion budgets, higher taxes or bigger deficits, debasement of our money, and weakening of our economy.

On the optimistic scene, I see both long-range and short-range hope. The real possibility, of course, for reducing our high spending lies in what happens in the world. If we can succeed in reducing and ultimately removing tensions from international relations, and get agreement on disarmament with full safeguards, it won't be necessary to spend 54 cents out of every tax dollar on national security. Not many would disagree on this objective. This would free money to do many things you and I would like to see done.

Beyond this, as we look ahead to 1970, we can expect the continued normal growth of our economy. I do not refer to a frantic and speculative economic speedup, or forced economic growth by Government decree, for the sake of entering a statistical race to "keep up with the Khrushchevs." I am talking about the regular annual increments of economic growth which, sometime this year, will push our gross national product past the half-trillion-dollar mark, and which by 1970 should raise it close to $750 billion. That kind of sound economic growth means more wealth, more income, greater vitality throughout our economic system. It means that financial resources will be available in greater quantity, and that in these years of the 1960's we can make conscious decisions as to how much of this income will be appropriated by governments for purposes of spending, how much can be assigned to paying off our public debt, and how much can be left in the hands of private individuals and enterprises—the arena of free choice—through tax reduction.

In the meantime, the President has laid before the Congress the Federal budget for 1961. It provides for both a strong defense program and a sizable balanced effort on the domestic side. It proposes a surplus of $4.2 billion that can be used to reduce our debt and lay the basis for tax reform. It tells the world that we can manage our fiscal affairs, and that our economy and our money are sound. It evidences the strength that we need to prove to Mr. Khrushchev that our system is the best.

As I said earlier, the American people will choose which of these scenes they want to live in, by their voices and actions on their Government's fiscal affairs over this decade. I hope the choice will appear obvious to you, as it is to me. However else we may wish it, given the facts of life in an unsettled world, I would come up with this sequence to picture America's primary responsibilities:

First, for national defense—with a fervent hope that this sacrifice will be temporary and rapidly decreasing.

Next, for a strong economy and sound currency, so essential to a position of world leadership. This means balanced budgets, a continuing fight against inflation, a realization that no benefits can be provided from Washington that are not paid for in taxes.

And then, for continuing efforts to make the most effective use of our resources available for domestic purposes, to find the right priorities, to end the old and advance the new, to recognize the competition among purposes and keep them in proportion, to build on our local-State-Federal relationships in seeking our goals.

With the privileges of democracy go a responsibility, and that responsibility is to find common cause in the challenges of the time.

This is a time to conserve and to develop all of our resources, economic, natural, and cultural. It is a time when we must see our common interest and our common future, and find the unity that we have always been able to summon when a crisis confronted us. Surely, none of us can afford to doubt that we will be equal to the challenge that lies ahead, that we can find the resolve to bring responsibility and discipline back into our Government's financial affairs, and that we will indeed work together to bring forth from this decade of the 1960's a better, stronger America in a world at peace—the one goal above all for a free and fortunate people.

[From the Washington Post and Times Herald, Apr. 20, 1960]

STANS OPPOSES U.S. CONSERVATION ROLE

(By Aubrey Graves)

Budget Director Maurice H. Stans said "No" last night to conservationists who want the Federal Government to assume a larger share of the responsibility for conserving and developing the Nation's natural resources.

His reasons were outlined to delegates to the Seventh National Watershed Congress at the Statler Hotel.

"We cannot demand more of our Government," he declared, "than we are willing to pay in taxes."

Unless present pressures and trends are resisted, he foresaw a Federal budget of $170 billion by 1970.

The President's budget for fiscal year 1961 provides $20 million as the Federal contribution to Public Law 566 projects designed to prevent erosion of land, to control waterflow, and reduce sedimentation.

At a session earlier in the day delegates had declared this is not nearly enough. Under questioning, Donald Williams, Administrator of the Soil Conservation Service, admitted that $100 million a year in Federal aid would be required to keep watershed protection projects in balance with other natural resource developments.

Stans insisted the Federal Government just didn't have the money to meet all requests. "The brutal truth is we have put so much on the cuff that grievous burdens have already been laid on our economic future."

He said the public debt of $290 billion is far from all we owe for the past. It does not include an already accrued $30 billion for military retirements, $28 billion in retirement benefits for civilian employees, and $300 billion in future pensions, compensation and other benefits voted to veterans.

He noted that the public debt, plus $350 billion in future obligations for past services, plus $98 billion in future c.o.d.'s adds to nearly $750 billion. "That," he declared, "is the size of the Federal Government's mortgage on us and our children, beyond regular annual costs of defense, welfare, and commerce."

The proposed Federal budget provides for a surplus of $4.2 billion. Stans said this could be used to reduce the national debt and lay the basis for tax reform.

Such action, he added, "would tell the world we can manage our fiscal affairs, that our economy and our money are sound. And it would be evidence of the strength we need to prove to Khrushchev that our system is best."

[From the Washington Post, Apr. 21, 1960]

THE ONE-EYED BOOKKEEPER

Budget Director Stans has given his usual lecture on Federal spending to the National Watershed Congress, assembled here. What it boils down to is that the United States cannot afford a one-tenth of 1 percent increase in the budget for an adequate program to conserve its soil. Such a program would cost about $100 million a year in Federal aid in place of the $20 million included in the President's budget.

Mr. Stans' strictures are generally disappointing for their failure to take into account the national potential for more adequate Federal spending, a failure that seems to derive from his conclusion that there is simply no way to increase the flow of revenues to the Treasury. Just why Congress and the country should allow him his self-appointed role of defender of the Internal Revenue Act is incomprehensible enough. But an even greater mystery is that so accomplished a bookkeeper as Mr. Stans persists in looking at only one side of his ledger.

In this case, as on pollution control and other programs, he fails to reckon the cost of Federal inaction. What value does he place upon the country's natural resources? In his books, no value at all seems to have been assigned. Thus he can concentrate on "saving" dollars and forget about the erosion of everything from the Nation's educational plant to the very earth on which it lives. We aren't against sound bookkeeping, but we think the Budget Bureau's methods have failed to grow with its policy-reviewing responsibilities.

[From the Washington Post, Apr. 23, 1960]

"STANS FAVORS CONSERVATION"

Despite the rash of critical cartoons, editorials, and news headlines about the Bureau of the Budget that you have published these last 10 days, I refuse to believe that you do not want to be fair and objective in your views and editorial policies.

I think I owe it to my associates in the Bureau, including a hard-working dedicated career staff, whose terms here will undoubtedly survive mine, to ask why you feel it necessary to go to such extremes to try to undermine public confidence in an essential, important unit of the Government, even granting that there may have to be political or economic differences of opinion.

Take, for example, your wholly misleading and inaccurate headline "Stans Opposes U.S. Conservation Role" which appeared in your edition of April 20, over a reporter's brief account of my speech to the National Watershed Congress.

Not a word was contained in the story to indicate that, in fact, I delivered a personal message from the President to the conservationists which praised the watershed protection program and contained the President's statement that "we must continue to work vigorously to advance this program."

Nor does your account of my speech make any mention of my statement to the Watershed Congress that "I have come here with a special purpose, and that is to assure full understanding and sympathy for your programs and objectives."

I did not oppose U.S. conservation role at all. In fact, I pointed to developments under the Watershed Protection and Flood Pre-

vention Act of 1956 as evidence that we can make progress in meeting our conservation problems, but without abdicating local initiative and local responsibility to a massive national government.

But what I also did in my speech was to remind the conservationists that they are by no means alone in seeking a larger share of the Federal budget, and that it is not possible to satisfy every group, however sincere and dedicated, without facing up to the overall fiscal consequences.

There is competition for every dollar of budget funds, and the task of selection is made immeasurably difficult by the enormous amount of built-in commitments in existing legislation and programs. All this is complicated by the further fact that it is so hard to reduce or eliminate old and less important programs to make way for new ones.

This was the gist of my message to the watershed people and I believe those who were present accepted and understood it that way.

I note, however, that you have now paid me your respects with an editorial April 21. Here again, along with some personal abuse which I can take as well as the next man, you say that I assign no value to the country's natural resources. Here you are quite mistaken, because I did say, among other things, that "our wealth is to be measured not merely by the number of families who enjoy air conditioning, or television * * * or the countless other gadgets to which we attach so much importance, but far more realistically in the farms, streams, forests, and parks, our waterways and watersheds. These we cannot do without."

The value I place on the conservation of our natural resources is a high one. It so happens that I also place a high value on fiscal responsibility as a yardstick of good government. If this is one-eyed bookkeeping, as you choose to label it, it is an affliction shared by the vast majority of the American people.

If we must differ so greatly, can't we at least preserve fairness? And how about a new headline "Stans Favors Conservation"?

MAURICE H. STANS,
Director, Bureau of the Budget.

WASHINGTON.

JAMES WILMOT MURPHY

Mr. PASTORE. Mr. President, mid-April in Washington—the month when nature is touched with the beauty of life—is remembered, too, for the passing of beloved Americans.

There is more than the date of his passing—April 11, 1960—which permits us to count James W. Murphy in the roll of Americans we love.

This humble man would be the last to list himself with the great. But we of the Senate shall not be the last so to list him.

James Murphy was born just across the street from where we meet—and he labored the loyal length of his life just across the hall from where our voices are raised—and there our spoken words are fashioned into their everlasting form by our devoted reporters.

Jim Murphy toiled there longer than most of us have lived—longer than any of us have served. We knew that he toiled time beyond his strength—yet we seemed not to have conceived a time when his talents would not be at our call.

Therefore, when the summons came, there was all the tragic touch of sudden sorrow.

The passing of James Wilmot Murphy is the departure of a friend, a colleague, a counselor, a kindly editor.

I view Jim Murphy as the gentle parent of us all—proud of our performance—jealous of our name and fame.

Jim Murphy shared our thoughts expressed upon the Senate floor and often dressed them so that our minor errors of quick speech might not cloud the permanent record for posterity.

The wisdom and the wit of this scholar was the mold for the manner and the men of the Senate reporting staff. We are humble when we pause to assess the skill and devotion of these men. They are truly our biographers as our lives, our labors, our language may have their impact on our Nation and its people.

We have a fuller appreciation of their dedication as we reflect on the great heart of Jim Murphy—and his heritage. He was heir to a family spirit of service extending back more than a century—a service, indeed, covering almost two-thirds of our national existence.

These are great and compelling reflections created by the passing of a mild and modest gentleman. We shall miss his friendly visits to the Senate floor. We shall miss our friendly visits to his "throne"—his busy desk—but never so busy but that his smile and pleasant greeting made our visit worth while.

In his domain, he made our public life a personal and pleasant adventure. His death makes our sorrow deeply personal and sincere.

To his loved ones I express my sincere sympathy on his passing. To our country, I express its good fortune to have possessed the loyal service of James Wilmot Murphy—his was truly a labor of love.

UNIVERSITY OF TEXAS OPPOSES DISCLAIMER AFFIDAVIT IN NATIONAL DEFENSE EDUCATION ACT

Mr. YARBOROUGH. Mr. President, on Thursday, April 21, I made a statement with respect to the resolution of April 4, 1960, by the Committee of Council on Academic Freedom and Responsibility of the General Faculty of the University of Texas, concerning the disclaimer affidavit required by the National Defense Education Act. The names of the five members of the faculty who framed the resolution were omitted.

Mr. President, throughout history Texans have been dedicated to the ideal of human liberty—freedom of thought, freedom of expression, freedom of religion. Only last week we observed the anniversary of the battle of San Jacinto, fought April 21, 1936, at which Texans won their independence and freedom.

Acting in this tradition and spirit, five outstanding professors at the University of Texas comprising the Committee of Counsel on Academic Freedom and Responsibility, recently adopted a resolution urging the Congress to remove the disclaimer affidavit from the National Defense Education Act.

In so doing, this dedicated committee voted the University of Texas in position to join with other great American educational institutions such as Harvard, Yale, Columbia, and others, on this issue.

All Texans should be proud that the University of Texas has a committee which steps forward and takes a stand opposed to this discrimination against students, though such a stand may result in criticism against them.

I believe it pertinent to note that the University of Texas, with an enrollment of over 18,000 and over 75 years old, has a Texas constitutional mandate to be a university of the first class.

With professors such as Millard H. Ruud, professor of law, and chairman of this committee, and other committee members who have such understanding and regard for the dignity of the individual, Texans can confidently expect that the day is not far off when their principal university will be counted among the leaders in the Nation if, indeed, it has not already attained that stature.

It seems to me that the first point of the committee's resolution should be of particular interest to the Congress in consideration of this matter:

Resolved, That the disclaimer affidavit required by the National Defense Education Act of 1958 runs counter to strong American traditions of long standing that the state should not intrude itself in matters of belief and conscience. * * * History amply demonstrates the dire consequences to liberty which may ensue when Government goes beyond the regulation of overt conduct and regulates belief, also.

As pointed out in this resolution, what the college students and professors resent is the insult implied, and the slur on their character and patriotism implicit, in a system which requires disclaimer affidavits from students and teachers who seek to borrow money from the Government, and requires no such affidavit from farmers, businessmen, or others who seek loans from the Federal Government.

Are our students suspect because they attend college and seek an education? Are all who seek learning to be distrusted, while all who seek dollars are trusted? Is it more patriotic to accumulate money than it is to seek learning?

A disclaimer affidavit requirement for scholars, but not for the promoter or the businessman, is a revelation of a subconscious fear of knowledge that bodes America no good.

Knowledge can save us when material goods could fail.

Surely our society is advanced enough to learn true values in this world. We should value learning, and nurture it, and should not treat those who seek to advance their learning as suspect persons, unworthy of the trust of their fellow citizens.

This issue should have been laid to rest with the repeal of the alien and sedition laws of more than a century and a half ago. But it seems that each generation must relearn the lesson of liberty.

The faculty of the University of Texas is to be commended for its leadership in teaching this generation the value of liberty and of learning as its chief safeguard.

Mr. President, in order that the Congress may have the benefit of the thought of this learned committee in

considering this question, I ask unanimous consent to have printed in the body of the RECORD the text of the resolution of April 4, 1960, by the Committee of Counsel on Academic Freedom and Responsibility of the General Faculty of the University of Texas, concerning the disclaimer affidavit required by the National Defense Education Act, and I also request unanimous consent to have printed at the close of the resolution the names of the five University of Texas professors who signed it.

There being no objection, the resolution, with signatures, was ordered to be printed in the RECORD, as follows:

Whereas the National Defense Education Act of 1958 requires every person to whom a payment or loan is made under the act to execute a disclaimer affidavit swearing or affirming that he "does not believe in, and is not a member of and does not support any organization that believes in or teaches, the overthrow of the U.S. Government by force or violence or by any illegal or unconstitutional methods" (sec. 1001(e), Public Law 85–864, 75 Statutes at Large 1580); and

Whereas this provision has been called in question by the publicly expressed dissatisfaction with it by many persons and organizations, including such educational associations as the Association of American Universities, the Association of American Colleges and the American Association of Land-Grant Colleges and State Universities, and including officials of a number of the Nation's leading educational institutions, such universities as Harvard, Yale, Columbia, Indiana, and Washington; and

Whereas Congress has been giving serious consideration to a bill designed to remove the disclaimer affidavit and President Eisenhower and Secretary Arthur Flemming have urged its removal; and

Whereas the Committee of Counsel on Academic Freedom and Responsibility of the General Faculty, the University of Texas, is an elected, representative standing committee of the general faculty charged with the responsibility to be concerned with matters affecting academic freedom: Now, therefore, be it

Resolved by the Committee of Counsel on Academic Freedom and Responsibility of the University of Texas:

(1) That the disclaimer affidavit required by the National Defense Education Act of 1958 runs counter to strong American traditions of long standing that the State should not intrude itself into matters of belief and conscience. This the disclaimer affidavit does by requiring the student or faculty member to swear, among other things, that he does not "believe in" any organization that "believes in" the overthrow of the U.S. Government. History amply demonstrates the dire consequences to liberty which may ensue when government goes beyond the regulation of overt conduct and regulates belief also.

(2) That while the National Defense Education Act is based upon the apparent assumption that the welfare, if not the survival of the Nation is dependent upon the well-being of education and the quality of the graduates and programs of institutions of higher education, the disclaimer affidavit, along with that in the National Science Foundation Act, singles out the college student and professor as the only recipients of governmental aid, loans, and subsidy whose devotion to this Nation is so doubtful that such an additional assurance is required. It is understandable that the college student and professor should feel some offense over this probably unconscious insult.

(3) That a careful reading of the disclaimer affidavit discloses that it is vague and ambiguous. While this vagueness and ambiguity poses no deterrent to its execution by the disloyal, at whom it is apparently aimed, it does cause the scrupulous and conscientious to pause. Being vague and ambiguous it may operate as a deterrent to free inquiry and thought upon those who have executed the affidavit.

Therefore, we urge the Congress of the United States to remove the disclaimer affidavit from the National Defense Education Act and urge like-minded persons to give appropriate support to this step.

DEATH OF DR. JAMES D. HOSKINS, PRESIDENT EMERITUS OF THE UNIVERSITY OF TENNESSEE

Mr. KEFAUVER. Mr. President, in the death of Dr. James D. Hoskins, president emeritus of the University of Tennessee, the entire educational world has lost a stanch advocate. Dr. Hoskins was a main force in the expansion and growth of the University of Tennessee into a major educational institution.

He was always ready to do battle for causes which he felt would enhance the growth and development of the university. He was such a strong advocate of causes and issues which he felt were important that most of his battles were won, and he lived to see his dream of a great educational institution materialize atop the mountain overlooking the Tennessee Valley.

Dr. Hoskins was a wise and kindly leader, a great educator and a distinguished citizen. Tennessee mourns the passing of one of her great sons, but he himself has gained enviable immortality upon this earth—his memory is preserved in material things, and in the hearts and minds of the thousands of students and citizens who benefited through his efforts in behalf of the university he served for more than half a century.

I ask unanimous consent that editorials from the Lexington Progress, Lexington, Tenn., and the Knoxville Journal, Knoxville, Tenn., be inserted in the RECORD at this point in my remarks.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Lexington (Tenn.) Progress, Apr. 7, 1960]

DR. JAMES HOSKINS

The entire educational world mourns the death of Dr. James D. Hoskins, president emeritus of the University of Tennessee.

Dr. Hoskins headed the State university during the years it developed into a major educational institution. That growth and development was due partly to his able administration.

Because of his age, Dr. Hoskins for several years had been unable to take active part in educational work, yet the stature of the State university today is in part a monument to his ability.

[From the Knoxville (Tenn.) Journal, Apr. 5, 1960]

IN DEATH OF JAMES D. HOSKINS OUR STATE LOSES ONE OF HER GREAT SONS

When that young freshman, James D. Hoskins, registered for his courses at the University of Tennessee in 1886, it is safe to guess that not a single one of his professors, and least of all young Hoskins, cherished the remotest premonition as to what the future might hold for him.

Little did he think that 60 years later he would be retiring to the post of president emeritus of the university, or that on that day he registered he was, in reality, entering upon a life of devotion to the interests of his alma mater that was destined to continue to his last day on earth.

Thus when he passed away this week, after celebration of his 90th birthday last January, there were few of the thousands of Tennesseans who became UT alumni during this man's lifetime who did not experience a personal loss in his going. For while he served only 12 years as president of the university, in all but a few of his first years as a member of the faculty James D. Hoskins had been a living force in the expansion and growth of the institution.

Where the interests of his university were concerned, he was always ready to do battle, whether it was with the legislature, with recalcitrant elements in his own faculty, with alumni who had been cajoled into plans for splitting the university, or with TVA when its Board determined to flood thousands of acres of rich farmland in his native county of Jefferson. He was not a belligerent man, but he was one of such strong convictions that they forced him into active advocacy of causes and issues which he felt were important. When he was once enlisted, he became an advocate of such effectiveness that most of his battles were won, fortunately, for the institution he served.

Nor did his interest in the university lapse when he retired from the presidency. No later than last Christmas Dr. Hoskins issued from his sickbed a call to UT alumni for construction of an interdenomination chapel to be paid for with public contributions, a cause for which he believed a great need existed on the university campus.

All of this is no adequate summary of his record as a great educator and distinguished citizen, but in any event there must be added to it an appraisal of the man himself as a wise and kindly citizen and one blessed with a saving sense of wry humor which came to the surface both in his personal associations and in his official dealings in the university's behalf.

Tennessee has lost in James D. Hoskins one of her great sons, but he has gained the most enviable kind of immortality upon this earth, that of having his memory preserved not only in the form of material things left to bear his name but in the hearts and minds of thousands of his fellows.

STATEMENT ON NUCLEAR TESTING BY ADVISORY COMMITTEE ON SCIENCE AND TECHNOLOGY OF THE DEMOCRATIC ADVISORY COUNCIL

Mr. KEFAUVER. Mr. President I should like to call to the attention of the Senate a most important "Statement on Nuclear Testing" issued yesterday by the Advisory Committee on Science and Technology of the Democratic Advisory Council.

This Committee, which is composed of a number of world renown scientists, including three Nobel prize winners, recommends that "pending the development of an inspection system adequate

for monitoring low-yield underground tests, a moratorium be imposed on such tests for a limited period of time."

It recommends further that "one of our major laboratories be given a high priority to establish a prototype close-spaced network of seismic stations and to operate it in a seismic region for a sufficient period to determine its capability of detecting explosions, locating their positions, and distinguishing them from earthquakes."

The Committee also calls for speedy consideration by the Congress of the proposal for a National Peace Agency.

Mr. President, I ask unanimous consent that this statement by the Advisory Committee be placed in the RECORD at this point.

Mr. President, I am writing a letter to President Eisenhower today, urging him to reassess the administration's position with respect to a test ban and to come forward with positive proposals at the summit meeting. If he comes forward with such proposals, I know that he will have the support of all Americans, regardless of political party. If he fails to come forward with such proposals, we may have lost one of our last chances to make a beginning toward an enduring peace.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT ON NUCLEAR TESTING BY THE ADVISORY COMMITTEE ON SCIENCE AND TECHNOLOGY OF THE DEMOCRATIC ADVISORY COUNCIL

The Advisory Committee on Science and Technology strongly supports the position that the United States should seek an agreement to ban all medium and high power weapon tests. It is generally agreed that an inspection system, employing existing detection technology and providing an adequate number of on-site inspections can be made adequate for monitoring a test ban on medium and high power weapons. This is clearly consistent with the recommendations made by the Committee on December 20, 1959. It is of paramount importance that an agreement on the cessation of nuclear tests be concluded with speed.

The Committee recommends that pending the development of an inspection system adequate for monitoring low-yield underground tests, a moratorium be imposed on such test for a limited period of time. The military value which would derive from a few clandestine low-yield nuclear tests must be viewed in terms of the present advanced nuclear weapons capability of the present nuclear powers, and especially the United States. More importantly, the agreement must be viewed in terms of the additional security which the United States and the Soviet Union and all other nations achieve as a result of such a moratorium. It is to the mutual advantage of all nations to limit the nuclear club to its present membership. When the world nuclear club expands its membership, it will be too late to debate the technicalities of a nuclear test treaty. We will have wasted our most precious asset—time.

The Committee deplores the fact that during recent years there has been a woefully inadequate effort made to improve the technology of nuclear tests detection and identification, especially for underground tests.

We therefore propose that one of our major laboratories be given a high priority to establish a prototype close-spaced network of seismic stations and to operate it in a seismic region for a sufficient period to determine its capability of detecting explosions, locating their positions, and distinguishing them from earthquakes.

The operation of such a network of mostly unmanned stations would provide data to determine the spacing of stations needed for highly reliable monitoring in Russia. At present a spacing of 200 km. is agreed to be adequate to detect and identify fully muffled 20 kiloton illicit explosions. This requires a large number of stations (600 in Russia) but these could be unmanned and relatively inexpensive and to a high degree tamper-proof. A larger spacing of stations should be sufficient throughout the greater part of the network which covers non-seismic areas and would markedly reduce the number of stations needed. Actual operation of the 1958 Geneva system, consisting of approximately 20 manned seismic stations in the Soviet Union together with the research and development on more sensitive systems will be the best way to improve the capability of detecting explosions.

In view of the present state of the art in detecting low-yield, underground tests, it is imperative that the proposal for a National Peace Agency made by the Democratic Advisory Council on December 5, 1959, be given speedy consideration by the Congress. More than 20 bills embodying the principles of this proposal have been introduced into both Houses of the Congress and there is good support for such legislation. It remains for the appropriate committees of Congress to hold hearings on these bills and for the Congress to enact one of them.

The establishment of the National Peace Agency will offer dramatic proof to the world that the United States is sincere in its desire for peace and disarmament. The conclusion of a treaty on test cessation has its main importance as a first step toward controlled disarmament.

MEMBERS OF THE ADVISORY COMMITTEE ON SCIENCE AND TECHNOLOGY

Dr. Ernest C. Pollard (Chairman), chairman, biophysics department, Yale University.

Dr. Samuel K. Allison, professor of physics, the Enrico Fermi Institute for Nuclear Studies, University of Chicago.

Dr. Harrison Brown, professor of geochemistry, California Institute of Technology.

Dr. James F. Crow, professor of medical genetics, University of Wisconsin.

Dr. Louis B. Flexner, chairman, department of anatomy, school of medicine, University of Pennsylvania.

Mr. Trevor Gardner, chairman and president, Hycon Manufacturing Co.

Dr. H. Bentley Glass, professor of biology, the Johns Hopkins University.

Dr. Leslie C. Dunn, professor of zoology, Columbia University.

Dr. David R. Goddard, director, division of biology, University of Pennsylvania.

Dr. David L. Hill, consulting physicist, New York City.

Dr. Polykarp Kusch, professor of physics, Columbia Radiation Laboratory, Columbia University.

Dr. Fritz Lipmann, the Rockefeller Institute, New York City.

Dr. F. T. McClure, chairman, research center, Applied Physics Laboratory, the Johns Hopkins University, Silver Spring, Md.

Dr. Richard B. Roberts (Vice Chairman), department of terrestrial magnetism, Carnegie Institution, Washington, D.C.

Dr. John S. Toll, chairman, department of physics, University of Maryland.

Dr. Harold C. Urey, Institute of Technology and Engineering, University of California, La Jolla, Calif.

FINDINGS OF YOUTH FORUM

Mr. CLARK. Mr. President, the Youth Forum at the Golden Anniversary White House Conference on Children and Youth adopted a platform of "Youth Priorities 1960–70" at the final meeting of the forum at the Sheraton Park Ballroom, April 4. It is significant to note that the plank in that eight-part platform which received the strongest vote of endorsement dealt with civil rights. It read as follows:

We believe that any infringement on equality of opportunity denies to youth of various ethnic, creedal, and racial backgrounds the possibility for a full life. To eliminate these deprivations we call for the substantial completion of school desegregation by 1970, the provision of equal access to housing for all individuals, and the elimination of discrimination in employment and advancement practices throughout the United States. We also affirm the right of all citizens to peaceful protest and nonviolent resistance against all forms of social injustice.

The White House Conference on Children and Youth was divided into 18 forums dealing with 18 different subjects, and the largest forum with 1,400 delegates from all of the States was forum XVIII, dealing with civil rights. The final paper adopted by that forum contained the following recommendations dealing with the recent sit-in demonstrations:

(1) We recommend that community groups representing Negro and white leadership be created to establish communication between the two groups and to provide an instrument for community planning and agreement. This should provide that desegregation must be accomplished within specified time periods; (2) we recommend endorsement of nonviolent sit-in demonstrations of students in protest against segregated facilities; (3) we recommend that public officials establish bridges of communication for the education of minority group problems in view of the support and sympathy expressed in all parts of the Nation; and (4) we recommend support of Negro students in their fight for equality and decry the use of force, violence, political, or legal contrivances to prohibit or intimidate students' nonviolent protest against inequality.

DISTRESSED AREAS IN PENNSYLVANIA

Mr. CLARK. Mr. President, the Borough of Jim Thorpe, Pa., is one of the distressed towns in Carbon County, in the anthracite region of Pennsylvania. It is one of the communities which would be helped measurably by the passage of the area redevelopment bill now pending in the House. I ask unanimous consent that a letter I have received from Charles E. Wildoner, secretary of the Borough of Jim Thorpe, be printed in the RECORD at this point in my remarks.

Mr. President, these communities in Pennsylvania have all expended great efforts to help themselves, in cooperation with the Pennsylvania Industrial Development Authority, the State department of commerce, and the Commonwealth of Pennsylvania. But Federal assistance is needed desperately, as has been pointed out by the report of the Special Committee on Unemployment Problems recently filed with this body. I hope that Members of the House of Representatives will heed the pleas of such communities as Jim Thorpe and pass an area redevelopment bill this year.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

OFFICE OF BOROUGH SECRETARY,
Jim Thorpe, Pa., April 1, 1960.

Hon. JOSEPH CLARK,
U.S. Senate,
Washington, D.C.

DEAR SENATOR CLARK: At the March meeting of the Jim Thorpe Borough Council, I was instructed to write to you and request special consideration from you in an effort to bolster the faltering economy of our community.

You are aware, I am sure, that Jim Thorpe is one of the critically distressed towns in the anthracite region, and any assistance you can give us in procuring Federal work projects will be greatly appreciated.

We know that you are faced with many difficult problems, but we feel confident that you will give this matter your sincere consideration.

Very truly yours,
CHARLES E. WILDONER,
Secretary.

CONGRESSIONAL ACTION ON APPROPRIATION BILLS

Mr. BYRD of Virginia. Mr. President, Members of the House and Senate, and the public generally, may well wish to take note of the current box score on appropriations before Congress this year. As Congress recessed for Easter, the Tax Foundation found that "1961 money bills thus far considered, at latest stages of action, point to somewhat higher expenditures than anticipated in the budget in areas covered by these bills."

The Tax Foundation is an independent research organization which I regard as the best in the field of government at all levels. For years it has been keeping a running box score on bills authorizing expenditures during their passage through the legislative procedure.

The Easter summary was the first by the Tax Foundation in the current session of Congress. Others will follow as the appropriation bills move further through Congress.

I ask unanimous consent that the Tax Foundation tabulation of congressional action on appropriation bills, preceded by its explanatory statement of April 19, 1960, be published in the body of the RECORD immediately following my remarks.

There being no objection, the statement and tabulation were ordered to be printed in the RECORD, as follows:

APPROPRIATIONS BOX SCORE

(By Tax Foundation, Inc.)

An analysis of the fiscal 1961 money bills thus far considered by the Congress, at latest stages of action, point to somewhat higher expenditures than anticipated in the budget in areas covered by these bills, the Tax Foundation said today. A tabulation released by the Foundation shows a net increase of $309 million over budget estimates, in 8 out of a probable 15 appropriation bills, for the fiscal year which starts next July 1.

Appropriations carried in the eight bills, taking the latest action in each case, total $15.4 billion, as compared with budget estimates of $15.1 billion. Budget estimates for these bills represent about 23 percent of the total of $68.2 billion of current appropriations requested in the fiscal 1961 budget.

The Tax Foundation computations follow the official Budget Bureau practice, and eliminate all appropriation which do not authorize new obligations from Treasury funds. Thus appropriations from postal receipts, and for the liquidation of previously provided contract authority, are excluded. The increase over budget requests of $309 million in the bills considered through April 18 also reflects the failure of Congress thus far to approve the increased postal rates contemplated in the budget. Such postal rate legislation does not fall under the jurisdiction of the Appropriations Committees, but if requested rate increases are denied increased funds will have to be drawn from the Treasury to cover the postal deficit, even though the House reduced total postal appropriations by $82 million.

Reductions in five of the money bills total a little less than $400 million, but increases over requests in the other three, including the extra postal costs due to failure to increase rates, amount to almost $700 million.

The eight bills cover a substantial segment of domestic nonmilitary programs. Opportunities for further reductions in this area of spending, in the measures not yet acted upon, are limited, Tax Foundation pointed out. If sizable reductions in appropriations are to be achieved in this session, the Foundation suggested they must come from the remaining bills not yet considered, including defense, foreign aid, public works, and agriculture fund requests—or from Senate reductions in some of the eight bills mentioned on which that body still must act.

The appropriations data do not include "backdoor financing" outside the regular appropriation process, which in pending housing and other measures, may also authorize spending as much as $1.4 billion beyond levels recommended in the budget.

Actions on appropriation bills

[In millions]

	Amended budget estimates	Passed by House	Passed by Senate	Final Congress action	Latest action versus estimates
Fiscal 1961:					
Independent offices	$8,417	[1] $8,146			−$271
Labor-Health, Education, Welfare departments, and related agencies	4,000	4,184			+184
Treasury-Post Office-Tax Court, Treasury-Tax Court	845	824			−21
Total postal appropriations	(4,053)	(3,971)			(−82)
Deduct postal receipts	[2] (4,004)	(3,450)			(−554)
Appropriation from Treasury for postal public services and deficit	49	[3] 521			+472
Department of Commerce and related agencies	800	761	738		−61
State-Justice-Judiciary-U.S. Information Agency	714	677			−37
Department of Interior and related agencies	550	543	589		+39
District of Columbia (Federal funds)	53	46	49	48	−6
General Government matters	14	14			
Deduct appropriations for liquidation of contract authority	379	365	79		+10
Total new obligational authority, fiscal 1961	15,063	15,351	1,297	48	[4] +309
Fiscal 1960 supplementals:					
2d supplemental	1,019	238	995	955	−63
Supplemental for space activities	23	23	23	23	
Deduct appropriations for liquidation of contract authority	61	10	45	28	+33
New obligational authority, fiscal 1960	981	251	974	951	−30

[1] Committee action.
[2] Includes $554,000,000 from proposed increases in postal rates.
[3] Estimated postal appropriation from Treasury includes $49,000,000 for public services, as authorized by Postal Policy Act of 1958, and $472,000,000 for the postal deficit.
[4] This is the amount by which $15,372,000,000, the total of all bills at latest stages of action, exceeds budget estimates.

CASES INVOLVING THE MALLORY RULE

Mr. BYRD of Virginia. Mr. President, the chief justices of State supreme courts, in their conference held in Pasadena, Calif., in August 1958, found that the Warren Supreme Court "does not seem to have given any consideration whatsoever to the risks to society which might result from the release of a prisoner of this type."

The State chief justices were referring specifically to the case of *Moore* v. *Michigan* (335 U.S. 155). But for all intents and purposes, the statement is equally applicable to the Andrew Mallory case which the Warren Court decided on June 24, 1957.

In this Mallory case the Warren Court seized upon what it chose to regard as a technical flaw in traditionally accepted police practice to turn loose a confessed and convicted rapist to prey again on innocent women.

Andrew Mallory was arrested again in January 1958, little more than 6 months after he was freed, on charges of housebreaking and assault on the daughter of a woman who had befriended him.

He was convicted on the assault charge April 4, 1958. Now he is indicted again in Philadelphia for rape and burglary.

Certainly, the courts of this Nation must protect the rights and liberties of all of the people—but this means protection of innocent people, too. Here we have another example of the pattern of Warren Supreme Court decisions which has undermined the confidence of the American people in the Federal judiciary.

The effect of the Warren Supreme Court decision in the original Andrew Mallory case was to hold that the police—not the rapist—had violated the law. I ask unanimous consent to have printed in the RECORD at this point the opinion of the Court in the case of Mallory against United States, as decided on June 24, 1957.

There being no objection, the opinion was ordered to be printed in the RECORD.

ADMISSION OF EVIDENCE

(Opinion of the Court, *Mallory* v. *United States*, certiorari to the U.S. Court of Appeals for the District of Columbia Circuit, No. 521; argued April 1, 1957; decided June 24, 1957.)

Petitioner was convicted in a Federal District Court of rape and sentenced to death after a trial in which there was admitted in evidence a confession obtained under the following circumstances: He was arrested early in the afternoon and was detained at police headquarters within the vicinity of numerous committing magistrates. He was not told of his right to counsel or to a preliminary examination before a magistrate, nor was he warned that he might keep silent and that any statement made by him might be used against him. Not until after petitioner had confessed, about 9:30 p.m., was an attempt made to take him before a committing magistrate, and he was not actually taken before a magistrate until the next morning. Held: This was a violation of rule 5(a) of the Federal Rules of Criminal Procedure, which requires that an arrested person be taken before a committing magistrate "'without unnecessary delay,'" and the conviction is reversed. (*McNabb* v. *United States* (318 U.S. 332); *Upshaw* v. *United States* (335 U.S. 410). Pp. 449–456. 98 U.S. App. D.C 406, 236 F 2d 701, reversed and remanded)

William B. Bryant argued the cause for petitioner. With him on the brief were Joseph C. Waddy and William C. Gardner.

Edward L. Barrett, Jr., argued the cause for the United States. With him on the brief were Solicitor General Rankin, Assistant Attorney General Olney, Beatrice Rosenberg, and Julia P. Cooper.

Mr. Justice Frankfurter delivered the opinion of the Court.

Petitioner was convicted of rape in the U.S. District Court for the District of Columbia, and, as authorized by the District Code, the jury imposed a death sentence. The Court of Appeals affirmed, one judge dissenting (236 F. 2d 701). Since an important question involving the interpretation of the Federal Rules of Criminal Procedure was involved in this capital case, we granted the petition for certiorari (352 U.S. 877).

The rape occurred at 6 p.m. on April 7, 1954, in the basement of the apartment house inhabited by the victim. She had descended to the basement a few minutes previous to wash some laundry. Experiencing some difficulty in detaching a hose in the sink, she sought help from the janitor, who lived in a basement apartment with his wife, two grown sons, a younger son and the petitioner, his 19-year-old half-brother. Petitioner was alone in the apartment at the time. He detached the hose and returned to his quarters. Very shortly thereafter, a masked man, whose general features were identified to resemble those of both petitioner and his two grown nephews, attacked the woman. She had heard no one descend the wooden steps that furnished the only means of entering the basement from above.

Petitioner and one of his grown nephews disappeared from the apartment house shortly after the crime was committed. The former was apprehended the following afternoon between 2 and 2:30 p.m. and was taken, along with his older nephews, also suspects, to police headquarters. At least four officers questioned him there in the presence of other officers for 30 to 45 minutes, beginning the examination by telling him, according to his testimony, that his brother had said that he was the assailant. Petitioner strenuously denied his guilt. He spent the rest of the afternoon at headquarters, in the company of the other two suspects and his brother a good part of the time. About 4 p.m. the three suspects were asked to submit to lie detector tests, and they agreed. The officer in charge of the polygraph machine was not located for almost 2 hours, during which time the suspects received food and drink. The nephews were then examined first. Questioning of petitioner began just after 8 p.m. Only he and the polygraph operator were present in a small room, the door to which was closed.

Following almost an hour and one-half of steady interrogation, he "first stated that he could have done this crime, or that he might have done it. He finally stated that he was responsible. * * *" (Testimony of polygraph operator, R. 70.) Not until 10 p.m., after petitioner had repeated his confession to other officers, did the police attempt to reach a U.S. commissioner for the purpose of arraignment. Failing in this, they obtained petitioner's consent to examination by the deputy coroner, who noted no indicia of physical or psychological coercion. Petitioner was then confronted by the complaining witness and "practically every man in the sex squad," and in response to questioning by three officers, he repeated the confession. Between 11:30 p.m. and 12:30 a.m. he dictated the confession to a typist. The next morning he was brought before a commissioner. At the trial, which was delayed for a year because of doubt about petitioner's capacity to understand the proceedings against him, the signed confession was introduced in evidence.

The case calls for the proper application of rule 5(a) of the Federal Rules of Criminal Procedure, promulgated in 1946, 327 U.S. 821. That rule provides:

"(a) Appearance before the commissioner: An officer making an arrest under a warrant issued upon a complaint or any person making an arrest without a warrant shall take the arrested person without unnecessary delay before the nearest available commissioner or before any other nearby officer empowered to commit persons charged with offenses against the laws of the United States. When a person arrested without a warrant is brought before a commissioner or other officer, a complaint shall be filed forthwith."

This provision has both statutory and judicial antecedents for guidance in applying it. The requirement that arraignment be "without unnecessary delay" is a compendious restatement, without substantive change, of several prior specific Federal statutory provisions. (E.g., 20 Stat. 327, 341; 48 Stat. 1008; also 28 Stat. 416.) See Dession, "The New Federal Rules of Criminal Procedure I," 55 Yale L.J. 694, 707. Nearly all the States have similar enactments.

In *McNabb* v. *United States* (318 U.S. 332, 343–344), we spelled out the important reasons of policy behind this body of legislation:

"The purpose of this impressively pervasive requirement of criminal procedure is plain. * * * The awful instruments of the criminal law cannot be entrusted to a single functionary. The complicated process of criminal justice is therefore divided into different parts, responsibility for which is separately vested in the various participants upon whom the criminal law relies for its vindication. Legislation such as this, requiring that the police must with reasonable promptness show legal cause for detaining arrested persons, constitutes an important safeguard—not only in assuring protection for the innocent but also in securing conviction of the guilty by methods that commend themselves to a progressive and self-confident society. For this procedural requirement checks resort to those reprehensible practices known as the third degree, which, though universally rejected as indefensible, still find their way into use. It aims to avoid all the evil implications of secret interrogation of persons accused of crime."

Since such unwarranted detention led to tempting utilization of intensive interrogation, easily gliding into the evils of "the third degree," the Court held that police detention of defendants beyond the time when a committing magistrate was readily accessible constituted "willful disobedience of law." In order adequately to enforce the congressional requirement of prompt arraignment, it was deemed necessary to render inadmissible incriminating statements elicited from defendants during a period of unlawful detention.

In *Upshaw* v. *United States* (335 U.S. 410), which came here after the Federal Rules of Criminal Procedure had been in operation, the Court made it clear that rule 5(a)'s standard of "without unnecessary delay" implied no relaxation of the McNabb doctrine.

The requirement of rule 5(a) is part of the procedure devised by Congress for safeguarding individual rights without hampering effective and intelligent law enforcement. Provisions related to rule 5(a) contemplate a procedure that allows arresting officers little more leeway than the interval between arrest and the ordinary administrative steps required to bring a suspect before the nearest available magistrate. Rule 4(a) provides: "If it appears from the complaint that there is probable cause to believe that an offense has been committed and that the defendant has committed it, a warrant for the arrest of the defendant shall issue. * * *" Rule 4(b) requires that the warrant "shall command that the defendant be arrested and brought before the nearest available commissioner." And rules 5 (b) and (c) reveal the function of the requirement of prompt arraignment:

"(b) Statement by the commissioner: The commissioner shall inform the defendant of the complaint against him, of his right to retain counsel and of his right to have a preliminary examination. He shall also inform the defendant that he is not required to make a statement and that any statement made by him may be used against him. The commissioner shall allow the defendant reasonable time and opportunity to consult counsel and shall admit the defendant to bail as provided in these rules.

"(c) Preliminary examination: The defendant shall not be called upon to plead. If the defendant waives preliminary examination, the commissioner shall forthwith hold him to answer in the district court. If the defendant does not waive examination, the commissioner shall hear the evidence within a reasonable time. The defendant may cross-examine witnesses against him and may introduce evidence in his own behalf. If from the evidence it appears to the commissioner that there is probable cause to believe that an offense has been committed and that the defendant has committed it, the commissioner shall forthwith hold him to answer in the district court; otherwise the commissioner shall discharge him. The commissioner shall admit the defendant to bail as provided in these rules."

The scheme for initiating a Federal prosecution is plainly defined. The police may not arrest upon mere suspicion but only on "probable cause." The next step in the proceeding is to arraign the arrested person before a judicial officer as quickly as possible so that he may be advised of his rights and so that the issue of probable cause may be promptly determined. The arrested person may, of course, be "booked" by the police. But he is not to be taken to police headquarters in order to carry out a process of inquiry that lends itself, even if not so designed, to eliciting damaging statements to support the arrest and ultimately his guilt.

The duty enjoined upon arresting officers to arraign "without unnecessary delay" indicates that the command does not call for mechanical or automatic obedience. Circumstances may justify a brief delay between arrest and arraignment, as for

instance, where the story volunteered by the accused is susceptible of quick verification through third parties. But the delay must not be of a nature to give opportunity for the extraction of a confession.

The circumstances of this case preclude a holding that arraignment was "without unnecessary delay." Petitioner was arrested in the early afternoon and was detained at headquarters within the vicinity of numerous committing magistrates. Even though the police had ample evidence from other sources than the petitioner for regarding the petitioner as the chief suspect, they first questioned him for approximately a half hour. When this inquiry of a 19-year-old lad of limited intelligence produced no confession, the police asked him to submit to a lie-detector test. He was not told of his rights to counsel or to a preliminary examination before a magistrate, nor was he warned that he might keep silent and "that any statement made by him may be used against him." After 4 hours of further detention at headquarters during which arraignment could easily have been made in the same building in which the police headquarters were housed, petitioner was examined by the lie-detector operator for another hour and a half before his story began to waver. Not until he had confessed, when any judicial caution had lost its purpose, did the police arraign him.

We cannot sanction this extended delay, resulting in confession, without subordinating the general rule of prompt arraignment to the discretion of arresting officers in finding exceptional circumstances for its disregard. In every case where the police resort to interrogation of an arrested person and secure a confession, they may well claim, and quite sincerely, that they were merely trying to check on the information given by him. Against such a claim and the evil potentialities of the practice for which it is urged stands rule 5(a) as a barrier. Nor is there an escape from the constraint laid upon the police by that rule in that two other suspects were involved for the same crime. Presumably, whomever the police arrest they must arrest on "probable cause." It is not the function of the police to arrest, as it were, at large and to use an interrogating process at police headquarters in order to determine whom they should charge before a committing magistrate on "probable cause."

Reversed and remanded.

Mr. BYRD of Virginia. This was the decision that set Mallory free after he had confessed the crime of which he was accused and had been found guilty on June 24, 1955, by a district court jury which recommended the death penalty.

Now he is indicted again after being arrested in Philadelphia on charges of rape and breaking into a roominghouse.

I ask unanimous consent to have printed in the RECORD at this point a news article on this subject as it appeared in the Washington Evening Star of April 23, 1960.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MALLORY IS INDICTED IN NEW RAPE CASE—PHILADELPHIA HOLDS FIGURE IN KEY DECISION

Andrew R. Mallory, freed from death row here when the U.S. Supreme Court ruled he had been held too long before arraignment on rape charges, has been indicted in Philadelphia for rape and burglary.

Mallory, a 24-year-old Negro, was arrested in Philadelphia last March 23. Victor H. Blanc, Philadelphia County district attorney, said Mallory is accused of breaking into a roominghouse on North 22d Street in Philadelphia and raping a Negro woman.

Mallory was indicted on April 5 and is scheduled to go on trial May 11. Mr. Blanc said the maximum sentences are 20 years for burglary and 15 years and a $7,000 fine for rape.

RECORD IS ASKED

Washington police first learned of Mallory's arrest yesterday when Philadelphia authorities requested information on his police record.

Mallory was arrested here in 1954 and charged with the rape of a 38-year-old housewife who lived in the 1200 block of 12th Street NW. He was arrested the following day and admitted the rape, according to police.

Police attempted to arraign him at 10 p.m.—7½ hours after he was arrested—but no arraigning officer could be located and he was not arraigned until the next morning.

Mallory was found guilty on June 24, 1955, by a district court jury which recommended the death penalty. Mallory's appeal went all the way to the Supreme Court, which ruled in June 1957, that the confession was invalid because of the delay in arraignment. A new trial was ordered.

MALLORY FREED

Mallory was freed 2 days later when U.S. Attorney Oliver Gasch asked that the case be dismissed. Mr. Gasch told the court that without the confession there was no reasonable chance of obtaining a conviction.

The Supreme Court's decision, which became known as the Mallory rule, had far-reaching effects on police procedure. Efforts to clarify the Mallory rule brought a heated controversy in Congress and within the law profession.

Washington police complained—and still do—that the Mallory rule requires such hurried arraignment there is not sufficient time for proper interrogation of suspects.

In an attempt to avoid reversals of convictions for delay in arraignment, arraigning officers are now on call 24 hours a day, 7 days a week.

KEATING MEASURE

Senator KEATING, Republican of New York, introduced in 1958 legislation to clarify the Mallory rule.

Differences between the Senate bill and a House version were ironed out on the last night of the 1958 session. The conference bill was passed by the House but died in the Senate on a point of order.

Last year the House approved clarifying legislation but there was no consideration of the bill on the Senate side. While there was considerable support in both Houses for the legislation, a controversy over the language in the bills could not be resolved.

Senator O'MAHONEY, chairman of the Judiciary Subcommittee which held hearings on the legislation, insisted that revision of the law include the word "reasonable" before "delay."

REVISED WORDING

So qualified, the revision would read:

"Evidence, including statements in confessions otherwise admissible, shall not be inadmissible solely because of reasonable delay in taking an arrested person before a commissioner or other officer empowered to commit persons charged with offenses against the laws of the United States."

The House did not want the word "reasonable" in the revision.

A number of defendants here and in other Federal jurisdictions have gone free on successful appeals based on the Mallory rule.

In January 1958, less than 6 months after he was freed, Mallory was charged with housebreaking and assault on the daughter of a woman who had befriended him. The housebreaking charge was dropped, but he was convicted of simple assault and sentenced to 120 days in jail.

Mr. BYRD of Virginia. The effect of the Warren Court decision in the Mallory case has been tremendous. The difficulties it has caused in law enforcement are untold. The so-called Mallory rule has been applied to convictions in State courts all over the country.

Appearing before the Senate Judiciary Subcommittee on Improvements in the Federal Criminal Code on July 17, 1958, Oliver Gasch, U.S. attorney for the District of Columbia, submitted a list of more than a score of cases in an exhibit entitled "An Analysis of 'Court of Appeals Cases Involving the Mallory Rule.'" I ask unanimous consent that this analysis by District Attorney Gasch be inserted in the RECORD at this point.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

Court of appeals cases involving the Mallory rule

Defendant	Appeal No.	Criminal case No.	Violation	Status	Problem	Time
Bailey	13642	33-56	1st degree murder	Affirmed June 13, 1957. Supplemental memo denied Nov. 1, 1957.	(1) Statements not questioned on appeal until after appeal decided on other issues raised. (2) After shooting, defendant immediately ran to police precinct and spontaneously volunteered confession. (3) Defense counsel elicited fact of subsequent similar confession to an examining psychiatrist.	Oral: Spontaneous. Written began 10 hours after oral.
Watson	13698	1162-53	do	Reversed Aug. 19, 1957	Statement made after intermittent questioning of several hours, followed by reenactment and recovery of evidence.	Arrested: 6:40 p.m. Oral: 3:15 a.m.
Lawson	13697	599-56	Housebreaking	Affirmed Oct. 3, 1957	(1) No objection in trial court (2) Viewed as entirety, situation favorable to defendant.	
Carter	13222	644-55	1st degree murder	Reversed. Opinion followed on Oct. 24, 1957.	Statements made during brief periods of interrogation which interspersed by long intervals of no interrogation, and attempted verification of successive statements as to alibi, accident, partial confession, and finally reducing oral confession to writing.	Arrested: 8 p.m. 1st oral: Midnight. Written began approximately 3 a.m.

Court of appeals cases involving the Mallory rule—Continued

Defendant	Appeal No.	Criminal case No.	Violation	Status	Problem	Time
Metoyer	13970	109–57	2d degree murder	Affirmed Nov. 13, 1957	(1) Exculpatory statements made immediately upon arrest, not violation of Mallory. (2) Delay solely for the purpose of reducing oral statements to writing is not improper.	Oral: Spontaneous. Written began approximately 1 hour after oral.
Perry	14058	1292–56	Rape	Affirmed Dec. 12, 1957	Mallory does not apply to statements made en route to police headquarters.	Arrested: 10:30 p.m. Oral made en route to police station.
Cook	13806	818–56	2d degree murder	Affirmed Dec. 26, 1957	(1) Not raised in trial court.	
McGirr	14217	36–57	Transporting motor vehicle, interstate commerce.	Affirmed Feb. 6, 1958	Statements made by a serviceman to military police who were investigating a prior entry of an unregistered automobile onto the military reservation.	
Edmonds	14004	110–57	2d degree murder	Reversed Feb. 7, 1958. Vacated Apr. 15, 1958. En banc argued Apr. 23, 1958. Pending decision.	Mallory raised and abandoned in trial court as to exculpatory statements.	
Starr	13865	745–56	do	Reversed Feb. 13, 1958	Exculpatory statement placed in evidence solely to show sanity. Court held this violated Mallory principle.	
Blackshear	14139	253–57	Attempted robbery; assault with dangerous weapon.	Affirmed Feb. 20, 1958	(1) Not raised in trial. (2) Statements were exculpatory.	
Cecil	13812	1024–56	Robbery; housebreaking.	Affirmed Feb. 27, 1958	1. Exculpatory statements spontaneous with arrival of police. 2. Statements at police cell block in response to finding victim's watch abandoned in scout car which transported defendants.	
O'Shields	13816	1024–56				
Milton Mallory not Andrew Mallory.	14023	1268–56	Carnal knowledge	Affirmed June 19, 1958. (See opinion dated Mar. 31, 1958.)	Statements made during some 5 minutes of questioning which was preceded by some 12 hours of no interrogation and attempted verification of the carnal knowledge complaint of an 8-year old female. Defendant intoxicated.	Arrested: 8 p.m. Confessed: 9 a.m.
Trilling	13069	965–55	Housebreaking	Reversed in all but 1 count of 1 indictment Apr. 17, 1958.	1. 3 different trial judges held no violation of Mallory. 2. No statement during questioning for an hour; followed by spontaneous confession to a friendly police officer. 3. Several subsequent statements regarding several other unsolved crimes. 4. Statements as to still other crimes, made after arraignment.	Arrested: 5:30 a.m. 1st oral confession: 8:30 (valid). Subsequent confession began 9:40 a.m.
	13165	966–55				
	13212	967–55				
Gilliam	13956	223–57 232–57	Robbery	Affirmed Apr. 24, 1958	1. During 3-hour period of no interrogation accusers were brought to police headquarters with defendant's consent. Statement made at end of 3-hour interval. 2. After arraignment, similar statements made to a visitor defendant requested to visit him in jail. 3. No objection to admission of statements in the trial.	
Blackney	13744	879–56	Housebreaking and larceny.	Affirmed May 1, 1958	1. Statement made after waiver of out of-town arraignment and during 3-hour trip to Washington. 2. Time lapse to reduce oral statements to writing. 3. No objection to admissibility in trial court.	Arrested 3 p.m. Oral statements made during 3-hour travel from Berryville, Va.
Edwards	14172	69–56	Robbery	Affirmed May 9, 1958	Does collateral attack under 28 U.S.C. 2255 reach counsel's failure at trial to contest a confession.	
	14175	70–56				
	14176	71–56				
Evans	14277	323–55	Unauthorized use of motor vehicle.	Affirmed May 22, 1958	Cross-examination of the defendant as a witness with own extrajudicial statement, allegedly taken in violation of Mallory.	
Thomas	14266	15–57	2d degree murder	Affirmed June 24, 1958	Repetition of confession to psychiatrist months after confession given police render admission of the latter nonprejudicial.	
Washington	13742	955–56	Narcotic laws	Affirmed June 26, 1958	1. Confession during 20 minutes after arrival at police station. 2. No objection to admission in evidence.	
Porter	14305	894–56	Manslaughter	do	1. News of death of assault victim received in court house as defendant awaited arraignment on assault charge. 2. Defendant's release by court to police followed by written statement. 3. Were statements prejudiced or merely a statement of events preceding death.	Arrested 10:30 p.m. Written: 11:15 p.m. Oral repeat 9 a.m. Written: 1 p.m.

Mr. BYRD of Virginia. This Warren Court decision in the Mallory case was so bad that at least nine bills on the subject were introduced in the 85th Congress. A bill was passed by both the House and the Senate, and it cleared the conference in the House of Representatives. But it was killed in the Senate by a point of order on the conference report on the last night of the session.

Another bill (S. 3411) is being introduced today, of which I am a cosponsor with Senator ERVIN, of North Carolina, Senator JOHNSTON, of South Carolina, and Senator MCCLELLAN, of Arkansas.

APPOINTMENT OF OFFICIAL REPORTERS OF DEBATES

Mr. HAYDEN. Mr. President, I have consulted with the leadership, and it is essential that the resolution which I have in my hand be reported and adopted by the Senate. It relates to the Official Reporters of the Senate. As we know, we have lost Mr. James W. Murphy, and it is his successors we must take care of. I send the resolution to the desk and ask that it be read.

The PRESIDING OFFICER (Mr. LUSK in the chair). The resolution will be read.

The Chief Clerk read the resolution, as follows:

Resolved, That John D. Rhodes and Gregor Macpherson are hereby appointed Official Reporters for reporting the proceedings and debates of the Senate until further order of the Senate, subject to all the duties and obligations of the contract made with D. F. Murphy, deceased, and to the supervision and control of the Senate members of the Joint Committee on Printing on behalf of the Senate in all respects therein provided, and to receive payment for such services according to law: *Provided*, That in the event of the death of either said John D. Rhodes or said Gregor Macpherson, the survivor shall discharge all the duties and obligations imposed upon the Official Reporters appointed by this resolution and shall receive payment for such services according to law until the further order of the Senate.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the resolution (S. Res. 309) was considered and agreed to.

SUGAR ACT EXTENSION

Mr. BENNETT. Mr. President, on March 16, 1960, I introduced S. 3210, a bill to amend and extend the Sugar Act of 1956. The provisions of this bill represented a program whose elements had been arrived at through months of discussion between representatives of all elements of the sugar industry and of the departments of Government whose

responsibilities it would affect. It was no easy task to develop such a program this year because of the situation in Cuba, our biggest offshore supplier. Because this situation is unstable, it became necessary to include in the proposed bill to extend the act, a new provision giving the President, with his constitutional responsibility to conduct our foreign relations, power to act swiftly if sudden and unexpected events in Cuba imperiled the assurance of our supplies from that country.

When it came to the point of writing specific new language to give the President that power, two basic approaches were considered.

First. To make a simple statement giving the President the power to act, without spelling out the obvious right of Congress to take this power away or amend it if it were exercised while Congress was in session.

Second. To give the President the same right to act when Congress was not in session, but require him to make a specific request for the power when it was.

Both concepts contain the essential element of strengthening our capability to meet any emergency created by Castro, and, therefore, it has seemed to me, there is no vital difference between them.

At the end of the industry-administration discussions, the first approach was selected, and I introduced S. 3210 on that basis. Some of my colleagues, with an equally deep and sincere concern for the problem and its solution, preferred the second, and the senior Senator from Louisiana [Mr. ELLENDER] introduced another bill, S. 3361, expressing the second concept. Both bills are identical in all other respects, and Senator ELLENDER and I have been given the assurance that either would be entirely acceptable to the men who must administer the act and use the powers.

The existence of these two bills has presented me with a personal problem. I think both approaches should now be considered by the Finance Committee and by the Senate, and I also want to make clear to my friends that I realize the importance of bipartisan support for needed Presidential powers, as well as for the other features of the two bills, which are identical. Apparently the only way I can solve this dilemma is to become a sponsor of both bills. On the face of it, this is an unusual and inconsistent position to take. But actually it is not, because at all times before S. 3210 was introduced I would have been satisfied with the approach used in the Ellender bill. Therefore, I have asked Senator ELLENDER to request unanimous consent that my name may be added to the list of cosponsors of S. 3361.

O'MAHONEY-ALLOTT WILDERNESS BILL

Mr. BENNETT. Mr. President, on April 20 the senior Senator from Wyoming [Mr. O'MAHONEY] submitted for himself and the senior Senator from Colorado [Mr. ALLOTT] a substitute for S. 1123, the wilderness bill, now pending before the Senate Interior Committee. In my estimation, based upon considerable study, it is the first genuinely forward step taken in Congress to present a viable wilderness bill.

The proposed substitute obviously represents great study and effort on the part of its sponsors, and I wish to commend them for their leadership. It is a refreshingly clean-cut piece of legislative drafting, the clarity and definitiveness of which boldly stand out alongside the original. It is a fitting product of a Senator who once ably presided over the Senate Interior Committee and who is a leading authority on the law [Mr. O'MAHONEY], assisted by a Senator [Mr. ALLOTT] who is a recognized expert on public land and conservation matters.

SUBSTITUTE'S PROVISIONS

The substitute would, for the first time, give congressional approval and support to the wilderness concept. It would immediately give wilderness designation to 5,834,491 acres of national forest lands now classified as wild, wilderness or roadless. It directs the Secretary of Agriculture to review the 8,269,000-acre national forest primitive areas to determine their suitability for wilderness area designation. No such review has ever been made. Similarly, the Secretary of the Interior is directed to review the suitability of units of the National Park System and wildlife refuges and ranges.

S. 1123, AN END RUN AROUND THE CONSTITUTION

The substitute for S. 1123 provides that new wilderness areas shall be created by act of Congress. This procedure follows the spirit and letter of the Constitution, which imposes upon Congress the responsibility "to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States." S. 1123, on the other hand, takes an end run around the Constitution in favor of all but unfettered Executive discretion. It does this by providing that the President shall submit wilderness creation proposals to Congress which shall take effect unless both the Senate and the House pass an opposing resolution.

S. 1123 CREATES A UNICAMERAL CONGRESS BASED ON POPULATION

This novel unconstitutional legislation in reverse creates a unicameral Congress based upon population to decide wilderness matters. Our Federal constitutional structure, which gives each State two Senators, would be effectively negated since the Senate is powerless by itself to check Executive wilderness proposals. This could only be done if a majority of the House membership, which is chosen on a population basis, also concurs.

The correct and constitutional procedure is for the President to propose public land legislation, which only becomes law if both Houses of Congress give majority approval.

S. 1123, A SLAP AT THE HOUSE AND SENATE INTERIOR COMMITTEES

It is obvious that the framers of S. 1123 not only intended to bypass the Senate itself, but that they had no confidence in the members of the House and Senate Interior Committees. The bill strips both of the committees and Congress itself of any meaningful role in creating wilderness areas. The executive branch would create wilderness areas under S. 1123. A majority of both the Houses would be given merely a negative role to block such creation, with the Interior Committees sitting on the sidelines. The bill is thus a slap at and a vote of no confidence in the two great Interior Committees. It says that they are not to be trusted, and that only the mighty Executive is reliable.

Surely wilderness areas should enjoy the same stature as national parks, which are created by act of Congress.

THE SUBSTITUTE, A TEST FOR CONSERVATIONISTS

The O'Mahoney-Allott substitute bill is a test of the conservation lobbyists. If they believe in the Constitution of the United States and have faith in Congress and faith in the Senate and House Interior Committees, they will get behind the substitute which will at long last give congressional approval to a wilderness program.

I know of no State which is more conservation minded than is Utah. In our semiarid mountain fastness we must be. More than 80 percent of our water supply originates upon our national forests. We think and breathe water and soil conservation. We are not avaricious despoilers of the public domain intent upon destroying our great natural resources. Our very survival depends upon them.

We Utahans love our vast wilderness areas even though they do not enjoy any statutory designation; God created them and most of them will always be wilderness. It seems very likely indeed to me that the 241,000-acre high Uinta primitive area in Utah would be designated as a wilderness area under the substitute bill procedure. Certainly its status would not be changed by the substitute bill.

The great fear of most Utahans is that S. 1123 would give executive branch bureaucratic zealots with a wilderness monomania the unfettered power to invade and lock up forever vast stretches of our public domain. We prefer, therefore, that their Senators and Representatives should be permitted to play their constitutional role and given their traditional opportunity to see that this does not happen. That is the genius of our form of government.

I sincerely hope that the conservation groups will, in the interest of wilderness preservation, actively support the reasoned, sensible, and constitutional substitute bill.

I ask unanimous consent that a more detailed statement of my objections to S. 1123, some now modified, which I presented to members of the Senate Interior Committee, February 15, 1960, appear at the conclusion of my remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

SUGGESTED AMENDMENTS TO THE WILDERNESS BILL, S. 1123

(Statement by Senator WALLACE F. BENNETT, Republican of Utah, presented to the Senate Interior Committee, February 15, 1960, on committee print No. 3 of S. 1123, the wilderness bill)

We already have 57 million acres of wilderness.

Since I understand the full Interior Committee is meeting Tuesday to consider and perhaps take final action on the wilderness bill, I am taking the liberty of submitting this memorandum to each member of the committee for its consideration. I do this because the bill has such far-reaching implications for the future of the State of Utah and for the entire Western United States. There have been few measures before Congress in recent years which have so excited the apprehension of the people of my State.

As the committee well knows, there are millions of acres of land, particularly in the West, which are being preserved as wilderness areas or nearly so within the definition of S. 1123. There follows a brief tabulation of some of these lands under major headings showing which agency administers them:

	Total, 49 States [1]	Alaska	Grand total	Utah
U.S. Forest Service:				
Wilderness areas	3,969,000	----------	3,969,000	----------
Primitive areas	8,196,000	----------	8,196,000	240,717
Game refuges	1,377,000	----------	1,377,000	----------
Wild areas	942,000	----------	942,000	----------
Roadless areas	814,000	----------	814,000	----------
National Park Service:				
National parks	11,004,000	1,939,000	12,943,000	164,468
Monuments	4,003,000	4,972,000	8,975,000	123,659
Other areas	2,298,000	----------	2,298,000	----------
U.S. wildlife and game refuges	9,246,000	7,934,000	17,180,000	80,000
Grand total	41,849,000	14,845,000	56,694,000	608,844

[1] Excluding Alaska, which is listed separately to avoid distortion resulting from Alaska's extensive game refuges.

As you can see, there is a total of nearly 57 million acres in the United States devoted to wilderness or near-wilderness use. This is an area of greater size than any of 40 of our States. The total area exceeds the size of the entire State of Utah by 4 million acres. While U.S. Fish and Wildlife game and wildlife refuges do not partake of some of the aspects of the wilderness definition in S. 1123, a significant portion does. Any amount that does not would probably be offset by that proportion of the 5,406,000 acres of State parks having a wilderness nature.

The conclusion is obvious; we already have a major wilderness program of considerable dimension. The overwhelming portion of the 17.3 million-acre national park system is already of a wilderness nature and can be maintained as such under existing law. Fully 15.3 million acres of our national forests are set aside as wilderness areas and can also be maintained as such under existing laws, probably even better than under S. 1123. I have been a consistent supporter of our Forest Service and Park Service wilderness programs and I do not propose weakening them now.

The real question, then, is not whether we shall have wilderness, but rather how much wilderness shall we have, and where will it be, and who will create it?

PROPOSED AMENDMENTS TO THE WILDERNESS BILL, S. 1123

Give Congress a role in wilderness creation

If the committee members should determine that we must have yet other statutes to create still more wilderness areas, I would like to propose several changes in S. 1123. First of all, the procedure set up by the bill to create new wilderness areas or to effect additions, modifications and eliminations of such areas is completely wrong and grossly unfair in my opinion. Section 2(e) governing such changes states that they shall take effect "upon expiration of the first full and continuous session of Congress * * * but only if during this period there has not been passed by Congress a concurrent resolution opposing such proposed addition, modification or elimination." This is legislation in reverse; it places almost the entire initiative and control over the wilderness program in the executive branch of Government.

Thus Congress, under S. 1123, would continue toward abdication of its constitutionally imposed responsibility "to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States" as stated in article IV, section 2, clause 2 of the Constitution of the United States. S. 1123 is a further step toward giving the President unfettered discretion over the public lands which should be regulated by Congress.

Under the bill's procedure, the President need not show even that creation of a proposed wilderness area is desirable or that it is the best use for the land in question. All he has to do is refer the proposal to Congress and it is automatically approved unless a concurrent resolution (veto proof) is passed. Thus, the burden falls completely upon opponents of a proposed wilderness area to persuade a majority of two committees of Congress, a majority of the House Rules Committee, and a majority of both Houses of Congress that the proposal is bad and injurious. Moreover, any prospective opponents must bear the full risk of any delay by Congress be it procedural, circumstantial, or vindictive. This is an alarming procedure to the people of the West where nearly all of the remaining cheap public lands wilderness sites lie. It is alarming to those whose livelihood and future depend upon our public lands whether it be for water, for soil conservation, for flood control, for fire prevention, for disease control, or for grazing, mining, timbering, and other commercial uses. Why should the burden be upon these people whose future and livelihood are at stake? The burden should be placed squarely upon those who feel that wilderness is the highest use.

The extremely unfair procedure required by S. 1123 is made unconscionable by negating the role of the Senate in creating wilderness areas and thus striking a blow at the Federal system so wisely created by our Founding Fathers. The effect of requiring a concurrent resolution by both Houses of Congress to block creation of a new wilderness area is really to temporarily create a unicameral Congress based upon population. Thus, we in the West can be effectively preserved for the East with no real voice for ourselves because the Senate through S. 1123 first abdicates control over our public lands to nonelected Department heads and then abdicates its legislative control to the House. If the people of the West can't look to western Senators to protect their future, where can they look? Little purpose is served by the constitutional provision giving States equal representation in the Senate if the Senators forfeit their role.

There is a basic incongruity between the rash of recent public utterances by some Senators claiming that we are not developing our natural resources in the West as we should, and that many of these same Senators support S. 1123 which would give nonwesterners the all but unchecked power to lock up vast regions of our western resources.

Therefore, I propose that all new wilderness areas be created by act of Congress just as are national parks. They are certainly entitled to the same dignity and prestige as national parks. Similarly, wilderness area additions, modifications, and eliminations should also follow the traditional legislative route, an act of Congress.

Existing Forest Service wilderness areas

Existing wild, wilderness, primitive, and canoe areas set aside by the Forest Service should continue to remain under the jurisdiction of the Department of Agriculture. However, if they are to be designated "wilderness areas" under S. 1123, it should only be done by act of Congress not only for the same reasons I have enumerated above, but also because many of them were created haphazardly. Therefore, I would urge that section 2(a) be materially amended to eliminate the bill's provisions which forfeit control to the executive branch. It is well to recall that all of these areas were created by Executive order; Congress has not had an opportunity to determine whether or not they are best used for wilderness purposes. While it seems likely that all or nearly all of them would qualify, nonetheless, Congress should have an opportunity to play its constitutional role in connection with our public domain.

Such a review of primitive areas is particularly needed

The provision in section 2(a) calling for such a review by the Secretary of Agriculture of primitive areas before they are designated as wilderness areas is desirable. Neither the Secretary nor Congress has ever made an affirmative determination that they are predominantly of wilderness value. This is true for the 241,000 acre High Uintas Primitive Area. As you know, primitive areas predate the establishment of wilderness and wild areas and have not been examined as to wilderness standards as have wilderness and wild areas. If the review shows that the primitive areas qualify for wilderness designation, section 2(a) should again be amended to provide that this be done by act of Congress. In the same vein, the section should be amended so that the President would not have authority to add to primitive areas except by act of Congress.

Water and soil conservation are orphaned by S. 1123

Of all of our resources, water and soil are by far the most important. Water is the great final limiting factor upon human development. Yet S. 1123 treats water and soil conservation as orphans to be barely tolerated and only under exceptional conditions. The provisions in section 1(d) and 3(c) dealing with water conservation are grossly inadequate and give little assurance that any water developments will be allowed. The procedure is far too cumbersome and

inflexible with only the President empowered to act. The likelihood of any such action is rendered doubtful by the past record of the conservation lobbyists which clearly indicates that they would do everything in their power to block any water conservation programs once a wilderness area was established. With more than 80 percent of our water supply in Utah arising from our national forests, we cannot rely on such a nebulous and cumbersome procedure.

We cannot fill our reservoirs with wilderness, nor can we assure that our reservoirs will not be filled with silt by wilderness. Wilderness may be good for the soul, but we cannot eat it. In a semiarid State such as Utah, water must be our paramount resource and must have priority over all other resources. Happily, we can have wilderness areas as part of our multiple-use system for public lands, but we cannot afford to give them priority over water and soil conservation measures.

Therefore, I strongly urge the committee to adopt a positive amendment to S. 1123 to affirmatively provide that water conservation works, reservoirs, and related programs shall be permitted in accordance with applicable State and Federal law. It should affirmatively provide for water conservation and its delivery to points where it is to be used including road construction and maintenance essential to water development. It should affirmatively provide that rights-of-way for pipelines and power transmission lines and other utilities shall be approved in any case where the failure to grant them would unreasonably increase the cost of providing for transmission of water, power, or fuels.

The need for affirmative rather than negative provisions for water conservation is amply illustrated by the difficulty in carrying out such work on existing wilderness areas. As the Utah Water Users Association has stated: "It has been our experience that the wilderness areas that we have within our State now not only tend to block but do block all water development and conservation within these areas."

National parks and wilderness

The Department of Interior already has more than ample authority to create wilderness areas within our national parks and monuments. Such areas exist in rich profusion. There is even some fear that the existing high standards governing our national parks and monuments might be diluted. Therefore, I urge you to completely delete section 2(b) from the bill.

There is another aspect too, to the parks provision which I gather from the hearing record has not been examined by the committee. That is, what effect does the bill have on the organic acts creating each national park? What effect does it have on reservations in Executive orders setting aside national monuments and other areas? I presume that no Senator would wish to support S. 1123 unless he had the answers to these questions as they apply to such areas in his State. Section 3(a) gives no answer whatever.

In Utah, we have a classic illustration of the point which I am trying to make. When the Dinosaur National Monument was expanded in 1938 from an 80-acre quarry area to include a vast canyon area of over 200,000 acres, it was done with the express provision in the Executive order that certain reclamation and power withdrawals would not be disturbed or future development barred. I, therefore, directed a letter to the Solicitor of the Department of Interior to determine what effect S. 1123 would have on those reservations and withdrawals. In his reply the Solicitor, Mr. George W. Abbott, informed me flatly that in his opinion the bill would nullify the Executive order language and prohibit power and reclamation development. The full text of the letter, dated August 28, 1959, follows:

"Hon. WALLACE F. BENNETT,
"*U.S. Senate,*
"*Washington, D.C.*

"DEAR SENATOR BENNETT: This is in response to your letter of July 27 in which you ask what effect S. 1123, 86th Congress, a bill to establish a National Wilderness Preservation System for the permanent good of the whole people, and for other purposes, might have upon the power and reclamation withdrawals as reserved under the 1937 Executive order expanding the Dinosaur National Monument.

"S. 1123, in effect, would provide for the reservation of suitable Federal lands for their management as wilderness areas, 'retaining their primeval environment and * * * serve the public purposes of recreational, scenic, scientific, educational, conservation, and historical use and enjoyment by the people in such manner as will leave them unimpaired for future use and enjoyment as wilderness' (sec. 1(a)).

"In my opinion, S. 1123 must be interpreted as intended to prohibit generally any development for power or reclamation purposes on lands or waters included within the Wilderness System inconsistent with retaining their primeval environment or impairing their use and enjoyment as wilderness. Section 3(c) of the bill would, however, authorize the President to provide for the establishment of reservoirs and water-conservation works in specific areas in national forests in the Wilderness System, but there is no such provision for water development within national parks or monuments.

"Accordingly, despite the fact that existing power and reclamation withdrawals affecting the Dinosaur National Monument might remain intact even if S. 1123 became law, enactment of the bill would, in my opinion, prohibit power and reclamation development.

"Sincerely yours,
"GEORGE W. ABBOTT,
"*Solicitor.*"

While water development in Dinosaur may not be needed for decades, I as a Senator from Utah must consider the welfare of Utahans yet unborn and not just the casual esthetic enjoyment of a few wilderness lovers. We in Utah also love wilderness but we love life more and we shall have hundreds of thousands of acres of wilderness whether this bill is passed or not because the Creator made it so. I therefore take strong exception to S. 1123 which would bar water development in Dinosaur, and perhaps destroy Utah's right to 500,000 acre-feet annually under the Upper Colorado River Compact approved by Congress in 1948. In the words of the Salt Lake Tribune which has been a leading voice for sound conservation in an editorial for June 5, 1959:

"A special problem keeps most Utahans opposed to the wilderness bill. The wilderness backers are dedicated to preventing any water storage inside Dinosaur National Monument and this, if continued, will deprive Utah of its fair and guaranteed share of Yampa River water in the upper Colorado reclamation program. Solemn guarantees from the U.S. Government and its agents were made prior to and at the time the Dinosaur Monument was expanded up the Green and Yampa Rivers.

"The wilderness bloc is doing everything possible to seal up this source of precious water from Utah."

While it could be argued that an amendment to cover the special situation at Dinosaur such as the C. & O. Canal language might be the answer, the people of Utah have little reason to hope that it would be honored. It is the very people who most vocally support wilderness legislation who used high-powered lobbying to block the Echo Park Dam, refusing to honor the solemn promises made by the U.S. Government in the 1938 Executive order withdrawal. Therefore, I urge the committee for this reason and the others cited to completely eliminate section 2(b).

Eliminate reference to "wilderness system"

Let me congratulate the committee for deleting all reference in the bill to the creation of a "National Wilderness Preservation Council." Such a council would have been an administrative monstrosity peering over the shoulders of department heads, agitating constantly for a narrow, specialized, single use of our public domain, thus further sapping the waning strength of the multiple-use doctrine. As an extension of this wise step, I would recommend that all reference be stricken to a "National Wilderness Preservation System." The very phrase casts an administrative cloud over the jurisdiction of the departments which now have their own wilderness programs and would supposedly continue to do so under S. 1123.

Disease, insect infestation, and fire control

S. 1123 does not deal adequately with the problem of fire prevention or with disease and insect infestation measures within wilderness areas. It does not spell out to what extent these vital activities may be carried out. Section 3(c) should be affirmatively amended to provide that such prevention measures shall be carried out not only on national forests, but in all wilderness areas. If this is not done in our forest wilderness areas, ripe and rotting timber and vegetation will be a breeding ground for disease and insects and a ready target for forest fires. Moreover, section 3(b) specifically bars permanent roads in wilderness areas. In all probability fire prevention and insect control will require permanent roads of some type so the bill should be amended to allow such construction.

Wildlife management

Nowhere in the bill is any provision made for wildlife management in wilderness areas; this is a serious oversight. As the Utah Fish and Game Commission stated: "Big game herds not managed on a sustained yield basis soon deplete their habitat, even to the extent that the condition could become a threat to proper watershed and soil conservation. Proper management of big game herds calls for harvesting of the surplus crop." Some provisions of the bill seem to bar wildlife management completely as well as hunting and fishing.

The bill should be amended to permit wildlife management and harvest as a permissible use of wilderness areas. The general public should be permitted to participate in the harvest of big game.

Access to State lands and/or indemnity to States

S. 1123 makes no provision for access to State lands within wilderness areas nor does it provide for indemnification to the State for the lands thus isolated, sealed off and lost. If no provision is to be made for State access, then the State should certainly be given indemnification either through permission to make in lieu selections or other means of fair indemnification.

Transportation

Section 3(b) bars use of mechanical forms of transportation in wilderness areas. Such a flat prohibition is extremely unwise and such transportation should be permitted in cases of emergency such as cases of serious illness or a forest fire.

While section 3(c) makes an exception to the complete ban in the case of aircraft or motorboats where these practices have become well established in national forests,

no mention is made of such activities on nonforest land. Surely such activities are entitled to the same consideration. Again it should be affirmatively stated as "shall" be permitted rather than "may."

The bill should be affirmatively amended to clearly provide that nothing in the act shall be construed to prohibit the operation of aircraft over wilderness areas. We already have enough air-space problems without inviting further trouble.

Mining and prospecting

Section 3(c) provides that the President may within a specific area authorize prospecting and mining in wilderness areas upon his determination that such use will better serve the interests of the United States and the people thereof than will its denial. Once again the procedure is so circumscribed and cumbersome that favorable action on a request to prospect or mine is rendered most unlikely.

Let me emphasize that my concern is for future wilderness areas which will be created under S. 1123 if it becomes law. I am not proposing that we should mine in our national parks or monuments and I am not too concerned about the existing high Uintas primitive area in Utah since there is practically no mineralization there. What alarms me is that S. 1123 could tie up thousands and perhaps millions of acres in Utah and the West with a crippling procedure which would stunt the future growth of the West.

I think there is serious doubt whether we could have developed our uranium industry in Utah to meet a most serious national need if southeastern Utah which is wilderness for the most part had been hamstrung with all the limitations on prospecting and mining by S. 1123. Every effort to prospect or mine would have been vigorously resisted. The same holds true for the major oil developments in that area. Who knows what our future requirements may be. We can't afford to lock up our resources.

Therefore, I propose an amendment that the appropriate Secretary, rather than the President, "shall authorize prospecting, mining, the construction of roads, or other developments, upon his determination that such use in the specific area will produce a greater yield of products and services than will its denial." Such operations can be carried on under careful regulations in such a manner as to be generally compatible with wilderness.

Grazing

I have a similar concern for the future of grazing in Utah. S. 1123 is more generous to cattlemen and sheepmen than to most other users of our public lands. Once again, however, the language in section 2(d) and section 3(c) says that the Secretary "may" allow grazing where it has already become well established or where it is well established upon creation of the wilderness area. This should be amended to say "shall" be permitted. Of course, such use will be subject to appropriate regulations.

S. 1123 proposes that the regulations will consist of "such restrictions as the Secretary of Agriculture deems desirable" in the case of Forest Service wilderness areas, and "subject to regulations deemed desirable" by the officials of other departments whose lands might become a wilderness area under the bill. These sections should be amended to provide that grazing shall be subject to "similar regulations as are generally applicable to the administration of Forest Service land."

Even with these amendments, I am sure there will be great pressures to end even established grazing once a wilderness area is created.

"Commercial enterprise"—guides

Section 3(b) bars any form of commercial enterprise. The committee should give serious consideration to the plight of guides who take parties into wilderness areas. In my opinion they should not be barred from continuing their activity not merely because it would work a hardship on them, but because many inexperienced people need the assistance of guides to prevent possible harm or even disaster.

CONCLUSION

It is imperative that we recognize the hard facts of life that new wilderness areas will come from the West where we have nearly all of our public lands. Moreover, it is the 11 Western States which have furnished nearly all of our existing wilderness areas. If some zealots had their way, the West would be enshrined, embalmed and forever preserved, untrammeled by man.

Of the 14 million acres designated by the Forest Service as wilderness-type areas, all but about 821,000 acres are in the 11 Western States. Of the 82 wilderness areas, fully 78 of them are in the Western States. Very nearly the same picture holds true for our national parks and monuments. As one wise man said, "This act is designed to provide wilderness for the progeny of people who were prodigal with their own."

With 70 percent of the land area of Utah belonging to the Federal Government and therefore eligible to become a wilderness under S. 1123, I must as a Senator from Utah take vigorous exception to many of the bill's provisions which pose a serious threat to the future well-being of my State and its people.

Since nearly all of the existing wilderness areas are now in the West and since nearly all of the proposed new wilderness areas will be carved out of the West, I appeal to the Senate Interior Committee, on which 16 of the 17 members are from the West, to protect the future of the West by adopting my amendments.

PUBLIC WORKS LEGISLATION VITAL TO CALIFORNIA

Mr. KUCHEL. Mr. President, on many occasions in the Senate and elsewhere, I have been glad to comment upon the great and very beneficial public works assistance by the Federal Government to the State of California. Again and again the people whom I have the honor, in part, to speak for in this Chamber have indicated their gratitude to the Government of the United States for what the Federal Government has constitutionally done for the people of the State of California, in reclamation, in flood control, in harbor improvement, and in similar endeavors.

In the southern part of the State where I live, I think it would be fair to say that the prodigious, almost unbelievable growth in population and in wealth, may, in very great part, be traced to the construction by the Federal Government of the great Hoover Dam, successfully fought through this Chamber a quarter of a century and more ago by one of my illustrious predecessors, Hiram W. Johnson. The water which comes as a supplementary supply from the Colorado River to the people of southern California through the Hoover Dam, and the hydroelectric power which is generated by it, have gone a long way in providing the basis upon which the people of southern California have been able successfully to proceed.

That is also true, however, in the far-flung area of California lying north of the Tehachapi Mountains. There it was that Congress and the executive branch together, in their wisdom, saw fit to establish a great multipurpose reclamation project, the Central Valley project, which has done an equally beneficial and constructive chore for those whom I represent, in part, in the two great valleys to the north. And the repayments, by the users, of both these vast undertakings are coming back to the Federal Treasury, on schedule, or ahead of schedule.

The State of California needs the continued assistance of the Federal Government in planning and carrying out public works projects to assure the most beneficial use of our natural resources, and to protect its people, and their property. The omnibus public works authorization bill now under consideration by the Senate Public Works Committee is of tremendous concern to California because the State is faced with a variety of problems calling for undertakings of the type this legislation would authorize.

The present Presiding Officer, the distinguished junior Senator from the neighboring State of Oregon [Mr. LUSK], is well aware, from his own background, of the extent and character of our State.

However, in many quarters I fear it is not widely realized that the terrain, climate, distances, location, and other features necessitate long-range and broad-scale planning and activity in the field of public works to assure a stable economy, safety against ravages of nature, and opportunity for growth and development.

There are a number of proposed projects which I desire to ask to be included in H.R. 7634. These are vital because of the continuing expansion of California's industry and agriculture, the needs of trade and commerce, and the amazing increase in population.

Before commenting briefly on these projects, I want to summarize in a few moments the reasons why California looks to the Federal Government for assistance in bringing them to realization.

The importance of Federal participation can best be appreciated when it is considered that California has an area of 158,693 square miles, the third greatest in our Nation, and a tidal shoreline of 1,190 miles, almost one-half the total extent of the Pacific coastline of the three Western States.

It is difficult to visualize this vast area, 800 miles long and at its extreme 375 miles wide. If one placed the State of California on the Atlantic seaboard he quickly would see its extent virtually embraced all of eight States—South Carolina, North Carolina, Virginia, Maryland, Delaware, New Jersey, Connecticut, and Rhode Island—and a substantial portion of three others—Pennsylvania, New York, and Massachusetts. This equivalent territory extends from near Savannah, Ga., on the south to just south of Boston, Mass., on the north.

California, with a climate ranging from arid to what is known as perhumid, has entirely within its borders 2 of our Nation's 70 major rivers 300 or more miles long, the Sacramento and the San Joaquin, as well as a number of other

shorter but substantial streams emptying into the Pacific Ocean. Because of meteorological factors and topography, devastating floods can inflict tremendous damage. Unfortunately, on a number of occasions they have done so.

The Pacific coast, unlike the Atlantic shore, is remarkably regular in outline, lacking islands and barrier reefs which afford protected waters or numerous indentations constituting natural harbors and shelter for shipping, fishing, and pleasure boating. Except for San Francisco Bay, virtually every coastal port is largely man-made and for maximum usefulness needs structures such as jetties and breakwaters, and because of their exposed locations require frequent dredging. Similarly, the beaches in many sections are particularly susceptible to erosion, and shoreside propetry is often jeopardized by tides and storms.

So, in reviewing the projects urged for inclusion in this legislation, I hope the committee and Senate will consider these factors of California's extent and peculiar natural features along with its mushrooming population and burgeoning economy. Against this background, I hope there may be added to the bill H.R. 7634, by way of amendment, three navigation projects—Noyo Harbor, Los Angeles Harbor, and Monterey Harbor; one beach erosion project—in Orange County; and four flood control projects—on the Sacramento River, the Merced River, the Mokelumne River, and Tachevah Creek.

Probably the most important of the flood control projects which the House of Representatives did not have an opportunity to consider and in which my State has a vital interest is on the Sacramento River. This would provide vital bank protection and requires modification of the existing authorization for what is now known as the Sacramento River old project.

The Corps of Engineers, in response to a resolution of the Senate Public Works Committee 5 years ago, has prepared a report recommending an early start on a 10-year program of lining sections of the bank to prevent erosion which is endangering the levees now in place. This work must be done to assure the dependability of levees now protecting over 1 million acres. The area, with a population of about 600,000, is one which has undergone some tragic floods, and the land and improvements are valued at about $2 billion.

Full local participation is assured. The State and local agencies concerned in this project are prepared to contribute a full one-third of the cost. This is in conformity with the principle advocated by President Eisenhower for adequate cost sharing. Beyond that, I may add, it is in complete conformity with the law and the custom by which the Federal Government, in days gone by, has made and now makes contributions to similar projects across the land.

California State agencies unreservedly endorse this project, and I understand that it has the approval of all Federal agencies consulted. I believe the work is of such urgency that Congress should authorize it, even though all formal reports may not have been received yet, because no time should be lost in giving assurance the needed protection will be forthcoming.

In essence, this project would be a sound investment in insurance of works for which the Federal Government is in large part responsible. The Army Engineers have noted that during every large flood weak spots occur in the levee system because of erosion. What this can mean is indicated by the record of the 1955 Sacramento River flood, which took 40 lives and caused damage estimated at $48,200,000. Almost annually some emergency work is required to reinforce levees during periods of high water, the cost running to about $300,000 per year.

The proposed modification would set in motion a program calling for aggregate Federal appropriations of approximately $14 million. According to the Engineers' report, there would be an unusually high benefit-cost ratio of 1.74 to 1.

Two of the other flood control projects I commend follow the unique pattern established by the State of California and Congress in assuring the construction of Oroville Dam on the Feather River. Amendments proposed to the bill would make possible Federal assistance in the form of cash contributions towards dams on the Merced River contemplated by the Merced Irrigation District, and on the Mokelumne River by the East Bay Municipality Utility District. In each instance the Federal participation would be determined by a finding of the value of the works for flood control and a high degree of local participation will be involved.

The other flood control project is one which already has been approved by the Senate. In the 85th Congress, in 1958, the committee reported, and the Senate passed, S. 4179, of which I was cosponsor, authorizing protective works on Tachevah Creek, in the vicinity of Palm Springs. Local interests have demonstrated their readiness to participate.

Two of the navigation improvements, at Noyo and Monterey, are urgent for the accommodation of fishing vessels, and are desirable as shelters and bases for pleasure craft; while the third, at Los Angeles, is imperative in the light of requirements of ocean trade.

A mooring basin and channel are recommended at Noyo, at a Federal cost of $370,000. This will reduce congestion and increase safety at the only port along a stretch of about 180 miles of the rugged northern California coast. With better facilities, it is likely this harbor would be used by lumber vessels, thus aiding an important industry. The nearest adequate harbors are 90 miles in each direction, and Noyo is the third largest fishing port in northern California.

Extension of the breakwater at Monterey, a natural open roadstead, down the coast from San Francisco, and costing approximately $6 million, long has been contemplated. A project was authorized back in 1945, but funds never were appropriated. Now plans for other developments in the area make this improvement even more desirable than before. The present protected area is inadequate for all craft using the harbor, and gives no protection against northerly storms. The project would provide an enclosed harbor, and would eliminate the need for maintenance dredging.

The continuing need for additional facilities at Los Angeles Harbor now makes desirable the dredging of the West Basin. To provide new terminals and transit sheds for the ever-increasing demands of ocean commerce, this portion of the harbor should be improved, so that large ships will have a safe channel. The city of Los Angeles has prepared definite development plans; and a drawbridge which created a bottleneck has been removed. The remaining step to be taken involves clearing away hazardous shoals and providing sufficient depth for ocean-going ships. This improvement also is related to national defense, and is desired by the U.S. Navy.

The final project in California which I hope may be added to the pending bill involves beach erosion, which is a serious problem in my home county of Orange. A glance at any map will indicate how the exposed southern California shoreline is especially suspectible to pounding by the sea, with resultant damage to property of all sorts. In areas where the land is relatively low, ground swells and high tides built up over long reaches of the open Pacific and along-shore currents set up by various forces eat into the beaches. The problem is acute in an area where the State of California has established a public seaside park, and 25 miles of shore require protection and restoration.

I trust that the committee and the Senate will concur in the desirability of these several additional projects. I respectfully urge authorization of the Federal contributions toward the Merced River and Mokelumne River developments, as proposed, respectively, in Senate bill 309 and Senate bill 2766, and also toward the other projects, in accordance with recommendations of the Chief of Engineers.

Mr. President, in Statuary Hall are the forms and figures of two most illustrious Californians. One of them is a likeness of the great Franciscan friar, Junipero Serra, who spread the Christian gospel in that area before America was born. The other is of Thomas Starr King, a Unitarian preacher who is credited with saving California for the Union in the dark days when civil strife divided this country in a bloody war.

One of the dear recollections I have of my late father is of a book he gave to me. The book contains a speech which Thomas Starr King made 100 years ago, to the people of California. Outlined in that speech is his vision of how, within the next century, tens of thousands or hundreds of thousands, and perhaps millions, of people would come into that great Western area and would build a tremendous commonwealth. But the vision which Thomas Starr King had, great though it was, fell short of the mark, because today more than 16 million Americans are living in the State which I have the honor to represent; and, Mr. Presi-

dent, in your lifetime and in mine, millions more will come to California and will live there for the remainder of their lives.

What has been accomplished could not have been accomplished had it not been for the wisdom and the help which the Government of the United States has given over the years to people of California.

I hope, and, if I may so, I believe, that the same helping hand, under the unique system of government under which we live, will continue to be extended by the Government of the United States to the people and the government of California.

VISIT TO CONGRESS OF PRESIDENT DE GAULLE OF THE REPUBLIC OF FRANCE

Mr. MANSFIELD. Mr. President, today is a historic day in the history of the Congress of the United States and, in my opinion, in the history of the United States of America. We were honored and privileged to have as our guest the President of the Fifth French Republic. That man, of course, is Gen. Charles de Gaulle. And if one could describe this outstanding individual in one word, that word would be "France."

France has meant a great deal in our history, and as those of us who have studied the revolutionary era will recall, had it not been for France, there might today be no United States of America.

I wonder how many of us remember that there were more French troops at Yorktown than there were American Continentals; that behind the ragged Army at Yorktown was the French fleet under Admiral de Grasse; that behind the French fleet was the French treasury. So when the Vice President of the United States, Mr. NIXON, made the statement, as he did a few days ago, that perhaps without France there might not have been a United States of America, we have to recognize there is a great deal of merit to that assertion.

Perhaps without De Gaulle there might not be the kind of France today which could hold its head up not only among its allies in the Western World, but among the nations of the world. Certainly, without De Gaulle, it could be a different kind of France.

This man who represents his country so well made a magnificent speech in the Hall of the House of Representatives today. It was not a long speech, but there was a great deal in it which should give us pause for thought. He came to us as a friend and a comrade. We greeted him as a friend and a comrade. We did not honor De Gaulle today. Rather, it was the reverse, because in his journey to this country he gave many of us who had known him from afar, and had known him on that basis for years, an opportunity to pay to him our respects and to thank him for the many contributions he has made not only in the revival of France as a nation, but for the many contributions he has made to Western civilization as a whole.

There have never been any real disappointments between France and the United States. There may be differences, as between lifelong friends, but in the years of our independence those differences have proven to be of a minor nature, and it was without any great degree of difficulty that they were overcome. The Senate extends to the people of France, through their illustrious head of state, its respect, admiration, and affection.

Mr. KUCHEL. Mr. President, will the Senator yield?

Mr. MANSFIELD. I am delighted to yield to the Senator from California.

Mr. KUCHEL. I am quite honored to join the able acting majority leader in the excellent sentiments which he has just expressed. With rapt attention, the Members of the Congress and those in the galleries, and I am sure those millions of Americans who listened all across the country, followed the splendid, inspiring, courageous utterance of the great free leader of a great free people, whom we call our dear friends.

I think it is fair to say, Mr. President, that there is no greater love for any foreign people than that which the heart of America contains for our gallant friends, the French; and to see today, in person, a leader who has been an indomitable leader in behalf of his country in war, and now in peace, was a moving experience for all. To listen to his sturdy words of amity and of friendship for the American people; and, beyond that, of his and his people's steadfast devotion to the cause of man's freedom, was inspiring to all of us.

I wish to congratulate a distinguished member of the Senate Foreign Relations Committee, my good friend from Montana, when he indicates, for the Senate, the sentiment by which the Congress, and, I think it is fair to add, our Nation, have followed the words of the President of the Republic of France, Charles de Gaulle.

Mr. MANSFIELD. I thank the Senator.

ENROLLED JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on today, April 25, 1960, he presented to the President of the United States the enrolled joint resolution (S.J. Res. 150) permitting the Secretary of the Interior to continue to deliver water to lands in the third division, Riverton Federal reclamation project, Wyoming.

ADJOURNMENT TO WEDNESDAY

Mr. MANSFIELD. Mr. President, under the order previously agreed to, I move that the Senate adjourn until 12 o'clock on Wednesday next.

The motion was agreed to; and (at 4 o'clock and 16 minutes p.m.) the Senate adjourned, under the order previously entered, until Wednesday, April 27, 1960, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate April 25, 1960:

MUNICIPAL COURT FOR THE DISTRICT OF COLUMBIA

Randolph C. Richardson, of the District of Columbia, to be associate judge of the municipal court for the District of Columbia for the term of 10 years, vice George D. Neilson, term expired.

CIVIL AERONAUTICS BOARD

John S. Bragdon, of the District of Columbia, to be a member of the Civil Aeronautics Board for the remainder of the term expiring December 31, 1960, vice James Durfee.

COLLECTOR OF CUSTOMS

Frank D. Yturria, of Brownsville, Tex., to be collector of customs, with headquarters at Laredo, Tex. (Reappointment.)

MISSISSIPPI RIVER COMMISSION

Maj. Gen. Thomas A. Lane, Corps of Engineers, to be a member and president of the Mississippi River Commission, under the provisions of section 2 of an act of Congress approved 28 June 1879 (21 Stat. 37) (33 U.S.C. 642), vice Maj. Gen. William A. Carter, to be reassigned.

IN THE AIR FORCE

The following-named officers for promotion in the Regular Air Force under the appropriate provisions of chapter 835, title 10, U.S. Code, as amended. All officers are subject to physical examination required by law.

SECOND LIEUTENANT TO FIRST LIEUTENANT

James O. Mahon, Apalachicola, Fla., in place of Hal Hoffman, retired.

Gordon R. Johnson, Arcadia, Fla., in place of F. F. Rhode, retired.

John B. Dixon, Center Hill, Fla., in place of N. V. Hall, retired.

Ada L. Hanks, Shalimar, Fla., in place of D. F. Fager, retired.

INDIANA

Walter E. Zabel, Lanesville, Ind., in place of J. L. Green, retired.

Robert R. Overton, Monon, Ind., in place of W. S. Buss, retired.

IOWA

Richard D. Hulse, Van Meter, Iowa, in place of L. B. Miller, retired.

KANSAS

Albert C. Hoffman, Russell, Kans., in place of R. K. Artas, retired.

Donald J. Wagner, Victoria, Kans., in place of P. J. Romme, resigned.

KENTUCKY

Harold W. Griggs, Calvert City, Ky., in place of E. E. Dees, retired.

LOUISIANA

Myrtie B. Jett, Athens, La., in place of G. L. Harris, retired.

Ruth F. Cuevas, Belle Chasse, La., office established October 18, 1958.

Louis H. Turner, III, Watson, La., in place of E. J. Whitaker, removed.

MAINE

Richard F. Doble, Milo, Maine, in place of B. M. Clark, deceased.

MARYLAND

Paul C. Stockslager, Funkstown, Md., in place of R. E. Howard, removed.

MASSACHUSETTS

Clifton H. Morton, North Amherst, Mass., in place of D. G. Dowd, retired.

MICHIGAN

Jake Dyk. Hudsonville, Mich., in place of E. E. Hubbard, retired.

Abe Newmyer, New Era, Mich., in place of C. M. Russell, retired.

Donald E. Green, Orchard Lake, Mich., in place of M. L. Hawks, transferred.

Richard W. Emmons, Sand Creek, Mich., in place of B. B. Morses, retired.

Lawrence A. Frith, Vermontville, Mich., in place of R. K. Kilpatrick, transferred.

Irene M. Robinson, Weston, Mich., in place of H. A. Keenan, retired.

MINNESOTA

Luther L. Quist, Barrett, Minn., in place of O. A. Jacobson, transferred.

H. Burdette Bryant, Mendota, Minn., in place of C. T. Newhouse, retired.

MISSISSIPPI

Arthur Y. Banks, Columbus, Miss., in place of J. B. Gardner, retired.

Edward N. Gurley, Dorsey, Miss., in place of N. A. Riley, removed.

Willa J. Floyd, Potts Camp, Miss., in place of F. V. Peel, retired.

MISSOURI

Glenn S. Bliss, Warrensburg, Mo., in place of H. M. Cash, retired.

MONTANA

Alfred H. Wilkinson, Butte, Mont., in place of J. E. Parker, retired.

NEBRASKA

LaVerne B. Glaze, McCook, Nebr., in place of H. G. Lofton, transferred.

NEW YORK

Charles R. Porteous, Hillsdale, N.Y., in place of M. A. Wilber, removed.

Marguerite J. Fadale, Lily Dale, N.Y., in place of A. A. Myers, retired.

Robert J. Whelan, Malverne, N.Y., in place of K. R. Brewer, retired.

Robert A. Wolcott, Owego, N.Y., in place of A. B. Stiles, retired.

Robert E. Reavis, Piermont, N.Y., in place of L. L. Hunt, resigned.

Gerald C. Allen, Whitney Point, N.Y., in place of M. C. Wilcox, deceased.

NORTH CAROLINA

Mary S. Rittenbury, Leasburg, N.C., in place of M. L. Pulliam, retired.

Carl C. Denton, Morganton, N.C., in place of J. C. Garrison, retired.

J. Alton Leonard, Toast, N.C., in place of P. Y. Snow, retired.

NORTH DAKOTA

Alton M. Bjelverud, Galesburg, N. Dak., in place of O. O. Moe, retired.

OHIO

Hester H. Holman, Brilliant, Ohio, in place of R. B. Craven, removed.

Gene V. Okey, Chandlersville, Ohio, in place of Z. M. Wolfe, resigned.

Paul E. Hess, Ludlow Falls, Ohio, in place of J. R. Gallagher, deceased.

OKLAHOMA

Donald L. Dahl, Sr., Apache, Okla., in place of M. G. Kizer, retired.

Daniel M. Reiter, Sentinel, Okla., in place of E. J. Winingham, deceased.

Merrylou Pummel, Sharon, Okla., in place of L. D. Mead, transferred.

PENNSYLVANIA

Ross B. McIlwain, Apollo, Pa., in place of N. B. Fiscus, retired.

Samuel S. Detwiler, Kimberton, Pa., in place of R. S. Davis, retired.

Oswald E. Lombardi, Lake Ariel, Pa., in place of E. A. Deming, retired.

Gertrude H. Althouse, Sadsburyville, Pa., in place of E. K. Dowlin, retired.

Robert H. Voelker, Shavertown, Pa., in place of I. C. Davis, retired.

Donald J. Rowlands, Slatington, Pa., in place of I. K. Davis, retired.

Raymond C. Burkhart, Terre Hill, Pa., in place of B. E. Weaver, retired.

Dorothy G. Sacks, Woxall, Pa., in place of W. L. Sacks, resigned.

SOUTH CAROLINA

Jones R. Copeland, Campobello, S.C., in place of R. P. Barnett, retired.

SOUTH DAKOTA

Robert E. Weber, Emery, S. Dak., in place of C. J. Curtin, retired.

Violet D. Lindell, La Bolt, S. Dak., in place of Sigward Johnson, retired.

Orville W. Resel, St. Lawrence, S. Dak., in place of Fae Thompson, retired.

Walter A. Farl, Watertown, S. Dak., in place of E. E. Haraden, retired.

TENNESSEE

Melvin L. Kilgore, Richard City, Tenn., in place of J. B. Hackworth, removed.

TEXAS

Dorsey G. Robinson, Jr., Big Sandy, Tex., in place of L. C. Galbraith, retired.

O. L. Harlan, Gause, Tex., in place of J. M. Thomas, retired.

Charter F. Tarkington, Graham, Tex., in place of W. E. Simpson, removed.

Robert I. Thompson, South Houston, Tex., in place of P. T. Hoovestol, deceased.

VERMONT

Wayne E. Williams, Jacksonville, Vt., in place of E. M. Reed, retired.

VIRGIN ISLANDS

Leon A. Mawson, Charlotte Amalie, V.I., in place of Alvaro de Lugo, deceased.

VIRGINIA

Reuben N. Falls, Pembroke, Va., in place of P. M. Johnson, resigned.

WASHINGTON

Grant A. Downer, Custer, Wash., in place of H. M. Behme, transferred.

WEST VIRGINIA

Earl J. Delaney, Parsons, W.Va., in place of Myrtle Blackman, retired.

WISCONSIN

Edgar F. Antoine, Belgium, Wis., in place of Fred Krier, retired.

A. Lyman Arnquist, Glenwood City, Wis., in place of H. E. Lauber, resigned.

Warren D. Heidenreiter, Sheboygan Falls, Wis., in place of R. N. Bowser, failed to return from military duty.

Warren W. Hoyer, Spring Green, Wis., in place of H. H. Lins, retired.

WITHDRAWALS

Executive nominations withdrawn from the Senate April 25, 1960:

POSTMASTERS

Myrtle H. Davis, to be postmaster at Mexican Hat, Utah, which was sent to the Senate on January 11, 1960.

Byron B. Borgman, to be postmaster at Conklin, Mich., which was sent to the Senate on January 11, 1960.

Paul W. Haller, to be postmaster at Moorestown, N.J., which was sent to the Senate on January 11, 1960.

Ramon Alvarez, to be postmaster at Fajardo, P.R., which was sent to the Senate on March 21, 1960.

HOUSE OF REPRESENTATIVES

MONDAY, APRIL 25, 1960

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D.D., offered the following prayer:

Ephesians 4: 3: *Endeavor to keep the unity of the spirit in the bond of peace.*

O Thou God of might and mercy, may the memory of Thy goodness daily come to the aid of our adventures of faith as we strive to build a social order in which all mankind shall obey Thy law of love and walk in the ways of brotherhood.

Teach us how to coordinate rights with responsibilities and freedom with discipline and may our lives rise to a new perspective and be lifted to higher levels and always be inspired to think and act as did the lowly Man of Galilee.

We pray that the bonds of unity and friendship with our allies, which sometimes are strained and go awry, may be more firmly strengthened.

May our diplomats, our ambassadors, our Speaker, and all the Members of Congress be given wisdom and understanding in the great spiritual struggle to establish peace on earth and good will among men.

Grant that during these strategic days our President and the President of France may carry into their deliberations and decisions the mind and spirit of our blessed Lord.

May they be equal to their momentous international responsibilities and opportunities of helping all humanity become a people of kindred sympathies and common aspirations.

Hear us in the name of the Prince of Peace. Amen.

THE JOURNAL

The Journal of the proceedings of Thursday, April 21, 1960, was read and approved.

RECESS

The SPEAKER. The House will stand in recess subject to the call of the Chair.

Accordingly (at 12 o'clock and 4 minutes p.m.), the House stood in recess subject to the call of the Chair.

JOINT MEETING OF THE TWO HOUSES OF CONGRESS TO HEAR AN ADDRESS BY HIS EXCELLENCY CHARLES DE GAULLE, PRESIDENT OF THE REPUBLIC OF FRANCE

The SPEAKER of the House of Representatives presided.

At 12 o'clock and 20 minutes p.m. the Doorkeeper announced the Vice President of the United States and Members of the U.S. Senate, who entered the Hall of the House of Representatives, the Vice President taking the chair at the right of the Speaker, and the Members of the Senate the seats reserved for them.

The SPEAKER. On the part of the House the Chair appoints as members of the committee to escort His Excellency the President of France into the Chamber the gentleman from Massachusetts, Mr. MCCORMACK; the gentleman from Indiana, Mr. HALLECK; the gentleman from Georgia, Mr. VINSON; and the gentleman from Illinois, Mr. ARENDS.

The VICE PRESIDENT. On the part of the Senate the Chair appoints as members of the committee of escort the Senator from Arkansas, Mr. FULBRIGHT; the Senator from Rhode Island, Mr. GREEN; the Senator from Illinois, Mr. DIRKSEN; the Senator from California, Mr. KUCHEL; and the Senator from Wisconsin, Mr. WILEY.

The Doorkeeper announced the following guests who entered the Hall of the House of Representatives and took the seats reserved for them:

The Ambassadors, Ministers, and Chargés d'Affaires of foreign governments.

The members of the President's Cabinet.

At 12 o'clock and 30 minutes p.m. the Doorkeeper announced His Excellency the President of France.

His Excellency the President of France, escorted by the committee of Senators and Representatives, entered the Hall of the House of Representatives and stood at the Clerk's desk. [Applause, the Members rising.]

The SPEAKER. Members of the Congress, this for us, the representatives of the people of the United States of America, is a proud and historic occasion. We welcome into this Chamber today the representative of a great, a proud, and a free people, and a people who will remain free as long as they have the leadership of this great man. [Applause.]

Consequently, I deem it a proud privilege and distinguished honor to be able to present to you the President of the Republic of France. [Applause, the Members rising.]

ADDRESS BY HIS EXCELLENCY CHARLES DE GAULLE, PRESIDENT OF THE FRENCH REPUBLIC

(President De Gaulle addressed the joint meeting in French. The English translation of his address follows:)

President DE GAULLE. Mr. Speaker, the eloquent words you have just spoken, and for which I want to thank you, were inspired by the reason and sentiment which have at all times distinguished the relations between our two countries. Since the appearance of the United States on the world scene, we have fought side by side on three occasions and for three great causes. First, it was for your independence. [Applause.] Later on it was for the independence of others. Finally, it was for the independence of France herself. Our common past is filled with efforts and sacrifices. It is great because at all times we have served together for freedom. It is dear to us, so much so that in spite of vicissitudes the friendship between Americans and Frenchmen, though two centuries old, is today more alive than ever. [Applause.]

Under any circumstances, I would have come with joy to see my illustrious friend

President Eisenhower, to bring to your Congress the very cordial saluations of the French Republic and to renew a direct contact with the American people.

I visited you in 1944, at a time when, under the leadership of Roosevelt, your decisive contribution to the war was to bring about the liberation of France and of Europe. I came back in 1945 on the morrow of the great victories won by the armies of the West, in Europe under the command of Dwight Eisenhower, in the Pacific under the orders of MacArthur, and while President Truman was striving to build a peace both firm and just.

But from that time on, the world was destined to remain beset by troubles and dangers. My present trip is taking place on the eve of an international meeting where the fate of mankind may be oriented either toward calamity or toward peace. This explains the great importance which I attach to the conversations I have just had with the President and members of the administration and also to my meeting with you distinguished Senators and Congressmen at the Capitol in Washington.

Indeed, I do not believe that the human race has ever been more threatened than it is today. Mechanism now dominates the earth. It has brought forth gigantic material progress. But at the same time, it has produced two apparently irreconcilable systems, each of which claims it possesses the only workable way to transform society.

Moreover, the convulsions of two world wars have aroused in peoples, who number 2 billion, the will to liberate themselves from all foreign subjection and the passionate desire to reach the stage of development of the most advanced countries. Finally, there is no end to the accumulation and the perfecting of the means of nuclear destruction capable of annihilating life over vast spaces and the vehicles which can carry them anywhere. Given these elements which are bound with one another, the equilibrium of the world is no more than a cold war, a war that engenders fear, incites invectives and engulfs resources, and all problems appear insoluble and envenomed.

But, if in material terms the balance between the two camps which divide the universe may seem equal, morally it is not. France made her choice. She has chosen to be on the side of the free peoples; she has chosen to be there with you. [Applause.] Certainly in this decision what counts for much is the memory of what our alliance has been, the help given us under the Marshall plan after the last war to restore our economy, the threat that the Soviet bloc raises for us and for you and finally the colossal effort you are making so that, should the occasion arise, aggression brings death to the aggressor even if it must at the same time cause the death of the defender. But what has led France to your side and holds her there are her national spirit which is a thousand years old, her tradition which made her a champion of freedom, her ideal which has for name the Rights of Man and her conviction that in the end, order in the world calls for democracy on the national plane and the right of self-government on the international plane. [Applause.] And these are the very things which are also the vision, the inspiration and the spirit of the American people.

Nonetheless while France has chosen to belong altogether to the gathering of the free peoples, she does not despair at all of seeing peace established in the world.

Since all things have to have a beginning, she believes that only a detente is now possible and necessary. But this detente, who else can achieve it, but the nations who have been the creators and who remain the bearers of modern civilization? This means all Europe and America, her daughter. To be sure, the fate of the universe has at other times depended on peoples of other regions. It may happen that, in the future, such might become the case again. But, today, the destiny of our human race depends upon the states of the Old and the New World.

Let them be agreed and no one will ignore them. If this cannot happen then every point on the land, the sea and the sky will undoubtedly contain a virulent cause of conflict. Besides, is it inconceivable that the evolution taking place within each of the two social orders now in existence in the modern nations may progressively reduce their differences and their oppositions?

Until these nations have reached a true modus vivendi in their relations, however, any demand that might be made for the conclusion of treaties, the definition of borders, and the modification of statutes in the most sensitive regions, would be unfortunate and untimely, because it would jeopardize the better relations which we aim to establish. On the other hand in the peaceable climate which could be created, objective solutions would little by little come into view.

Everybody understands that, in bringing up such subjects, I am referring in the first place to those which relate to Germany. It is not my intention to deal with them in detail here. But I want to say that any attempt to aggravate the wounds suffered by the German people must be avoided. I will even add that Federal Germany is rendering the greatest possible service to coexistence by incorporating itself as it does into Western Europe. Through the organization of a Western Europe ensemble, facing the bloc built by the Soviets, it will be possible to establish, from the Atlantic to the Urals, some equilibrium between those two zones which are comparable, both in populations and in resources. Alone such a balance may perhaps, one day, enable the old continent to bring a reconciliation between its two parts, to find peace within itself, to give a fresh start to its civilization and lastly to have the possibility, together with America, to help, in an atmosphere of serenity, the development of the unfavored masses of Asia and of the awakening populations of Africa.

Indeed, such aid, offered to the countries that lack everything, is, for those who do not lack anything, both the greatest human duty and the most fruitful policy. How much less the chances of war if the great modern states should choose as a common aim such an undertaking? What a sigh of relief would pass across the globe if, in this field, above their rivalries, these great states established practical cooperation were it only, to begin with, limited to a few matters.

But, whatever the men who bear the paramount responsibility in the United States, the Soviet Union, Great Britain, and France may attempt in a near future toward improving relations between their countries, increasing human, economic, cultural exchanges as well as their cooperation for the development of certain Asiatic or African areas, peace and life will nevertheless be in jeopardy if the temptation and the threat of war remain hanging over the world due to nuclear weapons. To destroy these weapons by common consent, to enter the commitment not to manufacture any others, to open up all territories to reciprocal supervision, there is no other hope for the future of our species. [Applause.] One can indeed apply contractual measures first to the vehicles of death, missiles, planes, ships, which, even today, it is possible to prevent from carrying bombs and to supervise in common. It is precisely thus that France recommends that disarmament be started. But we have reached the last moment when an agreement appears possible. Failing the renunciation of atomic armaments by those states who are provided with them, the French Republic obviously will be obliged to equip itself with such armaments. In consequence, how many others will attempt to do the same? In the state of increasing uncertainty in which fear throws the peoples of the world, the risk grows that, one day, events will escape from the control of those who obey reason and that the worst catastrophes will be unleashed by fanatics, lunatics or men of ambition.

Three weeks from now, Messrs. Eisenhower, Macmillan, Khrushchev and myself will compare our views after having done so two by two. I do not think that anyone believes that it will be enough that the four of us sit together for problems of such magnitude to be effectively solved. Perhaps we shall, at last, decide on the road to follow, however long and arduous the stages may be. In any event, my country has determined its purposes and its hopes.

Americans, let me say to you: in the big contest which lies ahead, nothing counts more for France than the wisdom, the resolution, the friendship of the great people of the United States. This is what I came here to tell you. [Applause, the Members rising.]

At 12 o'clock and 56 minutes p.m., His Excellency the President of France, accompanied by the committee of escort retired from the Chamber.

The Doorkeeper escorted the invited guests from the Chamber in the following order:

The members of the President's Cabinet.

The Ambassadors, Ministers, and Chargés d'Affaires of foreign governments.

JOINT MEETING DISSOLVED

The SPEAKER. The purposes of the joint meeting having been completed, the Chair declares the joint meeting of the two Houses now dissolved.

Thereupon (at 1 o'clock and 56 minutes p.m.) the joint meeting of the two houses was dissolved.

The Members of the Senate retired to their Chamber.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 2 o'clock p.m.

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the proceedings had during the recess be printed in the RECORD.

The SPEAKER. Is there objection?

There was no objection.

SALE OF C1–SAY–1 TYPE VESSELS TO THE GOVERNMENT OF THE REPUBLIC OF CHINA

Mr. GEORGE P. MILLER. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 8042) to authorize the Secretary of Commerce to resell four C1–SAY–1 type vessels to the Government of the Republic of China for use in Chinese trade in Far East and Near East waters exclusively, with Senate amendments thereto, disagree to the Senate amendments, and request a conference with the Senate.

The SPEAKER. Is there objection to the request of the gentleman from California? [After a pause.] The Chair hears no objection and appoints the following conferees: Mr. GARMATZ, Mrs. SULLIVAN, Mr. GEORGE P. MILLER, Mr. TOLLEFSON, and Mr. VAN PELT.

VISIT OF HIS EXCELLENCY CHARLES DE GAULLE, PRESIDENT OF THE FRENCH REPUBLIC

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, this Congress throughout its history has had as its guests great personages from abroad. The Congress, in joint meeting, has received as a guest of the Congress outstanding personages today and yesterday. Today we had the honor of having address a joint meeting of the Congress the President of France, who is not only one of the great leaders of the day but, in my opinion, will go down as one of the great leaders of all history; in fact, a man of destiny. The firmness of leadership, the strength of his leadership has reflected itself in the increased spirit of France, the people of France, and in bringing France back again as one of the first nations of the world.

We were glad to have him here today. We hope he will leave the United States with fine recollections of his visit, both he and Mrs. de Gaulle. His presence and his inspiring speech has made a tremendous impression upon the Members of both branches of Congress, and is a marked step in further cementing the strong friendship that exists between the peoples of the United States and of France, and the Government of our country and the Government of France.

I know all Members appreciate the fact that we had addressing us today a man of destiny—a man of history.

Mr. HOEVEN. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I shall be glad to yield.

Mr. HOEVEN. In behalf of the minority, I want to concur in everything the majority leader has said with reference to the distinguished world figure, General de Gaulle, who addressed a joint session of the Congress today. General de Gaulle is one of the greatest men in the history of our time. He is a man of dynamic personality, and I have never seen such acclaim given any representative from a foreign country as was given De Gaulle today.

President de Gaulle's message will be warmly received by all peace-loving nations of the world. It has particular meaning at this time as preparations are being made for the summit meeting in May. I was glad to hear him say that nothing counts more for France than the wisdom, the resolution, and the friendship of the people of the United States. The appearance of this great world statesman in the Halls of Congress today, will, I am sure, lead to a better understanding between our two great nations as we strive together for lasting peace on earth and good will among men.

Mr. GEORGE P. MILLER. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield to the gentleman from California.

Mr. GEORGE P. MILLER. I want to join with the gentleman from Massachusetts in what he has said about our friendly relations with France. The appearance of General de Gaulle here marks the indissoluble bonds that tie our two countries together. May I call attention to the fact that this room, the room in which the Representatives of the people sit, is dominated on the Speaker's right by the portrait of the Father of his Country, George Washington, and on the Speaker's left the portrait of Lafayette, the man who contributed so much in bringing France to our aid at a time when we were hard pressed during the War of Independence.

Through the years the friendship between our countries has cemented the great understanding of our mutual problems. I am happy to have been here today to pay my humble respects to the great General de Gaulle.

Mr. McCORMACK. I am thankful to my friend for his remarks.

GENERAL LEAVE TO EXTEND

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that all Members may have the privilege of extending their remarks at this point in the RECORD on the subject of General de Gaulle's visit.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

THE GREAT DE GAULLE BELIEVES IN THE PRINCIPLE OF FOOD FOR PEACE

Mr. WOLF. Mr. Speaker, on this day when our Congress is honored by a visit from the great French leader, President Charles de Gaulle, I would like to place in the RECORD, excerpts taken from a press conference which he held in March of last year.

The greatness, the conscience, and the vision of the man clearly come through in these words.

When he speaks of using the abundant resources of the world to raise up the less fortunate areas of the world, he reaches his highest point by saying:

Let us do this—not that they should be the pawns of our policies, but to improve the chances of life and peace.

I congratulate General De Gaulle for suggesting that food for peace and economic development should be one of the items to be discussed at the summit conference. It is not enough that we in America believe in food for peace, and he has indicated that he is talking of having multilateral organizations work on this proposal. For many months I have put forth much effort to get a food for peace bill passed by the Congress. It is good to have General De Gaulle's suggestion that all countries with something to offer should stand together to help raise the standard of living in the less developed areas of the world.

I join with all other Americans in welcoming President De Gaulle to the United States, and in hoping that his stay here will be extremely fruitful and will draw our two countries closer together.

The excerpts follow:

[From the Washington Post, Apr. 23, 1960]

THE GRAND DESIGN SOUGHT BY FRANCE

(By President Charles de Gaulle)

(These excerpts are taken from President de Gaulle's press conference of March 25, 1959.)

When two-thirds of the inhabitants of the earth lead a miserable existence, while certain peoples have at their disposal what is necessary to insure the progress of all—what is the use of the dangerous wrangling over West Berlin, the East German Democratic Republic, and German disengagement?

For, in our time, the only quarrel worth while is that of mankind. It is mankind that must be saved, made to live and enabled to advance.

We, who live between the Atlantic and the Urals; we, who are Europe, possessing with Europe's daughter America, the principal sources and resources of civilization; we, who have the means to feed, clothe, and house ourselves and to keep warm; we, who have mines and factories going full blast, well-tilled soil, railways where run numerous trains, roads choked with cars, ports filled with ships, airports full of aircraft; we, all of whose children learn to read, who build many universities and laboratories, who form armies of engineers and technicians, who can see, hear, read what is of a nature to satisfy the mind; we, who have enough doctors, hospitals, medicines to ease suffering, to care

for the sick, to ensure the life of most newborn infants—why do we not erect, all together, the fraternal organization which will lend its hand to the others?

Why do we not pool a percentage of our raw materials, our manufactured goods, our food products, some of our scientists, technologists, economists, some of our trucks, ships, aircraft in order to vanquish misery, develop the resources and help in the work of less developed peoples?

Let us do this—not that they should be the pawns of our policies, but to improve the chances of life and peace. How much more worth while that would be than the territorial demands, ideological claims, imperialist ambitions which are leading the world to its death.

It seems to me that this should be a primary subject for the agenda of possible East-West conferences. In case of agreement in principle, it would evidently be necessary to draw up a common plan of organization and implementation.

If we should hold a summit conference this year, I would be ready to speak of it with my friends, Mr. Eisenhower and Mr. Macmillan, and I hope that Mr. Khrushchev, whom I met some time ago in Moscow in the entourage of Stalin and who has come a long way since then, will be willing to take an interest in it.

DAYLIGHT SAVING TIME AND THE WORLD OF MAKE-BELIEVE

Mr. GROSS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. GROSS. Mr. Speaker, this is a wonderful world of make-believe in which we live.

With the greatest of ease our Government borrows billions of dollars and slaps a mortgage plaster on future generations to pay the bills. This is called prosperity.

Then once each year, as a further contribution to the fun of make-believe, we borrow an hour from the future, and further compound the confusion by calling it daylight-saving time.

No matter how much trouble mothers may have trying to get their youngsters off the streets and out of the corner soft drink establishments by 9 or 10 o'clock at night, we have saved an hour from rising to setting sun.

I think it is fitting and proper, Mr. Speaker, that once each year Congress recognize one of its greatest accomplishments—the economy saving of daylight to make secure the golfers delight.

DESIRABILITY OF A YOUTH CONSERVATION CORPS

Mr. JOHNSON of Colorado. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. JOHNSON of Colorado. Mr. Speaker, the Subcommittee on Special Education of the House Education and Labor Committee took testimony on Wednesday and Thursday of last week in support of a proposal to authorize the establishment of a new Youth Conservation Corps. It is my earnest hope that the subcommittee will report the measure favorably to the full committee and that the committee will report the measure favorably to the House in order that we may approve S. 812 and send the President this measure before we adjourn. Recently a group of juveniles terrorized the teenage daughter of a reporter on the Rocky Mountain News.

Such outbreaks of juvenile terrorism in Denver and elsewhere make it clear that there are many young men who need the discipline of hard work and the opportunity to do something creative. It was the good fortune of the young men of my generation that there existed, during the 1930's, a Civilian Conservation Corps which provided just such an opportunity. Clearly, we need to reestablish such an organization in the interest of the young men themselves. I know from the experience of my friends, both those who were in the corps as workers and those who supervised the corps, that the CCC was a profound influence for good in the lives of thousands of young American men.

A Youth Conservation Corps would benefit not only the boys themselves, it would benefit the communities both from which they come and the communities that will secure the benefits of the work they might do. In some of the national forest areas and national park areas in my district there are denuded hillsides that sorely need new trees planted. There are watersheds that have been ravaged by erosion and poor soil conservation practices, which could be improved by the work of a Youth Conservation Corps.

We would be investing not only in the young men themselves, but in the resources of our great land. We would be enriching our own lives and enriching the resources we leave to our children and to our children's children.

I urge the committee to report this bill favorably at an early date.

MORE EVIDENCE THAT RUSSIA HAS AN ICE-FREE PORT ON THE OPEN SEA—THE NEW YORK TIMES SAYS IT IS SO

Mr. STRATTON. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and to include an article from the New York Times.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. STRATTON. Mr. Speaker, last year the distinguished gentleman from Missouri [Mr. CURTIS] and I had occasion to take the floor to discuss at some length the question of whether the Soviet Union did or did not have an ice-free port on the open sea from which the Soviets admittedly tremendous submarine fleet could be operated on a year-round basis. This discussion, which arose originally from a somewhat facetious offer on the part of the gentleman from Missouri on June 5, 1959, to provide a case of whisky to anyone who could find a Russian ice-free port on the open sea, nevertheless had a serious aspect, because the purpose of the gentleman's offer, which had been based on a similar offer made by the Navy last year to the first antisubmarine air crew which could take a photograph of a surfaced Soviet submarine, was designed to support his contention that the threat of the Soviet submarine fleet had been exaggerated by the Navy in an effort to get appropriations it did not really need.

In an effort to underline the extent of the Soviet's threat and to dispute the gentleman's attempt to play down the potential seriousness of a Soviet submarine fleet of more than 400 ships, I accepted his wager on the floor of the House, with the aid of charts, demonstrated that there were actually two ice-free ports on the open sea from which Soviet submarines could operate throughout the year, one of them Murmansk on the north, the other Petropavlovsk in the Pacific. Moreover, I introduced references from the sailing directions of the Navy to support my contention, as well as statements from a high-ranking officer who had served in Murmansk throughout World War II. Notwithstanding this evidence the gentleman refused to be convinced and rejected the proof which had been offered to him.

Not because of the wager involved, which I have already indicated I have no desire to claim but will in any case turn over to the American Red Cross for medicinal purposes, but rather because I believe most sincerely that no attempt to minimize the very serious character of the Russian Soviet submarine threat should ever be permitted to stand unchallenged. I take this time today, Mr. Speaker, to call to the attention of the gentleman from Missouri as well as to the other Members of the House some new substantial evidence in this issue which has appeared just this morning in a source which I am sure even the gentleman from Missouri will acknowledge is unimpeachable, namely the New York Times. In a front-page article this morning the New York Times features a dispatch from its Moscow correspondent, Mr. Osgood Caruthers, together with pictures. One picture on the front page of the New York Times for April 25 is captioned as follows: "Harbor in Soviet Port of Murmansk Is Kept Open All Year by Warmth of the Gulf Stream." In addition the text of the article on an inside page contains the following statement:

> It might be said that full realization of Murmansk's possibilities was reached during the war when its deep, protected harbor, kept free of ice the year round by the warm currents of the Gulf Stream, became the main artery for the flow of United States and British lend-lease trucks, tanks and guns that went to the Red Army to help turn the tide at Moscow, Leningrad, and Stalingrad.
>
> Archangel, 350 miles southwest of Murmansk on the White Sea, was open only during the short summer months. It was closed by ice the rest of the time.

Mr. Speaker, I offer this evidence in the hope that the issue between the gentleman and myself, which has re-

mained unresolved these many months, and which has, I know, been a source of concern and anxiety and suspense to many Members of the House, can now be settled once and for all.

Perhaps the gentleman is reluctant to accept as conclusive proof the Navy's sailing directions or the word of a Navy admiral; but I am sure that he will admit that if you see it in the New York Times, then it is true.

Since, as I have already indicated, I have no desire personally to claim the case of whiskey which the gentleman from Missouri has offered to support his wager, may I suggest instead to the gentleman that, since this information surely will put the real extent of the Soviet submarine threat in a new light for him, as a forfeit for having lost his wager he join with me in supporting additions to the 1961 Defense Department budget designed to increase our antisubmarine defense capabilities, especially an item for construction of the long-delayed nuclear carrier which the Navy has been seeking, a weapon which is surely the key to effective defense against these Soviet submarines which we now learn can indeed operate from Soviet ice-free ports on the open sea the year round.

THE DRAGON SLAYERS

The SPEAKER. Under previous order of the House, the gentleman from California [Mr. ROOSEVELT] is recognized for 60 minutes.

Mr. ROOSEVELT. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. ROOSEVELT. Mr. Speaker, I again rise to speak in behalf of the necessity and the responsibility of this body to abolish the Committee on Un-American Activities.

A little more than a year ago I addressed the House on this subject. I am sure that I was guilty of two errors when I spoke on this question before; and I do not intend to repeat them. First, I approached the central issue too obliquely and consequently the chairman of the committee had a colorable reason for thinking that I had no criticism of the committee itself. He was wrong, but my approach may have helped lead him into error. I intend to go to the heart of the matter today and I thank him for his prod in that direction.

My colleague the gentleman from Ohio [Mr. SCHERER] also indicated that he would respect me more if my last year's effort called for abolition of the committee and nothing more. I do, indeed, desire the respect of the gentleman from Ohio and, therefore, I am quite willing to have my purpose amended accordingly. However, I am well aware that in the past some of my colleagues who have shared my misgivings about the Un-American Activities Committee, as presently constituted, have felt that, nonetheless, there was an area within the committee's stated jurisdiction which it was proper for Congress to investigate. But more and more of them are reaching the conclusion that if the committee ever did have any usefulness, it has now completely outlived it. Today, I speak for that viewpoint.

My second error last year was in thinking that the committee's defenders would care to debate the issues. I am sure I got that idea from my respect for the House and my knowledge of its finer service to our democratic institutions. Almost without exception it has been my experience that we do debate the issues themselves. I forgot, however, that the idea of investigating an area labeled "un-American activities" is itself so vague and subjective that it inevitably devolves into name calling at the lowest level, So, too, with attempts to defend the idea. Thus, it initially surprised me that my proposal should be answered by an ad hominem attack on certain persons and groups who also want to abolish the committee. On one of these groups my mother served, although I did not ask you to consider my proposal for mother's sake. I wondered, of course, how the agreement of these people would possibly be an answer to the merits of my proposal. If that is so, the people attacked by my opponents really have immense power. Presumably just by their coming out for three square meals a day, that would stamp eating as a Communist doctrine and persuade us all to starve to death.

For an extended example of ad hominem reasoning, one can read the committee's own publication, "Operation Abolition," published on November 8, 1957, a remarkable document concerning efforts to abolish the committee. One would expect a good deal of time to be spent answering the criticisms of the committee, which, the committee itself, as well as every Member of Congress, is aware, are neither slight nor recent. No such thing. Out of 15 pages, 14 are devoted to alleged dossiers of the critics as if to say that this alone destroys their reasoning.

Nor is this an isolated example. Last year, when I spoke on this subject and the concern which exists throughout the country over the House Un-American Activities Committee and its institutionalization and continued operation, the arguments were met with the charge that the Communists were behind the campaign—that if the committee were abolished the Communists would have a victory day celebration. Well, let me first of all answer that argument and get it out of the way, so we can discuss this more rationally—and if there is any area which needs more rational and unemotional discussion than this, I do not know of it.

Concededly, we are living in a hostile world in which communism poses a threat, but that does not mean we must make all of our decisions by reaction—by determining on which side of every question the Communists lie, and then automatically voting the contrary. As our distinguished colleagues from the South kept pointing out—although I am not sure where they obtained their information—the Communists in this country undoubtedly favored some type of civil rights bill, but is that the deciding factor for action or inaction by the House of Representatives? Do we decide the farm program, the budget, school bills, foreign aid, conservation, or social security merely by reading the Daily Worker and then voting the opposite?

I, of course, do not care whether or not the Communists do or do not applaud my efforts in seeking to abolish the House Un-American Activities Committee. I am not doing it for them nor any other group. I speak only for myself. I am doing it for the country as a whole and, I feel, for the good reputation of this House.

I am, as I say, prepared to have this speech met by vilification rather than reasoned exposition, because the latter type of argument on behalf of the committee simply will not suffice to justify its existence. Very likely I will merely escape with being called a dupe or unwitting "handmaiden" of communism. I am certain I can survive that level of insult.

It is perhaps easy to understand why the committee and its defenders have become increasingly more agitated because the list of committee critics or what the committee calls dupes or malevolent conspirators has increased tremendously within the past year. Criticism has come from segments of society whose anti-Communist purity is beyond question.

To such criticism the committee and its supporters can only respond that while it is true the number of U.S. Communist Party members has gone down to its lowest point in history, the number of dupes has gone up and hence the danger is greater than ever and we need more and more funds for the House Un-American Activities Committee. This would appear to make my task impossible from the very beginning. For under this line of reasoning, the more I can demonstrate that the Communist Party and even its front organizations have decreased in size, and the more pristine pure sources criticize the committee, the more the committee says its existence is justified and the more, not less, funds it needs.

I am frank to say I am puzzled how to argue against this line of reasoning because I find such an argument absurd on its face. Yet there are men here in this body and outside who state this argument with seeming sincerity.

It is also difficult for me to find any rational correlation between the fact the committee received $50,000 in 1945, when there were 64,600 known Communists, and $327,000 for this year when there are fewer than 10,000 in this country of 180 million. Last year, we also voted the committee $327,000, or a total of $654,000 for this 2-year period.

Of course, when I refer to the cost of the committee's operations, I have not included the additional appropriations which we regularly make to cover the costs of additional printing of its reports.

By comparison I ask you to note the 1959 and 1960 appropriations authorized for studies and investigations for the far

broader and, by any objective standards, more important work done by some of our other standing committees: For example, and I cite only a few, the Committee on Armed Services received $150,000; Ways and Means Committee, $300,000; Committee on Education and Labor, $328,000; Committee on Agriculture, $50,000; Judiciary Committee, $425,000—all for the same 2-year period.

As a matter of fact, the only committees of this House which have received more money for the years 1959 and 1960 are the Committees on Government Operations and Interstate and Foreign Commerce.

The committee's defenders justify these disproportionate expenses on the ground that the committee is protecting the security of their country. But of course it must be recognized that the basic responsibility for protection of this country against treason or espionage is not in the hands of the committee and never has been, but is in the hands of the FBI, and other counterespionage agencies of the Federal Government. The committee does not catch spies or saboteurs. For example, at the time of the arrest of Harry Gold, the Philadelphia chemist, who was involved in the Rosenberg case, his name was not even to be found among the innumerable individuals listed in the committee files.

As for the critics of the committee, I could also recite the huge list of impeccable leaders and organizations that agree with me, among them a great number of the country's leading newspapers, including the Newark Evening News, the St. Louis Post-Dispatch, the Washington Post, and the San Francisco Chronicle.

For example, the Newark Evening News, in calling for the abolition of the committee in its editorial of February 9, 1960, had this to say:

> The House Committee on Un-American Activities in its 1959 report develops little about the Communist threat here and abroad not already known to responsible government authority.
>
> It has, however, turned a phrase, "fourth-dimensional warfare." A committee spokesman defines this as a Moscow tactic more dangerous to the free world than long-range missiles and other weapons.
>
> Only the name is new, though, since fourth-dimensional warfare turns out to mean propaganda, political warfare, economic aid to weak and wavering countries, and espionage under diplomatic auspices. The gist of the committee report seems to be that communism seeks by duplicity, double talk, spying and any devious method to crush Democracy and dominate the world. These aims and ways are known and understood, perhaps better in the Federal Bureau of Investigation than in the committee.
>
> Time and events have not been kind to the committee. Its early days were sad, its methods never quite earned full public confidence so perhaps it is time to receive and file the 1959 report, discharge the committee with thanks, and leave the fight against communism in all dimensions to the FBI and other agencies more adequately equipped.

In addition, you may also be surprised to learn that among those in favor of abolishing the committee is its present chairman the Honorable FRANCIS E. WALTER of Pennsylvania. To those of you who find difficulty in believing my statement may I take the liberty of quoting his sworn testimony a few weeks ago in the case of United States against Yellin, Criminal No. 3023, U.S. District Court, Northern District of Indiana, Hammond division, where he states:

> Answer. No. If you want my personal feeling about the matter, I am one of the 42 men who voted against creating the committee. I thought that its function should be within the framework of the Judiciary Committee, just as it is in the Senate, where this work is done by a subcommittee of the Judiciary Committee.
>
> Question. Do you still feel that way?
>
> Answer. Of course.

My conviction is that the committee is closer to being dangerous to America in its conception than most of what it investigates. My conviction is that it is a continuing discredit to the country, and more immediately, to this House. My conviction is that so long as we continue its existence, we must equally share the guilt for the evil which it does. Specifically, I am convinced that the major activity of the committee which we have licensed is the abridgment of the citizen's freedoms; that insofar as the committee has legitimate functions which it occasionally performs, those functions belong more properly and effectively to the purviews of our other standing committees long antedating this one; and, finally, that when the committee is not being harmful or bumptious in its operations, it most commonly is just plain silly. Taking merely the last year of the committee's operations, I propose to demonstrate these facts to you.

None of us can really escape responsibility for the committee's work. We created it, we sponsor it, we vote the funds for its continued operations, we enforce its process, we publish its reports. It should be a source of real concern to see some of the incredible and appalling things we have allowed to be done in our name and under our auspices, with the use of our delegated powers and immunities. You will see that it is precisely those powers and immunities which have enabled the committee to do its worst work.

Let me say first of all that there is another view of the committee's work, namely, its own. As the destructiveness and uselessness of the committee become clearer, the voice which it raises in its own defense gets shriller. As I have indicated, the replies to my speech against the committee last year almost entirely took the low road of vilification.

If you accept the committee's view of itself you see, if I may allegorize, a sturdy band of knights who, having pledged themselves to purify the land, endlessly ride forth to slay dragons. Their strength is the strength of 90 and their lances are unerring. They score a kill every time, never a mistake. It is true that occasionally a dragon reforms itself. These they consult, as well as other professional dragon-slayers, in order to learn where and how to find more of the vicious beasts. Camouflage is a terrible problem. Dragons have been known to mask themselves as stray cows, or even as people who claim their land is safe and urge the knights to go home since they are trampling the crops. But the knights conquer these difficulties and find their quarry. Thus, the surest sign of a dragon is someone who denies he is one or who refuses to deny it when challenged at lance point.

Now for all of this crusading the knights pay a heavy price, as they will tell you. First there are the disguised or misled who tell them to go home. Then there are the people who ignore them. Worse still, are the dragons who fight; sometimes the whole band of knights comes back from a slaughter exhausted and with mud and dragons' blood all over their armor. Finally when they have gathered their strength again, they write their reports.

The 1959 report is typical. It begins, as do all good tales of knighthood, with a picture of the castle of virtue menaced by danger. The Communist Party has great expectations, we are told, although its membership is at a low ebb. It is preparing to emphasize peace. Its members will join non-Communist organizations. It will tell Negroes that they will have a better opportunity to break down discrimination barriers in peacetime than in war. The party is employing "Aesopian language," as a weapon. When they use phrases such as "ending the cold war" and "peaceful coexistence" Communists visualize a different world than we do. They foresee a Communist-dominated world.

Frankly, this sort of work reflects a monumental silliness. If it were the entire story, we should end the committee's existence on grounds of uselessness alone. It is little better than insulting to the intelligence of this House and this country to maintain a committee for the purpose of investigating and reporting what everyone already knows.

But even here, a part of the perverse outlook which has made a preoccupation out of the strange concept of "Un-Americanism" can be seen. The focus of this outlook is always on people rather than ideas, always on the speaker, never the speech. Bad men may say and may do good things. However, the committee sees only red and therefore inevitably settles on the view that if a bad man says a good thing, it automatically is suspect, if not actually bad. Regularly the committee reports on all the good causes which are claimed to have been poisoned by bad men, but does not report how many of these good causes have been strong enough to resist this poison. The prime example of this is the failure of the committee in its attack on the National Council of Churches.

This is one of the main vices of the committee. It is unable to see any of the complexities of ordinary human activity. People are either American, un-American, or dupes, and the worth of everything they do is tested by that simple-minded standard: "Either you're with us or against us." Who among us would apply this credo to our daily work or our personal associates? The committee applies it every day.

It goes further. Not only does it assume that so-called un-American persons are incapable of decent thoughts, it also considers them unfit for gainful em-

ployment. Year after year the committee has ferreted out new areas of our country which it considers vital and from which it wants to abolish such persons. This year it is the Protestant clergy. Last year, for example, one of these areas was the meatpacking industry.

Now, personally, I am willing to eat meat even though packed by political heretics. I am also willing to eat Russian caviar. But the committee sees further and fears for our safety. What if there were a war, it says? Could not these evil persons poison or hold up our meat supply? My friends, I suppose they could. I suppose they could put nails in our tires too if they worked in Akron or just deprive us of sleep by cleaning the streets too noisily at night. But I see no logical end to this kind of anxiety except to say that such heretics cannot be permitted gainful employment, and then I suppose we should put them to death to avoid watching them starve.

Now are we really this afraid? Do we need to appoint a committee to drive people out of their jobs? Does the country really benefit from the fact that John Doe came before the committee and told it that Mary Jones' real name is Mary Jonovitch and she is or had been a Communist; that he has thereby cost her her job as a meat wrapper at the Weak-Hearted Meat Co., and put her and her children on relief, and that Mary Jones cannot henceforth find a job? Let me say flatly that my answer is "No," and that it is to our eternal disgrace that we sponsor such misuse of our authority. And let me also ask, what is to become of Mary Jones and her children? Who will employ her unless it is someone else whom we have made a pariah? Do we really expect that after this sort of wanton cruelty and degradation she and her children will continue to think of this country as a land of freedom and tolerance for differences? Or have we not more probably just recruited new persons for the ranks of bitterness and extremism.

We let the committee do even worse things in California last year; it was one of the most shameful episodes in the history of this House. The committee had subpenaed 110 public school teachers in early June 1959. Most of the subpenas were served on the teachers at school at 9 o'clock in the morning of June 5. No good reason has been advanced as to why the teachers could not have been served at home. Naturally, school administrators and fellow teachers, as well as the children in their own classes, were at once put on notice that the teachers were, in some fashion, suspect.

The following day, newspapers in northern California carried the names, addresses, teaching posts, and brief biographies of the subpenaed northern California teachers. It is not important whether the names were deliberately "leaked" to the press. In any case, the damage was done and the effect of this publicity on the teachers was devastating, both in their jobs and in their social relations.

It is interesting to note that practically all of those subpenaed were probationary teachers who had not yet obtained job security and the procedural protection which results from "tenure."

The date originally set for the hearings was June 17, 1959. On June 11 the hearings were continued to September 1 for the reason, according to the chairman of the committee, that—

> The ramifications of the Communist operation in California are so extensive and malignant that additional investigative work must be done before the actual hearings can be held.

The San Francisco Chronicle commented editorially on June 12, 1959, on the postponement as follows:

> Forty northern California teachers (plus 70 in southern California) who are under subpena and whose names have been made public (though not printed by this newspaper) stand accused, with no opportunity to clear themselves. This kind of procedure is hardly in accord with the best American practice, though it is not new with the House Un-American Activities Committee.

The complete San Francisco editorial is as follows:

> IT WASN'T SO URGENT AFTER ALL
>
> The shrilly publicized hearings on Communist activities by California teachers, scheduled to open in San Francisco next week, have been abruptly postponed for almost 3 months.
>
> Meanwhile, 40 northern California teachers (plus 70 in southern California) who are under subpena and whose names have been made public (though not printed by this newspaper) stand accused, with no opportunity to clear themselves. This kind of procedure is hardly in accord with the best American practice, though it is not new with the House Un-American Activities Committee.
>
> Chairman FRANCIS E. WALTER, Democrat, of Pennsylvania, says ominously that the hearings were postponed because "the ramifications of the Communist operation in California are so extensive and malignant that additional investigative work must be done before the actual hearings can be held."
>
> This phrasing was doubtless meant to be devastating—an effect which it must be having upon members of California's own Senate Un-American Activities Committee whose newly submitted $50,000 report completely missed the malignancy which WALTER describes as extensive.
>
> Two years of work by this committee on its own home grounds turned up nothing more alarming than an opinion that the U.S. Supreme Court has handed down some ragged decisions, that Chief Justice Earl Warren is not a Red, that writers who plead the fifth amendment are now eligible for Oscars, and that the problem of infiltration in the Los Angeles County Medical Association is comparatively slight.
>
> It may be inferred from this conjunction of events that either WALTER is talking nonsense for the sake of more publicity for his committee, or that the California committee has no valid reason for existence and is just frittering away $50,000 of public money each biennium. There is the further possibility, of course, that both inferences are correct.

On August 13, the committee again postponed the hearings, this time until October 14. Meanwhile many impeccably respectable civic groups in California condemned the committee for its announced hearings.

On August 14, Rt. Rev. James A. Pike, the Episcopal Bishop of California, speaking for the Department of Social Relations, Episcopal Diocese of California, stated:

> The investigative procedure of the Un-American Activities Committee has proven to be so threatening to the public welfare of countless innocent individuals that the public conscience is and must therefore be outraged.

The full resolution is as follows:

> RESOLUTION, RE THE PROPOSED MEETING OF THE UN-AMERICAN ACTIVITIES COMMITTEE IN SAN FRANCISCO ON OR ABOUT SEPTEMBER 1, 1959, DEPARTMENT OF SOCIAL RELATIONS, EPISCOPAL DIOCESE OF CALIFORNIA
>
> Whereas the department of social relations, composed of laity and clergy of the Episcopal Diocese of California, wish to record with Representatives SHELLEY and MAILLIARD and the general public their opposition to the proposed meeting of the Un-American Activities Committee of the U.S. Congress in San Francisco on or about September 1, 1959: Therefore be it
>
> *Resolved*, That:
>
> 1. No legislative purpose requires the presence of the above committee in the bay area because our primary and secondary school systems are already covered by the provisions of the loyalty oath, and the executive department of the State government is enabled to enforce the provisions of this act by virtue of existing legislation.
>
> 2. Teachers called before this committee are more often than not deemed guilty by association simply because they were subpenaed, whether or not in fact they are guilty of subversive activities. Thus, because of the sensitivity of the governing boards of school districts to public opinion, they often lose their jobs and are stigmatized due to the public hysteria generated by the committee's presence.
>
> 3. The investigative procedure of the Un-American Activities Committee has proven to be so threatening to the private welfare of countless innocent individuals that the public conscience is and must thereby be outraged.
>
> 4. The action of this committee has generated such public anxiety that it has offended and therefore prevented the constitutional public right of the individual to free speech and public assembly.

The California State Labor Federation, AFL–CIO, in its second annual State convention on August 13 resolved that—

> One of the greatest violators of civil liberties has been the House Un-American Activities Committee, which has repeatedly used the subversive issue as a vehicle for obtaining newspaper headlines without regard for our cherished American institutions of free speech and assembly and the constitutional rights of individuals * * * this convention specifically protest(s) the damaging methods employed by the House Un-American Activities Committee in recently scheduling California hearings in the field of public education.

The adopted resolution of the California Labor Federation, AFL–CIO, is as follows:

> RESOLUTION ADOPTED BY SECOND ANNUAL STATE CONVENTION OF THE CALIFORNIA LABOR FEDERATION, AFL–CIO—PROTEST INVASION OF CIVIL LIBERTIES—RESOLUTION 135, PRESENTED BY EXECUTIVE COUNCIL, CALIFORNIA LABOR FEDERATION, AFL–CIO
>
> Whereas organized labor in California and the Nation has continuously battled against Communist and other subversive groups who seek to undermine our democratic form of government; and
>
> Whereas the record of organized labor in this regard is beyond reproach; and

Whereas in this never-ending battle it has been a primary concern of organized labor that the civil liberties of individuals be protected from infringement by those who would ape the methods of subversive and totalitarian groups to uproot the subversives in our Nation; and

Whereas one of the greatest violators of civil liberties has been the House Un-American Activities Committee, which has repeatedly used the subversive issue as a vehicle for obtaining newspaper headlines without regard for our cherished American institutions of free speech and assembly, and the constitutional rights of individuals; and

Whereas it is of paramount importance that organized labor, which has openly fought Communist and other subversives for so many years, should raise its voice in opposition to such undemocratic methods in rooting out destructive elements in our society: Therefore be it

Resolved, That the second convention of the California Labor Federation, AFL–CIO, declare once again its devotion to the preservation of our civil liberties in spirit and practice against the subversives of both the left and right; and be it further

Resolved, That this convention specifically protest the damaging methods employed by the House Un-American Activities Committee in recently scheduling California hearings in the field of public education, and demand that the House of Representatives of the United States require that the committee, as a condition of holding such hearings, take every possible precaution to avoid the implication that any person called before the committee is a subversive; and be it finally

Resolved, That the committee shall be required to respect the rights of individuals, and to give any person accused of subversive activities by the committee or by any of its witnesses, the right to appear before the committee to face his accusers and the opportunity to clear himself of the charges so made against him.

Referred to committee on resolutions.

SAN DIEGO, CALIF., *August 13, 1959.*

On August 14 the San Francisco Chronicle noted the resolution of the California Episcopal Diocese in an editorial entitled "Methods That Outrage the Public Conscience" and stated:

The uncertain, legally dubious, and legislatively useless investigation should in all conscience be abandoned. If the appetite * * * for headlines is too strong for such a sensible course, then the committee's procedures ought to be modified to accord with the American principle of "innocent until proved guilty" and with the dictates of simple fair play.

Unhappily, the history of this committee justifies little optimism on this score; it suggests rather that as the teachers' investigation gets under way, it may be accompanied by broad, general, and vague but sinister-sounding intimations that the committee may sidetrack it to look into the acts, associations, and inclinations of the Episcopal diocese of California.

The entire editorial of the San Francisco Chronicle of August 14, 1959, is as follows:

METHODS THAT OUTRAGE THE PUBLIC CONSCIENCE

The laity and clergy of the California Episcopal Diocese, speaking through its Department of Social Relations, have added their strong and impressive voice to the growing chorus of protest against the House Un-American Activities Committee's investigation into purported Communist acts, associations, and inclinations of California schoolteachers.

In a resolution of protest supported by Bishop Pike, these churchmen noted that the committee's methods have gravely threatened the welfare of innocent persons to a degree that "the public conscience is and must thereby be outraged."

Previously, the objectives and methods of this stop-and-go investigation have been denounced by the San Francisco Labor Council, the California Democratic Council, the American Civil Liberties Union, San Franciscans for Academic Freedom and Education, and various other groups. Its legal authority has been brought under question and the committee's right to investigate California schools has been challenged. It has also been noted that no legislative purpose whatever is to be served by such an inquiry. As for methods—the committee has made public the names of some 110 teachers under subpena, thus stigmatizing them in a manner that lays them open to public suspicion and even to loss of jobs through the action of hysterical school boards.

The uncertain, legally dubious, and legislatively useless investigation should in all conscience be abandoned. If the appetite of Chairman WALTER and his fellow committeemen for headlines is too strong for such a sensible course, then the committee's procedures ought to be modified to accord with the American principle of "innocent until proved guilty" and with the dictates of simple fair play.

Unhappily, the history of this committee justifies little optimism on this score; it suggests rather that as the teachers' investigation gets underway, it may be accompanied by broad, general, and vague but sinister-sounding intimations that the committee may sidetrack it to look into the acts, associations, and inclinations of the Episcopal diocese of California.

In June, the Southern California-Arizona Conference of the Methodist Church stated:

It was inhuman and un-American for the committee to name names of California teachers, and then, like a hit-and-run driver, leave the victims to suffer wounds before the whole State. Until Congress more specifically defines the procedure and authority of this committee, these abuses apparently will continue.

On July 9, 1959, the Friends Committee on Legislation of Southern California issued a statement:

Committee hearings to discredit legitimate political activities and subject individuals to social and economic sanctions are a dangerous abuse of the investigative process.

The Un-American Activities Committee has repeatedly abused its powers in the exercise of legitimate functions. It has also habitually exceeded the legitimate bounds of its powers, and made serious inroads on the freedoms guaranteed by the first amendment to the Constitution. * * *

The long history of such abuses indicates that the withdrawal by Congress of the mandate of the House Un-American Activities Committee would serve the best interests of freedom and democracy.

The full statement of the Friends Committee on Legislation is as follows:

STATEMENT CONCERNING THE HOUSE UN-AMERICAN ACTIVITIES COMMITTEE BY FRIENDS COMMITTEE ON LEGISLATION

The Congress has broad powers which include, among others, the power to legislate and appropriate money. We recognize that these powers carry with them broad authority to investigate. But the right to investigate carries with it responsibility for the procedures used in investigations. This includes the whole atmosphere in which the hearings are conducted, the respect held for the rights and dignity of the individuals questioned and the proper limitations of congressional investigations.

Ostensibly the House Un-American Activities Committee investigates subversive activity to establish a basis for safeguarding our safety by future legislation. But the power to pass legislation abridging the rights of free speech, assembly and petition is specifically prohibited to Congress by the first amendment. Therefore, investigation of private persons as to their opinions and beliefs is beyond the proper scope of a congressional committee. Committee hearings to discredit legitimate political activities and subject individuals to social and economic sanctions are a dangerous abuse of the investigative process.

The Un-American Activities Committee has repeatedly abused its powers in the exercise of legitimate functions. It has also habitually exceeded the legitimate bounds of its powers, and made serious inroads on the freedoms guaranteed by the first amendment to the Constitution.

Often such investigations do not embrace the safeguards of the judicial or administrative process, and so tend to deprive individuals of their good name and their livelihood without due process of law. Fear of the same fate undoubtedly has an inhibiting effect on the free association and political action so essential to democracy.

The publication of California teachers' names in major newspapers, only possibly through committee carelessness or connivance, and the ensuing publicity prior to any hearings are the most recent cases in point. The long history of such abuses indicates that the withdrawal by Congress of the mandate of the House Un-American Activities Committee would serve the best interests of freedom and democracy.

My mother also had a few words to say in her column of July 12, 1959. If you will excuse some family pride, I think she made a penetrating point when she noted that among the subpenaed teachers "were teachers of retarded children, and this seems a little far-fetched since it is so difficult to teach retarded children anything, let alone communism." She also stated:

I cannot believe that Congressman WALTER and his committee are any more qualified to judge as to the qualifications or the loyalty of our teachers than those within our States who are responsible for the education that is given.

Her entire article is as follows:

[From the New York Post, July 12, 1959]

MY DAY

(By Eleanor Roosevelt)

I have just received a copy of a resolution adopted by the board of directors of the California Democratic Council. Because I think the same thing may take place in other States, I am printing that resolution here, since I believe my readers will be interested:

"The House Un-American Activities Committee's recent attempt to investigate education in California has cast a cloud of suspicion over a group of teachers without giving those indivduals, who were not charged with any crime, a chance to defend their reputations.

"These hit-and-run tactics violate basic principles of fair play. They do serious damage, not only to the individual teachers but to the educational system as a whole.

"The California Democratic Council Board of Directors expresses its condemnation of this action by this committee in the strongest terms, and urges Governor Brown and California Congressmen to employ all means at their disposal to bring about the cancellation of the existing subpenas and to prevent

any further maligning of the reputations of California citizens."

Also sent to me was information that Committee Chairman FRANCIS E. WALTER, Democrat, of Pennsylvania, had indicated that, depending on the results of his investigations in California, he may then visit other States.

A total of 110 teachers were subpenaed throughout California and the preponderant number are either kindergarten or first-grade teachers. Also included were teachers of retarded children and this seems a little farfetched since it is so difficult to teach retarded children anything, let alone communism.

I think a good many people will agree that the time has come to return the responsibility for education to the education authorities. We should certainly be able to trust those in charge of educational policies and the supervision of teaching. Teachers are usually chosen by local school boards, and I do not think that the rank and file of our people are so stupid that they cannot detect subversive teaching.

War is no longer an excuse for carrying on this kind of investigation, which often trespasses on the liberties of thought and action that are guaranteed to the people of this country in our Constitution.

I cannot believe that Congressman WALTER and his committee are any more qualified to judge as to the qualifications or the loyalty of our teachers than those within our States who are responsible for the education that is given.

The San Francisco Bay Counties District Council of Carpenters and the San Francisco Building Trades Council, on August 5 and August 6, 1959, respectively, adopted a resolution which says:

True citizenship and teaching must take place in an air free from fear or undue and unfounded suspicion * * * previous experience with the * * * Committee on Un-American Activities causes questions in our minds on whether the motive of the committee and certain of its activities might have an effect on, or be an invasion of intellectual freedom.

The resolution in its entirety is as follows:

RESOLUTION ADOPTED BY BAY COUNTIES DISTRICT COUNCIL OF CARPENTERS, AUGUST 5, 1959; SAN FRANCISCO BUILDING TRADES COUNCIL, AUGUST 6, 1959

Whereas San Francisco faces serious problems in the field of education which require a concentrated and constructive effort of all interested citizens; and

Whereas true citizenship and teaching must take place in an air free from fear or undue and unfounded suspicion; and

Whereas previous experience with the WALTER Committee on Un-American Activities causes questions in our minds on whether the motive of the Committee and certain of its activities might have an effect on, or be an invasion of intellectual freedom; and

Whereas the activities of such a committee operating on the premise of unfair motives might well damage the lives of some of our teachers and cast unjustified suspicion upon the entire profession; and

Whereas the committee recently announced hearings to be held here, named the witnesses to be called, and after the headlines subsided, postponed the hearings, thus in effect subjecting the teachers and others involved to accusation by innuendo without any recourse or reply; and

Whereas such unfair publicity-minded actions create legitimate doubt about its legislative motives or a proper concern with democratic process: Therefore be it

Resolved, That the San Francisco Labor Council calls upon Congressmen SHELLEY and MAILLIARD and Senators ENGLE and KUCHEL to evaluate the motives, legislative and otherwise, of the WALTER Committee in coming to our area and advise us accordingly prior to the contemplated hearing; and be it further

Resolved, That this resolution be forwarded to the forthcoming convention of the California Labor Federation that it might evaluate and lend its good influence in resolving the purpose of this resolution.

On August 7, 1959, the St. Louis Post-Dispatch editorialized:

The House Un-American Activities Committee has summoned 110 California schoolteachers to appear before it in what amounts to a vast dragnet operation. Obviously the purpose is not to assemble information preparatory to drafting new laws. The purpose is clearly to expose for exposure's sake. It is to embarrass those summoned, indeed to give them a kind of rough justice trial in the guise of conducting a congressional inquiry. * * * What else would a roundup of 110 teachers in California be but exposure and intimidation to the point of pillorying?

The entire editorial of the St. Louis Post-Dispatch is as follows:

DRAGNET FOR TEACHERS

The House Un-American Activities Committee has summoned 110 California schoolteachers to appear before it in what amounts to a vast dragnet operation. Obviously the purpose is not to assemble information preparatory to drafting new laws. The purpose is clearly to expose for exposure's sake. It is to embarrass those summoned, indeed, to give them a kind of rough justice trial in the guise of conducting a congressional inquiry.

But this time the House Un-American Activities Committee may have overreached itself. Miss Florence M. Sloat, arts and crafts teacher in the Los Angeles school system for a decade, has brought suit in Federal court to prevent the committee from releasing the names of 70 teachers summoned from southern California for September 15. Says this courageous teacher:

"Because I have already been humiliated by this committee, I want to spare other teachers and their families the same distress. These teachers are being punished solely for their off-campus ideas and associations. I hope our suit protects them from the humiliation and scorn which results from abuse by this committee."

In its recent Barenblatt decision the Supreme Court weakened its 1957 Watkins decision concerning congressional fishing expeditions, but it did expressly denounce "pillorying of witnesses." What else would a roundup of 110 teachers in California be but exposure and intimidation to the point of pillorying?

The Washington Post and Times Herald had a few well-chosen words to say in an editorial of August 19, 1959, which stated that the real purpose of the committee is "to punish by publicity political heresies which the Constitution forbids Congress to punish by law. The committee can learn nothing from this dragnet interrogation of teachers of any use to Congress in its legislative undertakings. The hearings can have no purpose but to expose the past political mistakes of the subpenaed teachers in order to get them dismissed from their jobs. Indeed the committee has long since ceased to operate as anything but a public pillory for the unorthodox."

The entire editorial of the Washington Post is as follows:

PUBLIC PILLORY

The American Civil Liberties Union of Southern California has taken an extraordinary step in an effort to protect schoolteachers in its area from persecution by the House Committee on Un-American Activities. It has filed in a U.S. district court a suit to enjoin the committee from releasing the names of 70 teachers subpenaed for hearings in Los Angeles on September 15. It wants to prevent the dismissal of any teacher as a result of testimony before House probers.

The purpose seems to us a thoroughly commendable one. We doubt very much, however, that any Federal court will impose this kind of restraint on a committee of Congress. And we have misgivings about any move which increases the already considerable disposition of the Un-American Activities Committee to operate as a court of star chamber. We have profound reservations about anything which abets secrecy in public business.

The ACLU suit has one clear virtue: It illuminates the real purpose of the committee—to punish by publicity political heresies which the Constitution forbids Congress to punish by law. The committee can learn nothing from this dragnet interrogation of teachers of any use to Congress in its legislative undertakings. The hearings can have no purpose but to expose the past political mistakes of the subpenaed teachers in order to get them dismissed from their jobs. Indeed, the committee has long since ceased to operate as anything but a public pillory for the unorthodox.

In August 1959 the American Federation of Teachers, meeting in Minneapolis, Minn., passed a resolution resolving that—

The fundamentally undemocratic procedures often employed by this committee have caused irreparable damage to many American citizens.

This resolution and a related one, adopted by the American Federation of Teachers Convention, are as follows:

RESOLUTION 27: DEMOCRATIC PROCESS—RESOLUTION PASSED BY THE AMERICAN FEDERATION OF TEACHERS CONVENTION, MINNEAPOLIS, MINN., AUGUST 17–21, 1959

Whereas the mandate of the Congress to the House Un-American Activities Committee gives this committee the function of investigating for purposes of formulating legislation; and

Whereas hearings of this committee have often taken on the nature of trials of witnesses accused of no crime; and

Whereas the fundamentally undemocratic procedures often employed by this committee have caused irreparable damage to many American citizens; and

Whereas the American Federation of Teachers has consistently opposed the abridgment of individual rights and the practice of exposing for purposes of publicity: Therefore be it

Resolved, That this convention reaffirm its previous resolution concerning investigations by the House Un-American Activities Committee; and be it further

Resolved, That all American Federation of Teachers locals be urged to bring this resolution to the attention of Senators and Representatives in their respective States immediately.

RESOLUTION 49: ACADEMIC FREEDOM AND THE HOUSE COMMITTEE ON UN-AMERICAN ACTIVITIES—RESOLUTION PASSED BY THE AMERICAN FEDERATION OF TEACHERS CONVENTION, MINNEAPOLIS, MINN., AUGUST 17–21, 1959

Whereas the House Un-American Activities Committee has scheduled hearings in California in early September under the guise of investigating subversion in education by subpenaing more than one hundred teachers; and

Whereas we hold that freedom from fear is one of the indispensable conditions for effective teaching in a democracy; and

Whereas we hold that an investigation of teachers is likewise an investigation of the teaching profession and of the schools; and

Whereas the inevitable consequence of the committee's visit to California will be the creation of just such a climate of fear and intimidation as will do irreparable harm to the profession, along with irreparable damage to the lives and reputations of teachers already subpenaed; and

Whereas the committee has already placed every teacher in California under suspicion with the loose charge that the Communist menace is of such magnitude as to demand more extensive investigative work, despite the fact that every public schoolteacher in California is required by law to sign a loyalty oath and to disclaim membership in the Communist Party; and

Whereas in effect the committee not only indicts teachers but, by implication, accuses local school boards of education and local administrations of dereliction in their sworn duty to enforce State laws and protecting the public schools from infiltration by subversives; and

Whereas the real threat to democratic education in California is the kind of fear that the House committee inspires by prying into matters which it is totally incompetent to judge and by threatening punishment without due process of law by holding teachers up to public scorn and subjecting them to dismissal for exercising their Constitutional rights: Therefore be it

Resolved, That this convention of the American Federation of Teachers condemn the undemocratic and prejudicial procedures of the House Un-American Activities Committee; and be it further

Resolved, That the American Federation of Teachers call upon the committee to cancel its proposed California hearings that can be but disruptive to education in that State; and be it finally

Resolved, That a copy of this resolution be sent to Representative WALTER.

On August 21, 1959, the San Francisco News-Call Bulletin stated:

There is a peculiar emotional quality in the investigation of un-American activities. Anyone who has ever been in its inquiring spotlight is more than likely to bear its mark the rest of his life. * * *

This is why there are grave dangers of multiple injustice in the often-postponed House Un-American Activities Committee hearings aimed at uncovering subversive teachers—if any—in California.

The San Francisco News-Call Bulletin editorial, entitled "Protect the Innocent," is as follows:

PROTECT THE INNOCENT

There is a peculiar emotional quality in the investigation of un-American activities.

Anyone who has ever been in its inquiring spotlight is more than likely to bear its mark the rest of his life. The innocent as well as the guilty, even the witnesses, often are tarred with the same brush. Notation on an employment record of a role played in such an inquiry is apt to cause raised eyebrows for years.

This is why there are grave dangers of multiple injustices in the often-postponed House Un-American Activities Committee hearings aimed at uncovering subversive teachers—if any—in California.

If there are Communist teachers in the schools, they ought to be rooted out as quickly as they are uncovered, but the innocent should not be made to suffer in the process. This is precisely what happens when the WALTER committee subpenas not only those against whom it may have a good case but many others who may stand innocently apart.

California law forbids a Communist to teach in the schools, or to have been a Communist prior to 1945 without having filed a statement of canceled membership.

If the committee has evidence this is being violated, it should turn it over to the school board involved where the matter can be investigated in executive session, as State law provides, and the innocent cleared without being smeared on a charge which is damaging even when proved untrue.

School boards have ample legal authority to make such investigations. The Dilworth law provides that any employee who refuses to answer questions regarding Communist affiliation shall be dismissed.

The WALTER committee has a congressional mandate to expose subversive activities, but it has no mandate to blast the crowd with a shotgun in order to pick off one offender.

If the guiltless are made to suffer equally with the guilty, then the time has come to reexamine procedures and get them back into the American pattern so clearly defined in law and the Constitution.

As I indicated above, the committee on August 13 postponed the hearings a second time until October 14, 1959. However, on August 21 the committee announced the hearings were being canceled completely.

The San Francisco Chronicle greeted this with a Sunday editorial, August 23, 1959, entitled "The Committee Blows Retreat." It stated:

One of the most heartening victories for political decency and constitutional rights that it has been our pleasure to report in quite some time came in Friday's announcement that the House Un-American Activities Committee had canceled its scheduled inquisition of 110 public and private schoolteachers of California.

The entire editorial is as follows:

THE COMMITTEE BLOWS RETREAT

One of the most heartening victories for political decency and constitutional rights that it has been our pleasure to report in quite some time came in Friday's announcement that the House Un-American Activities Committee had canceled its scheduled inquisition of 110 public and private schoolteachers of California.

Chairman FRANCIS E. WALTER'S retreat from the battlefields he had staked out in Los Angeles and San Francisco vindicates the organizations and individuals that had protested the Un-American Activities Committee's intrusion as wholly unwarranted.

One of the most powerful and authoritative of these protests had come from the California Teachers Association. It properly urged that if the Un-American Activities Committee actually believed a sinister intrigue existed in California schools, it should take action before the reopening of schools by placing its evidence before State authorities.

As had the Episcopal diocese of California, the California Labor Federation (AFL–CIO), and other responsible groups, the teachers' association reproached the committee for its undemocratic methods, its disregard for individual rights, its infringement upon the field of public education in California, and its prosecution of an inquiry that bore no discernible relationship to any Federal legislative purpose.

The release of the names of subpenaed teachers in advance of the scheduled hearings was especially deplored as an outrage upon the individual rights of teachers. As Director Ernest Besig of the American Civil Liberties Union pointed out, this did irreparable injury to both the schoolteachers and public education, both of which stand condemned without having had an opportunity to defend themselves.

We endorse Besig's conclusion that this committee be abolished. In the meantime, we would seriously question the propriety of any California school board's complying with the terms of surrender outlined by Chairman WALTER. He proposed to transmit to the school boards concerned the names of the teachers whom the committee had subpenaed "so that they may be interrogated by such boards, which would then transmit to the committee the copy of the transcript of the proceedings."

It is our suggestion that the Un-American Activities Committee would have no business with local school board's transcripts. The State of California is fully competent to take any actions that such inquiry may warrant.

The conclusion accepted in California is that the cancellation of the hearings resulted from the unprecedented public censure of the committee and its methods. This criticism did not come from so-called un-Americans or even dupes, but from an aroused community. It came because the committee's methods "outraged the public conscience," to quote the resolution adopted by the California Episcopal diocese.

The tactics of the committee following its retreat were no less devastating. In announcing cancellation of the scheduled hearings the committee stated that it intended to turn the files on the subpenaed teachers over to California's boards of education. To forestall such a move, an injunction suit was commenced in the Federal district court in San Francisco, complementing a similar suit filed by the American Civil Liberties Union in southern California. The suits contended that the threatened delivery of the files to local school officials had no visible relation to the only lawful purpose of a congressional committee, namely, the gathering of information to assist the Congress in legislating intelligently. The committee's hasty reaction was to dump the files of more than 90 teachers on the Sacramento desk of the State superintendent of public instruction. The San Francisco Chronicle quoted William A. Wheeler, the committee's California investigator, as stating that the files were delivered to the superintendent in order to "beat" the injunction.

The ethical aspect of this attempt by a legislative committee to defeat the jurisdiction of a coordinate branch of government needs no comment. But this was not all. On the request of the superintendent, for advice as to what should be done with the files, the attorney general of California replied that the question of the committee's right to turn over the files to California officials was before the courts for decision, that he intended to give the matter careful study, and that meanwhile he was going to keep the contents of the files strictly confidential.

Whereupon, the committee proceeded once again to defy both due process and common decency. It had its investigator Wheeler send copies of the files directly to officials of the counties in which the subpenaed teachers were employed.

To this action, the Los Angeles Mirror-News printed an editorial on September 17, 1959, which stated:

We don't need the House Un-American Activities Committee to pass on the qualifications of our own local teachers. We don't conceive it to be the committee's function, as a body of Congress, to dabble in the affairs of local school administrations.

The editorial of the Los Angeles Mirror-News is as follows:

LOYALTY: FACTS OR GOSSIP?

The timing is significant.

Russia's leader is visiting us to find out, among other things, what kind of people we are. Presumably that includes the extent to which we cherish our freedoms.

At the same time, the House Un-American Activities Committee seeks to spread dossiers up and down the State on some 110 schoolteachers who may or may not be of questionable loyalty.

And, as we point out below, today begins our annual observance of Constitution Week, during which we pay tribute to the ideals which contrast so sharply with the regimental Communist way of life.

The timing of the three events is, indeed, significant. But certainly we don't contend that the House committee's actions against the teachers was timed to coincide with the other two events.

Nevertheless, the committee's actions raise some disturbing issues.

As best we can determine, the Un-American Activities Committee, through its chairman, Representative FRANCIS WALTER, Democrat of Pennsylvania, and its investigator, William Wheeler, dug up some information on a number of California teachers.

WHAT IS INFORMATION?

We don't know what the information was. We don't know whether it was factual or hearsay, substantiated or gossip.

The committee announced it would hold hearings here this year. And Wheeler served subpenas on 110 teachers throughout the State—70 of them in this area—to appear before the committee for questioning.

Subsequently, the scheduled hearings were postponed, then canceled. Whether the cancellation resulted from substantial protests here in California, we can only guess.

But during the course of the unfortunate affair, the names of some of the subpenaed teachers were made public. And there's the rub.

Because it appears that vestiges of the former fear era, of the guilt-by-association period of not so many years ago, remain with some of us.

But this much is clear.

Our California school officials, generally speaking, are perfectly competent to hire good teachers. And that means loyal teachers.

We don't need the House Un-American Activities Committee to pass on the qualifications of our own local teachers. And that means loyal teachers.

We don't need the House Un-American Activities Committee to pass on the qualifications of our own local teachers. We don't conceive it to be the committee's function, as a body of Congress, to dabble in the affairs of local school administrations.

ACT ON FACTS, NOT GOSSIP

If Messrs. WALTER and Wheeler have facts—not gossip—which bear directly on the loyalty of our teachers, it would be foolhardy indeed to refuse to consider it. We understand the Los Angeles city schools have agreed to examine the files.

It's time for us to remember our adherence to constitutional freedoms. Blind, unreasoning fear of communism shouldn't stampede us into emulation of Communist methods.

Happily, most of the local school boards which received the files have evidently concluded that they contain nothing warranting any kind of action. School board officials in San Mateo County, Calif., made public announcements to this effect. Commenting on this, the San Francisco Chronicle, on September 30, 1959, agreed with the superintendent of San Mateo city schools that the files revealed information to him of "no consequence," and the superintendent of Belmont schools concluded that the files he saw were "a tempest in a teapot." The entire San Francisco Chronicle editorial of September 30, 1959, is as follows:

THE TEACHER FILES

San Mateo county school officials have discovered that the House Un-American Activities Committee had nothing on the ball when it pitched subpenas at California schoolteachers last summer.

Committee files that have been turned over to Superintendent Walter Jack of the San Mateo city schools revealed information that, to him, was of "no consequence."

Superintendent Charles Knight, of Belmont, concluded that the files he saw were "a tempest in a teapot."

Trustee Donald W. Lachlan of the San Mateo school board complained, "They don't give you the name of the accuser—it isn't fair."

Is anyone really surprised at the discovery that the files used by this reckless committee are worthless, containing unverified charges and rumors from unnamed sources? Of course that sort of file is unfair, as Trustee Lachlan complains. Pressing an unfair advantage is standard operating procedure with the Un-American Committee.

The sound disposition for this material would be for the school districts employing the accused teachers to examine it in the same way they examine any anonymous report and give it a quick burial.

Thus far, to my knowledge, only two northern California school boards have bothered to hold hearings based on the files turned over to them by the committee. In one of these hearings, the teacher was exonerated, to the delight of her class, her colleagues, and the entire community. The outcome of the other hearing has not yet been announced, but the teacher still has her job. Two other teachers decided that the harassment was too great and resigned. One teacher's application for a transfer of his provisional credential has been denied by the State board of education, causing him to lose his job. A novice teacher's application for a credential has been denied. These are the direct casualties to date of which I have knowledge. As a result of the committee's action 4 public school teachers, out of a total of 111,500 public school teachers in California's elementary and secondary schools have ceased teaching in the State. This, then, is the true extent of the "malignancy" which the committee claimed existed in California.

But while the committee's California operations produced so few actual casualties in the schools, more than 100 teachers have been in emotional turmoil for 10 months. Their teaching effectiveness has been impaired, and their sense of insecurity has communicated itself to their colleagues. The cost to the school system itself is incalculable.

When State Attorney General Mosk issued a formal opinion he stated, among other things, that the committee files themselves were worthless as evidence against the teachers involved. The reason, he said, was that the authors of the information were not identified. No action for the revocation of teaching credentials could be based on the allegations of unnamed allegedly "reliable sources." Only if the charges could be backed up by the evidence of identified persons could action against the teachers be initiated by the school department. The California attorney general, in a letter to me dated February 2, 1960, stated the following:

I recognize that the reports, standing alone, could not be used by the superintendent of public instruction as evidence in any action which might be taken by the State against the individual persons who were the subjects of the various reports. There was considerable variety in the reports.

Clearly, however, the reports in themselves, insofar as the State is concerned, could not be used as evidence. In fact I informed Dr. Simpson that he could use whatever information was contained in said documents in order to carry out his official duties as superintendent of public instruction; that the reports, standing alone, could not be used as evidence; that they were merely investigatory reports which will need substantiation; that in evaluating the reports, the true scope and character of the same must be constantly kept in mind; and that generally speaking the reports standing alone would not support the filing of any accusation. I then stated that, unless one secures the names of the persons submitting such information, and produces such persons as witnesses, the statements, even though they are allegedly from reliable sources, are of absolutely no value and may be completely discounted.

That opinion, I think, is a severe indictment of the committee's files on which it bases so much of its claim of usefulness.

But what of the future effect of this abortive and cruel foray into California's educational system? As I said before, the overwhelming majority of the teachers subpenaed are on probationary status with their contracts up for renewal in May. Despite the committee's retreat some of these may be quietly eased out of the teaching profession by the simple expedient of not renewing their contracts. No reason need be given, no appeal may be taken, no redress is available. In the past, school boards have frequently let teachers go who have become the subject of controversy, whether guilty of actual failing or mere victims of circumstances. If this happens, those who remain on the teaching staff will not miss the lesson. Anxiety, lest they suffer the same fate, will inevitably stifle a part of their own intellectual curiosity and individuality. Their pupils will also be the poorer for this, for they may never know the mental stimulation which can be provided only by the teacher with an inquiring mind. And editorial writers will have even more reason to complain that Russia is outdistancing us educationally.

One would think that after all of the furor that was caused in the State of

California by these events there would be some explanation of the committee's behavior in its annual report for the year 1959 which was published February 8, 1960, as House Report No. 1251, 86th Congress, 2d session, Union Calendar No. 541. It may surprise you to know, therefore, that in the entire annual report for the year 1959 there is nary a word mentioned about the postponed hearings on the State of California teaching profession. Nothing is said about the fact that the Communist operation among teachers in California is so extensive and malignant that additional investigative work must be done. No; nothing at all. For all we know from the report, the State of California is a veritable Gibraltar of safety, immune from the dangers which the committee once proclaimed were so dire.

The latest subject which has attracted the attention of the Committee on Un-American Activities was the Air Force Reserve Training manual which attacked the National Council of Churches of Christ in the U.S.A., the leading Protestant interdenominational council in this country. By now we are all familiar with this bizarre episode and some of the unbelievable statements made in the manual. These included the following:

Communists and Communist fellow-travelers have successfully infiltrated our churches. * * * It is known that even the pastors of certain of our churches are card carrying Communists.

The National Council of Churches of Christ in the U.S.A. officially sponsored the revised standard version of the Bible. Of the 95 persons who served on this project, 30 have been affiliated with pro-Communist fronts, projects, and publications.

Another foolish remark often heard is that Americans have a right to know what's going on. Most people realize the foolhardiness of such a suggestion. Rather keep in mind that public news media present only as much information as the Government wants to release.

Keep an eye open at all times for suspicious activities, actual, or implied. Don't hesitate to report incidents to the air police, no matter how trivial they may seem. Be especially watchful for persons who are trying to undermine the Air Force by belittling or sneering at its policies and accomplishments.

As for this last admonition, I want to advise my fellow members to be very careful in the future that they do not seek to cut the Air Force budget or belittle its training manuals.

Most of these statements need no answer, at all, I think. Their very absurdity and antidemocratic tone condemn them out of hand. The National Council of Churches of Christ in the United States has eloquently answered the defamatory charges made against it and I therefore simply place in the RECORD that answer in the form of a letter addressed to me by the Reverend Roy G. Ross, general secretary of the council:

NATIONAL COUNCIL OF THE
CHURCHES OF CHRIST IN THE U.S.A.,
New York N.Y., March 22, 1960.

Hon. JAMES ROOSEVELT,
House of Representatives,
House Office Building,
Washington, D.C.

MY DEAR CONGRESSMAN: The prompt action taken by the Secretary of the Air Force closes its training manuals to infiltration by propaganda against churches and religious institutions. However, the appearance of such defamatory matter in Government publications heavily underscores the extreme dangers to the American principles of freedom. The dangers lie in the lending or employment of governmental power or media, at any official level, to induce or coerce regimentation of expression or to make some pattern of civic thought or religious opinion a test of loyalty, or to equate concern for the rights of men with infidelity to the American ideal.

The National Council of the Churches of Christ in the United States and its constituent communions are and always have been unalterably opposed to communism. Its unqualified conviction was expressed in the council's policy statement of May 19, 1953, that:

"No body of people is more concerned to combat communism than the church groups of our country" and "these churches are the greatest bulwarks of freedom in the United States."

Such conviction was reasserted in the recent resolution of the council's general board adopted last June—"reaffirming the consistent position of the National Council of Churches expressed in many official actions opposing the evils, the violation of human rights by Communist and other tyrannies."

For the very reason that the National Council of Churches and its constituent communions hold this unalterable and consistent opposition to communism in any part of the world, the council, with equal determination, also opposes and condemns—and will continue to oppose and condemn—all efforts, official or private, subtle or overt, intended or otherwise, to use agencies of any branch of Government or media of mass communication under Government regulation to defame church institutions or leaders, to subject church loyalty to the poison of innuendo, to differentiate between religious groups in point of patriotism, and thus to undermine religion itself, the centuries-old nature of the American people as a religious people, and the essential unity of our Nation in its life and freedom.

Such efforts and practices not only are a patent violation of the free exercise of religion as guaranteed by the first amendment to the Constitution of the United States, but also are violations of that amendment's guarantees of freedom of expression and opinion and of every citizen's right to discuss openly and without fear the practices and policies of his Government. They set a pattern which is profoundly un-American and which, unless opposed and checked, can inculcate familiar totalitarian methods for manipulating the people's mind.

The very purpose of the Bill of Rights was to secure religious liberty and those associated liberties from the invasion of civil authority, and to place them beyond the reach of political or official control, or of private malevolence insinuating itself into media operating under Government sanction.

Precisely because of the national council's unalterable loyalty to these American constitutional principles, it insists not only on the right but also on the duty of the churches and of religious communions and their members to study and comment upon issues, whether political, economic, or social, which affect human relations, the dignity of the individual, and the right of all men everywhere to liberty under law and justice.

To serve these noble and thoroughly democratic and American ends, the national council conducts itself as the cooperative medium through which 33 Protestant and Orthodox communions in the United States focus the light of the Christian faith on all phases of American life and American concern. That it may so serve fully and loyally, the national council will continue to oppose not only communism and any other form of tyranny over the mind of man, but also all efforts public or private, to subject the churches of America and their representatives to any ordeal or suspicion, innuendo, and hysteria.

Sincerely yours,

ROY G. ROSS,
General Secretary.

APPENDIX A

We, the duly elected and authorized representatives of denominations, as indicated, fully and wholeheartedly endorse and support the statement of policy of the National Council of Churches of Christ in the U.S.A. as set forth in the attached letter dated March 22, 1960, by Roy G. Ross, general secretary, National Council of Churches of Christ in the U.S.A.:

Norman J. Baugher, Church of the Brethren; Zoltan Becky, Hungarian Reformed Church in America; Eugene Carson Blake, Presbyterian Church in the U.S.A.; Archbishop Bokdan, the most reverend metropolitan, Ukrainian Orthodox Church of America; Gaines M. Cook, Disciples of Christ; Charles J. Darlington, Philadelphia Yearly Meeting of the Religious Society of Friends; Franklin Clark Fry, United Lutheran Church in America; Most Rev. Leon Grochowski, Polish National Catholic Church of America; Kenneth G. Hamilton, Moravian Church; James E. Hoffman, Reformed Church in America; Fred Hoskins, general council, Congregational Christian; Archbishop Iakovos, Greek Orthodox Church of North and South America; J. H. Jackson, National Baptist Convention, U.S.A., Inc.: Alfred Jensen, American Evangelical Lutheran Church; Arthur Lichtenberger, Protestant Episcopal; James A. Millard, Jr., Presbyterian Church in the United States; Reuben H. Mueller, Evangelical United Brethren; Glenn A. Reece, Five Years Meeting of Friends; Roy H. Short, Methodist; Sion Archbishop, Primate of the Diocese of the Armenian Church of America; B. Julian Smith, Christian Methodist Episcopal; Edwin H. Tuller, American Baptist Convention; James E. Wagner, United Church of Christ Evangelical and Reformed; W. J. Walls, African Methodist Episcopal Zion.

But I ask you to observe how the Committee on Un-American Activities responded to the indignation which this appalling manual aroused throughout the country. With renewed energy the knights donned their armor and rode forth to meet the enemy. Who was the enemy? Why, the Secretary of the Air Force, himself, who had already ordered the manual withdrawn and had categorically repudiated the views expressed in it.

After a closed session in the committee room, the knights emerged proclaiming themselves the victors. The Secretary had been put in full flight, so the committee said. Others have spoken on this matter at length. I care not whether the trumpets are certain or not. It seems to me that two other points are more basic.

First of all, if any committee of the House had jurisdiction to investigate the withdrawal of the manual, it was surely not our band of knights, but rather the standing Committee on the Armed Services, whose Special Subcommittee on Utilization of Manpower did in fact look into the matter and which will conduct a broader inquiry on military manuals. This is squarely within the jurisdiction of the Armed Services Committee, no other. But the Un-American Activities Committee just does not know or will not recognize the limits of its jurisdiction. In its endless quest for attention and for more dragons to

kill, it simply disregards the limits which our rules impose on its operations.

Second, and more important, the Air Force manual clearly had to be withdrawn because it violated an elemental tenet of our constitutional system, the separation of church and state. Surely it is basic that the Government cannot use its immense power and prestige to advise the churchgoers of this Nation which of their religious leaders deserve their support or merit their disapproval. This is pure and simple state interference in religion, a thinly disguised effort to oversee the character of the clergy of this country.

So the second point is that the committee undertook to justify and even promote these unconstitutional incursions by getting the Secretary of the Air Force to reconsider his withdrawal of the manual. Whether the manual has factual basis or not, it should not be a publication of the U.S. Government. The committee's disregard for this basic point reflects adversely and seriously on this entire House.

These recent examples of the committee's misuse of the power which we have delegated to it could be multiplied, of course; but year in, year out, the committee acts much the same way. Certainly as elected representatives of the Nation we cannot go on blinking at the nature of the committee and its operations; by ignoring it we simply default to its viciousness.

Surely, too, I was wrong last year in pinning too many of my hopes on the then-pending Barenblatt case. However I may feel about the legal issues decided in that case, I do admit that we should not depend on the Supreme Court to save us from our own bad inventions. The Committee on Un-American Activities is a national problem to be sure. But it is, most clearly of all, a problem of this body, and it is well past the time when we should have faced squarely up to it.

The committee indicts itself by its very conduct, and the indictment is an unavoidably grave one. These, I submit, are the unanswerable counts against the committee in ascending order of seriousness:

First of all, it spends large amounts of needed time, energy, and money in ponderously investigating and restating the obvious. It seems to have an inherent affinity for absurdities and truisms.

Second, however, it combines with this a contrasting inability to understand the very real complexities of human behavior, or even to try to do so. Its world is one of black and white moral judgments on matters of immense intricacy and great shadings. Typically, last year it criticized the inclusion of certain paintings in our Moscow exposition because of the politics of the artists. The merit of the works was disregarded.

Third, as this last example and the Air Force manual controversy both illustrate, the committee has repeatedly shown its inability to stick to its own business. It seems to have an uncontrollable tendency to encroach upon the jurisdiction of our other committees and of other governmental agencies including the police, the Justice Department, and the courts.

Fourth, the committee has no real usefulness or justification. It is not the bulwark of this country nor any real agency in its defense against malevolent forces. The various police and counter-espionage agencies in reality do what the committee merely claims to do in guarding this country against internal danger. It is partly for that reason and partly for political reasons that the committee tends to stray over into other fields.

But in point of fact, we never committed this police work to it, and that leads me to the fifth and sixth defects of the committee.

Fifth, despite the existence of the police and prosecuting agencies of the United States and their effectiveness, the committee has undertaken to constitute itself as a roving police and prosecuting agency to haul persons and groups before it, accuse them and force them either to answer under oath or claim their constitutional protections. Yet it acts with the aid of immunities and powers which we would not dream of granting our police and public prosecutors.

Sixth, the committee also acts as a court, for it judges those who come before it. Yet, again it is not subject to the restraints of fairness and impartiality which we impose upon our judiciary.

Seventh, the mandate which we did in fact give the committee is itself defective and inherently contrary to our democratic traditions. How did we come to establish a committee to decide what was "un-American," forsooth, and still worse, how did we persuade ourselves that propaganda, speech, was a fit subject for regulation by inquisitional techniques such as the committee employs. To me, the very nature of that commission is at war with our profoundest principles, and it cannot help but be executed in a manner destructive of those principles. We have, in effect, created and empowered an agency to supervise the exercise of first amendment rights, an organ for censorship and suppression.

Finally, then we come to what I think is the most serious criticism of the committee, the fact that it has become an agency for the destruction of human dignity and constitutional rights. On this subject volumes have been written, especially concerning the committee's contempt for the legal rights of its victims. We have become accustomed to think of those whom it subpenas or labels as victims rather than witnesses. Endlessly they are dragooned before the committee and accused. Secret sources, arrogance, rudeness, minimized defamation, and the threat of prosecution either for perjury or contempt if they do not seek the refuge of silence are the constant ingredients of this degrading spectacle. Beyond this the committee is sanctimoniously cruel. Those who would answer the charges against themselves are forced to accuse others and become the agents of further havoc.

Mr. Speaker, it is, I think, a monstrous thing that we have created such an institution and lent it our powers and prestige. But we can also end this terrible agency and take back our powers. The Supreme Court has upheld the bare legality of what we have done in creating the Committee on Un-American Activities. However, that is not the sole test for this Congress. It did not say that we were under a duty to continue it. We have no mandate to abuse the rights and feelings of our citizens, nor are we obligated to profane ourselves in the eyes of the rest of the world. Nor should we be too proud to recognize that we have made a mistake and too long subsidized a wrong to the Nation.

The issues, then, are very clear. I invite the committee's defenders to speak to them and not to repeat last year's performance of answering reason with vilification. I recognize their disadvantage, because in fact the essence of the committee's work is itself name-calling. I am convinced that the level of last year's response was merely an accurate, if unpleasant, reflection of the committee's activities, merely another symptom of the same cancer.

I urge the rest of my colleagues to give this matter serious thought and to speak of it when they return to their constituencies this summer. I think we need only break that spell of anxiety to find wide support for the abolition of this thoroughly bad institution. Then those who return here next January can complete this imperative task which is the business of this House alone. We would then be acting in the service of our best traditions. Let us set our House aright.

NATIONAL FUELS POLICY COMMITTEE

The SPEAKER pro tempore. (Mr. JOHNSON of Colorado). Under previous order of the House, the gentleman from West Virginia [Mr. BAILEY] is recognized for 10 minutes.

Mr. BAILEY. Mr. Speaker, the economic plight of West Virginia and other domestic fuels producing areas in the Nation is the result of inequitable marketing practices and policies which this Nation is following, and there is serious need for the establishment of a sound national fuels policy to alleviate it, Thomas Kennedy, president of the United Mine Workers of America and member of the executive committee of the National Coal Policy Conference, declared on Friday last.

The current political activity in the State of West Virginia is drawing national attention to that State and to the economic problems of thousands of its people, Mr. Kennedy declared in a statement. Many reporters have written stories which are being published throughout the country depicting the deplorable and pitiable condition of American citizens who are actually on the verge of starvation, with little hope for future betterment, unless their fellow Americans wake up and correct certain policies which have brought them to this condition.

Mr. Kennedy called on each candidate for public office, including those running for the Presidency, as well as for Congress and governorship, to give careful

attention to the problems facing our greatest natural resource, and to make public his support of efforts leading toward the establishment of a national fuels policy for the benefit of America.

It is true that formulation of such a policy will take time, and it will take even longer to see its concrete benefits to the domestic fuels industries. I strongly believe that additional temporary emergency legislation is needed to alleviate the suffering of thousands of persons in the depressed areas of West Virginia and other States. In the long run, however, these people must be really helped by being given an opportunity to work and make their contribution to the Nation and its welfare.

Mr. Kennedy pointed out that mechanization of the mines, which was necessary if the coal industry was to remain competitive and stay in existence, has taken away some jobs in the coal areas, but he said the principal blame for present unemployment rests with certain national policies which are not only hurting domestic fuels industries but also posing a threat to national security.

Among these, he cited the wasteful and inefficient dumping of natural gas for steam boiler use, at below cost prices, and the continuing increase in residual oil imports.

Mr. SLACK. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield.

Mr. SLACK. Mr. Speaker, I wish to take this opportunity to compliment my distinguished colleague, the gentleman from West Virginia, on his excellent and very informative statement. I associate myself with his remarks.

Mr. Speaker, I ask unanimous consent that my own remarks be inserted in the RECORD at a point immediately following those of Mr. BAILEY.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

Mr. BAILEY. Mr. Speaker, I ask unanimous consent to include herewith the statement of Mr. Thomas Kennedy of the National Coal Policy Conference and president of the United Mineworkers of America.

The SPEAKER. Is there objection?

There was no objection.

The statement is as follows:

STATEMENT ISSUED FRIDAY LAST BY MR. THOMAS KENNEDY, MEMBER OF THE EXECUTIVE COMMITTEE OF THE NATIONAL COAL POLICY COFERENCE, INC., AND PRESIDENT OF THE UNITED MINE WORKERS OF AMERICA

The current political activity in the State of West Virginia is drawing national attention to that State and to the economic problems of thousands of its people. Many reporters have written stories which are being published throughout the country depicting the deplorable and pitiable condition of American citizens who are actually on the verge of starvation, with little hope for future betterment, unless their fellow Americans wake up and correct certain policies which have brought them to this condition.

Regardless of the outcome of the present political primary in West Virginia, it will have served a great purpose if it results in greater public awareness of what certain of our national policies are causing among our own citizens, and the danger they are posing to our national security.

Most of the economic problems of West Virginia citizens are caused by the depressed state of the American coal industry. Although coal is our most dependable and most unlimited natural fuel, and will doubtedly have to supply the great part of our power and fuel needs in the generations to come, production today is about 35 percent less than it was during the peak demand of the war years.

Employment has followed the production-demand trend. Mechanization, which was required if coal was to remain competitive and continue as a factor in the fuels picture of recent years, has accounted for some of the employment decrease, of course. This was inevitable, and the coal industry and the United Mine Workers of America can take pride in the fact that, through mechanization which has almost doubled productivity of each miner, the price of coal has been held to even less at the mine head today than it was 10 years ago.

But mechanization is not the basic answers to the reason thousands of American citizens in West Virginia and other coal States are out of work.

Most important, America today has no real national policy on the most beneficial utilization and proper conservation of its great natural domestic fuel resources, and instead often follows policies which are detrimental—and even disastrous—to the industries producing and transporting them. In this regard, we are alone among the great producing nations. Soviet Russia, Canada, Great Britain, the countries of the European coal-steel community and the Scandinavian countries have all realized the importance of a national policy to guide the wise use and conservation of their domestic energy fuels resources.

As a result of such a lack of guidance policy, several current marketing practices seriously impair the domestic coal industry. One is the onslaught on our fuels markets by the international oil companies importing vast amounts of cheap foreign oil, which is destroying domestic fuel industries, and another is the unrealistic and wasteful practices in the marketing of America's limited natural gas resources.

Despite the fact that in 1957 the President found that imports of petroleum products, including residual fuel oil (a heavy, slow-burning product suitable only for use under large steam boilers), had reached such proportions as to constitute a threat to the domestic fuels industries and thus to national security, and an oil import control program was instituted, this "waste" residual fuel is now coming into our Atlantic ports at a greater rate than ever. The original base level for permissible imports—the 1957 average—has thrice been abrogated by the Department of the Interior, and residual today is being imported at the rate of 43 million tons of coal equivalent per year.

Forty-three million tons of domestic coal production would mean 20,000 jobs for American coal mine workers, employment for thousands of others directly and indirectly dependent on coal production and transportation, plus untold millions of dollars flowing into the tills of merchants and the tax coffers of school districts and State and local governments in American coal-producing areas each year. Add to this the millions more that would come to the Federal Government in increased personal income and corporation tax payments, and we begin to have some idea of what excessive residual oil imports cost our Nation.

Instead, in West Virginia, as an example, coal production has declined 47 million tons since 1948, about the time residual imports began to make their serious inroads, and coal mine employment in the State has been cut almost in half. Loss of jobs on the railroads who haul most of our domestic coal and in the thousands of businesses directly and indirectly dependent on the coal industry in West Virginia, as well as the other major coal States, must be added to these totals.

Coal, of course, is not the only victim of the great tidal wave of imports of cheap foreign petroleum, imports which would be cut off almost instantaneously in case of war. The domestic oil industry is likewise being put in a critical position, and its dependability as a bulwark of national defense is seriously threatened.

On April 14, the president of the Independent Petroleum Association of America warned that rising costs and dropping prices, brought about by the world oversupply of petroleum, has caught domestic oil producers in a squeeze and that exploration and drilling for new sources of supply in this country are falling off sharply. This is also a threat to our national security, since in case of an emergency we can only depend on our own internal source of coal, oil, and gas for our power and fuel needs.

A second important factor contributing to coal's present condition and to unemployment throughout West Virginia and other coal States is the wasteful practice of "dumping" natural gas at below cost for use under steam boilers. This results from the desire of the big pipeline operators to maintain a steady full flow of gas from the wells to consuming areas, even during seasons of lessened demand for normal heating purposes. This loss is usually made up by higher prices to household consumers.

Industrial use of gas in America has more than doubled since 1945. Of course, much of this industrial consumption is proper and desirable, and the coal industry has no quarrel with it. However, with natural gas as essential as it is to our Nation's industrial future and in limited supply, it is inexcusable to waste it by such price-cutting, under-cost sales to the further damage of another essential fuel.

We are not alone in protesting this practice. In his dissenting opinion when the Federal Power Commission recently approved Midwestern Gas Transmission's entry into the Chicago fuels market, Commissioner Arthur Kline declared that, because the company would be selling gas to industrial consumers on an interruptible basis (dumping practice), household consumers of the Chicago area would have to "pay for the entire cost of building the pipeline into Chicago." He added that the householder must also "pay all operating expenses, not only for his gas, but for the gas used by industrial consumers, must bear all line losses of gas and must also pay 16 cents (for every) Mcf of gas used by the industrial consumer."

While this interruptible gas sold at dumped prices is but a small fraction of the total gas used in this Nation, it nevertheless represents a sizable and unfair competition with coal, and contributes substantially to the depressed condition of such States as West Virginia.

These are but two examples of practices which seriously threaten the strength and economic health of our great essential domestic fuels industries. They offer strong support to the fact that America badly needs a sound national fuels policy to insure that the Nation as a whole is deriving the greatest benefit from our great natural resources, that our domestic coal, gas, and petroleum industries will remain strong and economically healthy.

The members of the National Coal Policy Conference, which is composed of the United Mine Workers of America, coal producers, leading coal-carrying railroads, utilities, and mine equipment producers, are strongly behind the formation of such a policy. A concurrent resolution to set up a

congressional study of the need for a national fuels policy is now in committee of both Houses of Congress, and we sincerely hope that it will receive favorable action during this session.

It is true that formulation of such a policy will take time, and it will take even longer to see its concrete benefits to the domestic fuels industries. Thus, I strongly believe that additional temporary emergency legislation is needed to alleviate the suffering of thousands of persons in the depressed areas of West Virginia and other States. In the long run, however, these people must be really helped by being given an opportunity to work to earn a decent living and to make their contribution to the Nation and its welfare.

Establishment of a national fuels policy, together with the correction of some of the inequitable marketing practices I have mentioned, would go far toward achieving this goal in West Virginia and other domestic fuels areas whch are now attracting the attention of the Nation.

The plight of these American citizens is far more than a political question, but what is to be done about it is certainly a pertinent one to the whole Nation.

We, of the National Coal Policy Conference, invite careful attention to this problem facing our greatest natural resource by all candidates for public office, including those running for the Presidency, as well as for Congress and governorships. We hope each will fully inform himself on the facts, and will find it possible to make public his support of efforts leading toward the establishment of a national fuels policy for the benefit of America.

AREA REDEVELOPMENT LEGISLATION

Mr. SLACK. Mr. Speaker, last week we were advised that the door has been officially closed to any consideration of area redevelopment legislation at this session. Neither the Senate-passed bill nor the several House measures are to be permitted to come before us for an expression of our will.

This effectively shuts off any hope for improvement in the circumstances of 240,000 persons in my native State of West Virginia during the foreseeable future. The conditions in which they live and the reasons for those conditions, have been fully described by my colleagues. I know the House is informed of the facts so it would not be possible for me to discuss the failure to act in the temperate and reasoned language which should be used in this Chamber.

On many occasions evidence has been laid before us which indicates that most of the sections of this country which have great need of area redevelopment are sections in which mining is the predominant industry. The decline in job opportunity in the mining industry because of increased mechanization, combined with developments affecting coal market prospects have produced the pools of chronic unemployment which have often been called to your attention.

Since one door through which assistance might have come has been slammed in the face of these unemployed, I address the House today to remind you that there is another proposal being held in abeyance which might be translated into action providing some hope for the miners' children. I refer to some 20 or more resolutions filed last August which call for the establishment of a national fuels policy.

Preliminary evidence indicates that the mining industry will be able to provide its proper share of employment if coal receives fair and equitable treatment in relation to other fuels at the several levels of our economy. There are also questions of national defense and preparation for future population expansion involved in the proposal.

The suggestions contained in these resolutions are simple enough—to inventory the available fuel resources of the United States, and then to formulate a national fuels policy to assure the availability of fuels in quantities sufficient for our expanding economy and our security needs. This year we are spending millions to count our population and to obtain certain additional information about the economic and social status and prospects of our people. This is a good year to begin also the process of ascertaining what fuels they may expect to have available to maintain and improve our standard of living.

Since the resolutions previously mentioned have failed to receive proper consideration during the past 9 months, many of us have begun to wonder whether or not there is an organized reluctance to get the facts on the record. Those of you who represent the great metropolitan areas should be vitally concerned with the adoption of a national fuels policy. The populations of the great cities must have a reliable source of light and heat, available at a reasonable price, and in quantities not subject to manipulation by non-American interests.

I ask you to remember one thing—of all the great primary fuels with which nature has endowed us, coal alone has no odor—in its production, processing, marketing, or distribution. It was the first of the fuels to power our economy, and will yet one day provide us with the safety margin to fend off disaster. I suggest then that we get on with the job of inventorying our fuel resources. It is a job we cannot avoid forever; inevitably it must be done as our population growth and economic expansion create growing demands for more power throughout this Nation.

Immediate consideration of the resolutions calling for a national fuels inventory and a national fuels policy will provide a large plus mark on the record of this Congress to partly balance the failure to legislate an area redevelopment program, and will at the same time set in motion an order of events which must inevitably add necessary knowledge to the sum total required for our future national planning.

I commend these resolutions to your sympathetic attention.

THE LATE ELIJAH WILLIAM "BILL" CUNNINGHAM

Mr. GRIFFIN. Mr. Speaker, I ask unanimous consent that the gentleman from Massachusetts [Mr. CONTE] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. CONTE. Mr. Speaker, I rise with sadness to address this distinguished body in tribute to Elijah William "Bill" Cunningham, an outstanding American whose death is an irreplacable loss to the profession of journalism, the world of sport, and to all those who knew him.

His passing is of particular feeling to me because of my personal association which began when I was a fledgling collegiate football player in 1945, and which continued throughout the 8 years I served as a State senator.

As an athlete who participated in some of the gridiron contests he covered, I can attest to his skill in analyzing the complexities of play; however, even more important was his humane understanding of the foibles, feelings, and spirits of those who were engaged.

Members of the journalistic profession and those in the world of sport unanimously agree to his brilliance and high standing among our contemporary sportswriters.

His style of writing exemplified the keenness of mind and warmth of human understanding which he poured into his prose.

Bill Cunningham was a native of Blossom Prairie, Pattonville, Tex. He attended Dartmouth College where he displayed not only brilliance in study but a versatility in music as well. With the outbreak of World War I he enlisted as a private in the Army and, like everything he did, his attention was directed to soldierly duties which, after 23 months in France, earned him a commission and a citation in orders.

He returned to school, after the war, finished his studies, played football, and earned a Rhodes scholarship; however, he declined the honor and entered the newspaper profession.

While a reporter for the Dallas Morning News, he played a prominent part in that paper's battle against the Ku Klux Klan. Along with his newspaper work, he coached the Southern Methodist football team.

In 1922 he was offered a newspaper job in Boston and, from that time, lived in that city; Massachusetts' gain was Texas' loss.

By no means were his journalistic talents restricted to sports. His incisive mind ranged over the broad spectrum of subjects. His stories from Europe at the end of World War II were nominated for a Pulitzer Prize.

The honors and awards accorded him were many; yet, throughout his outstanding career, he never deviated from the virtues of sincerity, integrity, humane understanding, and high professional criteria. Even to the last, despite crippling cancer, his work was the prime motivation for his life. His last request to his newspaper on his last night of work: "Don't say I'm sick. Say I am on vacation."

Indeed the life of Bill Cunningham was an example of those characteristics in which we in America take pride. His

work will remain as the one monument I am sure he would approve.

To those untold many who mourn his passing, to his family, my profound sympathies and heartfelt condolences in the memory of a great man and a good friend.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. O'BRIEN of New York (at the request of Mr. ASPINALL), for April 25, 26, and 27, 1960, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. SCHERER, for Thursday next, for 1 hour and 30 minutes.

Mr. BAILEY, for 15 minutes, tomorrow.

Mr. POWELL (at the request of Mr. MEYER), on Wednesday and Thursday next, for 1 hour each.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. SMITH of Kansas and to include an editorial.

Mr. CRAMER.

Mr. ALGER.

Mr. SAYLOR.

Mr. REES of Kansas and to include extraneous matter.

(The following Members (at the request of Mr. GRIFFIN) were granted permission to extend their remarks in the RECORD and include extraneous matter:)

(The following Members (at the request of Mr. MEYER) were granted permission to extend their remarks in the CONGRESSIONAL RECORD and include extraneous matter:)

Mr. BOWLES.

Mr. WOLF in one instance and to include a newspaper article in his remarks on President de Gaulle.

SENATE ENROLLED JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled joint resolution of the Senate of the following title:

S.J. Res. 150. Joint resolution permitting the Secretary of the Interior to continue to deliver water to lands in the Third Division, Riverton Federal reclamation project, Wyoming.

ADJOURNMENT

Mr. MEYER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 13 minutes p.m.) the House adjourned until tomorrow, Tuesday, April 26, 1960, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2082. A letter from the Administrator, General Services Administration, transmitting a draft of proposed legislation entitled "A bill to repeal the act of May 29, 1958, which authorized and directed the Administrator of General Services to provide for the release of restrictions and reservations contained in an instrument conveying certain land by the United States to the State of Wisconsin"; to the Committee on Armed Services.

2083. A letter from the Secretary of the Treasury, transmitting copies of the quarterly report on the Reconstruction Finance Corporation Liquidation Fund-Treasury Department Activities for the period ended March 31, 1960, pursuant to the Reconstruction Finance Corporation Liquidation Act, as amended (67 Stat. 230), and Reorganization Plan No. 1 of 1957 (22 F.R. 4633); to the Committee on Banking and Currency.

2084. A letter from the Comptroller General of the United States, transmitting a report on the audit of the Theodore Roosevelt Centennial Commission (the Commission was in existence from July 28, 1955, through October 27, 1959); to the Committee on Government Operations.

2085. A letter from the Assistant Secretary of the Interior, transmitting copies of certain laws enacted by the Legislature of the Virgin Islands in its 1958 regular and special sessions, pursuant to section 9(g) of the Revised Organic Act of the Virgin Islands of the United States; to the Committee on Interior and Insular Affairs.

2086. A communication from the President of the United States, transmitting amendments to the budget for the fiscal year 1961 involving an increase in the amount of $524,340 for the legislative branch (H. Doc. No. 382); to the Committee on Appropriations and ordered to be printed.

2087. A letter from the Director, District Unemployment Compensation Board, Government of the District of Columbia, transmitting the 24th Annual Report of the District Unemployment Compensation Board for the calendar year 1959, pursuant to the District of Columbia Unemployment Compensation Act; to the Committee on the District of Columbia.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ROGERS of Texas: Committee on Interior and Insular Affairs. H.R. 10513. A bill granting the consent of Congress to the States of Kansas and Nebraska to negotiate and enter into a compact relating to the apportionment of the waters of the Big Blue River and its tributaries as they affect such States; with amendment (Rept. No. 1550). Referred to the Committee of the Whole House on the State of the Union.

Mr. COOLEY: Committee on Agriculture. H.R. 10572. A bill to authorize and direct that the national forests be managed under principles of multiple use and to produce a sustained yield of products and services, and for other purposes; with amendment (Rept. No. 1551). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ABERNETHY:

H.R. 11884. A bill to readjust postal rates, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. BAKER:

H.R. 11885. A bill to amend chapter 19 of title 38, United States Code, to provide that national service life insurance and U.S. Government life insurance shall be paid up upon the attainment by the insured of age 65; to the Committee on Veterans' Affairs.

By Mr. BROOKS of Louisiana:

H.R. 11886. A bill to amend sections 4083, 4082, and 6416 of the Internal Revenue Code of 1954 to exempt certain sales of gasoline for nonfuel purposes from tax and for other purposes; to the Committee on Ways and Means.

By Mr. CELLER:

H.R. 11887. A bill to amend chapter 35 of title 18, United States Code, with respect to the escape or attempted escape of juvenile delinquents; to the Committee on the Judiciary.

By Mr. COHELAN:

H.R. 11888. A bill to authorize additional social security coverage for certain employees of Alameda County, Calif., who were formerly city employees, so as to afford them the same coverage as is available to other employees of such county; to the Committee on Ways and Means.

By Mr. CRAMER:

H.R. 11889. A bill to amend section 1073 of title 18, United States Code, the Fugitive Felon Act; to the Committee on the Judiciary.

H.R. 11890. A bill to amend title 18 of the United States Code to prevent, through the imposition of criminal sanctions, the interstate transmission of gambling information; to the Committee on the Judiciary.

By Mr. DIXON:

H.R. 11891. A bill to amend and extend the provisions of the Sugar Act of 1948, as amended; to the Committee on Agriculture.

By Mr. FOLEY:

H.R. 11892. A bill for the relief of the city of Frederick, Md.; to the Committee on the Judiciary.

By Mr. GIAIMO:

H.R. 11893. A bill to amend title II of the Vocational Education Act of 1946, relating to practical nurse training, and for other purposes; to the Committee on Education and Labor.

By Mr. HARMON:

H.R. 11894. A bill to amend the Soil Bank Act, as amended, and the Agricultural Act of 1956, as amended; to the Committee on Agriculture.

H.R. 11895. A bill to help restore the balance between the production of and the market demand for wheat, and for other purposes; to the Committee on Agriculture.

By Mr. HOEVEN:

H.R. 11896. A bill to extend and expand the conservation reserve program, to authorize the use of payments in kind, and for other purposes; to the Committee on Agriculture.

By Mr. McCULLOCH:

H.R. 11897. A bill to amend section 1073 of title 18, United States Code, the Fugitive Felon Act; to the Committee on the Judiciary.

By Mr. GEORGE P. MILLER:

H.R. 11898. A bill to authorize additional social security coverage for certain employees of Alameda County, Calif., who were formerly city employees, so as to afford them the same coverage as is available to other employees of such county; to the Committee on Ways and Means.

By Mr. MOORE:

H.R. 11899. A bill to provide for the acquisition by the Secretary of the Army of certain real property to be used for the expansion of the national cemetery at Grafton, W. Va.; to the Committee on Interior and Insular Affairs.

By Mr. RABAUT:

H.R. 11900. A bill to amend section 541 of title 38, United States Code, to provide for the payment of pension to the widows of certain veterans in receipt of pension at the time of their death; to the Committee on Veterans' Affairs.

By Mr. THORNBERRY:

H.R. 11901. A bill to cancel a deed of trust and note and to quiet title with respect to property belonging to Gallaudet College; to the Committee on Education and Labor.

By Mr. BROOKS of Louisiana:

H.J. Res. 695. Joint resolution to provide for the designation of June 4, 1960, as Louisiana State University Centennial Day; to the Committee on the Judiciary.

By Mr. McCORMACK:

H.J. Res. 696. Joint resolution to provide for the designation of the month of September 1960, as "National Wool Month"; to the Committee on the Judiciary.

By Mr. MARTIN:

H.J. Res. 697. Joint resolution designating the month of September 1960 as "National Wool Month"; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CELLER:

H.R. 11902. A bill for the relief of Dr. Sassan Shahmanesh; to the Committee on the Judiciary.

By Mr. COHELAN:

H.R. 11903. A bill for the relief of Ricardo and Carmelita Jaranilla; to the Committee on the Judiciary.

By Mr. DANIELS:

H.R. 11904. A bill for the relief of Mrs. Elizabeth Erny; to the Committee on the Judiciary.

By Mr. FOLEY:

H.R. 11905. A bill for the relief of the estates of certain former members of the U.S. Navy Band; to the Committee on the Judiciary.

By Mr. HALPERN:

H.R. 11906. A bill for the relief of Dr. Maria C. Zografidou; to the Committee on the Judiciary.

By Mr. KILBURN:

H.R. 11907. A bill to admit the vessels *Fort Town, Maple City,* and *Windmill Point* to American registry and to permit their use in the coastwise trade; to the Committee on Merchant Marine and Fisheries.

By Mr. McDOWELL:

H.R. 11908. A bill for the relief of Mrs. Austra Viksne and her minor children, Inta Viksne and Vilms Viksne; to the Committee on the Judiciary.

By Mr. POWELL:

H.R. 11909. A bill for the relief of Sonia Maria Smith; to the Committee on the Judiciary.

By Mr. TEAGUE of California:

H.R. 11910. A bill for the relief of Vito Antonino, Mattia Caterina, and Giuseppe Leo; to the Committee on Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

435. By the SPEAKER: Petition of Miss Corda C. Cox, Springfield, Mo., relative to submitting an addendum to a petition recorded as No. 419, dated April 14, which related to a citizen's urgency appeal and petition for protection and constitutional rights to face accusers; to the Committee on the Judiciary.

436. Also, petition of Ronald J. Verlander, president New Orleans Junior Chamber of Commerce, New Orleans, La., requesting that the Forand bill, H.R. 4700, be rejected by the House Ways and Means Committee, as not being in the public interest; to the Committee on Ways and Means.

EXTENSIONS OF REMARKS

Report Against Best Interests of Government

EXTENSION OF REMARKS
OF
HON. E. L. BARTLETT
OF ALASKA
IN THE SENATE OF THE UNITED STATES
Monday, April 25, 1960

Mr. BARTLETT. Mr. President, on February 9, 1960, I introduced, for myself and the junior Senator from Alaska [Mr. GRUENING] a bill amending the act of March 3, 1933, the Intercoastal Shipping Act. Our bill, S. 3005, has been passed by the Senate. It would allow the Federal Maritime Board to suspend proposed increased tariffs for 7 months. The 7-month period corresponds to the period of suspension which the Interstate Commerce Commission may enforce under paragraph 7, section 15, of title 49, United States Code. Under existing law the Federal Maritime Board can suspend proposed increased freight tariffs for 4 months only.

In a letter dated April 13, 1960, to the chairman of the Interstate and Foreign Commerce Committee, the General Services Administrator said this about S. 3005:

> As you know, it is the statutory duty of the General Services Administrator to represent executive agencies as users of transportation services in negotiations and in regulatory proceedings.
>
> We are advised that this legislation is opposed by the Department of Commerce and other agencies which are concerned with the broad aspects of national transportation policy. We defer to their views in those areas in which GSA is not directly involved, although the additional 3 months' suspension authorized by the bill would be beneficial to the Government as a shipper.

It does not surprise me, Mr. President, that passage of S. 3005 by Congress will benefit the Government as a shipper. It does surprise me, however, that S. 3005 would be opposed by the Department of Commerce, of which the Federal Maritime Board is a part. In its recent action allowing higher freight rates in the Alaska trade before hearings and refusing to suspend new tariffs in the Alaska trade, the Board stated that the period of 4 months—the length of time by which tariffs may be suspended by the Board—was too brief to allow adequate consideration of the tariff schedules. S. 3005 was introduced to remedy the situation of which the Federal Maritime Board complained. The authority to suspend rates for 7 months would be permissive and not compulsory.

The suggestion in the General Services Administrator's letter of April 13 is the first inkling that the Department of Commerce does not favor enactment of S. 3005. The Committee on Interstate and Foreign Commerce has received reports from the Department of Defense, the General Accounting Office, the Department of Agriculture, and the General Services Administration regarding the bill. The Department of Commerce, however, has not voiced the opposition attributed to it by the General Services Administrator.

I recently addressed the Senate regarding the action of the Federal Maritime Board in suspending the proposed rate increase in the Guam trade. I applauded the suspension order delaying the imposition of proposed rate increases until hearings were held. This is the kind of procedure which we Alaskans would have appreciated when the carriers in the Alaska trade proposed the rate increases which became effective in January of this year. I noted today, Mr. President, that the Federal Maritime Board has suspended proposed rate increases in the Pacific coast-Puerto Rico trade, pending investigation. I wish to take this opportunity to praise procedures under which the Board holds hearings before allowing rate increases to be imposed. Although these procedures were not followed in the Alaska case, it is gratifying to note their acceptance by the Board in the Guam case and in the Pacific coast-Puerto Rico case.

Anticrime Bill

EXTENSION OF REMARKS
OF
HON. WILLIAM C. CRAMER
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES
Monday, April 25, 1960

Mr. CRAMER. Mr. Speaker, with reference to the anticrime bill I have just introduced, my proposal would level a two-pronged attack on national gambling operations.

Phase one would require professional gamblers, applying for wire or radio communication facilities, to file affidavits that they had not transmitted or received in the 12-month period preceding such application, nor would not

transmit or receive, gambling information, as defined in my bill, in interstate or foreign commerce, during the period such communication facilities are furnished. Severe penalties are provided for failure to file or for filing false or misleading information on such affidavits.

Phase two would require common carriers by wire or radio to exercise due diligence to insure that all gamblers registered or who should be registered under the occupational tax provision of the Internal Revenue Code of 1954 (26 USC 4412(a) or (b)) file such affidavits with them before communication facilities are furnished. Penalties are provided for failure to require the filing of such affidavits and for failure to keep Federal, State, and local law enforcement officials informed of the identity of persons filing under the provisions of this proposal.

Additionally, common carriers by wire or radio who furnish, or their employees who assist in furnishing or installing, communication services would be required to inform the Department of Justice where they have reason to believe that such facilities are or will be used by professional gamblers.

The term "gambling information" is defined to mean "the process of making, settling, paying, registering, evidencing, or recording any wager."

The term "wager" is limited to sports events, contests, wagering pools and lotteries conducted by those in the business of wager for profit.

"The Shield of Freedom," Is Theme of an Address at the Veterans of Foreign Wars Post Home Dedication, Hinton, W. Va.

EXTENSION OF REMARKS

OF

HON. JENNINGS RANDOLPH

OF WEST VIRGINIA

IN THE SENATE OF THE UNITED STATES

Monday, April 25, 1960

Mr. RANDOLPH. Mr. President, Summers County Post No. 4500 of the Veterans of Foreign Wars of the United States dedicated its new post home at Hinton, W. Va., in ceremonies held April 23 to 24, 1960. It was my privilege to have been the speaker at the dedication service on this past Sunday.

This post was chartered on October 20, 1945, with 108 charter members. It has grown to over 335 members. The home is a beautiful building with the most modern facilities.

A reception at the home of my friend, Van A. Trail, was held Saturday afternoon for a distinguished American, who is well known to Members of the Congress, Omar B. Ketchum, director of national legislative and rehabilitation services for veterans of the United States. Mr. Ketchum later delivered the address for the dedication banquet in ceremonies for which Past West Virginia Department Commander Richard G. Homan was the toastmaster.

Also present and participating in the program for the significant dedication banquet and services were David J. Lowery, of Weirton, present West Virginia department commander of the V.F.W. of the United States; Mayor Harold B. Eagle, of Hinton; Post Commander John W. Gilbert; Quartermaster Ovid L. Graham, Jr.; Ladies Auxiliary President Betty Graham; Post Building Committee Chairman Jack E. Lawrence, and the Hinton municipal band. The Reverend S. M. McMurray, pastor of the First Presbyterian Church in Hinton, gave the invocation.

For the dedication service address, I chose to speak on the subject, "The Shield of Freedom," and of our responsibilities as free citizens to maintain it.

Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD the text of my speech on April 24, 1960, at the dedication of the Veterans of Foreign Wars Post No. 4500 home at Hinton, W. Va.

There being no objection, the speech was ordered printed in the CONGRESSIONAL RECORD, as follows:

THE SHIELD OF FREEDOM

(By Senator JENNINGS RANDOLPH, Democrat, of West Virginia, to the Veterans of Foreign Wars, Post No. 4500, in dedication of their building, Hinton, W. Va., April 24, 1960)

Commander Gilbert, Mrs. Graham, of the ladies auxiliary, and officers and members of Summers County Post No. 4500 of the Veterans of Foreign Wars, it is a privilege to address the membership of such a distinguished post as yours, and the citizens of this community.

Your dedication as individuals and as a group to the ideals of our society is attested to by your record of three consecutive awards as post of the year by your outstanding service in the sponsorship of Boy Scout Troop 115 and Explorer Post 115, in the sponsoring of the Red Cross bloodmobile program, and by your participation in many other charitable and civic efforts.

Your actions have testified to your commitments as men. We now gather for the purpose of dedicating your post home, and for this also we must ask the question as to what larger purpose this structure is dedicated, even as our lives are dedicated.

As a veteran of one or more of our Nation's wars, each of you has given some portion of his life—and some of you have given of your blood and flesh as well—in defense of freedom. Therefore, this afternoon I wish to speak of "the shield of freedom" and of our responsibilities as free men to maintain it.

As Dr. Karl Menninger said of the virtue of humility which disappears when one lays claim to it, freedom tends to disappear when it is confused with license.

The absolute and unabridged right to do as one pleases and to pursue personal pleasure and profit do not in themselves represent the liberty of men and women in a free society. For freedom imposes its own obligations upon the citizen. The first of these is to understand the nature of freedom itself, the second to understand the nature of its opponent and the requirements of its defense. It is to the second question that I will direct my remarks.

However, let us first define the face of the evil which currently poses a serious threat to our freedom.

One hundred years ago communism was a theory of history and economics coveted by a handful of men in Europe and England. Some 40 years ago, at the time of the Bolshevik revolution, communism commanded a small but militant force of some 80,000 followers. Today, it claims a total world membership of more than 33 million, with active party units located in 83 nations, according to FBI Director J. Edgar Hoover.

In addition, while the Soviet Union holds forth the olive branch of peaceful coexistence, international communism, aided by followers working within, has subjugated 17 countries with a population of over 900 million people, or about one-third of those on the planet. While Khrushchev extends the hope of lessening world tensions, his Chinese partners are engaged in shipping contraband arms to north Africa, fomenting disturbances among their neighbors, and threatening the peace of southeast Asia.

Against this malevolent force stand the United States and a coalition of those nations which would preserve and extend the ideals of human freedom and dignity. And since the forces that oppose us respect only power—and the show of power—America must maintain her strength, militarily, economically, politically, and morally. This means we can no longer afford the luxury of giving only part-time attention to full-time problems, for the problem of combating Soviet and Chinese imperialism is indeed a full-time assignment which deserves the full application of all our resources. Today, however, let us devote attention largely to the question of our military resources.

Within the present century we have been involved in two major wars and one localized but extremely costly conflict. In each instance our military policy was one of "punishing" an aggressor nation which had disturbed the peace. And in each instance we acted as though all we needed to do was punish the aggressor and peace would be restored, leaving us free to follow our own carefree pursuits. But we have learned through harsh and bitter experience that the uneasy condition of peace is not so easily restored.

It would seem, therefore, that we must reexamine the military policies that have guided our conduct in the wars of this century. We must recognize that the United States has interests that endure beyond the mere punishment of the aggressor nations—interests that involve the basic values and assumptions of Western civilization itself. And these interests—these values—can be maintained only so long as the United States is capable, in alliance with the other free nations of the world, of bringing a countervailing power to bear on the Soviet Union and Communist China, whenever and wherever their imperialistic designs lead them to encroach upon free nations. Such power cannot be provided by an unwise and unrealistic attitude toward our national budget.

Though we all devoutly pray that the proposed series of summit conferences will eventually lead to a world in which all men may live in honor and peace with one another, that time does not seem near at hand.

And until that new day does arrive the United States must maintain sufficient strength—now and in the foreseeable future—to deter the hunger for conquest among the Soviet and Chinese leaders. This cannot be done if we are to be preoccupied solely with a balanced budget. For—as I have said elsewhere—a balanced budget in financial terms may well bring about a deficit budget in larger and more human terms.

For example, a year ago last March, in a memorandum setting forth their views on the budget, the Chiefs of each of the armed services expressed doubt about its adequacy. Typical of their comments was the statement of the then Chief of Staff of the Army, Gen. Maxwell D. Taylor, when he reported, "The reservations which I had in mind pertain specifically to four major Army programs. These are (1) Army modernization, (2) the antimissile missile program, (3) the personnel strength of the Active Army and

Reserve forces, and (4) the Army surface-to-air missile program." The Chiefs of each of the other services expressed similar concern about the adequacy of the allotment for his own branch.

There is a growing criticism from experts in the field of science, from our military authorities, from economists and leading business executives, and from leaders in Congress, of our inadequate defense level. While it is true, as the President avers, that the present deterrence of mutual terror prevails, what of 3 or 4 years from today? There are those who maintain that Russia—at the present rate of development—will have a 3-to-1 superiority over us in intercontinental ballistic missiles. By thus deliberately conceding a missile superiority to the Kremlin, we are gambling with the future and gravely limiting the range of our present diplomacy.

There are those in authority who proclaim that we have sufficient strength to devastate the country of any aggressor. That may well be true. But our primary strategy must be the deterring of a strategic attack, not the "winning" of a strategic war.

While it is undeniable that for security reasons many policy and strategic decisions must remain secret, there are certain areas of determination that bear upon the question of national survival and which are rightly matters for public scrutiny. Among the vital matters concerning which policy and strategic decisions must be made, and about which the American citizens are entitled to adequate information and assurances, are these:

The question of relying almost exclusively on nuclear deterrent forces, the matter of a balanced defensive arsenal, the almost complete neglect of realistic civil defense measures which would make our deterrent intent more believable, and, finally, the power of the Bureau of the Budget over defense decisions.

These questions are not answered merely by imputing a partisan and political bias to all who question the wisdom of our current defense policies.

Military history is studded with instances of professional military men having failed to grasp the significance of new elements of strategic or tactical value. There have been, for example, such occasions as the rejection of the tank by French Army generals before World War I, the rejection by our own Army of the thesis of airpower propounded by Gen. Billy Mitchell in the 1920's, and the resistance of our battleship admirals to the development of aircraft carriers before World War II. These are but a few of the incidents which provide illustrations that a lifetime in the military service is no guarantee of infallibility.

One might further add that some of the most penetrating criticisms of present defense policies have originated from men who have also devoted their lives to our national defense and who have been much more closely associated and intimately involved with it during the past 10 years than has the President. One of the most notable is retired Army Chief of Staff, Gen. Maxwell D. Taylor, who recently stated before a joint hearing of the Senate Armed Services Committee and the Senate Aeronautical and Space Science Committee that, "The trend of relative military strength is against us. Our manned bomber force is a dwindling military asset. Our long-range missile force is limited in size, uncertain in reliability, and immobile upon exposed bases. We have no antimissile defense in being or in sight. There is no effective fallout protection for our civil population."

Another authoritative critic within his own field is Thomas G. Lanphier, Jr., former vice president of Convair, the major manufacturer of the Atlas intercontinental missile, who resigned his $60,000 a year job with Convair in order, as he stated, "to unclutter my opinions with charges of bias."

Among other statements Mr. Lanphier made before the House Committee on Science and Astronautics was his declaration that the United States is now "engaged, in fact, in the only military phase of world war III we have a chance to win—the deterrent phase—and we are losing it." He then added, "We are losing, for, among other reasons: lack of a sufficient and timely intercontinental ballistic missile program; lack of defense against a submarine attack; lack of a weapons program and policy to deter limited aggression; lack of a sufficient and timely space program, and, above all, lack of recognition that we are and have been for a long time actually engaged in world war III."

Our position in certain vital areas of tactical strength appears no stronger than in those strategic matters I have just cited. For example, as recently as this week—on April 20—Army and Air Force chiefs reported to Congress that the recent war games in the Caribbean revealed that the Nation's military airlift is inadequate and outmoded.

Gen. Bruce C. Clarke, chief of the Continental Army Command, and Lt. Gen. William H. Tunner, head of the Military Air Transport Service, jointly submitted a formal critique of last month's exercise Big Slam-Puerto Pine—the first major test of the Air Force's ability to rush Army combat forces to an oversea trouble spot. Their report to the House Armed Services Subcommittee included the following statement:

"The limitations of the majority of the present MATS aircraft seriously limit the size of U.S. Forces which can be deployed to distant oversea destinations in acceptable periods of time."

General Tunner further declared that 90 percent of the Military Air Transport Service is obsolescent and "the need for modernization is immediate and critical." Despite such testimony from the men who are best qualified to know, the administration has requested only $50 million in the current budget for the development of new military transport aircraft which might be ready in 3 to 5 years.

One is thus impelled to question what the United States would or could do in the event of another Korea, or even a Lebanon, in which we would be confronted by enemy combat forces.

Finally, almost 2½ years ago, the Preparedness Subcommittee of the Senate Committee on Armed Services issued its report after taking 7,000 pages of testimony. In this report the subcommittee made 17 specific recommendations covering the entire range of our defense system. These recommendations were unanimously approved, not only by the subcommittee, but by every member of the committee itself and endorsed on the basis of testimony from the leading experts throughout the country.

Yet, even at this late date, not enough has been done to implement these recommendations. The excuse has been that we cannot afford them. I say—the leaders of Congress say—and I believe the American people will say that we cannot afford not to have them. If we cannot afford them under our present system of priorities, then we had better reappraise our standards of priority.

Currently, we are spending 10 percent of our national income on national security. In a recent book by Bernard Brodie, a military historian with the Rand Corp., entitled "Strategy in the Missile Age," it is persuasively argued that we can readily afford to spend 15 percent, and that this sum would perform miracles for the forces, and would also provide a minimum program of fallout shelters surrounding our cities.

As the richest nation in the world, we can afford and we must provide the preservation of those values which alone make our material wealth meaningful. But, in order to achieve such a defensive system, we must have some guiding principles of action other than mere budgetary ones. In closing, I suggest these basic principles:

1. Since we have determined against our fighting a preventive war, we must devote a greater military effort into cutting down drastically the advantage an enemy might derive from a surprise attack. This will call for (a) the reduction of the vulnerability of our own retaliation system; (b) the improvement of our detections systems to reduce the possibility of false alarm; and (c) the reduction of the vulnerability of our present and future defensive systems.

2. Secondly we must provide more substantial conventionally armed forces and the necessary transport for limited war. As Historian Brodie remarked, "There will be time enough to readjust to what is permissible in limited war when incentives to strategic attack have been markedly reduced."

3. Finally, we must begin to take seriously the proposition that the danger of total war is a real and finite one, and that provision must, therefore, be made for the saving of life on a vast scale.

While present world tensions exist, we may not flee, no matter how appalling the vision of nuclear war, from facing the realities of our times. To do less is to lose faith with and to violate the trust of those of your comrades who gave their lives for human dignity and individual freedom.

Foreign Trade and the American Economy

EXTENSION OF REMARKS
OF
HON. WINT SMITH
OF KANSAS
IN THE HOUSE OF REPRESENTATIVES
Monday, April 25, 1960

Mr. SMITH of Kansas. Mr. Speaker, recently the Honorable NOAH MASON, for 24 years a Member of Congress from Illinois, introduced a bill that should be given top priority by the Congress but it should be noted that this bill will have the opposition of all the "powers that be" including men in high Republican positions. Basically, this bill simply is trying to restore the constitutional authority to the Congress, the people's representatives, instead of giving the authority over tariffs to subservient internationally minded bureaucrats appointed by the President.

When we talk and write of foreign imports we are simply talking about American job loss—every American job in a factory making goods for sale is supposed to support at least three persons' livelihood. The administrators of these export programs like to claim that our American exports support at least 5 million Americans.

But as has often been pointed out by me—I have never been able to find anyone in Government who will tell you how many jobs we lose by reason of our imports. If our imports exceed our exports, it would seem logical to assume there is a job loss to the United States. Recently, a well-informed statistical organization said:

We have already taken a long step toward national suicide through failure to maintain tariff schedules adequate to equalize production costs in the low-wage countries

with unavoidable high cost—wages, taxes, and living standards—in effect here. Our industries and the jobs of our people are moving overseas at a constantly accelerating rate.

During the first 9 months of 1959 our imports from Europe increased 43 percent compared with the same period on 1958. Imports from Japan increased still more steeply, or 54 percent. Needless to say, most of these imports compete sharply with our own production.

Another major factor influencing our foreign trade, and one that gives great concern, is found in the President's recently proposed "hard sell" trade program, which, in effect, concedes the perils that confront us, and seeks to give relief through a Federal help in selling program.

The Old World, after World War II, in its recovery not only got our U.S. tax dollars but they also copied our know-how. Europe now has modern plants and equipment, mass production facilities, technological skill, research projects, installment credit and the management methods—all obtained by our foreign aid policies over the past 12 years.

It has been all too apparent that most of the men who have been in a position to formulate foreign as well as domestic policies—all seem to have superheated passion for the uplift of foreign peoples and nations. These men seem to have more concern for the welfare of the people and industry of Europe and Asia, including Communist-dominated countries, than for those of the United States. The wants and ambitions of people in foreign lands receive more attention than the great middle class Americans who are struggling with high taxes and trying to live on an inflationed dollar worth 47 cents.

Anytime a Member of Congress speaks out against this prevailing tendency of always putting America last he is immediately stamped as a modern-day illiterate and is a moron from out of the wide open spaces without the benefit of reading the New York Times or Washington Post—or as one intellectual do-gooder expressed it—"out in that area of America where they still believe in the doctrine of America first, where Douglas MacArthur is looked upon as a great American, where the people listen to Fulton Lewis, Jr., and where many of these stay-at-home Republican conservatives would like to vote for BARRY GOLDWATER for President.

During the past 7 or 8 years I am sure many persons who have read my newsletters will remember my position and attitude toward our so-called foreign aid and related farm programs. I have been against these programs because as I have tried to point out all we have done is to build up future competition for America—particularly in our own farm areas. Many people have been violently opposed to my position because they always said, "any program is good—that gets rid of our surpluses and helps the needy countries because this builds up friendship for us throughout the world."

That sort of reasoning is deadly unrealistic for the simple reason this policy would not work now—nor at anytime in the future—because you do not buy friendship and you do not buy allies—foreign nations think of their own welfare—just as the United States did up until 12 years ago when we started out to be Santa Claus for all the world. During these years the big manufacturers, big international groups—particularly the international labor bosses—big auto manufacturers and other world-saving groups with American tax dollars all have pointed their fingers of scorn and contempt at any Member of Congress who voted against foreign aid.

But let us make a little closer reappraisal of these world-saving programs with U.S. tax dollars and see what has happened.

Our exports last year, for the first time, were $3 billion less than our imports—the net result—lost $3 billion worth of gold out of Fort Knox to pay foreigners for their goods. We have to pay them in gold; you can't lawfully own gold. You get 47-cent paper dollars.

We have lost our world trade auto market—more automobiles were imported into the United States than sold. World steel markets are being taken away from us throughout the world—our own markets are buying more and more imported steel products. You can go to any hardware or lumber yard in Kansas and buy a roll of barbed wire made in Europe at $2 a roll cheaper than a roll of wire made in Gary, Ind., and the wire is just as good

The $90 billion we have given away in foreign aid programs brought us stiff competition. We gave them our money, built up their factories, and now they dump their products back in our laps—because of their cheap labor and freight rates. They are taking our markets here in the United States—not with cheap, shoddy goods but with quality products—and throughout the world they continue to absorb our markets of manufactured goods.

Let us now take a look at the foreign agriculture markets that we long thought belong to us—because of our superior know-how and the great progress we have made in agriculture production methods. We are now losing our agriculture world markets in wheat, corn, rice, cotton, and feed grains because of two factors—we taught them modern agriculture methods with U.S. tax dollars and now many of these countries are self-sufficient and as a result we not only lost these markets but in many cases they took away our markets in other countries because of cheaper prices. Since World War II we taught the Japanese how to eat bread. Last year we sold Japan some 60 million bushels of wheat. This year Japan is buying wheat from Canada and Australia. Why? Because they can buy their wheat 15 cents a bushel cheaper.

Now to be specific let us look at this statement copied from the Wall Street Journal:

WASHINGTON.—Grave fears about the direction in which Europe's young but potentially might Common Market is headed are now being voiced within the U.S. Government.

A secret paper, drafted in the Department of Agriculture and now being circulated "for discussion purposes," contends that commodity control schemes of the six-nation European Economic Community could go far toward wiping out an export market for U.S. crops which currently approaches $1 billion a year.

For a Government document, this one contains some pretty rough language.

It charges that the Common Market lands—Germany, France, Italy, Holland, Belgium, and Luxembourg—are headed straight for "excessive (and abritrary) bureaucratic regulation of markets."

It accuses the Common Market of "aiming at self-sufficiency" in agriculture not at freer trade.

It states this may well reduce Common Market imports of major commodities from America and other suppliers to nothing more than a residual item.

So our international trade experts expect those who seem to want to help foreign nations instead of America—probably do not see any danger in this Common Market or that it will affect the American farmer. It would seem however that even our own Agriculture Department now sees clearly what effect this Common Market will have on selling our excess farm products.

The U.S. diplomats have hailed and supported this Common Market idea as a brilliant conception by the international do-gooders—but just how this Common Market will help the American laboring man or the farmer is just a bit hard to understand.

Certainly one of the major issues that should be decided in this coming election campaign is that this American-last attitude should be brought to an end. There never was more a time when the ordinary citizen should rise up and elect a conservative, aggressively pro-American Congress.

Immediately after World War II this same group of "international do-gooders with U.S. tax dollars" promoted the idea that Russia should take back to Russia all the fine machinery of prewar Germany in payment of war claims Communist Russia claimed was due her as a result of German aggression in World War II. Millions of fine machinery was taken to Russia—then Uncle Sam with usual shortsightedness—gave Germany U.S. dollars to re-equip her factories with new and modern machinery. As a result, the Germans with their usual efficiency, with this new and modern machinery, and with no 40-hour week for the hard working efficient German workmen—have gone ahead and grabbed off many of the U.S. markets throughout the world. This is a good example of the United States rebuilding the economy of our future competitors.

As a result of this policy of building up our competitors both in Europe and Japan—unemployment in the United States will soon become a major problem in this country. Every Member of Congress who wants to stay in Congress must face these increased foreign imports which cause American unemployment. Already, there are areas in the United States where this unemployment is due solely to foreign imports. When these factories shut down there is always an epidemic of panaceas suggested, such as depressed area appropriation, bigger Government unemployment benefits, artificial work programs to sustain purchasing power in a declining domestic economy, and, of course, all the old WPA projects will be dusted off and a lot of new ones discussed—in most cases for

the sole purpose of getting votes and not as a permanent solution.

Competition within the American industrial markets by American companies for the home market is a good thing but when the competitors from abroad come into the American market where they pay just one-fourth of our wage rate and with no penalties for overtime nor 40-hour week—that is a big advantage but here is another big advantage: the competing foreign companies rarely pay more than 9 percent of a profits tax, while in the United States it is 42 percent and these foreign countries give much more realistic writeoff replacement costs than the United States, all of which permits our foreign competitors to be constantly getting better and more modern machines.

Just a few years ago the boss-ridden international unions were all promoting these foreign aid programs—but what do we find today—they are crying for tariff protection.

At least three American unions are now demanding that Congress put up tariff bars on imports, and they want to negotiate labor contracts prohibiting American employers from handling foreign goods. However, these labor bosses never suggest that they or their members try out such realistic actions as reducing inflationary pressures by holding the line on labor costs or by reducing unit costs through higher efficiency and productivity.

The remedy for this taking of American markets is probably not to erect a wall of high protective tariffs in order to keep these products out of America, but rather a combination of a few simple laws applied with just plain common sense; quit granting economic aid all over the world to our competitors and when we make a reciprocal trade deal make it a two-way street instead of a one-way street, as at present. Get Government out of business; give business a better writeoff policy; quit passing Federal laws and regulations which increase the cost of production, and reduce personal and corporate taxes which restrict the building up resources of capital to carry on experimentation in products on a competitive market, and above all else see that business and the man who labors is protected from the bossism-for-me type union leaders, such as Hoffa, Walter Reuther, and Hutchinson, of the carpenters.

Congress should do these things now and not wait until the breadlines form and emotion fills the air, then we will get only some quack, panacea remedies designed basically for votes and all at the cost of the taxpayers.

The Congress, from heavy pressure from two administrations, has tried to buy the love, respect, and support of the people of the world with your tax dollars. As a result, we have a tax load that has taken much of the incentive out of industrial advancement. Our Government, whether it has been the New Deal, Fair Deal, or present deal—has simply preached security instead of opportunity—neither political party seems to be aware that no one pays taxes but the consumer of goods and services.

Under these doctrines people have been brainwashed and conditioned for the coming of more socialism and the welfare state and, of course, there are many who believe the ultimate objective to all this is a one-world government, one parliament for all mankind, one church, one language, one color, and one policeman.

We as a nation, as led by our present administration and the Congress, not only seem committed to a welfare state here at home but to promote a planned economy of benevolent socialism throughout the world.

Recently the Wall Street Journal published an editorial which contains ideas that should be fully understood by those who advocate bigger and better gifts, even though called loans. I highly recommend the contents of this editorial entitled "Blank Checks."

BLANK CHECKS

Congress, one of its committees unanimously recommends, should consider abolishing the Development Loan Fund if it doesn't straighten itself out.

The DLF is one of the proliferating bureaucracies spawned by Government foreign aid, and the House Government Operations Committee says it isn't operating the way Congress intended. Instead of approving loans only for specific projects in underdeveloped areas, it has been approving blanket credits to governments, with little or no check on what is done with the money.

As the committee report puts it, "Once the recipient governments have been promised aid in a certain amount, they have been known to take the view that DLF is merely being bureaucratic if it scrutinizes too closely the use to which that aid is to be put."

This melancholy history is in no way surprising when the agency's basic setup is recalled. The DLF was devised to provide "soft" loans, repayable in local currencies, to finance industrial projects in economically backward nations. So right off the bat it was on unsound financial ground.

An agency so conceived, moreover, is in poor shape to resist foreign political pressures. If the Government on the receiving end wants to take the money and build steel mills in deserts or other latter-day pyramids—well, so what? Only the unsophisticated would imagine that the money is actually supposed to improve the economic lot of the people concerned.

What is wrong with the DLF is symptomatic of the troubles of the foreign aid program as a whole. It is not merely the carelessness, the waste, the blunders, the blank checks. These but reflect the fundamental defect—the absence of sound principles and clear objectives.

We hope Congress will pay attention to the committee's recommendation concerning the DLF. But before a sensible foreign aid program can be built, more than this one annex will have to be torn down.

College Loyalty Oaths

EXTENSION OF REMARKS
OF
HON. JOSEPH S. CLARK
OF PENNSYLVANIA
IN THE SENATE OF THE UNITED STATES
Monday, April 25, 1960

Mr. CLARK. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD an article entitled "College Loyalty Oaths," written by the distinguished Senator from Massachusetts [Mr. KENNEDY] and published in the April 1960 issue of Coronet magazine.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

COLLEGE LOYALTY OATHS—LOYALTY OATHS, ESPECIALLY IN EDUCATION, HAVE NEVER CONTRIBUTED TO OUR SECURITY—TRAITORS AND LIARS WILL EASILY TAKE THEM—BUT FREQUENTLY, PRINCIPLED PEOPLE WILL REFUSE—LOYALTY, INSISTS THE SENATOR, CANNOT BE COERCED OR COMPELLED—IT MUST BE INSPIRED

(By Senator JOHN F. KENNEDY)

In 1776, Benjamin Franklin—fully aware of the risk—decided to entrust secret plans of the American Revolution to a French agent. He believed the man's word of honor that even British torture would never wring these facts from him. What more could he ask? "He would have given me his oath for it," Franklin reported to the Continental Congress, "if I laid stress upon oaths. But I have never regarded them otherwise than as the last recourse of liars."

Franklin knew that many an American agent had hypocritically taken the new British oath of allegiance. On the other hand, he knew that little could be expected from those colonists with Tory sympathies who had been compelled by their crusading neighbors to take oaths supporting the revolution.

Unfortunately the American Nation, born in that year of divided loyalties, has rarely heeded Ben Franklin's sage advice. In times of crisis to the state—times of war, insurrection or suspected subversion—both Federal and State Governments have repeatedly sought some swift, convenient, and reassuring means of publicly identifying and compelling citizen loyalty. Elaborate loyalty oaths and affidavits—going far beyond the simple pledge of allegiance or the oath to uphold and defend the Constitution—have inevitably been the answer.

But there is no evidence that they have ever contributed substantially to the security of the Nation.

Yet overzealous patriots keep trying to legislate loyalty. The latest example of this is the case of the National Defense Education Act of 1958, which contains a welcome program for student loans.

Many bright students, whose talents this Nation needs to develop in competing with the Soviets, require financial assistance to continue their studies. But today, if those needy students attend Harvard, Yale, Mills, Grinnell, Sarah Lawrence, Oberlin, Swarthmore, and a dozen or so other schools—including some of our best science laboratories—they cannot obtain a Federal loan.

These colleges and universities are refusing to participate in the loan program. They need the money—they know their students need the money—but they refuse to administer one of the bill's strangest provisions: a section which requires every student, teacher, scientist or other scholar applying for a loan to not only sign the customary oath of allegiance, but also to sign a vague, sweeping affidavit declaring that he does not believe in or support any organization which believes in or teaches the overthrow of the Government by illegal methods.

How can our universities police this affidavit they find so distasteful and humiliating? How can they investigate what organizations their students might believe in, and what those organizations believe? If a student does not belong to a subversive organization, might not his beliefs still be contrary to the affidavit? Which methods of overthrowing the Government are illegal and which are not?

No one can quarrel with the principle that all Americans should be loyal citizens and should be willing to swear allegiance to our country. But this is quite different from a doctrine which singles out students—and only those students who need to borrow money to continue their education—as a group which must sign a rather vague affidavit as to their beliefs as well as their acts.

Congress appeared, on the one hand, in this act to recognize that our students and teachers were one of our greatest assets in the cold war, our hope for the future—but then, in the same act, to single them out for scorn and suspicion in a demonstration of no confidence. An affirmative oath of allegiance may be understandable—but the negative disclaimer is at variance with the declared purposes of the act. It adds a needless barrier to many prospective students. More and more of our leading colleges and universities are refusing to participate in the loan program because of it.

The president of Wisconsin State College calls it unnecessary and distasteful. Father Michael J. Walsh, the president of Boston College, says it "represents a lack of confidence in the youth of the country." Mills College in California would not accept these funds because this section "invades the privacy and questions the integrity of individual belief." President Nathan M. Pusey of Harvard called it vague in intent, useless in effect, inappropriate in context and insulting to the very group the Congress seeks to encourage. Oberlin College in Ohio declined all loans under the program because, its president stated, "it cannot compromise its historical devotion to freedom of expression and belief."

In introducing a bill to repeal this provision last year, I called it a futile gesture to the memory of an earlier age. Between the end of World War II and the end of the Korean war, a rising tide of fear and suspicion engulfed many Americans. The detection of Communist agents and the erection of new standards of loyalty and security were no longer left to responsible authorities. Neighbors, fellow workers, faculty members, Federal employees, friends—anyone might turn out to be "Red" (or said to be by someone). Easy answers and convenient scapegoats were sought, and provided, in a troubled time when the answers—How did the Russians get the bomb? Why did we lose China?—were not easy.

But one easy answer was the oath. Those who took it were loyal; those who refused were not. What could be simpler? And so countless hundreds of new oaths sprang up, administered by Federal, State and local bodies: oaths for schoolteachers, oaths for notary publics, oaths for professors, students and scientists and, in one State, a loyalty oath for professional wrestlers.

Finally, the furor died down—the atmosphere changed. Senator Joseph R. McCarthy of Wisconsin departed from the scene and the American people turned their attention from oaths of loyalty to the more positive tasks necessary for strengthening our national security. But in the summer of 1958, one relic of this earlier era crept into the National Defense Education Act.

The historical background of this kind of special oath is not confined to the recent era of hate and suspicion.

The first soldier in Washington's army to hang for treason—in a plot to capture the Continental Congress—had sworn to two special oaths of loyalty.

During the Civil War when Congress extended special oath-taking to itself, the only result was the resignation of a loyal but indignant Senator from Delaware, James A. Bayard. Another reluctant oathtaker, a civil servant in the Census Bureau whom a congressional committee had cited for disloyal feelings, enlisted in the Union Army and lost his sight at Gettysburg; while another Federal employee, when apprehended for disloyal conduct and asked about his oath, replied: "I could take 500,000 such oaths, as they amount to nothing."

In the post-World War I era, New York's famous Lusk laws included oaths among other special tests of teacher loyalty. But after only 2 years they were repealed, dismissed teachers were reinstated and Gov. Al Smith called the laws repugnant to the fundamentals of American democracy.

Nearly 2 million WPA workers were required to swear their loyalty in the unsettled days prior to World War II, before they could pick up their tools and rakes. After the war, when the Taft-Hartley Act required special non-Communist affidavits from union leaders, Harry Bridges took the oath—but John L. Lewis, a fighting anti-Communist, would not. Among the federally employed scientists working on secret weapons projects who took a special oath was David Greenglass, convicted atomic spy.

This is hardly historical justification for the imposition of a special oath on student loan applicants today. And the history of special oaths in other lands should also have taught us a lesson. The student affidavit of disbelief is directly descended from the hated test oaths imposed centuries ago by successive contenders for the British crown. Under Charles II, for example, no one could teach at a university or school without taking an Anglican oath—and also an oath that the earlier oath imposed by Oliver Cromwell was unlawful. Article VI of our own Constitution reflected the fear of religious test oaths which had driven many to these shores.

In the 1930's our universities benefited from Italian professors fleeing Mussolini's requirement that all faculty members take a special oath stating that their teaching would be aimed at instilling devotion "to the Fascist regime."

The tragic fact is—as the history of loyalty oaths demonstrates—that the affidavit will not keep Communists or other subversives out of the student loan program. Card-carrying members of the Communist Party will have no hesitancy about perjuring themselves in the affidavit. I am proud as a U.S. Senator to reaffirm my own pledge to uphold the Constitution and flag. But I regard a special affidavit as to a person's beliefs—imposed on average citizens who have no special position of trust—as a wholly meaningless, impractical weapon against real subversives. This is particularly so when they are singled out, because they cannot afford the tuition their classmates can afford.

The only students who are adversely affected by this discriminatory provision are honest, non-Communist students—including:

(a) Students who attend universities that refuse to participate in this program.

(b) Students who feel they cannot execute the oath and affidavit for reasons of religion or conscience.

(c) Students who resent the requirement or consider it an unnecessary limitation on their academic freedom.

(d) Students who are overapprehensive in their interpretation of the affidavit or unnecessarily fearful of some official's interpretation.

It is all very well to ask: "Why not sign, if you're not guilty?" Most students will sign. Most universities will participate. Those who reject loans may be dismissed by some as overconscientious or as eccentrics, nonconformists, and chronic dissenters. But I thought the purpose of this act was to attract into scientific and other vital pursuits the best talents of the country, the most inquiring minds, the most thoughtful students. How can we if we exclude the overconscientious, the eccentrics, the nonconformists, and the chronic dissenters? What is the purpose of a provision that in operation could result in some Communists getting loans and some non-Communists dropping out of school—in some talented, needy students being included but some equally talented, equally needy, and equally loyal, students being left out?

There is a very real danger that this unnecessary, futile gesture toward the memory of an earlier age will defeat the purposes of the National Defense Education Act. Unlike the Soviets, we cannot take steps to keep our brightest minds in scientfic careers, but we might take steps that keep them out.

Early in the last session of Congress, I introduced and conducted hearings upon a bill to repeal this provision. But after 2 days of Senate debate—sometimes bitter, often confused—the bill was recommitted, dead for the session.

Another attempt to eliminate the affidavit will be made this year—this time emphasizing that it is the vague, sweeping, negative affidavit that is most objectionable and discriminatory. That may satisfy those who opposed us last year, who could not understand why the customary affirmative pledge of allegiance should not be taken by all students as a positive act of rededication.

But it will not satisfy those who want the negative affidavit retained, who insist that only subversives would oppose signing it, who criticize institutions refusing to participate, on the grounds they are denying aid to needy students merely to demonstrate abstract theories of academic freedom—and those who shrug off nonparticipants with the reply that there are other colleges and students eager to get the money. This is a minor issue, they say, raised by a few eggheads and unrealistic professors.

But if this affidavit remains on the statute books, we will have cause for concern. First, I will be concerned about the chances for success of the entire National Defense Education program, with some of our leading science-trained institutions and best-known colleges refusing to participate. These colleges need the additional source of scholarship moneys—all colleges do, as enrollments and costs increase faster than available funds. But they also know that once they accept this precedent of Federal dictation as to the beliefs of their scholarship or loan applicants, a tradition of American education will have been shattered.

These colleges, training future atomic scientists in their laboratories, do not want to protect Communists—but they know that any Communist will gladly take any number of oaths. They cannot understand why a prosperous freshmen is assumed to be loyal, but—if his financial needs become more pressing so that a Federal loan is required—he suddenly becomes suspect in his sophomore year. And why is a less talented student, ineligible for a Federal loan, permitted in the laboratory without question—while a more talented student is denied entry unless he executes a vague affidavit which he may not accept or even understand.

To waste desperately needed educational funds trying to administer this kind of provision is the height of folly.

Secondly, I would be concerned about those students who did sign the affidavit. We want their minds to be free and flexible, searching out new ideas and trying out new principles. But a young student who has sworn—under penalty of a Federal indictment for perjury—as to what he privately believes (and what he thinks some organization he believes in believes) is likely to be rather cautious about changing his beliefs or joining new organizations. Other students may feel that Federal inquiry into their beliefs is so unrealistic as to be meaningless—and, in their minds, oaths of allegiance as well as sworn affidavits will be dangerously cheapened.

Perhaps a few perjurers will be caught under this requirement. But we already have enough anti-Communist, antisedition, and

antiespionage statutes to catch these few students, if any, without damaging—in the minds of millions of other students—their respect for free inquiry and free government.

If William Penn or Benjamin Franklin or Henry Thoreau attended college in America today, I doubt that they would sign this affidavit, despite their great loyalty to this country. And our effort to develop the best minds of the country needs all the Penns and Franklins and Thoreaus we can attract.

Finally, I would be concerned, if we cannot eliminate this provision, about the United States of America. Never before have we tried to legislate orthodoxy in our colleges, sought to put students in jeopardy for their private beliefs or assumed a scholar is disloyal until he swears to the contrary.

Surely this is not the way to "catch up" with the new Russian excellence in education, science, and research—by imitating their objective of teaching students what to think instead of how to think. What kind of security is it that assumes all is well because thousands of affidavits are signed: do we really believe that loyalty can be reduced to an automatic formula, coerced and compelled instead of inspired?

I think it high time that we recalled the words of Mr. Justice Hugo L. Black: "Loyalty to the United States can never be secured by the endless proliferation of loyalty oaths. Loyalty must arise spontaneously from the hearts of people who love their country and respect their government."

Overabundance of Food and Starving People

EXTENSION OF REMARKS
OF
HON. LEONARD G. WOLF
OF IOWA
IN THE HOUSE OF REPRESENTATIVES
Monday, April 25, 1960

Mr. WOLF. Mr. Speaker, my friend and colleague from our great new State of Hawaii, Mr. INOUYE, has only been in Congress a short time, but he has already proven his excellent leadership ability. His record is adequate proof of the good judgment both of the people of Hawaii in sending him to Washington, and the Members of Congress in voting statehood for Hawaii.

Under unanimous consent, I insert in the RECORD the excellent speech just given by this fine new Congressman. The subject has been well handled on the item of food and hungry people:

OVERABUNDANCE OF FOOD AND STARVING PEOPLE

(Speech by Hon. DANIEL K. INOUYE, of Hawaii, before the Cooperative Food Distributors of America convention, Washington, D.C., April 25, 1960)

Mr. Chairman, the subject I am about to discuss is not a very pleasant one. Originally, I had thought of telling you about the most beautiful islands in the Pacific—the new and sovereign State of Hawaii. This would have been a very pleasant subject to discuss. However, noting that this is a convention of food distributors, I decided to spend a few moments this afternoon discussing something about overabundance of food and starving people.

About a decade and a half ago, while serving with the Armed Forces in Europe, I observed literally thousands of human beings crawling to the lowest depths imaginable, because they were hungry. I saw women offering themselves for a slice of bread. I saw husbands selling their wives in order to feed their children. I saw children soliciting for their mothers for a chocolate bar. One day, a group of people came to our campsite to offer their services for any menial or dirty job, such as cleaning our kitchens and latrines. Upon being asked what compensation they required for this work, the leader of the group replied simply, "We want your garbage." Assuming that they needed the garbage to feed their livestock, we accepted their services. A few days later, we found out that they were taking the garbage home to their small village for distribution among their people for human consumption. These people were working for the privilege of eating our garbage.

After the cessation of hostilities, I pictured our world entering into a new and glorious age of peace and plenty. I must confess that even after experiencing the horrors of war, I was still naively idealistic.

Today, while our Nation is complaining about overabundance and food surpluses, there are millions of people in our world who are actually starving. In the United States, garbage disposals and garbage pails are selling like hotcakes because of the overabundance of wasted and leftover food. While millions of dollars are being spent in the United States for reducing and diet pills, most of the world has yet to hear of these miracle pills.

Those of us who have had the privilege of traveling in the Far East know that hunger is a real problem. The hunger that I speak of is not merely the nutritional deficiency type but the deep belly type that makes children cry. I have seen thin, scrawny children covered with sores. I have seen men, women, and children beg for food. I have seen waiters set aside our leftover morsels to be sold to others in the dark alleys that evening.

We, who are gathered here today, should pause for a few moments this evening to give a prayer of thanksgiving for the abundance we are blessed with. We should be very grateful for our bountiful gifts. We should be grateful to associations, such as the Cooperative Food Distributors of America, for making this abundant food available to our households at low-cost methods of distribution. I am grateful. I hope you are.

The daily per capita calorie consumption in most parts of Asia is about a thousand calories. Most of our distinguished nutritionists state that it takes about 2,500 to 3,000 calories per day for an average person to carry on his daily activities. It should be noted that people who cannot get above the average of a thousand calories a day have little energy to build schools, to build railroads, to construct communications facilities, to work on their farms, and to defend themselves.

For example, the great nation of India has always been suffering from food shortage. Any disaster, flood, or drought, which would reduce the food supply even slightly, creates serious trouble for the Indian Government.

About a year ago, a very distinguished Member of Congress stated that "The Indians are proud people. At times they seem to us to be exasperatingly indifferent to the obvious dangers in communism. But India is a democratic government which is struggling to provide a decent standard of living for its millions of people. Economic and political unrest, caused by a widespread and persistent shortage of food, greatly complicates the difficulties of the government and could conceivably tie up the scales against freedom there.

"Whether we like it or not, there is a struggle now under way between India and Communist China. India is trying through democratic procedures to create jobs and give her people greater economic independence—the same thing China is trying to achieve through the harsh, repressive procedures of communism.

"If India fails, and China succeeds, there will be nothing to stem the spread of communism in Asia. Our surplus foods can be a significant weapon in this life or death struggle."

The world is crying for leadership and most of the people throughout this world look to our Nation for this leadership. And whether we like it or not we will not be able to escape this role of leadership in our free world. Enlightened self-interest demands that we do all we can to help other nations to become economically stronger. People who are convinced that their economic self-interest will best be served under a democratic form of government will add little, if any, sympathy for Communist propaganda.

Food has a universal language. Even the smallest child knows the meaning of food although he may have no understanding of some of the other things we are now attempting to do to retain and to win new friends at this time of danger. Military assistance alone will not stem the Communist tide. Blessed with overabundance, we should now speak this universal language of food to bring about a better living for the unfortunate and for the rest of the world.

Today there is before the Congress of the United States, H.R. 6681, a bill to promote the foreign policy of the United States and help to build essential world conditions of peace by the more effective use of U.S. agricultural commodities for the relief of human hunger and for promoting economic and social development in less developed countries through the United Nations or its appropriate agencies, introduced by the distinguished Congressman from the Second District of Iowa, the Honorable LEONARD WOLF. This food for peace program as set forth in the bill provides for the distribution of some of our surplus foods through the agencies of the United Nations. The cost of this program is infinitesimal as compared to our military assistance program. All Americans who have any warmth in their hearts and who have any sense of enlightened self-interest should support this measure. Please bear in mind that it is most difficult to preach democracy to hungry people.

I hope I may live to see the day when all people will be blessed with plenty and all nations will be blessed with associations such as yours.

Aloha.

Address Delivered by Vice President Nixon

EXTENSION OF REMARKS
OF
HON. EDWARD H. REES
OF KANSAS
IN THE HOUSE OF REPRESENTATIVES
Monday, April 25, 1960

Mr. REES of Kansas. Mr. Speaker, under unanimous consent granted by the House, I include herewith the text of the address delivered by Vice President NIXON at a meeting of the American Society of Newspaper Editors on Saturday, April 23. I am sure Members of the House and Senate will be interested in this forthright statement.

The address follows:

The first subject I would like to discuss today is one that is commanding major attention throughout the Nation. The second is one that deserves such attention.

I can dispose of the first subject quickly.

Is religion going to be an issue in this campaign?

The answer to that question is that religion will be an issue exactly to the extent that the candidates and those who support them continue to make it an issue.

There is only one way that I can visualize religion being a legitimate issue in an American political campaign. That would be if one of the candidates for the Presidency had no religious belief. While the candidates in this campaign have differences on other issues, they are all men who recognize and cherish, both in their personal and public lives, the religious and moral principles which are the very foundation of our American ideals. As far as I am concerned, this fact removes any excuse for continued discussion of a so-called religious issue in this campaign.

That is why I intend to put the emphasis today and throughout the campaign where I believe it belongs—on the issues which the American people should be considering—the vitally important questions which affect the very survival of our Nation and our civilization.

The second subject I would like to discuss today is such an issue—how should Americans appraise the impending summit conference?

Let us begin by considering the question of what yardstick should be used in judging the success or failure of this conference.

It is too generally supposed that the success of an international conference can be measured only in the amount of agreement that is reached, and agreement is too often equated with peace. This can be a serious and even fatal intellectual trap. The Summit at Munich resulted in agreement—but the agreement meant war, not peace. It meant war because it was based on the fiction that there was a limit to Hitler's ambition.

Consequently, as we approach this meeting, let us recognize that the success of a conference should be measured not in terms of whether there was an agreement but on whether the agreement was on the right things.

I do not mean by what I have said to endorse the view that meetings like this one can produce no constructive results and should therefore be avoided.

I believe it is vitally important for the United States and our allies to approach this conference as an opportunity rather than as, at best, something of a hazard from which the optimum result would be to leave us no worse off than before.

We should look upon the coming talks with the Soviets as a chance to champion and to achieve some affirmative fundamental objectives.

First, this conference provides an opportunity for us to make at least a beginning on practical arms control.

In this connection, we should concentrate on trying to get agreement on measures which would reduce the risk of war by miscalculation. Our Geneva proposal for prior notification of space vehicle launchings is the kind of step that might be agreed upon. We should also explore every avenue for breaking the logjam which bars the way to an enforcible nuclear test suspension agreement.

Fears have been expressed that the Soviets may try to make propaganda capital of their unspecific and completely unguaranteed proposal for general disarmament. If they do, there is no excuse whatever for us to be on the defensive against this kind of propaganda offensive. This conference will provide a world forum in which we can set the record straight.

We should emphasize that adoption of our general disarmament program with its effective controls will assure disarmament by deeds and not just by words.

We must make evident to the entire world that if the Soviets are willing to consider some progress toward the kind of open society which we in the West maintain, both disarmament and peace itself can become realizable objectives rather than hopeless dreams. The closed society of the Soviet Union is, in fact, the major barrier to the disarmament which the great majority of the people in all nations want.

Second, this conference provides an opportunity for "defusing" the Berlin crisis and for laying the groundwork for negotiations which would lead to a formal and definitive solution of that problem.

We must make clear at all times our steadfast determination that we can never enter into an agreement which would in any way jeopardize the right of the people of Berlin to choose and retain the kind of government they want.

Any Communist action, such as a separate Soviet treaty with East Germany, which purported to threaten our rights or those of the free people of Berlin will torpedo any prospect for progress toward the disarmament and reduction of tensions which Mr. Khrushchev insists he wants and which we also want.

Third, this conference affords a unique opportunity to demonstrate the confidence and unity of the Western Alliance.

Mr. Khrushchev seldom misses an opportunity to express his confidence in the ultimate triumph of his system. Here is an area where we can and should go him one better.

Our military position is strong and will remain so. The Soviets, in spite of their missile boasts, are conscious of the restraint our strength imposes on any aggressive designs they might have.

But it is in terms of nonmilitary strength, the area of so-called peaceful competition which Mr. Krushchev discusses at every opportunity, that we have reason for the greatest confidence.

We can have no doubt after the President's recent trips through Asia and Latin America that the peoples of the world do not want totalitarianism. The leaders and people of the newly developing nations know that their own independence will die if the free West does not survive.

We should never cease to stress our faith that the future belongs to governments and ideologies firmly based on the principle of self-determination—a principle which applies to all people who want to be free whether in Europe, Asia, Africa, or the Americas.

We can make clear that we welcome the peaceful competition to which Mr. Khrushchev has challenged us. We should call on free people everywhere to mount the increased effort that this competition will require.

The summit conference in other words provides an opportunity for us to mobilize the moral and physical energies of the free world for the economic and ideological struggle which will go on through the last half of the 20th century.

Moreover, as the great forces of history are shaped the West is in a singularly providential situation as the summit approaches.

Never in the years since World War II when this fight for the survival of freedom and the dignity of mankind was forced upon us, has the West had such an array of leadership. At the head of the four nations most directly involved, the three that will sit at Paris and Germany, whose people are most immediately threatened, are men who command immense public confidence and prestige both at home and abroad. As the time for this conference nears, de Gaulle of France, Macmillan of Great Britain, Adenauer of Germany and our own President Eisenhower are fortified by the strongest national support which the West has yet produced.

We can rightly approach the summit with full confidence that the spokesmen of the free world, rather than Mr. Khrushchev, represent the tide of history.

And, as far as our own Nation is concerned, there has never been a time when Americans of both parties were more united than they are in this instance.

Mr. Khrushchev could make no greater miscalculation than to assume that President Eisenhower will be hamstrung in exerting strong leadership at Paris because we happen to be having a presidential election in the United States this fall.

In this connection, I recall a revealing conversation involving Mr. Khrushchev at the dinner in his honor given by the President at the White House. I introduced Senator LYNDON JOHNSON to Mr. Khrushchev by saying, "Senator JOHNSON, as you know, is the leader of the opposition party in the Senate." Mr. Khrushchev responded by saying, "Well, I've never been able to see any differences between your two parties in the United States."

He was certainly right in one respect. There is no difference between the two parties in their support of the President's uncompromising stand for the right of people everywhere to choose the kind of government they want and against those who by their aggressive policies would imperil or deny that right.

The summit finally provides an opportunity for us to clarify our position toward the Communist bloc during the kind of peaceful competition which Mr. Khrushchev invites.

We can and will make clear that the moral difference between our system and the Soviet system is fundamental and cannot be narrowed in any way by the dialog of peaceful competition. We can establish once again that we will not trade away our belief in that fundamental right of peoples to freely choose their own form of government.

At the same time we can make equally clear that we have come to Paris to make a determined effort to reduce the risks of atomic war and that we are ready for real progress toward control of armaments and an end to the recurring crises threatening atomic war.

We should demonstrate our willingness to participate in discussions which might attain these objectives at this summit conference and at other summit conferences in the future if they are needed.

What chance is there that any or all of these objectives can be partially or wholly attained at the summit? This depends primarily on Mr. Khrushchev.

Never before in history has a man had more responsibility for the fate of mankind in his hands than Mr. Khrushchev will have at this conference.

As I said in my farewell radio-television address to the Soviet people, "If he devotes his immense energies and talents to building a better life for the people of his own country, Mr. Khrushchev can go down in history as one of the greatest leaders the Soviet people have ever produced. But if he diverts the resources and talents of his people to the objective of promoting the communization of countries outside the Soviet Union he will only assure that both he and his people will continue to live in an era of fear, suspicion and tension."

What will Mr. Khrushchev's attitude be at Paris? There are strong reasons to believe that Mr. Khrushchev may actually want to

make progress at this conference toward disarmament and in reaching settlement on some of the explosive issues which confront us. I think this may be his attitude not because he is motivated by what he scorns as sentimental idealism but because, realist that he is, he is concerned by some hard facts of international life.

What are the circumstances that tend to convince Mr. Khrushchev that disarmament and reduction of tensions are in his self-interest?

Mr. Khrushchev never fails to obtain satisfaction from pointing out the weaknesses and divisions which he believes plague the West. We must remember as the summit approaches that he, too, has problems.

There is the demonstration of freedom in action which free Berlin affords to the people of East Germany.

There is the unceasing restlessness of the satellites some of which are under intolerable state of occupation by foreign troops.

There are the natural desires of his own Soviet peoples for an increasing share of their limited productivity, so much of which now goes into armaments.

And while it is probably too early to conclude that he may be troubled by his Chinese ally, it is appropriate to call to your attention that our distinguished guest, President de Gaulle, has suggested that he may well be deeply concerned by the nightmare which is taking form on his long common border with China.

Finally, Mr. Khrushchev is bound to be influenced by the fact that he has seen, as we have, the diabolical enormity of nuclear weapons. Some of the Soviet nuclear devices have been among the dirtiest, radioactively speaking that have ever been exploded.

On the basis of my conversations with him, I am convinced that he is proud of what communism has done in the Soviet Union. He would prefer not to risk destruction of that progress.

And, as Chancellor Adenauer put it, while Mr. Khrushchev and his Communist colleagues will never cease to work for their basic objective of a Communist world, they would prefer that the world over which they rule will not be one of ruined cities and dead bodies.

In other words, Mr. Khrushchev believes he can accomplish his objective of world domination without war, that he can win more and lose less by peaceful competition than by resort to war.

These, then, are the stark realities which will be working at Paris in behalf of progress toward disarmament and the settlement of differences without war.

It is because the hard facts of international life are on the side of peace and disarmament that I believe that we can look to this conference and to the future not with starry-eyed complacency but with justifiable confidence that responsible world leaders will slowly but inevitably develop more effective methods for settling differences between nations without war.

The Religious Issue in American Politics

EXTENSION OF REMARKS

OF

HON. CHESTER BOWLES

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Monday, April 25, 1960

Mr. BOWLES. Mr. Speaker, most thoughtful people have been rightly alarmed at the proportions the issue of religion has suddenly assumed on the national political scene. Despite the best efforts of the primary candidates themselves to place the question in proper perspective, press reports have persistently tended to magnify its importance.

Under these circumstances, I think that Senator KENNEDY's remarkable address to the American Society of Newspaper Editors here in Washington last Thursday, April 21, deserves careful reading by every thoughtful American. His statement is forthright, unequivocal, and in the highest traditions of American public service.

Let us hope that, once and for all, there will be an end to innuendo and distortion from whatever quarter they may spring. There are great public issues to be debated and discussed. The candidates themselves have been discussing them and want to continue to discuss them. Let us let them concentrate on the real issues and debate them fully and thoroughly, and with their own and the country's undivided attention.

I submit for my colleagues' thoughtful attention Senator KENNEDY's address:

THE RELIGIOUS ISSUE IN AMERICAN POLITICS

(By the Honorable JOHN F. KENNEDY, to the American Society of Newspaper Editors, Washington, April 21, 1960)

I have decided, in view of current press reports, that it would be appropriate to speak with you today about what has widely been called the religious issue in American politics.

The phrase covers a multitude of meanings. There is no religious issue in the sense that any of the major candidates differ on the role of religion in our political life. Every presidential contender, I am certain, is dedicated to the separation of church and state, to the preservation of religious liberty, to an end to religious bigotry, and to the total independence of the officeholder from any form of ecclesiastical dictation.

Nor is there any real issue in the sense that any candidate is exploiting his religious affiliation. No one's candidacy, by itself, raises a religious issue. And I believe it is inaccurate to state that my candidacy created the issue—that, because I am replying to the bigots, I am now running on the religious issue in West Virginia—or that my statements in response to interrogation are fanning the controversy. I am not trying to be the first Catholic President, as some have written. I happen to believe I can serve my Nation as President—and I also happen to have been born a Catholic.

Nor am I appealing, as is too often claimed, to a so-called Catholic vote. Even if such a vote exists—which I doubt—I want to make one thing clear again: I want no votes solely on account of my religion. Any voter, Catholic or otherwise, who feels another candidate would be a superior President should support that candidate. I do not want any vote cast for me for such illogical and irrelevant reasons.

Neither do I want anyone to support my candidacy merely to prove that this Nation is not bigoted—and that a Catholic can be elected President. I have never suggested that those opposed to me are thereby anti-Catholic. There are ample legitimate grounds for supporting other condidates (though I will not, of course, detail them here).

Nor have I ever suggested that the Democratic Party is required to nominate me or face a Catholic revolt in November. I do not believe that to be true; I cannot believe our convention would act on such a premise, and I do believe that a majority of Americans of every faith will support the Democratic nominee, whoever he is.

WHAT IS THE ISSUE?

What, then, is the so-called religious issue in American politics today? It is not, it seems to me, my actual religious convictions, but a misunderstanding of what those convictions actually are. It is not the actual existence of religious voting blocs, but a suspicion that such voting may exist. And when we deal with such public fears and suspicions, the American press has a very grave responsibility.

I know the press did not create this religious issue. My religious affiliation is a fact—religious intolerance is a fact. And the proper role of the press is to report all facts that are a matter of public interest.

But the press has a responsibility, I think you will agree, which goes far beyond a reporting of the facts. It goes beyond lofty editorials deploring intolerance. For my religion is hardly, in this critical year of 1960, the dominant issue of our time. It is hardly the most important criterion, or even a relevant criterion, on which the American people should make their choice for Chief Executive. And the press, while not creating the issue, will largely determine whether or not it does become dominant; whether it is kept in perspective; whether it is considered objectively; whether needless fears and suspicions are stilled instead of aroused.

The members of the press should report the facts as they find them. But they should beware, it seems to me, of either magnifying this issue or oversimplifying it.

I spoke in Wisconsin, for example, on farm legislation, foreign policy, defense, civil rights, and several dozen other issues. But I rarely found them reported in the press, except when they were occasionally sandwiched in between descriptions of my handshaking, my theme song, family, haircut, and inevitably, my religion.

At almost every stop in Wisconsin I invited questions and the questions came—on price supports, labor unions, disengagement, taxes, and inflation. But these sessions were rarely reported in the press except when one topic was discussed: religion.

One article, in a news magazine for example, supposedly summing the primary up in advance, mentioned the word "Catholic" 20 times in 15 paragraphs—not mentioning even once dairy farms, disarmament, labor legislation, or any other issue. And, on the Sunday before the primary, the Milwaukee Journal featured a map of the State, listing county by county the relative strength of three types of voters—Democrats, Republicans, and Catholics.

PROBLEMS ARE STRESSED

Now we are in West Virginia. As reported to today's Washington Post, the great bulk of West Virginians paid very little attention to my religion until they read repeatedly in the Nation's press that this was the decisive issue in West Virginia. There are many serious problems in that State—problems big enough to dominate any campaign—but religion is not one of them.

I do not think that religion is the decisive issue in any State. I do not think it should be. And, recognizing my own responsibilities in that regard, I am hopeful that you will recognize yours also.

For the past month and years I have answered almost daily inquiries from the press about the religious issue. I want to take this opportunity to turn the tables—and to raise some questions for your thoughtful consideration.

First. Is the religious issue a legitimate issue in this campaign?

There is only one legitimate question underlying all the rest: Would you, as President of the United States, be responsive in any way to ecclesiastical pressures or obligations of any kind that might in any fashion influence or interfere with your conduct of that office in the national interest? I have answered that question many times. My answer was and is "No."

Once that question is answered, there is no legitimate issue of my religion. But there are, I think, legitimate questions of public policy—of concern to religious groups which no one should feel bigoted about raising, and to which I do not object answering. But I do object to being the only candidate required to answer those questions.

Federal assistance to parochial schools, for example, is a very legitimate issue actually before the Congress. I am opposed to it. I believe it is clearly unconstitutional. I voted against it on the Senate floor this year, when offered by Senator MORSE. But interestingly enough, I was the only announced candidate in the Senate who did so. Nevertheless I have not yet charged my opponents with taking orders from Rome.

THE ENVOY ISSUE

An ambassador to the Vatican could conceivably become a real issue again. I am opposed to it, and said so long ago. But even though it was last proposed by a Baptist President, I know of no other candidate who has been even asked about this matter.

The prospects of any President ever receiving for his signature a bill providing foreign aid funds for birth control are very remote indeed. It is hardly the major issue some have suggested. Nevertheless I have made it clear that I would neither veto nor sign such a bill on any basis except what I considered to be the public interest, without regard to my private religious views. I have said the same about bills dealing with censorship, divorce, our relations with Spain or any other subject.

These are legitimate inquiries about real questions which the next President may conceivably have to face. But these inquiries ought to be directed equally to all candidates. I have made it clear that I strongly support—out of conviction as well as constitutional obligation—the guarantees of religious equality provided by the first amendment—and I ask only that these same guarantees be extended to me.

Secondly, can we justify analyzing voters as well as candidates strictly in terms of their religion? I think the voters of Wisconsin objected to being categorized simply as either Catholics or Protestants in analyzing their political choices. I think they objected to being accosted by reporters outside of political meetings and asked one question only—their religion—not their occupation or education or philosophy or income—only their religion.

And I think they had a right to object. The flood of postprimary analyses on the so-called Catholic vote and Protestant vote—carefully shaped to conform with their author's preprimary predictions—would never be published in any competent statistical journal.

Only this week, I received a very careful analysis of the Wisconsin results. It conclusively shows two significant patterns of bloc voting: I ran strongest in those areas where the average temperature in January was 20 degrees or higher, and poorest in those areas where it was 14 degrees or lower—and that I ran well in the beech tree and basswood counties and not so well among the hemlock and pine.

Anyone who thinks these trends are merely coincidences of no relevance has never tried to campaign in Wisconsin in January. In any event, this analysis is being rushed to West Virginia, where I am assured that the winter is less severe and the basswood are abundant. It has been suggested, that to offset my apparent political handicaps I may have to pick a running mate from Maine or, preferably, Alaska.

KENNEDY DOUBTS ANALYSES

The facts of the matter are that this analysis stands up statistically much better than all the so-called analyses of the religious vote. And so do analyses of each county based on their distance from the Minnesota border, the length of their Democratic tradition and their inclusion in my campaign itinerary. I carried some areas with large proportions of voters who are Catholics—and I lost some. I carried some areas where Protestants predominate—and I lost some.

It is true that I ran well in cities—and large numbers of Catholics live in cities. But so do union members and older voters and veterans and chess fans and basswood lovers. To say my support in the cities is due only to the religion of the voters is incapable of proof and an unfair indictment of their political maturity.

Of those Catholics who voted for me, how many did so on grounds of my religion; how many because they felt my opponent was too radical; how many because they resented the attacks on my record; how many because they were union members; how many for some other reason? I do not know. And the facts are that no one knows.

For the voters are more than Catholics, Protestants, or Jews. They make up their minds for many diverse reasons, good and bad. To submit the candidates to a religious test is unfair—to apply it to the voters themselves is divisive, degrading, and wholly unwarranted.

Third and finally: Is there any justification for applying special religious tests to one office only—the Presidency? Little or no attention was paid to my religion when I took the oath as Senator in 1953—as a Congressman in 1947—or as a naval officer in 1941. Members of my faith abound in public office at every level except the White House. What is there about the Presidency that justifies this constant emphasis upon a candidate's religion and that of his supporters?

The Presidency is not, after all, the British Crown, serving a dual capacity in both church and state. The President is not elected to be protector of the faith—or guardian of the public morals. His attendance at church on Sunday should be his business alone, not a showcase for the Nation.

On the other hand, we are in no danger of a one-man constitutional upheaval. The President, however intent he may be on subverting our institutions, cannot ignore the Congress—or the voters—or the courts. And our highest court, incidentally, has a long history of Catholic Justices, none of whom, as far as I know, was ever challenged on the fairness of his rulings on sensitive church-state issues.

Some may say we treat the Presidency differently because we have had only one previous Catholic candidate for President. But I am growing weary of that term. I am not the Catholic candidate for President. I do not speak for the Catholic church on issues of public policy—and no one in that church speaks for me. My record on aid to education, aid to Tito, the Conant nomination and other issues has displeased some prominent Catholic clergymen and organizations; and it has been approved by others. The fact is that the Catholic church is not a monolith—it is committed in this country to the principles of individual liberty—and it has no claim over my conduct as a public officer sworn to do the public interest.

So I hope we can see the beginning of the end of references to me as "the Catholic candidate" for President. Do not expect me to explain or defend every act or statement of every Pope or priest, in this country or some other, in this century or the last—and that includes the mayor of Dijon.

TWO ALTERNATIVES NOTED

I have tried to examine with you today the press' responsibility in meeting this religious issue. The question remains: What is my responsibility? I am a candidate. The issue is here. Two alternatives have been suggested:

1. The first suggestion is that I withdraw to avoid a "dangerous religious controversy"; and accept the Vice Presidential nomination in order to placate the so-called Catholic vote.

I find that suggestion highly distasteful. It assumes the worst about a country which prides itself on being more tolerant and better educated than it was in 1928. It assumes that Catholics are a pawn on the political chessboard, moved hither and yon, and somehow "bought off" by the party putting in the second spot a Catholic whom the party barred from the top for reasons of religion. And it forgets, finally, that such a performance would have an effect on our image abroad as well as our self-respect here at home.

Are we going to admit to the world that a Jew can be elected mayor of Dublin, a Protestant can be chosen Foreign Minister of France, a Moslem can serve in the Israeli Parliament—but a Catholic cannot be President of the United States? Are we to tell Chancellor Adenauer, for example, that we want him risking his all on our front lines; but that—if he were an American—we would never entrust him with our Presidency—nor would we accept our distinguished guest, General De Gaulle? Are we to admit to ourselves—that one-third of our population the world—worse still, are we to admit to is forever barred from the White House?

So I am not impressed by those pleas that I settle for the Vice Presidency in order to avert a religious spectacle. Surely those who believe it dangerous to elect a Catholic as President will not want him to serve as Vice President, a heartbeat away from the office.

2. The alternative is to proceed with the primaries, the convention, and the election. If there is bigotry in the country, then so be it—there is bigotry. If that bigotry is too great to permit the fair consideration of a Catholic who has made clear his complete independence and his complete dedication to separation of church and state, then we ought to know it.

But I do not believe that this is the case. I believe the American people are more concerned with a man's views and abilities than with the church to which he belongs. I believe that the Founding Fathers meant it when they provided in article VI of the Constitution that there should be no religious test for public office—a provision that brought not one dissenting vote, only the comment of Roger Sherman that it was surely unnecessary—"the prevailing liberality being a sufficient security against such tests." And I believe that the American people mean to adhere to those principles today.

But regardless of the political outcome, this issue is here to be faced. It is my job to face it frankly and fully. And it is your job to face it fairly, in perspective, and in proportion.

I am confident that the press and other media of this country will recognize their responsibilities in this area—to refute falsehood, to inform the ignorant, and to concentrate on the issues, the real issues, in this hour of the Nation's peril.

The Supreme Court has written that as public officials, "we are neither Jew nor gentile, neither Catholic nor agnostic. We owe equal attachment to the Constitution and are equally bound by our obligations whether we derive our citizenship from the earliest or latest immigrants to these shores * * * [for] religion is outside the sphere of political government."

We must all, candidates, press, and voters alike, dedicate ourselves to these principles—for they are the key to a free society.

Washington Report

EXTENSION OF REMARKS
OF
HON. BRUCE ALGER
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Monday, April 25, 1960

Mr. ALGER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following newsletter of April 23, 1960:

WASHINGTON REPORT
(By Congressman BRUCE ALGER, Fifth District, Texas)

The Mutual Security Act, authorizing foreign aid funds for fiscal 1961, saw history simply repeating itself as the House debated and passed it this week. We heard the same arguments for and against, the same damning criticisms of waste and mismanagement in the program. Yet, the spending goes on and on. The debate pointed up once more that the program needs review and reprograming before continuation; that Congress has lost more control of the yearly military expenditures and Development Loan Fund; that dictators, government leaders, and industrialists abroad are helped while the people, nation by nation, are all too frequently overlooked; that the bureaucracy in the ICA keeps the program self-perpetuating; that mistakes are being condoned and repeated instead of corrected.

What is the cost of foreign aid yearly? Who knows? The requests which some of us have regularly made for review and study go unheeded as we rush headlong into more programs and bigger spending. According to figures submitted by Georgia's Representative J. L. PILCHER and Representative OTTO PASSMAN of Louisiana, there is already $8.1 billion in the aid "pipeline" as yet unobligated or expended. This doesn't take into account our contribution of agricultural surpluses, the total of military construction, investments in six or more international banks, foreign currencies we own, cost of the surplus excess property, or offshore procurement costs. So now we authorize another $1.3 billion in economic aid, plus $2.7 billion of military and Development Loan Fund amounts. Mind you, if we never spent another dime on foreign aid, we'd still have to get up about $3.5 billion a year just to pay the interest charges on the money we have already poured into the program.

A few mistakes or instances of waste—even more than a few—should not condemn such a program as foreign aid, but examples of error, waste, mismanagement, lack of objectives, overprograming, and underplanning in our programs is almost endless. Thus we have found ourselves often aiding potential enemies while alienating our friends. Some basic truths cannot be wished away. It remains a fact that, as a nation, we cannot spend ourselves rich nor can we buy friends. Too, however altruistic our aims and motions, we are not sufficiently rich to supply the world's material needs. If we spread ourselves too thinly trying, we can only weaken or bankrupt ourselves, and in the process appear absurdly foolish in the eyes of those we're trying to help and who look to us for leadership.

Our job then, it seems to us, is threefold: First, to help others help themselves; second, to foster and preserve institutions and governments which share our dedication to freedom; and, third, to keep ourselves economically strong. Only with such a hardheaded, realistic "aid" program can we win respect and influence people. I sincerely believe that our present foreign aid program fails basically in all these objectives and needs a thorough replanning and overhauling.

My recommendations of a year ago on foreign aid (recounted in my newsletter then) are still so timely that I repeated them in floor argument this year: (1) That our traditional generous private charity and governmental grants to relieve disaster be continued; that we encourage the expansion of our private missionary efforts; (2) that in countries which we are morally obligated to defend and which are directly threatened with Red aggression, military assistance—for the time being—should be continued, but on a realistic basis; (3) that foreign aid which directly or indirectly promotes governments that are hostile to our constitutional concepts of government be terminated immediately; (4) that so long as governmental foreign aid is continued, the recipient should pay a part of the cost of the proposed project; that our aid should terminate when the conditions on which that request is based have been remedied; that private technical, scientific, and educational assistance be extended only to friendly peoples who seek our aid on a cash or loan basis; (5) that until foreign aid in terminated, the Congress take steps properly to exercise close supervision and control over the manner in which all foreign aid funds are being spent; that all future economic aid, plus what can be salvaged from unexpended foreign aid funds, be diverted to and handled by the Export-Import Bank; (6) that the $3.9 billion requested for the fiscal year 1960 be reduced $2 billion and that each year thereafter foreign aid be substantially reduced until terminated within 3 years; and (7) that military matters be left to our military and foreign affairs be left to the State Department, and their existing organizations, so we can dismantle the huge 50,000-person foreign aid bureaucracy, and stop the duplication of efforts.

Depressed Areas and Foreign Aid

EXTENSION OF REMARKS
OF
HON. JOHN P. SAYLOR
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Monday, April 25, 1960

Mr. SAYLOR. Mr. Speaker, the semiannual report of the National Advisory Council on International Monetary and Financial Problems reached my desk just 10 days after the U.S. Department of Labor's periodic statistics on the unemployment situation. I am not going to refer to statistics presented in the latter publication because by now every Member of Congress should be familiar with the labor surplus problem.

Committees of both the House and Senate have in recent years conducted studies into the matter of chronic unemployment. The persistence of economic stagnation in numerous areas of this Nation has been a matter of public record. Hardship and privation in surplus labor areas have been recognized by both the legislative and executive branches of the Federal Government, and an urgent need for remedial action has been admitted by spokesmen of both political parties. Yet week after week, month after month, year after year there has been a sabotaging of every honest effort to enact necessary legislation.

Today it is the House Rules Committee that refuses to release the brakes on the rescue train whose cargo is economic assistance assigned to depressed areas. While I am hopeful that this opposition will be dissipated shortly under the continued barrage of criticism from an angry public that has become impatient of the delaying tactics of those responsible Democratic Party leaders, Congress must remain on guard against attempts to encumber this relief mission with the kind of legislative gallimaufry that was used to derail the area development program at a previous session.

Now let us take a look at the goings-on in the Development Loan Fund, as reported by the National Advisory Council. Since its establishment in 1957, Development Loan Fund has made loan commitments amounting to more than three-quarters of a billion dollars for—to quote the report—"economic development in the less-developed areas of the free world."

During the first half of 1959, the most recent period covered in the report, Development Loan Fund has authorized new loans for such projects as: power transmission lines, a gas treating plant, and equipment for charting inland waterways in Pakistan; roads and bridges in Malaya; and what are described as "economic overhead projects" in Uruguay, Haiti, Bolivia, Nicaragua, and Chile. For Red Yugoslavia, a total of $14 million was earmarked to assist in financing the purchase of diesel locomotives and the construction of a thermal powerplant.

I ask my colleagues to keep this imponderable situation in mind, whereby vast sums of American funds are made available to friends and foes alike in far-off reaches around the world while U.S. communities are denied a small percentage of such expenditures for the express purpose of getting our own people back to work. If this discrepancy is considered when our area development bill comes to the floor, I cannot understand how a single Member of the House could fail to object to the continued neglect of our own citizens in favor of more favors for those abroad.

HOUSE OF REPRESENTATIVES

TUESDAY, APRIL 26, 1960

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D.D., offered the following prayer:

I Peter 1: 25: *The word of the Lord endureth forever.*

O Thou who art our strength for today and our hope for the morrow, may we daily seek more earnestly that purity of life by which Thou art known and that fidelity of true devotion with which Thou art pleased.

Grant unto us the strengthening and sustaining blessings of Thy plenteous grace when the burdens of life are heavy to bear and we are in dire plight of faith by reason of tidings of worldwide tensions and troubles which fill us with fear and foreboding.

We pray that we may conquer our haunting anxieties and inner discords by surrendering our disquieted and disturbed souls to Thy divine spirit, waiting to kindle our fading lamp of courage and to impart unto our minds Thy peace and unto our hearts Thy love.

Hear us in the name of our blessed Lord who walked our human way and went about doing good. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed, with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 10569. An act making appropriations for the Treasury and Post Office Departments, and the Tax Court of the United States for the fiscal year ending June 30, 1961, and for other purposes.

The message also announced that the Senate insists on its amendments to the foregoing bill, requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. ROBERTSON, Mr. MCCLELLAN, Mr. CHAVEZ, Mr. HAYDEN, Mr. MONRONEY, Mr. JOHNSTON of South Carolina, Mr. HRUSKA, Mr. BRIDGES, and Mr. KUCHEL to be the conferees on the part of the Senate.

The message also announced that the Senate agrees to the amendment of the House to a bill of the Senate of the following title:

S. 1751. An act to place in trust status certain lands on the Wind River Indian Reservation in Wyoming.

COMMITTEE MEETING DURING SESSION OF HOUSE

Mr. MCCORMACK. Mr. Speaker, I ask unanimous consent that Subcommittee No. 5 of the House Small Business Committee may have permission to sit during general debate tomorrow, and Thursday and Friday.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. MCCORMACK. Mr. Speaker, I ask unanimous consent that the Committee on Science and Astronautics may be permitted to sit during general debate today.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

WHAT IS DEMOCRATIC POLITICAL FREEDOM?

Mr. MEYER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Vermont?

There was no objection.

Mr. MEYER. Mr. Speaker, when a Communist country holds an election we criticize the absence of choice in the balloting. According to our standards, such criticism is valid. Should we not be even more critical when such elections take place in what is called the free world.

Our press frequently refers to Formosa as a bastion of freedom in the Far East, but this is what happened in the recent election of Nationalist China:

First. President Chiang Kai-shek was the only candidate allowed on the ballot.

Second. The constitution was suspended for 1 day because it forbade a third term.

Third. The only way electors could vote against Chiang was to cast a blank ballot and so they were thrown out as invalid.

Fourth. Eighty-five percent of the Formosans are native Taiwanese but they were allotted only 2 percent of the electoral votes.

Legitimate criticism of Communist China on the grounds of rigged elections would be undermined by such free elections in Nationalist China.

We have seen the results in South Korea of straying too far from professions of some form of democratic process.

We cannot justify that which is wrong on the grounds of expediency.

SYNGMAN RHEE

Mr. DORN of South Carolina. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. DORN of South Carolina. Mr. Speaker, Syngman Rhee is one of the great men of world history. During this time of neutrals and wavering friends, Syngman Rhee has stood as a tower of strength against the onslaughts of atheistic communism. America has never had a more loyal, stanch, courageous friend. He has been the symbol of freedom against tyranny and oppression. He has kept alive democratic hopes, principles, and ideals in the Far East. The loss of this peerless leader and his bastion of freedom may result from Secretary Herter's untimely and uncalled-for criticism of this great patriot last week. Secretary Herter literally pulled the rug from under Syngman Rhee. It is difficult for me to understand this policy of destroying our real allies while handling Khrushchev and his satellites with kid gloves. Secretary Herter's criticism of our great ally touched off a tirade of anti-Rhee sentiment throughout the United States. It was the signal for columnists and commentators to undermine Rhee. Much has been said by left-wing commentators about what America did for South Korea—nothing about what Syngman Rhee did to hold the line in the Pacific against overwhelming odds. No man ever made a greater contribution to the cause of freedom and stability in the Pacific than Syngman Rhee. He and his people need the support of every loyal American during this time of crisis.

VISITING NURSES ASSOCIATION OF WASHINGTON

Mr. MCCORMACK. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. MCCORMACK. Mr. Speaker, it is a pleasure for me to call to the attention of the House that the Visiting Nurses Association of Washington is celebrating this week the 60th anniversary of its founding. It is well that we pause and commend the Visiting Nurses Association for the noble work they are doing for mankind. They are always ready and willing to minister to the sick and ailing, and they do so without seeking for glory or reward. I have seen them many times going from home to home on their mission of mercy. On this their 60th anniversary I wish them well, and I am sure they have the blessings of countless numbers of people whom they have helped.

SIXTY YEARS OF UNSELFISH SERVICE

Six decades have elapsed since the incorporation of the Instructive Visiting Nurse Society of Washington by the 48th Congress. We can trace the origin of visiting nurses still further, back 100 years, to Liverpool, England, or back 75 years, to the establishment of visiting nurses' associations in Buffalo, Boston, and Philadelphia, shortly after the opening of the famous Henry Street Settlement Visiting Nurse Service. Today there are about 700 visiting nurses' associations in the United States.

These years have been marked by the finest example of dedication and service that I know. The description of their

activities included in their first report is still fitting today:

Terrible illness and destitution are revealed and cared for and confidential relations are established between families and the helpful visitor.

The visiting nurse shares proudly with the physician and other health workers in the decline in infant mortality from 281.8 deaths per 1,000 in 1900 to 32.2 in 1957 and in the drop of the general death rate from 21.7 in 1900 to 9.6 in 1957.

In 1958 the Visiting Nurses of the District of Columbia made 98,190 visits and cared for 11,608 persons. About 60 percent of their calls came from hospitals and the rest from families, family physicians, and social agencies. Maternity cases comprised about 30 percent of their visits. But how can the real value of their services in terms of the alleviation of human need and suffering be measured?

I am most especially impressed with the way in which the work of this organization is financed. If a family is able to do so, they pay for the visit. If not, they receive the service anyway, regardless of color, race, or creed. The Visiting Nurses Association is able to do this because they receive funds from the United Givers Fund and other groups to help finance services to those who are not able to pay.

We take for granted the nursing services in hospitals, public health centers, even schools or places of employment. But often the greatest need for nursing assistance is in the home. Think of the mother with four children who fractures a leg. Or the 90-year-old man who suddenly falls ill. Or the handicapped child who is in need of physical therapy. There is no substitute for the trained, patient, and cheerful presence of the visiting nurse.

We owe a debt of gratitude to visiting nurses all over the country. I recall at this time the following words which aptly describe the kind of spirit which pervades all visiting nurses associations:

The service of healing is no easy calling. It calls again and again on men and women for the heroic selflessness which places humanity above personal safety.

PROMOTING THE GENERAL WELFARE OF THOSE WHO LIVE IN CITIES

The SPEAKER. Under previous order of the House, the gentleman from New York [Mr. LINDSAY] is recognized for 30 minutes.

Mr. LINDSAY. Mr. Speaker, it is high time we respected the U.S. Government's obligation to promote the general welfare of our citizenry who live in cities.

In 1900 there were 24 million people living in urban areas. Today there are 100 million. The 1960 census probably will reveal that this 70 percent of our population live in 174 metropolitan areas. These urban centers have become the core of our national economy. They are the production centers which bring together labor, finance, and raw materials with which the country progresses.

The inescapable conclusion drawn from this trend is that we can no longer be satisfied with a "Scotch tape" job on our urban problems. Our cities need housing and access and clean air and light. Transportation, sewage disposal, water supply, and airports are city problems that are crying for solution. But instead slums and urban decay race ahead of progress.

How do we go about finding long-range solutions? Obviously, local responsibility—State and municipal—is paramount. At the same time, the Federal Government is the government of all the people and the problems created by changes in our economic, social, and geographical patterns must be the concern of the Federal Government. If we allow further deterioration of our urban centers and fail to promote their dynamic growth, we will be guilty of permitting the erosion of the base of our economy.

To meet the growing needs of our cities the Federal Government to date has set up an array of activities and programs. But these programs are administered by at least five major Federal departments and independent agencies and at least as many lesser ones. Each department or agency has several separate bureaus, divisions, and branches which are in some manner concerned with aspects of urban living. Each bureau, administration, or other office has its own requirements and regulations which must be met whether or not they conflict with the requirements of other units. We cannot operate effectively unless we harness the separate efforts of private enterprise, State, local, and the Federal Governments into a coordinated effort.

In my view the interests of both the local and State governments and the Federal Government would be more economically and efficiently served through the coordination in a single executive department of all Federal activities concerned with urban affairs. Such a department could far more clearly delineate the responsibilities and the services to be rendered by each level of government. A Department of Urban Affairs would bring the Federal Government structure up to date with our changing times. The problems growing out of the urbanization of our society completely justify the inclusion of our cities at the Cabinet level. The exclusion of cities from the highest councils of government is one reason why conflicting policies abound or no overall policies exist at all.

We have in our Federal establishment an enormous Department of Agriculture which reflects and echoes the thinking of less than 20 million farmers. A Department of Labor concerns itself with 20 million organized workers. The Department of Interior nurses along the interests of our Western States. Of course there is historical justification for each of these. But I submit that there is even more justification in this decade for a coordinated governmental effort in the realm of urban affairs. As it now stands the cries of our cities hardly produce the faintest echoes in the high councils of Government.

There have been proposals in the past to create a Cabinet level Department of Urban Affairs. I have today proposed a new one.

The purposes of the act to establish a Department of Urban Affairs are stated in the first section of my bill. This preamble is important because it states the need for and the purpose of the bill. It says that Congress recognizes the rapidly increasing urbanization of the United States and the resulting problems in housing, urban renewal, slum clearance, prevention and elimination of urban blight, air and water pollution, water supply, sewage facilities, transportation, and other areas. It reminds us that as urbanization increases, the needs of our urban population also will increase. It emphasizes the importance of education, research, and technical assistance to municipal governments. It stresses the importance of focusing attention for the solution of urban problems in the highest councils of Government. Accordingly, my bill provides for the establishment of an executive department headed by a Secretary, appointed by the President, confirmed by the Senate.

There is established in the Department an Advisory Council known as the Federal Urban Affairs Advisory Council. Members of the Council shall be appointed by the President upon nomination by the Secretary from among persons with broad experience and interest in urban affairs and related problems. This Council may include persons outside the Federal service. The Secretaries of Labor, Treasury, Commerce, Health, Education, and Welfare, and the Administrator of Veterans' Affairs shall be members ex officio. Members of the Council shall receive no compensation for their services other than reimbursement for necessary travel and subsistence expenses. The Council will provide a forum for the coordination of the interrelated functions of the Departments and the establishment of an integrated policy. In the same context, it will provide an opportunity to harness the combined thinking of Federal, State, and local officials along with private enterprise.

My bill transfers all functions of HHFA and its constituent agencies to the Department of Urban Affairs. It further provides that the President shall submit to the Congress reorganization plans to effectuate the transfer of these functions and to assist appropriately in the accomplishment of the purposes of the act.

In conclusion, let me point out that this bill should in no way constitute any additional drain on the Treasury. It merely assembles under one roof all the Federal functions and offices now in existence. What is vital though is that it will allow for the first time a consistent and coordinated approach to this important and ever increasing problem of urban needs.

H.R. 11918

A bill to establish the Department of Urban Affairs and prescribe its functions

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

PURPOSE OF ACT

SECTION 1. The Congress finds that the rapidly increasing urbanization of the United States, with its accompanying social and economic changes, creates new, and accentuates existing, problems in fields such as housing, urban renewal, slum clearance, prevention and elimination of urban blight, air and water pollution, water supply, sewage facilities, transportation, and many others. As the proportion of the population of the United States living in urban areas increases, the needs of the urban population, especially in the field of housing, will become increasingly serious. The burdens placed on facilities and services in urban areas by their rapidly increasing population are such that existing facilities and services daily become more inadequate. Ever-increasing efforts are continually required in order to maintain such facilities at current levels, and still greater efforts are required to provide even minimal improvements therein.

The growth of urban areas across State lines, and the increasing complexity of our society, makes the problems of urban areas increasingly interstate problems. The manner in which such problems are dealt with affects the entire Nation.

In view of the foregoing, the Congress finds that the needs of urban areas are so pressing, and have such an impact upon the Nation as a whole, that Federal action is required to assist in meeting the problems of urban areas through housing programs, and through education, research, technical services, and other programs designed to assist in meeting the needs of urban areas.

It is, therefore, the purpose of this Act to provide for the establishment of a Federal department to represent the needs of urban areas, and to serve as a central place for the assessment of the overall results of Federal programs having an impact upon urban areas, and to coordinate such programs.

ESTABLISHMENT OF DEPARTMENT OF URBAN AFFAIRS

SEC. 2. (a) In order to carry out the purpose of this Act, there is hereby established an executive department to be known as the Department of Urban Affairs (hereinafter referred to in this Act as the "Department"), at the head of which shall be a Secretary of Urban Affairs (hereafter referred to in this Act as the "Secretary") who shall be appointed by the President, by and with the advice and consent of the Senate. Under the Secretary shall be an Under Secretary, three Assistant Secretaries, and a General Counsel, who shall perform such functions as the Secretary shall prescribe and who shall be appointed in the same manner as the Secretary.

(b) The Secretary, Under Secretary, Assistant Secretaries, and General Counsel shall receive compensation at the rates prescribed for these positions in the other executive departments.

FEDERAL URBAN AFFAIRS COUNCIL

SEC. 3. There shall be in the Department of Urban Affairs an Advisory Council, known as the Federal Urban Affairs Council. Members of the Council shal be appointed by the President upon nomination by the Secretary of Urban Affairs from among persons with broad experience and interest in urban and related problems, and may include persons outside the Federal service. The following Federal officials are hereby designated as members ex officio of the Urban Advisory Council: Secretary of Labor, Secretary of Commerce, Secretary of Health, Education, and Welfare, Secretary of the Treasury, and Administrator of Veterans' Affairs. The President may designate other Federal officials as ex officio members of the Council. Members of the Council shall receive no compensation for their services, but shall be reimbursed for necessary travel and subsistence expenses as provided in the Travel Expense Act of 1949, as amended. The Council shall meet at the call of the Secretary of Urban Affairs, but not less than twice a year.

FUNCTIONS AND TRANSFERS

SEC. 4. (a) All functions of the Administrator of the Housing and Home Finance Agency are transferred to the Secretary. The constituent agencies of the Housing and Home Finance Agency, together with their respective functions, personnel, property, records, and unexpended balances of appropriations, allocations, and other funds (available or to be made available), and all other functions, personnel, property, records, and unexpended balances of appropriations, allocations, and other funds (available or to be made available) of the Housing and Home Finance Agency, are hereby transferred to the Department.

(b) The Housing and Home Finance Agency and the office of Administrator of the Housing and Home Finance Agency are hereby abolished.

(c) The President shall submit to the Congress reorganization plans providing for the transfer of such functions from officers or agencies of the executive branch of the Government to the Secretary as the President deems appropriate to assist in accomplishing the purposes of this Act.

DEPARTMENTAL SEAL

SEC. 5 .The Secretary shall cause a seal of office to be made for the Department, of such design as the President shall approve, and judicial notice shall be taken thereof.

DELEGATION OF AUTHORITY

SEC. 6. The Secretary may from time to time make such provisions as he deems appropriate authorizing the performance of any of the functions of the Secretary by any other officer, or by any agency employee, of the Department.

SHORT TITLE

SEC. 7. This Act may be cited as the "Department of Urban Affairs Act."

URBAN PROBLEMS

Mr. TEAGUE of California. Mr. Speaker, I ask unanimous consent that the gentleman from California [Mr. YOUNGER] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. YOUNGER. Mr. Speaker, naturally I am delighted to see the increased awareness of the urban problems and their relation to the Federal Government. The gentleman from New York [Mr. LINDSAY] has just made a fine contribution toward the solution by advocating a Department of Urban Affairs. For the past 6 years my bill to create a Department of Urbiculture has been before the House and has the same objective as the various bills which have since been introduced to create a Department of Urban Affairs. Several similar bills are pending before the other body, including the urbiculture bill recently introduced.

Our Government Operations Committee has held hearings twice on the creation of this new Department and the subcommittee has a recommended solution pending before the full committee at the present time. I sincerely hope that this additional support by the gentleman from New York will aid in getting action by the Government Operations Committee.

HEW REPORT PROVES NEED FOR FEDERAL AID TO EDUCATION

The SPEAKER pro tempore (Mr. LOSER). Under previous order of the House, the gentleman from West Virginia [Mr. BAILEY] is recognized for 15 minutes.

Mr. BAILEY. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include a tabulation.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

Mr. BAILEY. Mr. Speaker, on April 12 the Department of Health, Education, and Welfare issued a report entitled "National Goals in the Staffing and Construction of Public Elementary and Secondary Schools." The report was prepared by the staff of the Office of Education and was intended to be the basis for discussion at a meeting, presided over by Secretary of Health, Education, and Welfare Arthur S. Flemming, of representatives of national organizations on education goals.

In a foreword, signed by the Commissioner of Education, Lawrence G. Derthick, it was pointed out that the document "is designed to clarify the dimensions of a national problem in such a way as to determine the need for action." It is interesting to note that the document set as a 10-year goal a greatly increased number of teachers, together with a doubling of teachers' salaries and a construction of almost 700,000 classrooms. According to press reports on the conference, no conferee took issue with these national goals.

A study of the document prepared by the Department indicates that to achieve the national goals will require the doubling of expenditures for education over the 10-year period. In passing, I should point out that the current school year is the first of the decade set to achieve these goals.

During the spring of 1959, at the conclusion of our hearings on H.R. 22 by the General Education Subcommittee of the Committee on Education and Labor, I addressed a letter, as subcommittee chairman, to the Governors of each of the then 49 States, as well as to the Governor of the then Territory of Hawaii. A number of questions were asked. One of these questions follow:

> Considering the political realities in your State, do you consider it likely or unlikely that the combined efforts of your State legislature and local school districts will increase school appropriations to the point that your State will come reasonably close to the national goals (of doubling annual school investments within the next 10 years)?

The text of my letter to the Governors containing all of the questions asked, together with the response from each of

the Governors, was published as a committee print by the Committee on Education and Labor in May of 1959, and a copy was forwarded to each Member of Congress.

Referring to the answer to the question quoted above, a summary of the replies shows that the Governors of only 6 States predicted flatly that this goal could be achieved; 2 Governors replied in such a manner that they might be listed as "maybe," 20 Governors answered "no," 13 replies were not categorically responsive, and 9 Governors merely acknowledged receipt of my letter or failed to make any reply whatsoever.

I am sure that if Members will reread the answers that I have listed in these remarks as not responsive, they shall find many of them seem to indicate the extreme unlikelihood of reaching this national goal.

Mr. Speaker, I include, as a part of my remarks, at the conclusion thereof, a tabulation, State by State, of the responses to this one vital question.

Mr. Speaker, the Committee on Education and Labor has reported to bill, H.R. 10128, which authorizes a modest 3-year program of financial assistance to the States for school construction. The minority report concerns itself with the "numbers game" and cites a modest decline in the birthrate to attempt to make the point that the States and local communities will soon find themselves with more classrooms than they have pupils.

It is interesting to note that the national goals document, published by the Department of Health, Education, and Welfare, shows the need for the construction of 380,000 classrooms by the end of the 1963 school year. This estimation is based on the assumption that future fertility will follow the 1955–57 level as projected by the Bureau of the Census. The document also shows an estimate reflecting the effect of alternate assumptions about fertilization. One alternate estimate is based upon a birthrate declining in fertility to 1942–44 levels, which is the lowest of four census projections. Estimates based upon this lowest of all fertility rates—lower even than the modest decline upon which the minority figure filberts based their attack on H.R. 10128—indicate the need for construction of 350,000 classrooms by the end of the 1963 fiscal year.

This would be the completion of the Federal program authorized by H.R. 10128. Assuming the construction by States and local communities of 70,000 classrooms for 4 years, including the current school year, there will have been built by the end of fiscal year 1963 a total of 280,000 classrooms, a figure that will fall 70,000 short.

H.R. 10128 now before the Rules Committee, authorizes a program which will result in the construction of 41,000 classrooms which falls 29,000 short of the goal recommended in the HEW document.

For States and local communities to construct a total of 70,000 classrooms means an increase in the rate of construction of 1,500 classrooms per year because, during the 4 school years beginning 1955–56 through 1958–59, 274,013 classrooms were built, representing an annual rate of 68,500.

These data clearly indicate then that the Federal program authorized by H.R. 10128 is the barest rockbottom minimum. It establishes a relationship between the Federal Government and State and local educational agencies of about the same importance as that of a 100-share owner to the American Telephone & Telegraph Co.

In other words, Washington would indeed be a minor stockholder.

A tabulation follows:

Alabama: No reply.
Alaska: Not responsive.
Arizona: Maybe.
Arkansas: Maybe.
California: Not responsive.
Colorado: No.
Connecticut: Yes.
Delaware: No reply.
Florida: No reply.
Georgia: No.
Hawaii: Yes.
Idaho: Not responsive.
Illinois: Not responsive.
Indiana: Not responsive.
Iowa: No.
Kansas: Not responsive.
Kentucky: No.
Louisiana: No reply.
Maine: No.
Maryland: Yes.
Massachusetts: No reply.
Michigan: No.
Minnesota: No.
Mississippi: No reply.
Missouri: No.
Montana: Not responsive.
Nebraska: No.
Nevada: Yes.
New Hampshire: Not responsive.
New Jersey: No.
New Mexico: No.
New York: Yes.
North Carolina: No.
North Dakota: Not responsive.
Ohio: Not responsive.
Oklahoma: No.
Oregon: No.
Pennsylvania: No.
Rhode Island: No reply.
South Carolina: Not responsive.
South Dakota: No.
Tennessee: Not responsive.
Texas: Not responsive.
Utah: No reply.
Vermont: No reply.
Virginia: No.
Washington: Yes.
West Virginia: No.
Wisconsin: No.
Wyoming: No.

TEAMSTERS UNION

The SPEAKER pro tempore (Mr. LOSER). Under previous order of the House, the gentleman from Michigan [Mr. HOFFMAN] is recognized for 30 minutes.

Mr. HOFFMAN of Michigan. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include certain tables.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN of Michigan. Mr. Speaker, never in the last 25 years, to my knowledge, at least, have there been so many visitors to the Nation's Capital. Some who attend the sessions of the House might get a wrong idea as to the lack of work that their Representatives, paid so handsomely, do in behalf of the country.

Most of the work of the Congressmen is in committee when bills which have been introduced, and there are thousands of those every year, are referred to committees which give them consideration, listen to witnesses who desire to be heard report to the House and, finally, after a bill has been referred to the Committee on Rules and been approved by it, comes out on the floor—sometimes without an opportunity to amend, but usually with opportunity to amend.

THE TEAMSTERS

Recently, telegrams from officers or the representatives of several million Teamsters have been coming to the Members of Congress. Here is a typical one, and these all have to do with the appointment and the alleged lack of the useful activities of the monitors.

The unions are now protesting the alleged lack of action on the part of the monitors and the cost of the lack of action.

This is a typical wire addressed to me:

We, the members of the executive board of the Michigan Conference of Teamsters representing 50,000 Teamster members of the State of Michigan request that you bring to the floor of Congress the question of why we the members of the International Brotherhood of Teamsters are not being allowed a free election to determine our international officers in our international union as called for in the Kennedy-Landrum-Griffin bill.

Of course, if I was to characterize that bill, I would say the Landrum-Griffin bill designed primarily to aid union members.

We, representing 50,000 members of the State of Michigan, also protest the unnecessary expense the monitors appointed by Judge Letts are costing our international union and beg you to investigate this unnecessary expense.

The telegram does not mention it, but it is the claim of the International and of the signers of similar wires that the three monitors are getting something like $45,000 a year each for, they say, very little service rendered. I note on the floor this afternoon one of the authors and sponsors of the Landrum-Griffin bill, Mr. GRIFFIN, and if he cares to, of course, he can comment as to the accuracy or the lack of it of any statement which may be made.

This is only one of many wires of like import which I have in my office.

The following telegrams are representative of others:

DETROIT, MICH., *April 20, 1960.*

Hon. CLARE E. HOFFMAN,
Representative in Congress,
Washington, D.C.:

We the business representatives of Truck Drivers Local No. 299 representing 17,000 members are requesting you consider this petition relative to our international organization, the International Brotherhood of Teamsters, being allowed a free election to determine its international officers. We understand a free election of our international officers is allowed under the Kennedy-Landrum-Griffin bill.

We, representing 17,000 members of this local union, also protest the unnecessary ex-

pense the monitors appointed by Judge Letts are costing our international union and beg you to investigate this unnecessary expense.

Sam Calhoun, Business Representative; David Johnson, Business Representative; A. Viganli, Business Representative; George Roxbourgh, Business Representative; William Bell, Business Representative; George Shelp, Business Representative; R. McMaster, Business Representative; Benjamin Friedman, Business Representative; Joe Thomas, Business Representative; Richard Fitzsimmons, Business Representative; Larry Campbell, Business Representative; Otto Wendell, Business Representative; Martin Haggerty, Business Representative; Jack Dwyer, Business Representative; Steve Riddle, Business Representative; Tom Burke, Sr., Business Representative; Clarence Symons, Business Representative; Charles O'Brien, Business Representative; Ralph Proctor, Business Representative.

DETROIT, MICH., *April 20, 1960.*

HON. CLARE E. HOFFMAN,
Representative in Congress,
Washington, D.C.:

We, the members of the executive board of Truck Drivers Local No. 299, representing 17,000 members are requesting that you bring to the floor of Congress the question of why we, the members of the International Brotherhood of Teamsters, cannot have a free election in our international union as prescribed in the Kennedy-Landrum-Griffin bill?

Also, why has Judge Letts or the monitors the right to doubt the workings of our international union without due process?

We, representing 17,000 members of this local union, also protest the unnecessary expense the monitors appointed by Judge Letts are costing our international union and beg you to investigate this unnecessary expense.

FRANK E. FITZSIMMONS,
Vice President.
FRANK COLLINS,
Secretary-Treasurer.
DAVID JOHNSON,
Recording Secretary.
GEORGE ROXBOURGH,
Trustee.
SAM CALHOU,
Trustee.

Without in any way apologizing for any criticism which heretofore has been made by me of Mr. Hoffa—and as those who are interested all know he has twice in Michigan stood before the bar of justice and been convicted, once of extortion and once of conspiracy to violate the Federal law which has to do with monopoly legislation, and both times he was sentenced and paid a fine, but was not imprisoned.

In justice to the Teamsters, something should be said in answer to these wires.

We know that the monitors have to date been unable to correct, or have not corrected, many of the evils which the Landrum-Griffin-Kennedy bill was designed to at least lessen, and we hoped to eradicate. However, the organization since Hoffa became president has done something along that line, and what he apparently is asking for now is an opportunity for members of the Teamsters Union to elect a president; and, under the American system, of course, that should be given. Even the devil, it has been said, is entitled to credit for some things.

Hoffa has made some effort to correct a bad situation. In justice to those loyal patriotic members of the Teamsters who want reform, something should be said on that.

Those Members who have been here for some time know that for at least 20 years I have been trying to get some of the crooked labor union leaders in jail. I think it is a very desirable objective, because they have been racketeering and extorting. No one could name the amount those fellows have taken away from the taxpayers.

This is what Hoffa has been able to do—do not forget, spurred on by the membership. I have here a statement relating to individuals connected with the Teamsters which I will read at this time.

The following analysis relates to individuals, directly or indirectly, connected with the Teamsters, who have been accused by the McClellan committee of criminal activity. This analysis is based on the transcripts of testimony, the interim report, and information supplied to the international union from various sources:

1. Not now and never were members, officers, agents, or representatives of the Teamsters Union: John Dio Guardi, Angelo Meli, Paul Dorfman, John Bitonti, Anthony Doria, Ben Lapensohn, Lou Farrell, Charles Kaminetsky, Harry Friedman, Carmen Tramunti, Sam Berger, Herman Prujansky, Burle Michaelson, Max Stern, A Harvill, W. Harvill.

2. Members of Teamsters Union as required by union-shop agreement, but not officers or employees: Jack Ballard, Tom Shoulders, Jr., Barney Sandridge, Joseph Grosscup, Basil Webb, Charlie Clure, Joe Ferrara, John Poole, Carl Cotez.

3. Former officers or employees but no longer associated with the Teamsters in any capacity: Gerald Connelly, Dan Keating, Sam Morosso, Louis Berra, Joe Curcio, Sidney Hodes, Nathan Carmel, Milton Levine, Max Chester, Jack Prione, Phillip Goldberg, Abraham Goldberg, Lester Stickles, Herman Kierdorf, Frank Kierdorf, Louis Shoulders, Byron Flick, Ben Saltzman, W. A. Smith, H. L. Boling, Eugene Williams, Eugene James, Ziggy Snyder, Mike Nicoletti, Lewis Linteau, Ernie Bellas, Harry Davidoff, Nat Gordon, Aaron Kleinman, Dan Marvin, Sam Zaber, Abe Brier, Sam Goldstein, Phillip Massiello, John Myhasuk, Samuel (Shorty) Feldman, Reddin, Lattin, Branch Wainwright, Glenn Smith, Sidney Brennan.

4. Officers or employees of Teamsters who have been arrested but never convicted of any crime: Frank Fitzsimmons, Abe Gordon, William Bufalino, Cecil Watts, Clyde Crosby, Gene San Soucie, Joe Bommarito.

5. Officers, agents, or employees who were convicted of misdemeanors or felonies before employment by or election to office of Teamsters Union (date of conviction preceding employment follows each name): Barney Baker (1934), William Presser (1953), Al Vignalli (1935), Larry Welch (court martial), Albert Newman (1954), Antonio Corallo (1941), Gus Zappas (1938), Ed Walker, Joseph Ceadrowski (1940), Arthur Freese, Nick Frank, John Elko, Sam Cutillo (1937), Louis Triscaro (1933), William Hoffa (1942), Roland McMasters (1936), Joseph Glimco (1923), Jack Thompson (1937), Theodore Cozza, Raymond Cohen, Abe Berman (1951), Peter Luscke, Michael Sobelewski (1940), Harry Lindsay (1923), Charles Amoroso (1957).

6. Convictions while officers or representatives and still official of union:

Jack Jorgenson: convicted in November 1956 for misdemeanor in accepting money from an employer. Payment had nothing to do with collective bargaining unit or contract of Teamsters Union. The case was a test case of definitions under Taft-Hartley Act. Membership has repeatedly voted confidence in Jorgenson since this conviction. This was not an extortion. Court imposed fine and probation as first offense.

Milton Holt: Violation of Federal Anti-Trust Act in connection with alleged illegal contract between Union and Employers Association. Now under indictment for perjury.

Alfred Reger: Convicted but appeal pending and released on bond on certificate of reasonable doubt.

Frank Matula: Convicted.

Herman Hendricks: Picket line scuffle.

Charles Amoroso: Trespassing during strike.

Owen B. Brennan: Two misdemeanors for matters growing out of and directly related to bona fide labor disputes and the questioned application of laws to such disputes.

SUMMARY

Of 105 persons named, the attached lists show:

1. Sixteen were never members, agents, or officers of the Teamsters Union.

2. Nine were members only, who upon employment are admitted to membership in the local union.

3. Forty-one are no longer connected with the Teamsters Union.

4. Seven have arrests or records only followed by acquittals or no prosecution.

5. Twenty-five were convicted of misdemeanors or felonies for varying periods of time prior to their assumption of office in or employment by Teamsters Union.

6. Seven were arrested and convicted while in official capacity most for matters directly relating to or growing out of bona fide labor disputes. Their cases are now being reviewed by the international union.

The list does not include the many witnesses and others referred to in the testimony regarding whom there is no claim for or basis for charge of criminal activity. It clearly appears that the committee is talking about a mere handful of union officers and agents out of the more than 3,000 full-time officers of the Teamsters Union, and about arrests and offenses which in the main do not of themselves indicate a lack of capability to represent workingmen or demonstrate a tendency to injure or prejudice the interests of those whom they represent.

I wish to call special attention to the fact that, of the 105 listed by the McClellan committee, 41 are no longer with the Teamsters Union. This has occurred since Hoffa was elected general president.

During this same period, 56 trusteed locals were returned to self-government of the rank and file.

Teamsters charge that, if the monitors had not interfered, all 109 trusteed locals would be back in the control of the membership.

Here is a long, long list of trusteed unions which shows that as of October 1, 1957, the International Brotherhood of Teamsters had chartered 894 local unions. Of that number, on October 1, 1957, 109 local unions were under trusteeship. The following is a list of the local unions under trusteeship on that date:

Local No. 10, Omaha, Nebr.
Local No. 16, Grand Junction, Colo.
Local No. 21, Hannibal, Mo.
Local No. 23, Johnson City, Tenn.
Local No. 26, Danville, Ill.
Local No. 42, Lynn, Mass.
Local No. 46, Peru, Ill.
Local No. 55, Asheville, N.C.
Local No. 71, Charlotte, N.C.
Local No. 78, Oakland, Calif.

Local No. 81, Portland, Oreg.
Local No. 87, Bakersfield, Calif.
Local No. 94, Visalia, Calif.
Local No. 106, Montreal, Canada.
Local No. 151, Vancouver, Canada.
Local No. 166, San Bernardino, Calif.
Local No. 171, Roanoke, Va.
Local No. 176, Dayton, Ohio.
Local No. 179, Joliet, Ill.
Local No. 183, Fairbanks, Alaska.
Local No. 196, Los Angeles, Calif.
Local No. 222, Salt Lake City, Utah.
Local No. 223, Portland, Oreg.
Local No. 231, Pellingham, Wash.
Local No. 245, Springfield, Mo.
Local No. 247, Detroit, Mich.

Local No. 699, Omaha, Nebr.
Local No. 684, Eureka, Calif.
Local No. 722, Ottawa, Ill.
Local No. 725, Chicago, Ill.
Local No. 733, Pittsburgh, Pa.
Local No. 741, Seattle, Wash.
Local No. 760, Yakima, Wash.
Local No. 770, Kingston, N.Y.
Local No. 789, Fairmont, W. Va.
Local No. 795, Wichita, Kans.
Local No. 822, Norfolk, Va.
Local No. 823, Joplin, Mo.
Local No. 825, Baltimore, Md.
Local No. 826, New York, N.Y.
Local No. 833, Jefferson City, Mo.
Local No. 838, Kansas City, Mo.
Local No. 839, Pasco, Wash.
Local No. 842, Vancouver, Canada.
Local No. 855, St. Johns, Canada.
Local No. 864, Rolla, Mo.
Local No. 865, Santa Maria, Calif.
Local No. 876, Salisbury, Md.
Local No. 879, Hamilton, Canada.
Local No. 880, Windsor, Canada.
Local No. 895, Albany, N.Y.
Local No. 900, Pendelton, Oreg.
Local No. 902, Detroit, Mich.
Local No. 905, Denver, Colo.
Local No. 912, Santa Cruz, Calif.
Local No. 946, Pittsburgh, Pa.
Local No. 955, Kansas City, Mo.
Local No. 959, Anchorage, Alaska.
Local No. 963, Bradford, Pa.
Local No. 968, Houston, Tex.
Local No. 976, Ogden, Utah.
Local No. 986, Los Angeles, Calif.

The following local unions were restored to self-government between October 1, 1957, and May 13, 1958:

Local No. 71, Charlotte, N.C.
Local No. 76, Oakland, Calif.
Local No. 81, Portland, Oreg.
Local No. 87, Bakersfield, Calif.
Local No. 94, Visalia, Calif.
Local No. 106, Montreal, Canada.
Local No. 166, San Bernardino, Calif.
Local No. 171, Roanoke, Va.
Local No. 183,[1] Fairbanks, Alaska.
Local No. 196, Los Angeles, Calif.
Local No. 223, Portland, Oreg.
Local No. 231, Bellingham, Wash.
Local No. 253, Portland, Oreg.
Local No. 288, Superior, Wis.
Local No. 294, Albany, N.Y.
Local No. 333, Baltimore, Md.
Local No. 350, San Francisco, Calif.
Local No. 439, Stockton, Calif.
Local No. 465, Seattle, Wash.
Local No. 496, Boston, Mass.
Local No. 509, Columbia, S.C.
Local No. 510,[1] Omaha, Nebr.
Local No. 512, Jacksonville, Fla.
Local No. 525, Alton, Ill.
Local No. 563, Appleton, Wis.
Local No. 574, Cape Girardeau, Mo.
Local No. 684, Eureka, Calif
Local No. 760, Yakima, Wash.
Local No. 789, Fairmont, W. Va.
Local No. 822, Norfolk, Va.
Local No. 823, Joplin, Mo.
Local No. 838, Kansas City, Mo.
Local No. 855, St. Johns, Newfoundland.
Local No. 864, Rolla, Mo.
Local No. 876, Salisbury, Md.
Local No. 895, Albany, N.Y.
Local No. 902, Detroit, Mich.
Local No. 905, Denver, Colo.
Local No. 912, Santa Cruz, Calif.
Local No. 959, Anchorage, Alaska.
Local No. 968, Houston, Tex.

In addition to the foregoing, the charters of the so-called paper locals of New York City—Locals Nos. 258, 269, 275, 284, and 362—were revoked.

As of May 13, 1958, the following local unions were in the process of being restored to self-government:

Local No. 16, Grand Junction, Colo.
Local No. 21, Hannibal, Mo.
Local No. 26, Danville, Ill.
Local No. 55, Asheville, N.C.
Local No. 245, Springfield, Mo.
Local No. 247, Detroit, Mich.
Local No. 256, San Francisco, Calif.
Local No. 279, Decatur, Ill.
Local No. 295, New York, N.Y.
Local No. 309, Seattle, Wash.
Local No. 391, Greensboro, N.C.
Local No. 413, Columbus, Ohio.
Local No. 497, Akron, Ohio.
Local No. 596, Philadelphia, Pa.
Local No. 612, Birmingham, Ala.
Local No. 614, Pontiac, Mich.
Local No. 722, Ottawa, Ill.
Local No. 770, New York, N.Y.
Local No. 795, Wichita, Kans.
Local No. 955, Kansas City, Mo.
Local No. 963, Bradford, Pa.

Although it is a fact that as of May 13, 1958, the above-listed locals were in the process of being restored to self-government, the trusteeships of all of them have not been removed. As of July 1, 1958, there were some 54 local unions under trusteeship.

You will note from the foregoing that most of the trusteeships have been gotten rid of; the Teamsters themselves have ended many trusteeships.

In accordance with the provisions of section 504 of the Landrum-Griffin bill—and if I make a misstatement or am incorrect in what I say the gentleman from Michigan [Mr. GRIFFIN] is on the floor and can correct me.

In accordance with the provisions of section 504 of the Landrum-Griffin law, barring from union office for 5 years after conviction for one of a series of enumerated crimes, 14,000 officers were required to sign affidavits. They were found to be in compliance with this section of the law. Only four individuals declined to sign affidavits, disqualifying themselves. One person refused to disqualify himself and took his case to court. I might say he lost out there.

Individuals now desiring to run for office or who apply for another position with the organization are now required to file an affidavit attesting to the ability to qualify under section 504(a) of the act.

These two documents provide eloquent testimony concerning the very small number of Teamster officials who are still holding office and who are guilty of any crime greater than a misdemeanor, such as a picket line offense. It should be remembered while we are finding fault that, once in a long time, a Congressman has slipped and later has been accepted as a Member of the House.

Mr. Speaker, as has been many times previously stated, there is no question but that the Teamsters as a whole are just as patriotic, just as able, just as desirous of protecting the integrity of the Nation and of making our welfare secure as are the members of any other group or as our citizens generally.

But, unfortunately, some Teamster unions have fallen under a combination of a few extortionists—crooks.

Let me repeat, I am not apologizing for, I am not praising Hoffa, though he at least endeavors to serve his members. I think the gentleman should be in jail for the things that the record discloses. There are others who merit a like fate.

Unfortunately, we do not pay those in the Department of Justice an adequate compensation so as to retain those who are experienced, able to get convictions.

Once more I call your attention to one chapter, I think it is 13, which begins on page 300 of young Bob Kennedy's book, where he shows very clearly that the failure to convict some racketeers was due to the fact we have been too tight in the money end of our dealing with the Department of Justice. We do not, in the beginning, get competent, experienced attorneys, trial lawyers, who know how to select a jury, who know how to prepare and try a criminal case. Failure to secure convictions has been our fault in part, at least, and we should remedy like situations by getting more experienced men.

The Teamsters are entitled to an opportunity to elect a president and the

[1] These local unions were merged or ceased to exist.

other officers of their union and its locals, and the monitors should give them that right.

There is one other thing that occurs to me. I would like to ask Hoffa's critics, including Secretary Mitchell, how many of the Reuther boys are entitled to hold office and how many of those unions have filed required reports as compared with those filed by the Teamsters?

We know very well, those of us who have taken time to inquire into the facts, that for years and today Reuther still advocates some of the more important parts of the Communist program. For example, when Browder was president of the Communist Party here in America, he said that they intended to take over industry because they had the power to do so.

Reuther follows right along today, right down to today, and has for the last 6 years, during which time he has been trying to take over Kohler, the same thought, the same action and practice advocated by Browder, the former president of the Communist Party here in the United States.

So, when you look at the picture as a whole, you wonder why it is that we direct our fire exclusively at Hoffa. Again, I say Hoffa is deserving of all he is getting, he should be in jail, but why concentrate on him? Why deny him and the Teamster members a right to which they are entitled? Why not go along with the membership of the Teamsters, the rank and file and give them a convention, as guaranteed by the Landrum-Griffin Law, so that they may elect a president?

Why not also get after brother Reuther who is far more dangerous to the country's survival than Hoffa ever was?

All Hoffa does is to take away our money, knock us around now and then, but Reuther would take over our Government. There is no question about that. That is his purpose.

If you will read that book to which I have referred so often, young Bob Kennedy's "The Enemy Within," you will see that young Bob knows the situation, but he just will not acknowledge it. He and some Members of the other body have protected Reuther all down the line. Reuther has been welcomed at the White House, by three Presidents—Reuther, the employer and user—the boss—of well-known criminals. Why? You tell me—I cannot figure it out. Why?

It is my earnest hope that the Senator who was the head of the rackets committee will get a renewal of his authority and that he go on and land a few of the wreckers in jail.

And, may I say to my good friend from Iowa, the other half of the party to which I adhere, I hope he will not raise a question by an objection to a request for appropriations to erect jails to house these folks or funds to employ competent people to prosecute them.

Last week or the week before, the gentleman from Iowa saved this country, temporarily, at least, $60 million—or 65; which was it—$65 million by raising a point of order, because the Committee on Appropriations and the Committee on Public Works had not performed their duty as they should.

And, may I, with the consent of the gentleman from Iowa [Mr. GROSS]—I know he is reluctant to consent because of his natural modesty—may I put into the RECORD a little piece about him? Mr. Speaker, I read this piece from the Washington Star of yesterday—this little piece about the gentleman from Iowa, with his picture there. May I read that into the RECORD?

The SPEAKER pro tempore. Without objection, it is so ordered, but not the picture.

There was no objection.

(The article is as follows:)

GROSS KEEPING WATCH ON FRILLS IN HOUSE BILLS

More and more the House is learning it has to reckon with a slight, mild-looking man from Iowa.

Representative GROSS, a stern foe of frills in Government and errors in procedure, has a sharp eye for spotting both.

Armed with a House rule book and a vast amount of information on every bill brought to the floor, he poses a vexatious problem for the legislator who rises to debate unprepared.

His points of order, parliamentary inquiries and questions have forced more than one bill back to committee for revision, and in some cases have knocked them completely off the calendar.

NOT DEAR TO GOP

Mr. GROSS is a Republican, but his strong streak of independence has not endeared him to the House GOP leadership. When he's against something, he doesn't care who is for it.

But if his uncompromising conduct has not won him popularity, it has earned him wide respect among the Members. A surprising number of them will admit privately that Mr. GROSS is performing a valuable service in forcing adherence to House rules and in keeping a sharp eye on Government spending.

Representative SIKES, Democrat, of Florida, recently praised him for the diligence with which he pursues his self-appointed task. And in an earlier debate, when Mr. GROSS rose to challenge Representative VINSON, Democrat, of Georgia, the Georgian responded with relish:

"There is really no good debate unless the gentleman from Iowa is in it."

Mr. GROSS, a 60-year-old ex-newspaperman and radio broadcaster, has been in Congress 12 years, but started his various disruptive maneuvers only during this session.

"I don't get any particular pleasure out of doing these things," he said. "But I've seen a growing tendency toward sloppy legislation—appropriating committees writing legislation, and money being appropriated without authorization. If they get away with it, it's just going to get worse. Well, I'm not going to let them get away with it."

Mr. GROSS' successes are few, mostly temporary and small when measured by the money he knocks out of appropriation bills.

But his daily presence, with his thick volumes of reference books and his inexhaustible supply of questions, is a pretty sure guarantee, at least, that not much is going to slip by unnoticed.

Mr. HOFFMAN of Michigan. I thank the Chair. I think the House will appreciate the gentleman's service. Certainly the country does from the letters I get. They tell here about the services of the gentleman. And, this writer—well, the AP, the whole Associated Press, they get in there—of course, they do make a mistake once in a while—they tried to say that some of these things the gentleman does are rather small in nature. Sure they are—so is a drop of water—a grain of sand—but we all know about that and how they add up.

Well, I would like to ask the membership and the folks up in the gallery—of course, we cannot address the folks in the gallery—but I would like to ask them what they think and how they value the services of the gentleman from Iowa [Mr. GROSS]. Without waiting for an answer, I know by their demeanor they heartily approve and wish him success.

If we do not begin with little things, if someone does not make a protest and argue about it, we will never get any economy.

I add the whole country should be praising the gentleman from Iowa [Mr. GROSS] for his industry, his research, the long hours reading hearings, his courage, and determination, for his efforts to end these useless, wasteful appropriations. Small amounts—many times that is true, but we also all know about the little acorns.

Mr. HALEY. Mr. Speaker, will the gentleman yield?

Mr. HOFFMAN of Michigan. I yield to the gentleman from Florida.

Mr. HALEY. I would like to respond to the gentleman by saying this: I know the gentleman from Iowa is one of the most able and best-informed Members in the House. There is an old saying that if you take care of the little things, the big things will take care of themselves. I think the House owes the gentleman a vote of thanks for the many times that he has contributed to orderly procedure in the House and thereby saved the taxpayers millions and millions of dollars.

Mr. HOFFMAN of Michigan. You might as well have said continued determined efforts at all times to cut out of authorizations or appropriations items which are not urgently needed. If we do not vote against something sometime, we will never get any opposition to even the most extravagant appropriation.

The other day you will remember that bill with some $4 billion and there was $1 million in there for liquor. I wonder what the folks that come to Washington think about an appropriation of $1 million of their money to buy liquor for entertainment. The gentleman from Iowa [Mr. GROSS] raised that point, called for a vote, as did the gentleman from Kansas [Mr. REES] so many times in so many years in the past. He was not successful in getting it stricken, but he, at least, made the effort. A fellow is entitled, I understand, to some credit for effort.

Mr. BOW. Mr. Speaker, will the gentleman yield?

Mr. HOFFMAN of Michigan. Gladly. I yield to the gentleman from Ohio.

Mr. BOW. The gentleman is including in the RECORD the newspaper article?

Mr. HOFFMAN of Michigan. Oh, sure.

Mr. BOW. May I suggest to the gentleman that U.S. News & World Report, a well-known national magazine, has also

praised the gentleman from Iowa this week in its editorial columns, and I think perhaps the gentleman would like to include that.

Mr. HOFFMAN of Michigan. I note the modesty of the gentleman from Iowa is causing him to leave the floor. May I say to the gentleman I would like to have him stay here and hear others congratulate him as so many wish to do.

Mr. BOW. May I say, as a member of the Committee on Appropriations, that we have great respect for our friend from the State of Iowa who has, in all seriousness, saved this Nation millions and millions of dollars. He is a very valuable Member of this House.

Mr. HOFFMAN of Michigan. The only thing I do not like about the activities of the gentleman from Iowa is that he makes so evident our own shortcomings. It is rather embarrassing to go home and hear your wife ask you "Why don't you do something along that line?"

The editorial from the U.S. News & World Report reads:

Representative H. R. GROSS, Republican, of Iowa, is gaining a reputation for striking out of appropriation bills items that have not been properly authorized. He has become an expert in rising to "points of order" that, in effect, kill the appropriations.

Mr. Speaker, I yield back the remainder of my time.

COMMITTEE ON RULES

Mrs. BLITCH. Mr. Speaker, I ask unanimous consent that the Committee on Rules have until midnight tonight to file certain reports.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. MCGINLEY, for April 26 and 27, 1960, on account of committee business before the United Nations.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. BAILEY, on Monday next, for 1 hour.

Mr. SCHERER, on Monday next, for 90 minutes.

Mr. HOFFMAN of Michigan, for 30 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. HECHLER and to include extraneous matter.

Mr. DORN of South Carolina and to include extraneous matter.

Mr. DANIELS and to include extraneous matter.

Mr. BOLAND and to include extraneous matter.

Mr. JUDD and to include extraneous matter.

(The following Members (at the request of Mr. MCCORMACK) and to include extraneous matter:)

Mr. DADDARIO.

Mr. MULTER in two instances.

Mr. METCALF.

Mr. KING of Utah.

Mr. MORRIS of Oklahoma and to include extraneous matter.

Mr. MACK and to include extraneous matter.

Mr. BUDGE (at the request of Mr. GRIFFIN) and to include extraneous matter.

Mr. THOMPSON of New Jersey (at the request of Mrs. BLITCH) and to include extraneous matter.

BILL PRESENTED TO THE PRESIDENT

Mr. BURLESON, from the Committee on House Administration, reported that that committee did on April 25, 1960, present to the President, for his approval, a bill of the House of the following title:

H.R. 8601. A bill to enforce constitutional rights, and for other purposes.

ADJOURNMENT

Mrs. BLITCH. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 46 minutes p.m.) the House adjourned until tomorrow, Wednesday, April 27, 1960, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2088. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation entitled "A bill to amend the Agricultural Trade Development and Assistance Act of 1954"; to the Committee on Agriculture.

2089. A letter from the Chairman, U.S. Civil Service Commission, transmitting a draft of proposed legislation entitled "A bill to amend section 7 of the Administrative Expenses Act of 1946, as amended, to provide for the payment of travel and transportation cost for persons selected for appointment to certain positions in the United States, and for other purposes"; to the Committee on Government Operations.

2090. A letter from the Comptroller General of the United States, transmitting a report on the review of selected commercial air shipments of household goods of military personnel; to the Committee on Government Operations.

2091. A letter from the Comptroller General of the United States, transmitting a report on the review of selected activities of the Government of American Samoa, Office of Territories, Department of the Interior; to the Committee on Government Operations.

2092. A letter from the Secretary of the Interior, transmitting a draft of proposed legislation entitled "A bill to amend section 2455 of the Revised Statutes"; to the Committee on Interior and Insular Affairs.

2093. A letter from the Secretary of Commerce, transmitting a report pertaining to war risk insurance and certain marine and liability insurance for the American public, pursuant to title XII of the Merchant Marine Act of 1936, as amended; to the Committee on Merchant Marine and Fisheries.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. ASPINALL: Committee on Interior and Insular Affairs. H.R. 10548. A bill to amend the Helium Act of September 1, 1937, as amended, for the defense, security, and the general welfare of the United States; with amendment (Rept. No. 1552). Referred to the Committee of the Whole House on the State of the Union.

Mr. MADDEN: Committee on Rules. House Resolution 508. Resolution for consideration of S. 1358, an act to authorize the Secretary of the Interior to provide a headquarters site for Mount Rainier National Park in the general vicinity of Ashford, Wash., and for other purposes; without amendment (Rept. No. 1553). Referred to the House Calendar.

Mr. MADDEN: Committee on Rules. House Resolution 509. Resolution for the consideration of H.R. 6851, a bill authorizing the establishment of a national historic site at Bent's Old Fort, near La Junta, Colo.; without amendment (Rept. No. 1554). Referred to the House Calendar.

Mr. MADDEN: Committee on Rules. House Resolution 510. Resolution for consideration of H.R. 8226, a bill to add certain lands to Castillo de San Marcos National Monument in the State of Florida; without amendment (Rept. No. 1555). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ADAIR:

H.R. 11911. A bill to amend the Civil Service Retirement Act to grant the annuities of surviving spouses for the lifetimes of such spouses in certain cases; to the Committee on Post Office and Civil Service.

By Mr. ASHMORE:

H.R. 11912. A bill to make voluntary admissions and confessions admissible in criminal proceedings and prosecutions in the courts of the United States and the District of Columbia; to the Committee on the Judiciary.

By Mr. DERWINSKI:

H.R. 11913. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder; to the Committee on Ways and Means.

By Mr. FERNÓS-ISERN:

H.R. 11914. A bill to extend and amend the National Housing Act, as amended, to provide mortgage insurance for individually owned units in a multifamily structure, and for other purposes; to the Committee on Banking and Currency.

By Mr. FLYNN:

H.R. 11915. A bill to amend the Bankruptcy Act to authorize the employment of investigators in certain cases, and for other purposes; to the Committee on the Judiciary.

By Mr. FOLEY (by request):

H.R. 11916. A bill to establish a system for the public and legal recognition of engineers and scientific personnel engaged in the practice of their art on projects sponsored by the Federal Government; to the Committee on Post Office and Civil Service.

By Mr. JOHNSON of California:

H.R. 11917. A bill to authorize and direct the Secretary of Agriculture to convey certain lands in Lassen County, Calif., to the city of Susanville, Calif.; to the Committee on Agriculture.

By Mr. LINDSAY:

H.R. 11918. A bill to establish the Department of Urban Affairs and prescribe its functions; to the Committee on Government Operations.

By Mr. METCALF:

H.R. 11919. A bill to improve the income of wheat producers, to reduce the cost to the U.S. Treasury of the wheat-price-stabilization program, to strengthen the wheat marketing quota provisions, to reduce the volume of Commodity Credit Corporation stocks of wheat, and for other purposes; to the Committee on Agriculture.

By Mr. MONAGAN:

H.R. 11920. A bill for the establishment of the U.S. Commission on the Aging and Aged; to the Committee on Education and Labor.

By Mr. MORRIS of Oklahoma:

H.R. 11921. A bill to amend the Federal Trade Commission Act to provide for the issuance of temporary cease-and-desist orders to prevent certain acts and practices pending completion of Federal Trade Commission proceedings; to the Committee on Interstate and Foreign Commerce.

H.R. 11922. A bill to amend the Federal Trade Commission Act to strengthen independent competitive enterprise by providing for fair competitive acts, practices, and methods of competition, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. THOMPSON of New Jersey:

H.R. 11923. A bill to amend section 701 of the Housing Act of 1954 (relating to urban planning grants), and title II of the Housing Amendments of 1955 (relating to public facility loans), to assist State and local governments and their public instrumentalities in improving mass transportation services in metropolitan areas; to the Committee on Banking and Currency.

By Mr. BROOMFIELD:

H.J. Res. 698. Joint resolution providing for the establishment of an Annual Youth Appreciation Week; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANFUSO:

H.R. 11924. A bill for the relief of Evelyn Linley; to the Committee on the Judiciary.

By Mr. COLLIER:

H.R. 11925. A bill for the relief of Radmilo Markovich; to the Committee on the Judiciary.

By Mr. O'HARA of Illinois:

H.R. 11926. A bill for the relief of Thelma Haynes; to the Committee on the Judiciary.

By Mr. RAY:

H.R. 11927. A bill for the relief of Ricardo V. De Los Reyes; to the Committee on the Judiciary.

H.R. 11928. A bill for the relief of Peter A. Langro; to the Committee on the Judiciary.

By Mr. TEAGUE of California:

H.R. 11929. A bill for the relief of Law Hong Ming; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

437. By Mr. BARR: Petition of members of Teamsters Local Union No. 135 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen, and Helpers of America requesting a hearing on the denial of the right to elect their own officers; to the Committee on Education and Labor.

438. By Mr. CHIPERFIELD: Petition of members of Teamsters Local No. 15, Galesburg, Ill., for a redress of grievances; to the Committee on Education and Labor.

439. Also, petition of members of Teamsters Local No. 371, Rock Island, Ill., for a redress of grievances; to the Committee on Education and Labor.

440. By Mr. GIAIMO: Petition of 13 residents of his congressional district pertaining to the Federal minimum wage law; to the Committee on Education and Labor.

441. By Mr. STRATTON: Petition of members of the Hotel and Restaurant Employees and Bartenders Union, Capital District Local 471, urging amendment of the Social Security Act so that tips will be accounted for in calculating the amount of pension payments upon their retirement; to the Committee on Ways and Means.

EXTENSIONS OF REMARKS

East Faces Prospect of Losing Representation on the Federal Power Commission

EXTENSION OF REMARKS
OF
HON. EDWARD P. BOLAND
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 26, 1960

Mr. BOLAND. Mr. Speaker, I am disturbed by reports that the administration will soon make two new appointments to the Federal Power Commission that will have the effect of stripping the gas-consuming and industrial East and Northeast from representation on that important regulatory agency.

The New York Times in an excellent editorial today points out that if Commissioner William R. Connole, of Connecticut, is replaced by the President, the Federal Power Commission "will have not a single member from the populous urban gas-consuming areas east of the Mississippi."

I think that Members of the House and the Senate from the States east of the Mississippi should be concerned about the possibility of having a Federal Power Commission not composed of proper regional representation.

The natural gas transmission line companies have already received several rate increases. Any prospect of further increases can have damaging economic effects upon the already hard pressed industrial sections of the Northeast, where both consumer and manufacturer will in the end wind up paying higher gas rates to the local utilities. All of the rate increases in the past have been passed on to the ultimate consumer.

The West Indies Federation

EXTENSION OF REMARKS
OF
HON. ABRAHAM J. MULTER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 26, 1960

Mr. MULTER. Mr. Speaker, a new nation, the first to come into being in the Western Hemisphere since the creation of Panama in 1903, is taking shape in the Caribbean Sea. The birth of the new Federation of the West Indies on January 3, 1958, was a significant day in the political history of the New World. April 22 marks the second anniversary of the inauguration of the federation's legislature. This occasion is of great significance to the people of the British West Indies, for it means the translation into reality of their greatest ideal—federation. They have come to see in this federation their hopes for the future. It marks, also, the final stage in the progress of these people to full self-government.

Geographically, the new federation is the only one of its kind in the world today, for its 3 million people do not share one territory but live in 13 islands scattered over 550,000 miles of Caribbean water. The islands forming the federation vary considerably in size, population, and the degree of economic development. For instance, Jamaica, with an area of 4,411 square miles, has more than 1½ million people, and a large number of well-established industries; while Montserrat is an island of 32 square miles in extent, with a population of some 14,000 living almost entirely on agriculture. Despite many obstacles, the federation's members are determined to guide this new nation to secure independence, within the British Commonwealth.

Welded together under a federal form of government the 13 islands can become a prosperous, vigorous political unit. They have come to realize that it is clearly impossible in the modern world to achieve and maintain full self-government on their own, and be strong enough to stand against present day economic pressures.

Here in the United States, we should look forward to a mutually happy relationship with the new federation. They already look toward the "big country to the north" for understanding and support. This sentiment was clearly expressed by the Honorable Sir Grantley Adams, Prime Minister of the West Indies, not too long ago when he stated that:

The fact that we share the same language and similar forms of government with both Canada and the United States will be of immense benefit to us in future years. The

United States with its massive global commitments has been fully aware that quite nearby there is a new federation with many problems. Our discussions with the United States have led to an appreciation of our varying points of views, and we feel that if we should feel the need to urge our point of view more strongly it would not occasion any abeyance of the civilized norms that we have established.

Already the United States has extended economic assistance to the federation. A new cooperative service agreement was signed in June 1959, providing for ICA technical cooperation activities throughout the federation. U.S. technicians are now studying the problems of these islands. Moreover, last March a multimillion-dollar grant was given to the West Indies Federation under our foreign aid program. Thus, with the wholehearted efforts of the British West Indians and with some expert guidance and support the West Indies Federation should be able to cope more easily with its problems and develop into an enterprising new nation.

On this day of national commemoration I want to extend to the West Indies Government and its people my best wishes and congratulations.

Seventy-fifth Anniversary of Minneapolis Retail Grocers' Association

EXTENSION OF REMARKS
OF
HON. WALTER H. JUDD
OF MINNESOTA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 26, 1960

Mr. JUDD. Mr. Speaker, one of the most effective local trade organizations it has been my privilege to observe in action is the Minneapolis Retail Grocers' Association, which has just celebrated its 75th anniversary.

To inform grocers of new products, new food store equipment, new merchandising operations, and to develop and place into effect programs benefiting both merchant and consumer, were the major purposes which brought about its formation.

More than a hundred retail grocers and meat dealers met together shortly after 10 p.m. on April 4, 1885, in the old Produce Exchange Building on Hennepin Avenue, Minneapolis, to form their organization, elect officers, and set up committees for future meetings and activities.

Many of the merchants were tired out from the work done during that long Saturday; hours in those days extending to 10 o'clock at night.

First president of the association was Wesley Neill, an energetic and eloquent merchant. Other officers were H. S. Mallin and A. G. Moshier, vice presidents, F. H. Aldrich, treasurer, and E. S. Winters and L. B. Hopper, respectively, secretary and assistant secretary.

In its long and distinguished history, the Minneapolis Retail Grocers' Association was a leader in the fight for the passage of the Pure Food and Drug Act; pioneer in State and city programs for the passage of legislation safeguarding the public health, and took an active part in the civic and business activities of the community.

The Minneapolis Retail Grocers' Association is one of the oldest food trade organizations in the United States; and it played a leading role in 1893 in the formation of the National Association of Retail Grocers, and in 1897 the Retail Grocers' and General Merchants' Association of Minnesota.

During three quarters of a century the association has pioneered in working for sound progress in retail merchandising methods that have enabled our merchants in Minneapolis to provide better food to consumers under more sanitary and efficient arrangement, and with better working conditions for workers in the industry. For many years its able, effective and public-spirited executive secretary has been Mr. Edward Straus. The people of my district join me in extending congratulations to the Minneapolis Retail Grocers' Association for the fine work it has accomplished, and very best wishes for the years ahead.

Bills To Amend the Federal Trade Commission Act

EXTENSION OF REMARKS
OF
HON. TOBY MORRIS
OF OKLAHOMA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 26, 1960

Mr. MORRIS, of Oklahoma. Mr. Speaker, today I have introduced in the House of Representatives of the United States bills identical to H.R. 8841 by Congressman STEED, of Oklahoma, and H.R. 10235 by Congressman PATMAN, of Texas. These bills would amend the Federal Trade Commission Act.

The objectives of these bills are to provide assistance to small business in its struggle to overcome unfair trade practices in industry and commerce.

The hearings, which have been conducted by the House Small Business Committee's Special Subcommittee on Small Business Problems in the Dairy Industry, have made it clear that the practice of selling dairy products at unreasonably low prices and frequently as "loss leaders" far below the level of cost, is widespread. Only a few days ago, it was reported that a large concern was selling milk in Florida at 1 cent per half gallon. Other instances have been brought to the attention of Members of Congress where milk has been retailing at less than one-quarter of the cost of producing the product. Small business concerns are much alarmed about this practice and its effect toward eliminating them and creating monopolies in this great industry. Many States have enacted legislation to combat this practice of selling at prices below cost. Courts have upheld the State laws, but due to the fact that the law of any State does not reach beyond the State line, it can have no application to transactions in interstate commerce. Therefore, the need for Federal legislation on the subject to fill this void is apparent. It is believed that H.R. 10235 will fill this need, and, as I have stated, today I have introduced a companion bill identical to H.R. 10235.

Also, it is apparent that there is need for legislation which would provide small businessmen with immediate, effective relief from these destructive practices. H.R. 10235 will strengthen the substantive law to provide relief, but it leaves untouched the procedural law. Small businessmen need immediate, injunctive relief from these destructive practices. Therefore, one of the bills I have introduced today is identical with the provisions of H.R. 8841. It would empower the Federal Trade Commission to enter temporary cease and desist orders while the issues under its complaint are being litigated. In this way, many small business concerns could be saved during the prolonged litigation of cases which involve sales at prices below cost.

I feel deeply that this legislation, or at least something along this line, is badly needed.

Dr. T. Keith Glennan, Administrator of the National Aeronautics and Space Administration

EXTENSION OF REMARKS
OF
HON. DAVID S. KING
OF UTAH
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 26, 1960

Mr. KING of Utah. Mr. Speaker, I rise at this time to pay tribute to a great American, Dr. T. Keith Glennan, Administrator of the National Aeronautics and Space Administration. During the campaign months to come, much will be said, and some of it critically, about our general progress in space. I, myself, have expressed concern, and will continue to so express it, over our failure to vigorously pursue our lead over the Russians during those critical years immediately preceding 1957. I am not convinced even today that public opinion has been sufficiently mobilized in support of our overall effort to regain unchallenged leadership in the field of space technology.

I should like to make it clear, however, beyond equivocation, that nothing that I have ever said, or shall say, is in any way intended to reflect upon the outstanding service rendered by Dr. Glennan. During his relatively brief tenure of office the space program has been given an impetus and direction which, from every point of view, is encouraging and praiseworthy. He has pursued his course with unassuming, but remarkable effectiveness. His patriotic motives have imparted a uniquely high quality to all of his actions, and have deepened the respect in which he is held, and the confidence which he enjoys, by all informed Members of the Congress of the United States.

I express my own admiration for his patience in the face of the most trying

circumstances. I commend him for inaugurating a 10-year program of planning within his organization, which, apart from the merits of the plans themselves, constitutes a conspicuous contribution to our governmental modus operandi. Among the many features of the Russian system which have threatened our own supremacy, one of the most significant is their ability to plan well in advance, and to hold fast to good plans, once conceived.

Dr. Glennan has seen our own need for planning. We must sustain him in his effort to bring those plans to fruition.

I feel that it would be a mistake to restrict in any way his scope of authority, or to enact legislation which might serve to clog the administrative channels through which his directives have flowed with such effectiveness.

During the campaign months ahead it may well be that I shall be called upon to comment critically upon America's apathy toward our common danger, and about our paucity of leadership in certain vital areas. I am only too glad, however, to make my record clear that no words of mine should be construed as intending to reflect other than the highest confidence in Dr. Glennan. I shall give him my full support, and urge all Americans to do likewise.

The Washington (D.C.) Evening Star Offers a Statesmanlike Solution to Controversy Over Administration Plan To Destroy the Historic Buildings Near the White House in the Nation's Capital

---

EXTENSION OF REMARKS
OF

HON. FRANK THOMPSON, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1960

Mr. THOMPSON of New Jersey. Mr. Speaker, the Washington, D.C., Evening Star, in an editorial today offers a statesmanlike solution to the controversy over the administration proposal to destroy the historic buildings on Lafayette Square across the street from the White House in the Nation's Capital.

Three new buildings are involved in a construction tieup. They are a new home for the Civil Service Commission, a joint headquarters for the Federal Aviation Agency, and the National Aeronautics and Space Agency and a combined Court of Claims and Court of Customs and Patent Appeals building.

The Evening Star editorial says in part:

There is still time to save at least two of these buildings from being postponed for another year, however. Both Public Works Committees previously have endorsed the Civil Service and Aviation-Space buildings, so that reapproval now could be accomplished quickly, without necessity of further hearings. The court building has controversial aspects that might call for longer consideration.

On the other hand, the Washington, D.C., Post displays, in an editorial today, considerable displeasure over the action of the Members of the House of Representatives in sustaining a point of order made by an able and conscientious Member and cutting nearly $65 million from the appropriations bill for the three buildings which are not yet approved as required by a recent act of the Congress.

The Washington, D.C., Post does the just cause of replacing the unsightly and hazardous temporary buildings remaining from World Wars I and II no good by casually lumping with them the Dolly Madison House and the other historic buildings on Lafayette Square, some of which have gracefully endured for more than 150 years.

The Nation's Capital actually is faced with a situation comparable in some respects to that surrounding Carnegie Hall, the world-famous music center established in the late 1800's by Andrew Carnegie. What is missing is a Mayor Robert Wagner, a Governor Nelson Rockefeller, and a citizens' committee headed by an Isaac Stern and numbering among its members Mrs. Franklin D. Roosevelt, Sol Hurok, Mrs. Marshall Field, Fritz Kreisler, Jascha Heifetz, Arthur Rubinstein, Dame Myra Hess, Marian Anderson, Leopold Stokowski, Leonard Bernstein, and Van Cliburn.

New York City has dozens of legitimate theaters, Washington, D.C., has only the National Theater and the Arena Stage now that the Shubert Theater has thoughtlessly been razed to make way for a parking lot.

The closer any historic building is to the White House the more imminent becomes its destruction. The Old State, War, Navy Building, the Dolly Madison House, the Benjamin Tayloe House, the Belasco Theater are all within a block of the White House and all are marked for early destruction.

In Philadelphia things are far different. There the Federal Government is spending during the years 1950–61 over $15 million to preserve historic buildings and has established Independence National Historic Park to assist in these worthy preservation endeavors.

The administration is more interested in preserving the ancient treasures of the Nile Valley, than in preserving our own historic treasures right in the front yard of the White House. A new amendment to the Mutual Security Act will help save the Nile treasures—and they should be saved—which otherwise would soon be lost forever under the impounded waters of the Aswan Dam. The amendment will permit the U.S. Government to contribute up to one-third of the cost of the big international salvage program which is expected to cost as much as $90 million in all.

The great buildings fronting on Lafayette Square can serve present and future generations of Americans in many ways and, with proper administration, can advance our country's cultural development and education. Here is an opportunity, unique in our history, for the Congress to make good on its past legislative enactments to provide in the Nation's Capital a National Conservatory of Music, 1891, a School of Arts, 1860, and an American National Theater and Academy, 1935.

A letter in the Washington (D.C.) Evening Star of April 24, 1960, written by Dr. Frederick Fall, director, Washington Civil Opera Association, and the Washington Civic Orchestra declares:

Progress should not exclude the saving of national treasures. Little official realization is being given to historic preservation by governmental Washington. A building is as important to save as a rare book or a manuscript of a symphony. The older cultures of Europe know this—as do millions of Americans. In fact everyone knows it but a few isolated bureaucrats in the Federal Government. * * * This is important for our Government officials to keep in mind at this time when the U.S.S.R. is spending millions to depict Americans as cultureless barbarians.

A telegram which has just reached my desk puts the importance of saving the historic buildings on Lafayette Square in these significant terms:

We respectfully request early hearings before Public Works Committees on S. 3279, S. 3280, and S. 3403 introduced by Senators MORSE, KENNEDY, HUMPHREY, HENNINGS, GRUENING, and DOUGLAS to save historic Lafayette Square buildings including Lafayette Square Opera House, badly needed as a national home for the Performing Arts. Lafayette Square buildings among most historic in city. The old opera house is easily restorable, and, while the United States spends millions to restore opera houses abroad, it should take action to do at least a little for opera and other performing arts in our Nation's Capital.

Carl Levin and O. Roy Chalk, Cochairmen, Citizens Committee for Opera; Robert Richman, President, Institute of Contemporary Arts; Virginia Hansford Russell, National Wildlife Federation and District of Columbia Federation of Women's Clubs; Hobert Spalding, President, Opera Society of Washington.

Senator KENNEDY (S. 3280), Senator HUMPHREY (S. 3403), and Senator MORSE (S. 3279), for himself and Senators HENNINGS, HUMPHREY, GRUENING, and DOUGLAS, have introduced bills to save the historic buildings on Lafayette Square. Related bills have been introduced by Senators MURRAY, MANSFIELD, and DOUGLAS, and by my able colleague from Delaware [Mr. MCDOWELL] and myself in this House.

Senator JOHN SHERMAN COOPER has written a fine letter, which I would like to include at this point in my remarks, saying it is a "shame to destroy Lafayette Square."

U.S. SENATE,
COMMITTEE ON PUBLIC WORKS,
April 25, 1960.

Hon. FRANK THOMPSON, Jr.,
Old House Office Building.

DEAR CONGRESSMAN: Thank you for your recent message, cosigned by Congressman MCDOWELL, urging that early hearings be held on S. 3280 and S. 3279, which would preserve the Dolly Madison House and other historical buildings on the east side of Lafayette Square.

I, too, am interested in this subject, and I think it is a shame to destroy Lafayette Square. As a member of the Senate Committee on Public Works, I have asked the chairman for an opportunity to speak on

this legislation before action on it is taken by the committee.

I appreciate knowing of your interest in this subject.

With kind regards, I am,

Sincerely yours,

JOHN SHERMAN COOPER.

There are, to my mind, some very serious doubts as to whether the location of the Court of Claims and the Court of Customs and Patent Appeals, on Lafayette Square is really the bargain to the Federal Government which its proponents would have us believe.

In the first place, the Federal Government paid $400,000 for the Belasco Theater and approximately $1 million for the buildings which comprised the Cosmos Club which included the Dolly Madison House and the Benjamin Tayloe House, which would be destroyed.

Now, I have been advised by the distinguished Chief Judge of the U.S. Tax Court, J. E. Murdock, as recently as April 13, 1960, that the General Services Administration has been endeavoring for over 6 years to provide a courthouse at some appropriate place to house the Court of Claims, the Court of Customs and Patent Appeals and the Tax Court of the United States.

The Tax Court believes that such a building, housing all three courts, as proposed in several of the bills in the Senate which are before the Senate Public Works Committee, would be the most economical and efficient solution to the problem of housing these three courts.

The very interesting question now presents itself, if the administration proposal to provide a building for only two of the courts seeking office space is accepted by the Congress, will we shortly be faced with a request by the General Services next year to provide space for the U.S. Tax Court?

I include as part of my remarks the extremely important letter I have received from Chief Judge J. E. Murdock which should be carefully studied by the Public Works Committees of the Senate and House:

TAX COURT OF THE UNITED STATES,
Washington, D.C., April 13, 1960.

Hon. FRANK THOMPSON, Jr.,
House of Representatives,
House Office Building, Washington, D.C.

DEAR MR. THOMPSON: The Tax Court of the United States is much interested in H.R. 11691 introduced by you and would like to be included therein along with the Court of Claims and the Court of Customs and Patent Appeals.

The General Services Administration has been endeavoring for over 6 years to provide a courthouse at some appropriate place to house the Court of Claims, the Court of Customs and Patent Appeals, and the Tax Court of the United States. The Tax Court believes that such a building would be the most economical and efficient solution to the problem of housing these three courts. It has cooperated at all times with the General Services Administration in an effort to obtain such a building.

The Court of Customs and Patent Appeals has cooperated until recently on this project. The Court of Claims, however, has always resisted being included in such a building and has endeavored to obtain a building for itself alone.

S. 3279 and S. 3280 introduced in the Senate on March 24, 1960, would provide for the building of adequate facilities to house the Court of Claims, the Court of Customs and Patent Appeals, and the Tax Court of the United States. I have read that Senator CHAVEZ called off the hearings on S. 3279 and S. 3280 as the result of the agreement of the Court of Claims and the Court of Customs and Patent Appeals to be housed in a building to be constructed for them on the site of the Dolly Madison House on Lafayette Square. This would leave the Tax Court without housing facilities.

Both the Tax Court and the Court of Customs and Patent Appeals are presently housed in the Internal Revenue Building. The General Services Administration and the Internal Revenue Service want the two courts out of that building because the space is needed for the Internal Revenue Service. The Commissioner of Internal Revenue is a party respondent to every tax case coming before the Tax Court, and the independence of the court would be more apparent if it were not housed in the same building with one of its litigants, and particularly in a building named the Internal Revenue Building. The Tax Court has occupied a good part of the second floor of the Internal Revenue Building ever since it was built. It needs a little more space than it presently occupies, which is about 60,000 square feet in all.

I hope that you will see fit to amend your bill to include the Tax Court along with the other two courts, all of which need housing in this city. I would be pleased to discuss this subject with you.

Very truly yours,

J. E. MURDOCK,
Chief Judge.

Communist Caribbean?

EXTENSION OF REMARKS
OF
HON. W. J. BRYAN DORN
OF SOUTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 26, 1960

Mr. DORN of South Carolina. Mr. Speaker, the following is a résumé of a talk I made at the Department of Virginia, Disabled American Veterans' banquet, March 26, 1960:

The United States should revise and restate the Monroe Doctrine to include all forms of infiltration and subversion by foreign powers in Cuba, Central, and South America. Affirmative action is desperately needed.

Our present vacillating policy toward South and Central America will lead to disaster. Fidel Castro's government in Cuba is a puppet government. Cuba, under Castro, is a captive nation. Unless Castro is checked by the United States, Cuba could become a Communist missile base threatening the security of the Western Hemisphere. Castro is following the same pattern of agrarian reform inaugurated by the bloody Communists of Russia and Red China. Agrarian reform is always followed by complete military dictatorship and eventually aggression. It is a slogan to hide more sinister developments. Cuba is the Formosa and Okinawa of the Western Atlantic. Cuba is between North America and South America. Just as control of the Mississippi divided and assured military defeat of the Confederacy, Cuba in the hands of the Communists will divide the Western World and cut communications between the Atlantic and Pacific by controlling entrance to the Panama Canal.

Communist strategy in the Caribbean is part of a giant Communist pincers movement aimed at the industrial heart of the United States. Communist missile and air power is being assembled in Siberia to strike through and over Alaska and the North Pole into our heartland—the other through the Near East, Northern Africa, South America, and the Caribbean.

We are in the gravest danger and therefore should strengthen our Monroe Doctrine and should greatly increase our national offensive striking power. Part of this Communist military strategy is agitation all over the world with the object in mind to make the United States spend foreign aid in the wrong places at the wrong time. American money diverted from missile power and air power to the periphery of Russia is military potential that will be bypassed or used by Russia against the United States. This agitation by Russia not only encourages excessive spending by the United States in areas close to Russia, but it also adds to inflation in the United States which cripples the U.S. defense dollar. U.S. foreign aid must be reduced and this money diverted to U.S. retaliatory striking power. This policy will not only afford the United States better protection, but is the only real defense of India, West Germany, Greece, Turkey, Malaya, and the Near East.

The Disabled American Veterans must fight in peace as you fought in war. It is just as important that we fight to prevent war as it is to win a war when once we are involved. The only way we can prevent war is through modern superior strength. Our present military policy is largely based upon concepts of the past. We have an outmoded, purely defensive foreign and military policy. We must eliminate the negative and accentuate the offensive. We should have listened to Billy Mitchell in the early 1930's. We should discard today the recommendations of "Tipperary generals" and "Pearl Harbor admirals."

The average age of our American atomic and missile scientists is 29. These men hold the key to our future military security. Of equal importance is a U.S. Intelligence Agency, second to none. If we know Russian military plans of aggression before they move, they will never move.

Summit conferences and goodwill tours are part of the Soviet blueprint for world conquest. Khrushchev's visit to the United States was the signal for an attempt to seize the Panama Canal by Communist agitators. It was the signal for agitation in Venezuela. It was the signal for frantic ravings by Castro against the United States, followed by Russian military aid to Cuba. The coming summit conference in Europe will be the signal for further Communist infiltration and aggression.

We can and must put Khrushchev on the defense by refusing to meet him anywhere until he gives the captive nations their freedom as promised in sacred treaties. We should remember Munich, Yalta, and Potsdam.

Armenian Martyrs Day

EXTENSION OF REMARKS
OF
HON. ABRAHAM J. MULTER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 26, 1960

Mr. MULTER. Mr. Speaker, April 24 marks the beginning of the tragedy of the Armenian people in Turkey during the First World War.

Forty-five years ago, while most of the world was in the throes of that destructive war, the Turkish Government began its work of massacring the

Armenians. This was so carefully and secretly organized that the existence of such a plan became clear only on April 24 when leading Armenians in all walks of public life were suddenly arrested and sent in small batches to places for execution. Once these leaders were put out of the way, the extermination of the entire Armenian population in the country was relatively easy. During the succeeding several months more than 600,000 Armenians were put to death, and almost as many more saved their lives by escaping to neighboring countries.

That act of the Ottoman Turks, in their attempt to uproot the Armenians, was an act of genocide that almost succeeded, and which has been universally condemned by the civilized peoples. Today we pay tribute to the memory of the victims of that crime, the Armenian martyrs of World War I.

Questionnaire on Vital Issues

EXTENSION OF REMARKS
OF
HON. HAMER H. BUDGE
OF IDAHO
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 26, 1960

Mr. BUDGE. Mr. Speaker, recently I mailed at random to telephone subscribers and rural box holders in my district a questionnaire on issues I consider to be vital to them and the Nation at this time. To date I have received and tabulated some 6,500 returns.

Believing the results of this tabulation will be of interest to the Congress, and under leave to extend my remarks, I insert them in the RECORD. With the exception of the optional presidential preference question, the percentages will not add up to 100 percent as many persons did not answer all of the questions.

The tabulation follows:

1. On farm price support programs: Do you believe Government spending is insufficient (8.8), about right (14.6), too much (65.9)?

2. On space exploration programs: Do you believe Government spending is insufficient (20.9), about right (36.8), too much (29.9)?

3. On national defense: Do you believe Government spending is insufficient (30.1), about right (42.4), too much (23.0)?

4. On foreign aid: Do you believe Government spending is insufficient (3.2), about right (16.4), too much (71.2)?

5. On public welfare programs: Do you believe Government spending is insufficient (23.0), about right (32.4), too much (33.2)?

6. Should the Congress, through its spending, allow the $280 billion national debt to be reduced (78.0), remain the same (9.4), be increased (2.0)?

7. Do you believe the Landrum-Griffin Labor Reform Act approved last year: Helps (37.6), hurts (7.0) rank-and-file union members? Helps (18.6), hurts (16.8) union leaders? Helps (36.7), hurts (10.3) the general public?

8. Do you believe labor unions directly, or through organizations such as COPE (AFL–CIO Committee on Political Education), should (9.3) should not (78.2) be allowed to use funds from regular membership dues or compulsory special assessments for political contributions?

9. Do you believe that decisions as to which candidates and parties a union will support should be made at the local (72.3), national (8.8) level?

10. Do you believe our immigration laws should remain as they are (41.9), admit more people (12.0), admit fewer people (35.1)?

11. Under present conditions in Cuba, do you believe Cuba should (13.4), should not (74.0), retain its preferred status in trade with the United States?

12. Do you believe that taxes should be collected at the Federal level for the payment of teachers' salaries (16.6) yes, (71.3) no; for the construction of schools (24) yes, (59.3) no.

13. Do you favor the levying of tariffs on foreign crops when those crops are in competition with domestic crops? Yes (78.1), no (11.6).

14. Do you favor legislation providing that the Federal Government shall sue and be sued in State courts in water rights litigation? Yes (56.3), no (18.8).

15. Do you favor the creation of single-use (recreation) wilderness areas in Idaho? Yes (36), no (51.1).

16. Do you favor diplomatic recognition of Red China? Yes (15.4), no (73).

17. Do you favor a series of summit conferences such as the one scheduled for Paris this spring? Yes (66.7), no (18.9).

18. Do you favor repeal of the 22d amendment which limits the President to two terms? Yes (21.9), no (69.5).

19. Do you favor increasing postal rates to allow the Post Office Department to reduce its yearly deficit? Yes (47.3), no (41.2).

20. Do you favor increasing the limitation of $1,200 on yearly outside earning for those receiving social security? Yes (67.7), no (23.9).

21. Do you favor allowing tax credits to parents for college educational expenses paid on behalf of their children? Yes (67.4), no (23).

Optional: If the 1960 presidential election were being held today, for whom would you vote? (Please check one only): Hubert Humphrey (2.5), Lyndon Johnson (3.7), John Kennedy (11.1), Wayne Morse (2), Richard Nixon (48.7), Adlai Stevenson (4.5), Stuart Symington (4). No opinion, or undecided (22.4). Others (1.1).

West Virginia Is Getting Shortchanged: XVIII

EXTENSION OF REMARKS
OF
HON. KEN HECHLER
OF WEST VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 26, 1960

Mr. HECHLER. Mr. Speaker, during the first session of this Congress, I repeatedly called the attention of this House to the unemployment situation in my State of West Virginia. I introduced, supported, and voted for many measures designed to help West Virginia move forward and achieve industrial progress.

In addition, I brought to the attention of my colleagues on numerous occasions the shocking discrimination against West Virginia by certain Government departments, specifically, the Departments of Commerce and Defense. I pointed out that this State, suffering the burden of chronic unemployment, ranked dead last among the 50 States in Department of Defense spending and Department of Commerce activities in proportion to population.

Far from asking for a handout or a dole for West Virginia, I merely championed the cause of democracy and fair play, urging that West Virginia—sorely beset by economic problems—deserved at least to be given its just share of governmental activities.

West Virginia has the highest rate of unemployed of any State in the Union, yet the lowest number of Department of Commerce employees per capita. West Virginia had the highest number of its young men per capita in the Nation who were killed and wounded in the Korean conflict, yet she is last among the States in defense expenditures in relation to population.

Now I must bring to the attention of the House another disturbing example of the way West Virginia is not getting its fair portion of Government activities—and I regret to say that this falls in an area where real help could be afforded to help our State's economy.

The Small Business Administration was set up a few years ago in a commendable effort to help the Nation's small businessmen and industrialists to cope with competition from growing supercorporations and monolithic industrial empires. The SBA was created to keep our economy diversified and strong, resting on a broad, general base.

The SBA's basic effort is to keep small businesses and employers in such competitive position that they are not swallowed by larger corporations, and to maintain industrial production over a wide area of the Nation.

The need for the services which the SBA should provide is very great in West Virginia, where most of our businesses are small.

Small manufacturers seeking to utilize the labor surplus which exists in every sector of the State could well use SBA assistance to expand plants and provide new jobs.

Other manufacturers, seeking to expand employment, could use SBA assistance to create product diversification or expansion into new market territories.

Still other firms might want to transfer their primary production into other lines, with SBA assistance.

There are innumerable other situations and examples that I could list to show how the Small Business Administration could provide aid—at no cost to the taxpayer other than administrative expenses—which would have a positive effect in stimulating West Virginia's economy.

West Virginia, then, should be at or near the top in the list of State participation in SBA loan activities.

However, I regret to say, this is not true.

Instead, in proportion to population West Virginia ranks 45th among the 50 States in SBA participation, very near the bottom.

Of the States below it, three—New York, New Jersey, and Illinois—are the heartland of the Nation's financial institutions, where many diversified lending and financing services already are

available, and where small businesses can find private, outside help more readily.

Only two of the States below West Virginia in SBA participation—North Carolina and Maryland—can be fairly compared.

If there is an obvious need for additional SBA activity in an area such as West Virginia, then why has participation been so small?

The answer must lie in one of two areas: Either the Small Business Act is being administered in a way that precludes the businesses which could provide needed jobs in our State from obtaining SBA loans; or, the law itself is set up in such a way that these firms cannot obtain financial aid.

I suspect that a combination of these causes is at the root of this hopeless inadequacy of SBA to meet the needs it was created to meet in the areas where such assistance is most needed.

Mr. Speaker, I plan to introduce a bill which I hope will mean a step forward in remedying both these defects.

As my colleagues all know quite well, the Small Business Act contains provisions which offer special forms of loans and assistance to areas stricken by drought, flood, hurricane or other natural disasters. Thus, the Federal Government recognizes that areas reeling under the onslaught of an act of God deserve and need particular types of help until their economies can adjust to the situation.

Mr. Speaker, I submit that chronic unemployment, shut-down plants, declining payrolls caused by mechanization, diminishing markets and other causes, are just as much a catastrophe as any flood, hurricane, or drought that ever smote this Nation.

I plan, therefore, to introduce a bill which would define clearly the intent of the Small Business Act to provide such special forms of aid to depressed areas, and would direct the Administrator of the Small Business Administration to provide aid to a chronically depressed area—under definitions clearly spelled out in the act—just as he would be required to do for areas hit by natural disasters.

This is not an attempt to seek a handout from the Government. It is merely a realistic approach to a growing national problem, one which will afflict more and more sections of the economy and regions of the Nation as the advancing age of automation strides forward, in the same spirit of helpfulness, neighborliness and sympathy that inspires us to help the unfortunate victims of other catastrophes.

Under unanimous consent, I include in the RECORD statistics bearing out the fact that West Virginia is being shortchanged in the activities of the Small Business Administration:

State	Cumulative Small Business Administration loans, approved Sept. 29, 1953, to June 30, 1959	Total amount approved	Population, 1950	Ranking basis: Population per each SBA loan granted	State	Cumulative Small Business Administration loans, approved Sept. 29, 1953, to June 30, 1959	Total amount approved	Population, 1950	Ranking basis: Population per each SBA loan granted
1. Alaska	132	6,420,255	128,643	975	26. New Mexico	86	4,924,000	681,187	7,921

Kaskaskia Reservoirs Will Bring Great Boom to Illinois' Heartland

EXTENSION OF REMARKS

OF

HON. PETER F. MACK, JR.

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1960

Mr. MACK. Mr. Speaker, the Army Engineers' flood control program for the Kaskaskia River Valley is vital to the prosperity of Illinois. Completion of two dams and reservoirs—one at Shelbyville and the other at Carlyle—will bring an industrial boom to the heartland of our State.

I testified recently before the public works subcommittee of the House Committee on Appropriations in support of continued Federal financial assistance for these projects. Because some opposition was expressed at the hearing, I include my testimony at this point so that the House may know that these projects have the virtually unanimous support of the people of my area:

Mr. MACK. Mr. Chairman, I appear before your committee today to make a strong appeal for the continuation of the development of the Kaskaskia Valley and, specifically, to request an appropriation of $250,000 to continue planning the proposed reservoir at Shelbyville, Ill. It is my understanding that the Corps of Engineers has requested this amount as necessary for orderly planning of this very important project.

The development of two Kaskaskia Reservoirs, one at Carlyle and the other at Shelbyville, will, in my opinion, bring the greatest boom the heartland of Illinois has had since the advent of the railroads. The development of this great river basin with an adequate water supply will eliminate very difficult economic conditions caused by the closing of the coal mines in southern Illinois. I am confident that this great industrial boom will be associated with the completion of these projects.

For many years Illinois has had an inadequate water supply. Because most of the State is bounded by major rivers, efforts never were made to construct reservoirs and provide adequate water supplies in other areas of the State. The Kaskaskia River, which lies in the geographical center of the State and is Illinois' second largest river, has been permitted to run uncontrolled throughout the 142 years that Illinois has been a State of the Union. Ironically, the first capital of Illinois was located near the Kaskaskia River and, because of the treacherous floods, it had to be abandoned. As a matter of fact, the site of the original capital is now completely under water.

The Corps of Engineers has located two reservoirs on the Kaskaskia to control floods. They have indicated that it is essential that the double reservoir system be employed to do the proper job. I am hoping that you will continue to support this program so that this river basin can again serve a useful purpose.

It has been called to my attention that within 3 years alone, according to a report from the Agricultural Extension Service, $4 million worth of crops have been washed out in this valley to say nothing of the extensive damage to other property. However, in the same 10-year period when the floodwaters were doing this tremendous damage it has been vividly driven home that our water supply in Illinois is totally inadequate. In the last 10-year period we have had two droughts which caused nearly one-half of our cities to be without an adequate water supply. On

one occasion Lake Springfield, the second largest manmade lake in our State, went dry.

I realize that this reservoir will serve many useful purposes other than flood control and water supply but these two considerations are vitally important to my constituents in Illinois. These two lakes will by far be the largest in our State and will have a tremendous recreational value. These twin projects also will help navigation in the lower Mississippi.

The Army Engineers have estimated that the lake project at Shelbyville, Ill., will cost $27,470,000. This of course is a substantial sum but it must be remembered that the Federal contribution is only $18,500,000 and nearly one-third of the cost, approximately $9 million, will be contributed by State and local agencies.

The recent floods emphasize the importance of this project. Just last week 15,000 acres of farmland were under water in Shelby and Moultrie Counties alone. Almost every year we have a repetition of this as the Kaskaskia goes on a rampage, inflicting damage on thousands of dollars' worth of crops in the valley. The crop damage in the valley came to more than $3 million in the 3 years of 1956, 1957, and 1958, not to mention the damage to other property.

The Kaskaskia Valley Association has developed enthusiastic and virtually unanimous support for this project. I want to dispel any idea that anyone might have that the people of Illinois, and especially the people of Shelby and Moultrie Counties, have any objection to this project. I have been familiar with this project for 5 years. During that time I have not had a half dozen letters in opposition to this program. The five letters I did receive were from property owners who would be forced to sell their property. They did not oppose the program but expressed some regret that they would be forced to sell their property.

I make this statement because I understand that some newly organized group is to appear and express opposition to the program. It is my understanding that they do not come from my area in Illinois and that, in fact, their membership includes not one resident of either Shelby or Moultrie County.

Mr. Chairman, thank you for this opportunity to testify before your committee. I want to commend you on the great job you are doing. Every dollar you appropriate for these projects which conserve our natural resources is an investment in America and, as a result, will make our great country richer.

For a National Task, a National Program

EXTENSION OF REMARKS
OF
HON. LEE METCALF
OF MONTANA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, April 26, 1960

Mr. METCALF. Mr. Speaker, the distinguished junior Senator from New Jersey [Mr. WILLIAMS], chairman of the Senate Subcommittee on Migratory Labor, recently addressed the Western Interstate Conference on Migratory Labor sponsored by the Council of State Governments and the American Public Health Association.

Hearings are currently being held before the General Education Subcommittee of the House Education and Labor Committee under the chairmanship of the gentleman from West Virginia [Mr. BAILEY] on measures to improve the educational opportunity for migrant children and adults. Members of the Congress will find the address of Senator WILLIAMS informative, factual, and persuasive in consideration of legislation to provide for a greater measure of human dignity to these unfortunate victims of our unbalanced agricultural economy.

Senator WILLIAMS' address follows:

FOR A NATIONAL TASK, A NATIONAL PROGRAM

(Address by Senator HARRISON A. WILLIAMS, JR., at the Western Interstate Conference on Migratory Labor, April 10, 1960)

To be here today is more than an honor. It is an opportunity to meet the men and women with an interest in, and responsibility for, dealing with migrant problems in an area covered by almost one-fourth of the States of our Nation.

For the chairman of a Senate subcommittee which is less than 1 year old, today's conference is an excellent way to receive the benefit of your years of experience; we can find ways in which your jobs and mine mesh on the question of migratory workers and those who use the services of those workers.

Men and governments do effective work when there is a goal in sight, and when they are working toward that goal and not away from it. We are here today, I think, to make that common goal a little clearer, a little closer.

We are here to speak up. First to each other; and then to every person who can be persuaded that he, too, has a part to play in remembering the "forgotten people," those "lonely wanderers on the face of our land."

And to do that we should offer a national program for a national task—one that will put all our resources to work: citizens' interest, State programs, Federal agencies, Congress, and the many organizations which have done so much already.

There is no one Federal program, or group of Federal programs, that will end the problems affecting the migrants, the growers, and the citizens whose lives are affected in one way or another by the migrant.

From what the subcommittee has already learned, it is clear that individual states can do only part of the job. We know also that private citizens and organizations however energetic and sympathetic their workers are, look to their legislators and government administrators. Therefore, we must draw up a balance sheet of responsibility and action.

On one side of the sheet should go the details of the job that must be done. On the other side should go a listing of the forces that we can put to work to fight the many problems which you and the subcommittee know about and some which we may not, even yet, know about.

When we have this fundamental tool—this worksheet for progress—then we will have a new perspective and a new impetus. The job is big enough for all, but not so big that we can afford duplication of effort or no effort at all in areas which might be neglected if we concentrate on only a few of the more glaring inadequacies.

And we must remember, I think, that we are dealing with a sick industry. American agriculture is the marvel of the world; even the Soviet Union is willing to admit that our Nation can outdo theirs at least in this one segment of our economy. Yet American agriculture is the cause of the single most perplexing domestic problem facing us. The migrants and the growers are caught up in this malaise; no diagnosis of their problems can be separated from the stark fact that most agricultural income is going down, and that we as a Nation really don't yet have a good program at work to keep that income from going down even more.

If, therefore, we overlook farm problems and try to make the grower the villain of the migrant worker drama we shall have jettisoned a basic source of essential understanding and knowledge.

There are no villains and no heroes in the drama. But there should be, and there is, national concern. We must put that concern to work, and that is one reason we are here today in 1960—a clear-cut case of East meeting West and liking it very much indeed.

And, it seems to me, 1960 is a good year for action. We're at the start of a new decade. Like the man who makes New Year's resolutions, we feel a need for freshness and change. We could not believe it, if someone were to tell us, that the sixties could pass with little or no progress on the problems to be described here in the next 2 days. The fact is, however, that someone has to work hard to make certain that progress is made, and we are part of that force of "someones" who must do the work.

This first year of the sixties is a year of anniversaries. It is the silver jubilee of the great social legislation enacted under the leadership of Franklin D. Roosevelt. Twenty-five years have passed since Congress enacted laws to reduce the suffering and distresses caused by unemployment.

Americans watched in 1935, too, as Congress passed the Wagner Act. Here was another historic cornerstone in the structure of laws that express the conscience of our citizens, and their faith in Democratic progress.

The thirties brought us social security, Federal minimum wage legislation, and other bills based on the premise that no man's comfort or profit can be based, even partially, on another man's suffering or exploitation.

All this happened decades ago.

And so, in this great year of 1960, when we are assured that we Americans are living in a happy state of peace and prosperity, when an alltime record of 64 million employed Americans has been established, and when many Americans apparently really believe that this is the best of all possible years in the best of all possible worlds, it certainly behooves us to give special thought to the more than 1 million migrants who help bring food to our tables and fiber for our garments.

They—the migrant workers—could look with some bitterness on another anniversary which could be observed this year. It was just 21 years ago that John Steinbeck wrote the "Grapes of Wrath."

His Dust Bowl is now green; "Okies" are people of the past. But the open road and the shack by that road are still with us. Children are still dying in the 1960's, in highway tragedies and isolated outbreaks of avoidable illness and they are dying intellectually, too. They are dying in terms of limitations upon their lives—in education, in progress from one generation to the next, in their outlook and belief in the improvability of themselves or the children who will follow them. We have waste, and we cannot afford waste. It takes too great a toll of national conscience and national strength.

Suffering persists among the migrants who have taken to the road since World War II. County health officers shake their heads as they tell the subcommittee about the ditch used for drinking water or the child who knows no cleanliness. Teachers tell us how they make a little education go far, but they also tell us how much farther they have to go. Growers are not proud about much of the housing they offer, but they don't know how they can provide more. Migrant man and wife count their money at the end of a season and find that their earnings are only in the hundreds of dollars.

As for the future, there is little reason to think of it because the present is so hard.

Who are these migrants? What do they do for our Nation?

A 1959 series of articles in the Washington Post and Times Herald on the migratory worker in Maryland starts off with these words:

"Tally McNeil lives in a dingy, one-room shack on the eastern shore with his pregnant wife, five children and his worries.

"They share three cots, a two-burner stove and a gnawing uncertainty over where the next dollar will come from.

" 'In the last 2 days I ain't picked more than $2 worth of tomatoes,' said Tally, head hunched between his husky shoulders. 'That don't buy us much.'

"When the harvest is good, a migrant picks until his knees are sore and his back aches. In a bad season, there is the specter of empty stomachs for himself and his family.

"This summer the shore has been hit by a devastating combination of drought and heavy rain. Because of the weather, there has been only half the usual crop of tomatoes, cucumbers, beans, and peppers.

"Nevertheless, Tally McNeil, his parents, five brothers, and two sisters will be back from Pompano, Fla., next year to gamble again with nature, just as they have for the last 11 years."

Our subcommittee's early studies indicate that almost half a million persons are in our domestic migrant forces: the Texas-Americans, the southern Negroes, the Puerto Ricans, the American Indians, and others.

Among the foreign migrants we have approximately 400,000 Mexican braceros and 12,000 British West Indians. Smaller numbers of Canadians and Japanese have worked in the fields.

If we were to add the wives and youngsters who travel but who do not work with the men we would have to add hundreds of thousands more to the number of persons who live the migrant way of life in this Nation.

All in all, there are at least 22 of our States which depend on a skilled or semiskilled labor force ranging from 6,000 to 205,000 persons to harvest their perishable fruits and vegetables. And their skills must often be quite varied.

A president of a large New Jersey farm, has said that: "I think, actually, that the average farm laborer requires a great deal more skill and a much wider range of skill than the average industrial laborer does. Conditions on a farm are such that the job content changes constantly. You can't break a farm job down into series of repetitive, easily supervised operations like you can a factory job. I'm an engineer; I've run quite a few factories and I've run quite a few farms. I've never seen an honest job evaluation yet that didn't come to the conclusion that the farm job ought to be paid more than the factory job."

In Arizona, the migrant might work on citrus and cotton. In California, on peaches, nuts, cotton, and strawberries; in Colorado, sugar beets and cherries; in Connecticut, tobacco; in Georgia, appropriately enough, on peaches. Idaho: potatoes; Illinois: peas; and so the story goes. Each State has, with some exceptions produced the crops most adaptable to its soil and climatic conditions.

As Prof. Daniel H. Pollitt, of the University of North Carolina, has said in a study prepared for our subcommittee:

"These crops enrich our diet and our level of living. The sale of these crops brings important revenues to the States; the average cumulative payroll of the migrants is substantial. If for no other reason than this economic one, the welfare of the migrant is worthy of investigation and improvement."

Of course, you here today are interested in more than economics. The very sponsorship of this conference, and the variety of Government agencies represented in the audience, indicate how widespread these interests are.

The idea for the conference goes back to the September 1959 meeting of the Western Governors' Conference which adopted a resolution calling for a regional conference on the migratory labor problems facing the States. In furtherence of that resolution, the sponsors of this conference in Phoenix—the Council of State Governments and the American Public Health Association—have planned and devised the excellent 3-day program we are initiating here tonight.

WORK OF THE SUBCOMMITTEE

Already I've referred to the Senate subcommittee a few times. Let me tell you a little more about it and then discuss the part the subcommittee could play in the national program I discussed earlier.

The subcommittee was created last August. Two Senators from the West—JAMES E. MURRAY, of Montana, and BARRY GOLDWATER, of this State—are among the members. The others are JENNINGS RANDOLPH, of West Virgina, and JACOB K. JAVITS, of New York.

At its very inception the subcommittee had before it three bills which had been under consideration by the full Senate Committee on Labor and Public Welfare.

One, S. 1778, would require registration of crew leaders to protect workers and growers against the occasional unscrupulous labor contractor—the man who makes work arrangements between farmer and migrant. Another, S. 2141, would extend child labor provisions to migrant youngsters. Two very fine western Senators, MURRAY, of Montana, and YARBOROUGH, of Texas, are among the cosponsors. S. 1085 would bring the migrant workers under minimum wage protection.

As soon as I was named chairman, I introduced another crew registration bill. It had more detailed standard by which activities of crew leaders could be measured, whereas the earlier bill leaves a large discretionary area to be handled through regulations by the Department of Labor.

We began hearings in Washington last summer. The Department of Labor sent witnesses, and so did the Department of Agriculture. Even though, as you well know, there are differences of opinion between these two Departments, their witnesses did try to give constructive testimony. I am disappointed, however, about the failure of the Department of Labor to follow up the testimony with additional statements about specific legislation. Except for the crew leader bills, which they approve, the Department of Labor and the Department of Agriculture have thus far taken no position on the pending bills. Perhaps after the Departments have resolved their family feud, they will come forward with meaningful help and concrete legislative recommendations.

In October the subcommittee went to Wisconsin, Michigan, and Minnesota. We went out into the fields and had our first look at some housing that was fairly good and other housing that was unbelievably—shall I say primitive? That's a polite word.

In New Jersey, in December, we found that bad housing is not limited to any one State or group of States. We also visited New York and Pennsylvania, and our witnesses included everyone from Eleanor Roosevelt to three crew leaders who send their workers in buses every morning from the streets of Philadelphia to fields 20 and 30 miles away.

To bring you up to date, we thought a few weeks ago that the subcommittee would spend 4 days on field trips and hearings in the vegetable belt of Florida. The round-the-clock debate of a few weeks ago—known in some quarters as a filibuster—has forced us to postpone that trip.

As things stand now we may soon have another round of Washington hearings; after that we hope to reschedule the Florida hearings and also conduct a California hearing in middle or late July.

As a result of our early journeys, I introduced three bills in January. In some ways these bills—two on education and one on housing for migrants—are the essential foundation for other legislation, and I'd like to discuss them briefly.

Incidentally, I'd like to take a moment to thank any of you who may have been at the White House Conference on Children and Youth last week. A forum at that conference endorsed the housing and education bills in principle, as well as other proposals now before the subcommittee.

KEY PROBLEMS: HOUSING AND EDUCATION

The White House Forum paid particular attention to education for migrants, and so will I.

One of the bills I introduced on January 20 would, in very brief terms, do these things:

1. The Federal Government would help bear the additional cost of educating these children during regular school sessions. Funds would be provided to pay 75 percent of the State's cost of educating the child for each day of attendance. The Federal share of 75 percent would be maintained for the first 2 years; thereafter, the Federal share would be 50 percent of the cost.

2. Another section of the bill would help communities pay the extra expense of educating migrant youngsters in special summer sessions: $300,000 in grants would be available annually for this purpose over a 5-year period. Institutions of higher education programs would be eligible to sponsor a summer school under this part of the program.

3. Two hundred and fifty-thousand dollars annually, for 5 years, would be earmarked for State planning grants to encourage interstate cooperation and fact-gathering on educational programs. In other words, if Arizona has a good program, Idaho, and New Jersey need to know about it.

Not only would this program encourage fact-gathering; it would encourage fact-trading. Our hearings and field trips have convinced me that this could be a very valuable program.

All three programs proposed in this first education bill would, when added together, cost only about $2 million a year.

In terms of missiles or farm surplus storage costs, this is not much money. In terms of positive good to a large number of citizens, it is an impressive sum. Only youngsters of domestic migrant workers would participate in this program. Braceros live bachelor lives, I'm told, and do not have their children with them.

Youngsters aren't the only ones who would benefit from better education. Adult migrants can profit also.

The second bill I introduced on January 20 is the direct result of talks I have had with growers, public health officials, and others.

Perhaps the strongest and most justifiable complaint expressed by growers again and again is the one which I'll paraphrase like this:

"Well, I've done a lot of things to improve the welfare of migrants on my farm. I've built them new housing, put in toilet facilities, new showers, cooking facilities, nice new beddings, plenty of garbage cans. And what happens? They mark up the walls, kick holes in the window screens, stop up the toilets, pull the knobs off the showers and stoves, tear the blankets, and tip over the garbage cans."

The farmer has a right to his hurt feelings and his resentment; often he has stretched his thin profits a little thinner so that he could build better quarters. Sometimes the migrant for whom the facilities were built, however, didn't even know what the facilities were for.

The root problem here is a lack of education in fundamentals of modern living. And it is to this problem that the second bill is directed. It would authorize $250,000 annually for 5 years for a program of practical education for the workers themselves, and it would follow the path so successfully blazed by the Cooperative Extension Service, which now combines the efforts of some 11,000 county extension workers and 1.2 million voluntary local leaders to provide information about home economics and agricultural methods to more than 12 million persons.

You know, when you talk about education, you sometimes have a feeling of which came first, the chicken or the egg.

If children receive proper education, won't child labor legislation be more effective? Or is it the other way—if a child does not have a school to go to, what does it benefit him to be forced from the fields. The same question arises about minimum wages. Unless adults are given some instruction in the benefits of good, healthful living, won't he lose some of the advantages that extra dollars in his pockets could give him?

In Fredericksburg, Va., last month I spoke before a group of church women. Though they were genteel, they had a hard-bitten appreciation of migrant problems—the kind of understanding possible only to those who have actually seen the migrants in their home camps. Their biggest response of the day came when I described the education bills; they seemed to believe that schooling is the big first step forward.

Let me say here, too, that educational opportunities have been seized upon by migrants wherever they have been offered, to judge by what we have seen or heard about so far. The usual experience is that a summer school has more students each year; and the children look forward to the school session as one of enjoyable parts of their journeys to other States.

There was, for instance, a report we received at our hearings in Michigan. A superintendent of schools told about a 5-week demonstration summer school there. I'll read one paragraph:

"I have never found a nicer group of children to work with. For the most part they were smart children, eager to learn, appreciative, and loved books. Somewhere they have either learned good work habits in school or are just that eager to learn * * * many were constantly reading or looking at books. From their conversation it was very evident that they were happy with the opportunity to go to such a school and also to be able to ride to and from school in the bus."

One of the little girls who went to a Michigan summer school wrote back to her teacher friends in Michigan. She said, among other things:

"Just a few lines to say that I am missing you a lot. I have started school already but I don't like it as much as I liked that school over there. My teacher over here is Mrs. Price and every day she buys a can of candy from Laura, a girl that I know for $8, but you didn't buy us any but you are still the goodest teacher I have had and you will be. Well, I guess that's all for now. By-by, hope you get to come over here where it's warm. Your friend and yours truly,

"MARY ANN CASTILLEJA."

Mary Ann still has to brush up a little on her grammar, but I think her enthusiasm for education is just about perfect.

You here today know about many of the State schools established to promote migrant education: the $50,000 pilot plant in Oregon, Ohio's $175,000 reimbursement program to school districts, action in New York and in New Jersey. I think that you must be interested in the 3-year study of special educational problems underway in Colorado, with the help of the U.S. Office of Education. Texas and Wisconsin are trying to find a good way to determine the educational needs of each child in the home district of that child and then transmitting that information to another State. Wisconsin could thus, for example, be in a position to give the child the educational program he should have when he arrives.

These and other efforts point up the need all the more, I think, for coordination, exchange of information, and encouragement from Federal levels down to the local school board level. It would be shameful, in this day of massive emphasis on educational improvement, if we were to permit this educational lag to continue among large numbers of these migrant youth. We do know that the lag is there; one study, for example, estimates that more than 50 percent of 100,000 school-age migrants are from 1 to 4 years behind in school by the time they reach the age of 14.

THE HOUSING BILLS

Encouraging as the educational interest is, it is only part of the picture. We need good housing, too, but who is to provide it? To many growers the migrant is a temporary visitor, and the grower frequently believes that the investment in housing should be kept to a minimum, often a very bare minimum. The subcommittee has seen shacks that have been made almost livable by the migrants—in one wooden frame hut not too far from Princeton University, a woman was happy when we met her because her husband had just nailed an orange crate to the wall, thus giving her a new shelf.

And the subcommittee has also seen fairly good buildings which have been almost wrecked within one growing season—another good illustration, I believe, of the need for the education bill I mentioned earlier.

Growers, of course, are at a disadvantage when they try to finance housing for migrants. Lenders generally don't regard such housing as good mortgage security; the farmer might discover that he would have to mortgage his entire farm to provide shelter for his temporary visitors—and it would take many arguments to persuade him that this is a wise thing to do.

To help deal with the housing question I introduced a bill on January 27. The first section would authorize the Secretary of Agriculture to insure loans up to $35 million a year for migrant homes. Another section of the bill would authorize direct loans to farmers associations, and State or county governments.

The direct loans could be used for nonprofit housing of migrants and they would come from a $25 million revolving fund to be established by congressional appropriation.

The bill is intended to help the farmers—and we have seen them—who try to provide good housing despite slim profit margins and no assurance that the competition will provide equally good housing.

We have inspected, for example, camps in which central dining areas were provided, in which rooms were painted in attractive colors, and in which sanitary facilities were new, well-maintained, and adequate. One grower told us that his model camp is a source of pride to him. And he gave one practical reason for being so proud. He said that his camp helps attract a steady supply of skilled workers to his farm each year, thus cutting down his turnover rate and replacement costs.

Other growers have found that improved educational opportunities have the same effect—workers want to come back year after year because they have found something they want. Sometimes that something is a feeling of growing self-respect and self-understanding.

Housing is a subject of such importance and complexity that I feel the subcommittee must give it intensive attention. What can be done, for instance, about the migrant who actually owns his own small plot of land? He lives in his makeshift quarters there and goes into the surrounding countryside to harvest crops. You delegates from California, I understand, are fully aware of this problem and will probably agree that it is worth an entire study in itself.

OTHER BILLS BEFORE THE SUBCOMMITTEE

Earlier I briefly described the other bills before the subcommittee. Each one has its own part to play in any national program on migratory workers.

Take the minimum wage, for instance. This is a very difficult legislative field, because in devising such legislation I think we must give great weight to the fact that the piece-rate system of payment, in many instances, is prized more dearly by the worker than by the employer. In addition, fringe benefits of certain kinds should be taken into account. It is also desirable that such legislation produce an opportunity for orderly adjustment of the wide regional variation in farmworker wages. And, of course, as I have already indicated, we must be ever mindful of the general deterioration in national farm income.

Even though there are substantial problems still to be resolved on the minimum-wage question, I believe we have made a good beginning in our study of the minimum-wage bill introduced last year by Senator MCNAMARA, of Michigan. Senator MCNAMARA'S bill, which has considerable merit, in my opinion, would apply a minimum-wage floor to employees of large farm enterprises.

Under its terms, farm operators employing more than 2,244 man-days of hired farm labor during a calendar year would be required to pay at least 75 cents an hour. This minimum would be adjusted upward to $1 an hour within 3 years.

Reasonable men may disagree as to detail, such as the size of the farm enterprise to which this law should apply. But I believe that the principle proposed in the bill is sound and should be enacted into law.

You know the subcommittee has been asked to do something about minimum wages which, when we first heard it, sounded impossible. Crew leaders and workers, too, asked us to devise a minimum-wage standard for piece-work rates. Our first reaction was that it was a good trick if anyone could do it, but how to do it? Now we have heard that at least one western State actually makes such a system work, and work very well, indeed. I hope to learn more about that system while I am here.

Two bills before the subcommittee would require registration of crew leaders. All here have probably heard stories about the families who work all season only to find that, after they have paid their "debts" to an unscrupulous crew leader, they have earned only a few hundred dollars, even less than the $892 per year which is the average annual income for all migrants.

Senator JAVITS, of New York, introduced the administration bill for crew-leader registration; I have introduced a more comprehensive bill calling for greater control of these labor contractors.

* * * * *

The final bill now under consideration asks for child labor protection among migrants. I was startled last week when a magazine interviewer said she had heard from informed sources that it might take 10 years for such a bill to pass. I can't imagine that anyone could stand for such a postponement of the inevitable and the imminent. The day is fast coming for this basic reform.

Unfortunately—and this is particularly unfortunate because the American Public Health Association is one of the sponsors of this conference—the subcommittee as yet has no specific proposals for betterment of health conditions among migrants. I think it is obvious, though, that the Federal role

in this field should go far beyond mere technical advice and assistance. It's time to put to work the lessons we have learned through pilot projects and local demonstrations. We intend to take a close look at health problems among migrants, and to find out what should be done that isn't being done already.

A NATIONAL PROBLEM

As you may realize from this summary, the subcommittee still has much work to do, but its work won't mean much—as I said earlier—unless you and others elsewhere can define the role which you should play.

A great deal of thought, for instance, has already been given this problem by Federal administrative officials. And, to judge from the events of recent weeks, much more thought is yet to be given.

But the administration should decide where it's going, and so should Congress. So should the States. So should every county agent or schoolteacher, or social worker, or just plain citizen who has become concerned about the migrants.

Growers, I think, have a special responsibility. They have not asked for the problems that come with the migrant, but the problems exist, all the same. As long as growers have peak labor needs—and call upon migrants to meet those needs—he, the grower, can't disassociate himself from some of the consequences which arise because he needs seasonal help.

As I said before, the subcommittee has already received much clearsighted appraisal and cooperation from farmers. We're going to need more as we go on with our job.

The fact is that reforms and improvements will come with the growers' help or without it. But, from the growers' viewpoint and the viewpoint of everybody else, it would be better if the farm contributes to that change and believes in it.

But I repeat, the improvements will be made, with such help from growers or without it.

I have already mentioned that the average citizen looks to his legislators and Government administrators for help. Let me make it clear, too, that we shall need the advice and interest of citizens. Their role, in fact, is of the utmost importance.

Unless the small rural community recognizes its responsibility to help educate the migrant child, unless many millions of Americans believe that they have a direct responsibility whenever a migrant is killed in a highway accident, or whenever an honest proposal is made to correct some of these abuses—unless, in short, they are concerned, then the lawmaker and the administrator will not have the kind of support he must have to do the work that is called for.

For a national effort, we need a national program and full use of all the resources, and I am grateful for the opportunity to be here and witness your determination.

I'd like to close, after taking so much of your time, with just a few paragraphs from Steinbeck's "Grapes of Wrath." He described a different time in history. But from the final lines, you will see why I read it here today:

"And the rain pattered relentlessly down, and the streams broke their banks and spread out over the country.

"Huddled under sheds, lying in wet hay, the hunger and the fear bred anger. Then boys went out, not to beg, but to steal; and men went out weakly, to try to steal.

"The sheriffs swore in new deputies and ordered new rifles; and the comfortable people in tight houses felt pity at first, and then distaste, and finally hatred for the migrant people.

"In the wet hay of leaking barns babies were born to women who panted with pneumonia. And old people curled up in corners and died that way, so that the coroners could not straighten them. At night the frantic men walked boldly to hen roosts and carried off the squawking chickens. If they were shot at, they did not run, but splashed sullenly away; and if they were hit, they sank tiredly in the mud.

"The rain stopped. On the fields the water stood, reflecting the gray sky, and the land whispered with moving water. And the men came out of the barns, out of the sheds. They squatted on their hams and looked out over the flooded land. And they were silent. And sometimes they talked very quietly.

"No work till spring. No work.

"And if no work—no money, no food.

"Fella had a team of horses, had to use 'em to plow an' cultivate an' mow, wouldn't think a turnin' 'em out to starve when they wasn't workin'.

"Them's horses—we're men.

"The women watched the men, watched to see whether the break had come at last. The women stood silently and watched. And where a number of men gathered together, the fear went from their faces, and anger took its place. And the women sighed with relief, for they knew it was all right—the break had not come; and the break would never come as long as fear could turn to wrath.

"Tiny points of grass came through the earth, and in a few days the hills were pale green with the beginning year."

If I might add just one thought, wrath has a kinship to hope because wrath is somehow impossible unless our sense of justice has been offended. And, in every nation where freedom persists and grows, a sense of justice persists and grows, too.

Americanization Day

EXTENSION OF REMARKS
OF

HON. DOMINICK V. DANIELS

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 26, 1960

Mr. DANIELS. Mr. Speaker, last Sunday afternoon, April 24, 1960, I had the privilege of reviewing the Americanization Day parade and of participating in the speaking program sponsored by Captain Clinton E. Fisk Post, No. 132, Veterans of Foreign Wars of the United States, at Jersey City, N.J., in my congressional district, and I was much impressed by the address made to the gathering by my distinguished colleague, Congressman JAMES E. VAN ZANDT, of Pennsylvania.

Under unanimous consent I include in the CONGRESSIONAL RECORD the speech of Congressman VAN ZANDT, as I believe my colleagues will find it most inspirational:

ADDRESS BY CONGRESSMAN JAMES E. VAN ZANDT, OF PENNSYLVANIA, AT AMERICANIZATION DAY PROGRAM SPONSORED BY POST NO. 132, VETERANS OF FOREIGN WARS OF THE UNITED STATES, JERSEY CITY, N.J., APRIL 24, 1960

I am greatly honored to have the privilege of representing here today Commander in Chief Louis G. Feldmann, of the Veterans of Foreign Wars of the United States, who is on a world tour as part of our Government's people-to-people program designed to spread international good will. Not alone do I want to bring you greetings from Commander in Chief Feldmann, but also I wish to express his regret in being unable to take part in this program in person.

In asking me to participate in the 29th annual Americanization Day program in his behalf, Commander Feldmann has made it possible for me to recall with much pleasure my appearance here in the early 1930's when it was my honor to serve the Veterans of Foreign Wars of the United States as commander in chief. By going back to the early 1930's one recognizes that this Americanization Day program at that time was in its infancy for it was only 3 years of age. Back in those days the Communists had taken over May 1 and were staging annual May Day demonstrations in such prominent places as Journal Square here in Jersey City, Union Square in New York City, Rayburn Plaza in Philadelphia, the Commons in Boston, Pershing Square in Los Angeles, and the Plaza in San Francisco. As a matter of fact throughout the Nation communities large and small were confronted with similar Communist demonstrations on May 1.

Speaking frankly, the Reds had the gall of an army mule as they exhibited their ideology by parades and demonstrations. As many of you know, the centers of American towns and cities known as citadels of patriotism were converted on Red May Day into forums of un-American demonstrations.

Typical of America's war veterans and especially the members of the Veterans of Foreign Wars, the Capt. Clinton E. Fisk Post No. 132, of Jersey City, decided to challenge the Communists through a counter demonstration in which they portrayed the ideals of the American way of life. Thus 29 years ago or in 1931 here in Jersey City this Americanization Day program was conceived by a group of patriotic red-blooded Americans. The members of the Captain Clinton E. Fisk Post No. 132 of the Veterans of Foreign Wars are to be commended for accepting the Red challenge 29 years ago and for observing this program in each succeeding year. In fact, these annual programs were not only the forerunners of other communities accepting the Red challenge but served as the inspiration for the Veterans of Foreign Wars nationwide observance of Loyalty Day, May 1. Therefore, I am happy to be back again in Pershing Field in the Garden State of America to assist the membership of Post No. 132 and the citizens of Jersey City in the great effort to focus attention on the ideals that are part and parcel of our American way of life.

Each year my legislative duties, my travels, my discussions with Veterans of Foreign Wars' members, and my attendance at numerous Veterans of Foreign Wars' meetings and conventions, make me more cognizant of the value of the Veterans of Foreign Wars to all America. I need not tell you the VFW is very important to me. My service as your commander in chief brought me great insight and blessed me with lasting associations. Legislation, rehabilitation, youth activities, increased membership, publication of the VFW magazine—to name a few—are of special interest to over a million veterans who are members of our organization. However, one vital phase of our program always impresses me as the "rock" upon which all else is built. That "rock" is Americanism.

The VFW is known and admired for the valor of its members in times of war. But in times of peace the VFW has pioneered in public service performed through patriotic leadership and civic activities. These activities reflect many facets of our American way of life. They deal with the individual and his ideals and his general well-being. Recently a past commander in chief had this to say—and I quote: "Americanism and community service is a double title but actually they mean just one thing—practical application of the VFW charter pledge to foster true patriotism, preserve and defend the United States from all her enemies and to maintain and extend the institutions of American freedom." In this connection, the membership of VFW Post No. 132, Jersey City, has actively supported the brand of

patriotism I have just quoted. In fact, the pattern of existence you have followed had its roots in history which dates back to the days when New Jersey was one of the leaders among the Thirteen Colonies which resisted the stamp duties and taxation imposed by the British Parliament.

New Jersey's representatives were active in the sessions of the Continental Congress which led up to the Revolutionary War. This province was a battleground for several of the most important battles of the War for Independence and carried its full share of the burdens of the war.

Some may ask why do I refer to the bloody and ancient days of the American Revolution? In addition they may ask, "Isn't the membership of the Veterans of Foreign Wars the outcome of more recent and modern conflicts and isn't it our purpose to help bring some semblance of peace and security to our time?" We of the VFW can respond to those questions very quickly. We are constantly endeavoring to renew our faith in American ideals. We can appropriately turn to the old quotation which tells us that a man who has no regard for the past, has no concern for the future. We place a high priority on patriotism, Americanism, and the challenges facing all groups of citizens.

However, let us go one or two steps further with this theme. We know that no simple education in American history or in civics alone can defend an individual against anti-American ideals. In other words, no simple education in American history or in civics can defend an individual against the wiles of communism. Simply knowing how this country was developed and the dates the battles were fought, and that the Supreme Court and Congress and the President have different functions which check on each other, is not going to defend anybody. But knowing the whys behind our American institutions, knowing the meaningful version of American economic and political history—which must be taught primarily in schools—these things can first defend the individual and then defend the whole Nation.

A graphic illustration of what I am attempting to say is contained in the situation of the small boy who thinks everyone in the United States acquires a refrigerator, a washing machine, or a car simply by the process of living in the United States. What the small boy does not know is that the refrigerator, the washing machine, and the car must be paid for one way or another, either ready cash or the long process of a payment thereon for the next 36 months. But a lot of small children do not know that. They do not understand it at all. They think the whole system is a reflection of a new philosophy which says, "Get anything you want, get it right away, deny yourself nothing, discipline yourself not at all. Enjoy our wonderful materialistic comforts and rest secure; our country must be invulnerable because we have the best things."

I can summarize this philosophy by quoting a man who has had some thoughts about the subject. Gen. Lemuel C. Shepherd, Jr., who was the Commandant of the Marine Corps at the time of the Korean war, made a comment which referred especially to Communist-captured Americans who were grilled unmercifully during captivity. General Shepherd said this: "In the struggle against communism, war is no longer over when men are forced to give up. The prisoner-of-war camp is only another kind of battlefield. For they must be taught years before to carry on with the only weapons remaining to them; namely, courage and faith, and a sense of personal responsibility."

Ladies and gentlemen, the need to further the cause of our Republic will not be solved by magic formula. The best approach lies in an awakening of the consciousness of the Nation and of the individual—and that means you and me. Frankly, there is a definite need for a sense of conviction and dedication to our principles which exceeds that shown our enemy.

As some of you know, I returned from a tour of Russia's atom-research centers in the latter part of 1957. That will soon be 3 years ago, but the views that I reiterated upon my return continue to be basic and vital to the prestige of the United States. Make no mistake about it, we must face up to Russia and recognize her ability to initiate and conduct worldwide propaganda.

During my visit to Moscow there was constant boasting about the Russian satellite, Sputnik I, which has been successfully launched October 4, 1957. The Soviets hammered at the point that the satellite was produced and launched by a Communist form of government. Furthermore, they asserted it was positive proof that Russia as a form of government excelled the United States. Mark you, Soviet science did not in 1957—and does not in 1960—operate on a 40-hour week. They work around the clock.

Ladies and gentlemen, our present concern with communism results primarily from the aggressive policies of the Soviet Union in the years since the close of World War II. The cold war between two giant powers, the United States and Russia, to control the future of the world creates a moral issue. As long as Americans are loyal, vigilant, and devoted, there is less danger of communism from within. We as a people must be willing to accept the responsibilities of leadership. In the cold war there is no quick or easy solution. Our loyalty demands that the United States should act positively to meet any Communist aggression; we must exploit Communist weaknesses; we must build relations of mutual respect with the rest of the world. Neither should we underestimate the resources of any potential enemy. Neither should we, my friends, underestimate the power of our loyalty to the United States. God forbid that we should ever underestimate the harvest we can reap—for the good of all mankind—if we reglect to practice loyalty ourselves, or teach it to the younger generation.

Ladies and gentlemen, our heritage of liberty and freedom has made Americans truly free. Therefore, let us resolve that as Americans we accept the challenge of communism by dedicating ourselves to that type of patriotism which has established for all Americans a Nation of free men and women.

SENATE

WEDNESDAY, APRIL 27, 1960

The Senate met at 12 o'clock meridian, and was called to order by the Vice President.

Rabbi David H. Panitz, of Temple Emanuel, Paterson, N.J., offered the following prayer:

Almighty and Eternal God, we convene again in this august Chamber with an awareness of Thy presence and with a firm resolve to make ourselves instruments for the fulfillment of Thy will. We know that our purpose on earth is only achieved by obedience to Thy message and by the acknowledgment of Thy sovereignty in all spheres of life. The mantle of leadership imposes inexorable responsibilities to deliberate and act with broad vision, with a love for all mankind, and with a sensitive devotion to the loftiest horizons of American democracy. We pray for the inner strength that will enable Thy servants to quest fearlessly for truth, to fashion the future with optimism, and to perform decisive deeds for the peace of our Nation and the world. May we be worthy of Thy continued blessings, O Master of all creation, as we manifest the wisdom and courage to make ourselves and our country exemplars of righteousness in the sight of all peoples, and as we mold ourselves and these United States into a potent force for moral rectitude in the sight of all the nations.

May we never shirk opportunities to unite all our citizenry into a bond of true brotherhood, nor eschew the prudent occasions and methods to draw together the hearts of all Thy children who inhabit this globe. May we never hesitate to defend the dignity of man and the sanctity of life for all who have been created in Thine image. May we learn to share with others the gifts of the earth and of human insight with which we have been abundantly endowed. May we ever find in service to exalted ideals the protection of our Nation's interests and the achievement of amity among the sons of men.

By our deeds of uprightness, compassion, and faith, we pray for Thy providential blessing: May the Lord bless you and protect you; may the Lord cause His countenance to shine upon you and may He be gracious unto you; may He lift up His face unto you and grant you peace. Amen.

THE JOURNAL

On request of Mr. JOHNSON of Texas, and by unanimous consent, the reading of the Journal of the proceedings of Monday, April 25, 1960, was dispensed with.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Miller, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The VICE PRESIDENT laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

MESSAGE FROM THE HOUSE— ENROLLED BILL SIGNED

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the Speaker had affixed his signature to the enrolled bill (S. 1751) to place in trust status certain lands on the Wind River Indian Reservation in Wyoming, and it was signed by the President pro tempore.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. JOHNSON of Texas. Mr. President, under the rule, there will be the usual morning hour, and I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The VICE PRESIDENT. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

On request of Mr. DIRKSEN, and by unanimous consent, the Monopoly and Antitrust Subcommittee of the Committee on the Judiciary was authorized to meet during the session of the Senate today.

On request of Mr. MANSFIELD, and by unanimous consent, the Committee on Finance was authorized to meet during the session of the Senate today.

EXECUTIVE COMMUNICATIONS, ETC.

The VICE PRESIDENT laid before the Senate the following letters, which were referred as indicated:

AMENDMENT OF AGRICULTURAL TRADE DEVELOPMENT AND ASSISTANCE ACT OF 1954

A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the Agricultural Trade Development and Assistance Act of 1954 (with accompanying papers); to the Committee on Agriculture and Forestry.

REPORT ON AGREEMENTS CONCLUDED UNDER AGRICULTURAL TRADE DEVELOPMENT AND ASSISTANCE ACT OF 1954

A letter from the Administrator, Foreign Agricultural Service, Department of Agriculture, reporting, pursuant to law, on agreements concluded during March 1960 under title I of the Agricultural Trade Development and Assistance Act of 1954, with the Governments of India, Finland, and United Arab Republic (Egypt) (with accompanying papers); to the Committee on Agriculture and Forestry.

REPORT ON MILITARY PROCUREMENT ACTIONS FOR EXPERIMENTAL, DEVELOPMENTAL, OR RESEARCH WORK NEGOTIATED IN THE INTEREST OF NATIONAL DEFENSE OR INDUSTRIAL MOBILIZATION

A letter from the Acting Assistant Secretary of Defense (Supply and Logistics), transmitting, pursuant to law, a report on military procurement actions for experimental, developmental, or research work negotiated in the interest of national defense or industrial mobilization, for the period July-December 1959 (with an accompanying report); to the Committee on Armed Services.

REPORT ON NUMBER OF OFFICERS ASSIGNED TO PERMANENT DUTY AT THE SEAT OF GOVERNMENT

A letter from the Deputy Director, Legislative Liaison, Department of the Air Force, Washington, D.C., reporting, pursuant to law, that, as of March 31, 1960, there was an aggregate of 2,462 officers assigned or detailed to permanent duty in the executive element of the Air Force at the seat of government; to the Committee on Armed Services.

REPEAL OF ACT RELATING TO CONVEYANCE OF CERTAIN LAND BY THE UNITED STATES TO STATE OF WISCONSIN

A letter from the Administrator, General Services Administration, Washington, D.C., transmitting a draft of proposed legislation to repeal the act of May 29, 1958, which authorized and directed the Administrator of General Services to provide for the release of restrictions and reservations contained in an instrument conveying certain land by the United States to the State of Wisconsin (with an accompanying paper); to the Committee on Armed Services.

REPORT ON MILITARY PRIME CONTRACTS WITH BUSINESS FIRMS IN THE UNITED STATES FOR EXPERIMENTAL, DEVELOPMENTAL, AND RESEARCH WORK

A letter from the Acting Assistant Secretary of Defense (Supply and Logistics), transmitting, pursuant to law, a report on military prime contracts with business firms in the United States for experimental, developmental, and research work, during the month of February 1960 (with an accompanying report); to the Committee on Banking and Currency.

AMENDMENT OF SECTION 7 OF ADMINISTRATIVE EXPENSES ACT OF 1946, RELATING TO TRAVEL COST FOR CERTAIN PERSONS

A letter from the Chairman, United States Civil Service Commission, transmitting a draft of proposed legislation to amend section 7 of the Administrative Expenses Act of 1946, as amended, to provide for the payment of travel and transportation cost for persons selected for appointment to certain positions in the United States, and for other purposes (with accompanying papers); to the Committee on Government Operations.

REPORT ON REVIEW OF POLICIES AND PRACTICES REGARDING UNEMPLOYMENT COMPENSATION PAYMENTS TO RETIRED FEDERAL EMPLOYEES

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the review of policies and practices regarding unemployment compensation payments to retired Federal employees, Department of Labor, June 1959 (with an accompanying report); to the Committee on Government Operations.

REPORT ON REVIEW OF SELECTED ACTIVITIES OF THE GOVERNMENT OF AMERICAN SAMOA

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the review of selected activities of the Government of American Samoa, Office of Territories, Department of the Interior, dated April 1960 (with an accompanying report); to the Committee on Government Operations.

REPORT ON REVIEW OF SELECTED COMMERCIAL AIR SHIPMENTS OF HOUSEHOLD GOODS OF MILITARY PERSONNEL

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the review of selected commercial air shipments of household goods of military personnel, dated April 1960 (with an accompanying report); to the Committee on Government Operations.

AUDIT REPORT ON GENERAL SERVICES ADMINISTRATION CONTRACT WITH NATIONAL LEAD CO.

A letter from the Comptroller General of the United States, transmitting, pursuant to law, an audit report on General Services Administration contract DMP-131, with National Lead Co., New York, N.Y., dated April 1960 (with an accompanying report); to the Committee on Government Operations.

AUDIT REPORT ON THEODORE ROOSEVELT CENTENNIAL COMMISSION

A letter from the Comptroller General of the United States, transmitting, pursuant to law, an audit report on the Theodore Roosevelt Centennial Commission, dated February 1960 (with an accompanying report); to the Committee on Government Operations.

AMENDMENT OF SECTION 2455 OF REVISED STATUTES

A letter from the Secretary of the Interior, transmitting a draft of proposed legislation to amend section 2455 of the Revised Statutes (with an accompanying paper); to the Committee on Interior and Insular Affairs.

LAWS ENACTED BY LEGISLATURE OF VIRGIN ISLANDS

A letter from the Assistant Secretary of the Interior, transmitting, pursuant to law, copies of laws enacted by the Legislature of the Virgin Islands in its 1958 regular and special sessions (with accompanying papers); to the Committee on Interior and Insular Affairs.

REPORT ON PROVISION OF WAR-RISK INSURANCE AND CERTAIN MARINE AND LIABILITY INSURANCE

A letter from the Secretary of Commerce, transmitting, pursuant to law, a report on the provision of war-risk insurance and certain marine and liability insurance for the American public, as of March 31, 1960 (with an accompanying report); to the Committee on Interstate and Foreign Commerce.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented and referred as indicated:

By the VICE PRESIDENT:

A resolution signed by E. E. Hagan, and sundry other citizens of Natchez, Miss., favoring the enactment of legislation to regulate organized labor; to the Committee on the Judiciary.

The petition of Corda C. Cox, of Springfield, Mo., praying for a redress of grievances; to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. FULBRIGHT, from the Committee on Foreign Relations, without amendment:

S. 3072. A bill to authorize the Secretary of the Treasury to effect the payment of certain claims against the United States (Rept. No. 1294).

By Mr. CLARK, from the Committee on Post Office and Civil Service, with an amendment:

H.R. 8289. An act to accelerate the commencing date of civil service retirement annuities, and for other purposes (Rept. No. 1295).

By Mr. HENNINGS, from the Committee on Rules and Administration, without amendment:

S. Con. Res. 92. Concurrent resolution creating a Joint Committee on Arrangements for the inauguration of the President-elect and the Vice President-elect on January 20, 1961.

REPORT ENTITLED "SMALL BUSINESS INVESTMENT ACT—1960" (S. REPT. NO. 1293)

Mr. WILLIAMS of New Jersey. Mr. President, at the request of the junior Senator from Alabama [Mr. SPARKMAN], chairman of the Senate Small Business Committee, and on his behalf, I submit to the Senate a committee report entitled "Small Business Investment Act—1960," and ask that it be printed.

I wish to add that this report contains findings and recommendations of the committee for improving the effectiveness of the Small Business Investment Act of 1958. The Senator from Alabama, and others of us on the committee, expect to introduce legislation in the near future to carry out the committee's aims.

I am also happy to say that this report is a unanimous one—enjoying the support of all the committee members.

The VICE PRESIDENT. The report will be received and printed.

JOINT COMMITTEE ON ARRANGEMENTS FOR INAUGURATION OF PRESIDENT-ELECT AND VICE-PRESIDENT-ELECT ON JANUARY 20, 1961

Mr. HAYDEN. Mr. President, earlier today, Senate Concurrent Resolution 92, which I submitted, and which creates a Joint Committee on Arrangements for the inauguration of the President-elect and the Vice President-elect on January 20, 1961, has been reported from the Committee on Rules and Administration.

It is important that this concurrent resolution be adopted. It has been delayed. Therefore, I ask unanimous consent that the Senate proceed to the immediate consideration of the concurrent resolution.

The VICE PRESIDENT. The resolution will be stated for the information of the Senate.

The LEGISLATIVE CLERK. A concurrent resolution (S. Con. Res. 92) creating a Joint Committee on Arrangements for the inauguration of the President-elect and the Vice-President-elect on January 20, 1961.

The VICE PRESIDENT. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the concurrent resolution (S. Con. Res. 92) was considered and agreed to, as follows:

Resolved by the Senate (the House of Representatives concurring), That a joint committee consisting of three Senators and three Representatives, to be appointed by the President of the Senate and the Speaker of the House of Representatives, respectively, is authorized to make the necessary arrangements for the inauguration of the President-elect and Vice-President-elect of the United States on the 20th day of January 1961.

EXECUTIVE REPORTS OF COMMITTEES

As in executive session,

The following favorable reports were submitted:

By Mr. FULBRIGHT, from the Committee on Foreign Relations:

Executive J, 86th Congress, 1st session, a Convention on the Territorial Sea and the Contiguous Zone, dated at Geneva April 29, 1958, and signed on behalf of the United States of America on September 15, 1958 (Ex. Rept. No. 5);

Executive K, 86th Congress, 1st session, a Convention on the High Seas, dated at Geneva April 29, 1958, and signed on behalf of the United States of America on September 15, 1958 (Ex. Rept. No. 5);

Executive L, 86th Congress, 1st session, an Agreement entitled "Convention on Fishing and Conservation of the Living Resources of the High Seas," adopted by the United Nations Conference on the Law of the Sea at Geneva on April 29, 1958 (Ex. Rept. No. 5);

Executive M, 86th Congress, 1st session, a Convention on the Continental Shelf, dated at Geneva April 29, 1958, and signed on behalf of the United States of America on September 15, 1958 (Ex. Rept. No. 5); and

Executive N, 86th Congress, 1st session, an Optional Protocol of Signature Concerning the Compulsory Settlement of Disputes, dated at Geneva April 29, 1958, and signed on behalf of the United States of America on September 15, 1958 (Ex. Rept. No. 5).

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. MOSS:

S. 3426. A bill for the relief of Mr. and Mrs. Don Lund; to the Committee on the Judiciary.

By Mr. PROUTY:

S. 3427. A bill to amend the Federal Employees' Compensation Act, as amended, to make benefits more realistic in terms of present wage rates, and for other purposes; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. PROUTY when he introduced the above bill, which appear under a separate heading.)

By Mr. MUNDT:

S. 3428. A bill for the relief of Wilhelmina Sophia DeBruyne; to the Committee on the Judiciary.

By Mr. MAGNUSON (by request):

S. 3429. A bill to amend section 216(b) of the Merchant Marine Act, 1936, as amended, to permit the appointment of U.S. nationals to the Merchant Marine Academy; to the Committee on Interstate and Foreign Commerce.

(See the remarks of Mr. MAGNUSON when he introduced the above bill, which appear under a separate heading.)

By Mr. KERR:

S. 3430. A bill to amend the Internal Revenue Act of 1954; to the Committee on Finance.

S. 3431. A bill to authorize the modification for future water supply purposes of the project for flood control in the Red-Ouachita River Basin; to the Committee on Public Works.

By Mr. WILLIAMS of New Jersey:

S. 3432. A bill for the relief of Salvatore Briganti; to the Committee on the Judiciary.

By Mr. BIBLE (for himself, Mr. CANNON, Mr. HAYDEN, and Mr. GOLDWATER):

S. 3433. A bill giving the consent of Congress to a compact between the State of Arizona and the State of Nevada establishing a boundary between those States; to the Committee on the Judiciary.

By Mr. BARTLETT (for himself and Mr. GRUENING):

S. 3434. A bill to facilitate the selection by Alaska pursuant to the act of July 7, 1958, of certain public lands under outstanding mineral lease or permit; to the Committee on Interior and Insular Affairs.

By Mr. BENNETT:

S. 3435. A bill to clarify the rights of States to select certain public lands subject to any outstanding mineral lease or permit; to the Committee on Interior and Insular Affairs.

AMENDMENT OF FEDERAL EMPLOYEES' COMPENSATION ACT

Mr. PROUTY. Mr. President, I introduce, for appropriate reference, a bill to amend the Federal Employees' Compensation Act, as amended, to make benefits more realistic in terms of present wage rates and for other purposes.

The primary aim of the bill is to increase the benefits afforded by existing law to employees of the Federal Government, other than military personnel, who are injured in the performance of their duties and the dependents of those who died as a result of such injuries.

I ask unanimous consent to have printed in the RECORD an explanation of the bill and a section by section summary discussion of its provisions.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the explanation of the bill and section by section summary discussion will be printed in the RECORD.

The bill (S. 3427) to amend the Federal Employees' Compensation Act, as amended, to make benefits more realistic in terms of present wage rates, and for other purposes, introduced by Mr. PROUTY, was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

The explanatory statement presented by Mr. PROUTY is as follows:

EXPLANATION OF A BILL TO AMEND THE FEDERAL EMPLOYEES' COMPENSATION ACT AS AMENDED

Under the Federal Employees' Compensation Act the amount of compensation paid for disability and death is computed on the basis of the monthly pay received by an injured employee at the time of injury. As a result, compensation payments to beneficiaries on account of injuries sustained in prior years fail to reflect the sharp rise in pay and living costs in recent years and are substantially less than benefits paid on present wage levels. Approximately 50 percent of the 8,200 cases of permanent or long-continuing disability and more than 76 percent of the 5,000 death cases in which benefits are presently being paid occurred prior to 1951. In nearly 16 percent of these cases the injury occurred prior to World War II and in 26 percent of these cases the injury occurred during the war years 1941–45.

To deal equitably with employees and their dependents whose wage base (i.e., the monthly pay at the time of injury), is geared to an old rate of pay, it is necessary to provide specifically for them. The amendments to the Federal Employees Compensation Act enacted in 1949 dealt with this problem by increasing the wage base by 40 percent, if the injury occurred before January 1, 1941, or by 10 percent if the injury occurred on or after that date but before July 1, 1946. However, the substantial increase in rates of pay since 1946 and the rise in living costs since that time make a further increase in the wage base necessary to provide equitable treatment for employees injured in prior years and their dependents. To provide for such employees and their dependents this bill would increase by 10 percent the wage base used to compute the amount of compensation for disability or death if the injury for which compensation is payable occurred before January 1, 1958.

The bill would also increase the minimum amount of compensation for total disability from $112.50 to $150 per month except in cases where the monthly pay of the injured employee is less than $150, in which event—as under the act at the present time—the compensation for total disability would be equal to the full monthly pay of the injured employee.

In addition, the bill would increase (1) the minimum wage base to be used in determining the amount of compensation to be paid in death cases from $150 to $200, (2) the amount available for burial expenses to the beneficiaries of an employee whose death resulted from an injury sustained in the performance of his duties, (3) the maximum amount allowable for the services of an attendant in those cases where the employee is so helpless as to require such con-

stant service, and (4) the maximum allowance payable for the maintenance of an employee who is undergoing rehabilitation pursuant to the direction of the Bureau of Employees' Compensation.

The bill would also increase the benefits being paid in approximately 1,100 fatal and 200 total disability cases which arose out of various Federal emergency relief programs in operation between 1934 and 1942. The benefits presently being paid in these cases, which are governed by the provisions of the act of February 15, 1934, are pitifully small. The beneficiaries in the fatal cases, who are almost exclusively widows, most of whom are well advanced in years, now receive on an average of $30 per month, and the compensation rate in many of the total disability cases is less than $100 per month. This bill would authorize a minimum compensation rate of $100 per month for the total disability cases and compensation at the rate of $52.50 per month for widows.

The bill contains a number of technical amendments and refinements to facilitate and make more equitable the administration of the act. Principal among these are amendments: (1) authorizing payment of compensation for scheduled disability in addition to benefits under the Civil Service Retirement Act, (2) requiring election of benefits in any case where the claimant for compensation also is eligible to receive certain payments or benefits from the United States for the same disability or death, (3) authorizing medical care to those employees who after sustaining compensable injuries are required to make an election and elect to receive their retirement annuity, (4) providing an additional method for computing the amount of compensation in certain cases of disability and recurring disability, (5) extending the time period for giving notice of injury and filing claim for compensation in cases of latent disability and, (6) assuring Government employees required to appear as parties or witnesses in the prosecution of third-party cases that they will be treated as in active duty status while so engaged.

The bill also includes a proposal designed to further the promotion of safety in the various Federal agencies and establishments by requiring all Federal agencies to include in their annual budget estimates a request for funds to repay the Employees' Compensation Fund for the costs of benefits paid during the preceding fiscal year on account of the injury or death of employees under the jurisdiction of each such agency.

A summary discussion of the bill by title and section follows:

Section 1 of the bill provides a short title for the legislation, the "Federal Employees' Compensation Act Amendments of 1960."

Section 101: This section amends (1) section 6(b)(1) of the Federal Employees' Compensation Act to increase the maximum allowance for the service of an attendant from $75 to $125 per month, (2) section 6(b)(2) of the act to increase from $50 to $100 per month the maximum allowance payable for the maintenance of a disabled employee undergoing vocational rehabilitation at the direction of the Bureau, and (3) section 6(c) of the act to increase the minimum amount of compensation in cases of total disability from $112.50 to $150.

There are few cases in which an injured person is so helpless as to require the constant service of an attendant. However, where this need does exist, the present allowance of $75 is wholly inadequate.

The existing maximum allowance payable for the maintenance of a disabled employee undergoing vocational rehabilitation at the direction of the Bureau is inadequate. The proposed new maximum is approximately the same as the maintenance allowance authorized under the Longshoremen's and Harbor Workers' Compensation Act.

The increase in the minimum compensation rate for cases of total disability is applicable, as are the other amendments to the Federal Employees' Compensation Act contained in this section, to cases already on the rolls as well as prospectively. The effect of this provision will be to assure a minimum compensation rate of $150 in total disability cases in which the monthly pay of the injured employee (including adjustments in the monthly pay in old cases made by this act and the Federal Employees' Compensation Act Amendments of 1949) is equal to at least $150. If the monthly pay of the totally disabled employee is less than $150, the rate of compensation, as under the act at present, will be equal to his full monthly pay.

Section 102: This section will increase the minimum wage base to be used in determining the amount of compensation to be paid in death cases from $150 to $200.

Section 103: This section increases the maximum allowance for burial expenses from $400 to $800. The present maximum allowance for burial expenses is wholly inadequate and in many cases the family of the deceased employee is required to bear the expense of a major part of the cost of a modest burial.

Section 104: This section increases by 10 percent the monthly pay upon the basis of which compensation for disability or death is computed under the Federal Employee's Compensation Act, as amended, for every employee as defined in section 40(b)(1) or (2) of the Federal Employees' Compensation Act, as amended, if such employee's injury (or injury causing death) occurred before January 1, 1958. The section explicitly provides that nothing in this or any other act of Congress shall be construed to make the increase in the monthly pay provided by this section applicable to military personnel, or any person or employee not within the definition of section 40(b) (1) or (2) of the Federal Employees' Compensation Act. The section also explicitly provides that the increase in the monthly pay authorized is applicable only with respect to any period beginning on or after the first date of the first calendar month following the enactment of this act and shall not be construed to permit the amount of compensation paid on account of an employee's disability or death to be increased more than 10 percent.

The increase in the wage base authorized by this section will be applied to all cases on the rolls to which this section is applicable before the increase in the minimum wage base for computing death benefits authorized by section 102 of this act and the increase in the minimum compensation rate in total disability cases authorized by section 101 of this act is applied.

Section 105: This section will increase the benefits now being paid under the provisions of the act of February 15, 1934, in approximately 1,100 fatal and 200 total disability cases which arose out of various Federal emergency relief programs in operation between 1934 and 1942.

The increase in benefits would be accomplished by raising the monthly pay on the basis of which compensation for disability or death is computed in these cases from $75 to $150. This will result in a minimum compensation rate of $100 per month for the permanent total disability cases, the great majority of which presently receive considerably less than that amount, and compensation at the rate of $52.50 for the widows in death cases who presently received an average of $30 per month.

TITLE II. TECHNICAL AMENDMENTS

Section 201: This section amends section 7 of the Federal Employees' Compensation Act to permit the payment of compensation for scheduled permanent disability specified in subsection 5(a) of the act in addition to benefits under the Civil Service Retirement Act. At present such compensation and benefits under the Civil Service Retirement Act may not be paid for the same period of time.

At present an employee who suffers an injury which entitles him to a scheduled award may receive the compensation provided by the Federal Employees' Compensation Act for that injury although he returns to full-time duty without any loss in pay. It is inequitable to force an employee who is eligible to and elects to retire after sustaining such an injury to forego the compensation provided by the Federal Employees' Compensation Act for the schedule loss.

In addition, this section amends the Federal Employees' Compensation Act to require an election of benefits in any case in which a claimant for compensation is eligible to receive any payment for benefits from the United States by reason of the same disability or death. A small number of cases have occurred in which the Bureau has found that the disability or death of an employee has resulted from an injury sustained in civilian employment by the United States and the Veterans' Administration has held that the same disability or death was caused by military service. As a result, the United States has paid compensation twice for the same disability or death. This amendment is intended to prevent payment of dual benefits in such cases in the future.

Section 202: This section amends the Federal Employees' Compensation Act to permit the furnishing of medical care under the act to an employee who after sustaining a compensable injury elects to receive a civil service retirement annuity for which he is eligible. The present prohibition against payment of compensation and retirement benefits for the same period of time precludes the furnishing of medical care in such cases unless the beneficiary elects to receive compensation benefits in lieu of the annuity for the period he is under medical care.

Section 203: This section would amend the Federal Employees' Compensation Act to make clear that the statutory period within which an employee is required to file a claim for compensation in cases of latent disability does not begin to run until the employee has a compensable disability and is aware, or by the exercise of reasonable diligence should have been aware, of the causal relationship of the compensable disability and his employment.

One of the major problems affecting the payment of compensation in cases of latent disability is the statutory requirement regarding the time within which the employee must file a claim for benefits. An employee may not know that he is suffering from a radiation disease, for example, for many years after the date of exposure. Even after he becomes aware of the existence of some such injury, it may be years before he becomes unable to continue his work, and under a disability for which he is entitled to receive compensation. Yet, his failure to file a claim may, because of the statutory requirements regarding the time within which a claim must be filed, defeat his right to compensation after the disability arises.

To protect employees in such cases, it is necessary that the statutory period after which a claim is barred not begin to run until the date the employee suffers disability and knew, or by the exercise of reasonable diligence should have known, of its existence and its causal relationship to his employment.

However, even when there is no disability upon which to base a claim for compensation, notice of the injury should be given by the employee as soon as he knows of its existence, so that the first opportunity to investigate the potential claim is not lost. For this reason, the statutory requirement

of notice of injury established by this section for cases of latent or undiscovered disability is not conditioned upon the existence of any disability. It applies as soon as the employee is aware or in the exercise of reasonable diligence should have been aware that his condition is causally related to his employment, regardless of whether or not there is a compensable disability.

Section 204: This section would make it a misdemeanor, punishable by a fine of not more than $500 or imprisonment for not more than 1 year, or both, for an officer or employee of the United States, charged with responsibility for making reports of injuries, to willfully fail or neglect to make such a report, or to induce an employee to forego filing a claim, or to willfully retain any notice required to be filed under the Federal Employees' Compensation Act.

Section 205: This section would insure that Government employees will be treated as in an active duty status when they must appear as parties or witnesses in third-party cases which the Government has required to be prosecuted by, and in the name of, an injured employee.

Existing law does not make clear the authority of a Government agency to carry an employee who is a party or witness to such a proceeding in an active duty status while he is attending court proceedings. Existing statutory provisions concerning the status of Government employees required to appear in legal proceedings deal only with those employees summoned to appear as a witness on behalf of the United States and the District of Columbia in actions to which the United States or the District is a party. By Executive order provision is made for court leave for certain Government employees who are absent from duty and in attendance in court as a witness in behalf of the United States or the Government of the District, or who are called for jury duty in any State court or court of the United States. Decisions of the Comptroller General have held that a Government employee required to appear in private litigation "may be regarded as in a duty and pay status during the period of his necessary absence * * * where the value of the witness testifying in private litigation arises from his official capacity and he is subpenaed solely because of and to testify in that capacity or to produce official records."

It appears that existing legislation and precedents are not helpful in third-party negligent cases since they are brought in the name of the injured employee and so are private litigation in which the Government employees appearing as parties and witnesses are not testifying as to matters arising from any official capacity.

In such third-party cases, therefore, Government employees have been charged with annual leave or placed on leave without pay, while so engaged. This situation has caused great resentment in employees obligated to appear as parties and witnesses in such lawsuits. Since the Government requires the action to be prosecuted in the name of the injured employee, although it is in many cases the principal beneficiary of the action, employees obligated to appear should not be required to do so on their own time and at their own expense.

Section 206: This section would establish as the wage base for injured employees whose disability for work begins more than 1 year after they were injured, the monthly pay, at the time they were disabled, of the same job, position, or employment in which they were engaged when injured. Similarly, disabled employees who resume regular full-time employment and suffer a recurrence of the disability after more than 1 year, would have as their wage base the monthly pay, at the time of the recurrence of their disability, of the same job, position, or employment in which they were engaged when they were injured.

Section 207: This section would require all Federal agencies to include in their annual budget estimates a request for funds to repay the employees' compensation fund for the cost of benefits paid during the preceding fiscal year on account of the injury or death of employees under the jurisdiction of each such agency. The Secretary of Labor would be required to furnish to each executive department and each agency or instrumentality of the United States having employees who are or may be entitled to compensation benefits under the Federal Employees' Compensation Act a statement showing the total cost of benefits and other payments made from the employees' compensation fund during the preceding fiscal year on account of the injury or death of employees or persons under the jurisdiction of the agency. The provision would make an additional charge against corporations and agencies subject to the Government Corporation Control Act for their fair share of the cost of administering the Federal Employees' Compensation Act.

This provision would bring to the attention of the heads of each agency the cost of compensation for injuries to employees under his jurisdiction and require him to justify such expenditure to the Bureau of the Budget and to Congress.

Section 208: This section provides for the dates upon which various provisions of the bill would become effective and is, in most part, self-explanatory.

The bill does not retroactively grant any benefits for any past periods of disability nor are death benefits retroactively increased. All changes in benefit payments would be made prospectively. Where increased benefits are provided cases already on the rolls, the new benefit provisions would apply to old cases only with respect to any period beginning on or after the first date of the first calendar month following the enactment of this act.

An exception is the provision contained in section 201 of this act permitting the payment of compensation for scheduled permanent disability in addition to benefits under the Civil Service Act. This provision is applicable to any injury which occurred within 3 years prior to the date of enactment of this act as well as prospectively. Similarly, the provision in section 201 of this act requiring an election of the benefits in any case in which a claimant for compensation is also eligible to receive certain payments or benefits from the United States for the same disability or death is applicable to any injury or death occurring before enactment of this act as well as prospectively, but shall not deprive any person of benefits in any case in which an award has been made.

APPOINTMENT OF U.S. NATIONALS TO MERCHANT MARINE ACADEMY

Mr. MAGNUSON. Mr. President, by request, I introduce, for appropriate reference, a bill to amend section 216(b) of the Merchant Marine Act, 1936, as amended, to permit the appointment of U.S. nationals to the Merchant Marine Academy. I ask unanimous consent that a letter from the Assistant Secretary of the Interior, requesting the proposed legislation, be printed in the RECORD.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the letter will be printed in the RECORD.

The bill (S. 3429) to amend section 216(b) of the Merchant Marine Act, 1936, as amended, to permit the appointment of U.S. nationals to the Merchant Marine Academy, introduced by Mr. MAGNUSON, by request, was received, read twice by its title, and referred to the Committee on Interstate and Foreign Commerce.

The letter presented by Mr. MAGNUSON is as follows:

U.S. DEPARTMENT OF THE INTERIOR,
Washington, D.C., April 15, 1960.

Hon. RICHARD M. NIXON,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed herewith is a draft of a proposed bill, "to amend section 216(b) of the Merchant Marine Act, 1936, as amended, to permit the appointment of U.S. nationals to the Merchant Marine Academy."

We suggest that this bill be referred to the appropriate committee for consideration, and we recommend that it be enacted.

By the act of February 20, 1958 (Public Law 85-331; 46 U.S.C., sec. 1126(b)(1)), a quota for appointments to the Merchant Marine Academy from American Samoa was established. However, the Maritime Administration has construed the Merchant Marine Act, 1936, to require appointees to the Merchant Marine Academy to be American citizens. Also, licensed officers of vessels documented under the laws of the United States are required to be American citizens.

The native population of American Samoa is composed almost entirely of persons who are nationals and who owe allegiance to the United States, but who are not citizens. Thus, it has been difficult to find qualified American Samoans who are eligible to accept appointment to the Merchant Marine Academy under Public Law 85-331.

The enclosed bill would serve merely to make training at the Academy available to those American Samoans who are now barred solely because of their status as nationals. Such appointees would, of course, have to meet the same standards of admission as are required of other cadets. The bill would preserve the existing bar against licensing of noncitizens as officers in the American Merchant Marine.

The sea is a vital element in the life of this island people. The schooling at the Academy of a few selected American Samoans would provide the territory with a small corps of professionally trained persons for local navigation, port administration, and the like.

There is precedent in existing law for the training of noncitizens (the act of August 9, 1946; 60 Stat. 961).

The Bureau of the Budget has advised that there is no objection to the submission of the proposed legislation to the Congress.

Sincerely yours,

ROGER ERNST,
Assistant Secretary of the Interior.

CLARIFICATION OF RIGHT OF STATES TO SELECT CERTAIN PUBLIC LANDS—AMENDMENT

Mr. MOSS. Mr. President, I submit, for appropriate reference, an amendment in the nature of a substitute to the bill—S. 2959—to clarify the right of States to select certain public lands subject to any outstanding mineral lease or permit, which I introduced on February 2, of this year. This amendment has been worked out with the director of the Utah State Land Board in conference with the Department of the Interior.

The VICE PRESIDENT. The amendment will be received and printed, and will be appropriately referred.

The amendment was referred to the Committee on Interior and Insular Affairs.

AMENDMENT AND EXTENSION OF SUGAR ACT OF 1948—AMENDMENT

Mr. GOLDWATER submitted an amendment, intended to be proposed by him, to the bill (S. 3210) to amend and extend the provisions of the Sugar Act of 1948, as amended, which was referred to the Committee on Finance, and ordered to be printed.

OFFICE OF INTERNATIONAL TRAVEL—ADDITIONAL COSPONSOR OF BILL

Mr. MAGNUSON. Mr. President, I ask unanimous consent that the distinguished junior Senator from Florida [Mr. SMATHERS] be made a cosponsor of the bill—S. 3102—to establish an Office of International Travel.

The VICE PRESIDENT. Without objection, it is so ordered.

ADMISSIONS AND CONFESSIONS IN CRIMINAL PROCEEDING—ADDITIONAL COSPONSORS OF BILL

Mr. ERVIN. Mr. President, on Monday the Senator from Virginia [Mr. BYRD], the Senator from Arkansas [Mr. MCCLELLAN], the Senator from South Carolina [Mr. JOHNSTON], and I introduced a bill, S. 3411, to rescind the artificial rule of evidence established by the Supreme Court in the McNabb and Mallory cases, and to restore to the Federal law of evidence the sound rule of evidence that when an accused voluntarily confesses he committed a crime his voluntary confession shall be admissible against him when he is tried for such crime.

Mr. President, I ask unanimous consent that the distinguished senior Senator from Maryland [Mr. BUTLER] and my colleague from North Carolina [Mr. JORDAN] be designated upon the RECORD as cosponsors of the bill.

The VICE PRESIDENT. Without objection, it is so ordered.

CHANGE OF REFERENCE

Mr. MURRAY. Mr. President, the bill—S. 3310—to amend the act entitled "An act to transfer the maintenance and operation of hospital and health facilities for Indians to the Public Health Service, and for other purposes," approved August 5, 1954, has been referred to the Committee on Interior and Insular Affairs. This measure has to do with problems involving medical care for our American Indians provided by the U.S. Public Health Service.

Inasmuch as the responsibility for providing health services to Indians has been transferred from the Department of the Interior to the Public Health Service, and since legislation affecting that agency is within the jurisdiction of the Senate Committee on Labor and Public Welfare, I ask unanimous consent that the Committee on Interior and Insular Affairs be discharged from the further consideration of Senate bill 3310, and that it be referred to the Committee on Labor and Public Welfare.

The Senators from Washington [Mr. MAGNUSON and Mr. JACKSON] are the cosponsors of the bill. Their offices advise me they have no objection to the referral of the proposed legislation.

The VICE PRESIDENT. Is there objection to the request of the Senator from Montana? The Chair hears none, and it is so ordered.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, April 27, 1960, he presented to the President of the United States the enrolled bill (S. 1751) to place in trust status certain lands on the Wind River Indian Reservation in Wyoming.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. RANDOLPH:

Speech by Hon. JOHN M. SLACK, JR., a Representative from West Virginia, and excerpts from other speeches delivered at first anniversary dinner of the mayor's commission on human relations, Charleston, W. Va., April 26, 1960.

By Mr. JACKSON:

Remarks by Senator RANDOLPH delivered at a dinner meeting of the mayor's commission on human relations, Charleston, W. Va., April 26, 1960.

By Mr. HENNINGS:

Press release by Senator HENNINGS entitled "The Needs of the Elderly," dated February 24, 1960; editorial comment on press release published in the Charleston Enterprise-Courier of Charleston, Mo., under date of February 25, 1960; reply to editorial by Senator HENNINGS under date of March 17, 1960; and letter by the editor of the Charleston Enterprise-Courier in reply to letter of Senator HENNINGS.

By Mr. MCNAMARA:

Testimony given by Representative FORAND before the Senate Subcommittee on Problems of the Aged and Aging.

By Mr. KENNEDY:

Article entitled "The Student Loyalty Oath," written by Senator MCCARTHY, published in the Commonweal of April 22, 1960.

INVEST-IN-AMERICA WEEK—THE NATION'S SIXTH ANNUAL CELEBRATION

Mr. WILEY. Mr. President, in the days and years ahead of us, our Nation faces a challenge, as never before, to its top-ranking position as the greatest productive country in the world. According to recent statistics, industrial growth in our most formidable competitor, the Soviet Union, is increasing at the approximate rate of from 9 to 10 percent per year, while that in the United States amounts to only about 4½ percent. And, although a recent economic analysis reports that our gross national product is over twice that of the U.S.S.R., Communist leaders have claimed that by 1965 the Socialist camp will produce over one-half of the total world industrial output. In addition, although I believe this to be greatly exaggerated, they have promised their people that by 1970 they will have the world's highest standard of living. Today, our free enterprise system, together with our political institutions, philosophy, indeed, our very way of life, is in a battle for survival with communism.

However, we feel confident that our American system of free enterprise will emerge triumphant in this battle of ideologies. In a more optimistic spirit of retrospect, we look back over the past decade and discover that the year 1959 marks the end of an era of remarkable economic progress in many free lands, and one in which America's form of democratic capitalism has played an increasingly important, worldwide role. For example, in the field of corporate investment, individual shareowners in publicly owned companies, since 1952, have increased by 6 million, to 12½ million, as of early last year. In the 1950's, share volume was greater than in any previous decade. Significantly, these shareowners in America's future represent a broad cross section of the public; and, during 1959 alone, they have received over $464 million in distributed income dividends.

Mr. President, we recognize that the voluntary accumulation of savings and the investment of those savings either by individuals or through financial institutions, form the heart of our free enterprise system. We know that it is only through savings that the growth and development of our economy can take place. And we know, too, that it is the increasing investment of these savings which makes us more productive, provides more jobs and paychecks, and raises the standard of living for all of our people. Whether we own a business or work in an office, a factory, in agriculture, or in a profession, investments, of one form or another, make possible our work, our homes, and the industries and utilities which serve us.

The current week—April 24 through 30—is being observed all over the United States as the sixth annual Invest-in-America Week. Celebrated this year in over 200 communities throughout the country, Invest-in-America Week is being supported on local and national levels by newspapers, trade and financial publications, radio, and television. Emphasizing the importance of thrift and savings to our Nation's continuing growth, its purposes and objectives are admirably summed up in the statement of belief, as prepared by the National Invest-in-America Committee, Inc., the parent group and headquarters, located in Philadelphia:

We believe as a basic principle that the American competitive enterprise system, which has provided all our people with the highest standards of living in the world, is based on continuing investment of savings in all forms.

We believe that investment of savings can provide: For the people—personal security and increased income for education, retirement and better living; for industry—plants, tools and jobs to provide better products for more people; and for Government—the means of production to keep America strong.

We believe that only through broad public understanding of those facts, as well as of factors that hamper or discourage savings, can the United States achieve these broad national economic goals: (1) Full employment

of its labor force; (2) vigorous but sustainable economic growth, accompanied by monetary stability; (3) stability of the general price level; (4) preservation of economic and political freedom.

We believe that these goals are vitally interdependent and must be pursued as a whole, if 56 million American families and their children are to be able to enjoy continued economic security, opportunities for better living and economic, religious and political freedom.

We believe that when the American people know and understand, as a result of educational efforts, the underlying factors that make possible vigorous economic growth and full employment opportunities for all who wish to work, they will be able to recognize financial and economic trends that are not to their best interest, thus enabling them to discharge their responsibilities as American citizens.

I have been particularly gratified that my own State of Wisconsin has been very active in past years' observances, and I have been pleased to learn that this year eight of our largest communities will take part—Milwaukee, Madison, Oshkosh, Janesville, Stevens Point, Fond du Lac, Sheboygan, and Grantsburg. Headed by Mr. Roth S. Schleck, the very able Wisconsin State chairman of Invest-in-America, and the vice president of the First Wisconsin National Bank in Milwaukee, some of the State's most distinguished individuals are helping to bring the Invest-in-America message to the public. Mr. Schleck reports in a recent letter that—

The importance of the Invest-in-America effort daily is gaining greater recognition and enthusiastic support in Wisconsin. We expect this year's observance of Invest-in-America Week to be the most extensive to date and that it will provide a springboard for year-round activities in various parts of the State.

In another letter, Mr. Schleck kindly informs me of the activities of the State committee, and lists the individuals who are heading the observance in Wisconsin communities.

The outstanding activities of Invest-in-America have been recognized in past years' observances by the President of the United States, in congratulatory messages to the national and local Invest-in-America Committees. This year, President Eisenhower, in a telegram to the distinguished chairman of 1960 Invest-in-America Week, Mr. Gardiner Symonds, stated:

It is a pleasure to join in the observance of National Invest-in-America Week. For the healthy economic growth of our Nation we put major reliance upon the thrift, foresight, and sound investment of individual citizens engaged in private enterprise. In the years ahead, a growing America will require even greater savings and investment by our people to provide needed capital, tools, jobs and defensive strength. We must use our present resources to insure our children's future through investment in homes, insurance and sound securities. Investment in America is an investment in the world's best hope for freedom, justice and broad economic progress.

DWIGHT D. EISENHOWER.

For the past several years, it has been my pleasure to be host at receptions and kickoff luncheons here at the Capitol—celebrating observances of Invest-in-America Week and honoring officers and members of the national and Metropolitan Washington area invest-in-America committees. At last year's luncheon in the Old Supreme Court Chamber, here at the Capitol, many of my colleagues in the Senate and House of Representatives were present, as well as leaders of the executive agencies of the Government, and local business and civic leaders. Initiating the fifth annual observance of national invest-in-American activities, its purpose was to dramatize the principles of this constructive program and to stimulate interest in year-round activities. Publicly joining in its endorsement were Mr. Norman Mason, Administrator of the Housing and Home Finance Agency; Mr. Wendell Barnes, Administrator of the Small Business Administration; and Mr. Andrew D. Orrick, Senior Commissioner of the Securities and Exchange Commission.

Mr. President, the invest-in-America program has ably demonstrated that it is a solid-growth enterprise. In slightly more than a decade, the organization—which originally was inspired by an editorial in the Investment Dealers' Digest, in 1949—has taken root, and has grown steadily to the point where over 200 communities in our United States, including the latest addition to our family of States—Hawaii, now participate in these activities. Recognizing that the encouragement of more people to invest their incomes and savings in American enterprise is fundamental to our economic progress, and believing that there is a need for even greater public awareness of this important fact, during the last session I introduced in the Senate a joint resolution which would authorize and request the President of the United States to proclaim the current week of April 24 through 30, 1960, as National Invest-in-America Week throughout the United States of America. As stated in a subsequent letter directed to my colleague, the distinguished chairman of the Subcommittee on Federal Charters, Holidays, and Celebrations, of the Senate Committee on the Judiciary, the Senator from Wyoming [Mr. O'MAHONEY], I believe that by the proclamation and observance of a National Invest-in-America Week, such as I have proposed, Americans can reaffirm their belief in the power of work, savings, and investments to create new business and better job opportunities for all our citizens.

Unfortunately, due to several unavoidable circumstances, including the extensive consideration of civil right matters, the subcommittee was unable to report Senate Joint Resolution 143 in sufficient time for this year's observance. However, I intend to reintroduce this meritorious measure during the next session of the Congress; and it is my sincere wish that my colleagues will join with me in obtaining its enactment. It requests the President to call upon Americans to observe such a week in recognition of the great endeavor in which the American people are now engaged to preserve their economic, religious, and political freedoms on the bloodless economic battlefield of competition in a free enterprise society.

I send to the desk several items. The first is a fine statement entitled "What Invest-in-America Means," prepared by the New York City Invest-in-America Committee. The second is an excellent report by Dr. J. Whitney Bunting, consultant for the higher educational relations of the General Electric Co., and governor of the National Invest-in-America Committee. The article is entitled "Your Share in America's Prosperity"; and it tells how our national strength is closely tied to the progress of business, industry, and government; and that they, in turn, are dependent upon the savings of our citizens. The third item is the previously mentioned, very fine letter from the Wisconsin State chairman of invest-in-America, Mr. Roth S. Schleck. His letter describes the preparations for this years' observance. I ask unanimous consent that these items be printed at this point in the RECORD.

There being no objection, the statement, report, and letter were ordered to be printed in the RECORD, as follows:

WHAT INVEST-IN-AMERICA MEANS

(A statement by the New York City Invest-in-America Committee)

Savings and investments are essential to a strong America because they provide—

Job security and higher standards of living for 56 million families.

Capital for the plants and tools necessary for an expanding economy.

Strength for a free government.

In the years ahead America will have to provide—

Seventeen billion dollars a year for a million new jobs a year. This is $17,000 in new capital investment for each job.

Forty billion dollars a year to maintain plants and machines to sustain the 70 million present jobs.

Where will this money come from?

From the collective savings and investments of millions of Americans.

From the retained earnings of corporations.

Therefore, every American owes it to himself to become an investor in America through savings of his own choice in Government securities, savings accounts, insurance, homes, and corporate stocks and bonds.

The strength of a growing America is in the personal freedom to work, save, and invest. Money at work means men at work.

Invest-in-America for security and income.

Money at work means men at work.

YOUR SHARE IN AMERICA'S PROSPERITY

YOU AND OUR NATION'S BUSINESS

Many people in this country fail to recognize their stake in the welfare and development of American business. In fact, there are many of our friends who may not recognize that they are really owners of capital and various types of business enterprise. Because this is true, this small booklet is designed to show you that you not only are a capitalist but that your interest and action is needed to keep our system strong.

The competitive enterprise system has strong roots in the United States. It has enabled this Nation to achieve a standard of living not equalled under any other economic order in the world today. However, like others it must be constantly nourished through the active participation of those who receive its benefits. Whether you are a person of great wealth or an income earner in modest circumstances, your interest is necessary. You will see, as you read this message, that many of our most active citizens are those with annual incomes of less

than $7,500. Let us examine your position in the business world and what it means to you.

OUR BUSINESS SYSTEM

Our business system often described as a "competitive enterprise" system. This means that the basic regulating force of our economic life is the needs and desires of the individual citizen unless they conflict in some way with the interest of the general public. Competitive enterprise has many real advantages to the people of America for it assures us of the right to obtain and hold property, live wherever we please, buy and sell what we choose, select our own means of earning a living, and many others.

Our only limitations under competitive enterprise are when our actions are against public policy (such as failure to respect the rights of others) and our own personal shortcomings that may limit our ability to perform certain tasks as well as other people. Moreover, through ingenuity and hard work, it is possible to rise from one social level to another—our history is filled with true stories of such progress. The important thing to remember is that although we are free to progress, we cannot advance without personal effort or enterprise.

Through competitive enterprise, the American worker lives better at less cost in labor than the citizens of all other nations. We often measure the costs of different products that we buy, not in terms of money, but in terms of work hours. In this way, we can compare the actual cost of buying a suit of clothes or a loaf of bread. It can be proved that a man's suit of clothes requires 24 hours of work to an average American workman, while the Russian worker must work for 376 hours to get enough income to buy the same product. In America it requires approximately half as much work time to earn a loaf of bread as it does in Russia. And so it goes for every product or service we need or use.

With only 7 percent of the world's population, Americans have 33 percent of the world's assets. In this respect, we can claim 53 percent of world's radios and televisions sets, 29 percent of world's railway mileage, 50 percent of world's highways, 57.5 percent of world's telephones, and 70 percent of world's automobiles.

Much of our success in production can be traced to our use of fine tools and efficient machines. These, of course, can only be acquired through the savings and investments of all Americans.

BENJAMIN FRANKLIN—PATRON OF SOUND SAVINGS

"A penny saved is a penny earned" is one of the best known statements of Benjamin Franklin, but even Franklin knew there was more to financial success than mere saving. He pursued a personal program of investing in business and country that made him an outstanding example for Americans of today. For example, another of his famous statements that is truly a valuable guidepost for all Americans today was "money begets money and its offspring begets more." The principle that money clearly can go to work for its owner was definitely established.

A practical example of what Benjamin Franklin meant when he said that "money begets money * * *" is well illustrated by one of his personal actions. Always proud of his early years spent in Boston, he left the sum of $5,000 to the city in 1791 with instructions that it be allowed to accumulate at interest for 100 years. His directions were followed and in 1891, 100 years later, the fund had grown to approximately $400,000. The idea was so sound that of this amount, $300,000 was reinvested in a second century fund, and today, only 69 years later, the fund is in excess of $1 million. This is real financial growth demonstrated in practical fashion.

Benjamin Franklin was neither the first nor the only great historical figure that believed in the value of saving and investing. From important men of early recorded history to the men and women of today, the successful have practiced both thrift and wise investment. Abraham Lincoln expressed his beliefs in this fashion: "The prudent, penniless beginner in the world labors for wages awhile, saves a surplus with which to buy land or tools for himself, and at length hires another new beginner to help him. This is the just and generous and prosperous system which opens the way to all—gives hope to all and consequent energy and progress and improvement of conditions to all."

And, in more recent days, Ralph J. Cordiner, chairman of the board of the General Electric Co., as he addressed the 1958 annual stockholders meeting said in part: "In a free economy, economic growth is paced and directed by the decisions of millions of businessmen, consumers, investors, employees—indeed by every citizen. The faith of the free society is that these millions of points of initiative will produce swifter progress, with greater liberty, than any system of centralized control.

"Thus, a business recession is really a test of the people of the United States and their form of society. Their decisions—to buy, to invest, to work more purposefully, to raise their levels of living—these decisions will determine the speed of economic advance. They will also decide whether Russia will, as she has announced, surpass us in the coming years."

WHAT ABOUT THIS WORD "CAPITALIST"?

Some people in other lands would have you believe that there is something wrong in being a capitalist. The Russians would say that capitalism is a bad system of doing business. However, this is untrue because all economic systems use capital. Capital in reality refers to the tools and machines that men use in production. In Russia, as in the United States, capital is used in large quantities in industrial production.

The main difference between the two ideas is who owns the capital? In Russia, all capital is owned by the Government and can legally be used only to produce those goods that the Government desires. In the United States, on the other hand, capital is owned by millions of free investors who can put this capital to work producing those goods that the public needs and wants. The desires of the people are expressed by their willingness to buy the finished goods at a fair price at the marketplace.

In America, almost everyone is a capitalist because he shares in the ownership of business and industry.

PEOPLE'S CAPITALISM

In order to better describe the economic system under which we live, the phrase "people's capitalism" has been developed. You will see it more and more in the newspapers, in advertising and as part of daily conversation. It denotes merely the type of capitalism that this Nation has found to be most successful for all concerned. This is a system where all citizens have a right and privilege to own a share in business and industry.

HOW YOU BECOME A CAPITALIST

In a competitive economic society such as ours, a person receives value or money for what he produces. A definite contribution of effort, or money, or time, or material must be made in order to receive a reward from society. When a man does not spend all of the money or income he has received for his services, he is said to have saved. In our society he has the right to hold this saving in any manner he desires or he can put it to work through investment. If he invests a wide variety of ways, or if he should use normal banking facilities for safekeeping, he becomes a capitalist, for by investing in something he owns something.

MONEY AT WORK MEANS MEN AT WORK

It is not a well-known fact that a heavy investment of capital is required in order to make a job. There are few employment opportunities in business and industry today where the employee can provide his own tools and equipment. As industry becomes larger and more complex, the problem of job-making becomes more costly and more difficult. Someone must invest so that industry can afford to employ the worker. Thus, when a saver invests his excess funds in a business, that money can be used to employ additional workers and make more jobs.

The chart adjoining shows the average need for capital funds for one worker in different industries in 1956. Costs today would be substantially higher because of the greater complexity of 1959 production. Unless the American people are willing to put their money to work, there will be insufficient job opportunities for the Nation's expanding population. It will then be difficult to have as many products and services to enjoy as are now available.

WHAT IS INVESTING?

Investing refers to putting your money to work. If you buy stock in a corporation, place your savings in a bank, take out life insurance, or buy real estate, your money is productive because it is used by business, industry, or Government to develop production of products or services.

INVESTMENT OPPORTUNITIES

There are many opportunities for safe and sound investments, and it is not necessary to have a great amount of money to begin. For example, the following opportunities for investment are available to you in the small amounts listed.

Savings account, $5 or less.
Postal savings, any amount.
U.S. savings bonds, $18.75.
Real estate, varying amounts.
Savings and loan associations, any amount.
Life insurance, any amount.
Stocks, $40 quarterly (through New York Stock Exchange program).

So, it is a question of the amount of money you have to invest as it is of the regularity with which you do it.

The ownership of corporate stock, for example, is no longer the privilege of the few. Men, women, and children, from every walk of life and from every section of the country, share ownership of the Nation's companies. More than 12,500,000 persons are stockholders in public corporations. An additional 1,500,000 own shares in private corporations. Each year, over 500,000 new persons become stockholders.

There are more women stockholders in publicly held companies than there are men, according to the New York Stock Exchange. Women shareowners make up 51.6 percent of the total in America. Moreover, there is a growing concentration of stockholders whose annual incomes are less than $7,500. This indicates that many people believe that stocks are one key to a successful life.

CAN YOU SAVE AND NOT INVEST?

It is certainly possible to save and not invest, and some people follow this procedure. A reliable estimate shows that about $10 billion is in the hands of "hoarders," that is, those persons who hold their money in safe deposit boxes or in their homes. This is not a good practice for several basic reasons. First, money wisely invested will bring in a return, such as interest or dividends, and thus will continually increase in amount. Money hoarded earns nothing, so in the end you have no more than you started with.

Second, in periods of inflationary conditions where prices of goods rise and the value of money declines, your hoarded money

has increasingly less value than it had when you earned it. Investment in securities such as corporate stocks tends to increase in value along with general prices. The purchasing power of your savings so invested should increase because under these conditions the value of this type of investment rises too.

Third, and even more important to your country, industry and government need to use all available funds for progress and growth. When you hoard, you are contributing nothing to your Nation's well-being, upon which your own prosperity entirely depends.

HOW MAY YOU INVEST?

You probably have many forms and types of investment already in existence although you may not realize it. The breadth of investment opportunity is measured largely in terms of the manner in which we save and put our money to work. A brief review of the extent of these savings, which increased an estimated $23.3 billion in 1959, will show their importance.

Savings banks and time deposits in commercial banks

As of last yearend Americans had $34.9 billion deposited in mutual savings banks. This figure has more than tripled since before World War II. In addition, savers have put $65.4 billion in time deposits in commercial banks. This figure too has shown remarkable growth during the past 15-year period. Such deposits before World War II amounted to only $16 billion.

The money deposited in these accounts is invested in business and industry by the banks, and thus creates capital for more and better production. As an indirect partner in the investment process, you are an investor.

Savings and loan associations

This form of saving mechanism is relatively new in our economy although it is an outgrowth of the building and loan association. An indication of its value lies in the fact that savings in these institutions have increased 12 times since before World War II. From an approximate figure of $4.3 billion in 1940, savings and loan associations now hold $54.6 billion of savings.

The accent on investment in these institutions is home ownership, but they also have widespread interests in business and other pursuits.

Government savings opportunities

An excellent opportunity to save and to make your money work for you is found in U.S. savings bonds. Americans have invested currently around $48.2 billion in these bonds. During the war, and postwar years, such investments approached $60 billion, but the end of hostilities removed some of the emotional urge associated with savings bonds. They still continue to attract many investors, however.

The outstanding obligations of State and local government units total about $60 billion, 25 percent of which is now held by commercial banks. Such bonds are especially attractive to large investors, because they are free of Federal income taxes.

Insurance

Dollarwise, one of the most important savings and investment opportunities is found in the policy reserves of insurance companies including life, casualty, and fire. There are over 109 million life insurance policyholders alone in America today, and the combined assets of life insurance companies amount to approximately $113.6 billion. This great mass of savings is channeled into a wide variety of business, industrial, and personal activities and constitutes a tremendous economic resource.

The average policyholder does not consider himself a "capitalist" when he pays his insurance premium, but a large share of that premium is invested for safety and growth in American industry. Thus, as a capital owner, he becomes a capitalist.

Corporate stocks and bonds

Security investments are, of course, direct investments in business and industry. A share of stock represents a part ownership in the issuing corporation; a bond represents a loan to a corporation or governmental body—Federal, State, or local. In each case, the investor is in direct contact with the user of his savings.

As of the last yearend, the market value of stocks on the New York Stock Exchange approximated $300 billion; on the American Stock Exchange $26.5 billion. Many of these same issues as well as their own primary listings may be purchased and sold by the investing public on regional exchanges. Most commercial bank and insurance company stocks are traded over the counter, where active markets in government and corporate bonds are also maintained.

Investment trusts and pension funds

Two of the most rapidly growing depositories for the small investor's savings are investment trusts and pension funds. As of the yearend the assets of mutual funds and closed-end trusts exceeded $17 billion. The assets of pension funds, growing at the rate of over $4 billion annually, were in excess of $33 billion. These savings are largely invested in stocks and bonds.

KNOW WHY YOU INVEST

When you plan to invest your savings and put your money to work, it is important that you know why you are investing. There are many good reasons for investing, but the following purposes should be considered in light of your personal circumstances.

Safety: Every investor believes that the investment he chooses is safe. That is one reason for putting savings into someone else's hands so that they may protect it. However, interest and dividends paid for the use of this money tend to indicate that there is some risk connected with investing. High dividend payments may reflect either a strong company that is earning well, or, it may indicate a very weak company that is a poor risk.

Growth: Many investors, particularly the young, invest with the thought that their money values will grow over the years. With steady incomes now they can invest regularly in the hope that when the funds are needed, they will have increased in amount. So-called growth stocks often do not pay high dividends, but they are purchased in the hope that they will grow in value with the economy.

Income: Many investors, frequently those in the later years of their lives, prefer securities in quality industries with dividend payments higher than are made by the so-called growth enterprises. Subject to the cautions mentioned previously, it is possible to invest for good income purposes.

There are investments that can appeal to any person or purpose, and planned investing makes your money work for you and for the country's welfare.

DON'T GO IT ALONE

Investing is for everyone who is interested in his future yet it should not be done blindly. There are many avenues of indirect investment for the person who has no knowledge of the stock market or individual securities. By placing your money in savings banks, or savings and loan associations, or by purchasing life insurance, or by buying mutual funds, you get the advantages of good management of your money. Thus, you cut down on the dangers and risks of unwise investment.

If you enter the stock market, however, be sure to get the services of a reliable broker or investment banker. Get his advice and follow it. If you are investing in real estate be sure to deal only with reputable realtors. The greatest risk in investing is to buy blindly without proper knowledge or advice regarding the particular type of investment you are making. Investment plans and programs can be set up by experts to meet almost any purpose.

IN SUMMARY

The story we have tried to tell is that our national strength is closely tied to the progress of business, industry, and government, and they in turn are dependent on your savings. The American competitive enterprise system has been compared to a four-legged stool with the legs signifying management, labor, capital, and the consumer. Without even one of the legs, business would collapse. It is as simple as that.

President Dwight D. Eisenhower in citing the importance of National Invest-in-America Week in 1957, said: "As our people freely invest their savings in productive enterprise, our economy is strengthened through research and construction of new plant and equipment, through new jobs and raised living standards. Each bank account, each insurance policy, each bond or share of stock contributes capital to advance the security of the Nation and of each citizen."

Your share in America's prosperity is what you make it through regular savings and investment in America.

THE NATIONAL INVEST-IN-AMERICA COMMITTEE,
April 7, 1960.

Senator ALEXANDER WILEY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR: Now that most of the contacts I planned to make before the 1960 Invest-in-America Week observance have been made, I would like to take this opportunity to inform you of the activities of the State committee here in Wisconsin.

At our last meeting it was decided that more extensive and varied representation should be sought and, as a result of presenting the principles of the organization to various people, we have, fortunately, been able to add the names of several new members to our list, namely:

Rev. Bernard W. Dempsey, head of the economics department in the College of Business Administration of Marquette University.

Harold F. Dickens, State director of the U.S. Treasury Department, Savings Bonds Division.

Allen Pflugradt, executive vice president of First Federal Savings and Loan Association.

We are in the process of contacting several public relations people who would be of considerable value to the committee, especially in the methods used in bringing the I-in-A message to the public.

On the local scene, here and in the various communities of Wisconsin, I have appointed the following chairmen:

Milwaukee: A. W. Drigot, treasurer, Basic Products Corp.

Janesville: Earl Best, secretary-treasurer, the Parker Pen Co. in Janesville, representing the Wisconsin Manufacturers Association.

Madison: J. C. Howdle, vice president and treasurer, National Guardian Life Insurance Co. in Madison.

Stevens Point: Robert Sueck, treasurer, Hardware Mutuals.

Fond du Lac: Andre J. Perry, president, First National Bank of Fond du Lac, representing the State chamber of commerce.

Also carrying out programs in their cities will be (we hope to add Eau Claire):

Grantsburg: Walter Jensen, president, First Bank of Grantsburg.

Sheboygan: John C. De Master, vice president, Citizens Bank of Sheboygan.

Oshkosh: Carl A. Biederman, president, Oshkosh National Bank.

The local members, most of whom were introduced to the I-in-A purpose rather late last year, will be able to conduct a little more expansive and concentrated effort this year with newspaper publicity, radio and TV spot announcements, and various posters and exhibits shown in a number of business and public places. With a new national chairman who, as you may no doubt know, is Gardiner Symonds of the Tennessee Gas Transmission Co., and new committees formed to review past performance, principles, and effects achieved and to enlarge the program into a year-round effort, I believe this year's observance will be one which will stimulate a great deal of interest and will increase in its scope in the future. We hope to accomplish this in 1960 and in the years to come.

I was pleased to read in the March 24 issue of your newsletter that you have again, as in the past, introduced a resolution in Congress which would authorize and request a Presidential proclamation of I-in-A-Week, April 24 through April 30. I wholeheartedly agree with your statement therein, that "America's form of democratic capitalism has played an increasingly important worldwide role." I assure you that we, on the Wisconsin committee, will do all we can to promote the I-in-A message as effectively as we can, and consider ourselves fortunate in having your assistance in the key position that you hold. With the decision, too, to make the effort a year-round activity, plans which will incorporate the I-in-A message whenever opportunities arise throughout the year, will intensify the effects we are trying to achieve—that of reaching more people, more often, until Invest-in-America becomes a slogan familiar to everyone as an integral part of their daily lives.

* * * * *

With kind regards, and much appreciation for your continued support, I am,

Sincerely yours,

ROTH S. SCHLECK,
Chairman, I-in-A Wisconsin Committee.

"WELL, WHAT ABOUT YOU?"—A TV PROGRAM ON VOTING

Mr. WILEY. Mr. President, in the 1960 presidential election year, the major challenges confronting the Nation include: First, crystallizing the national issues in the campaign; second, determining the capabilities of candidates for providing the Nation with leadership to meet these challenges, and third, getting out the vote, to assure maximum participation by citizens in our electoral process.

In a republic, each of us has a great responsibility.

As citizens, we face the task of making these evaluations, and then registering our conclusions at the ballot box.

Over the years, regrettably, there has been a deplorable absenteeism at the polls. This gross neglect of citizen duty has ranged from 24 percent, in 1904—the lowest ebb in history—to 63 percent in 1952. Even the high of 63 percent, we all recognize, is still far too low.

We realize, of course, that there are differing opinions as to just how to get greater voter participation in elections. The real challenge is educating the public on the need to become informed on the issues and candidates, and then on the value of exercising their voice at the ballot box—a right and privilege upon which the Republic was established.

Fortunately, there is becoming an ever wider awareness of the dangers of the widespread negligence about voting.

We realize, however, that awareness is not enough. Instead, constructive efforts must be undertaken to educate eligible voters in all walks of life on the significance of a voter's role in the Republic; the necessity of becoming familiar with the issues and the qualifications of candidates; the voting fundamentals, such as registration for primaries and general elections, ballot marking, operating voting machines, and other fundamentals of voting.

Symbolic of efforts to stimulate greater voter activity, the Ford Motor Co. recently sponsored a splendid television show, by Dore Schary, entitled, "Well, What About You?"

On the program, outstanding Americans, including Vice President NIXON, and other leaders in the political, cultural, legal, and other fields, expressed their views on the need for greater voter participation in elections.

The program conveyed inspirational and creative ideas on the need for getting out the vote. I ask unanimous consent that selected excerpts from the program be printed at this point in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

"WELL, WHAT ABOUT YOU?"

EDDIE ALBERT. Ladies and gentlemen, you, the citizens of the United States, elect to public office in your Nation or your State or your city, almost 800,000 officials. No, that's not a typographical error—800,000. In 1960, at national election time there will be 180 million people living in the United States. This means that one out of every 225 American citizens is elected to some kind of public office. This program tonight, presented by the Ford Motor Car Co., asks you frankly and simply to take your franchise seriously, to examine and to use your vote.

It is proper that the first appeal be made to you by the Vice President of the United States, RICHARD M. NIXON.

Vice President NIXON. There has probably never been an American who was not articulate concerning the obligations of citizens. One of these great statesmen expressed himself eloquently on the subject. He was Theodore Roosevelt. And this is something of what he had to say: "The first requisite of good citizenship is that the man shall do the homely, everyday, humdrum duties well. A man is not a good citizen, I do not care how lofty his thoughts are about citizenship in the abstract, if in the concrete, his actions do not bear them out; and it does not make much difference how high his aspirations for mankind at large may be, if he does not behave well in his own family, those aspirations do not bear visible fruit. He must be a good breadwinner, he must take care of his wife and his children, he must be a neighbor whom his neighbors can trust, he must act squarely in his business relations—he must do all these everyday, ordinary duties first, or he is not a good citizen. But he must do more. In this country of ours the average citizen must devote a good deal of thought and time to the affairs of the state as a whole or those affairs will go backward; and he must devote that thought and that time steadily and intelligently."

And to Theodore Roosevelt, I can only add that when the average citizen has devoted a good deal of thought and time to the affairs of the state, he must then vote in terms of basic principles and objectives. I know that's what you plan to do and I urge you to do that on election day.

EDDIE. I mentioned before the fact that at election time this year, there will be 180 million residents of the United States and it is estimated that the amount of eligible voters will be 100 million. Mr. Joseph Welch has something to say about that.

WELCH. Well, as you see, we have here the symbols of the legendary country store; the cracker barrel, the pot-bellied stove, and the cane-backed rocker. We are told that in the olden days, our citizenry kept informed and discussed the issues and the candidates on a high level with native shrewdness and wisdom.

Well, like so many things we hear about the past, it makes nice telling. But it just ain't so.

Here are some interesting statistics about votes in presidential years. The facts are, we're doing better than we did years ago, but more than one out of three of every American voters is abdicating one of the most precious rights he has. Take a look. In 1900, only 29 percent of the voting population went to the polls. In 1904, when we reached probably the lowest point in national apathy, a little less than 24 percent exercised their rights. And as you see, the three following campaigns still remained under 30 percent. In 1920, better communication, perhaps stronger issues began to arouse the public and the percentages went up in successive campaigns from 41 percent and in 1932 up to 51 percent, and as you see, the highest percentage was in 1952 when slightly less than 63 percent of the voters declared for the men of their choice. But here in 1956 you see, there was a slight dip. They tell the story of the president of a small railroad who was visiting in New York and went to see President Depew who was head of the largest railroad in the world. Mr. Depew asked, "What can I do for you?" and the visiting head of the little railroad explained he was in to arrange for an exchange of courtesies. He would give Mr. Depew a pass if Mr. Depew would give him a pass over his road. Well, President Depew thought about that for a moment and then said, "Well, where's your railroad?" The visitor said, "Wisconsin." Depew then said, "I never heard of your railroad. How long is it?" The visitor answered proudly, "76 miles." President Depew took a deep breath of irritation and said, "76 miles—you call that an exchange of courtesy—why, my railroad has tens of thousands of miles." Calmly the visitor looked at Mr. Depew and said quietly, "Well, sir, your road may be a little longer, than mine, but it ain't any wider."

So please do remember that. You may live in a small town or a large city but nowhere, anywhere, is anyone's vote wider than yours. Neither is it any longer.

EDDIE ALBERT. We are privileged to hear now from the former Governor of Illinois, Adlai E. Stevenson.

Governor STEVENSON. On November 3, 1846, a great American writer, Walt Whitman, wrote an editorial for the Brooklyn Eagle. What he had to say then is still pertinent today and I am privileged to read it to you:

"Few people estimate the value and importance of a single vote." One vote sent Oliver Cromwell to the Long Parliament. Little thought the holder of that vote that his hand was to send Charles Stuart to the scaffold, and to convulse an empire with revolution. One vote elected Marcus Morton Governor of Massachusetts in 1841, out of an aggregate of 100,000. One vote filled the vacancies of the State senate in 1843, and again secured the election of Marcus Morton as Governor.

Four votes given to the fifth ward of the city of New York, made Thomas Jefferson President of the United States.

One vote repealed the tariff of 1842. Who can say that one vote can make no difference, and this his own is not the will whose expression shall finally turn the chance of the lot? One vote, like a drop of water, may be insignificant of itself and alone, but combined with myriads of others, may determine the destiny of a nation.

"Divide the thunder into single tones," says Schiller, "and it becomes a lullaby for children; but pour it forth in one quick peal and the royal sound shall shake the heavens."

Therefore, ladies and gentlemen, in the coming election, I urge you to "shake the heavens."

EDDIE ALBERT. Now, you are to hear from the Governor of the State of New York, Nelson Rockefeller.

Governor ROCKEFELLER. Two years ago, when I announced that I was going to run in the primaries for the Governor of the State of New York, people called me up and said, "Why are you going to get into politics? Politics is a dirty business."

Can you imagine in this country today people feeling that politics is a dirty business, when politics is the very lifeblood of democracy—the very essence of our way of life?

And if politics is a dirty business, then you had better get into politics and clean it up and see that we have the kind of political structure that you and I want. But politics is not a dirty business. It is your business and it is my business.

Too few people, I think, realize that free government, democratic government cannot rise higher than the vitality and integrity of our political parties. And, therefore, the caliber of men and women who are in those parties, the issues which are before those parties, the candidates who are running in the primaries, are your business, and it is tremendously important that you vote in the primaries for your party's candidates and your selection.

And it is equally important, if we want to meet the challenge that democracy is faced with today, the challenge of free men, if we want to preserve the forces of freedom at home and equal opportunity for all, it is up to you to vote in the elections, to understand the issues, to know which candidate in the various levels of government you feel can represent those forces which are our heritage.

So vote in the primaries and vote in the elections.

Thank you.

EDDIE ALBERT. We will now hear from the heads of the two major political parties in the United States. Mr. Paul Butler, chairman of the Democratic Party, and Senator THRUSTON MORTON, chairman of the Republican Party. First, Mr. Butler.

PAUL BUTLER. I, too, am a great admirer of Theodore Roosevelt. And on the obligation of citizens to vote he had this to say: "It is not only your right to vote, but it is your duty—if you are indeed free men and American citizens. I want to see every man vote. I would rather have you come to the polls even if you voted against me than have you shirk your duty." And, later, speaking at the Harvard Union in 1907, Mr. Roosevelt said: "To take part in the work of government does not in the least mean of necessity to hold office. It means to take an intelligent, disinterested, and practical part in the everyday duties of the average citizen, of the citizen who is not a faddist or a doctrinaire, but who abhors corruption and dislikes inefficiency; who wishes to see decent government prevail at home, with genuine equality of opportunity for all men so far as it can be brought about; and who wishes, as far as foreign matters are concerned, to see this Nation treat all other nations, great and small, with respect, and if need be with generosity, and at the same time show herself able to protect herself by her own might from any wrong at the hands of any outside power." For Theodore Roosevelt believed that, "Unless democracy is based on the principle of service by everybody who claims the enjoyment of any right, it is not true democracy at all."

And because all of us know that true democracy is the great shining light of the future, I hope that next election day nothing will come between you and your vote.

EDDIE ALBERT. Now, Senator MORTON.

Senator MORTON. The publication American Druggist, in 1950, published these words of former President Herbert Hoover: "Successful representative government depends on the existence of two major political parties: One to carry the responsibility of government administration, the other to provide the fundamental checks and balances by opposing and ventilating the administrative actions. The two-party system also provides an anvil of debate in legislative halls where the merits and demerits of proposals can be hammered out." Benjamin Franklin once remarked: "By the collision of different sentiments, sparks of truth fly out and political light is obtained." When a debate is over and some conclusions reached by a majority on a public question, either in the legislative halls or at the ballot box, the Constitution still stands there with its checks and balances to protect the minority. We have no arbitrary government by the majority. And over all government and politics, there is a balance of power greater than all this machinery of procedures, whether elections, debates, or laws. That is, just plain morals. So a citizen has a complex duty. He ought to learn to express opinions and to make up his own mind pro and con on the principal public issues. He ought never to miss the ballot box. And when he casts his vote for somebody, he should weigh that somebody on scales or morals—which includes intellectual integrity."

EDDIE ALBERT. In voting, it is certainly vital that we know what a candidate stands for and against. And with the broad avenues of communication now available to us by newspaper, magazines, radio, and television, we are able to get accurate and full pictures of our future political campaigns and campaigners and make up our own minds on the evidence. * * *

Our next distinguished guest is a U.S. Senator from Massachusetts, JOHN F. KENNEDY.

Senator KENNEDY. Certainly one of our great humorists was Mark Twain, and he said of the vote, that it was the only commodity that one can peddle without a license. But when he wasn't exercising his dry wit, he wrote: "In our country, it is always our first care to see that our people have the opportunity of voting for their choice of men to represent and govern them—we do not permit our great officials to appoint the little officials. We prefer to have so tremendous a power as that in our own hands. We hold it safest to elect our judges and everybody else." No party holds the privilege of dictating to me how I shall vote. If there is any valuable difference between a monarchist and an American, it lies in the theory that the American can decide for himself what is patriotic and what isn't. I claim that difference. "I am the only person," Mark Twain said, "in the 60 millions that is privileged to dictate my patriotism."

Edmund Burke, speaking 100 years before Mark Twain, once said that the only thing necessary for the triumph of evil is that good men do nothing. Ladies and gentlemen, on election day, take Mark Twain's advice, act and dictate your own patriotism.

EDDIE ALBERT. There is in the American character a desire to be the best. Some of our favorite expressions include, "Be the fustest with the mostest," "the will to win." Our buildings are taller, our speedways wider and longer. We've never lost a war and our standard of living is higher than any other nation in the world. And yet in the exercise of our right to vote, we are not first—we are not even a bad second. In racetrack talk, we don't even show. Let me give you some figures that may surprise you. Italy, in recent elections, turned out 93.8 percent of its eligible voters. France, 89 percent. West Germany, 86 percent. Turkey, 87 percent. Denmark, 80 percent. England, almost 79 percent—and the best we've ever done is 62 percent. It's about time we closed up the gap.

On February 27, 1922, the Supreme Court declared by a unanimous declaration that the woman's suffrage 19th amendment was constitutional. Since that time, women have been active in the American political scene and with beneficial effect. Since they were the last to be granted suffrage, it is right that tonight they have the last word. I introduce to you Miss Marian Anderson, concert artist, former U.S. delegate to the United Nations, good will ambassador to the world on behalf of the United States of America.

Miss ANDERSON. I am going to read a short essay on liberty, which combines the words of many great Americans:

"Liberty is the one thing you can't have unless you give it to others and democracy means not I am as good as you are, but rather you are as good as I am. As it is true that eternal vigilance is the price of liberty, so it is true that those who expect to reap the blessings of freedom must, like all men, undergo the fatigues of supporting it and no man is worth his salt who is not ready at all times to risk his body, to risk his well-being, to risk his life, in a great cause. Liberty will not descend to the people, the people must raise themselves to liberty. It is a blessing that must be earned before it can be enjoyed. And our country has liberty without license, and authority without despotism.

"The sacred rights of mankind are not to be rummaged for among old parchments or rusty records. They are written as with a sunbeam in the whole volume of human destiny by the hand of divinity itself, and can never be erased or obscured by mortal power.

"Liberty lies in the hearts of men and women. When it dies there, no constitution, no law, no court can save it. The spirit of liberty is the spirit which seeks to understand the minds of other men and women. The spirit of liberty remembers that not even a sparrow falls to earth unheeded. The spirit of liberty is the spirit of Him who, near 2,000 years ago, taught mankind that lesson it has never learned, but has never quite forgotten: that there may be a kingdom where the least shall be heard and considered side by side with the greatest."

EDDIE ALBERT. Miss Anderson's essay included words from William Allen White, Theodore Parker, Thomas Paine, Theodore Roosevelt, Alexander Hamilton, Benjamin Franklin, Cardinal Gibbons, and Judge Learned Hand.

America has always believed in the individual, in his destiny and in his immortality. The individual has been the concern not only of the American statesmen, but the concern of the great American writers. No one has written more eloquently of this than the classic American poet, Walt Whitman, who, in his poem, "A Song of the Rolling Earth," had these words to say:

MARTIN GABEL—

Whoever you are. Motion and reflection are
especially for you,
The divine ship sails the divine sea for you.
Host—
Whoever you are, you are he or she for whom
the earth is solid and liquid,

You are he or she for whom the sun and moon hang in the sky,
For none more than you are the present and the past,
For none more than you is immortality.
Each man to himself and each woman to herself, is the word of the past and present, and the true word of immortality;
No one can acquire for another—not one,
Not one can grow for another—not one.
The song is to the singer, and comes back most to him,
The teaching is to the teacher, and comes back most to him,
The murder is to the murderer, and comes back most to him,
The theft is to the thief, and comes back most to him,
The love is to the lover, and comes back most to him,
The gift is to the giver, and comes back most to him—it cannot fail,
The oration is to the orator, the acting is to the actor and actress, not to the audience,
And no man understands any greatness or goodness but his own, or the indication of his own.

LEGISLATIVE PROGRAM

Mr. JOHNSON of Texas. Mr. President, I wish to announce, for the information of the Senate, that we plan to make Calendar 1035, Senate bill 743, the pending business. We do not anticipate any lengthy debate in connection with it. That bill was introduced by the Senator from Pennsylvania [Mr. CLARK], on behalf of himself and other Senators; and it would amend the Federal Coal Mine Safety Act, in order to remove the exemption with respect to certain mines employing no more than 14 persons.

When we have completed our action on that bill, we shall proceed to the consideration of Calendar 1319, Senate bill 3058, introduced by the Senator from Arkansas [Mr. FULBRIGHT]. That bill would amend further the Mutual Security Act of 1954. Or we shall consider Calendar 1322, House bill 11510, the corresponding House bill, whichever may be satisfactory to the Senator from Arkansas [Mr. FULBRIGHT], the chairman of the Foreign Relations Committee.

AMENDMENT OF FEDERAL COAL MINE SAFETY ACT

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 1035, Senate bill 743.

The VICE PRESIDENT. The bill will be stated by title, for the information of the Senate.

The CHIEF CLERK. A bill (S. 743) to amend the Federal Coal Mine Safety Act in order to remove the exemption with respect to certain mines employing no more than 14 individuals.

The VICE PRESIDENT. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the Senate proceeded to consider the bill, which had been reported from the Committee on Labor and Public Welfare with an amendment.

ERNIE PYLE MEMORIAL AWARD WINNER ESTABLISHES SCHOLARSHIP

Mr. MANSFIELD. Mr. President, earlier in the year I spoke to the Senate about the first woman to receive the Ernie Pyle Memorial Award for journalism and her outstanding work with the Spokesman-Review, in Spokane, Wash. Again I want to speak briefly of Mrs. Dorothy Rochon Powers' great contribution to the field of journalism.

Mrs. Powers has turned over her Ernie Pyle cash award of $1,000 to the School of Journalism at Montana State University, to provide five $200 scholarships in coming years to graduates of Anaconda High School, Anaconda, Mont., who wish to major in journalism at the university. The new university award will be known as the C. G. Rochon Scholarship in Journalism, in honor of Mrs. Powers' father, who died in 1944.

This scholarship is a very fine tribute to her alma maters, the University of Montana and the Anaconda school system. Dorothy Powers has a remarkable record in writing and news reporting, and she is to be highly commended for furthering the cause of bringing new and talented young people into the field of journalism.

Mr. President, I ask unanimous consent to have printed at the conclusion of my remarks in the CONGRESSIONAL RECORD a news story appearing in the April 21, 1960, issue of the Montana Standard.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

JOURNALISM SCHOLARSHIP IS ESTABLISHED BY EX-ANACONDA RESIDENT

MISSOULA.—A check for $1,000 has been presented to the School of Journalism at Montana State University by Mrs. Dorothy Rochon Powers, Spokane newspaperwoman and a 1943 graduate of the school.

She asked that the money be used to provide five $200 scholarships in coming years to graduates of Anaconda High School who wish to major in journalism at the university. Mrs. Powers also is a graduate of Anaconda High School.

The check, presented to Dean Nathan B. Blumberg of the school of journalism, is the one she received earlier this year when she won the national Ernie Pyle Memorial Award for her writing in the Spokesman-Review. She is the first woman to win the award.

HONORS FATHER

The new university award will be known as the C. G. Rochon Scholarship in Journalism, in honor of Mrs. Powers' father, who died in 1944. Mr. Rochon was clerk of school district No. 10 in Anaconda for several years and encouraged many high-school students to continue their education at the university.

The scholarship is to be awarded on the basis of high-school academic record, professional promise in journalism and financial need. It will be paid in three installments during the recipient's freshman year.

COMMITTEE DESIGNATED

Mrs. Powers asked that the winner be selected by a committee composed of the newspaper adviser and the principal of Anaconda High School and the editor or representative of the Anaconda Standard.

No more than one scholarship is to be awarded annually, Mrs. Powers said, and she specified that the award need not be made every year if there is no qualified senior interested in preparing for a career in journalism.

Mrs. Powers said she hopes the first award will be made at the Anaconda High School commencement so that the recipient may enroll in the school of journalism next fall.

THE KOREAN SITUATION

Mr. MANSFIELD. Mr. President, President Syngman Rhee, by his resignation, has demonstrated his basic patriotism. Whatever his personal idiosyncracies, he has been, in moments of crisis, broad enough to recognize that Korea's independence is the essential. It was this realization which drove him into exile many decades ago. It was this realization which prompted him to return at the end of World War II, and to stay on, through the difficult days of the Korean conflict. It was this realization which has prompted him to step down at the present time.

Syngman Rhee's resignation does not end the crisis in Korea; it merely provides an opportunity to end it, and it must be acted upon promptly and decisively. A situation of chaos curbed by martial law will not stand for very long in circumstances such as those which exist in Korea. The chief consequence of a failure to act promptly and decisively may well be a renewal of civil strife, and even international strife, and the end of the prospects for the unity in independence of Korea in this generation.

The first responsibility rests with the Korean people and their leaders—in education, in the professions, and in religion, no less than in politics and in the armed services. If ever there was a time when all the Korean people have needed to cleave together, that time is now. If ever there was a time when prompt action was needed in reorganizing and strengthening the processes of democratic and responsible government that time is now. If ever there was a time when Koreans ought to speak and act in an orderly fashion and with a new dedication to freedom and independence, that time is now. If ever there was a time for soul searching on the part of all those who have been involved in the affairs of the Republic of Korea since the truce of 1953, that time is now.

First. For the Koreans, the immediate need is to work out promptly what constitutional reforms may be necessary to prevent the abuse of power and to insure its responsible exercise. Then, the need is for free and secret elections without intimidation, in the villages no less than in the cities; and if United Nations assistance is essential to that end it should be forthcoming promptly.

Second. For the United Nations, as a whole, the need is to recognize that it has coasted with the Korean issue since 1953 and has contributed little, if anything, through sterile and repetitive debates on this issue year in any year out in the General Assembly, to a solution to the problems of Korea.

Third. For ourselves, the need is to ask ourselves what, if anything, our policies on Korea—direct or through our

leadership in the United Nations—and billions in aid to the South Korean Government have produced since the truce of 1953. Have these policies, this aid, built conditions conducive to a durable peace, or have they served merely as a holding action and one that is now, apparently, in danger of failing even to hold? The inadequacies of these policies, the misuse of this aid have long been apparent, but we need to ask ourselves why it has taken bloody street demonstrations and this grave crisis to bring us to the point of even acknowledging, in an official sense, that something was amiss.

First things must come first and, at this moment, every effort will be required to bring about minimum stability and responsible government through constitutional reform and honest elections in the Republic of Korea. The present white-hot concern should not stop there. I would hope that the new Korean leaders who may emerge, our own policymakers and aid administrators, and the United Nations will look ahead and develop an integrated and determined approach to the inner problems of the Republic of Korea. We need to free this joint effort from any tendencies to accommodate to and to abet political stagnation and corruption. This joint effort and, particularly, any further aid must be used to develop not only an apparently stable situation, as in the past, but a situation which is actually stable because it provides the benefits and hope of responsible progessive government to the Korean people, and hence is supported by them.

I would hope, finally, that all nations most intimately affected by developments in Korea, including the Soviet Union, Communist China, as well as ourselves and the other members of the United Nations forces in Korea, would also look ahead to the end that the entire Korean nation might be reconciled to unity in independence and in peace and, in time, freed of the presence of the forces or the pervasive influence of all outside countries.

NATIONAL DEFENSE—ADDRESS BY SECRETARY OF DEFENSE THOMAS S. GATES, JR.

Mr. DIRKSEN. Mr. President, on Monday, April 25, 1960, the Secretary of Defense, Thomas S. Gates, Jr., addressed the annual meeting of the Associated Press in New York City.

Secretary Gates' remarks were readily recognized as constituting one of the most important public pronouncements on national defense matters in recent years. The speech received extensive news coverage, and its significance was further underlined by the fact that it was reprinted in its entirety in the New York Times and publications of the Copley Press.

In reading this speech by Secretary Gates, I am impressed by its objectivity and broad-gaged thinking. At a time when attempts have been made—and I am glad to observe that such attempts have been largely unsuccessful—to make political capital out of national defense matters, it is reassuring, but not surprising, that the Secretary of Defense discussed these critical issues with the restraint and dignity that we have come to recognize and admire in the attitude and character of Tom Gates.

The initial portion of this speech contains one of the most mature and penetrating analysis of the nature of the Communist threat that it has been my privilege to read. This analysis places the Communist methods, objectives, and doctrine in proper historical and strategic perspective, and in so doing, Secretary Gates underlines the imperative need for maintaining a defense program that achieves the indispensable balance between combat forces in being, on one hand, and energetic, intelligent, farsighted research and developmental programs on the other. Furthermore, he emphasizes the often inescapable necessity of canceling expensive programs that have been overtaken by events in order to cross the threshold into new methods and weaponry.

There is much reassurance in Secretary Gates' comments on the existence of responsible differences of opinions with respect to military policy, and in his recognition of the value and the necessity for such differences of opinion. At a time when some critics of our Defense Establishment urge that all the military be forced to speak as a perfect chorus, it is good to note the commonsense approach of the Secretary of Defense in refusing to seek unanimity for the sake of unanimity, thus rejecting proposals aimed at throttling sincere, able, and wise opinion on national defense. Such views are in accord with Secretary Gates' strong statement in this speech in support of the Joint Chiefs of Staff system. Such pointed support of this uniquely American device for military planning at the seat of Government is well timed. It is a persuasive and welcome rejection of proposals to destroy the war-proven Joint Chiefs of Staff system by such devices as separating the Joint Chiefs of Staff members from their positions as chiefs of military services.

Secretary Gates does not minimize or disparage the scientific achievements of the Soviet Union in the field of missilery. Yet he places the Soviet accomplishments in their proper relationship with respect to the U.S. position and power. Without equivocation, Secretary Gates makes the accurate and categorical statement that there is no deterrent gap. Also, our limited war forces are strong.

Secretary Gates, in a concise résumé of the great accomplishments our Nation has achieved since 1953—nuclear-powered submarines, the Polaris system, a great long-range jet-powered bomber force, Atlas, Jupiter, Thor, the placing of 20 satellites in orbit, our successful reactions at Lebanon, Quemoy—not only underlines the inherent wisdom, vigor, and strength of our national security policies, but also pointedly rebutts those critics who gratuitously label our Nation as a second-rate power.

Mr. President, because of the historic importance of this speech, I seek unanimous consent to enter it in the RECORD at this time, and I commend it to the attention of all Members of the Senate.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY SECRETARY OF DEFENSE THOMAS S. GATES, JR., BEFORE THE ANNUAL MEETING OF THE ASSOCIATED PRESS, NEW YORK, N.Y., APRIL 25, 1960

Ladies and gentlemen, I greatly appreciate your invitation to participate with you in this meeting today. My associations with you and the many persons who compose the Associated Press have always been interesting and pleasant. Such differences of opinion as we may have had are symbolic of the character of our form of government. I would not want to see the day when our press could not take constructive issue with any government official on any subject.

In planning my statement to you, I thought it best to cover only by time in the Department of Defense. Much has happened since September 1953 when, somewhat by surprise to everyone including myself, I went to work in the Department of the Navy. There have been significant events and dates one does not forget. It is difficult to place these years in sequence. With your permission I will jump over and between them, and first I will begin with the most important date which happened to fall in about the middle of my Washington experience.

On October 5, 1957, the people of the United States were electrified. The Soviet Union had launched and placed in orbit a manmade satellite. Sputnik was born.

This event dramatized in sharp focus the seriousness of the Communist issue. The achievement proved technical competence, and gave tangible and even visual evidence to the competition between two powerful and deeply dedicated ways of life.

Many of us already knew about this. Thousands of words had been written and spoken. A war in Korea had cost us 135,000 casualties. We were spending large sums on defense. We had in being our largest peacetime military forces. We were certainly not unprepared.

Yet, strange as it may have seemed, the American people that day had a rude awakening. They had not understood the enormity of the basic Soviet threat, with all of its implications.

There came a healthy stirring from complacency, and a great worry. In some minds there was fear. Warnings had passed unnoticed. People acted as though it was the first time they had ever heard of the Soviet warmaking potential and Soviet competence. In confusion, they blamed everyone but themselves.

Around the world, the rising young nations stirred also. They began to think, to compare, and to wonder if this day ended hopes and dreams so long in the making.

New nations and old allies looked to the United States—for in the new age, only the United States could provide the leadership, the wealth, and the energy to foster and preserve freedom.

The United States reacted with self-criticism. Doubt and worry produced little that was constructive. A feeling of inferiority swept across the land, a feeling of being second rate began and persisted. No real sacrifices were offered. People were quick to blame, but life went on as usual. Big expense accounts, short working hours, long vacations, and the easy way remained. Men did not change the normal pattern or orient themselves more toward the business of government.

The role of the United States in its free world responsibility was having growing pains at a time we could ill afford them.

Certainly we should not have reacted with complacency, but we should not have gone with a sense of guilt into a process of tearing down our fundamental beliefs and institutions. This was the time to comprehend

fully our defenses and to realize that sound planning existed and anticipated much of the demonstrated Soviet capabilities. The pendulum swung too far.

This was a time for calm determination. Today is such a time, also, and every individual is involved. We must evaluate and believe in our own strengths. Greater knowledge, more work, and a true perspective will confirm our moral values and increase our will. We can ill afford to reward the preacher of the negative, to publicize and acclaim the listing of things that are wrong, with no word on how to improve them. The way of leadership is not to tear down, but to build.

Also, we must understand the Communists better. The U.S.S.R. has deep convictions and relentless programs to rule the world. There are no signs of change. Their system is well developed, composed of skilled, capable people. There is no timetable for their goals. They operate in terms of what Lenin and Stalin called an entire historical era. They can wait.

There is no overriding preference as to tactics or combination of tactics to permit accomplishment of goals. A slowing down here, or a temporary block there merely means a push somewhere else, in all fields—military, economic, psychological, and subversive.

Someday, far in the future, younger generations of Soviets may change the pattern and find new household gods. There is always this hope. However, much time and many events must intervene.

I have recently been to the borders that separate Germany from Czechoslovakia and Austria from Hungary. I wish all Americans could see these miles of Iron Curtain—the plowed road to reveal footprints, the electric and barbed wire fences, the land mines, and the interlocking series of steel watchtowers manned by the guards. I was told that back of this lie other miles of a policed area where special passes are required—a no man's land where no one moves except as authorized.

It is difficult to believe the world can live indefinitely with these series of Iron Curtains that stretch across Europe, Korea, and south Asia. The plowed strips and electric fences must disappear before new generations can build a new structure suitable to the dignity of man.

We must always treasure a faith for the future. Yet today we have an armed truce and an uneasy peace. The United States enters these years as a strong and great power with profound physical and moral integrity. We have firm and true partners. Together with these allies and friends, we testify to and guarantee a new free world.

The experiment in liberty that created this country has been proven. Its progress and growth may be under test, but its fundamental concepts are secure. These are concepts that have stimulated the imagination of all people.

New nations believe in these concepts and hope for the strength to bring them into fruition. New nations will reject the "fenced in" regime of the U.S.S.R.

This is a time to reexamine democracy and make it more sophisticated and adult. This is no time to question our ideals. No time to waver. There will be many probes and tests of our determination. We can bend with some storms and must work and negotiate in the give-and-take of our international position. But when great storms come and threaten our beliefs, then we must be prepared to stand, sacrifice, and fight if we must.

This way of life requires strong, ready military forces. These we have. We must and will insure these forces of continued modernization and power over the longer future.

National defense must always come first. Only from military strength can foreign policy operate. National defense must come first in dollars, regardless of the level of our gross national product or the status of our annual income and expenditures.

Correct, exact national defense implies unattainable perfection. Proper defense involves sound and balanced judgment. No man or group of men can ever be completely sure the balance is perfect.

Constant change is normal. It takes courage to change, to cancel an expensive program that has been overtaken by events, to close an installation employing trusted competent people, or to abandon a proven military mission of the past in exchange for a better way. Sometimes it takes more courage to do this than to cross a new threshold.

Yet both must be done. This always makes for differences of opinion. Men wise in the ways of the military and of its administration do not deplore these differences. More often than otherwise differences of view are helpful, especially if they spring from experience and knowledge. They bring firmer analysis. Finally, there must be decision, and those who carry the burden of the responsibility must answer "yes" or "no," supervised and guided by the great check-and-balance system implicit in the Constitution of the United States.

We are aware of our responsibility. We know that the security and future of this country lie importantly in our hands. We know that all of our fellow citizens have a deep and lasting interest in what we do and how well we do it.

For these reasons it is wise that we live in a glass house and free debate concerning our affairs takes place in the Congress and in the press. We should acknowledge the significant contribution that experienced Members of Congress and expert analysts of our free press make toward the finalization of defense plans.

I would not recommend any change in this process. We might only hope and suggest that the arguments could become more constructive, based on fuller understanding and more researched knowledge, and that the burdens on a few key individuals and officers within the Department of Defense could be better shared.

The program of the Department of Defense is not created in isolation, but is a principal segment of our total strategy and total national policy. Today this strategy and policy include factors that are political, economic, and psychological, as well as military. A purely military peacetime decision is rare.

Inherent in this total policy is our reliance upon the collective security arrangements we have made worldwide. The military assistance program, which supports our share of these treaties and supplements the economic aid program administered by the Department of State, represents an integral, vital part of our total defense. Military assistance supports the forces of our allies. It means stability. It buys competence and will to resist aggression, and it complements our own forces and bases overseas.

We cannot count on substantive concessions by the Soviet Union. We will push our efforts for a just peace and a lessening of world tensions through controlled arms reduction. We recognize the U.S.S.R. as a formidable power and a tough competitor, a nation that has made great progress and will continue to grow.

We see no change in their objectives. Their efforts to make us believe otherwise are but tactics used for whatever temporary benefit or propaganda advantage is deemed valuable at the time.

We repeatedly analyze and war-game the relative military strength of the Soviet Union and the United States. These studies deny any impression that we have been overtaken militarily or that we are second best. Such an impression is not supported by the fact.

Under our present and planned defense, no rational leader of the Soviet Union could make a decision to attack the United States since such an attack would guarantee the destruction of his own country. This is our conclusion, and it is supported by all of the principal civilian, military, and scientific advisers to the President. We assert firmly that no gap exists in our deterrent posture.

The mission of the Department of Defense includes two categories of priority: First, we must be prepared to deter general war and retaliate effectively and conclusively if it should occur.

Second, we must be prepared for military actions of varying degrees and sizes anywhere in the world, and be able to contain quickly such action. We must put out the fire of limited war in situations that may range all the way from another Korea-sized conflict to one involving a small number of infantry or marines.

These obligations, combined with all the factors that are inherent in our national policy, call for balanced U.S. forces of great variety and dimension and demand difficult judgment and continuous decision.

The pace of scientific progress has been fast, and the military transition is great. Flexibility has become an essential element in our planning. Our programs must evolve and take shape independently of the time cycles of the annual budget, and regardless of fluctuations in the political temperature.

The Department of Defense is big and complex. Over the years there have been important improvements in its management. More can be made, but we can point to significant accomplishments. The Reorganization Act of 1958 represents the latest statutory change. It would be wise to let the impact of this act have its effect before another change is made. The greater centralization of command and authority implicit in this act, with the line of military command running through the Joint Chiefs of Staff to the unified commands, is functioning well. It will continue to prove more effective as time goes on. I strongly support the Joint Chiefs of Staff system, and believe we have found a formula that will improve its operation.

An important aspect of the 1958 act, which is also having beneficial effects, was the creation of the Office of Director of Defense Research and Engineering. This Office, now headed by Dr. Herbert York, supervises and assigns priority to research work which accounts for close to $6 billion of our defense budget. Since most of our present effort in space is still in the research and development stage, the military portions of the Nation's space activity are also largely within the responsibilities of this Office.

The exploration of space and its relation to military uses has been greatly misunderstood. It is one thing to say that the United States has lagged in the ability to put large payloads into space, and quite another thing to say that the United States lags in its overall military programs.

Sputnik was a tremendous scientific feat. Its success, along with subsequent successful Soviet efforts in outer space, produced a psychological impact on all peoples that is of the utmost importance. These dramatic feats have been possible because the U.S.S.R. has developed high thrust engines which can boost large payloads into deep space.

Prior to 1954 the United States, and presumably the Soviets, were interested in developing an intercontinental missile. At that time, based on then existing heavy warheads, our scientists estimated we would need a rocket of truly prodigious power. The technical difficulties were so extreme that little interest was shown. Late in 1953, however, greatly improved thermonuclear weapon design made it possible to produce a warhead of relatively small size without

sacrifice of destructive power. It then became feasible to develop an ICBM using a rocket of some 360,000 pounds thrust—and the Atlas design was pushed forward on that basis.

Meanwhile, the Soviets apparently elected to go ahead with the development of an ICBM based on a larger booster. They did develop an engine which produced an estimated 600,000- to 800,000-pound thrust.

The decision regarding Atlas was a correct one militarily. The Atlas is a smaller missile, easier to handle, and less expensive. It will carry a large yield nuclear warhead to ranges fully adequate to reach all major targets. From this decision to stay with the smaller boosters has come our present ICBM program—Atlas, Titan, Minuteman, and Polaris.

Sticking with big engines, big missiles, and big warheads ironically gave the Soviet a byproduct of high-thrust rocket engines and thus space probes of importance for scientific and prestige purposes. We have no military requirement for such engines. We can develop our family of weapons and produce our presently required military satellites without them. In our judgment the present ICBM boosters, or perhaps uprated versions of them, will suffice for any of our unmanned military satellite systems.

We should clearly separate space probes from military weapons such as ICBM's. Some day, undoubtedly, other military requirements may develop in space which will require big boosters and we, therefore, have great interest in seeing the United States develop such engines. But no informed person can downgrade U.S. military power because of sputnik or even a landing on the moon. Rather, we should take great pride in our accomplishments.

I came to the Pentagon in September of 1953. In the short span of one man's service, let us look at what has happened. In 1953 no ship afloat was powered by atomic energy. Today we have 9 nuclear submarines already in commission and 23 under construction or conversion. Under construction also is a nuclear-powered carrier, a nuclear-powered cruiser, and a nuclear-powered frigate. The *Nautilus* has cruised under the North Pole, followed by the *Skate;* the *Seawolf* has stayed under water for an unprecedented 60 days. The nuclear-powered submarine has revolutionized sea warfare and rightly caught the imagination of the world.

In 1953 the Polaris system was merely a dream. This year it becomes a reality, as 2 of these submarines, each capable of firing 16 atomic tipped missiles while submerged, join our active defense forces.

In 1953 an airplane which was expected for the first time to operate at speeds greater than the speed of sound was in the very early design stage. Today Mach 2 aircraft are part of our regular forces, and a Mach 3 plane is in our active research and development program.

In 1953 we were devoting our full energies to the development of airbreathing missiles such as the Snark and Navaho. The ballistic missile—Atlas—was a concept only. It was surrounded by doubters; its proponents asserted it could be operational by 1965. Today the first Atlases are in position on the Pacific coast, with an astonishing record of successful test firings, and a proved accuracy that has far exceeded the hopes of even a year ago. Meanwhile, the early airbreathing missiles have been developed, been produced, become operational, and then been superseded in the swift progress of technology.

In 1953 the intermediate range ballistic missiles, Jupiter and Thor, were not even contemplated. Today the Thor is in the hands of our allies in the United Kingdom, and it was a Jupiter booster which in 1958 launched this Nation's first satellite into space.

Since that first launching, the United States has successfully put 20 satellites into orbit, compared with a total of six space vehicles for the Soviets. Today, as military or civilian projects, we have 11 still in space, including one which is pioneering weather forecasting through taking pictures of cloud covering, one that is contributing to new advances in navigation, and one that, from more than 5 million miles away, has been sending us information which has significantly expanded the sum total of human knowledge regarding outer space. The two Soviet objects now remaining in space are transmitting no messages.

The launching of a satellite, which 2 years ago made headlines throughout the world, does well today if it makes page one. Antiaircraft and tactical missiles, air defense and offensive systems, come out of the drawing boards and into ships, planes, and installations, and are taken for granted.

These changes have occurred in less than 7 years—the time that used to be regarded as par for the course in the development of a fighter aircraft.

Meanwhile, with this impressive effort in research and engineering, our forces in being have demonstrated their ability to react quickly and effectively to situations that have arisen, such as those at Lebanon and Quemoy. We have been a strong force in keeping the peace.

Who says this is a backward, second-class military record? I say it is superb.

You of the press have great responsibilities in the field of maintaining our freedom and the concern and interest of all of our citizens. In publishing news of our relative strengths and weaknesses, I only urge you to portray the factual, overall picture, and to consider all aspects of the great mission with which we in Defense are charged. Only through an informed public can we insure that freedom in the long run will triumph.

I urge you to foster a better understanding of what faces us and of our preparation to meet the future. Take our minds away from straw men and false issues, and restore self confidence and faith. Bring to our people a realization that the interests of our country must come first, always. Make us forget and settle differences of lesser importance.

Such actions and leadership on your part will produce concrete, constructive ideas, restore a rebirth of values, and sharpen again the firmness, fitness, and fortitude which are our heritage from the day a shot was fired beside a small bridge in Concord, Mass.

It must be clear to you, as well as to all of our citizens, that as we approach the summit and meetings of great significance that will follow, we must be strong. This strength is real. It is not a facade. Confidence in it must exist on the part of all of our citizens.

THE FRANKING PRIVILEGE BY MEMBERS OF CONGRESS—POST OFFICE DEPARTMENT APPROPRIATIONS

Mr. ROBERTSON. Mr. President, in view of the apparent difficulty of some of our friends of the fourth estate in understanding the amendment offered last Monday by the Senator from Delaware [Mr. WILLIAMS] to the then pending Post Office appropriations bill, relating to what he termed the distribution of junk mail without addresses, the chairman of the subcommittee which considered that appropriation desires to repeat what he distinctly said on last Monday concerning what was involved. At that time he said that the amendment of the Senator from Delaware was not necessary. He said that the Solicitor General of the Post Office Department had ruled that the mere repetition in the appropriation bill of the statutory authority for the use of franked mail by Members of the Congress did not in any way, shape, or form compel the Post Office Department to change its existing regulation which prohibited the distribution of franked mail that was unaddressed in cities and towns which had street delivery.

But when the amendment was offered, the chairman of the subcommittee had the clerk of the committee again call the Postmaster General on the telephone, and he received the reply that the Department's position had not changed; that the amendment offered by the Senator from Delaware was not needed; and that he had so informed the Senator from Delaware.

Mr. President, far be it for me to accuse any of our friends of the press of putting the Appropriations Committee in a false light, but the whole matter is fully set out on page 8619 of the CONGRESSIONAL RECORD of Monday, April 25, 1960. Yet not a word appeared in the press to the effect that the committee was informed by the Post Office Department that the language framed by the Department and put in the committee report was all that was necessary to protect the Department from what was only a request—not a law, but only a request—in the House report that the Postmaster General adopt a regulation with respect to the delivery of unaddressed mail.

In conclusion, after outlining very fully those reasons, the chairman of the subcommittee said that to begin with, the Senator from Virginia is willing to accept the amendment, but on a different theory from that which has been presented to the Senate. This is the language contained in the House report.

Then I went on to say that all this amendment did—and that is still the fact—was to put in conference what we had taken care of in the committee report, and now we have just one more issue to debate with the House conferees, because we had the matter fully covered in a way that could not be raised in conference, whereas the amendment, taking out language of the bill itself, must be argued in conference and must be insisted on by the Senate conferees. There is the possibility, of course, that the House conferees might not agree to take the language out. The conferees might go back for a separate vote in the House. This might require a separate vote in the Senate. After it is all done, we get back to where the committee was in the first instance.

Mr. President, I think the RECORD was perfectly clear on Monday on that issue. Naturally, I regret that no member of the press who was handling this mat-

ter saw fit to let the public know that they were not going to be gouged by a new method of free delivery through failure of the Senate committee to protect them and that their protection was not dependent upon the very able and alert Senator from Delaware and the amendment he offered.

I repeat, the public was fully protected in this matter. The amendment offered added nothing to the bill except the possibility of an additional fight in conference to sustain that particular amendment.

MINE SAFETY WILL SAVE LIVES

Mr. YOUNG of Ohio. Mr. President, Americans everywhere, and especially those in the coal mining regions of the Nation, were shocked at the reports of recent coal mine disasters. I express the hope that we in the Senate will pass the coal mine safety bill by unanimous vote.

Since 1865 Congress has recognized the hazardous nature of coal mining. Over the years we have seen the passage of legislation designed to remove the dangers. Despite this fact, mining still remains a hazardous occupation.

Major accidents and disasters can be prevented if there is strict adherence to safety standards. Recognizing this fact, Congress in 1952 enacted legislation providing for mine safety inspectors and the establishment of uniform safety standards.

However, in writing the Federal Coal Mine Safety Act, Congress exempted mines employing 14 men or less. These mines are usually referred to as title I mines.

Mr. President, I assert that a man's life is just as precious and deserving of protection whether he works in an underground mine employing 10 people or 20 people or 100 people.

There is no logic in applying mine safety rules to mines employing 15 or more persons and not applying those same rules to mines employing 14 or less. The life of the laborer in the larger mine is no more worthy of protection than the life of his fellow worker in the smaller one.

Mr. President, during the month of April alone, six coal miners were killed in two widely separated tragic accidents in title I mines. If safety rules that apply to larger mines had applied to those worked in by these six men, they might be alive today.

I have received a telegram on this subject sent to me by the outstanding president of the United Mine Workers of America, Thomas Kennedy. The message in this telegram is worthy of our serious consideration.

Mr. President, S. 743, introduced by the distingushed senior Senator from Pennsylvania [Mr. CLARK], will, if enacted, remedy this dangerous loophole in our mine safety laws. It is fair to the mine operators as well as to the mineworkers.

The Senate will today consider this needed proposed legislation. Its aim is to save lives.

Mr. President, if enacted into law, S. 743 will do just that. It will also quiet the fear in the heart of every wife and every child of a mineworker when he leaves for work in the morning. It will make life safer and happier for many Americans at no cost to the rest of us. I urge its speedy passage in both branches of the Congress.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point the telegram on this subject sent to me by the outstanding president of the United Mine Workers of America, Thomas Kennedy.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C., *April 13, 1960.*

Hon. STEPHEN M. YOUNG,
Washington, D.C.:

Six coal miners were killed in title I mines Saturday, April 9, three in Kentucky and three in Maryland. Had Congress passed S. 743 during the 1st session of the 86th Congress these coal miners could be alive today. S. 743 will shortly be considered by the Senate. I hope your vote will be for the protection and saving of human life.

THOMAS KENNEDY,
President, United Mine Workers of America.

WHY BIG INDUSTRY IS GOING "SMALL TOWN"

Mr. MOSS. Mr. President, the extent to which industry is turning to America's small towns, and even to the countryside, for sites for new plants, is outlined in a special report carried in the U.S. News & World Report of December 21, 1959. Small communities out across the land should take heart, and take every practical step to strengthen the trend.

I ask unanimous consent that the report, entitled "Why Big Industry Is Going 'Small Town,'" be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

[From the U.S. News & World Report]

SPECIAL REPORT—WHY BIG INDUSTRY IS GOING "SMALL TOWN"

A new Government study highlights this important trend in U.S. industry: More and more companies are building plants away from the big cities. This signals more jobs, better income for people in small communities.

U.S. industry is turning more and more to small towns—and even the open countryside—as a place to build new plants.

As a result, job opportunities in many small communities across the country are on the increase.

In some rural areas, new industries are giving employment to people who used to make their living from farming. In other places, payrolls from the new plants are boosting retail trade and lifting the standard of living of local residents.

These points are borne out by an official study just completed by the Business and Defense Services Administration of the U.S. Department of Commerce. The study shows that cities and towns with populations of 50,000 or below now provide more than 25 percent of all the employment in the Nation's manufacturing industries.

There is no exact comparison with earlier periods, because this is the first such survey the Government has made. It is based on a special tabulation of statistics gathered from the census of manufacturing concerns, covering 1954.

A QUICKENING PACE

Commerce Department officials say that the rate of industry's movement to small towns and suburban areas has been increasing steadily in recent years. This trend is continuing, even though a majority of all U.S. industry still is concentrated in or near big cities.

Life insurance companies, research laboratories and data-processing centers are joining manufacturing firms in the trek to the country.

One plant-location specialist says that, since the end of World War II, more than 90 percent of all new factories have been built in communities of less than 50,000 population.

An example of savings from new plants in small towns

An office-equipment manufacturer in an eastern city, planning to expand, found that big savings could be made with a new plant. Four sites in small midwestern communities were considered. What comparisons showed about yearly operating costs:

	Present factory in the East	Site A, Midwest factory	Site B, Midwest factory	Site C, Midwest factory	Site D, Midwest factory
Labor	$12,106,000	$10,054,000	$10,548,000	$10,934,000	$11,092,000
Overhead (including local taxes)	1,190,000	618,000	602,000	636,000	662,000
Freight costs	507,000	432,000	366,000	360,000	338,000
Utilities	204,000	248,000	214,000	236,000	246,000
Total	14,007,000	11,352,000	11,730,000	12,166,000	12,338,000
Estimated yearly savings at new plant		2,655,000	2,277,000	1,841,000	1,669,000
Savings as percent of costs at present factory		19	16.3	13.1	11.9

Source: Survey by Fantus Factory Locating Service.

That estimate comes from Leonard C. Yaseen, senior partner in the Fantus Factory Locating Service, which has found sites for more than 1,500 industrial plants. Says Mr. Yaseen:

"One of the most significant developments of the past decade has been the rise of small cities as the industrial centers of America. At the same time, the large, traditional manufacturing cities of the United States have lost ground rapidly."

A Fantus study notes that such big centers as New York, Detroit, Providence, Pittsburgh, the Newark-Jersey City area of New Jersey, and the Albany-Schenectady-Troy area of New York State all have lost industry since 1950. At the same time, many small communities, particularly in the South, the

Midwest, and along the Pacific coast, have registered sharp gains in factory jobs.

SIGNS OF THE TREND

A check of business executives and industrial development authorities by U.S. News & World Report underlines the extent of industry's move toward the open spaces.

From William P. Rock of the Arkansas Industrial Development Commission comes this comment: "There's no question about the trend to smaller communities. In the past 4 years, we have located 400 new industries in Arkansas, and they are spread over every county in the State, including areas that are predominantly rural."

Kentucky reports that, out of 649 new plants built or planned in Kentucky in the period 1948 to 1959—at a cost of nearly $2 billion—a total of 478, or 74 percent, were located in communities with less than 50,000 population.

That report comes from George W. Hubley, Jr., president of the Association of State Planning and Development Agencies and former Kentucky commissioner of economic development. "Many of Kentucky's new plants are in towns of less than 5,000," says Mr. Hubley, who recently was named director of industrial development for the State of Maryland. A striking example, he adds, is the $10 million plant of General Tire & Rubber Co. now under construction in an open field on the outskirts of Mayfield, Ky., a city of 9,000.

B. R. Fuller, Jr., industrial development commissioner of Florida, says:

"Florida in 1957 started a new program to help our rural communities gain new industry. Naturally we don't expect to develop new payrolls overnight. But we are encouraged by the fact that, in the 49 rural counties in the program, the number of new manufacturing plants brought in during the first half of this year was double that of the first half of 1958, and the number of new jobs created was three times as high."

The biggest industrial development in Florida so far this year, Mr. Fuller notes, is a new $13.5 million plant for corrugated paperboard in Port St. Joe, a community of about 6,000 people.

In Vermont, whose largest city, Burlington, has a population of only 35,000, strong efforts are being made to lure industry. W. E. Bermingham, managing director of the Vermont Industrial Development Commission, notes that national companies coming into Vermont or expanding operations there, have added 8 millions to annual payrolls in the State over the past 5 years, and have boosted total employment by 2,000 people.

"We think we have a competitive edge in attracting new plants, because our natural beauty and our recreational facilities make people want to live here, and to live in Vermont is to work hard," says Mr. Bermingham.

WHY THEY MOVE

There are several reasons why companies are seeking plant sites in the country or in small towns. The reasons vary from industry to industry and from company to company.

MANPOWER

Some companies find that the supply of labor is more abundant and more productive in less-industrialized areas, particularly in rural communities where farm mechanization has cut the number of jobs in agriculture.

Says an executive of a major chemical-processing company: "We try to put our new plants in small communities whenever we can. For one thing, we find the labor situation more stable than in larger cities. There is less trouble with strikes, mass picketing, with agitation of one sort or another. Then, too, we prefer to train our workers from scratch, and we have found the workers in small communities most adaptable. They don't have bad habits to unlearn."

In many rural areas where new plants have been established, workers continue to do part-time farming when they're not working a plant shift. An executive of the Du Pont Co. notes that workers at its Orlon plant at Camden, S.C., commute up to 50 miles to their jobs, then drive back home to put in a few hours on the land.

COSTS

The prospect of substantial savings in operating costs often lures a plant to a smaller community.

According to Mr. Yaseen, "More and more industries are finding that their costs—for labor, transportation, fringe benefits, plant overhead, and utilities—are often lower in smaller communities than in big cities."

The chart on page 87 shows you how the possibility of cutting production costs can influence the choice of a factory site. The figures are derived from an actual survey made by the Fantus organization for one of its clients, a manufacturer of office equipment with headquarters in an Eastern city.

This company, with an outmoded factory and inefficient plant layout, found it could have saved almost 10 percent in annual costs just by putting up a more efficient plant near its present location. But no space was available for expansion there, so the company decided to move to a less crowded area.

After checking many possibilities, the company narrowed its choices to communities in four Midwestern States, where annual savings of 12 percent to 19 percent could be made on costs of labor, freight, and overhead. These estimated savings did not include possible additional savings on State income taxes and unemployment-compensation costs.

ELBOW ROOM

Still another reason for moving to the open country is the availability of large plant sites with room for future expansion. F. S. Dickinson, Jr., president of Becton, Dickinson & Co., Rutherford, N.J., says the "priceless commodity of space" was what led his concern, a manufacturer of medical instruments, to pick a site at Columbus, Nebr. The company put up a plant on an industrial tract outside the city limits, where taxes are low and where there is plenty of room for future growth.

THE "GOOD LIFE"

Most companies nowadays look for plant sites where living conditions are pleasant. C. J. Lawson, Jr., director of manufacturing services for International Business Machines Corp., explains that IBM, in locating a plant, considers accessibility to markets, availability of manpower, and tax and utility rates.

"But beyond this," he says, "we are most concerned with the character of the community—its cultural, educational, and recreational facilities. We ask ourselves if it is an attractive place in which our employees would like to live and raise their families. In our evaluation of these factors, we have found generally that the smaller community provides the most advantages, both to the company and to the individual employee."

New high-speed turnpikes and expressways furnish an incentive for plants to locate in rural or semirural surroundings, where there is plenty of parking space for workers' cars and easy access to larger centers of population.

WHO MOVES, WHO DOESN'T

For communities that are interested in attracting new industries, the new study by the Commerce Department offers some tips. It lists 74 types of business that seem to prefer locating in smaller cities or towns. Included are companies making woolen and worsted fabrics, seamless hosiery, wood furniture, men's and boys' underwear, paper and paperboard, packaged sea food, synthetic fibers, flat glass, home-laundry equipment, and concentrated milk.

Some other types of business seem to favor staying in the big cities, the study indicates. Included in this group are printing and publishing, rubber products, fabricated metals, instruments, machine tools, paints, photo equipment, fur goods, and many varieties of food processing.

Even so, there is evidence that smalltown locations are appealing increasingly to many business concerns. The prospect for the years ahead is that the Nation's rural areas will get a still larger number of business concerns of many kinds.

COMMUNITY DEVELOPMENT GROUPS SLOW TO REPLY

Mr. MOSS. Mr. President, the Utah Committee on Industrial and Employment Planning is a statewide committee appointed by the Governor to establish and promote employment expansion through orderly industrial development. It is doing a splendid job.

In a recent copy of the Utah Industrial Development Newsletter, published by the committee, there is an excellent discussion of community shortcomings in meeting out-of-State inquiries about local sites for new industry. I ask unanimous consent that an excerpt from this discussion, entitled "Community Development Groups Slow To Reply," be printed in the RECORD.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

COMMUNITY DEVELOPMENT GROUPS SLOW TO REPLY

We feel quite certain that the following doesn't apply to any of our industrial development groups in Utah, but it is rather surprising to learn that across the Nation, "a substantial percentage of local groups do a miserable job of responding to industrial inquiries."

Editors of Industrial Development & Manufacturers Record, leading national publication in the field of industrial planning and expansion, made this charge in reporting on their experience referring requests for plant location information to community development organizations. A portion of their report follows:

"We on the staff of ID have long regarded ourselves as staunch defenders and advocates of local community development organizations. We point with pride to their progress and continually remind industry to use their services.

"But there are times when we are more than a little discouraged by some of the groups we are striving to support. In fact, their action—or lack of it—is beyond our understanding.

"Example type I: We have an inquiry from firm listing 20 communities of interest, asking for site proposal within 15 days. We wire communities, stressing urgency. Nine communities meet the deadline.

"Example type II: We refer an inquiry to a community, indicating firm wants specific preliminary data without revealing identity. Community group replies: 'We're sure we have what this firm wants—just tell them to come and see us.'

"We were amazed on one occasion to receive a letter from an industrialist asking our aid in contacting an advertiser—said he had written twice for site data, but still hadn't received an answer. Why, the reader asked, was this group spending its good money for advertising space?

"While we've made no exhaustive survey and claim no mathematical accuracy, our guess is that a genuine site query going out to 100 community groups might produce results somewhat as follows:

"Fifteen would reply quickly with well-planned, tailored proposals.

"Forty would respond promptly with form letters and routine literature.

"Twenty would reply too slowly to receive most favorable consideration.

"Ten would fail to reply due to organizational confusion and buck passing.

"Five would send material doing their cause more harm than good.

"One explanation for such poor response is that many local groups get excited only when the query comes to them direct from the industrial prospect. They just don't exert themselves to respond to anonymous inquiries referred by railroads, State agencies, utilities, etc.

"This may be human nature, but it's not good business.

"Successful developers have learned that it pays to take advantage of every opportunity to present their case to interested parties. You never know where your next lead is going to originate."

WATER POLLUTION CONTROL

Mr. MOSS. Mr. President, the Salt Lake Tribune on Monday, April 11, 1960, published another telling editorial on the problem of control of pollution of our streams. After the President vetoed the water pollution bill, the Salt Lake Tribune published several editorials on this subject, this one being entitled "Congress Should Try Again on Pollution." This is an excellent discussion of the point, and I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

CONGRESS SHOULD TRY AGAIN ON POLLUTION

The lower House of Congress has restored a $25 million cut in the Federal aid program for sewage treatment works during the next fiscal year.

The administration budget provided only $20 million as the Federal Government's share of the national pollution control program begun in 1956. Raising the amount back to the $45 million level of the last 3 years, the Appropriations Committee declared: "The amount requested * * * is completely unrealistic in view of the urgency of need and the growing hazard of water pollution. * * * Nor does the argument that it is a local problem, and not a Federal responsibility, hold up under objective analysis.

"It is seldom that the locality which builds the waste treatment plant gains more than a small part of the advantages that result. It is other communities downstream and often even in a different State that really benefit."

If the Senate accepts the House figure the Federal grants will continue next year as in the past. Utah communities have been receiving $592,275 annually under the program, with local funds paying 70 percent of the cost and the Federal Government 30 percent. If the recommended slash is carried out, programs in Utah would be cut back to $236,910 next year.

The picture of national water pollution needs is emphasized in a report by the Public Health Service, drawn for the Senate Select Committee on National Resources. This report should jolt everyone into greater effort to abate industrial and human pollution.

Water use in the country is increasing with the rapid population growth. And within 20 years the residents of many areas will have to drink water that previously has been used again and again, the report warns.

This means that great improvements will have to be made in sewage and water purification techniques, in addition to more widespread treatment. Present methods do not remove many of the new types of chemicals—household detergents, insecticides, and industrial wastes.

The Public Health Service urges that highest priority be given scientific research dealing with this knotty problem.

It will cost $9 billion to do what should be done to abate pollution in the Nation in the next 5 years, the report says. Twenty-nine hundred municipalities will have to build sewage-treatment plants and 2,730 others will have to enlarge or modernize theirs. More than 6,000 industrial factories will have to control their wastes.

Communities which fail to clean up their water supplies will find their futures adversely affected and their growth curtailed. For example, Kansas City is now feeling the pinch of punitive measures because its officials ignored Public Health Service and Missouri Pollution Board's orders to clean up.

Congress should try again to pass a workable water-pollution bill. The new bill should take into consideration the President's veto message suggestion that tighter measures be taken to halt pollution. This will call for more severe penalties.

Pollution and water supply problems often can be handled better on a watershed or river system.

Hence, Federal incentives should be provided for both local and regional sewage work, particularly where it is demonstrated that the cleanup program is required and the Government grants and other incentives are needed. Congress should review the wisdom of restricting the pollution grants to small communities. In many cases the middle-sized and large cities are the worst off financially, in tighter tax straitjackets and have equally severe sanitation problems.

MASS TRANSPORTATION

Mr. WILLIAMS of New Jersey. Mr. President, last month when I introduced a bill, S. 3278, to help improve mass transportation services in metropolitan areas, I tried to stress the broad-scale national interest in this problem which far transcends the convenience of our railroad commuters, important as that may be.

I tried to point out that the existence of adequate, modern mass transportation facilities is vitally important from the standpoint of preserving the wealth- and revenue-producing capacity of our major metropolitan areas which may otherwise strangle from traffic congestion and land waste.

It is also important from the standpoint of protecting our country's huge investment in the Federal highway program, an investment that will inevitably soar to fantastic heights if we lose our present mass transit services.

And it is vitally important from the standpoint of insuring the free flow of freight in interstate commerce, which will be subject to the same costly delays in urban areas because of traffic paralysis.

This last point was recently substantiated by Stanley Berge, professor of transportation at Northwestern University, who wrote in the May issue of the Atlantic Monthly:

A fact too often overlooked in discussions of the metropolitan transportation problem is that efficient movement of freight within and across the urban area is just as important as efficient movement of passengers. Hence, any future planning for railroad commuter services and other passenger services should aim at maximum utilization of tracks, equipment, and other facilities by both freight and passenger trains.

In his article Mr. Berge discusses two advancements that would materially improve our rail transportation systems: the elimination of inefficient stub-end railroad terminal stations to be replaced by through stations and the development of a new railroad electrification program, which would cut investment and maintenance costs while improving efficiency and reliability.

These are the kinds of capital improvements that my bill is designed to assist, and I think there is no question that the sooner we start helping our State and local governments to make these kinds of investments, the more money we will save in the long run. This is the kind of prudent expenditure that is vitally needed and that can only be considered an asset on the ledgers of our Nation's strength and security.

Mr. President, I ask unanimous consent that this informative article by Mr. Berge be included in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Atlantic Monthly, May 1960]

HOW COMMUTERS CAN HAVE THEIR TRAINS

(By Stanley Berge)

(Commuter service on public transportation has become one of the most besetting problems of our time. For a constructive solution we have turned to Stanley Berge, professor of transportation at Northwestern University School of Business. Mr. Berge has made special field studies of the railroad situation in six of our large American cities and has made three trips to Europe to collect data bearing on the subject.)

The great cities of today owe much of their growth and present stature to the railroads which have served them for upward of a century. But as the cities outgrow their past and extend into the suburbs, people everywhere are asking in some anxiety whether there is any way the railroads can meet the new challenge.

The disorganized commuter railroads often give the impression that they do not even wish to participate in future metropolitan transportation. While the press publishes gushing predictions of big plans for motor transport and aviation, one looks in vain for a single enthusiastic, imaginative proposal for large-scale improvement in coordinated metropolitan railroad service. Instead of getting together and pooling their resources to develop a dramatic long-range plan, even the most strategic railroads serving our great cities seem to be going it alone. The newspapers continually report suburban fare increases, train curtailments, and complaints about subsidized competition and unfair taxes. Occasionally there is an encouraging announcement that an individual road has introduced new suburban coaches to replace decrepit old rattlers. But where is there any indication that the railroads, as a group, have any radical improve-

ments in mind for their metropolitan commuter services; their medium-distance intercity passenger services, where they still have a fighting chance; or their through metropolitan freight service, where the present pace of rail performance is almost a joke?

In fact, most railroad managements today are resigned to the idea that insofar as metropolitan transportation is concerned, they are a declining industry. All of their big plans, it seems, are geared to a concept that the future of the railroads is limited solely to the carriage of long-distance intercity bulk freight.

Whether they realize it or not, the strategic rail lines in our large cities possess locational and technical advantages not possessed by any other form of transport. If by some magic injection these despondent carriers were aroused, it could be demonstrated that big cities need coordinated railroads quite as much as coordinated highways and air and water transport.

A fact too often overlooked in discussions of the metropolitan transportation problem is that efficient movement of freight within and across the urban area is just as important as efficient movement of passengers. Hence, any future planning for railroad commuter services and other passenger services should aim at maximum utilization of tracks, equipment, and other facilities by both freight and passenger trains. Is this being done today? The answer is "No." Railroad executives and city planners are still struggling with proposals for commuter facilities and for rapid-transit extensions exclusively to take care of passenger traffic. It is not surprising that most of these plans are slow to get public acceptance. Their failure to obtain financial and general support is primarily the result of a fundamental fallacy in metropolitan transportation planning; namely, that because no more than 20 hours per week of use can be expected of commuter railroad and rapid-transit facilities and personnel, such facilities can never be made self-supporting and their operation will always incur a deficit. Since deficits must be carried either by taxpayers, in the case of transit lines, or by shippers and stockholders, in the case of commuter railroads, it is hardly to be expected that metropolitan transportation plans involving extensive deficit financing should be greeted with widespread enthusiasm. In our enterprise system, the public is apt to look askance at any industry, even in the public service, which openly declares that it cannot exist without direct public subsidies on a permanent basis.

Why is it that so many people think of the metropolitan transportation problem simply as a mass-transit problem? To be sure, mass transit by bus and rapid-transit lines is certainly a vital part of urban passenger transportation, but unfortunately it is not suitable for long-distance extensions, as metropolitan travel reaches out 50 miles or more from the central business district. Neither are mass-transit facilities and equipment particularly suited to the transport of mail, express, and freight, which must also be carried if metropolitan rail lines are to become self-supporting. Hence, rather than extend rapid-transit lines far out of the central cities into thin-density territory, why not avoid duplication, waste, and frustration by assigning responsibility for relatively long distance metropolitan transport of both passengers and freight to coordinated metropolitan railroad systems and turn over the closely spaced stops and high-density urban transport of passengers to the transit lines. The railroads would thus become a super rapid transit network which could be effectively coordinated with an inner network of urban transit services.

BREAKING THE RAILROAD BOTTLENECKS

One day there will be a great awakening in one of our large metropolitan cities. The present bottleneck of stub-end railroad terminal stations will be broken, enabling trains to move freely through the central city, making stops at a series of convenient platform stations instead of forcing all passengers to enter and leave all trains at a single, congested, downtown location. The old-fashioned, inefficient, stub-end terminal stations in the hearts of most large cities are inherited from the 19th century. Further confusion results when cities are served by two or more stub-end stations which, in view of modern needs, are rather inconveniently located.

From the standpoint of the railroads, stub-end terminal stations are both inefficient and wasteful of space, equipment, and manpower. Through-station tracks can handle at least four times as many trains and passengers per hour as stub-end-station tracks. In Chicago, for instance, 45 multiple-unit trains can be operated by the electrified Illinois Central suburban line to and from its stub-end terminal station at Randolph Street in a single rush hour. Since the station contains six stub-end tracks, this means an average of approximately seven trains per track per hour. By way of comparison, the State Street subway line of the Chicago Transit Authority averages 30 trains per track during a single rush hour, and in addition offers the passenger a number of convenient platform station stops. In this case, the subway and the railroad both use self-propelled, electric, multiple-unit trains with double-end controls exclusively, yet there appears to be a fourfold gain in efficiency resulting from the through-station operation compared with the stub-end-station operation.

Moreover, the average efficiency of stub-end railroad terminals is still further impaired by the fact that most commuter railroads operate trains propelled by locomotives. Unless the double-end push-pull type of control is provided, it is necessary to engage in extensive—and expensive—switching operations in and out of the terminal station simply to put the locomotive at the head end of each train. Before its recent inauguration of push-pull suburban trains, the Chicago & North Western's entire 16-track stub-end station at Madison Street in Chicago could accommodate only 60 train movements during a single rush hour—no more than are handled in the same hour on just the 2 through tracks of the transit authority's State Street subway line.

The distance covered in backup and turnaround train movements is often considerable. The Chicago, Milwaukee, St. Paul & Pacific, for instance, using one end of the stub-end Chicago Union Station, is compelled to back passenger trains 3 miles to the Western Avenue coachyard, turn them around, and again back them 3 miles into the station. This procedure not only involves a great waste of track and station capacity but is equally wasteful of equipment and crewtime.

To sum up: Obsolete stub-end railway terminals must give way to efficient platform stations located on unified through-track systems, thus permitting effective coordination of metropolitan railway operations. In other words, it is high time that the principle of continuous flow should be applied in metropolitan railroad networks just as it has been applied in the development of expressways and rapid-transit lines. It is no more logical, for example, to stop all New York Central & New Haven passenger trains at a brick wall in Grand Central Terminal than it would be to stop all subway trains at a brick wall under Times Square, or to bottle up all motor vehicles using the Lincoln Tunnel in a giant midtown parking lot.

THROUGH TRAFFIC WITHOUT SUBSIDIES

The advantages of through stations on connected tracks are evident in the Pennsylvania Railroad's 30th Street and North Philadelphia stations in Philadelphia, as well as in the through-track arrangement of Penn Station in New York. Outside the United States, metropolitan Tokyo has one of the best arrangements of unified tracks and stations. Stations in the Netherlands are almost without exception of the through type. Stub-end stations in Brussels have recently been rebuilt as through stations by linking tracks in a crosstown tunnel. A tunnel has just been completed to link the rail lines in Madrid; and the French are studying a tunnel plan to link the principal rail lines and eliminate major stub-end stations in Paris. Not the least of the advantages of such continuous-flow railway networks is that they are useful for freight, mail, and express trains, as well as for commuter trains and intercity passenger trains. They are thus much more likely to achieve sufficient utilization to pay their way without the need for direct subsidies from the taxpayers.

Consider the New York-New Jersey-Connecticut metropolitan area. The New Jersey railroads, with the exception of the Pennsylvania, all terminate in stub-end stations west of the Hudson River. Even the Pennsylvania, whose two tunnels were completed in 1909, operates very few trains through and beyond Penn Station. As a result, its two tunnels get far less utilization than they could if a pattern of through metropolitan rail service were developed. The idea of operating trains from New Jersey through Manhattan east to Long Island and north to Connecticut is not a new one, but it is still a good one. Why should the Long Island Rail Road continue to struggle with the obvious inefficiency of dead-end terminal movements in the heart of Manhattan when its service could be made much better and less costly by swinging its trains under the Hudson and terminating their runs at various points on the New Jersey railroads? Consider, also, the advantages that would be gained by extending Grand Central tracks of the New York Central and New Haven through a tunnel connection with through rail operations between Long Island and New Jersey. Such a terminal unification project would finally consummate one of the major unrealized objectives of the Port of New York Authority's comprehensive plan of 1921.

In the Boston area, the sufferings of Suffolk County and the suburbs would be greatly reduced by breaking a tunnel through about a mile and a half of soft slate, putting Boston's North and South stations on the same through tracks. Such a bold stroke would not only break the city's ancient bottlenecks by transforming its two stub-end stations into through stations; it might be the welcome signal for finally getting New England's most important railroads—the New Haven and the Boston and Maine—to work as a winning team. Certainly each road has been finding solo operations a losing proposition.

In the Philadelphia-Camden metropolitan area, it has so far been apparently impossible for the railroads to shake hands across the Delaware River. Not only do the Pennsylvania suburban trains fail to reach the tracks of the Pennsylvania-Reading Seashore lines on the Jersey side of the river, but even on the Philadelphia side there is no coordinated use of tracks and stations by the Pennsylvania Railroad and the Reading Railroad. Each of these lines terminates its suburban runs in a separate stub-end station in downtown Philadelphia. A rail tunnel under Market Street and across the Delaware River would forego an effective through rail network for the City of Brotherly Love and its hinterland.

Chicago, the railroad center of the United States, suffers from its failure to unify tracks of railroads terminating in five obsolete stub-end stations. Chicago's terminal unification problem will never be solved until a coordinated unified-track system is devel-

oped with a series of conveniently located platform stations, so that both suburban and through trains can collect and discharge passengers at more than one station, and so that tracks and facilities can be used for mail, express, and freight trains, as well as passenger trains. Such a unified-rail system could be created on the east side of the central business district by constructing a 3-mile tunnel connecting the Illinois Central south of the Chicago River with the North Western north and west of the river. On the west side of the Loop, a good connection is needed between the North Western's tracks and the Union Station, making Union Station an efficient through station.

In the San Francisco Bay area, one wonders why the Southern Pacific's peninsula line northward from San Jose still gets no farther than the old stub-end station at Third and Townsend Streets, when, by tunneling under the relatively shallow waters of the bay to Oakland, it could become an effective through route for both freight and passenger traffic. Such a cross-bay tunnel would create an efficient San Francisco Bay belt line connecting San Francisco, Oakland, San Jose and the many rapidly growing intermediate communities on either side of the bay.

Even Los Angeles, city of the freeways, is criss-crossed by the rights-of-way of the Southern Pacific, Sante Fe, Union Pacific, and Pacific Electric railways. While the local passenger service of the Pacific Electric has been abandoned, the other railroads still operate through passenger trains into Los Angeles' Union Station (another stub-end facility), and freight service requires the maintenance of many miles of track in the Los Angeles area. Time is running out, but much might still be accomplished if the remaining strategic rail lines of this area were to decide to work as a coordinated metropolitan system.

RAILROAD ELECTRIFICATION

Couple a bolt of lightning to flanged wheels on through metropolitan systems of steel rails and you will have the key to the solution for the metropolitan transportation problem. The nearest thing to a lightning bolt coupled to a railroad is the economical new 25,000-volt a.c. system of railroad electrification, which is now rapidly spreading across Europe and Asia. The 25-kilovolt 50-cycle system, developed by the French National Railways since World War II, has been adopted by the British Transport Commission for an extensive electrification program in the British Isles. Soviet Russia has adopted it for a big new program of electrification. This system has been successfully employed on suburban lines both in Turkey and in Portugal, which is now extending the system northward from Lisbon to Oporto. In Asia, the new system has been adopted for major installations in India and in Communist China and will be utilized in extensions of electrified lines in Japan.

In France, a combination of technical leadership and aggressive promotional efforts has developed a new system which has cut the investment cost of railroad electrification in half while at the same time increasing its efficiency and reliability. By 1961, at least 70 percent of all traffic carried by the 26,000-mile nationalized railroad system will be moved electrically. Tremendous advancement in the speed, capacity, and stamina of conventional electrified railroads, has been scored by the French, while monorail promoters have been attempting to convince the world that the best way to get 100-mile-an-hour trains is to take them off two rails and suspend them from one. Yet, while no commercial monorail has yet been built to carry passengers even as fast as 50 miles an hour, the French have operated trains propelled by modern electric locomotives at 205 miles an hour over a stretch of conventional standard-gage track near Bordeaux. Following these successful tests, the French stepped up the speed limit to 100 miles an hour on the Paris-Lyon portion of the famous Mistral run to the Riviera. The Mistral, fastest scheduled train in the world over a long run, now averages 80 miles an hour over the 318 miles between Paris and Lyon.

Rhythmic, trouble-free, high-speed operation 20 hours a day on the Paris-Lyon run has also brought to the French the world's locomotive stamina championship. This was achieved in 1955 by the Alsthom electric locomotive CC-7147, which covered a distance of 273,400 miles—more than equal to a trip to the moon—in seven months of regular runs averaging 1,272 miles daily. The locomotive was then given its first general overhaul. Not being satisfied with this record, the French National Railways has since decided on a policy of running a million kilometers—equal to a round trip to the moon—on the Paris-Lyon run before giving the electric locomotives a general overhaul.

Such record-shattering speed and trouble-free performance of modern electrified railroad service are in themselves staggering, but the most spectacular discovery was yet to be revealed. This was the first successful large-scale use of standard high-voltage alternating current for railroad electrification. Less than 10 years of postwar research and experimentation, largely conducted on a 50-mile line near Geneva, led French engineers to embark upon general application of the revolutionary 25-kilovolt 50-cycle single-phase system of rail electrification. The use of such high-voltage alternating current of standard frequnecy (50-cycle in Europe and 60-cycle in the United States) removes the principal obstacle to railroad electrification—the huge cost of initial installation.

Having built both 1,500-volt direct current lines and 25,000-volt 50-cycle alternating current lines at the same time and under similar conditions, the French were able to demonstrate a saving of approximately 50 percent in the construction cost of the AC system. First, the catenary wire and supporting poles required to feed 25,000-volt alternating current to electric locomotives or self-propelled trains are only about one-third as heavy as those required for the 1,500-volt direct current trolley wire. Second, the 25-kilovolt system does not require a parallel, high-tension transmission line along the right of way, since the trolley wire itself is the high-tension line. This eliminates the complication and cost of three wires and their supporting poles along the right of way—a vast saving in original investment and in maintenance expense. Third, costly substations along the right of way, required to change standard utility current into direct current, or some special low-frequency alternating current, are virtually eliminated. Thus, instead of requiring substations with transformers and rectifiers every 4 to 8 miles, the 25-kilovolt 50-cycle trolley wire needs to be fed only every 30 to 50 miles, where it is connected by transformer with the public-utility power grid.

For metropolitan railway operations, electrification must be regarded as the next important step to be taken after unification of tracks and stations. Under high-density traffic conditions, such as prevail in metropolitan service, electric trains are more efficient and economical than diesel-powered trains. In the long run, using the high-voltage AC system, fuel and maintenance costs will be less for electric than for diesel power. With more traffic concentrated on fewer tracks in a coordinated system, the time will be ripe for a new era of American railroad electrification. By that time, experiments now being made may have perfected a system of automatic train operation by remote control on electrified routes. Louis Armand, former president of the French National Railways, told me in 1955 that automatic operation of electric trains would in the future be considered just as practical as automatic electric elevators are today. Just last year, installation of a new system of electronic safety devices permitted the Swiss Federal Railways to adopt universal one-man cab control on all trains.

GOOD TRANSPORT IS A DYNAMIC FORCE

Some railroad commuters have been willing to put up with 100 percent fare increases since World War II simply because they would rather pay the increased fares than drive to work. But this does not mean that they are happy with either the fares or the train service. As more and more people have been commuting by automobile, the commuter railroads have been losing passengers, even though commuter revenues are reaching record highs. Under present conditions the automobile gives most commuters faster, more comfortable, and more convenient transportation from door-to-door than public transportation by railroad or transit lines. Furthermore, for those commuters who have access to free or cheap parking at their places of business, the automobile is more economical than railroad commutation. Since the average American family possesses at least one automobile, the fixed costs of car ownership are incurred whether or not the vehicle is used for commutation. Hence, the commuter compares the out-of-pocket cost of driving and parking with the out-of-pocket cost of rail fares plus bus fares to and from the railway stations. Thus many commuters have decided that rail service is too slow, too inconvenient, too uncomfortable, or too expensive for door-to-door transport.

Fortunately, the railroads are not yet out of the race. As fares have been increased, new and comfortable equipment is appearing on some of the roads which seem to believe that their commuter service has a future. How can this change of heart be organized into a vigorous long-range program of spectacular improvements in the quality and economy of rail service?

People will use automobiles only as long as nothing better is available. Trucks will carry most of the freight within and through metropolitan areas only until faster, more efficient, and more economical transport is available. Mail and express will continue to suffer from central terminal delays only until a better system of coordinated metropolitan mail and express distribution is available. Some will say, "Why flay the dying iron horse? His days of service are nearly over." Others will reply that coordinated electrified through metropolitan railway systems may still be made a dynamic force in the new metropolis with beneficial effects upon land utilization and human activities.

We would do well to keep in mind that commercial, social, and recreational developments invariably follow good equipment on good schedules over good routes. The corollary is that transportation improvements can be financed most economically by capitalizing on the future values which transport improvements invariably create. The modern metropolis challenges the railroads, and the future role of the iron horse in urban transport depends upon the response of railroad management to this challenge.

WHO GETS GOVERNMENT SUBSIDIES?

Mr. MURRAY. Mr. President, an excellent editorial on Government subsidies appeared in the Montana Farmer-Stockman issue of April 15, 1960. This editorial points out in a clear, succinct manner how we are all sharing in Government subsidies daily and that the

matter of Government subsidies—contrary to a popular belief—is not limited to the farmers of the Nation.

I ask unanimous consent that the editorial appearing in the April 15, 1960, Montana Farmer-Stockman, Great Falls, Mont., entitled "Who Gets Government Subsidies?" be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

WHO GETS GOVERNMENT SUBSIDIES?

Ask the average man on the street what he thinks of Government subsidies and chances are 10 to 1 that he will tell you he is against them, says a recent National Grange bulletin. Ask him who gets most Government subsidies and his answer will be "Farmers." Asked if he or his business receives a subsidy and the answer is likely to be an emphatic, "No."

But despite such commonly expressed opinions, the American public has been supporting an elaborate system of Government subsidies (including tariffs on countless manufactured items), since the first Congress met in 1789. It is difficult to name a business which is not receiving some type of Government subsidy.

This average man on the street, who says he is opposed to all subsidies, comes into contact with them every day.

When he awakens in the morning, he turns on a light and immediately starts sharing the results of a subsidy provided through a fast tax writeoff plan which saves power companies billions of dollars—and which reduces his light bill accordingly.

When he goes to a breakfast of bacon and eggs, he shares the benefits of the Government's $21 million Federal meat inspection program—a program conducted by the U.S. Department of Agriculture for the sole purpose of assuring the public a safe and wholesome supply of meat.

If he has children in school, their education is subsidized by taxes paid by the childless neighbor across the street. And, if his are among the 12 million children who eat a hot lunch provided through the highly popular Government school lunch program, he receives direct benefits from another $150 million Government subsidy. If his children are in one of the 78,000 schools participating in the special school milk program, they come in for a share of still another $75 million subsidy.

When Mr. Average Man-on-the-Street drives the family car into the filling station and tells the attendant to "fill-er-up" he again shares in a major Government subsidy—one brought about through a special depletion allowance tax regulation which cuts the petroleum industry's annual operation expense by about $1 billion a year.

If he makes a trip by plane, he rides at a fare made possible by a direct subsidy to airlines—and by the tax-supported airports and air traffic control facilities.

If he lives in a house purchased with a GI loan, he pays a lower rate of interest because Uncle Sam has agreed to bail the banker out in case there is a default in payments.

When he sits down to read a magazine, he starts sharing a subsidy provided through the U.S. Post Office Department—a subsidy which has cut the annual cost of mailing a single publication by as much as $8,604,000. Ready for bed, the average man-on-the-street goes to a closet and places his trousers on a steel hanger that came from a plant built on a cost-plus basis during World War II and sold to a steel company for a song a few years later.

So, throughout the day, the man who says he is opposed to all forms of subsidy has been sharing special services provided at the taxpayer's expense.

This situation does not justify a continuation of the type of ineffective farm price support programs now in operation, concludes the Grange, but it does show clearly that farmers have not been—and are not now—the exclusive beneficiaries of special subsidies and services supplied at the expense of U.S. taxpayers.

THE BIBLE

Mr. BYRD of West Virginia. Mr. President, the Bible is an astonishing miracle. Written fragment by fragment, over the course of many centuries, under different states of society and in different languages, by persons of the most diverse temperaments, talents, and under differing conditions, we can only marvel at the harmony of the whole sublime and momentous work. Its authors were prince and peasant, bond and free. It contains history, prophecy, poetry, proverbs, prayers, and good literature. Its instructive composition gives wisdom to all who seek it, example to all who wish to follow after it, and hope to all who yearn for it. It teaches us how to live and how to die. It never grows old, but is as real and as applicable to the present age as it was to the age in which its divine words were first revealed. Lawyer and merchant, physician and diplomat, statesman and soldier, rich and poor—all may derive from it alike measureless treasures untold. With each reading of it there comes something new. It is an eternal source of strength. Why is it so? Only because it was divinely inspired and it reveals God's wondrous plan of salvation for erring mankind.

Mr. President, may this Nation of ours hold close to itself the beautiful thoughts set forth in Psalm 19, that magnificent tribute to the grandeur of creation and God's law:

The heavens declare the glory of God; and the firmament sheweth his handywork.

Day unto day uttereth speech, and night unto night sheweth knowledge.

There is no speech nor language, where their voice is not heard.

Their line is gone out through all the earth, and their words to the end of the world. In them hath he set a tabernacle for the sun.

Which is as a bridegroom coming out of his chamber, and rejoiceth as a strong man to run a race.

His going forth is from the end of the heaven, and his circuit unto the ends of it; and there is nothing hid from the heat thereof.

The law of the Lord is perfect, converting the soul; the testimony of the Lord is sure, making wise the simple.

The statutes of the Lord are right, rejoicing the heart; the commandment of the Lord is pure, enlightening the eyes.

The fear of the Lord is clean, enduring forever; the judgments of the Lord are true and righteous altogether.

More to be desired are they than gold, yea, than much fine gold: sweeter also than honey and the honeycomb.

Moreover by them is thy servant warned; and in keeping of them there is great reward.

Who can understand his errors? cleanse thou me from secret faults.

Keep back thy servant also from presumptuous sins; let them not have dominion over me; then shall I be upright, and I shall be innocent from the great transgression.

Let the words of my mouth, and the meditation of my heart, be acceptable in thy sight, O Lord, my strength and my redeemer.

NEW YORK SAYS "VIVE DE GAULLE"

Mr. KEATING. Mr. President, it was my honor and privilege yesterday in New York City to participate in ceremonies and a dinner sponsored by the Franco-American Societies honoring President and Mrs. Charles de Gaulle. The appearance of the French leader in New York City provided many people of my State with an opportunity to express their heartfelt admiration and kinship with him and his nation.

The visit of General de Gaulle to this country has certainly done much to strengthen the traditional bonds of cooperation, friendship, and affection between France and the United States. We are pleased to have had him with us, just as we are glad to have a leader of his stature and resoluteness in the camp of the free nations. His iron will and determination will be vital factors in all efforts to establish a just and lasting peace.

Mr. President, editorials in this morning's New York Herald Tribune and New York Times pay eloquent tribute to the incomparable General de Gaulle and his visit to New York City. I ask unanimous consent to have these editorials printed at this point in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the New York Herald Tribune, Apr. 27, 1960]

DE GAULLE IN NEW YORK

Twenty-two hours are hardly enough for New York to assess the magnitude of President de Gaulle of France, or for him to savor the friendliness of this city. Yet we think both understood each other perfectly during his visit of yesterday and last night.

On his previous trip in 1944, if we may say so with some little pride in our prescience, New York gave the general a rather more cordial welcome than Washington did. He recalls in the second volume of his war memoirs that while his public appearances here were held to a minimum because of political necessities, New York's Mayor La Guardia nevertheless bubbled over in his enthusiasm and friendliness.

Yesterday, too, the city bubbled over with admiration and affection. It is not too much to say that the entente cordiale established between De Gaulle and New York in 1944 was yesterday renewed, revivified and made permanent.

Tickertape parades up lower Broadway have become something of a commonplace in recent years. But the sincerity, genuineness and warmth of New York's welcome were unmistakable. And although France's president has been depicted as stern, unbending and austere, it was plain to see that he was touched emotionally by the sight and sound of this great city's outpouring.

For no other Frenchman since the First World War could there have been such a reception, simply because there has been no other Frenchman of like stature. And there are others besides the French who are pleased and proud that grandeur, greatness and leadership in world councils once more come from France.

Wherever he goes in the New World when he leaves New York we believe Charles de Gaulle will be met with similar emotion and enthusiasm. New York is glad that it, in its turn, could give expression to them if only for 22 hours. We do not know if fate will take him this way again. We are proud that he has been here twice, and each time a welcome and cherished visitor.

As he leaves us this morning let it be with the words that rang so often in his ears yesterday: "Vive de Gaulle, Vive la France."

[From the New York Times, Apr. 27, 1960]

DE GAULLE IN NEW YORK

It is impossible for a New Yorker to think of the visit of a great French general to our city without thinking of those memorable days in August 1824, when General Lafayette came ashore in New York on his last visit to the United States. Nothing could be more natural and nothing more apropos, even though we sincerely hope and believe that this is by no means a farewell visit for President Charles de Gaulle.

There were other notable visits, to be sure—Marshal Foch, for instance, on October 28, 1921, and General de Gaulle himself, on July 10, 1944, while the Germans were still in occupation in Paris, and on August 27, 1945, with the war in Europe won and the general already President of the French Provisional Government.

But Lafayette started it on that day long ago when the guns boomed, the West Point band played "See the Conquering Hero Comes," and New York put out its flags and threw flowers while the delirious crowds cheered. Old soldiers wept for joy and for the memories of "battles long ago." The general wept, too.

All this was like a chord whose sound was so true that we will always hear it, as we do now while General de Gaulle is in our city. In Washington, in his address to Congress on Tuesday, the French President himself evoked the memory of that early war when "we fought side by side." We were again fighting as allies when he came here in 1944 and said: "Tomorrow when the world will have to be organized for peace and freedom, the United States of America will find France at her side."

During the next visit, in 1945, victory in Europe having been won, New Yorkers saw another De Gaulle, warm, human, deeply moved by the tribute of the 2 million inhabitants who cheered him. History repeated itself yesterday, when General de Gaulle said he was "profoundly moved." So was Foch in his time. So was Lafayette. So were we and our parents and grandparents all the way back to the day when President John Quincy Adams said farewell to the Marquis de Lafayette in words that were prophetic.

"We shall look upon you always," he said, "as belonging to us, during the whole of our life, and as belonging to our children after us."

LABOR-MANAGEMENT SUMMIT TALKS PLANNED

Mr. KEATING. Mr. President, the best way for people to get along is to get together.

This is perhaps nowhere more true than in the case of labor-management relations. It is for this reason that I am delighted to call attention this morning to the White House announcement that a series of high level labor-management summit conferences are to be held in the near future.

Although these conferences were organized and initiated by the Federal Government, participation will be limited to three ranking labor leaders and three top representatives of management. The Federal Government will not plan a role in this conference. This is as it should be.

The subject matter that it is intended will be covered at these several conferences involves a wide range of important issues. To mention a few: Overall labor-management relations, the rate and impact of automation, and the best ways to deal with increased foreign competition. These three subjects are of unlimited scope.

In particular, the matter of automation and the adjustment to automation through the negotiation and promulgation of work rules is, I believe, the most important and fundamental labor-management issue facing America. It has been much in the news of recent date. It is an issue which certainly merits the careful and high level attention of a conference, such as that being organized by the President.

Mr. President, I shall look forward to future developments with regard to these conferences. I know that I voice the opinion of a great majority of my fellow Americans in saying that I earnestly hope the results of these meetings will be fruitful and will promote and insure greater labor-management harmony and cooperation.

SENATOR BYRD OF VIRGINIA

Mr. BUTLER. Mr. President, since 1933 the U.S. Senate has been strengthened and sustained in its examination of fiscal affairs by a man who brooks no compromise—the senior Senator from Virginia [Mr. BYRD]. While others may be tempted to seek an easy way out or to juggle facts and figures, the distinguished and dedicated Senator from Virginia abides by one simple, old-fashioned rule, which is nonetheless applicable in 1960 for all its antiquity, the rule that taxes must equal expenditures.

In the March issue of Dun's Review, Mr. Paul Wooten underscores in a few hundred words the integrity and value of the efforts of the deceptively quiet Senator from Virginia. Mr. President, I suggest that, although his voice is often pitched low, it carries far and clear into the minds of many of his colleagues and fellow Americans.

I ask unanimous consent that the article from Dun's Review be printed in the body of the RECORD following my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A WARNING FROM SENATOR HARRY F. BYRD: "FEDERAL SPENDING MUST BE CURBED"

Like Belshazzar, Senator HARRY F. BYRD sees the handwriting on the wall. The ominous warning which concerns the southern conservative is this country's trillion-dollar public and private indebtedness.

"It is well to learn caution from the experience of others," says the Virginia Democrat. "In our time, we have witnessed the devastating experience of Germany, France, and other nations as a result of their departure from sound financial policies. A welfare state is a subterfuge for good government. It has brought to grief every nation in all history that has tried it."

"Preservation of fiscal soundness is not easy," BYRD concedes, "but the present situation cries out for the elimination of every postponable expenditure so that a substantial start can be made toward reducing the national debt. Such a course would be followed if it became apparent that it is the wish of the people. Business and professional men have a heavy responsibility in that connection. They are leaders in their communities and should be able to arouse the citizens to assert their influence. Congress will be quick to cut appropriations if it becomes apparent that the people want it done."

It was BYRD who sponsored the legislation that gave increased flexibility in the management of the public debt. It was this bill which postponed, for tax purposes, the recognition of capital gains and losses on the exchange of outstanding Treasury securities for new issues. Such advance refunding creates a minimum of market disturbance. It is recognized as an effective way of extending the maturity of the debt.

Some of the legislators who have been complaining loudest about high interest rates, BYRD points out, fail to mention that Congress is the principal offender. Had Congress removed the 4¼ percent ceiling on the interest rate for long-term bonds, Senator BYRD says, the Government would not have been forced to do its borrowing on a short-term basis. In forcing the Treasury to do its refunding in the short-term market, he believes, a great disservice was done small business and those who need short-term money.

Senator BYRD, who is chairman of the Senate Finance Committee, has long been a crusader for reduced Federal expenditures and for the more economical use of appropriations. He feels that the country has been more generous to veterans than it can afford, and he looks with concern on the progressive liberalization of social security.

Foreign aid expenditures particularly arouse the Senator's ire.

"Through the fiscal year to end June 30, the United States will have spent $73 billion in foreign aid since the end of World War II. That does not include the cost of the Korean war. It does not include our military expenditures abroad or our expenditures for NATO and other organizations for protection of the free world. All of this foreign aid expenditure has been added to the public debt for future generations to pay."

To date, the Senator points out, most of our so-called foreign aid has gone to what may generally be regarded as developed nations. The emphasis is now being shifted to underdeveloped and less-developed nations. These nations in the free world contain more than a billion people, and their needs for money are unlimited.

"Obviously, there is a limit beyond which the American taxpayer cannot be taken," Senator BYRD declares. "There are already areas where taxation is reaching the point of diminishing returns. Our Federal debt is nearly $300 billion.

"Our balance of payments with foreign countries has been in serious decline. Our gold reserves have been dwindling. If the strength and integrity of the American dollar is not maintained, we shall not meet our commitments at home or abroad."

GROWTH AND TAXES

The present level of taxation is a menace to the economic growth of the United States, BYRD warns.

"It would help ease our balance of payments difficulties if our prices were competitive with those of producers abroad. Our purchases abroad, foreign investments, and aid are some $20 billion more than we have earned overseas through export of goods and services. A fourth of our merchandise exports are agricultural products. One-third

of those exports are being paid for in soft currencies. Many of our products have been priced out of foreign trade. Confidence in the American dollar must be maintained."

The Government must, BYRD insists, stop nonessential and postponable spending, cease profligate spending which has strained our financial position, reduce the debt, and lighten the burden being piled on the next generation if we are to protect the fundamentals on which our form of government and our enterprise system are founded.

OPPOSITION TO FLYING OF PANAMANIAN FLAG OVER CANAL ZONE

Mr. BUTLER. Mr. President, a firm policy is needed in Panama regarding demands by nationalists in that Republic for transfer of the sovereignty of the Canal Zone from the United States to Panama. Accordingly, on February 16 I introduced S. Res. 275, declaring it to be the sense of the Senate that the Panamanian Government should not be allowed to fly its flag over the Canal Zone, and that inasmuch as the sovereignty of the Canal Zone had been transferred in perpetuity to the United States by virtue of solemn treaty, there should be no surrender of that sovereignty except with the advice and consent of the Senate through a treaty of equal dignity.

I must emphasize that to a Panamanian, as to any American, the flag is a symbol of the highest and most sacred significance, and that to allow the Panamanian flag to fly over the Canal Zone would not be idle gesture, as has been suggested by some experts, but would be interpreted by the Panamanians as confirmation on the part of the American Government of Panamanian claims to the Canal Zone.

Mr. President, my resolution was duly referred to the Foreign Relations Committee, where it is presently awaiting action. And action is needed. On May 8 presidential elections will be held in the Republic of Panama and the candidates for that country's highest office are filling the air with revelations and rhetoric. These worthy gentlemen are talking of Panamanian sovereignty over the Canal Zone and of the possible nationalization of that great international seaway. Mr. President, we should set these gentlemen straight immediately about the Canal Zone.

I have pressed the Foreign Relations Committee for action on my resolution before the Panamanian presidential elections of May 8. A recent article in the Star and Herald of Panama on page 1 indicates the concern of the thousands of American citizens in the Canal Zone in this matter. I ask unanimous consent to have this article printed into the body of the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Star and Herald, Apr. 8, 1960]

SENATOR BUTLER ASKS ACTION TO BAN REPUBLIC OF PANAMA FLAG ON CANAL ZONE—URGES VOTE BEFORE REPUBLIC OF PANAMA ELECTIONS—SENATOR CLAIMS DELAY WOULD CREATE FALSE HOPES IN PANAMA

WASHINGTON, April 7.—Senator JOHN MARSHALL BUTLER said today the Senate Foreign Relations Committee has been asked to act on his resolution to prohibit the flying of the Panamanian flag in the Canal Zone.

In a letter to Senator J. WILLIAM FULBRIGHT, chairman of the Senate Foreign Relations Committee, Butler said he introduced the resolution February 16 and that action is imperative before the Panamanian presidential election on May 8.

"I believe," said BUTLER, "that if Senate action is delayed until after the elections, the promises of Panamanian politicians will raise cruelly false hopes in the people of Panama that their flag will be permitted to fly over the zone."

BUTLER said he introduced the resolution following a statement by Panamanian President Ernesto de la Guardia, Jr. that "the placing of our flag there (in the Canal Zone) is only a logical end of ratifying Panamanian sovereignty."

"I feel," said BUTLER, "that the Canal Zone is sovereign territory of the United States, acquired by constitutional means. I further feel that to permit the Republic of Panama to fly its flag over the Canal Zone would be an unconstitutional encroachment upon our sovereignty."

BUTLER'S resolution would declare it to be the sense of the U.S. Senate that there shall be no executive surrender of the U.S. sovereignty over the Canal Zone either by permitting the flying of the Panamanian flag over the zone or otherwise. It says that since the sovereignty of the United States over the Canal Zone was created by treaty there should be no surrender of that sovereignty without treaty of equal dignity.

"I believe that if Senate action is delayed until after the elections the promises of the Panamanian politicians will raise cruelly false hopes in the people of Panama that their flag will be permitted to fly over the zone," BUTLER wrote FULBRIGHT.

AMENDMENT OF FEDERAL COAL MINE SAFETY ACT

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the hour of 2 o'clock arrives, the pending business be continued as the pending business at that time.

The PRESIDING OFFICER (Mr. YOUNG of Ohio in the chair). Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BYRD of West Virginia in the chair). Without objection, it is so ordered.

The committee amendment is open to amendment.

Mr. COOPER obtained the floor.

Mr. CLARK. Mr. President, may I ask the distinguished Senator from Kentucky to yield, to enable me to make a brief statement on the bill?

Mr. COOPER. I yield.

Mr. CLARK. Mr. President, on behalf of the Committee on Labor and Public Welfare I reported favorably the bill to amend the Federal Coal Mine Safety Act, which is now before the Senate for action. I shall discuss the bill briefly, so that Senators may be familiar with its provisions. However, I understand that the distinguished senior Senator from Kentucky desires to offer an amendment for himself and several other Senators, and that it would be more convenient for him if he were permitted to offer the amendment at this point. I am, therefore, happy to yield to him now, but I shall make a fuller explanation of the bill after the Senator from Kentucky has completed his remarks.

Mr. COOPER. I thank the Senator from Pennsylvania.

Mr. President, I call up my amendment designated "2–8–60—A," offered on February 8 of this year for myself, the distinguished senior Senator from Virginia [Mr. BYRD], the distinguished junior Senator from Virginia [Mr. ROBERTSON], and my colleague, the distinguished junior Senator from Kentucky [Mr. MORTON].

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 2, line 3, it is proposed to delete the word "may" and insert in lieu thereof the word "shall."

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Kentucky.

Mr. CLARK. Mr. President, would the Senator from Kentucky, for the purpose of the RECORD, be willing to make a brief statement as to why he considers his amendment desirable?

Mr. COOPER. Mr. President, S. 743 as reported by the committee removes the exemption now accorded to title I mines, the so-called small mines, which employ 14 or less persons, and places those mines under the Federal Coal Mine Safety Board for the purpose of Federal inspection and for all other purposes under the Federal Coal Mine Safety Act, as amended in 1952, except as other amendments are provided in S. 743.

Paragraph (b)(1) of the committee amendment provides:

> The Director may, by regulation established after reasonable notice and opportunity for hearing to interested parties, modify or make inapplicable any provisions, or part thereof, of section 209 to any mine or class of mines when he finds that such provision or part thereof does not substantially contribute to the safety of the men working in such mines covered by such regulations.

The amendment would substitute "shall" for "may," thus making it mandatory upon the Director to hold hearings and to make such modifications of section 209 as he finds are applicable to title I mines, particularly if the regulations now provided under section 209 do not contribute to the safety of men working in the small mines.

The debate we had for 2 years in the committee was upon the issue as to whether the regulations now contained in section 209 were actually applicable to smaller mines, from the standpoint of contributing to the safety of the employees of the mines.

The amendment I offer for myself and my colleagues directs the Director to conduct hearings and to make changes in section 209, to apply to title I mines only those provisions, and no more, that are actually required for mines safety. He certainly must look into the question of whether or not the regulations pro-

vided under section 209 would be so burdensome as to close down small mines without adding to their safety.

I sincerely hope that the Senator from Pennsylvania, who was the chairman of the subcommittee which conducted the hearings—which he did in a very fair, comprehensive way, will consent to accept the amendment.

Mr. LAUSCHE. Mr. President, will the Senator from Pennsylvania yield?

Mr. CLARK. I yield.

Mr. LAUSCHE. I desire to commend the Senator from Pennsylvania for his efforts in the general field of improving the safety which will attend the miners in their work in the coal mines. I hope the amendment offered by the Senator from Kentucky will be accepted. I believe the combination of the provisions contained in the bill presented by the Senator from Pennsylvania and those in the amendment offered by the Senator from Kentucky will, generally, achieve the principal objective sought. On the whole, I believe the bill as amended will promote the development of the coal mining industry and, in a maximum degree, will insure the safety of the miners who work in the coalpits.

Mr. CLARK. I thank the Senator from Kentucky and the Senator from Ohio for their kind words.

The amendment which has just been offered by the Senator from Kentucky for himself and three other Senators is the result of a number of discussions and conferences in which we who are interested in the bill have been engaged for a period of more than a year.

Speaking for myself, I am quite sympathetic with the problems raised by the bill as originally drafted for the operators of the smaller mines, those which employ 14 or fewer individuals. They are very much concerned that the Federal coal mine safety requirements which will now be extended to them on a mandatory basis will deprive them of their livelihood, and will be enforced against them in perhaps a discriminatory manner. I do not share that concern, which I believe to be without too much foundation.

On the other hand, it is very clear that many small mines, as we call them, which employ 14 or fewer individuals, are family enterprises, where the normal relationships between employer and employee and the State, in terms of health and safety, do not apply. After talking with a number of Senators who are members of the committee, and with others who are desirous, through their sponsorship, to have the bill enacted, I am authorized to accept, and I am happy to accept, the amendment offered by the senior Senator from Kentucky, the senior and junior Senators from Virginia, and the junior Senator from Kentucky.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Kentucky.

The amendment was agreed to.

Mr. COOPER. Mr. President, will the Senator from Pennsylvania yield for a moment?

Mr. CLARK. I am happy to yield.

Mr. COOPER. I intend to speak later on the bill, but now that the Senator from Pennsylvania is about to begin his explanation of the bill, I wish to make this statement.

The Committee on Labor and Public Welfare considered S. 743 and S. 3290, an identical bill, during the 2 years 1958 and 1959. It spent a great deal of time discussing every aspect of the bill. All of us were concerned about the safety of the men who work in the mines. Anyone who lives in a coal mining State, who has ever been in the coal mining business, or who has worked in a mine, knows that mining is a perilous occupation, but also one of the most necessary and useful for our country.

The distinguished senior Senator from Pennsylvania in his capacity as chairman of the subcommittee conducted thorough hearings. Although I was not a member of the subcommittee, I attended the hearings. I found the Senator from Pennsylvania to be absolutely fair and objective in his approach to the bill, and his willingness to consider amendments to protect the small mines even though he was a sponsor of the bill which was introduced.

I make the same statement about the other members of the committee, one of whom I see on the floor at this time; I refer to the distinguished senior Senator from West Virginia [Mr. RANDOLPH], who worked hard and with fairness in the bill. I do not remember any instance in my service on the Committee on Labor and Public Welfare in which more thorough consideration was given to a bill. The distinguished chairman, Senator HILL, and other members also worked very hard to report a fair bill. One of them was the Senator from Oregon [Mr. MORSE], who is a fine lawyer, and one who is always concerned with due process; and I could name the other Members.

Mr. CLARK. I thank the Senator from Kentucky.

Mr. President, let me point out that the Senator from Kentucky has made a real contribution in the form of the bill as it comes to the floor of the Senate. As a result of his interest in the small-mine workers of his State, the bill has been drastically rewritten; and I think it is now fairer and better than the bill I originally introduced with the cosponsorship of several of my colleagues. A great deal of the credit for the improvement of the bill is due to the Senator from Kentucky [Mr. COOPER]. He did very fine work in that connection, and we were most happy to have him sit with the subcommittee. He made a very real contribution to the final product.

Mr. RANDOLPH. Mr. President——

Mr. CLARK. I yield to the Senator from West Virginia.

Mr. RANDOLPH. Mr. President, it is appropriate at this point—even though later I shall address myself to the subject matter of the proposed legislation—to join with my esteemed colleague, the Senator from Pennsylvania, in paying genuine tribute to the Senator from Kentucky [Mr. COOPER] for the objectivity with which he approached this assignment, which was given him—as he has indicated—not as a member of the subcommittee, but as a spokesman for a considerable number of groups and individuals in reference to the proposed legislation now under consideration here.

Although, at the outset, we had perhaps deeper differences than we might have had, the hearings were conducive to a better understanding of the problem of providing for the safety of the coal miners of the United States who bring from the earth the coal which is so beneficial to our expanding economy.

So, Mr. President, not to labor the point, but because I wish to join the Senator from Pennsylvania in his sincere remarks, I would say that, by and large, what was done by the subcommittee was constructive, even though we had our different points of approach.

Mr. CLARK. I thank the Senator from West Virginia.

Mr. President, I should like to turn to a relatively brief explanation of the provisions of the bill.

This bill is a successor of one which was introduced last year by the Senator from Montana, Mr. Murray, the Senator from Colorado, Mr. Carroll, the Senator from Utah, Mr. Moss, the Senator from Wyoming, Mr. McGee, the Senator from West Virginia, Mr. Randolph, the Senator from Indiana, Mr. Hartke, the Senator from Pennsylvania, Mr. Scott, the late Senator Langer, of North Dakota, the Senator from Alaska, Mr. Gruening, the Senator from Wyoming, Mr. O'Mahoney, the Senator from Illinois, Mr. Douglas, and myself.

The purpose of the bill, as originally introduced, was to extend the coverage of the Federal Coal Mine Safety Act of 1952 to small mines which employ 14 or fewer persons. As originally introduced, the bill was only 3 lines long; it merely struck out the exemption, in subsection (b) of the Federal Coal Mine Safety Act, for mines employing 14 or fewer persons.

Rather extensive hearings were held; there are 258 printed pages of them. Copies of them are available to all Senators.

As a result of the hearings, the bill was rewritten into its present form.

When the Coal Mine Safety Act was passed, 8 years ago, there was opposition by many operators, of mines both large and small, who contended that the enactment of such a safety law would work an economic hardship on them. That led to a compromise under which small mines employing 14 or fewer persons were exempted from the provisions of the Federal law.

I should point out that during the period since World War II, the economics of the coal industry have shifted rather substantially. The larger mines have been mechanized. Their production has been increased. The number of persons employed in them has been drastically reduced; and the products of these larger mines are in substantial competition across the country with the products of the small mines which, under the terms of the 1952 act, were exempted from Federal safety requirements.

The provision exempting mines employing 14 or fewer men from the coverage of the 1952 Safety Act is a purely arbitrary one. As the Director of the

Bureau of Mines, Marling J. Ankeny, stated in his testimony before the subcommittee:

> There is no logic to it (the 14-man limit) whatever. It was a matter of compromise.

Since the 1952 act went into effect, both the number of fatalities and the fatality rate per man-hour of exposure in the large mines covered by its provisions have fallen markedly, although the number of fatalities and the fatality rate in the small mines have remained approximately the same.

Bureau of Mines statistics indicate that in recent years the fatality rate in small mines has been more than double the fatality rate in the large mines covered by the Federal law.

There are known to exist in title I mines serious safety violations which State safety laws have not succeeded in eliminating.

I now quote from the testimony which Director Ankeny gave before the committee:

> According to the records of the Bureau of Mines for 1958, 13,869 violations of the mandatory provisions of the act were observed in 5,484 title I (employing 14 or less) mines. This means that during this year there were on the average about 2.5 such violations reported on each title I mine.

Mr. President, no one contends that the enactment of this bill will automatically reduce the fatality rate per man-hour of exposure in small mines to the rate prevailing for the larger mines which now are covered by the Federal law. However, it is the contention of the sponsors of Senate bill 743 that the enactment of the bill will inevitably improve the safety conditions under which those who work in the small mines have to labor.

Again I quote from the testimony which Mr. Ankeny gave when he summarized his support of Senate bill 743:

> I support S. 743 because title I mines, as indicated by our inspection of them, contain disaster hazards which will in a number of instances lead to both major disaster and disaster-type accidents, and the passage of S. 743 would enable Federal inspectors to at least reduce the number of these hazards in the small mine, in the title I mine.

Mr. President, the committee amendments provide certain procedural aids and safeguards for those who operate small mines so as to assure that the economic impact on them from the enactment of the bill will be minimal.

First, the Director of the Bureau of Mines would be authorized to issue regulations modifying or making inapplicable any provision of section 209 of the original act, the section which recites the detailed requirements, whenever the Director of the Bureau of Mines finds that such provision does not substantially contribute to the safety of the men working in small mines.

I interject here to say that the amendment offered by the Senator from Kentucky, which has just been accepted on behalf of the committee, would make it mandatory for the Director to establish, after notice and hearings to interested parties, rules and regulations which would modify or make inapplicable any part of the requirements set forth in section 209 when he finds that such provisions do not substantially contribute to the safety of the men working in the mines. In other words, we have made action by the Director mandatory, instead of permissive.

Mr. GORE. Mr. President, will the Senator yield?

Mr. CLARK. I am happy to yield to the Senator from Tennessee.

Mr. GORE. First, I wish to congratulate the able senior Senator from Pennsylvania upon the presentation of the bill and upon the address he has made with respect to it. It is a notable achievement, of which he has every right to be proud. I, too, am proud of it for him.

Perhaps I am the only Member of the Senate who has actually administered mine inspection and mine safety programs on the State level. Before coming to the Congress it was my privilege to serve as Commissioner of Labor of the State of Tennessee. The mining inspection and safety program, workmen's compensation, and other programs relating to the mining system, are administered in Tennessee by the Labor Department. From my experience, I can bear witness that inspection, with adequate technical equipment for inspection, can result in the saving of lives and the prevention of accidents. Unfortunately, all States do not at all times give adequate enforcement to their own mine inspection laws and programs.

As I understand the Senator's bill, no requirement would be necessary except that which does promote the safety of mine operations. Is that correct?

Mr. CLARK. The Senator is correct. I should like to thank him for his kind words. I appreciate his joining in this debate. I know that his experience will be very helpful to our colleagues when we come to vote on the bill.

Mr. GORE. I shall join in support of the bill, and whatever assistance I can render, either in debate or in personal conversation, will be rendered with pleasure.

Mr. CLARK. I thank my friend for his helpful comments.

Mr. President, I turn now to the second amendment which was made by the committee to the original bill to safeguard the interests of small mine operators. This second change would permit the small mine operators to appeal to the Bureau of Mines or to the Coal Mine Safety Board of Review from the finding by a Federal inspector of a violation. The operators would not have to wait until a closing order had been issued against the mine, as is now the case when safety infractions occur in large mines.

Mr. President, this amendment to the act results from the fear expressed by a number of operators of smaller mines that the Federal inspection system would be used arbitrarily against them; that an order would be issued closing down their mines for various technical violations of the law, and they would not have an adequate opportunity to appeal and have that appeal determined until many days, perhaps months, after a mine had been closed and customers of the mine had been diverted to other sources for obtaining their coal.

The subcommittee was convinced that this right of prompt appeal was a wise additional measure and that the appeal could be conducted without jeopardizing the safety of the men working in the mine.

The third amendment which the committee made to the original bill would require the Federal Coal Mine Safety Board of Review to hear appeals by small mine operators at the county seat of the county in which the mine in question was located or at any other place reasonably convenient to the operator of the mine.

This amendment results also from a fear on the part of the small mine operator that he would be dragged, on short notice, to Washington where he would have to defend the continued operation of his mine in a strange arena, far from the locality where the mine was being operated, and at substantial expense to him.

Recognizing that many of these small mine operators have limited financial resources, and believing further that it would be wise to have the hearing of the appeal in the community in which the mine was being operated, the committee accepted the suggestion which was proposed by the Senator from Kentucky and other Senators; and it will now be necessary for the appellate tribunal to come into an area reasonably convenient to the location of the mine, and convenient to the operator of the mine, to hear the appeal.

The fourth change made in the bill, as reported, would prevent Federal inspectors from closing a mine employing seven or fewer employees for a violation of section 209 of the present act unless the Federal inspector's finding is concurred in by a State inspector or by an independent inspector appointed by a Federal district court of the district in which the mine is located.

It will be difficult for Members of the Senate who do not come from States where coal mining is a major industry to appreciate the need for this provision, yet all of us on the committee were convinced it was a wise addition to the bill. Mines are being operated in practically all the coal-producing States on a family basis. The head of the family and perhaps a brother, or brother-in-law, or a son, or a father, or some of the cousins, will go up on the hill back of the house in which the family lives, drive a tunnel into the side of the hill, strike a vein of coal close to the surface, and operate this as a coal mine. Technically, it is a coal mine. Actually, it is an informal family operation which is very far removed, indeed, from the highly mechanized, intensely organized operation of deep shaft coal mines by large corporations.

Many of these small businessmen were concerned, again, that the great Federal bureaucracy would come to the mines—without any real understanding of the human, family, and business problems—and would issue regulations closing the little enterprises on the hills behind the houses, applying the same stringent requirements to such little tunnels as the Federal bureaucracy would apply to a large coal mine op-

erated by one of the big corporations of the country.

Therefore, quite wisely, I think, the operators of these small family enterprises were given the protection of being able to call in, to redress the balance, a State inspector, who would be more familiar with the social and economic conditions in the vicinity, and perhaps somewhat more sympathetic than someone from a Federal bureau with respect to the problems with which the operator of such a mine would have to deal.

It was also provided that if it were impossible, under the circumstances in the State, to obtain a State inspector, an independent inspector could be appointed by a Federal district court in the district in which the mine was located, so as to assure that a wholly impartial arbitrator would hear the controversy between the Federal mine inspector and the operator before the little family business or small business was driven to the wall by what some feared would be an unduly harsh finding by a Federal inspector.

Mr. President, these are the major changes which were made by the committee in the original bill. Every one of them was put into the bill in an effort to be scrupulously fair to the operators of the smaller mines. No one of them, I think, would cripple or would in any way impinge upon the safety provisions of the bill. Each one of them, on the other hand, I think, does provide for safeguards to protect American small business. I hope the Senate will look with favor on the provisions contained in the bill.

Mr. RANDOLPH. Mr. President, will the Senator yield?

Mr. CLARK. I am happy to yield to the Senator from West Virginia.

Mr. RANDOLPH. I am appreciative that the diligent senior Senator from Pennsylvania yields to me so that I may make an observation.

In connection with the administration of the Federal Coal Mine Safety Act, I believe I am correct in stating that there was no evidence, during our subcommittee hearings, that the administration of the act had been other than satisfactory. Is that correct?

Mr. CLARK. The Senator is quite correct. The fears of those individuals who entertained fears were all anticipatory, and, to my way of thinking, in many respects were quite unjustified; yet I think the committee wanted to be sure it was being fair.

Mr. RANDOLPH. I share the expressions of the Senator from Pennsylvania with reference to the reasoning by the members of the subcommittee and of the committee in accepting the proposed changes, which the Senator has interpreted so well for the Senate.

Mr. CLARK. I thank the Senator from West Virginia.

Mr. President, I have two brief additional points to make, and then I shall be happy to yield the floor, in order that my colleagues may speak with respect to the bill.

The additional cost of the Federal inspection provided for in the bill will be $400,000 a year. This is a pretty modest amount, but in view of the rather critical position which the administration has taken toward the expenditure of as much as 1 cent more in the current budget, I am sure my friends on the other side of the aisle and some of my friends on this side of the aisle will be happy to know that the administration has approved this bill and supports it, despite the fact that it calls for the expenditure of this additional sum of $400,000 to properly enforce the increased responsibility to be given by the act.

Finally, Mr. President, I should like to say a word through the RECORD to my good constituents, the operators of the smaller mines in Pennsylvania. They have been seriously concerned by the present effort to amend the act. They have felt this was an effort by the larger coal mines and, to be perfectly frank, by the United Mine Workers of America, to put the smaller and nonunion mines out of business. They came to Washington, D.C., and testified. They wrote me many letters. I have spent a good deal of time in conversation with these worried constituents of mine.

I should like to assure my constituents that not only I but also my Republican colleague [Mr. SCOTT] and the members of the subcommittee and of the full committee have given very careful attention to the objections they raised. The provisions of the bill, which I have recited at some length, are a reflection of our concern that they should be permitted to continue in business, and to continue in business at a profit, without interference from the large coal mines or the men who work in the large coal mines, so long as they maintain proper safety provisions.

The need for those proper safety provisions is perhaps well evidenced by the unhappy tragedies which occurred in Maryland and Kentucky, earlier this month. Three men were killed in a small mine cave-in near Kitzmiller, Md., just a few days ago; and three men were killed at almost the same time in an unfortunate mine fatality due to a roof fall in a small mine near Houckville, Lawrence County, Ky. In both cases only three men were employed in the mines, so all miners working in both mines were killed. The deceased were all miners of many years' experience.

One can hope that had the pending bill been enacted into law and had timely Federal mine safety inspections been made these unhappy tragedies would not have occurred.

The State inspectors had not been able to inspect and to require the proper precautions to be taken. I suggest that this kind of tragedy, which is occurring every month because appropriate legislation has not been enacted into law, may well be prevented if the Senate will, this afternoon, pass and send to the House for final action the bill which is now pending.

Mr. DOUGLAS. Mr. President, will the Senator yield?

Mr. CLARK. I yield to my friend from Illinois.

Mr. DOUGLAS. I congratulate the Senator from Pennsylvania for serving as the chief sponsor of the pending bill. I was very happy to join him as a cosponsor.

As the Senator may remember, two terrible coal mine accidents in the State of Illinois helped to lay the basis for the 1952 act, namely, the disaster at Centralia in 1948, and the disaster at West Frankfort in 1951. Those two accidents helped to trigger the 1952 act, which applied to mines employing more than 14 persons. With respect to such mines, I think the record has been a very good one. Power is given to the Federal coal mine inspectors to close a mine if it is markedly unsafe.

However, a large percentage of accidents occur in mines with fewer than 14 employees. If a man is killed, it does not make much difference whether he is killed in a small mine or a large mine.

Mr. CLARK. It is much the same to him.

Mr. DOUGLAS. That is correct.

I notice, in the revised and amended text of the bill, and in the report of the committee, that every effort has been made to protect the operators of small mines. As I understand, it is provided that for mines which employ fewer than 14 miners, there is a possibility of appeal.

Mr. CLARK. The Senator is correct.

Mr. DOUGLAS. The appeal to be heard at the county seat where the mine is located, so that operators and miners will not have to travel great distances.

Mr. CLARK. The Senator is correct.

Mr. DOUGLAS. Is it furthermore true that in the case of the extremely small mines the Federal mine inspector may not close a mine unless his decision is concurred in by the State mine inspector?

Mr. CLARK. Or by an independent inspector appointed by the judge of the Federal court of the district in which the mine is located. The provision referred to applies to violators of section 209 of the act.

Mr. DOUGLAS. So that every effort has been made to protect the operators of small mines against unreasonable action by the Federal mine inspectors.

Mr. CLARK. The Senator is correct.

Mr. DOUGLAS. At the same time, an effort is made to protect the lives and the safety of the coal miners who work in such mines.

Mr. CLARK. That is the purpose.

Mr. DOUGLAS. I congratulate the Senator from Pennsylvania and the other members of the committee for reporting the bill. I hope it will be passed unanimously.

Mr. CLARK. I thank my friend for his helpful comments. I am happy that he has associated himself as a cosponsor of the pending legislation.

Mr. President, unless other Senators desire to question me, I yield the floor.

Mr. ROBERTSON. Mr. President, I feel gratified that the distinguished author of the bill was willing to accept the amendment offered by our colleague from Kentucky [Mr. COOPER] in behalf of the two Kentucky Senators and the two Senators from Virginia. We feel that that measurably improves the bill; but, unfortunately, I still cannot bring myself to support it.

I am opposed to the pending bill, S. 743, because I feel it would threaten the continuation of several thousand small business operations and add to an already acute unemployment problem in coal mining areas without serving the practical ends of safety.

The Executive Office of the President and the Department of the Interior both have indicated willingness to accept as a substitute for this bill S. 2403, which would authorize a thorough study of mine safety problems and the best way of dealing with them. I hope that the Senate will follow that course and permit further investigations before we extend Federal power to another area of small business and take away the authority which now is exercised by State agencies responsible for safety measures in mines employing not more than 14 persons.

It is significant, I believe, that I have not received a single communication from an employee of a small coal mine endorsing S. 743 as a measure which would benefit him. On the other hand, I have received dozens of letters from operators of these small mines who say passage of this bill will threaten their business existence and who charge that this legislation, regardless of the fine motives of its sponsors, will serve only to put them out of business because they cannot afford to buy the type of safety equipment that would be required and needed only in deep shaft or gassy mines.

I think it is significant, also, that Members of this body from the States—Virginia and Kentucky—in which a majority of the small mines are located are opposing S. 743 and that it is being sponsored by representatives of States where most of the coal mining operations are on a large scale and would not be directly affected by this legislation.

The Governor of Virginia and the officials in my State who are responsible for mine safety not only see no need for such a law as S. 743 would provide, but they also resent the implication that Virginia will not take adequate precautions to protect its mineworkers and they are opposed to this intervention by Federal authorities.

Organizations of businessmen in the mining areas of my State, who are deeply concerned about the welfare of local residents, see no benefit to miners in this legislation, but have expressed their fear of its economic effects.

It should be recognized that in many small mining operations there is not the dividing line between labor and management which exists in larger enterprises. The owner of the mine and members of his family are likely to be active workers in the operation. They are exposed to the same dangers as the few outside workers they employ. If they neglect proper safety precautions, they risk their own lives. It is these men who have told me they see no virtue but much danger in S. 743.

They would not mind any regulations which were needed and especially adapted to their type of operation and they would welcome the type of study proposed in S. 2403, especially if it led to educational efforts that would promote safety. But they say it is as inappropriate to saddle the little mines with the same type of regulation now applied to the big mines as it would be to impose on owners of motorboats all the safety restrictions applied to ocean liners.

The Federal Coal Mine Safety Act of 1952, which S. 743 would broaden to cover mines employing less than 15 persons, did not attempt to deal with day-to-day types of minor accidents, which were left for State regulation. This was positively stated in a letter dated July 18, 1958, signed by Assistant Secretary of the Interior Royce A. Hardy, who said:

> Congress reserved to the jurisdiction of the States the responsibility for control of the day-to-day type of accidents.

This letter quoted House Report 2368 of the 82d Congress, 2d session, dated June 30, 1952, as saying the bill passed that year "is designed to prevent the causes of these major disasters," and Mr. Hardy added:

> The proposed legislation (similar to S. 743) is also designed to prevent these causes and extends coverage to mines employing less than 15 men.

And yet, at the time that letter was written there had been in all the years for which the Bureau of Mines has records, only two disaster-type accidents involving the small mines. Since then there has been a third accident involving nine persons. But, with these exceptions, most of the small mine accidents have been of the type which Federal legislation never was designed to cover.

I know that statistics have been inserted in the RECORD of this body listing the number of accidents occurring in small and in large mines and purporting to show the need for this legislation. Those figures are challenged, however, by the small mine operators as being of doubtful accuracy and in any case highly misleading.

The figures which have been submitted for the record are presented as "subject to revising." That phrase might be accepted as meaning merely that final figures would require a slight adjustment but previous experience has shown that where this particular type of statistic is concerned, "revising" may be a major operation. They are estimates, rather than preliminary and not quite complete reports and what may happen to them is illustrated by the fact that in March 1958 the Bureau of Mines released statistics purporting to show a fatality rate in class I—small—mines of 4.24 per million man-hours during the year 1957; in April 1958 the Bureau revised its figures to show this 1957 rate was 3.23 and in January 1959 it issued another revision, bringing the 1957 rate down to 2.55.

Information obtained from State authorities in Virginia and Kentucky has shown that the Federal agency seriously underestimated the number of men employed in small mines in those States and it may be presumed that figures from other States are equally inaccurate. Of course, the understatement of production figures results in a higher apparent accident rate when the calculation is made by comparing the number of accidents with the number of tons produced.

Also, in these statistics the accident rate attributed to the smaller mines is exaggerated because the larger, mechanized mines produce more coal per worker and, therefore, the per capita exposure in relation to the amount of coal mined is less.

A fairer comparison would be based on the number of accidents compared to the number of man-hours worked, but even these figures would be unreliable unless the reporting agency had full information—which the Federal Bureau of Mines obviously does not have—on the number of men employed in the small mines.

The difference which a change in the basis of statistics from production to man-hours might make is illustrated by the fact that in Virginia class II—large—mines produce about 60 percent of the coal, but class I—small—mines employ about 60 percent of the workers to produce the remaining 40 percent.

Even if accident figures applied to class I mines are accepted at face value, however, the proponents of S. 743 will have difficulty showing that its passage would improve the situation, in view of the fact that the accident rate in large mines, which have been subject to this type of regulation since 1952, has been increasing rather than declining.

Evidently there is need for further study of means to prevent accidents in large mining operations and until that has been done and until more accurate data has been obtained on small mine operations, there is no justification for putting these small mines under Federal supervision.

I hope, therefore, that S. 743 will be rejected.

Mr. President, I yield the floor.

TWENTY-FIFTH ANNIVERSARY OF THE SOIL CONSERVATION ACT

Mr. ELLENDER. Mr. President, 25 years ago today the late Franklin D. Roosevelt, President of the United States, signed into law the first soil conservation act in the history of our country.

The act, which received the unanimous approval of the Congress, declared soil and water conservation on farm, grazing, and forest lands of the Nation to be a permanent policy of the Congress of the United States.

It also created the Soil Conservation Service in the Department of Agriculture to exercise the powers conferred by the law.

Today I wish to pay tribute to the Soil Conservation Service for the admirable job it has done during the first quarter-century of its existence. More progress has been made in advancing soil and water conservation on the farmlands of America during the past 25 years than in all the previous years of our existence.

One of the most formidable obstacles that faced the dedicated employees of the Soil Conservation Service was the need to change the attitude of millions

of people about the need for conserving our land and water resources.

All through the history of our young Nation, we have been blessed with an almost unlimited supply of land and water. But today, faced with the prospect of an ever-growing population, we must realize that there is a limit to the bountiful gifts that nature has given us. We must look to the future.

The Soil Conservation Service has done a splendid job in this direction. It has convinced thousands of farmers of the benefits of conserving our soil and water resources and has followed through in assisting them in getting on with the job.

Of the many factors which have contributed to this success, three are outstanding:

First was the development of the concept of using a scientific inventory of the soil on each farm to determine its capability for safe use. This has made it possible for farmers to prepare and apply, with technical help, practical conservation plans for their land—plans which are scientifically sound.

Second was the development by the Soil Conservation Service of a new kind of professional technician—the soil conservationist. This has made it possible to bring to coordinated focus on a single farm, techniques representing a combination of the physical, biological, and social science.

Third was the creation of local soil conservation districts through which the services of the Soil Conservation Service are made available to farmers. This has made it possible to bring the full benefits of modern conservation technology to individual farms under local control and guidance according to local needs and desires.

The growth of the soil conservation district movement in the United States is one of the phenomenal developments of the past quarter century.

The use of soil conservation districts was originally conceived as a mechanism whereby Federal assistance could be made available to farmers through a unit of State government. This thought was nurtured and fostered. In 1937 a model State soil conservation district law was transmitted to the Governors of all States by the President, urging that such laws, adapted to local conditions, be enacted.

In the short span of time that has since elapsed, every State legislature has enacted such a law. Some 2,865 soil conservation districts have been organized by local people under these laws. They include within their boundaries some 95 percent of all the farms and ranches in this Nation. Nearly 2 million farmers are now cooperating with local soil conservation districts in practicing conservation farming.

Each soil conservation district has a program for solving the soil and water conservation problems within its boundaries. In addition to the help of the Federal Government, all State legislatures are now appropriating State funds to help the districts carry out their programs. Some county governments are providing needed resources and many private organizations and individuals are making contributions.

Today the soil conservation district is the central source of help and information about soil and water conservation in nearly every community in the Nation.

Some 14,000 private citizens are providing the local leadership for the functioning of these districts. I would venture a guess that since the inception of this program more than 50,000 persons have served their fellow citizens in this leadership capacity.

In my judgment, this represents the most successful experiment in agricultural democracy in the history of the United States.

But what of the future? Much work remains to be done if we are to adequately preserve our most precious natural resources—soil and water—so that they can be of benefit to our grandchildren, and to their grandchildren.

I have every reason in the world to believe that the hard-working people who give so freely of their time and energy to provide leadership in the soil conservation district movement will continue to do so in the future.

For what they have done in the past, and for what they will do in the future, they deserve our tribute, and the everlasting gratitude of millions of American citizens as yet unborn—the people who will eventually profit from their fine work.

On this occasion of the 25th anniversary of the Soil Conservation Service, it is appropriate that we publicly commend the work which has been done by the corps of soil and water conservation technicians in the Soil Conservation Service.

Therefore, as chairman of the Senate Committee on Agriculture and Forestry, I would like to say "well done" to the men and women of the soil conservation districts, and my sincere hope that they will continue their efforts to insure the economic welfare of our Nation in the years to come.

Mr. COOPER. Mr. President, I am very glad that the distinguished Senator from Louisiana has made his statement on the Soil Conservation Act, and its great success in the years which have passed since its inauguration, and also his word of appreciation for the many soil conservation districts throughout the United States.

Mr. ELLENDER. I thank the Senator.

Mr. MURRAY. Mr. President, I should like to pay tribute to the farmers and ranchers of America and to the Soil Conservation Service for 25 years of notable accomplishments in soil and water conservation.

Our national soil and water conservation program began in 1935—on April 27—when we of the 74th Congress enacted Public Law No. 46, an act that declared soil and water conservation to be a permanent national policy and established the Soil Conservation Service.

It was my privilege to be a part of this development from the very beginning. I came to the Senate on January 3, 1935, when the 1st session of the 74th Congress began, having been elected by the people of the great State of Montana November 6, 1934, to fill the unexpired term of the late Senator Thomas J. Walsh.

Just a few months before my election, on May 11, 1934, the Nation had been startled by a tremendous dust storm that originated in the Great Plains and blew in a great cloud eastward over Washington, D.C., and on out to sea. Nothing like this had ever happened before in the United States.

In March 1935, when we of the Senate Public Lands and Surveys Committee were holding hearings on H.R. 7054, another great dust storm roared out of the West. The skies took on a copper color. The air became heavy with silt from 2,000 miles away.

We watched it from the windows of the Senate Office Building. Then we turned to listen again to the man who had been testifying all morning on the need for a national policy and program to protect our soil resources. That man was Hugh H. Bennett, whose pleas for erosion control had been largely unheeded for more than 25 years.

We had seen the devastating effects of land misuse with our own eyes. We acted swiftly. The House bill we had been considering speedily became Public No. 46, without a dissenting vote in either the Senate or the House, and a national conservation program, plus a new permanent agency to carry it out, was thus created.

That legislative act was the first of its kind in the world, and I am indeed proud that I assisted at its birth. It had been my privilege to help develop this program through its early stages, and into full-scale operations; and now, 25 years after its birth, I am still an anxious godfather. I intend to remain one.

Hugh Bennett, the "father" of soil conservation, became the first chief of the Soil Conservation Service. No other man could have even been considered for the job. Hugh Bennett, the "Messiah of the Soil" who stirred us into action, built from scratch what is now the greatest soil and water conservation technical organization in the world. He has seen his concept of using each acre of land within its capability and treating it according to its needs spread to more than 2,800 communities of the Nation, and to many other countries that have sent men here for training.

It was my privilege to work closely with Dr. Bennett, now retired for the past 8 years, and I salute him as a man to whom America owes a great deal; certainly more than can be put in words. And it has also been my privilege to be closely associated with his successors, the late Dr. Robert Salter, who succeeded Dr. Bennett, and the present Administrator, my friend Don Williams, who came up through the ranks of the Soil Conservation Service to become its Chief in 1953.

When we enacted Public Law 46, 25 years ago this month, we laid the groundwork for a national program for conserving soil and water resources on farm, grazing, and forest lands of the Nation. I am proud that I have been associated with many improvements and additions, including new legislation, that have

developed in response to needs of the program.

The original act, of course, established the Soil Conservation Service, only agency of Government that devotes all its resources to soil and water conservation. The Soil Conservation Service work started on a demonstration basis.

But it was obvious from the beginning that a demonstration program, although it showed how we could conserve soil and water on our farmlands, was not the final answer. We knew that Government could not do the job. It was a job for the farmers and ranchers themselves. But they needed help.

Thus we moved into a new phase of our national soil and water conservation program. At the suggestion of President Franklin D. Roosevelt the States began to enact soil conservation district enabling acts.

These State laws authorized farmers and ranchers to organize and manage local subdivisions of the State to plan and carry out locally adapted soil and water conservation and land-use programs.

The first soil conservation district in the world was organized in North Carolina in 1937. That was the beginning of what I consider to be the most significant movement in our agricultural history.

Farmers and ranchers everywhere liked soil conservation districts because they are farmer organized and farmer run. The farmers develop their own programs and they direct the job of carrying them out. Districts are the coordinating agency through which various kinds of needed State and Federal aid are channeled to cooperating farmers.

Districts formed a partnership with the Soil Conservation Service. Soil Conservation Service assigns technical specialists to districts upon requests. They help the leaders of the district carry out the district's program. Soil Conservation Service is a junior partner. I do not know of a finer relationship anywhere than the one that exists between local soil conservation districts and Soil Conservation Service technicians.

Soil conservation districts swept the country. Today there are more than 2,860 of them in the 50 States and in Puerto Rico and the Virgin Islands. Twenty-one States are completely covered by soil conservation districts, another 12 are more than 90 percent covered, 9 are between 80 and 90 percent and 5 are between 70 and 80 percent covered. More than 95 percent of the farms and ranches in the Nation are now within the legal boundaries of soil conservation districts. These districts have about 1.9 million cooperators.

Soil conservation districts have had tremendous impact upon American agriculture. They are changing the landscape of America into a pattern of utility and beauty. You can see the effects of their work almost anywhere you look.

More than 14,000 local men serve on the governing bodies of soil conservation districts. They are elected by their fellow farmers and ranchers. They serve without salary. These men are doing a great job for their communities and for their country. I know of no more dedicated and unselfish group of people. The true worth of the work they are doing will be assessed fully only by future generations.

There have been many milestones in our quarter century of soil and water conservation. I should like to call attention to two more—both of them the outgrowth of experience that required legislation authorizing new programs.

Our national program was greatly strengthened when we of the Congress enacted the Watershed Protection and Flood Prevention Act in 1954. We improved this legislation by amendments in 1956 and again in 1958.

The Small Watershed Act broadened the scope of the original Soil Conservation Act of 1935 by providing a means whereby the local people can obtain technical and financial assistance from the Federal Government in carrying out flood prevention and water management projects in small watersheds that the local people cannot complete with their own resources.

Prior to this legislation, we had been working at both ends of the problem but not in the middle. We had provided the means to solve soil and water problems on individual farms and ranches, and we had provided for big flood control and reclamation dams in major river basins. The new watershed act plugged the gap between.

Small watershed projects are handled in the same grassroots way that our national soil and water conservation program is handled through soil conservation districts. There is no dictation from the Federal Government. The local people themselves, through a responsible local organization, must initiate their own watershed projects, and they must participate in the planning, construction cost, and maintenance of them. Any application for Federal assistance must be approved by the State government.

The popular response to this program indicates its need. By April 1 of this year 216 small watershed projects were in operation, 538 others were in the planning stage, and an additional 524 local organizations had applications for assistance on file with the Soil Conservation Service.

Another soil and water conservation milestone was enactment of the Great Plains conservation program in 1956.

This program, tailored to the climatic hazards and low rainfall of the Great Plains States, including my own State of Montana, provides for technical and cost-sharing assistance to farmers and ranchers in developing and carrying out long-term land-use adjustments and a conservation plan under the terms of a contract with the Federal Government. The contracts run from 3 years to 10 years, and cost-shares are guaranteed for the life of the contract.

This program applies only to designated counties in an area that includes parts of Colorado, Kansas, Montana, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota, Texas, and Wyoming.

As of April 1, 4,222 farmers and ranchers operating 11¼ million acres had prepared conservation plans and had entered into contracts to carry them out. Nearly 3,000 additional applications were on hand.

We have come a long way in a brief quarter century, but much remains to be done. I am proud to have had a continuing role in the development of our national soil and water conservation program. I shall continue to support it with the firm conviction that by so doing I am contributing to the present and future welfare and safety of the United States.

Mr. YOUNG of North Dakota. Mr. President, Americans once had an unhappy record of squandering their originally abundant resources. When white men arrived on this continent, they found a land blessed beyond dreams with fertile soil and other natural resources. Assuming that these gifts of nature were inexhaustible, they dissipated and wasted them—often recklessly. Pioneers moved westward. They opened up new land for agricultural development, but many continued to waste the land by unwise farming methods.

Finally, we had to face up to a period of reckoning. In a time of drought in the 1930's, the soil began to move over large areas of the Great Plains. Excessive cultivation and lack of conservation had made the land vulnerable. We witnessed the spectacle of giant duststorms. People talked of the Dust Bowl. Obviously, something had to be done.

For many years, Dr. Hugh Bennett of North Carolina, a disciple of soil conservation, had been trying to bring America to a realization that it must take better care of its soil and water resources and move ahead with a program of conservation and wise land use.

Nevertheless, it was not until the dust from the Great Plains blew against the windowpanes of this Capitol Building that he got action. People in the East, as well as in the Midwest and Great Plains, all at once awakened to the fact that we were in trouble on the land.

The 74th Congress passed the Soil Conservation Act without a dissenting vote. It declared that soil erosion is a national menace and it made the conservation of soil and water resources a matter of national policy. The act also established the Soil Conservation Service as an agency of the Department of Agriculture.

I call this to the attention of the Senate for two reasons. First, because this is the 25th anniversary of the Soil Conservation Service and it is appropriate that we honor the men who make up this organization and who have done so much to halt the wasting of our soil and water resources.

The Soil Conservation Service is only 25 years old, but in that time it has rendered a service of which every citizen in this great country of ours can be proud.

It is also fitting on this occasion to recognize the 40 present Members of the Senate and the House of Representatives who were Members of the 74th Congress that enacted legislation of such far-reaching import.

I should also like to pay my respects to another organization, one that has played an important supporting role in

this conservation movement. I refer to the National Association of Soil Conservation Districts and the 14,000 soil conservation district supervisors who administer the district program.

About the time the Soil Conservation Service was established, farmers and ranchers were beginning to realize the dangers of soil erosion and the urgency for its control. Soil conservation districts was one important outgrowth of this realization. Organized under permissive legislation in each of the 50 States, Puerto Rico, and the Virgin Islands, the 2,865 soil conservation districts now in existence cover 1⅔ billion acres of the Nation's farm and ranch land. These districts, as local units of government, are doing a tremendous job in soil and water conservation. They are serving effectively as the local managers and coordinators of local, State, and Federal conservation efforts.

Twenty-five years ago, responsibilities of the Soil Conservation Service were largely in the field of erosion control. Today Soil Conservation Service is responsible for many major functions. One in which I am particularly interested is the Great Plains conservation program, now functioning in parts of 10 Plains States.

Although I was born and reared in a Plains State, and was actively engaged in operation of my farm near Berlin, N. Dak., until I came to Washington in 1945, I had never fully realized the tremendous economic losses that this area was periodically suffering through drought, high winds, blizzards, hail, and hard rains.

The Great Plains conservation program is designed to help ranchers plan their operations so as to minimize the hazards of extreme weather, and it gives further emphasis to the soil conservation district program in attaining their soil and water conservation objective in the Plains States.

It is for these and many other reasons, which time does not permit me to go into now, that I direct your attention to the 25th anniversary of the Soil Conservation Service. Twenty-five years seems a long time in a human life. It is a short time in history. Yet in that time we have seen enormous conservation accomplishments and a major reduction in the erosion and loss of our priceless soil resources. The joint program of the Soil Conservation Service and soil conservation districts is having an effect—a vital, beneficial effect—on America's future.

That is why, on this occasion, it is fitting and proper that the Soil Conservation Service receive the recognition it so richly deserves for the magnificent job it has done to conserve and develop our soil and water resources—not only for the present generation, but for the Nation's growing population of the future.

Mr. HUMPHREY. Mr. President, it is my pleasure at this time to recognize the 25th anniversary of the Soil Conservation Service. Twenty-five years ago today Franklin D. Roosevelt, as President of the United States, signed into law the first Soil Conservation Act adopted for the United States. This act declared soil and water conservation on the lands of our Nation to be a permanent policy of the Congress. It called for the establishment of an agency of Government to be known as the Soil Conservation Service.

In its quarter century of existence the Soil Conservation Service has made for itself an outstanding reputation of service to agriculture and the entire Nation. I would summarize in four points the main reasons for this tremendous success.

First. The Soil Conservation Service has drawn into its ranks a corps of competent, scientific, dedicated public servants who have championed the cause of preserving America's natural heritage. These dedicated men have awakened millions of Americans to the need for soil and water conservation.

Second. The Soil Conservation Service developed the concept that each acre of farmland should be used within its capabilities and treated in accordance with its needs for protection and improvement—that each farmer needs to put into operation his own technically sound conservation plan for the soil, water, and timber resources upon which his family's livelihood and the Nation's long-term security depends.

Third. The Soil Conservation Service has taken the leadership in focusing public attention to the fact that vigorous and positive action for water conservation needs to move in step with our national program of soil conservation.

Fourth. The Soil Conservation Service conceived, developed, and nurtured the soil conservation district movement which I consider to be a model in the kind of a partnership that is needed between the private landowner and his Government.

The services of the Federal Government are made available to farmers through an agency of State government managed by local leaders elected by the local citizens. Under this arrangement nearly 2 million farmers in our Nation are receiving technical assistance in protecting and improving their land resources.

I think it worthwhile to review briefly how this arrangement was started, and I do this for a specific purpose.

President Franklin D. Roosevelt provided the inspired and needed leadership to get it started after the Congress had provided the basic legislation. In 1937, President Roosevelt sent to the Governor of each State a model soil conservation district law encouraging its enactment as it fit the State as a means through which the citizens of that State could seek the services of the Soil Conservation Service. Subsequently, all State legislatures enacted such legislation under which the people have now created 2,865 soil conservation districts covering most of the farms and ranches in the Nation.

The soil conservation program was launched by strong leadership at the very top of our Government. One of the dangers to the conservation movement today is the danger of official apathy. At the very time that our swiftly-growing population is building up explosive pressure upon our natural resources, we find that much of the original zeal for conservation has disappeared from the high levels of government.

We need to have more imaginative and responsible action for helping farmers and local communities advance conservation more rapidly. And this 25th anniversary of the Soil Conservation Service is a proper time to recognize this need.

I want to pay tribute to the men in the Soil Conservation Service for the fine job they have done in helping America get started in protecting and improving our natural heritage during their first quarter century of operations. But the job is only started. There is an enormous amount yet to be done. We have a tremendous challenge ahead. We must have national leadership with sufficient zeal to take the actions needed to meet this challenge.

AMENDMENT TO THE FEDERAL COAL MINE SAFETY ACT

The Senate resumed the consideration of the bill (S. 743) to amend the Federal Coal Mine Safety Act, in order to remove the exemption with respect to certain mines employing no more than 14 individuals.

Mr. COOPER. Mr. President, I rise to speak on the pending bill—S. 743—entitled "The Mine Safety Act." During the time the bill was considered in committee, in 1958 and 1959, I was a member of the Committee on Labor and Public Welfare, and participated in all the discussions in the Labor Committee.

My interest arises primarily from the fact that I serve in the Senate as a representative from Kentucky, a coal-mining State. Kentucky stands third among the States in the production of coal, being surpassed only by West Virginia and Pennsylvania. It is only natural that those who labor in the mines, mine operators, and all the business enterprises in the coal-producing areas, as well as the people of my State, should have a deep interest in any legislation affecting coal. And as a humane people we are particularly interested in measures which deal with the safety of the mine workers.

As I said a few minutes ago, no one can visit the coal-producing areas of our country, go into the mines and see the conditions under which miners must work, without being impressed with the necessity of every measure being taken to insure their safety.

I remember that in the summer of 1918 I went to Bell County and Harlan County, Ky., and worked at the coal mines there. This was not an extensive experience but I saw, for the first time, when I was 16 years of age, the difficult conditions under which miners must work. I was in the mines, I worked around the mines, for a limited period.

Since that time I have gone again and again to the coal-producing areas of eastern Kentucky and western Kentucky. I have been in the coal mines. I have talked to the miners. I know that theirs is a dangerous occupation. It is also

a necessary occupation. The coal miners are essential to the Nation's economy. Their work and the work and investment of coal operators is essential to the defense of the country. So, the people of my State, with its great coal-producing areas, both in western Kentucky and eastern Kentucky, are very much interested in this legislation.

Mr. President, I ask unanimous consent that there be printed in the RECORD at this point a table which relates to coal production in 1958, showing the tonnage mined, its value, and the wages earned by the miners.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Coal boosts the economy of 26 States

State	Total production [1] (net tons)	Value of production (f.o.b. mine price)	Recoverable reserves (net tons) assuming 50 percent recovery [2]	Number of man-days worked [1]	Approximate aggregate State income from wages
			Millions		
Alabama	11,181,943	$72,347,171	32,862	1,331,342	$33,283,550
Alaska	759,282	6,932,244	80,000	59,814	1,495,350
Arkansas	364,138	2,741,959	761	49,745	1,243,625
Colorado	2,974,189	19,302,486	49,703	400,641	10,016,025
Georgia	8,751	43,755	38	2,734	31,000
Illinois	43,912,405	176,527,868	68,276	2,243,234	56,080,850
Indiana	15,022,224	58,436,451	17,529	758,713	18,967,825
Iowa	1,178,613	4,148,717	14,225	101,221	2,530,525
Kansas	823,322	3,713,182	10,376	54,087	1,352,175
Kentucky	66,311,805	289,119,469	59,146	5,479,323	136,983,075
Maryland	837,738	3,158,272	595	124,116	2,211,000
Missouri	2,592,162	11,120,374	39,400	228,058	5,701,450
Montana	304,961	1,476,011	110,853	33,796	844,900
New Mexico	116,656	717,434	30,753	42,254	502,203
North Dakota	2,313,858	5,414,427	175,367	65,745	1,643,625
Ohio	32,028,396	126,191,880	41,306	1,996,296	49,907,400
Oklahoma	1,629,443	10,852,090	27,300	174,944	4,373,600
Pennsylvania	67,770,862	374,095,158	35,760	7,227,142	180,678,550
South Dakota	19,571	78,284	1,015	2,390	59,750

[1] Figures for 1958: Production and employment from U.S. Bureau of Mines, Department of the Interior.
[2] Reserves updated from 1954 U.S. Geological Survey on basis of Bureau of Mines' production figures.
[3] Not available. Texas produces substantial quantities of lignite annually, but production figures are not reported.

Mr. COOPER. West Virginia, Pennsylvania, Illinois, and Ohio, along with Kentucky, are the leading coal-producing States of the Nation.

The Senate will remember that from 1941 to 1952 the jurisdiction of the Bureau of Mines extended only to the inspection of mines and to the making of recommendations for the correction of conditions which were deemed to be inimical to safety. The Bureau had no power to enforce its recommendations.

In 1952 Congress enacted certain amendments to the Federal Mine Safety Act. These amendments authorized the Federal inspectors of the Bureau of Mines to close title II mines in which conditions causing imminent danger of explosion, fire, inundation, man trip, or man hoist were found. I might explain that title II mines are defined as those which employ more than 14 miners.

The amended act of 1952 also authorized the Federal inspectors to inspect all coal mines with respect to a number of safety provisions specified in section 209 of the act relating to ventilation, roof support, equipment, explosives, and other matters. If a Federal mine inspector finds a violation of these provisions in title II mines he can direct that the deficiencies be corrected, and if the corrections are not made in the time fixed for their completion an order closing the mine may be issued.

The 1952 amendment to the act provided an exemption from the mandatory powers of the Federal Bureau, to mines employing 14 or fewer miners. Those mines are called title I mines.

The bill which is being considered today was introduced in its original form by the Senator from Pennsylvania, Mr. Clark, the Senator from Illinois, Mr. Douglas, the junior Senator from Pennsylvania, Mr. Scott, the Senator from Alaska, Mr. Gruening, the late Senator Langer, and other Senators. An identical bill, S. 2930, was introduced in February 1958, by the senior Senator from Pennsylvania and other Senators. The bills were introduced for the purpose of removing the exemption now applicable to the small mines, called title I mines, and of placing them under the jurisdiction of the Bureau of Mines in the Department of the Interior, and to make the now applicable regulations to title II mines applicable also to title I mines.

Records introduced in the hearings show that in 1958 there were operating in the United States in that year 9,374 title I mines, or small mines, and 1,338 title II mines.

It can be asked why there should be any objection to removing the exemption given to title I mines, when the question of the safety of the men who work in the mines is involved. I may say for myself, categorically, that if S. 743 had presented only a question of safety, I would have voted for S. 743 in its original form. But, after the hearings began, it became apparent that other questions were involved. The true question involved is whether it is necessary to apply all the regulations of section 209 of the Mine Safety Act of 1952 to title I mines, and whether the application of these regulations will contribute to the safety of those who work in the small mines.

Second, if it should be determined that all of the regulations do not contribute to the increased safety of the miners, a serious economic question arises. Would the application of regulations which do not contribute to safety, because of their expense and impossibility of observance in small mines, have the effect of driving small mines out of business and consequently throwing out of work the thousands of miners who work in the small mines?

After a most thorough and deliberate consideration of the bill by the committee over a period of 2 years, the committee decided these were the real issues and that there was justice in these considerations. It did not report S. 743 as introduced, it reported the bill which the Senate is considering today, with the amendments which the distinguished Senator from Pennsylvania has described in some detail.

Because I opposed S. 743 in its original form—and I may say I opposed it vigorously in the committee, as the Senator from Pennsylvania and other committee members know—and because I offered some of the amendments which have been adopted in the pending bill, and joined in offering the other amendments; and because the people of Kentucky, particularly in the eastern section of Kentucky, which is a depressed area, have been much concerned about the effect of this bill and fear that it would close small mines, and lead to larger unemployment, I wish to speak about the issues raised in our deliberations in the committee.

I would like to point out the changes which have taken place in coal mining since World War II. Since World War II, the large coal operators in the United States faced with competition from other fuels—particularly oil and gas—and imports of residual oil have mechanized their mines with modern labor-saving equipment.

The United Mine Workers of America has, I think, with great vision, not opposed mechanization, but has joined with the operators in the mechanization of the large coal mines.

The testimony presented before the committee indicated that the cost of operating and equipping a large mine might run from $500,000 to $35 million per mine. In fact, Mr. Ankenny, Director of the Bureau of Mines, testified that he thought about $10 million would be the cost of opening and equipping a large modern mine.

In order to operate such a mine, a large acreage of coal is required, either under the surface of the ground—and such mines are called shaft mines—or at the base of mountains, where the openings are driven into the sides of the mountains, and such mines are known as drift mines.

Mechanization has, of course, reduced the number of mines, as well as the num-

ber of miners. Through mechanization, the average production of coal per day per man in these large mines has risen to 14 tons, and, in fact, in some of the largest and best equipped mines one man can, with the aid of machinery, produce from 35 to 40 tons a day, contrasted to the 3 to 5 tons a day that a miner using the old-fashioned pick and shovel and auger can produce in a small mine.

As a consequence of mechanization, thousands of coal miners—both members of the United Mine Workers and nonunion miners—have lost their jobs. Unfortunately, thousands of them will never again be able to secure jobs in the large mechanized mines.

In the eastern part of Kentucky, where I live, 60,000 men were employed in the mines before the war, but today less than 30,000 are employed, and these men can produce with modern equipment more coal than was produced by the 60,000 miners who were employed before World War II.

We have talked a great deal about depressed areas. So far as the coal-mining section of Kentucky is concerned—and I am sure this is also true of Pennsylvania and West Virginia—one of the chief causes of depression in the coal-mining areas is that men are out of work because of the mechanization of the large mines and because many of them will never again be able to secure employment in the large mines.

But miners must make a living for themselves and for their families. They have opened the small mines. Sometimes one man will open and operate such a mine, sometimes with the aid of his son or his cousin or other members of his family; or a group of unemployed miners will join together and open and operate a small mine. These small mines have become necessary for the very existence of these men and their families. My concern that these men have a way to make a living for themselves and their families led me to insist that our committee look closely into every consequence of the enactment of Senate bill 743, as it was originally introduced.

There were other factors which had to be taken into consideration. As the Senator from Pennsylvania [Mr. CLARK] stated in his opening remarks, the 1952 amendments to the Mine Safety Act provide an appeal procedure for title II mines, the large mines, when Federal inspectors direct the abatement or correction of conditions in the mines or when mine closing orders, under section 209, are issued. The appeal may be made to the Director of Mine Safety or to the Federal Coal Mine Safety Board of Review, here in Washington.

Review and judgment, which may be a closing order are made here in Washington. The large companies may have sufficient funds to be able to employ counsel, and undertake this complicated and expensive review procedure, as provided by the Federal Mine Safety Act of 1952; but I doubt that many of the small mine operators would have sufficient resources to employ counsel and undertake the long procedure to be able to appeal from orders rendered against them by Federal inspectors.

I do not know how many Members of the Senate have seen these small mines and seen the men who operate them. Many of them eke out only a bare existence; I know that not many of them would have sufficient funds to be able to follow the complicated and expensive procedures for appeal and review, all the way to Washington. The law reads well; it gives substantive rights of review and appeal. But, practically speaking, when small miners do not have sufficient funds to be able to employ counsel to undertake this complicated procedure, for all practical purposes, the right of appeal is not available to the small mine operators.

I wish to make another point which is important to my State in connection with its consideration of the bill: As I have previously pointed out, the highly mechanized title II mines require large acreages of coal—hundreds or thousands of acres of coal—in order to make possible a return on expensive mechanization. But the small title I mines can be operated on 1 acre, 2 acres, 5 acres, 10 acres, or 50 acres of coal; and often these mines are operated on small plots of land owned by the very men who operate the small mines.

If it were to happen, under Senate bill 743, as originally introduced, or as now proposed, that the act would be administered in such a way as to require expensive changes in the layout of the small mines, without actually contributing to their safety, or if the procedures for review and appeal were to be so complicated and costly as to foreclose actual appeal, and result in the closing of these small mines, then the Federal Government, and, in particular, to the Bureau of Mine Safety, would be arrogating to itself authority to deny many small landowners in the coal-producing States the usual right of recovery of their natural resources, and to those States the opportunity to recover their wealth.

I should like to suggest to the Senate that if it were proposed that the Federal Government be given the power to provide that only large acreages of farmland or timberland, or only large acreages of land which contain natural resources could be developed, and that small areas could never be developed, such a proposal would be defeated overwhelmingly. Frankly, this is not a true analogy to the bill we are now considering; but I say that if this measure were administered in such a way, without contributing to the safety of the workers, as to force these small mines out of business, not only would thousands of miners be forced out of work, but, in addition, the economy of these depressed areas would be ruined. Such a development would be disastrous to every business and every person in the coal-producing areas of Kentucky and other States.

Mr. RANDOLPH. Mr. President, will the Senator from Kentucky yield?

Mr. COOPER. I yield.

Mr. RANDOLPH. However, is it not the intent of the Congress to do just the opposite?

Mr. COOPER. Yes; the committee intends that these small mines shall not be treated unfairly, and I shall make that point.

It is the intent of the Committee on Labor, and I am sure the Senate, that Bureau of Mine Safety and the Director of that Bureau and the Federal inspectors shall not deal arbitrarily or unfairly with these small mines.

Actually, Mr. President, the issue of comparative safety in title I small mines and title II large mines revolved around the statistical evidence produced to the committee by the Bureau of Mines. First, regarding the conditions in mines which lead to major disasters, including explosions, fires, and floods, there is no question that the record of the small mines for safety is much better than that of the large mines.

Mr. Ankeny, Director of the Bureau of Mines, so testified.

The evidence showed that over a period of 5 years a total of 24 men were killed in the small mines, which number seven or eight thousand. While we are, of course, very sorry that 24 were killed in the small mines, it is a fact that over the same period of 5 years in the larger mines many more were killed.

I want to be perfectly fair. The difficult question arose as to safety conditions which are set out under section 209 of the Mine Safety Act. I believe the members of the committee will have to agree that Mr. Ankeny admitted that the statistical evidence from which he drew his conclusions regarding section 209 violations was incomplete. I believe the members of the committee will also agree that Mr. Ankeny brought before the committee, on three different occasions in 1958 and 1959 different statistics regarding violations.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. COOPER. Yes, I yield.

Mr. CLARK. I recall that there was before the committee a good deal of discussion about this question relating to accident rates on a man-hour-exposure basis as between the smaller and larger mines, and I agree that the Government figures presented originally did contain some discrepancies and that Mr. Ankeny did have to go back and revise his figures. But will not the Senator from Kentucky agree that when we got all through with the statistical argument, it nonetheless remained very clear that the fatality rate in the smaller mines was at least double the man-hour-exposure rate in larger mines? The figure I have shows 2.15 to 1.

Mr. COOPER. Yes; the last records which were produced by Mr. Ankeny were as the Senator from Pennsylvania has stated. I simply point out that there was a great deal of controversy and uncertainty over the accuracy of the records. Mr. Ankeny admitted they were not fully complete; and the fact that he had to revise them twice, indicated he could not have been too sure about them. The first time he appeared before the committee he presented them as the true statistics. Yet he came back twice with new statistics.

I do not deny that the last time he appeared the records showed, insofar as the section 209 requirements were concerned, that the fatality record for title I mines was greater than for title II mines.

Mr. CLARK. Will the Senator not agree that the conditions under which the large mines are operated would normally tend to make them have a larger major disaster rate than conditions under which smaller mines are operated? For example, large mines are deeper; they have more dangerous mining machinery; and they contain many electrical devices which are apt to trigger explosions. The distinction between the figures on fatalities, which are due to major disasters or to accident-type disasters, is irrelevant to a discussion of the bill, because increasing safety factors across the board is the objective of the legislation. The kind of disaster which occurs far too frequently in smaller mines is due, in many instances, to collapse of the ceilings or walls. They do not have man hoist accidents, for example, because they do not have man hoists or deep shafts.

Would the Senator not agree that we have to take those factors into consideration in weighing the statistics?

Mr. COOPER. Certainly; but we have to look at both sides of the question. It is true that the records show that major disasters have occurred more frequently in the larger mines than in the smaller mines. The entries to a smaller mine may go back into a hill 1,200 or 1,500 feet. But in a large mine there may be miles of entries, many rooms, and complicated equipment, which are more likely to be the scene of major disasters. On the other hand, the fact of the physical differences in the mines should lead the Director of the Bureau of Mine Safety to take these factors into consideration when he determines the regulations applicable to title I mines. For the complicated restrictions are not needed for title I mines, and this the committee has made clear.

I shall make one or two additional points and then I shall close. Other points appeared in the hearings. For example, the State boards have been doing a good job. The Senator will remember the testimony of Mr. Jame Phelan, chief of the Department of Mines and Minerals, Kentucky State Mine Department. He testified, as I remember, that his department made 11,000 inspections of the mines in Kentucky in 1 year. That was more than the Federal Bureau of Mines had made in all the coal-mining States of the United States in a year.

It will have to be considered that when this bill becomes law, if it does, the interest of the State bureaus of mine safety will diminish, because they will have no actual jurisdiction over the small mines. In my opinion, there will be fewer State inspections. As a result, safety conditions may not be improved.

It was further testified by Mr. Ankeny that another factor enters into mine safety—a factor hardly considered—and that is the factor of human error and judgment which miners, as all of us, unfortunately make.

There is another safety factor barely considered—the condition of roof and rib supports.

Several years ago the Bureau of Mines made a safety study. Mr. W. H. Tomlinson, of the Bureau of Mines, who made that study reported the greatest source of accidents came from inadequate roof and rib support. As yet, so far as we know, the Bureau of Mines has not done very much in this field.

In 1958, after we had concluded our hearings on S. 3290—identical to S. 743—the committee voted to report a bill which authorized the Director of the Bureau of Mines to close down mines in cases of imminent danger. It also directed the Bureau to conduct hearings to ascertain the causes of mine accidents, the incidence of fatalities and injuries in title I and title II mines, and to determine the economic effect of the Mine Safety Act of 1952 on small mines, if it should be applied to small mines. It was an amendment which I introduced in the committee, and the committee accepted after hearing all the testimony.

The bill was reported to the Senate unanimously in 1958. But for some reason it was never considered in the Senate.

It is now too late to discuss that bill. I only say that if the bill had been passed in 1958, we would have the information we need today.

I did my best during 2 years in the Committee to secure a fair bill—one that would provide greater safety for miners and yet protect small mines and their miners. As I have already said, the Senator from Pennsylvania and other committee members did the same.

I know I did all that was possible to get a fair bill to protect the little mines, and now I intend to vote for the bill.

The bill contains several amendments which will be helpful amendments which I offered or joined in offering. First, the bill makes it mandatory that the Director of the Bureau of Mine Safety conduct hearings to determine whether the regulations applicable to title II mines would contribute to safety in title I mines. If not, the Director is directed to cancel them so far as title I mines are concerned. It is a directive to draw a code applicable to title I mines—as distinguished from title II mines. I hope the Director of Mine Safety will consider this to be his duty under the bill. He has no alternative other than to consider it his duty—a duty directed by the Committee on Labor and the Congress, if this bill becomes law.

A second amendment to the bill provides, in the case of a small mine operator, that when an order for the abatement of an unsafe condition is made by a Federal inspector a hearing shall be held in the county in which the mine is located. This will be helpful to the small miner, and will enable him to secure a hearing at home.

Third, if a Federal inspector finds under section 209 a condition in a mine employing eight or fewer miners should be abated, the small mine operator may appeal from the finding before the mine is closed. This provision will be helpful to the small mine operator, as he can keep his mine open while the appeal is heard.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. COOPER. I yield.

Mr. CLARK. I am happy indeed my good friend from Kentucky is going to vote for the bill. The form in which the bill is now presented is a reflection of the hard work the Senator did.

A moment or two ago the Senator from Kentucky referred to the relationship between the State mine inspectors and the Federal mine inspectors. I recall very well the very able gentleman from Kentucky who came before the committee and testified concerning the large number of inspections made.

I invite my friend's attention, however, to the relationship, generally speaking, between State inspectors and Federal inspectors, which has been good. There is a telegram in the record, at page 247, dated January 28, 1959, from Joseph T. Kennedy, Secretary of Mines and Mineral Industries for the Commonwealth of Pennsylvania, which asserts his support of the bill, and indicates that the coal miners working in the small coal mines would be helped by Federal cooperation. As a State official, he hopes the bill will pass.

Mr. COOPER. I remember that statement.

Mr. CLARK. Mr. President, I ask unanimous consent that the telegram be printed in the RECORD.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

HARRISBURG, PA., *January 28, 1959.*

HON. JOSEPH S. CLARK,
U.S. Senate Building,
Washington, D.C.:

The Pennsylvania Department of Mines and Mineral Industries is in favor of the removal of the exemption in title I of the Federal Coal Mine Safety Act. We believe that all safety rules and regulations should apply to smaller mines as well as to other mines. Federal cooperation in the promotion of safety for the coal miner working in the small coal mines would be well received by us. Your assistance in this matter will be appreciated.

JOSEPH T. KENNEDY,
Secretary of Mines and Mineral Industries.

Mr. COOPER. The fourth amendment in the bill provides that in case a Federal inspector finds a condition of imminent danger and makes a decision to close the mine, the mine operator, even though a State plan may not have been adopted, may ask for a State inspector to also examine the mine. If there is disagreement between the Federal inspector and the State inspector, then a request can be made for an independent inspector to be appointed by the district judge of the Federal court in the district in which the mine is located.

On the whole, as I have said, these amendments have given us a much better bill than the bill which was originally introduced.

I repeat, if it had been correct that S. 743, as originally introduced, involved only a question of mine safety, a question affecting the safety of the men who work in the mines, I would have voted

for it even though it would have meant the closing of some small mines, because the lives of the people who work in mines are more important than the material things which may be at stake. However, when it became clear that the regulations, now contained in the Federal Mine Safety Act and applicable to title I mines would not necessarily contribute to the safety of the men who work in these small mines but might close down small mines and put miners out of work, then these economic factors had to be taken into consideration.

I come from a State directly involved. We have had depressed conditions in the coal mine areas of eastern Kentucky for years.

I wanted to be sure that this bill, or at least as introduced, would not extend the depression in the coal mining areas of Kentucky and other States—that it would not put the small mines out of business, miners out of work, and hurt every business and person in these areas.

I earnestly hope that if this bill is passed, the Director of the Bureau of Mines will take into cognizance the concern and intent of the committee and the Congress about these matters, as he administers the bill. I earnestly hope the Director will not act arbitrarily, and close down small mines in my State and in other States unless it is necessary for safety. If he does so he will put out of business little mines. He would bring unemployment to thousands of coal miners who depend on these small mines for their living, and for the living of their families and their children.

I again thank the members of the committee for their thorough and careful consideration of the bill.

Mr. THURMOND, Mr. MOSS, and Mr. RANDOLPH addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina is recognized.

Mr. THURMOND. Mr. President, I am opposed to passage of the bill because it would extend the long arm of the Federal Government into the States again. It seems that nearly three-fourths or more of the bills which come before the Congress are bills to extend the power of the Federal Government.

When the mine safety bill was passed a few years ago the little mines, those employing no more than 14 people, were exempt. Those mines have been under the jurisdiction of the States. Now an attempt is being made to change the provisions, to take the power away from the States and to bring it to Washington, D.C., to the Federal Government.

Mr. President, every week, every month, every year, we are building up more power in Washington, D.C.

Another reason why I am opposed to passage of the bill I think can be brought out from the testimony at the time I was a member of the Committee on Labor and Public Welfare, as shown beginning on page 218 of the hearings on S. 743, S. 1562, and S. 2403, dated July 21, 22, and 24, 1959. The following colloquy took place:

Senator THURMOND. I have in my hand a table of accident data prepared by the U.S. Bureau of Mines, on March 27, 1958.

Mr. ANKENY. Is that in the hearings?

Senator THURMOND. It is given on page 90 of the hearings on this bill. I believe that Public Law 552 which is the law giving the Federal Bureau of Mines the power to enforce safety regulations was passed in 1952, was it not?

Mr. ANKENY. That is correct.

Senator THURMOND. And in 1952 according to these figures, and if they are not right I would like for you to say so, fatal accidents were 0.88.

Mr. ANKENY. Yes.

Senator THURMOND. You have a copy of those figures there before you?

Mr. ANKENY. Yes. That is frequency rates; yes, sir.

Senator THURMOND. Of fatal accidents?

Mr. ANKENY. Yes, sir.

Senator THURMOND. In 1953, 0.85.

Mr. ANKENY. Yes.

Senator THURMOND. And in 1954, 0.96.

Mr. ANKENY. Yes.

Senator THURMOND. And in 1955, 0.88.

Mr. ANKENY. Yes.

Senator THURMOND. In 1956, 0.99.

Now isn't it true that since the passage of this act the fatal accident rate per million hours of exposure in title II bituminous mines has increased in spite of the efforts of the Federal Bureau of Mines and the United Mine Workers and the coal operators and the others?

Mr. ANKENY. You mean——

Senator THURMOND. I am asking you that question.

Mr. ANKENY. If they have increased?

Senator THURMOND. Is it not true that the fatal accident rate per million hours of exposure in title II bituminous mines has increased since the passage of Public Law 552?

Mr. ANKENY. No, sir; that is not true.

Senator THURMOND. Then are these figures wrong I have just read to you?

Mr. ANKENY. No; these figures are correct, I believe.

Senator THURMOND. Well, if these figures are right—let us go over them again.

Mr. ANKENY. All right.

Senator THURMOND. In 1952 the figure was 0.88; and in 1953, 0.85, which is a decrease that year and the only year since the act went into effect.

In 1954 it was 0.96; and in 1955, 0.88; and in 1956, 0.99.

Do not these figures show an increase in percentages for each year since Public Law 552 went into effect except the 1 year, 1953, right after the act was passed?

Mr. ANKENY. Yes, sir; they do, but that is not what you asked me the other time.

Senator THURMOND. Well, what do they indicate, then?

Mr. ANKENY. Well, they indicate to me—the figures, in the first place, are not complete, but if you compare the record of mine accidents from 1952 since the act was passed with the previous record of a similar length of time, it would show that they have decreased, not increased.

Senator THURMOND. Well, percentagewise these figures show an increase except for 1 year.

Mr. ANKENY. From year to year they show an increase except for 1 year, that is correct.

Senator THURMOND. Since the passage of Public Law 552 in 1952.

Mr. ANKENY. Yes, sir; that is correct.

That shows that even since the Federal law was enacted, supposedly on the theory of providing safety, the accident rate has increased every year except one. So who has done the best job—the Federal Government or the States? The figures speak for themselves. They show that the States have done a good job. They show that the accident rate has increased since this activity has been under the Federal Government.

I believe that the pending bill is being pushed by certain groups for certain purposes, and that the real intent is not safety. I am as much in favor of safety as anyone else. I am in favor of protecting the mine workers. But what Congress will do if it does not watch out is to close the small mines. When we have Federal regulation and Federal regimentation in every phase of life, we can expect trouble in the end, because we know that the more Federal regulation there is, the more Federal regimentation there is, the more the cost of living will go up, the more inspectors there will be, the more Government employees there will be, the more retirement there will be, and the more overhead expense there will be.

In the end, whom does it come out of? It comes out of the taxpayers, and it will come out of the small mine workers, as well as everyone else.

The small mines are not in a position to pay the large overhead and compete with large mines. When the Congress enacted the law in 1952, I presume it had in mind that it wanted to exempt the small mines from Federal regulation, because they could not afford to stand the additional expense.

I think it would be a great mistake, from an economic standpoint, from the standpoint of the welfare of the country, and from the standpoint of the employees in the small mines, who would stand a chance in the future of losing their jobs altogether, to pass the pending bill. As I mentioned when I started to speak, the bill would increase the power of the Federal Government to take over certain mines that are now under the jurisdiction of the States.

VISIT TO THE SENATE BY THE GOVERNOR OF HAWAII

Mr. FONG. Mr. President, I am very happy to present to the Senate the Governor of the State of Hawaii, who is performing an outstanding public service in the new State of Hawaii, which will become one of the greatest States of the Union. I present Gov. William F. Quinn.

Mr. KEATING. Governor Quinn was born in my part of the State of New York. Later he moved to St. Louis. As a result, it is sometimes said that he comes from St. Louis. However, he is not like a man I have heard about who was born in one city and then moved to another, and each city claimed that the other city was his closest affiliation. In this case we are very proud that the city of Rochester has produced such a distinguished citizen as Governor Quinn.

I have visited Hawaii and enjoyed its hospitality. I strongly urge all of my colleagues in the Senate to visit Hawaii. I also know of the magnificent work Governor Quinn is doing in our newest State, and I am pleased to welcome him here today.

Mr. COOPER. I am sure that all of us are very happy to have the Governor of our newest State visit us in the Senate. I am also sure that everything that has been said about his work as Governor is correct. I am proud to welcome him to the Senate Chamber. I may say to him

that we are also very proud of the Senators Hawaii has sent to us here.

Mr. FONG. I am deeply thankful to my colleagues for their extremely kind remarks. I know that any Member of the Senate who will visit Hawaii will receive a fine Hawaiian aloha.

AMENDMENT TO FEDERAL COAL MINE SAFETY ACT

The Senate resumed the consideration of the bill (S. 743) to amend the Federal Coal Mine Safety Act in order to remove the exemption with respect to certain mines employing no more than 14 individuals.

Mr. CLARK. Mr. President, I ask for the third reading of the bill.

The PRESIDING OFFICER (Mr. BYRD of West Virginia in the chair). The question is on agreeing to the committee amendment, as amended.

The committee amendment, as amended, was agreed to.

The PRESIDING OFFICER. The question is on the third reading of the bill.

The bill was ordered to a third reading, and was read the third time.

Mr. RANDOLPH. Mr. President, the measure now before us in this forum is essential legislation when considered in the context of respect for human life. I am one of the Senators from the State of West Virginia, in which bituminous coal mining is a dominant industry, even though it supplies much less employment now than it did prior to the acceleration of technological changes in our methods of production. Nonetheless, the coal industry is an essential one in the pattern of West Virginia's economy, and, indeed, in the structure of our national security, especially at this time of an uneasy truce in conflicts of a worldwide nature, and necessarily in the actual prosecution of any war in which this Republic and its people should be engaged.

Even though mining is a hazardous occupation, we must not only hope but we must strive for the time when there will be no fatalities in these operations.

So, today, it is not only appropriate that we consider this proposed legislation, but it is also the responsibility of the membership of the Senate very earnestly to consider the provisions which are contained in S. 743.

Mine safety is a battle which must be fought constantly by all who are concerned. There is no cutoff point for those who are concerned with the safety and the well-being of the miners of our country. It is important, of course, to our coal miners, and to our producers and to the State departments of mines, which have been mentioned today. I do not speak in disparagement of the work that has been done and is being done by State departments of mines. I am only saying that in this area of mine safety there is a very natural compact which has come about between State departments of mines and the Federal Bureau of Mines through the administration of the Federal Coal Mine Safety Act from its inception and its amendment, until today we face our responsibility again. It is a problem, of course, of the State legislative bodies, too. In the Commonwealth of Pennsylvania and in West Virginia and in Kentucky and in other coal mining areas of this Nation we have come to grips with this problem, and we have attempted, sometimes by a drastic approach, and at other times by a more considerate approach, to reach the time when the safety of the miners themselves will be served best.

Mr. President, I add once again that it is the responsibility of Congress and of all Members of this forum today to act in what I believe to be a necessary and positive way on this subject.

EVERY MINER ENTITLED TO PROTECTION

Every man—and I emphasize the words "every man"—who toils beneath the surface of the earth needs and is entitled to full protection from all sources. I say in no disparagement of the speeches which I heard earlier today in this Chamber that there is an indication of what I believe to be a very cautious attitude—frankly, an attitude which I believe is not well founded. When the Federal Government seems to indicate, through laws which are passed by Congress and administered by agencies, that there is concern for a problem of this type, we are alleged to be delving, as it were, into fields which the Federal Government should not enter. I do not agree with this viewpoint.

This is not a new advocacy on my part, because when I was privileged to have the responsibility of serving in the House of Representatives, I was a militant supporter of mine safety. I believe it appropriate at this point to say for the RECORD that Senator Matthew Mansfield Neely, who served so effectively in this body over a long period of years—and there are Senators here today who remember his service—carried forward most zealously his efforts in behalf of mine safety, not in the fifties, not in the forties, but in the thirties, when this was a subject for necessary action in the Congress.

Mr. President, when I served in the House of Representatives as a member of the Mines and Mining Committee, I was the chairman of the Subcommittee on Coal. Because of studies which I made, I came to wholeheartedly support the passage of what we thought at the time as being a comprehensive mine safety bill.

It is a matter of record that the coal industry, in the period before enactment of effective mine safety legislation, counted its injuries in five figures, and its fatalities at more than 2,500 in a single year. The fatalities for the year 1957, as an example of the positive impact of a Federal safety law, had dropped from the figure I gave to 452, and in 1959 to less than 360, according to information which I believe to be correct.

But in spite of gratification which we as Senators may feel concerning the decline in fatalities, and in spite of my personal satisfaction at having been a supporter of the original mine safety measures at the Federal level, I declare emphatically that 360 coal mine fatalities in a period of 12 months constitute too many deaths for this industry—or, in fact, for any industry. We must erect proper safeguards around those who toil within its operation.

ARGUMENTS AGAINST FEDERAL ACTION OVERCOME

I remember well the principal arguments—fallacious, I believe—which were used against the passage of the original mine safety bill. I have heard them made again today on the floor of the Senate by those who oppose the pending measure. Doubtless other Senators likewise are hearing that "It is too costly"; that "we cannot afford to do all the things the Federal law requires"; that "we will have to shutdown operations and put men out of work"; or, the oldest of all, namely, that "our State examinations are sufficient, and Federal examination is unnecessary duplication."

It is a well-established fact, despite the forecast years ago that the mines would forever close if the originally proposed mine safety bill became law, the more safely engineered, efficient, well-managed mines have not ceased to operate and to produce.

We know that State examinations were not, in themselves, adequate safety expedients for the miners and the producers alike.

We are aware, too, that Federal examiners, having power to close unsafe mines, did bring more safety to mining operations and communities throughout the coal-producing areas. Comparative fatality and injury statistics speak effectively and factually in this respect.

When the original mine safety legislation was enacted, it was anticipated that the fact a Federal inspector might be making an appearance at any mine, anywhere, at any time, would tend to keep the State inspectors more alert to the need of facing up to their duties and to do their utmost to halt violations of safety standards.

So there was an awareness then, and there still is, in some instances, that perhaps there was too much laxness and neglect in the matter of State inspections in those earlier days. In the State of West Virginia, marked improvement has been shown.

These factors—but mostly the indisputable excessiveness of injury and death in the mines—brought about the passage of the Federal Mine Safety Act.

FEDERAL INSPECTION PRINCIPLE NOT NEW

It is right and proper that there should be Federal inspection of mines. That principle was not established yesterday; it was established years ago. I cannot detect proper reasoning in any provision for safety measures which limits the extension of Government protection to men who accept work in mines employing more than 14 employees, and withhold the same protection to employees of mines in the same neighborhood—or, for that matter, in other communities—which employ 14 or fewer men.

Why should a mine on one side of a road, and employing 14 or more men, have to be kept in a safe condition under Federal and State law, while a mine on the other side, which hires 14 or fewer employees, completely escape the neces-

sity of having the same Federal law enforced with respect to its operations?

The answer to such a question is obvious, namely, that all miners should be entitled to equal protection against unsafe work conditions.

I share the sentiment stated by the distinguished senior Senator from Kentucky [Mr. COOPER]. He expressed a genuine concern that nothing we will do here today might seem to compound or even to initiate any hardship of operation—and I hope successful operation—of the mines of the country.

We in West Virginia are conscious of the contribution which has been made to our economy by the operators and the workers within the smaller mines. We are conscious of the value of that type of small business in our economy.

But there is a safeguard in existing mine law against arbitrary or illegal orders which might erroneously be issued by any Federal inspector of the U.S. Bureau of Mines. The bill, as I hope it will be passed today, does not disturb the appeal section, to which mine operators may properly resort; in fact, by the changes wrought by amendments, it has been strengthened.

I speak with feeling on this subject, because I believe the proposed legislation is in the public interest and will provide a greater degree of safety for the men who labor within the coal mines. I trust that it will become the law of the land.

Mr. KENNEDY. Mr. President, the passage of the mine safety bill will mark an important step forward in safeguarding the lives and the health of the courageous men who work in the Nation's mines.

I was chairman of the subcommittee from which this bill came. The bill was pushed with extreme vigor by the distinguished Senator from Pennsylvania [Mr. CLARK]. He was joined by a member of the Subcommittee on Labor, the distinguished senior Senator from West Virginia [Mr. RANDOLPH], who has just spoken.

The harsh fact of the matter is that the fatality rate in the small mines—to which the bill extends Federal protection and Federal standards—is twice the fatality rate in the larger mines, which are now covered by Federal legislation.

I am confident that the passage of this badly needed legislation will greatly lower the high accident rate and will help to assure the physical safety of thousands of the Nation's miners. There is no more hazardous or demanding labor than the work of those who toil in our mines.

I had the opportunity to visit a coal mine yesterday. I must say that after visiting it and talking with the men who worked in it, I believe more than ever that the proposed legislation is in the public interest. I hope the Senate will act favorably on the bill. I think such legislation is overdue.

Mr. BYRD of Virginia. Mr. President, I am sure there is not a man alive who does not wish devoutly for the absolute maximum of safety in all coal mining operations.

In this late day of enlightenment, I do not believe we can accuse anyone of deliberately failing to take necessary, appropriate, and feasible precautions against such accidents as happen in mines.

Coal mining is a substantial industry in Virginia. As a World War I fuel administrator, as a former Governor of Virginia, and as Senator from Virginia, I think I am qualified to discuss coal-mine safety legislation. This long study and experience have led me to the conclusion that complete mine safety cannot be legislated any more than other kinds of accident prevention.

Individual consciousness for safety precaution developed through continuing education and warning is the most effective deterrent to accidents. Two bills—S. 2403 and S. 1562—have been introduced in the Senate at this session to promote Federal participation in this constructive approach. But instead of these bills, we have before us the provisions of a third bill, S. 743.

As introduced, Senate bill 743 would have the effect of trying to legislate coal mine safety in small mines, now under State supervision, which cannot possibly conform to the Federal requirements it would force upon them.

The committee has modified slightly the original provisions; but as the bill is now before the Senate, it is definitely a foot in the door which may lead to the destruction of the small coal mine industry.

Under present coal mine safety law, Federal regulations are applied to big coal mine operations, which are referred to as title II mines. The regulation, inspection, and so forth, of small mines, now defined as mines employing 14 men or less, and referred to as title I mines, are left to State jurisdiction.

The provisions of Senate bill 743, as introduced, would put the so-called title I small truck mines employing 14 men or less under the same complex Federal regulations which govern the biggest coal mine operations in the world.

The committee has modified slightly these original provisions, and would set up a new class of mines for those employing less than eight persons underground, but I doubt that the ultimate effect would be very much of a change.

The title I small mines are, in fact, under more appropriate and better State inspection and regulation than that which could be provided under a Federal law designed primarily for application to big operations.

I assert that Virginia can better take care, within the State, of the safety requirements, enforcement and inspection for small truck mines than the Federal Government could.

In making this statement, I rely not only on my own experience and study, but also on the testimony of Mr. J. B. Taggart, whom I have known and admired for many years. Mr. Taggart has been in the coal-mining business for a lifetime. On July 22, he appeared before the Senate Labor and Public Welfare Committee as a special representative of the Governor of Virginia and of the commissioner of the State department of labor and industry. Mr. Taggart supported Senate bills 2403 and 1562 as proposed legislation which definitely could serve the purposes of small-mine safety and individual education of miners in terms of mine safety. Federal legislation such as that proposed in those bills is supported by all of the small-mine industry. But it is opposed by segments of the big-mine industry and the mine union.

The whole small-mine industry has opposed the provisions of S. 743, as introduced; and I think the provisions of the bill as recently reported by the committee represent little improvement.

Mr. Taggart in his testimony before the committee said Senate bill 743 not only would impede the efforts of States for safety in small mines, but also would harass, if not eliminate, the small coal mines in the United States.

These small-mine operations actually make a tremendous contribution to the economy of the Nation. They are employing some 30,000 to 40,000 miners. Many of them have been displaced from their jobs in big mines, by mechanization. In addition, these small mines are salvaging from our natural resources from 40 million to 50 million tons of coal a year which otherwise would be lost.

This proposal to extend Federal mine safety laws and regulations to small mines is put forth in the name of mine safety. On the surface, this presumes that extension of Federal jurisdiction will improve the safety record in these truck-mines.

I personally have looked into the statistical data available from the Federal Bureau of Mines; and I submit that they are neither adequate nor sufficiently accurate to be used as the basis for legislation.

I am supported in this conclusion by an exhaustive study conducted by Mr. Taggart and Mr. B. F. Reed, whose qualifications and reputation are beyond reproach. Both men have spent a lifetime in the coal-mining industry, and they have spent much time and money in the development of the record for the title I coal mine industry. They have gone to the sources of the very best information available.

On the record, both of these gentlemen dispute the Bureau of Mines figures on title I mines. They have challenged the figures in formal communications to the Department of Interior; and they have challenged the accuracy of the Bureau figures, before the Senate Committee on Labor and Public Welfare.

Their facts and figures have not been denied. On the contrary, the inadequacy of the Federal reporting on small mines has been conceded.

On last July 20, Mr. Elmer F. Bennett, Acting Secretary of the Interior said the Department preferred Senate bill 2403, providing for a survey and study of conditions in these small mines.

The Director of the Bureau of Mines, under cross-examination by the Senator from Kentucky [Mr. COOPER], in the Labor and Public Welfare Committee hearings this year, admitted that the Federal Bureau does not have correct

figures on employment, production, hours of exposure, or non-fatal accidents in title I mines. In fact, he conceded that the Federal figures were, at best, no better than 80 percent correct.

Frankly, from my observations there are vast differences in conditions and types of operations as between title I and title II mines; and these differences must be taken into account in making any comparison of records. We have no objection to the enactment of legislation which will provide for proper and adequate development of these facts by the Bureau of Mines, under Senate bill 1562, or by an independent commission, under Senate bill 2403, as the Interior Department proposes.

But I submit that the putting of small coal mines out of business by making an extension to them of complex Federal law and regulations cannot be justified. It certainly cannot be justified by the kind of facts and figures produced to date by the Bureau of Mines.

Mr. President, the pending bill has now been improved to some extent by means of the adoption of an amendment which was submitted by the Senator from Kentucky [Mr. COOPER]; and I am a cosponsor of the amendment. The amendment is on page 2, in line 3, and it reads as follows:

> The Director (of the Bureau of Mines) may, by regulation, establish, after reasonable notice and opportunity for hearing to interested parties, modify or make inapplicable any provision, or part thereof, of section 209 (of the Federal mine safety law) which he finds, after hearings, do not substantially contribute to the safety of men working in small mines.

This provision is broad and far reaching. It would give the Director of the Bureau of Mines the power to decide whether an act of Congress should be applied. It would be applied solely at his discretion.

It could develop that one Director would determine that the law should be applied, and the next Director should hold that it should not be applied. The confusion would be insufferable.

This amendment simply changes the word "may" to the word "shall." That change will result in some improvement of this bill. The amendment would make it mandatory for the Director of the Bureau of Mines to modify or make inapplicable any provisions of the Federal mine safety law found to be unnecessary for small mines.

However, Mr. President, even with this amendment added to the bill, I am opposed to the pending bill.

The PRESIDING OFFICER. The question is, Shall the bill pass?

Mr. JOHNSON of Texas. Mr. President, today the Senate is taking a historic step to further protect the lives of the miners who toil underground in our coal mines.

In passing this bill we know that the same protection which is now granted to men working in large mines will be extended to those working in mines employing 14 or fewer miners.

We hope that disasters such as those which happened in Maryland on April 11 and in Kentucky on the same day at almost the same hour will be prevented. In these disasters three men in each mine lost their lives because of a roof fall or cave-in. This may seem to be a small number of men, but it is all that were working in each mine. If there had been 25 or 50 men, they would all have been killed.

The bill now pending not only extends the protection of Federal safety inspection to small mines, but it also provides for easier appeals from the rulings of Federal inspectors by small mine operators to the appropriate administrative agency, and it specifically provides that employers operating small mines may have the Federal Coal Mine Safety Board of Review come to the immediate area where the mine is being operated and hold a hearing on an appeal in the county seat of the county in which the mine is located. Thus, the operator of a small mine will not be forced into an expensive procedure which would require him to go to Washington to present his case.

I repeat, Mr. President, that, in my opinion, the Senate is taking important action to protect the lives of coal miners in approving S. 743.

I express my appreciation to the author of the bill, the Senator from Pennsylvania [Mr. CLARK], and every Senator who supported it, and particularly the able occupant of the chair, the Senator from West Virginia [Mr. BYRD], and the senior Senator from West Virginia [Mr. RANDOLPH], for the contributions they have made in this debate. They have talked to me a number of times about the desirability for this type of legislation, and it is on their recommendation that the measure is before the Senate.

Mr. President, I ask that the yeas and nays be ordered on the passage of the bill.

The yeas and nays were ordered.

Mr. COOPER. Mr. President, I ask unanimous consent to have printed in the RECORD at this point a statement by my colleague [Mr. MORTON], who is unavoidably absent on official business.

My colleague has been very much interested in this legislation. He has been much concerned lest Senate bill 743, as originally introduced, might put many small mines out of business and throw out of employment many miners in such mines. My colleague has worked hard to obtain the amendments now in the bill, which, while insuring safety to miners, give greater protection to the small mines.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR MORTON

I know of no group of men more deserving of our respect and admiration than the coal miners of our Nation. Theirs is the unspectacular task of extracting from the earth a valuable energy resource of incalculable benefit to our national economy.

Coal mining is usually done under conditions of extreme hazard which constantly subject the miners to a high degree of personal risk. The industry has clearly recognized this hazard, and in order to secure the safety of its employees has done everything possible to maintain the safest possible working conditions.

This safety-minded and safety-conscious industry is constantly striving to reduce all accidents, whether fatal or nonfatal, through aggressive programs of education, promotion, demonstration and enforcement. The miners certainly are entitled to personal security from harm, and I certainly would be the last person to oppose any legislation which the miners themselves felt would give them a greater measure of protection from death or personal injury.

I think that the experience of recent years, in our study of the situation brought to focus by S. 743 of the 86th Congress and identical legislation during the 85th Congress, has demonstrated that mine safety is not a clear-cut issue. One would assume that since it involves mine safety that all miners would rally around the cause. This has not been the case.

When Congress enacted legislation during the 82d Congress as a basis to prevent coal mine disasters, mines employing 14 or fewer employees underground were exempt from the mandatory compliance provisions of the law. The mining industry usually refers to these operations as title I mines, and to those with 15 or more employees as title II.

The original intent of S. 743 simply repealed the title I exemption, but the Committee on Labor and Public Welfare, I feel, acted wisely and prudently in amending the bill in the form reported to the Senate. Although the exemption repealer is still in the bill, the provisions for appeal from an inspector's finding prior to closing down a mine have minimized the fears of the title I operators.

I would also like to commend the Senator from Pennsylvania [Mr. CLARK] for the understanding he has displayed of our problem and for his accepting our amendment concerning modification or nullification of section 209 provisions not applicable to improving safety conditions in the small mines.

Although the bill is now much more palatable to the small mine operators and their employees, they still firmly contend that S. 743 will not contribute materially to their safety. They see only one purpose in S. 743, and that is to force them out of business.

The issue of mine safety from the legislative point of view is not a simple one. It is, to the contrary, complex and controversial, and I would like to emphasize to my colleagues that S. 743 draws its major support from those who do not need it and is vigorously opposed by those it allegedly would help.

The national coal wage agreement between the United Mine Workers of America and signatory operators provides for the enforcement of safety regulations far more stringent than the Federal Coal Mine Safety Act. The union-company contracts incorporate the entire Federal Coal Mine Safety Code, which includes all of the provisions of the Federal law and many more.

The safety provisions are enforceable on all unionized mines, whether title I or title II, and it must logically follow that enactment of S. 743 will in no way whatsoever increase the safety security of miners working in these mines. Yet, the United Mine Workers union is the most vocal of all groups supporting the Clark bill. While I agree with the UMW that our miners should have the safest possible working conditions, I cannot believe that its intentions are motivated strictly by paternalistic sympathy for thousands of miners it does not control.

There is undivided sentiment among the small mine operators that mine safety legislation is nothing more than an economic club to pound them out of existence. I have heard this assertion time and time again from gentleman of intelligence and integrity whose entire lives have been spent mining coal, and I respect their judgment and opinions. I had hoped that before considering any legislation in this area and in view of the

conflict that we might have had the benefit of a thorough investigation of the safety and economic factors before undertaking any changes in the present law.

The coal mining industry has undergone quite an upheaval during the past 15 years, and the complicated situation in which we find ourselves today stems directly from that upheaval. In order to adjust itself, strictly as a matter of survival, to the loss of markets and to remain competitive in the fuels market, the industry turned to mechanization. Thousands of miners were displaced by machinery, and as they were forced from their jobs they turned to the small mines to continue the only occupation they have ever known.

The mines in Kentucky employ, on the average, from four to six employees. The capital required to open a small mine, usually on leased acreage, is very small. In many instances, the mines are strictly family operations. The small mine industry is an integral component of the economic structure of the Kentucky coal fields. In community after community, income derived from the small mines is the only source of income. The thousands of small mine employees are earning a living at jobs which keep them off the welfare list. They are responsible citizens in their communities, and I shudder to think what would have happened in the eastern Kentucky coal belt, already economically depressed, had it not been for the small mines.

The small mine operators are as concerned for the safety of their employees as the larger operators. Mine safety to them is personal and very realistic because in many mines they work shoulder to shoulder with other miners. They sincerely challenge the claim that Senate 743 will give them greater safety, and genuinely fear that should they be required to install expensive equipment to abate a disaster-type condition there will be no alternative but to cease operation.

The operating conditions in most title I mines are totally unlike those in title II operations. The mines are shallow, not deep; they do not have a large concentration of men at points of greatest peril; they do not experience the machine noise and dust which dull perceptory senses; they are not exposed to the constant danger of moving machinery.

I was a member of the House Committee on Labor and Education during the 82d Congress which considered H.R. 7408, later enacted as Public Law 552. In our report we made an unmistakable distinction between major disasters and ordinary day-to-day accidents. Public Law 552 is not a law enacted, nor was it intended, to reduce, control or eliminate the day-to-day type of accidents which account for the majority of all coal mine fatalities. We made it clear that Federal authority was restricted to major disasters, reserving the responsibility for controlling day-to-day accidents to the States. Subsequently, the Department of the Interior in 1954 urged greater Federal-State cooperation to bring State standards up to Federal levels, the sole purpose being the gradual withdrawal of Federal inspection from the inspection field. I feel that S. 743 will only lead to further Federal intrusion into strictly a State matter.

The title I exemption was granted in 1952 only after careful and intensive consideration. The danger of major disasters in small mines is negligible, and the Bureau of Mines admitted at the time that full enforcement among thousands of isolated mines would present a tremendous task.

I want to make it clear that the small mine industry is not opposing mine safety. If they thought remedial legislation were needed they assuredly would be the first to ask for it. I feel that Public Law 552 has done an excellent job in the major disaster prevention field, and yet disasters still occur in our mines. This is probably due to a great extent to the revolutionary changes we have seen in mining technology since the law was enacted. I hope that if S. 743 is enacted into law, that those empowered with its enforcement will administer it with the sole idea of improving mine safety and not for the purpose of shutting down the small mines, as many have feared will be the consequence.

Mr. JOHNSON of Texas. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that further proceedings under the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is, Shall the bill pass? On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senators from New Mexico [Mr. ANDERSON and Mr. CHAVEZ], the Senator from Rhode Island [Mr. GREEN], the Senator from Alaska [Mr. GRUENING], the Senator from Ohio [Mr. LAUSCHE], the Senator from Louisiana [Mr. LONG], and the Senator from Georgia [Mr. RUSSELL] are absent on official business.

I also announce that the Senator from Oregon [Mr. MORSE], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Alabama [Mr. SPARKMAN], and the Senator from Missouri [Mr. SYMINGTON] are necessarily absent.

I further announce that, if present and voting, the Senators from New Mexico [Mr. ANDERSON and Mr. CHAVEZ], the Senator from Rhode Island [Mr. GREEN], the Senator from Alaska [Mr. GRUENING], the Senator from Ohio [Mr. LAUSCHE], the Senator from Louisiana [Mr. LONG], the Senator from Oregon [Mr. MORSE], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Georgia [Mr. RUSSELL], the Senator from Alabama [Mr. SPARKMAN], and the Senator from Missouri [Mr. SYMINGTON] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from Maryland [Mr. BEALL], the Senator from Utah [Mr. BENNETT], the Senator from Kentucky [Mr. MORTON], and the Senator from Delaware [Mr. WILLIAMS] are necessarily absent.

The Senator from New York [Mr. JAVITS] is absent by leave of the Senate to attend as Chairman of the Economic Committee a meeting of the NATO Parliamentarians Conference at Strasbourg, France.

If present and voting, the Senator from Maryland [Mr. BEALL], the Senator from Utah [Mr. BENNETT], the Senator from New York [Mr. JAVITS], the Senator from Kentucky [Mr. MORTON], and the Senator from Delaware [Mr. WILLIAMS] would each vote "yea."

The result was announced—yeas 80, nays 4, as follows:

[No. 166]

So the bill (S. 743) was passed.

Mr. CLARK. Mr. President, I move that the Senate reconsider the vote by which the bill was passed.

Mr. RANDOLPH. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT OF MUTUAL SECURITY ACT OF 1954

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 1319, S. 3058, and I invite the attention of the Senator from Arkansas to this request.

The PRESIDING OFFICER. The clerk will state the bill by title for the information of the Senate.

The CHIEF CLERK. A bill (S. 3058) to amend further the Mutual Security Act of 1954, as amended, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the Senate proceeded to consider the bill, which had been reported from the Committee on Foreign Relations with an amendment, to strike out all after the enacting clause and insert:

That this Act may be cited as the "Mutual Security Act of 1960".

CHAPTER I—MILITARY ASSISTANCE

Military assistance

SEC. 101. Chapter I of the Mutual Security Act of 1954, as amended, which relates to military assistance, is amended as follows:

(a) In section 103, which relates to authorizations, insert the following new subsection (d):

"(d) The value of programs of equipment and materials for American Republics, pursuant to any authority contained in this chapter other than section 106, in any fiscal year beginning with the fiscal year 1961, shall not exceed $55,000,000. For the purposes of this subsection, the value of nonexcess equipment and materials shall be as defined in section 545(h) of this Act, and the value of excess equipment and materials (as excess is defined in section 545(h)

of this Act) shall mean the acquisition cost to the Armed Forces of the United States of such equipment and materials."

(b) In section 105(b)(4), which relates to conditions applicable to military assistance, strike out the last sentence.

CHAPTER II—ECONOMIC ASSISTANCE

Defense support

SEC. 201. Title I of chapter II of the Mutual Security Act of 1954, as amended, which relates to defense support, is amended as follows:

(a) In section 131(b), which relates to general authority, strike out "1960" and "$751,000,000" and substitute "1961" and "$700,000,000", respectively.

(b) In section 141, which relates to conditions of eligibility for assistance, strike out "No such assistance" in the second sentence and substitute "No defense support or military equipment and materials".

(c) In section 142(a), which relates to agreements, strike out "No assistance" in the introductory clause and substitute "No defense support or military equipment and materials".

Development Loan Fund

SEC. 202. Title II of chapter II of the Mutual Security Act of 1954, as amended, which relates to the Development Loan Fund, is amended as follows:

(a) Amend section 201, which states the purposes of the Development Loan Fund, as follows:

(1) In the last sentence, after "to develop their economic resources" insert "and free economic institutions", and after "to increase their productive capabilities" insert "in agriculture as well as in industry".

(2) At the end of the section, add the following new sentences: "The Congress recognizes that the accomplishment of the purposes of this title in rapidly developing countries requires the development of free economic institutions and the stimulation of private investment, local as well as foreign, in the field of housing. It is the sense of the Congress that, consistent with the other purposes of this title, special consideration should be given to loans and guarantees to stimulate activities in this field."

(b) In clause (3) of the first sentence of section 202(b) insert "or free economic institutions" after "economic resources".

(c) In section 205(a), which relates to management, powers, and authorities, strike out "Under Secretary of State for Economic Affairs" in the first sentence and substitute "Secretary of State".

(d) Insert after section 206 the following new section 207:

"SEC. 207. HOUSING PROJECTS IN LATIN AMERICAN COUNTRIES.—It is the sense of the Congress that in order to stimulate private homeownership, encourage the development of free financial institutions, and assist in the development of a stable economy, the authority conferred by this title should be utilized for the purpose of assisting in the development in the American Republics of self-liquidating pilot housing projects designed to provide experience in countries at various stages of economic development by participating with such countries in (1) providing capital for the establishment of, or for assistance in the establishment of, savings and loan type institutions in such countries; and (2) guaranteeing private United States capital available for investment in Latin American countries for the purposes set forth herein."

Technical cooperation

SEC. 203. Title III of chapter II of the Mutual Security Act of 1954, as amended, which relates to technical cooperation, is amended as follows:

(a) In section 304, which relates to authorization, strike out "$179,500,000" and "1960" and substitute "$172,000,000" and "1961", respectively.

(b) Amend section 306, which relates to multilateral technical cooperation and related programs, as follows:

(1) In subsection (a), which relates to contributions to the United Nations Expanded Program of Technical Assistance and related fund, strike out "$30,000,000" and "1960" and substitute "$33,000,000" and "1961", respectively.

(2) In subsection (b), which relates to contributions to the technical cooperation program of the Organization of American States, strike out "1960" and substitute "1961".

(c) In section 307, which relates to advances and grants, insert "(a)" immediately after "SEC. 307. ADVANCES AND GRANTS; CONTRACTS.—", and at the end thereof add the following:

"(b) The President shall arrange for a nongovernmental research group, university, or foundation to study the advisability and practicability of a program, to be known as the Point Four Youth Corps, under which young United States citizens would be trained and serve abroad in programs of technical cooperation. Not to exceed $10,000 from funds made available pursuant to section 304 of this Act may be used to help defray the expenses of such a study."

SPECIAL ASSISTANCE AND OTHER PROGRAMS

SEC. 204. Title IV of chapter II of the Mutual Security Act of 1954, as amended, which relates to special assistance and other programs, is amended as follows:

(a) In section 400(a), which relates to special assistance, strike out "1960" and "$247,500,000" and substitute "1961" and "$260,000,000", respectively.

(b) In section 401, which relates to the United Nations Emergency Force, strike out "1960" in the second sentence and substitute "1961".

(c) In section 402, which relates to earmarking of funds, strike out "1960" in the first sentence and substitute "1961".

(d) In section 403, which relates to responsibilities in Germany, strike out "1960" and "$7,500,000" in the first sentence and substitute "1961" and "$6,750,000", respectively.

(e) Insert after section 403 the following new section 404:

"SEC. 404. INDUS BASIN DEVELOPMENT.—The Congress of the United States welcomes the progress made through the good offices of the International Bank for Reconstruction and Development toward the development of the Indus Basin through a program of cooperation among south Asian and other nations of the free world in order to promote economic growth and political stability in south Asia, and affirms the willingness of the United States, pursuant to authorities contained in this and other Acts, to participate in this significant undertaking. In the event that funds appropriated pursuant to this Act are made available to be used by or under the supervision of the International Bank for Reconstruction and Development in furtherance of the foregoing purposes, such funds may be used in accordance with requirements, standards, or procedures established by the Bank concerning completion of plans and cost estimates and determination of feasibility, rather than with requirements, standards, or procedures concerning such matters set forth in this or other Acts; and such funds may also be used without regard to the provisions of section 901(b) of the Merchant Marine Act of 1936, as amended (46 U.S.C. 1241), whenever the President determines that such provisions cannot be fully satisfied without seriously impeding or preventing accomplishment of such purposes.".

(f) Amend section 405, which relates to migrants, refugees, and escapees, as follows:

(1) In subsection (c), which relates to contributions to the program of the United Nations High Commissioner for Refugees, strike out "1960" and substitute "1961".

(2) In subsection (d), which relates to the continuation of activities undertaken for selected escapees, strike out "1960" and "$5,200,000" and substitute "1961" and "$3,500,000", respectively.

(g) In section 406, which relates to children's welfare, strike out "1960" and substitute "1961".

(h) In section 407, which relates to Palestine refugees in the Near East, strike out "1960" and "$25,000,000" in the first sentence and substitute "1961" and "$22,000,000", respectively; strike out the proviso in the first sentence; and insert after the first sentence the following new sentences: "After January 1, 1961, United States contributions shall not be used for programs of relief which heretofore have been administered on the basis of ration cards except for refugees whose need and eligibility for relief have been certified after July 1, 1960. The provisions of section 548, which relate to the availability of unexpended balances, shall not be applicable to unobligated balances of any funds heretofore or hereafter appropriated pursuant to this section. The President shall include in his recommendations to the Congress for fiscal year 1962 programs under this Act specific recommendations with respect to a program for the progressive repatriation and resettlement of refugees and for reducing United States contributions to the United Nations Relief and Works Agency for Palestine Refugees in the Near East."

(i) Section 409, which relates to ocean freight charges, is amended as follows:

(1) In subsection (a), after "such nations and areas" insert ", or, in the case of such nations and areas which are landlocked, transportation charges from the United States ports to designated points of entry in such nations and areas,".

(2) In subsection (c), strike out "1960" and "$2,300,000" and substitute "1961" and "$2,000,000", respectively.

(j) Amend section 411, which relates to administrative and other expenses, as follows:

(1) In subsection (b), which relates to certain expenses of administering nonmilitary assistance, strike out "1960" and "$39,500,000" and substitute "1961" and "$40,000,000", respectively.

(2) In subsection (c), which relates to administrative and other expenses of the Department of State, strike out "to" after "appropriated" and substitute "for expenses of".

(k) In section 419(a), which relates to atoms for peace, strike out "1960" and "$6,500,000" and substitute "1961" and "$3,400,000", respectively.

CHAPTER III—CONTINGENCY FUND

SEC. 301. Section 451(b) of the Mutual Security Act of 1954, as amended, which relates to the President's special authority and contingency fund, is amended by striking out "1960" and "$155,000,000" in the first sentence and substituting "1961" and "$175,000,000", respectively.

CHAPTER IV—GENERAL AND ADMINISTRATIVE PROVISIONS

SEC. 401. Chapter IV of the Mutual Security Act of 1954, as amended, which relates to general and administrative provisions, is amended as follows:

(a) Section 502, which relates to use of foreign currency, is amended by adding the following new subsection:

"(c) Notwithstanding section 1415 of the Supplemental Appropriation Act, 1953, or any other provision of law, if the President finds that participation by the United States in an internationally financed program to preserve the great cultural monuments of the Upper Nile would promote the foreign policy of the United States he may, subject to the approval of the Congress, use or enter

into agreements with friendly nations or organizations of nations to use, for this purpose, foreign currencies owned by the United States which have been generated under this Act or under the Agricultural Trade Development and Assistance Act of 1954, as amended, in the countries in which the program is to be carried out, but the value of foreign currencies so used shall not exceed an amount equal to 33⅓ per centum of the total cost of such program."

(b) Section 504(d), which relates to small machine tools and other industrial equipment, is repealed.

(c) In section 505(a), which relates to loan assistance and sales, insert after the first sentence the following new sentence: "Commodities, equipment, and materials transferred to the United States as repayment may be used for assistance authorized by this Act, other than title II of chapter II, in accordance with the provisions of this Act applicable to the furnishing of such assistance.".

(d) In section 513, which relates to notice to legislative commodities, insert before ", and copies" in the last sentence the following: "and under the last clause of the second sentence of section 404".

(e) Amend section 523, which relates to coordination with foreign policy, by adding the following new subsection:

"(d) Whenever the Chief of the United States diplomatic mission in a country determines that the achievement of United States foreign policy objectives there requires it, he may issue regulations applicable to officers and employees of the United States Government and to contractors with the United States Government governing the extent to which their pay and allowances received and to be used in that country shall be paid in local currency. Notwithstanding any other law, United States Government agencies are authorized and directed to comply with such regulations."

(f) Amend section 527, which relates to employment of personnel, as follows:

(1) In subsection (b), which relates to employment of personnel in the United States, strike out "seventy" and "forty-five" in the first sentence and substitute "seventy-six" and "fifty-one", respectively.

(2) In subsection (c), which relates to employment of personnel outside the United States, strike out "Director" in the introductory clause and substitute "President"; and insert before the period at the end of paragraph (2) the following new proviso: ": *Provided further*, That Foreign Service Reserve officers appointed, or assigned pursuant to this paragraph shall receive in-class promotions in accordance with such regulations as the President may prescribe".

(3) In subsection (d), which relates to appointment of alien employees outside the United States, strike out ", at the request of the Director".

(g) In section 534(a), which relates to reports, strike out "six months" in the first sentence and substitute "fiscal year".

(h) In section 537(a), which relates to provisions on uses of funds, amend paragraph (3) to read as follows: "(3) contracting with individuals for personal services abroad: *Provided*, That such individuals shall not be regarded as employees of the United States for the purpose of any law administered by the Civil Service Commission;".

(i) In section 537(c), which relates to construction or acquisition of facilities abroad, strike out "$2,750,000" and substitute "$4,250,000".

CHAPTER V—TECHNICAL AMENDMENTS REFLECTING NEW LIMITS OF UNITED STATES

SEC. 501. The Mutual Security Act of 1954, as amended, is amended as follows:

(a) In section 205(c), strike out "continental" in the twelfth clause of the first sentence.

(b) In section 411(d), strike out "the continental limits of".

(c) In section 527(c), strike out "the continental limits of" in the introductory clause.

(d) In section 527(d), strike out "the continental limits of".

(e) In section 530(a), strike out "the continental limits of".

(f) In section 537(a), strike out "continental" in the last proviso of paragraph (5) and in paragraphs (13) and (17); and strike out "the continental limits of" in paragraph (10).

CHAPTER VI—AMENDMENTS TO OTHER LAWS

SEC. 601. The Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1691 and the following) is amended as follows:

(a) In section 104, which relates to use of foreign currencies, strike out all following "Acts" where it first appears in the last proviso and insert a period.

(b) In section 202, which relates to transfers of surplus agricultural commodities on a grant basis, strike out "The" at the beginning thereof and substitute the following: "In order to facilitate the utilization of surplus agricultural commodities in meeting the requirements of needy peoples, and in order to promote economic development in underdeveloped areas in addition to that which can be accomplished under title I of this Act, the".

(c) In section 203, which relates to delivery of relief supplies, after the words "designated ports of entry abroad" insert ", or, in the case of landlocked countries, transportation from United States ports to designated points of entry abroad,".

SEC. 602. Section 501(b) of the Mutual Security Act of 1959 (73 Stat. 256), which relates to international cooperation in health, is repealed.

SEC. 603. Section 2 of Public Law 174, Seventy-ninth Congress, as amended (22 U.S.C. 279a), which relates to United States membership in the United Nations Food and Agriculture Organization, is amended by inserting "such" before "sums" and striking out "not exceeding $3,000,000."

SEC. 604. Section 3(a) of Public Law 403, Eightieth Congress, as amended (22 U.S.C. 280b), which relates to United States membership in the South Pacific Commission, is amended by striking out "$75,000" and substituting "$100,000".

SEC. 605. Title II of the United States Information and Educational Exchange Act of 1948, as amended (22 U.S.C. 1431), which relates to interchange of persons, knowledge, and skills, is amended by adding the following:

"ASSISTANCE TO STUDENTS FROM OTHER COUNTRIES

"SEC. 204. (a) With respect to students from other countries attending colleges or universities in the United States, under the provisions of this Act or under any other government, institution, or individual program which furthers the purposes of this Act, the Secretary is authorized to provide for counseling, orientation, supplementary English language training, and such other assistance as will help them to have a fruitful experience here consistent with the objectives of section 2.

"(b) Grants which are made to colleges and universities under this section shall be made in the discretion of the Secretary on the basis of specific programs submitted to him.

"(c) Institutions receiving such grants shall be obliged to contribute an equal amount to such program. No grant to an institution shall exceed $100 per foreign student enrolled in the institution during the period of the grant. No part of such grant shall be payable to a foreign student. The total amount of such grants shall not exceed $1,000,000 in any fiscal year."

SEC. 606. The President shall have a study made of the functions of, and the degree of coordination among, agencies engaged in foreign economic activities, including the Department of State, the International Cooperation Administration, the Development Loan Fund, the Export-Import Bank, and the Department of Agriculture, with a view to simplifying and rationalizing the formulation and implementation of United States foreign economic policies. The President shall include in his presentation to the Congress of the fiscal year 1962 mutual security program his findings and recommendations resulting from such study.
